(9) The few examples adduced here show that for the majority of the *amthāl* a certain formative process can be shown at work, and that includes the inner form—the shaping of the thoughts—and an outer form which exists in the shape of linguistic, stylistic, and metrical peculiarities. Both these phenomena cannot be pursued here (cf. al-Dhubaib, *Study* [cf. below, iii, 12]; Ch. Pellat, *Sur la formation de quelques expressions proverbiales en arabe*, in *Arabica*, xxiii [1976], 1-12). Well-known, appreciated and much-quoted verses, so-called *abyāt sāʾira*, were compiled in special collections, e.g. Ḥamza al-Iṣfahānī's *Kitāb al-Amthāl al-ṣādira ʿan buyūt al-shiʿr* (Brockelmann, I, 152; Sezgin, viii, 200f.; a Cairo edition is under way). Poets like Ṣāliḥ b. ʿAbd al-Ḳuddūs or Abu ʾl-ʿAtāhiya have also made use of many *amthāl* in their verse (cf. above, ii, 1, c); the figurative sayings which can be found in al-Mutanabbī's *dīwān*, were, e.g., already extracted and arranged in the poet's own century by al-Ṭālaḳānī (d. 385/995). Such *abyāt sāʾira* and countless *amthāl* are spread far and wide across the whole body of Arab literature (cf. Sellheim, *op.cit.*, 21-2, ²39ff.); one finds it richly represented especially in the *adab* literature from al-Djāḥiẓ to al-Ābī (cf. Maḥmūd Ghanāyim, in

al-Karmil, Haifa, vi [1985], 165-87; U. Marzolph, in *OC*, lxix [1985], 81-125) and al-Tha^c^ālibī (regarding his *K. al-Amthāl*, cf. Sezgin, viii, 235, 276; further, A.U.B. Library, ms. no. 398, 9 T.35, cf. *al-Mashriķ*, xlvi [1952], 407), from the poets of the *maķāmāt* to the encyclopaedists of the post-Mongol times like al-Nuwayrī or al-Suyūṭī and Bahā᾿ al-Dīn al-^c^Āmilī. The *amthāl* presented here would be especially numerous, exceptionally so in the case of *al-amthāl al-muwallada* (cf. above, ii, 5), with parallels in other languages, e.g. *^c^uṣfūr^un^ fi 'l-kaffi khayr^un^ min kurkiyy^in^ fi 'l-djaww^i^* "a sparrow in the fist is better than a crane in the air" (al-Hamadhānī, *Rasā᾿il*, Constantinople 1298/1881, 44; al-Tha^c^ālibī, *al-Tamthīl*, Cairo 1381/1961, 372; Burckhardt [see below, iv, 1], no. 3 etc.), in English, "a bird in the hand is worth two in a bush".

(10) In the case of *amthāl* contained in the Ķur᾿ān and in the tradition (*ḥadīth*)—specifically named *al-amthāl al-nabawiyya*—they were treated in books of their own (cf. R. Sellheim, *op.cit.*, 20f., ²36ff.), e.g. (most recent publications), al-Ḥakīm al-Tirmidhī (3rd/9th century), *al-Amthāl min al-Kitāb wa 'l-Sunna*, ed. ^c^Alī M. al-Bidjāwī, Cairo (1395/1975); Abū Muḥammad al-Rāmhurmuzī (d. *ca.* 360/970), *Kitāb al-Amthāl*, ed. Amatulkarim Qureshi, Ph.D. thesis, University of Bonn 1959, Hyderabad-Pakistan 1388/1968; Abu 'l-Shaykh (d. 369/979), *Kitāb al-Amthāl*, ed. Ibrāhīm Yūsuf ^c^Irsān, M.A. thesis, University of Riyāḍ 1403/1983; Ibn Ķayyim al-Djawziyya (d. 751/1350), *al-Amthāl fi 'l-Ķur᾿ān al-karīm*, ed. Sa^c^īd M. Nimr al-Khaṭīb, Beirut 1401/1981; ^c^Abd al-Madjīd Maḥmūd, *Amthāl al-ḥadīth*, Cairo 1395/1975; Muḥammad al-Gharawī, *al-Amthāl al-nabawiyya*, i-ii, Beirut 1401/1981; L. Pouzet, *Une herméneutique de la tradition islamique: le commentaire des Arba^c^ūn al-Nawawīya de Muḥyī al-Dīn Yaḥyā al-Nawawī (m. 676/1277)*, introduction, texte arabe, traduction, notes et index du vocabulaire, Beirut 1982.

(a) For "wisdom" from classical sources, one should refer to the most recent publications: D. Gutas, *op.cit.*, in *JAOS*, ci (1981), 49-86; idem, *Greek wisdom literature in Arabic translation, a study of the Graeco-Arabic gnomologia*, New Haven, Conn. 1975; idem, *The life, works, and sayings of Theophrastus in the Arabic tradition*, in W. W. Fortenbaugh, *Theophrastus of Eresus*, New Brunswick-Oxford 1985, 63-102; I. Alon, *Isocrates' Sayings in Arabic*, in *IOS*, vi (1976), 224-8; J. K. Walsh, *Versiones peninsulares del "Kitab ādāb al-falāsifa" de Ḥunayn ibn Isḥāq, hacia una reconstrucción del "Libro de los buenos proverbios"*, in *al-And.*, xli (1976), 355-84; Ḥunayn b. Isḥāķ, *Ādāb al-falāsifa*, ikhtaṣarahu Muḥammad b. ^c^Alī al-Anṣārī (d. before 594/1198), ed. ^c^Abd al-Raḥmān Badawī, Kuwait, 1406/1985. For Islamic wise sayings (*ḥikma* [*q.v.*]), consult al-Māwardī (d. 450/1058), *al-Amthāl wa 'l-ḥikam*, ed. Fu᾿ād ^c^Abd al-Mun^c^im Aḥmad, Ķaṭar 1403/1983; P. Nwyia, *Ibn ^c^Aṭā᾿ Allāh (m. 709/1309) et la naissance de la confrérie šāḏilite*, édition critique et traduction des *Ḥikam*, Beirut (1972); V. Danner, *Ibn ^c^Aṭā᾿illāh's Ṣūfī aphorisms (Kitāb al-Ḥikam)*, translated with an introduction and notes, Leiden 1973, etc.; for personal observations, cf. furthermore the biographical literature from Ibn Sa^c^d (d. 230/845) to al-Sulamī (d. 412/1021), from Abū Nu^c^aym (d. 430/1038) to al-Sha^c^rānī (d. 973/1565).

iii. Arabic collections.

In no other branch of classical Arabic Literature can beginning, development and termination be demonstrated as clearly as in its *amthāl* branch. The results up to now will be summed up as follows (cf. Sellheim, *op.cit.*, 45-153, ²71-225; idem, *al-Qālī* [cf. below, iii, 5, a]; idem, *al-Baihaqī* [cf. below iii, 1]; R. Blachère, *Contribution à l'étude de la littérature proverbiale des Arabes à l'époque archaïque*, in *Arabica*, i [1954], 53-83).

The first setting down of *amthāl* and *amthāl* stories in writing occurred at the instigation of the caliph al-Mahdī (158-69/775-85) in Baghdād by the hand of his tutor al-Mufaḍḍal al-Ḍabbī [*q.v.*] (al-Ṭabarī, iii, 536). He had already compiled for him an anthology of 30 ancient Arabic poems, which later on became widely known under the title of *al-Mufaḍḍaliyyāt* [*q.v.*]. Both these works have not been preserved in their original form, but only in late versions, in parts, widely differing from each other. The text of the *amthāl* that has come down to us goes back to al-Ṭūsī, a pupil of Ibn al-A^c^rābī (d. 231/845), the stepson and pupil of the author (d. *ca.* 170/786). This proves that al-Mufaḍḍal left behind him and others no definite edition. Rather, his *amthāl* in conjunction with the stories were handed on by word of mouth in different forms and put down in writing only by pupils or the pupils of pupils, because the booklet, composed for the use at court, was not at the disposal of the transmitters any more than the anthology. Similar was the fate of the *Kitāb al-Amthāl* ascribed to Mu᾿arridj (d. 204/819?). We have it in a version dictated by his pupil Abū ^c^Alī al-Yazīdī from the year 263/876. These written notes taken down during lectures cannot be said to conform at all with the Mu᾿arridj quotations in the *amthāl* literature from Abū ^c^Ubayd to al-Maydānī. These two examples—as well as others from other branches of literature—cause us to look at later assertions, as e.g. in the *Fihrist* of Ibn al-Nadīm (d. 380/990), that well-known early philologists, as for instance Abū ^c^Amr b. al-^c^Alā᾿, Yūnus b. Ḥabīb, Abū Zayd al-Anṣārī or al-Aṣma^c^ī also wrote books of *amthāl*, with a wary eye. Information of this kind is all the more doubtful, as also later authorities on the matter, as, e.g., al-^c^Irāķī (Pseudo-al-Wāķidī; see below, iii, 11), expressly spreak of a book "ascribed" (*al-mansūb*) to him in the case of the *Kitāb al-Amthāl* of al-Aṣma^c^ī (see below, iii, 1, b; 2; 5, a). *Amthāl* become available in book form—and moreover in the original draft of their author himself—only in the *Kitāb al-Amthāl* of Abū ^c^Ubayd (d. 224/838). He is indebted for his plentiful materials—in so far as he has not gathered them himself (cf. above, ii, 3, a)—to the tradition, chiefly according to his teachers, among others, to the above-named philologists. This clearly results from instances where he writes "I do not know from whom I have heard the *mathal* (nos. 349, 1088), or "I have heard it from somebody other than Abū ^c^Ubayda, I think, from Ibn al-Kalbī" (no. 59), or similarly (nos. 1228 and 134, 253, 492, 744). His quotations in the name of al-Mufaḍḍal which he uses to introduce in an impersonal way, e.g. *ḥukiya ^c^an ..., ruwiya ^c^an ..., mā balaghanī ^c^anhu ...*, or correspondingly, can only partly be found in the *Kitāb al-Amthāl* of the author in the version of al-Ṭūsī (see above); of his quotations in the name of Mu᾿arridj, whom he always introduces with *ķāla*—as he also does with the other philologists (see above)—none at all can be exemplified in the *Kitāb al-Amthāl* of that authority in the version of al-Yazīdī (see above). The *kutub al-ḥikma* quoted by Abū ^c^Ubayd once (no. 663; cf. nos. 152, 250 and 48, 250, 271, 658; above, ii, 1, d) probably stand for nothing but loose leaves (*kitāb* [*q.v.*]) on which wise sayings were written, for the purpose, e.g., of being stuck up on the wall of a room. His contemporary al-Djāḥiẓ [*q.v.*] knows a collection like that with sayings of the caliph al-Manṣūr which was familiar to the scribes of Baghdād (*al-Bayān*, Cairo 1368/1949, iii, 367). Ibn al-

Muʿtazz's collection exists in the form of his *Kitāb al-Ādāb*, ed. I. Kratchkovsky, in *Le Monde Oriental*, xviii (1924), 56-121. Wise sayings of this kind were also called *al-āthār*, not only by Abū ʿUbayd (nos. 153, 704).

After the death of Abū ʿUbayd in Mecca, one of his pupils, ʿAlī b. ʿAbd al-ʿAzīz al-Baghawī, who survived his master there for 60 years, had his text glossed by authorities on the Arabic and Islamic past, as, e.g., by al-Zubayr b. Bakkār (d. 256/870), or Salama b. ʿĀṣim, a pupil of al-Farrāʾ. This annotated text he would read and explain to pilgrims in his circles (*ḥalaḳāt*). In consequence, Abū ʿUbayd's collection of proverbs—in conjunction with these and further glosses—was spread far and wide, in the West as far as al-Andalus, and in the East as far as Khurāsān. His collection has not only been supplemented and commented on six times, but has become, more or less, a point of departure for all subsequent collections. Its materials were adopted, while this fact was frequently not signalised specifically, as well as the glosses, which again and again were added to these copies in their entirety, in selections, or with further additions; in Cordova they were standardised in the form of "editions" in the 4th/10th century by Ḳāsim b. Saʿdān or integrated into al-Bakrī's commentary in the 5th/11th century. One such "edition" of Ḳāsim's existed in Naysābūr in the 6th/12th century, where al-Maydānī compiled his *Madjmaʿ al-amthāl*, the most comprehensive of all collections of Arabic proverbs.

At the present moment, the following collections exist in print or are in the press or in preparation:

(1) Abū ʿUbayd al-Ḳāsim b. Sallām (d. 224/838), *Kitāb al-Amthāl*, ed. ʿAbd al-Madjīd al-Ḳaṭāmish, Damascus 1400/1980 (here quoted according to nos.), as to its systematics, see above, ii; parts in print since J. Scaliger and Th. Erpenius, Leiden 1614; etc.; *Libri proverbiorum Abi ʿObaid elQasimi filii Salami elChuzzami lectiones duae, octava et septima decima* ...., ed. E. Bertheau, Ph.D. thesis, Univ. of Göttingen 1836; ed. G. W. Freytag, in *Arabum proverbia* (see below, iii, 12), iii; arranged alphabetically according to the first letter (ms. Esat 3542?), in *al-Tuḥfa al-bahiyya wa 'l-ṭurfa al-shahiyya*, Constantinople 1302/1884, 2-16 (repr. Beirut 1401/1981). Abū ʿUbayd al-Bakrī (d. 487/1094) has shortened the text and commented on it on the strength of glosses (see above, and below, iii, 1, b) under the heading of *Faṣl al-maḳāl fī sharḥ Kitāb al-Amthāl*, ed. ʿAbd al-Madjīd ʿĀbidīn and Iḥsān ʿAbbās, Khartoum 1378/1958 (cf. *Oriens*, xiii-xiv [1960-1], 469ff.), new edn. Beirut 1391/1971.

(a) Abu 'l-Ḥasan al-Ṭūsī, a pupil of Abū ʿUbayd, who put down in writing a *Kitāb al-Amthāl* of al-Mufaḍḍal [I] b. Muḥammad al-Ḍabbī (d. *ca.* 170/786) which is lacking any discernible structure, in doing that following al-Mufaḍḍal's stepson and pupil Ibn al-Aʿrābī (d. 231/845), printed (ms. Esat 3598?) Constantinople 1300/1882 = Cairo 1327/1909; new edition, considerably enlarged and emendated by Iḥsān ʿAbbās, Beirut 1401/1981. The more than 200 *amthāl* have been ensconced within 88 *akhbār al-ʿArab* (cf. above, ii, 1, b).

(b) Abū ʿAlī al-Yazīdī, who dictated more than 100 *amthāl* in the name of his teacher Abū Fayd Muʾarridj al-Sadūsī (d. 204/819?) in the course of a lecture (*madjlis*) in the year 263/876 thus recording in written form a *Kitāb al-Amthāl* by Muʾarridj; ed. Aḥmad Muḥammad al-Ḍubayb, in *Madjallat Kulliyyat al-Ādāb*, Riyad, i (1390/1970), 231-345 (cf. *MMLʿA*, Damascus, xlvi [1391/1971], 786f.); ed. Ramaḍān ʿAbd al-Tawwāb, Cairo 1391/1971. Also, this text with its stories, among them fables (cf. above, ii, 1, a), and philological explanations, together with verses commenting on the *amthāl* in the stricter sense of the word *muḥāwarāt*, conveys in its loose, unsystematic form the atmosphere of spontaneous lecturing and conservation. In the *madjālis* of this generation, the roots of the pseudepigraphic collections of the time of the Umayyads must be looked for, sc. ʿAbīd b. Sharya al-Djurhumī, ʿIlāḳa b. Kurshum (Karīm) al-Kilābī, Ṣuḥār b. al-ʿAbbās (al-ʿAyyāsh) al-ʿAbdī and the somewhat younger al-Sharḳī b. al-Ḳuṭāmī; cf. *Oriens*, ix (1956), 135; below, iii, 12 and 14; to the early philologists, above, iii (rectify Sezgin, i, 260ff. and viii, 7, etc.).

(2) A small fragment containing 7 *amthāl* of the *afʿal^u min* type, allegedly by Muḥammad b. Ḥabīb (d. 245/860) of whom—as the literature about proverbs and biographical literature maintains—a *Kitāb al-Amthāl ʿalā afʿal min* said to be containing 390 *amthāl*, is known; ed. Muḥammad Ḥamīdallāh, in *MMʿIʿI*, Baghdād, iv (1956), 44 f. (cf. R. Şeşen, *Nawādir al-makhṭūṭāt*, Beirut 1975, i, 68, no. 63). According to Ḥamza (see iii, 6), he owes his materials chiefly to the collection of Abū ʿUbayd and to the "books" (notes taken down in lectures, cf. iii, 5, a) of al-Aṣmaʿī and al-Liḥyānī. For two further "quotations", see Abu 'l-ʿAlāʾ al-Maʿarrī, *al-Fuṣūl wa 'l-ghāyāt*, Cairo 1356/1938, 61, and al-Khafādjī, *Shifāʾ al-ghalīl*, Cairo 1325/1907, 173.

(3) Abū ʿIkrima ʿĀmir b. ʿImrān al-Ḍabbī (d. 250/864), *Kitāb al-Amthāl*, ed. Ramaḍān ʿAbd al-Tawwāb, Damascus (1394/1974). 111 *amthāl*, chiefly *muḥāwarāt*, with many verses of reference, no system; quotations in the name of al-Mufaḍḍal in only one instance in the text of al-Ṭūsī; judging from the introduction, the booklet was conceived as such and not dictated.

(4) al-Mufaḍḍal [II] b. Salama v. ʿĀṣim al-Ḍabbī (d. after 290/903), *al-Fākhir*, ed. C. A. Storey, Leiden 1915 (here quoted according to nos.; repr. Cairo 1402/1982); ed. ʿAbd al-Raḥmān b. al-Nūrī b. al-Ḥasan, Tunis 1353/1934 (?); ed. ʿAbd al-ʿAlīm al-Ṭaḥāwī and Muḥammad ʿAlī al-Nadjdjār, Cairo 1380/1960 (nos. identical, exception Storey 442 = Nadjdjār 360; 361-441 = 361-442; 443 = 443; etc.); printed in part, nos. 1-123; *Ghāyat al-arab fī maʿānī mā yadjri ʿalā alsun al-ʿāmma fī amthālihim wa-muḥāwarātihim min kalām al-ʿArab*, in *Khams rasāʾil*, Constantinople 1301/1884, 232-63. A total of 521 *amthāl*, partly *muḥāwarāt*, mostly circumstantial *amthāl* stories (cf. above, ii, 1, b); quotations in the name of al-Mufaḍḍal can, as a rule, be demonstrated in the text of al-Ṭūsī (cf. no. 123!), likewise, the only quotation in the name of Muʾarridj in the lecture-notes of 263/876. The author was the son of that Salama who glossed the *amthāl* of Abū ʿUbayd (see above).

(5) Abū Bakr Ibn al-Anbārī (d. 328/940), *al-Zāhir fī maʿānī kalimāt al-nās*, ed. Ḥātim Ṣāliḥ al-Ḍāmin, i-ii, Baghdād-Beirut 1399/1979. A total of 896 *amthāl*, similar to iii, 3; authorities are mentioned; the cited materials can, in part, be found in their works, e.g., in Abū ʿUbayd's *Gharīb al-ḥadīth* and *al-Gharīb al-muṣannaf*, and in part they are derived from the oral *madjālis*-tradition, e.g., the quotations from Abū ʿIkrima. Cf. furthermore Ḥusām Saʿīd al-Nuʿaymī, in *MMʿIʿI*, xxxi/3 (1400/1980), 383-97.

(a) The so-called *Kitāb Afʿal min kadhā* of Abū ʿAlī al-Ḳālī (d. 356/967) represents an example of the oral *madjālis* tradition, ed. Muḥammad al-Fāḍil Ibn ʿĀshūr, Tunis 1392/1972. A total of 363 *amthāl ʿalā afʿal min* contained in notes taken in lectures (cf. above), no systematics; quotations, for instance in the name of Muḥammad b. Ḥabīb (see iii, 2), diverge

widely, in parts completely from the parallel tradition (cf. iii, 6 and 12). This fact shows that the oral handing-on of *amthāl* materials, too, was common practice still in the 4th/10th century, and that it was very variable and loose into the bargain; about particular ones, cf. Sellheim, *Abū ʿAlī al-Ḳālī*, in *Studien zur Geschichte und Kultur des Vorderen Orients, Festschrift für Bertold Spuler*, Leiden 1981, 362-74.

(6) Ḥamza al-Iṣfahānī (d. between 350/961 and 360/970) [*q.v.*], *Kitāb al-Amthāl ʿalā afʿal min*, or *al-Durra al-fākhira fi 'l-amthāl al-sāʾira*, (i-ii), ed. ʿAbd al-Madjīd Ḳaṭāmīsh, Cairo 1391-2/1971-2; supplements in al-Thaʿālibī *Khāṣṣ al-khāṣṣ*, ch. 3, Cairo 1326/1908, 29-37. The author has enlarged the collection of Muḥammad b. Ḥabīb to more than 1,800 *amthāl* of the *afʿalu min*-type, among them more than 500 *muwallada*, arranged alphabetically according to the first letter, augmented by 500 more linguistically special features (*nawādir*: compounds containing *abū*, *umm*, *ibn* etc., and dual forms); partly circumstantial *amthāl* stories; he distinguishes, occasionally, between *al-mathal al-ḳadīm*, *al-islāmī* and *al-muwallad*.

(7) Abū Hilāl al-ʿAskarī (d. after 395/1005), *Djamharat al-amthāl*, Bombay 1307/1889; idem, i-ii (printed in the margin of the text of al-Maydānī [see iii, 12]), Cairo 1310/1893; idem, i-ii, ed. Muḥammad Abu 'l-Faḍl Ibrāhīm and ʿAbd al-Madjīd Ḳaṭāmish, Cairo 1384/1964 [1389/1969] (quoted here). Barely 2,000 *amthāl*, including approximately 800 *amthāl ʿalā afʿal min*, arranged alphabetically according to the first letter. The author proceeds from Ḥamza's work whom he, being a purist, reproaches with having included too many "new ones" (*muwallada*), and accumulates the materials transmitted from his teachers, and their authorities, in the *madjālis*; the only quotation in the name of Abū ʿIkrima (i, 266) is missing in latter book (see iii, 3); he takes pain to tighten the innumerable philological and "historical" annotations, rejects *amthāl* which are linguistically incorrect and now and then distinguishes between *al-mathal al-ḳadīm* and *al-muwallad* or *al-muḥdath*. The *amthāl* of his collection are largely "literary" ones and have not too much in common any more with everyday life in the streets.

(8) Abu 'l-Ḥasan ʿAlī b. al-Faḍl al-Muʾayyadī al-Ṭāl(a)ḳānī, *Risālat al-Amthāl al-baghdādiyya*, ed. L. Massignon, Cairo 1331/1913. The most ancient local collection with more than 600 *amthāl (muwallada)*, in contrast to iii, 7, topical and not literary, arranged alphabetically according to the first letter, as a rule accompanied by short explanations, in many cases for the proper application of the *mathal* in question; forerunner of later collections containing *amthāl* in dialect; compiled by the author and read during lectures in Balkh in 421/1030; cf. too ʿAbd al-Raḥmān ʿAbd al-Djabbār Ṭālib, in *Sumer*, xxxii (1396/1976), 237-338; al-Ābī, above, ii, 9.

(9) Abu 'l-Faḍl al-Mīkālī (d. 436/1044) [see MĪKĀLĪS], *Nubadh min amthāl al-amīr al-Mīkālī*, edition in preparation. Small collection (*ca.* 250 nos.), arranged alphabetically, divided up into sub-chapters, each one beginning with one or more sayings from the Ḳurʾān and *ḥadīth* (cf. *Oriens*, xxxi [1988], 353 and xxxii).

(10) Anonymous (5th/11th cent.), *Kitāb al-Amthāl*, Hyderabad 1351/1932. Just under 1,400 *amthāl*; a "medium-sized al-ʿAskarī" (see iii, 7). For no obvious reason, the catalogue of the Dairatu'l-Maʿarifil-Osmania, and consequently Brockelmann, I, 237, ascribe the book to Zayd b. Rifāʿa (d. *ca.* 400/1010), while Brockelmann, S III, 1195, lists it among the writings of Ibn al-Sikkīt (d. 243/857).

(11) Pseudo-al-Wāḥidī (see iii, 15), *al-Wasīṭ fi 'l-amthāl*, ed. ʿAfīf Muḥammad ʿAbd al-Raḥmān, Kuwait 1395/1975; cf. Muḥ. Aḥmad al-Dālī, in *MMMʿA* Kuwait, xxix/2 (1405/1985), 781-99.

(12) Abu 'l-Faḍl al-Maydānī (d. 518/1124), *Madjmaʿ al-amthāl*, i-ii, Būlāḳ 1284/1867; idem, Tehran 1290/1873 (re-arranged in more or less strict alphabetical order by al-Ḥusayn b. Abī Bakr al-Nadjm al-Kirmānī); idem, i-ii, Cairo 1310/1893 (quoted here); idem, i-ii, Cairo 1352-3/1933-4; idem, i-ii, ed. Muḥyi 'l-Dīn ʿAbd al-Ḥamīd, Cairo 1374/1955 (repr.), [2]1378-9/1959 (revised) and [3]1393/1972(!) (= [2]1 + [1]2!); idem, i-ii, Beirut 1382/1962; idem, i-iv, ed. Muḥammad Abu 'l-Faḍl Ibrāhīm, Cairo 1397-9/1977-9 (more or less identical with Muḥyi 'l-Dīn's first edition, including numbering of the *amthāl*; poor index); parts in print since J. Scaliger and Th. Erpenius, Leiden 1614; E. Pocock, Cambridge 1671; etc.: G. W. Freytag, *Arabum proverbia*, i-iii, Bonn 1838-43 (i-ii: the complete proverbs according to al-Maydānī in Arabic with Latin translation, shortened and revised commentary in Latin; iii: 3,321 proverbs according to Abū ʿUbayd and others, according to al-Maydānī *ayyām al-ʿArab*, dicta of the Prophet, the first four caliphs, etc., Arabic with Latin translations, alphabetically, useful indices [repr. Osnabrück 1968]); Ibrāhīm al-Aḥdab (d. 1308/1891), *Farāʾid al-laʾāl fī Madjmaʿ al-amthāl*, i-ii, Beirut 1312/1894 (versification with commentary). The author has, so he maintains in his preface, perused and excerpted more than 50 works containing *amthāl*, among them some pseudepigrapha (cf. iii, 1, b and 14). He has compiled in all just about 6,200 *amthāl* in alphabetical sequence according to the first letter, including about 900 of the *afʿalu min* type according to Ḥamza (see iii, 6), about 1,000 "new ones" (*muwallada*), more than 200 *ayyām al-ʿArab* and more than 200 sayings of the Prophet and others (cf. ii, 1, b; 2, a). His *Madjmaʿ* was the most comprehensive and therefore most widely spread collection and has remained so to this day, witness the numerous manuscripts, of which the oldest dates from the year 533/1138 (Paris [de Slane] 3958?; cf. Hilāl Nādjī, *ʿAla 'l-hāmish*, Baghdād 1395/1975, 79, no. 16), the abridgements, comments and printings [see AL-MAYDĀNĪ]. A critical edition is still overdue; as to the sources, compare now also ʿAbd al-Raḥmān al-Tikrītī, *Maṣādir al-Maydānī fī kitābihi "Madjmaʿ al-amthāl"*, in *al-Mawrid*, iii/2 and 3 (1394/1974), 11-32 and 99-122 (uncritical compilation); Ahmad M. al-Dhubaib, *A critical and comparative study of the ancient Arabic proverbs contained in al-Maidani's collection*, unpubl. Ph.D. thesis, Univ. of Leeds 1968; Samīr Kāẓim Khalīl, *Madjmaʿ al-amthāl*, in *al-Mawrid*, xii/3 (1403/1983), 161-78. Cf. Oriens, xxxi (1988), 359.

(13) Abu 'l-Ḳāsim al-Zamakhsharī (d. 538/1144), *al-Mustaḳṣā fī amthāl al-ʿArab*, i-ii, Hyderabad 1381/1962. Nearly 3,500 *amthāl* with good philological and concise "historical" annotations, in strict alphabetical order; in spite of these merits, the work of the great scholar could not emerge from the shadow of the more comprehensive collection—along with favourite "new ones" (*muwallada*)—of his senior colleague al-Maydānī, which overshadowed it from the first. A second work of his is known to us only by its title *Sawāʾir al-amthāl*. His major collection of *adab*, including sayings, *Rabīʿ al-abrār wa-nuṣūṣ al-akhbār*, a source of al-Ibshīhī's (d. after 850/1446) *al-Mustaṭraf*, has been printed repeatedly in an abridgement, newly complete edited by Salīm al-Nuʿaymī, i-iv, Baghdād 1396-1402/1976-82, His minor collections of sayings—with added translations—appeared in print in

Europe already in the 18th and 19th centuries [see AL-ZAMAKHSHARĪ].

(14) Abu 'l-Ḥasan al-Bayhaḳī (d. 565/1169), *Ghurar al-amthāl wa-durar al-aḳwāl*, ed. in part Hussam El-Saghir, Ph.D. thesis, Univ. of Frankfurt/Main 1984 (complete edition in preparation). About 2,900 *amthāl*, including the "new ones" (*muwallada*), in alphabetical order according to the first letter. Al-Maydānī's pupil has retained a high degree of independence in regard to his teacher, clear grouping: *mathal, lugha, iʿrāb, maʿnā, sabab, ḍarb, ḥall, ḥikāya*; good philological comments; many of the *amthāl* are inserted into the context of "world", local and family history and personal experience by lively stories and reports; a revealing document of its time, esp. as regards Khurāsān; at some time or other the author quoted pseudepigrapha (cf. El-Saghir, *op.cit.*, 88-9, 97-8, 116-17; iii, 1, b, and 12) and, like Ḥamza and al-ʿAskarī (see iii, 6 and 7), Persian proverbs. A second work containing *amthāl* in four volumes and two collections of sayings (?), which he itemises in his autobiography (Yāḳūt, *Udabāʾ*, v, 212) have not apparently survived; cf. Sellheim, *Eine unbekannte Sprichwörtersammlung*, in *Isl.*, xxxix (1964), 226-32.

(15) Raḍī al-Dīn Abū Saʿīd (Abū ʿAbd Allāh) Muḥammad b. ʿAlī al-ʿIrāḳī (d. 561/1166), *Nuzhat al-anfus wa-rauḍat al-madjlis*, a collection— disregarded up to now—containing about 900 *amthāl*, partly *muḥāwarāt*, and old, frequently rather long-winded stories dealing with the *awāʾil*-problem (*awwal^u man ḳālahu*) (cf. above, ii, 1, b). It is arranged alphabetically in 29 chapters. The author, a pupil of the well-known philologist Abū Zakariyyāʾ al-Tibrīzī [*q.v.*], draws from the ʿIrāḳī *madjālis* tradition. Only one manuscript, damaged at the beginning, is known to exist (Gotha [Pertsch], no. 1250, cf. Brockelmann, I, 333); an edition is being prepared. Al-ʿIrāḳī's *Kitāb al-Wasīṭ fī 'l-amthāl* is mainly only an abridgment of the *Nuzha*, comprising about a quarter of its volume. Its editor (cf. iii, 11) has erroneously ascribed this "median" collection to Abu 'l-Ḥasan al-Wāḥidī (d. 468/1076), the teacher of al-Maydānī, following in this (?) the defective unicum in a Maghribī hand (Rabat, al-Khizāna al-ʿāmma, no. 102). In al-ʿIrāḳī's preface to his *Kitāb al-Wasīṭ*, we read that, besides the *Nuzha*, which he repeatedly quotes, he has written two more collections of *amthāl*, to wit, a "large one", *Kitāb al-Basīṭ*, and a "small one", *Kitāb al-Wadjīz*. Of both these works, as far as is known, no manuscripts have come down to us. For details, see Sellheim, in *Oriens*, xxxi (1988), 82-94.

(16) Abu 'l-Maḥāsin al-Shaybī (d. 837/1433), *Timthāl al-amthāl*, i-ii, ed. Asʿad Dhubyān, Ph.D. thesis, Lebanese University, Beirut 1402/1982; printed in part as *First half of the book Timthāl al-amthāl of Jamāl al-Dīn al-Shaibī*, ed. Muḥammad Bahāʾ al-Ḥaqq Rānā, unpubl. Ph.D. thesis, Punjab Univ. Lahore 1961. The majority of the 441 *amthāl* in alphabetical order were extracted by the author from the two collections of al-Maydānī and al-Zamakhsharī; the remainder he owes to literature as, for instance, to the *Kitāb al-Aghānī*, or to the verses of poets; only in a few cases is the source not mentioned; not infrequently, he reproduces stories at length.

Of other collections of this time and of later times (cf. the list in Ahlwardt [Berlin], no. 8729) little can be expected to be forthcoming in regard to the classical *amthāl*—witness the work of al-Shaybī, or Muṣṭafā b. Ibrāhīm's *Zubdat al-amthāl* of 999/1591 (Brockelmann, II, 557, S II, 631; Flügel [Vienna], no. 339), and Ibrāhīm Sarkīs' (d. 1302/1885) *al-Durra al-yatīma fī 'l-amthāl al-ḳadīma*, Beirut 1288/1871. In any case, the *Madjmaʿ al-aḳwāl fī maʿānī 'l-amthāl* of Muḥammad b. ʿAbd al-Raḥmān b. Abī 'l-Baḳāʾ, hence the grandson of the noted Baghdadian philologist Abu 'l-Baḳāʾ al-ʿUkbarī (d. 616/1219), deserves the attention of the researcher. Of his work in six volumes, parts are preserved in the author's autograph of the year 665/1267; he makes use of 30 sources which are conscientiously identified by characters the meaning of which is given in the preface; cf. A. J. Arberry, in *JAL*, i (1970), 109-12, and in reference to that, Sellheim, in *Isl.*, l (1973), 341ff.

New and revealing are the collections of *amthāl* in dialect form which date from the 7th/13th century onwards:

(17) Abū Yaḥyā al-Zadjdjālī (d. 694/1294), *Amthāl al-ʿawāmm fī 'l-Andalus*, i-ii, ed. Muḥammad b. Sharīfa (M. Bencherifa), Ph.D. thesis, Cairo Univ. 1969, Fās 1391-5/1971-5 (containing further literature on the subject). A total of 2,157 *amthāl* without illustrations, but with extensive explanations, etc. by the editor.

(18) Abū Bakr Ibn ʿĀṣim (d. 829/1426), *Ḥadāʾiḳ al-azhār*, ed. ʿAbd al-ʿAzīz al-Ahwānī (who was the teacher of Bencherifa), in *Ilā Ṭāhā Ḥusayn* (*Mélanges T.H.*), Cairo 1382/1962, 235-367, text 295-364. A total of 851 *amthāl* without illustrations.

iv. Modern collections.

In Europe the interest in Arabic proverbs was aroused towards the end of the 16th century (cf. Sellheim, *op.cit.*, 1-7, ²13-20). These literary *amthāl* survived for generations into the 19th century in readers and exercise-books, especially for the supplementation of Hebrew studies. E. Pocock's plan of 1671, to edit the whole of al-Maydānī's collection, was only realised by G. W. Freytag in the years 1838-43 (cf. above, iii, 12). Since that time, European learned travellers and linguists have recorded and published Arabic proverbs—mostly in dialect form—in great numbers. They have been succeeded by Oriental collectors, especially after the end of the Second World War. The following deserve to be quoted:

(1) J. L. Burckhardt, *Arabic proverbs or the manners and customs of the modern Egyptians* [Cairo 1817], London 1830, ²1875 (repr. London 1972, paperback ed. 1984), in German, Weimar 1834; A. Socin, *Arabische Sprichwörter und Redensarten*, Tübingen 1878 (repr. Wiesbaden 1967); C. de Landberg, *Proverbes et dictons de la province de Syrie, section de Ṣaydâ*, Leiden-Paris 1883; C. Snouck Hurgronje, *Mekkanische Sprichwörter und Redensarten*, The Hague 1886; K. L. Tallqvist, *Arabische Sprichwörter und Spiele*, Helsingfors 1897; M. Ben Cheneb, *Proverbes arabes de l'Algérie et du Maghreb*, i-iii, Paris 1905-7; E. Westermack, *Wit and wisdom in Morocco, a study of native proverbs*, London 1930, New York 1931; E. Littmann, *Arabic proverbs*, collected by Mrs. A. P. Singer, Cairo 1913; idem, *Kairiner Sprichwörter und Rätsel*, Leipzig 1937 (repr. Nendeln 1966); S. D. F. Goitein, *Jemenica: Sprichwörter und Redensarten aus Zentral-Jemen*, Leipzig 1934 (repr. Leiden 1970); Saʿīd ʿAbbūd, G. Kampffmeyer, M. Thilo, *5000 arabische Sprichwörter aus Palästina*, i-iii, Berlin 1933-7; M. Feghali, *Proverbes et dictons Syro-Libanais*, Paris 1938; A. Frayha, *Modern Lebanese proverbs*, i-ii, Beirut 1953 = *A dictionary of modern Lebanese proverbs (Muʿdjam al-amthāl al-lubnāniyya al-ḥadītha)*, i-ii, Beirut 1394/1974; Fatma M. Mahgoub, *A linguistic study of Cairene proverbs*, Bloomington-The Hague 1968 (cf. *Oriens*, xxiii-iv [1974], 551ff.); Omar al Sasi, *Sprichwörter und andere volkskundliche Texte aus Mekka*, Ph.D. Thesis, Univ. of Münster 1972; R. Y. Ebied and M. J. L. Young, *A collection of Arabic proverbs from Mosul*, in *AIUON*, xxxvi (1976), 317-50; E. García

Gómez, *Hacia un "Refranero" arábigo-andaluz*, I-II, in *al-Andalus*, xxxv (1970), 1-68, 241-314; III: xxxvi (1971), 255-328; IV-V: xxxvii (1972), 1-75, 249-323; cf. xlii (1977), 375-90, 391-408; F.-J. Abela, *Proverbes populaires du Liban Sud, Saïda et ses environs*, i-ii, Paris 1981-5 (3,694 proverbs; bibliography).

(2) Naᶜᶜūm S̲h̲uḳayr, *Amt̲h̲āl al-ᶜawāmm fī Miṣr wa 'l-Sūdān wa 'l-S̲h̲ām*, Cairo 1302/1894; Maḥmūd Ef. ᶜUmar al-Bād̲j̲ūrī, *Amt̲h̲āl al-mutakallimīn min ᶜawāmm al-miṣriyyīn*, Cairo 1311/1893; Aḥmad Taymūr, *al-Amt̲h̲āl al-ᶜāmmiyya*, Cairo 1368/1949, [2]1375/1956, [3]1390/1970; idem, *al-Kināyāt al-ᶜāmmiyya*, [3]Cairo 1970 (cf. *ZDMG*, cxxiii [1973], 403ff.); Fāʾiḳa H. R. Rafīḳ, *Ḥadāʾiḳ al-amt̲h̲āl al-ᶜāmmiyya*, i-ii, Cairo 1358-62/1939-43; Ibrāhīm A. S̲h̲aᶜlān, *al-S̲h̲aᶜb al-miṣrī fī amt̲h̲ālihi al-ᶜāmmiyya*, Cairo 1391/1972; al-Ṭāhir al-K̲h̲umayrī (Khmiri), *Muntak̲h̲abāt min al-amt̲h̲āl al-ᶜāmmiyya al-tūnisiyya*, Tunis 1387/1967; Ismāᶜīl b. ᶜAlī al-Akwaᶜ, *al-Amt̲h̲āl al-yamaniyya*, i-ii, [2]Beirut 1405/1984; ᶜAbd al-Karīm al-D̲j̲uhaymān, *al-Amt̲h̲āl al-s̲h̲aᶜbiyya fī ḳalb D̲j̲azīrat al-ᶜArab*, i-iii, Beirut 1383/1963, [2]i-vi, Riyad 1399-1400/1979-80; Aḥmad al-Sibāᶜī, *al-Amt̲h̲āl al-s̲h̲aᶜbiyya fī mudun al-Ḥid̲j̲āz*, Jeddah 1401/1981; Hānī al-ᶜAmad, *al-Amt̲h̲āl al-s̲h̲aᶜbiyya al-urdunniyya*, Amman 1398/1978; Nitār Abāẓa, *al-Amt̲h̲āl al-s̲h̲aᶜbiyya al-s̲h̲āmiyya*, Beirut (in print); ᶜAbd al-K̲h̲āliḳ al-Dabbāg̲h̲, *Muᶜd̲j̲am amt̲h̲āl al-Mawṣil al-ᶜāmmiyya*, i-ii, Mosul 1375/1956; D̲j̲alāl al-Ḥanafī, *al-Amt̲h̲āl al-bag̲h̲dādiyya*, i-ii, Bag̲h̲dād 1382-4/1962-4; ᶜAbd al-Raḥmān al-Tikrītī, *al-Amt̲h̲āl al-bag̲h̲dādiyya l-muḳārana*, i-iv, Bag̲h̲dād 1386-9/1966-9 (containing further literature to the subject); Muḥammad Ṣādiḳ Zalzala, *Mad̲j̲maᶜ al-amt̲h̲āl al-ᶜāmmiyya al-bag̲h̲dādiyya wa-ḳiṣaṣuhā*, Kuwait 1396/1976; Aḥmad al-Bis̲h̲r ar-Rūmī and Ṣafwat Kamāl, *al-Amt̲h̲āl al-kuwaytiyya al-muḳārana*, i-ii, Kuwait 1398-1400/1978-80; etc. A thesaurus of Arabic proverbs is being prepared by ᶜAfīf ᶜAbd al-Raḥmān (Irbid); until now he has published: *Muᶜd̲j̲am al-amt̲h̲āl al-ᶜarabiyya al-ḳadīma*, i-ii, Riyad 1405/1985; another one by Riyāḍ ᶜAbd al-Ḥamīd Murād (Damascus), 4 vols., is under way.

(R. Sellheim)

2. In Persian

Persian, despite its elegant literary uses, has always remained a true speech of "the folk", the language (until very modern times) of an essentially simple, unlettered society based on agriculture and pastoralism, crafts and trading. It is therefore hardly surprising that it should be extremely rich in idioms and proverbial expressions. Most of these are brief and pithy, but some are fairly elaborate in both concept and construction. The high-culture literature itself—particularly ethical works and such edifying-entertaining writing as Saᶜdī's *Gulistān*—abounds in proverbial material; and (as, for example, with Shakespeare) it is often virtually impossible to determine if the author himself invented a proverbial story or coined an aphorism which subsequently gained general currency, or whether he merely appropriated anecdotes and saws already in common use. Even such ostensibly remote literature as the *g̲h̲azal*s of Ḥāfiẓ lend themselves, by their often atomistic, line-by-line structure, to easy sententious quotation or divinatory employment.

Overall, at least until affected by a marked modern tendency towards updating, the corpus contains obviously archaic features of vocabulary, grammar and style, most of which are undoubtedly genuine, though some may have been more or less consciously manufactured in an urge to offer authenticity of the "ye olde" type. Part of the material seems to have been rendered from Arabic (probably in the early centuries of Islam); other items have parallels or equivalents in Turkish, and the traffic may not always have been from Persian to the latter language. A considerably body of proverbs is dialectal, with the most generally attractive and appropriate instances being also rendered into more or less standard Persian at some point. Given all these varied factors, as well as the rapid transformation of Iranian society and the decline of traditional education over the last 50 years, the same tendency has arisen as in Western culture for many proverbs no longer to be perfectly understood, accurately cited, or rightly applied. Fortunately, individual scholarly (and even amateur) initiatives have assured their survival, at least in libraries both in Iran and around the world.

While there must inevitably be a certain common humanity to all proverbial literature, generally considered, it is rarely true that any given adage in Persian will exactly match an item in almost unvaried use

across the broad spectrum of Western languages. A good sampling of the uniquely Persian flavour and idiosyncratic reference-frame can be gained from the following works, where it is possible to compare translations, parallels, and originals: R. Levy, *Persia viewed through its proverbs and apologues*, in *BSOAS*, xiv/3 (1952), 540-9; L. P. Elwell-Sutton, *Persian proverbs*, London 1954; L. Bonelli, *Detti proverbiali persiani*, Rome 1941; S. Haïm, *Amthāl-i Fārsī-Ingilīsī*, Tehran 1334 *sh*/1955. As usual, stupidity, incompetence and dishonesty are deprecated, but the terms used extend to such items as donkeys. Islamic religious functionaries, minarets and water-melons; resignation to modest station is enjoined by the consideration that a grand house demands hard work to clear its vast, flat roof of the winter snows that fall on the Iranian high plateau; everything should be in season, like a sheepskin cloak worn for the month of Day (December-January), and not at the sudden arrival of the Persian spring; and so on. As in other cultures, many of the proverbs contradict each other if taken too literally.

Bibliography: (in addition to the works mentioned in the text): The major Iranian study is still ʿAlī Akbar Dihkhudā, *Amthāl u ḥikam*, Tehran 1338 *sh*/1959-60 (4 vols.); also Abu 'l-Ḳāsim Andjawī Shīrāzī, *Tamthīl u mathal*, vol. i only, Tehran 1352 *sh*/1973 and again 1357 *sh*/1978; Yūsuf Djamshīdīpūr, *Farhang-i amthāl-i fārsī*, Tehran 1347*sh*/1968; Amīr Ḳulī Amīnī, *Farhang-i ʿawāmm*, n.d., n.p., (but probably Tehran in the 1960s); Kamāl al-Dīn Murtaḍawīyān (Fārsānī), *Dāstānhā-yi amthāl*, Iṣfahān 1340*sh*/1961 (purports to give plausible anecdotal background to many proverbs). For proverbs of dialectal provenance: Maḥmūd Pāyanda, *Mathalhā u iṣṭilāḥāt-i Gīl u Daylam*, Tehran 1352*sh*/1973; ʿAlī Naḳī Bihrūzī, *Wāzhahā u mathalhā-yi Shīrāzī u Kāzirūnī*, Shīrāz 1348*sh*/1969. Additional minor or peripheral items can be found at the head of the article by Levy cited above.

(G. M. WICKENS)

3. IN TURKISH

In Turkish, *Mathal*/Modern Turkish *mesel* is often used in the phrase *ḍarb-ī methel* (pl. *ḍurūb-ī emthāl*); this pedantic form which may be translated as "stated by an example", has also passed into the spoken language.

The terms *mesel* and its variants *metel, matal, metal* are also used to designate a riddle, and *masal* is a story. Other terms attested in the written sources, in oral tradition and in learned terminology to denote a proverb are: *sav* (Ḳarakhānid Turkish), *atalarsözü* (plural *atasözleri*, old Osmanli, Azerbaijani, Turkmen and Ḳaraḳalpaḳ as well as in the modern terminology of Turkey), *šin-söz* (dialect of Chinese Turkestan), *ülgär-söš* (Altay), *ülgür-söz* (Nogay), *temsil, makal* (Ḳaraḳalpaḳ), *zarpumesele* (Karayîm of the Crimea), *nakîl* (Turkmen), *ḥikmet* (plural *ḥikām*, Iranian Azerbaijani) and *deyiṣet* (dialect of Içel in Turkey).

The proverb being the concise and stereotyped enunciation of a rule of conduct, an axiom or a statement and the fruit of long experience, is used as a means of giving speech a greater persuasive force; this being the case, it has no independent existence, but is integrated into speech. Besides its frequent usage in day-to-day conversation, it constitutes a corroborative and ornamental element of literary, scholarly or popular creation. In the epic tradition, for example, a series of linked proverbs, often alliterated or rhymed together and in the metre adopted for the epic narration, serve as a kind of preamble to the story proper. Through this functional characteristic, the proverb is distinguished from the other genres of oral literature. It has been noted, however, that among the Karayîm of the Crimea and in the popular tradition of Içel in Turkey, the proverb is used independently as the essential element of a verbal game. This is in the context of a competition in the course of which two teams (or two persons) confront one another; each in turn utters a proverb beginning with the same letter of the alphabet; the winning team—or person—is the one who succeeds in reciting the greatest number of proverbs.

Classified according to their themes, a first category of proverbs contains those which pronounce a simple judgement; among them, some imply a moral or suggest a rule of conduct. In a second category, are those which make a statement, on daily life, on human nature, on natural phenomena, or on "works and days", sometimes implying criticism or practical advice. Finally, a third category, of exclusively local or regional origin and usage, consists of the opinions regarding one another held by various communities—ethnic, religious, etc.

In the formal and stylistic context, there are four categories to be distinguished: (1) Proverbs stated in simple prose; (2) Proverbs containing prosodic elements. In this category the texts are of various types: in one type, the proverb is stated in the form of a verse or a distich in traditional metre (the two lines are rhymed in the latter case); in a second type, the text is composed with alliterations or internal rhymes between the various component parts. Finally, a third type is that where several proverbs of different themes, rhymed or alliterated together, are joined in sequence, such as are encountered in the epic texts, e.g. in the Oghuz *Kitāb-ī Dede Ḳorḳut* and in the Ḳîrgîz *Manas* [*q.v.*]; (3) Proverbs and proverbial statements which have an anecdotal structure. Sometimes, this is a "miniature narrative" without direct speech; elsewhere, the narrative is reduced to a minimum, or disappears completely, and the text takes the form of a dialogue. (4) The proverbs of this third group are to be distinguished from those which have an anecdotal "origin". The latter allude to a historical event, or to an anecdotal character; such are the proverbs and proverbial sayings which refer to one or another of the facetious stories of Nasreddin Hoca.

From the 2nd/8th century, some proverbs are attested in the Kök Türk inscriptions. Later, after the 4th/10th century, a greater number of examples is found in the Uyghur texts. As many as 290 proverbs, of which a large number have survived into the present day, are contained in the dictionary of Maḥmūd Kāshgharī [*q.v.*] (5th/11th century). The two most ancient Ottoman Turkish collections, both the work of anonymous compilers, are the *Risāle min kelimāt-ī Oghuznāme el-meshhūr bi-atalarsözi*, undated, probably from the 9th/15th century; and the *Kitāb-ī Atalar*, compiled in 885/1480-1. The *Pend-nāme*, by the Ottoman poet Güwāhī (10th/16th century), is a collection of proverbs from oral tradition cast in the form of classical prosody. (For collections of more recent date, still in manuscript, see the bibl. in Aksoy, 1977, 1267-70.)

Numerous poets of the Ottoman era, including Thābit (15th/17th century) and Ḥîfẓî (12th/18th century), have a reputation for embellishing their poetry with proverbs. (For a more complete list of the proverbs used in literary works, see Eyüboğlu, 1973-5.) Others, including Rūḥī of Baghdād (10th/16th century), Nābī (11th/17th century), Rāghîb Pasha and Ḳānī (12th/18th century) Ḍiyāʾ Pasha and Seyrānī (13th/19th century), are, on the contrary, admired for

their verses and couplets which, with the passage of time, have acquired the status and usage of proverbs.

It was in the second half of the 19th century that westernised Turkish intellectuals began to show an interest in the collection and comparative study of proverbs. The first anthology of this type is the *Ḍurūb-i emt̲h̲āl-i ʿOt̲h̲māniyye* (1863) of S̲h̲ināsī; in the second edition (1870), the number of proverbs and proverbial sayings amounts to 2,500; in the third, edited by Abu 'l-Ḍiyāʾ (Ebüzziya) Tawfīḳ in 1885, 4,000. The collection of Aḥmed Wefīḳ Pas̲h̲a, intitled *Muntak̲h̲abāt-i ḍurūb-i emt̲h̲āl-i türkiyye* (1871) contains 4,300 proverbs. (On later collections and studies, see the bibliography of the present article and that of Aksoy, 1977, 1271-1328, which included 716 titles.)

4. In Urdu

In Urdu, proverbs are variously called *mat̲h̲al* (*masal*), *ḍarb al-mat̲h̲al* (*zarb ul-masal*) or *kahāwat*, and they are often associated with *muḥāwarāt* (idioms—proverbial figures of speech). The language is rich in them, and they are used not only in conversation but in official and formal language, and in literature, especially poetry. Yet little has been written about them, and few collections have been published. The pioneer work is by an Englishman, S.W. Fallon, *A dictionary of Hindustani proverbs*, Benares-London 1886. It was published after Fallon's death, edited and revised by Capt. R. C. Temple, with free English translations. About 12,500 proverbs in Romanised Urdu are arranged alphabetically according to their first words, and there is no subject index. Important as it is, it would probably have contained much more information had the author lived to complete it. Many of the proverbs are better set-out in Fallon's earlier *New Hindustani-English dictionary*, Benares-London 1879; and his example has been followed by Urdu-speaking lexicographers in their monolingual Urdu dictionaries, which contain numerous references to proverbs. The best in this respect is K̲h̲ʷād̲j̲a ʿAbd al-Mad̲j̲īd's *D̲j̲āmiʿ al-lug̲h̲āt* (4 vols., Lucknow 1933-5). There is also a section on proverbs in the Introduction (16), while the Bibl. (17-18) gives the titles of several Urdu-Hindi works on proverbs. Unfortunately, neither authors nor publication details are given. But one, *Darb al-amt̲h̲āl*, may refer to a little book, *Urdu proverbs and idioms*, published in Dihlī, undated and with no author's name, for the benefit of "junior and senior boys, teachers and professors". It contains 1,122 *Urdū ḍarb al-amt̲h̲āl* and 325 *Urdū muḥāwarāt*. There are English equivalent proverbs and expression—not in any sense translations—on alternate pairs of pages. Other collections of Urdu proverbs include Subḥān Bak̲h̲s̲h̲, *Muḥāwarāt-i-Hind*, Dihlī 1913, and Sayfī Nawgānwī, *Ḍarb al-amt̲h̲āl wa muḥāwarāt*, Karachi 1982.

Bibliography: In addition to that *D̲j̲āmiʿ al-lug̲h̲āt* mentioned in the text, proverbs are found in the following general Urdu dictionaries: K̲h̲ān Ṣāhib Mawlawī Sayyid Aḥmad Dihlawī, *Farhang-i-Āṣafiyya*, 4 vols., Dihlī 1896, repr. 1974; Mawlawī Nūr al-Ḥasan Nayyir Kākōrawī, *Nūr al-lug̲h̲āt*, 4 vols., Lucknow 1924-5, repr. Karachi 1957; Sayfi Prōmī, *Kahāwat awr kahānī*, Dihlī 1977, contains 110 proverbs and proverbial idioms each amplified by a short story. For an example of a poet (Sawdāʾ) quoting a proverb, see MAẒHAR, MĪRZĀ D̲J̲ĀND̲J̲ĀNĀN.

(J. A. Haywood)

5. In Swahili

In Swahili, the majority of known proverbs have been collected from oral sources, i.e. from the memory of the elders among the people. The most important collection is still W. Taylor's *African aphorisms* of 1891. The written sources will, when tapped, yield an even richer harvest. Most of the written literature in Swahili is poetry, and poets love weaving proverbs into their poems, both religious and secular, both lyrical and epic. Even the political poetry in contemporary Kenya and Tanzania is full of proverbs, behind which the poets conceal their true opinions of the political situation; these are to be guessed only by their close associates and by Swahili scholars who can follow all the allusions. Even love songs and other lyrical songs are full of proverbs; a special type of short (36 syllables) song exists which may be called "proverb song", in which the proverbs actually contain the message of the song to the beloved, concealed from the ears of those whose wrath is to be feared. This type of political poetry composed with proverbs is at least 300 years old, as witness certain allusions to it in the chronicles. If one considers that there are numerous expressions, set phrases, idioms and conventional metaphors in the Swahili language which are to a high degree the building bricks, as it were, of the proverbs, one realises that these same expressions permit the Swahili speakers, and, *a fortiori* the poets, to refer to these proverbs without even mentioning them (e.g. "hen" may refer to a good wife; "kite" to an adulterous visitor; compare the English expression "crocodile's tears" for hypocrisy), showing how Swahili proverbs are enmeshed in the very thoughts of the people. The proverbs from the purely written tradition may include quotations from Islamic sources, often couched in strongly Arabicised Swahili. The two main sources are the Ḳurʾān and the *Ḥadīt̲h̲*. Scholars will quote the Ḳurʾān in Arabic, then inter-

pret its contents for the people in Swahili. Every quotation from the Ḳur'ān is accepted as an (often ill-understood) proverb. Especially popular are the "forty *ḥadīths*", of which there is more than one Swahili translation in print.

Bibliography: The classical work on the subject is W. E. Taylor, *African aphorisms. Saws from Swahililand*, London 1891. Most of these proverbs are in the Mombasa dialect, but a few are in the Nyika dialect of the hinterland. For a classification of Swahili proverbs, see J. Knappert, *On Swahili proverbs*, in *African Language Studies*, xvi (1975), 117-46; idem, *Rhyming Swahili proverbs*, in *Afrika und Uebersee*, xlix (1965), 59-68; idem, *Swahili proverb songs*, in *ibid.*, lix (1976), 105-12. A. Scheven, *Swahili proverbs*, is the most important publication to date on the subject; it has a full bibl. including S. S. Farsy's work on proverbs from Zanzibar. The only work that, it seems, escaped Scheven's net, is C. K. Omari, E. Kezilahabi and W. D. Kamera, *Misemo na methali toka Tanzania*, Dar es Salaam 1975-6.

Proverbs of the prophets are very popular; there are various editions of the *Hadithi arobaini* ("Forty *ḥadīths*") in Swahili. The largest collection is one of 130 *Hadithi* compiled by the famous Mombasa scholar Al Amin Bin Aly El-Mazrui and his cousin M. Kasim Mazrui, published in Zanzibar in 1356/1937-8 in Swahili and Arabic; the Arabic title is *al-Aḥādīth al-mukhtāra al-djāmiʿa al-miʾa wa-thalāthīn ḥadīthan nabawiyyan fī 'l-ḥikma wa' 'l-ādāb wa 'l-akhlāḳ al-marḍiyya*. Many of the sayings of the Prophet Muḥammad and of other prophets (Yūsuf, Yūnus, Mūsā, ʿĪsā, Zakariyyāʾ) have been woven into the Swahili epics, see Knappert, *Traditional Swahili poetry*, Leiden 1967. (J. KNAPPERT)

MATHALIB (A.), pl. of *mathla/uba*, from the root *th.l.b.*, which means "to criticise, to blame, to slander, to point out faults with the intention of being hurtful". Although it is not a Ḳurʾānic term, it is attested from ancient times and has been used continuously until to-day to mean "faults, vices, defects, disgrace, etc." (see further, Wehr).

In earliest times and in the first centuries of Islam, it had a specialised usage, for it was broadly applied to what were regarded as subjects of shame for the tribes, the ethnic groups or even clans, rather than separate individuals. Later, it appeared in the titles of a number of works usually written by genealogists and collectors of historical traditions, but the origin of which the *Kitāb al-Aghānī* (ed. Beirut xx, 21) attributes to Ziyād b. Abīh, who indeed is said to have written a *Kitāb al-Mathālib*. The word *mathālib* can be contrasted in meaning with *mafākhir* or *maʾāthir*, "exploits, feats, glorious titles" as well as with *manāḳib* [*q.v.*] in its original meaning (see, for example, al-Djāḥiẓ, in the *Risāla fī manāḳib al-Atrāk*, ed. Hārūn, *Rasāʾil*, i, 22: *lanā al-taʿāyur bi 'l-mathālib wa 'l-tafākhur bi 'l-manāḳib* "we reproach each other for our *faults* and we vie in praising ourselves for our *virtues*"; see also i, 36, 70). It is used in connection with themes in *hidjāʾ* [*q.v.*] or satire to denigrate an enemy (see for example, *Naḳāʾiḍ*, ed. Bevan, 907-8: *mā yuhdjā bihi*; al-Djāḥiẓ, *Bukhalāʾ*, ed. Ḥādjirī, 184). it is well known that the pre-Islamic poets never failed to recall the disgrace of the other side (see R. Blachère, *HLA*, index, s.v. *mafâḥir wa-maṭâlib*). Since *hidjāʾ* tried to make much of the dishonourable aspects of the group that was under attack, it is possible that *mathālib* is a word indicating an amalgam of these features and that it was used a little indiscriminately, with no special emphasis on one particular shameful matter. This much can be deducted from the examples given of the use of *mathālib* and from many other also.

However, I. Goldziher (*Muh. Studien*, i, 43; Eng. tr. i, 48) stated that the *mathālib* were intended to discredit the enemy, and in particular his ancestors, and that they aimed at casting doubt on the authenticity of his genealogy. The nobility of one's ancestry (*nasab*) was a basic requirement of honour (see B. Farès, *L'honneur chez les Arabes avant l'Islam*, Paris 1932, 84ff.), and it was normal for genealogies to be closely examined, and any weak point would be exploited by the enemy. Furthermore, even if *mathālib* were not exclusively concerned with *ansāb*, it is not surprising that some relatively objective genealogists should be eager to take up the faults mentioned in them and make them more widely known, at the risk of attracting dangerous hostility (see, e.g., the case of ʿAḳīl b. Abī Ṭālib, who was keenly disposed to take note of *mathālib*; al-Djāḥiẓ, *Bayān*, ii, 323-4). Those who specialised in such descriptions were accused of nourishing deep hatred, and this became something of a proverbial expression (*daghīnat ḥuffāẓ al-mathālib*, in al-Djāḥiz, *Risāla fī 'l-djidd wa 'l-hazl*, ed. Kraus and Ḥādjirī, 65; ed. Hārūn, *Rasāʾil*, i, 236).

Goldziher again refers to the relationship between *mathālib* and genealogies when discussing the famous Daghfal (see al-Masʿūdī, *Murūdj*, index, s.v.). Among the authors of works which contain this term in their titles, he mentions Hishām Ibn al-Kalbī and al-Haytham b. ʿAdī; these last remarks appear in the chapter on the Shuʿūbiyya and its different manifestations in *Muh. Studien*, i, 191, Eng. tr. i, 176-7. Although accusations are made against him (see Goldziher, *op.cit.*, i, 187, Eng.tr. i, 173), it would probably be wrong to count as an opponent of the Arabs and a supporter of the ʿAdjam the famous writer Ibn al-Kalbī (d. 204/819 [*q.v.*], the author of a *Kitāb Mathālib al-ʿArab* (*Fihrist*, ed., Cairo 141; Yāḳūt, *Udabāʾ*, xii, 191, where it is stated that ʿAllān (see below) used the same classification of the tribes; Brockelmann, S I, 212; Sezgin, *GAS*, i, 270, ii, 61). However, it should be noted that Ibn al-Kalbī had already used the same term as this of a work containing a severe criticism of the three first caliphs, the *Kitāb Mathālib al-Ṣaḥāba*. This pro-ʿAlid manifesto caused "a great stir" and was used by al-Ḥillī (d. 726/1325 [*q.v.*]) to defend Shīʿism (see H. Laoust, *Les schismes dans l'islam*, 78). His contemporary, al-Haytham b. ʿAdī (d. *ca.* 206/821) [*q.v.*], who had an extremely poor reputation, produced for his part another *Kitāb Mathālib al-ʿArab* (Brockelmann, S I, 213; Sezgin, *GAS*, i, 272) in two versions (one longer, the other shorter, according to Ibn al-Nadīm (*Fihrist*, Cairo, 145), as well as the *Mathālib Rabīʿa*, the Arabs from the North.

Abū ʿUbayda (d. *ca.* 209/824) [*q.v.*]) was vigorously criticised for having provided the Shuʿūbiyya with arguments for their cause, just as all the other writers of *mathālib* were criticised, and even accused of Shuʿūbī doctrines. However, he does seem to have shown some objective judgement when he wrote not only a *Kitāb Maʾāthir al-ʿArab* and a *Kitāb Maʾāthir Ghaṭafān*, but also the *Manāḳib Bāhila* in opposition to his *Mathālib Bāhila* (*Fihrist*, Cairo, 80; Sezgin, *GAS*, ii, 61, 321). Al-Masʿūdī (*Murudj*, vii, 80 = § 2765) refers to his *Kitāb al-Mathālib* (cf. Brockelmann, S I, 162), and shows that recording the Arab genealogies with all the vices that were embodied in them naturally led him to make certain serious accusations which, by their very nature, must have displeased a considerable number of individuals and families. In addition, al-Masʿūdī (*Murūdj*, v, 480-1 = § 2235) mentions a work

attributed to Abū ʿUbayda, "or to another Shuʿūbī", though the exact title of this work cannot be established. It must presumably have contained the *manāḳib* and the *mat̲h̲ālib* of the Arabs as well as the entitlements to glory and shameful deeds of the various tribes of the north and south of Arabia, as presented by their supporters and by their detractors in the meeting-room of His̲h̲ām b. ʿAbd al-Malik, who apparently inaugurated discussions on these questions in the manner of those which made up the genre of *al-maḥāsin wa 'l-masāwī* [*q.v.*].

A few decades earlier, Ziyād b. Abīhi [*q.v.*] could have dedicated his efforts to such an activity; he is credited with having written a book of *mat̲h̲ālib*, which was used by some of the authors already mentioned (see Sezgin, *GAS*, i, 261, as well as 249, 257, 265, ii, 24, 60). According to Ḥammād ʿAd̲j̲rad [*q.v.*], the *zindīḳ* named Yūnus b. [Abī] Farwa sent a book (or a letter, *kitāb*) to the Emperor of Byzantium about the *mat̲h̲ālib* of the Arabs and the vices (*ʿuyūb*) of Islam (al-D̲j̲āḥiẓ, *Ḥayawān*, iv, 448; cf. al-D̲j̲ahs̲h̲iyārī, 125; al-Ḥuṣrī, *D̲j̲amʿ al-d̲j̲awāhir*, 256; al-Murtaḍā, *Amālī*, i, 90; Ibn Ḥad̲j̲ar, *Lisan al-mīzān*, vi, 334; Brockelmann, S I, 109). This appears to be the one real case of treason which has been recorded; since the Persian ʿAllān al-Warrāḳ al-S̲h̲uʿūbī, who maintained relations with the Barmakids as well as doing the job of copyist at the Bayt al-Ḥikma [*q.v.*] for al-Ras̲h̲īd, and subsequently for al-Maʾmūn, cannot really be blamed for his work; he is indeed the author of a *Kitāb al-Maydān* which collects together, tribe by tribe, all the *mat̲h̲ālib* of the Arabs, from Ḳuray̲s̲h̲ to the Yemenis. The list of tribes and clans which have their shameful matters recorded occupies a whole page of the *Fihrist* (Cairo, 154), where it is stated that the classification adopted there is the same as that of Ibn al-Kalbī. ʿAllān himself also seems to have been objective in his judgement, for he wrote other works, among which may be mentioned a *Kitāb Faḍāʾil Kināna* and a *Kitāb Faḍāʾil Rabīʿa* (see Yāḳūt, *Udabāʾ*, xii, 191-6, with a passage borrowed from al-D̲j̲ahs̲h̲iyārī, which does not appear in the *Kitāb al-Wuzarāʾ*, but which has been reproduced by M. ʿAwwād in *Nuṣūṣ dāʾiʿa min Kitāb al-Wuzarā*, Beirut 1384/1964, 49; Sezgin, *GAS*, i, 271, ii, 61). Sezgin (i, 603) also mentions a *Kitāb al-Mat̲h̲ālib* of Ibn Bis̲h̲r al-As̲h̲ʿarī (d. 260/874), and (ii, 62) the *Mat̲h̲ālib T̲h̲aḳīf wa-sāʾir al-ʿArab* by someone named al-Daymartī.

Although it is possible, it is not likely that later authors continued to use the word *mat̲h̲ālib* in the titles of polemical works against some tribes, for the general situation hardly encouraged this kind of literature to survive. It must have come to an end quite quickly. We have seen that *mathālib* are to be contrasted with *maʾāt̲h̲ir*, *mafāk̲h̲ir* and *manāḳib* (see above); even so, it proved impossible for a parallel to be maintained between works devoted to the praise of groups of people and individuals and those which aimed at discrediting an enemy. The short list that has been given here and what we know of comparable works suggest that Goldziher was correct, for over the centuries the divisions between the tribes weakened so that a growing feeling of fellow-citizenship could develop. Moreover, writers seem to have heeded the *ḥadīt̲h̲* which condemns *al-ṭaʿn fi 'l-ansāb wa 'l-niyāḥa wa 'l-anwāʾ*, and consequently they avoided the temptation of attacking genealogies. On the other hand, as a result of an understandable semantic evolution the term *mat̲h̲ālib* has been used in a meaning close to that of *hid̲j̲āʾ* and has been applied to individuals; see e.g. the *Kitāb Mat̲h̲ālib Abī Nuwās* by Aḥmad b. ʿUbayd Allāh al-T̲h̲aḳafī (d. 314/926; see Yāḳūt, *Udabāʾ*, iii, 240) and the famous *Mat̲h̲ālib al-wazīrayn* by Abū Ḥayyān al-Tawḥīdī (d. 414/1023 [*q.v.*]).

Bibliography: Given in the article. See also J. Sadan, *Pérennité et écarts conceptuels Ǧāhiliyya-Islam à travers les belles-lettres et les recueils de* Mat̲h̲ālib, in *From Jahiliyya to Islam*, Jerusalem 1987.

(CH. PELLAT)

AL-MAT̲H̲ĀMINA, the name given by the Yemenite historians to eight noble families of South Arabia who, before Islam, enjoyed important political privileges, either in the kingdom of Ḥimyar (from the end of the 3rd century AD to 520 [or 525]), or under the Abyssinian and Persian régimes which followed. Mat̲h̲āmina is a plural noun whose singular, which is not attested, could be *Mut̲h̲amman or *Mut̲h̲man (since these participles mean "repeated eight times", "to the number eight"). It is certainly from the Arabic number *t̲h̲amāniya* "eight", and not from the concept of price or value also contained in the root, that the name of these eight families is derived, since they could also be called al-T̲h̲amāniya ("the Eight"), as in al-Hamdānī, *al-Dāmig̲h̲a*, 64.

Mention of the Mat̲h̲āmina is to be found in the works of only three authors, all Yemenite. The oldest is al-Ḥasan al-Hamdānī (280-after 360/893-after 971) [*q.v.*]. Next comes Nas̲h̲wān al-Ḥimyarī, who died in D̲h̲u 'l-Ḥid̲j̲d̲j̲a 573/June 1178 (on this author see al-Akwaʿ, *Naschwān*). The third is the Rasūlid ruler al-Malik al-As̲h̲raf ʿUmar b. Yūsuf b. Rasūl, who reigned from 694 to 696/1295-7 (Sayyid, *Sources*, 396). It is to be noted that the non-Yemenite Arab historians, notably His̲h̲ām Ibn al-Kalbī [*q.v.*] appear to ignore these Mat̲h̲āmina.

The definitions of the historians. These three authors give somewhat divergent definitions of the Mat̲h̲āmina. Dealing with the descent of D̲h̲ū D̲j̲adan, al-Hamdānī (*al-Iklīl*, ii, 283 ff.) mentions incidentally that four of the sons of S̲h̲uraḥbīl b. al-Ḥārit̲h̲ belonged to the Mat̲h̲āmina "eight lineages (*abyāt*) between whom power was shared after the death of D̲h̲ū Nuwās" (a phrase follows whose meaning is obscure). This scholar, like the other Yemenite historians knew that D̲h̲ū Nuwās [*q.v.*] was the nickname of a Ḥimyarite king called Yūsuf (for al-Hamdānī, see for example *al-Dāmig̲h̲a*, 63-4, and *al-Iklīl*, x, 22; for Nas̲h̲wān, we may refer to *Mulūk*, 147-8). The full name and exact title of this ruler are known thanks to a South Arabian inscription engraved by the commanders of one of his armies and dated *d̲-md̲r'n* 633 of the Ḥimyarite era (July 518 or July 523 AD, since there is some question as to whether the Ḥimyarite era begins in 115 or 110 before the Christian era): "Yūsuf Asʾar Yat̲h̲ʾar, king of all the tribes" (*Ywsʾf ʾsʾr Yt̲ʾr mlk kl ʾsʿbn*, in Ja 1028, line 1) (the name of the king should thus be corrected in the article DHŪ NUWĀS).

The dates of the reign of Yūsuf, a ruler especially known for having persecuted the Christians of Nad̲j̲rān, which led to an Abyssinian intervention that challenged him and drove him to suicide, are not established with certainty. He came to power between June 516 (or 521) and June 517 (or 522) (according to the evidence of Ry 510 and Ja 1028/8-9) and was overthrown by the Abyssinians shortly after Pentecost 520 (or 525) (Beeston, *Judaism*, 272 ff.; Huxley, *Martyrium*, 51). After the death of Yūsuf, the kingdom of Ḥimyar passed under the tutelage of Abyssinia for fifty years; then, in the year 570, it was conquered by the Sāsānids and remained under Persian domination until it was won over to Islam during the lifetime of Muḥammad. For al-Hamdānī, the Mat̲h̲āmina were

thus the noble lineages who dominated Yemen after the fall of the Ḥimyarite dynasty, that is, during the Abyssinian occupation and perhaps after that. This scholar in the meantime neglects to mention that the Ḥimyarite throne did not remain vacant; the Abyssinians placed on it a Ḥimyarite Christian, Samyafaʿ (*Sʾmyfʿ*), then one of their own people, Abraha [*q.v.*].

The definition of the Mathāmina that Nashwān gives differs somewhat from that of al-Hamdānī. In *Mulūk*, 157, he states that "these eight kings and their descendants are eight lines called the Mathāmina of Ḥimyar; in order for the royal dignity of a king of Ḥimyar to be effective, these eight had to establish him and if they agreed on his removal, they deposed him". In *Shams al-ʿulūm*, 16, under the root ThMN, he adds: "*Thamāniya*: rulers (*amlāk*) descended from Ḥimyar the Younger b. Sabaʾ the Younger, called the Mathāmina; this is made into a proper noun for them so as to distinguish it from the number eight without the article". For Nashwān, the Mathāmina were thus great barons who exercised strict control over the Ḥimyarite ruler, since they confirmed him in office and could also remove him. The reference to such a ruler probably implies an earlier date for the Abyssinian invasion; the Mathāmina were thus an institution dating from the splendour of the Ḥimyarite kingdom.

A modern Yemenite scholar, Muḥammad Bāfaḳīh, has linked this definition of Nashwān with a passage of al-Hamdānī (*al-Iklīl*, ii, 114), where it is noted that the Ḥimyarite king was enthroned by a college of 80 *ḳayls* [*q.v.*], supposing that this number 80 should be corrected to eight (which should be another mention of the Thamāniya/Mathāmina) (Bāfaḳīh, *al-Hamdānī*, 106). This possible correction is not imperative, for it is not necessary for a good understanding of the text, especially as the pre-Islamic inscriptions acquaint us with a number of *ḳayls*, far more than eight.

As for the Rasūlid ruler al-Malik al-Ashraf, he gives two different definitions of the Mathāmina several pages apart (*Ṭurfat al-aṣḥāb*, 73, 77); it is clear that he copied two divergent sources without investigating or succeeding in harmonising them. He states firstly (73): "among (the *ḳayls*), (are counted) the Mathāmina: these are eight men who belonged to Ḥimyar and who were kings of their people; they were subordinate to the kings of Ḥimyar, and their descendants are the tribes of Ḥimyar; they are called the Mathāmina; their powers included the fact that a king of Ḥimyar could not reign without their goodwill and, if they agreed on his removal, they deposed him". This text, like the list of the Mathāmina which follows (see below), is a simple paraphrase of Nashwān's text, *Mulūk*, 157-8.

Several pages later (77), al-Malik al-Ashraf returns to the subject: "the Mathāmina — of the Ḥimyarites — are eight *ḳayls* who arose after Sayf b. Dhī Yazan and to whom the Yemenites gave power". Here is a new evaluation; these Mathāmina are seen as reigning after the arrival of the Persians, called to Yemen by Sayf b. Dhī Yazan to chase out the Abyssininans (in the year 570).

Variants in the list of the Mathāmina. The list of the Mathāmina was already disputed in the time of al-Hamdānī, who gives two different versions of it with two of the eight names varying; other variants were defended by later authors. We can sum up these diverse opinions in the following table:

	H1	H2	N1	N2	N3	M1	M2
Dhū Saḥar	x	xx	xxx		x	(x)	
Dhū Thaʿlabān	x	xx	xxx	x	x	x	x
Dhū Khalīl	x	xx	xxx	x	x		x
Dhū ʿUthkulān	x	xx	xxx	x	x	x	x
Dhū Djadan	x	xx	xxx	x	x	x	x
Dhū Manākh	x						x
Dhū Ṣirwāḥ	x		xxx	x	x	x	
Dhū Maḳār	(x)	xx	xxx	x		x	x
Dhū Ḥazfar		xx	xxx	x	x	x	
Dhū Ḳayfān		xx					
Dhū Murāthid				x			
Dhū Yazan				x			x
Dhū Maʿāfir							x

(the crosses indicate the number of occurrences of the list in the work of the author considered)

H1 = al-Hamdānī, list no. 1: see *al-Iklīl*, ii, 294. It is this which the present author takes into account. In the only available edition of *al-Iklīl*, ii, by M. al-Akwaʿ, it is necessary to correct Dhū ʿUshkulān to Dhū ʿUthkulān; besides, the list only consists of seven names (in place of the eight announced in the text), without our knowing whether it is a case of an error by the editor or a deficiency in the unique manuscript. In fact, it is necessary to add Dhū Maḳār, as is proved by the five verses attributed to ʿAlḳama b. Dhī Djadan, which al-Hamdānī cites to justify this list and which he takes from Muḥammad b. Ibrāhīm b. al-Maḥābī al-Kalāʿī. In this fragment of ʿAlḳama (a great Yemenite poet who was a contemporary of the Prophet Muḥammad: *al-Iklīl*, ii, 300-1; on this poet, see also Löfgren, *ʿAlqama*), the Mathāmina are treated as if they already belonged to past times. Unfortunately, we cannot conclude anything from this, for the authenticity of these verses seems doubtful; al-Hamdānī himself did not find any trace of them in the work of ʿAlḳama.

H2 = al-Hamdānī, list no. 2: see *al-Iklīl*, ii, 294-5. It is given in two pieces of verse. The first is that which serves as a justification for H1, but with some variants, notably the replacement of Dhū Manākh and Dhū Ṣirwāḥ by Dhū Ḥazfar and Dhū Ḳayfān; al-Hamdānī takes it from an Arab of Ṣanʿāʾ who attributes it, not to ʿAlḳama, but to a Ḥimyarite. The second piece, which numbers six verses, is "the famous saying of ʿAlḳama b. Dhī Djadan on the Mathāmina in his poem"; it gives the same names as the preceding.

N1 = Nashwān, list no. 1: see *Mulūk*,156-7. It is provided by the *Ḳaṣīda ḥimyariyya*, a nostalgic poem that Nashwān devoted to the annals of the Ḥimyarite Empire. It is a compromise between the H1 and H2 versions: of the two innovations in H2, it retains only the replacement of Dhū Manākh by Dhū Ḥazfar. The author justifies his list by citing, in the commentary on his poem, ʿAlḳama's verses already encountered with the support of H1 (but attributed in H2's statement to a Ḥimyarite), with new variants. The same list is found in a piece of three verses, without the author's name, that Nashwān cites in the encyclopaedic dictionary that he composed entitled *Shams al-ʿulūm*, under the root SḤR, 48.

N2 = Nashwān, list no. 2: see *Shams al-ʿulūm*, under the root ThMN, 16. It follows N1, but replaces Dhū Saḥar with Āl Murāthid. This list is provided by a poem attributed to an Arab from the North (from the tribe of ʿAtīk b. Aslam b. Yadhkur b. ʿAnaza b. Asd b. Rabīʿa b. Nizār). It is a variant without real significance, seeing that Dhū Murāthid is, according to the genealogists, the "son" of Dhū Saḥar (see notably Nashwān, *Mulūk*, 158, and al-Hamdānī, *al-*

Iklīl, ii, 317-18). Al-Hamdānī himself (*al-Iklīl*, viii, 159) considers Dhū Murāthid as one of the Mathāmina, although this lineage does not appear in his own lists. The preference shown for Dhū Murāthid in this text of Nashwān may have a personal motive; this author claimed descent from Ḥassān Dhū Murāthid b. Dhī Saḥar (*Shams al-ʿulūm*, under the root RThD, 40).

N3 = Nashwān, list no. 3: see *Shams al-ʿulūm*, on the word *dhū*, 39. It differs from N1 in one name, Dhū Yazan, who takes the place of Dhū Maḳār. It may be a slip by the author for, in his works, he never puts Dhū Yazan among the Mathāmina, not even in the article devoted to this line in the same work (116). All the other names on the list, by contrast, are explicitly described as Mathāmina, when Nashwān discusses them. Moreover, it will be noted that this list is not supported by any poetic reference.

M1 = al-Malik al-Ashraf, list no. 1: see *Ṭurfat al-aṣḥāb*, 73. The list of the Mathāmina comprised, following the manuscripts used by Zettersteen: Yazīd, Ṣakhar, Thaʿlabān the Elder, Murra Dhū ʿUthkulān, Maḳār b. Mālik, Dhū Ḥazfar b. Aslam, ʿAlḳama Dhū Djadan and Dhū Ṣirwāḥ. This passage is actually a rather corrupt citation and taken from the commentary of the *Ḳaṣīda ḥimyariyya* of Nashwān (*Mulūk*, 157-8). Also, the two first names ("Yazīd wa-Ṣakhar") may be a corruption of the double name Barīl Dhū Saḥar. When the correct reading is established, the list, a simple repetition of N1, only consists of seven persons. But al-Malik al-Ashraf intended to give eight names, and not seven. So it is probable that the copying error already existed in the source that he used.

M2 = al-Malik al-Ashraf, list no. 2: see *Ṭurfat al-aṣḥāb*, 77. It takes the name Dhū Yazan, already given in N3, and provides an entirely new name, Dhū Maʿāfir. If comparison is made with H1, these two names take the place of Dhū Saḥar and Dhū Ṣirwāḥ.

The Mathāmina in the pre-Islamic inscriptions and in tradition. Almost all the lines of Mathāmina cited by the traditionists are confirmed in the South Arabian inscriptions. This allows us to determine their origin, which has been totally obscured by tradition. It is established that they were:

— Sabaeans from Maʾrib: Dhū Saḥar, Dhū Khalīl, Dhū ʿUthkulān, Dhū Djadan, Dhū Maḳar, Dhū Ḥazfar.
— Sabaean from a region adjoining Maʾrib: Dhū Ṣirwāḥ, hypothetically since this line has not been attested before Islam with this name; but Dhū Ṣirwāḥ clearly refers to the important ancient site of Ṣirwāḥ, at least 40 km. west of Maʾrib.
— Sabaean from the Highlands (to the north of Ṣanʿāʾ): Dhū Murāthid
— Ḥimyarites: Dhū Manākh and Dhū Maʿāfir
— Ḥaḍramite: Dhū Yazan
— Nadjrānites: Dhū Thaʿlabān and possibly Dhū Ḳayfān.

If we discard from the lists of Mathāmina the most doubtful names, Dhū Murāthid (a doublet of Dhū Saḥar), Dhū Ḳayfān (mentioned in only one list and furthermore a descendant, in the genealogies, of Dhū Djadan), Dhū Yazan and Dhū Maʿāfir (who only appear at a late date), of the 9 remaining names, 6 are of Sabaean lineages of Maʾrib, plus a seventh (Dhū Ṣirwāḥ) who can be assimilated with them. The preponderance of lines originating from the Sabaean capital is overwhelming. On the other hand, it is curious to find so few lines drawn from Ḥimyar and any of the Sabaean tribes of the highlands, whereas the traditionists have preserved the memory of a number from among them. The Mathāmina are thus essentially the old Sabaean nobility of Maʾrib. This observation reminds us that al-Hamdānī mainly invokes the authority of the poet ʿAlḳama b. Dhī Djadan, himself originating from one of these old lines of Maʾrib: it is probable that it is he, and he alone, who is at the origin of this tradition.

It is further to be noted that, in the genealogy of Ḥimyar composed by al-Hamdānī, the great majority of the lines of Mathāmina, and notably all those of Sabaean origin, are grouped in the same branch (see *al-Iklīl*, ii), parallel to that in which are grouped the Ḥimyarite kings (on this, see Bāfaḳīh, *al-Ḥārith*). It would seem that the traditionists had integrated in the same branch of this genealogy two bodies of traditions, on one hand that of the tribe of Ḥimyar in the strict sense, on the other that of the Sabaeans of Maʾrib. Finally, we will observe that in Yemen in the 9th-12th centuries AD, numerous clans, lines and even villages were claiming descent from the Mathāmina; an eloquent picture is supplied by the works of al-Hamdānī, notably in the genealogies of Ḥimyar.

The later vogue of the Mathāmina. The tradition of the Mathāmina is certainly ancient: it is based on some fragments of reputed archaic poetry, whose antiquity can be confirmed by the mention of Dhū ʿUthkulān, an authentic pre-Islamic Sabaean line which is known to the historians only from these fragments. We may assume that it dates back to the Ḥimyarite period (end of the 3rd century AD - beginning of the 6th), after Ḥimyar had annexed Sabaʾ around 275 and at a time when the ancient noble Sabaean lines had to defend an authority that was being increasingly threatened.

Meanwhile, this tradition seems to have been neglected by the earliest of the great traditionists, whose work established the genealogical outline of the Arab tribes, notably Hishām Ibn al-Kalbī (around 120-204 or 206/around 737-819 or 821) and Ibn Durayd al-Azdī (223-321/837-933) [*q.v.*]. Ibn al-Kalbī knew, however, 7 of the 13 lines of Mathāmina recorded above (Caskel, *Ǧamhara*, index): Dhū Shahar (*sic*), Dhū Khalīl, Dhū Djadan, Dhū Manākh, Dhū Ṣirwāḥ, Dhū Ḳayfān and Dhū Yazan, to whom we may add the two tribe names, Thaʿlabān and al-Maʿāfir (without *dhū*).

So it is at a late date that the tradition of the Mathāmina enjoyed a certain vogue, when the Yemenite scholars, beginning with al-Hamdānī, raised it from oblivion. It is probable that they only had at their disposal in order to do this some allusions from archaic poetry, which would explain the notable differences of definition from one author to another.

The interest that the Yemenites showed in these Mathāmina from the 9th-10th centuries onwards probably has a political cause. The dissolution of the ʿAbbāsid empire left the field open to many ambitions, particularly in Yemen where the struggles for power became fierce. In this context, prestigious Ḥimyarite ancestors gave an incontestable historical legitimacy, even if the religious authorities saw in it a manoeuvre against Islam. It was probably impossible to claim a royal ascendancy, whether it was owing to public knowledge that the rulers of Ḥimyar had had no posterity or because their engagement in favour of Judaism had disqualified them. But there were the Mathāmina, mentioned in archaic poetry, and they resorted to this idea which had fallen into oblivion. It is probable that the Djaʿfarids who appealed to Dhū Manākh for their authority and the Yuʿfirids (and perhaps the Zawāḥids) who claimed descent from Dhū

Maķār owed their success, among others, to the prestige of these ancestors. The addition of Dhū Ma^c^āfir in list no. 2 of al-Malik al-Ashraf could be explained in the same way; would the Rasūlids not have needed a prestigious local ancestry in order to establish their power better? Many other lines, even modest ones, attempted to ennoble themselves in the same way, by claiming to have one of the Mathāmina for an ancestor.

To supply arguments for certain princes seeking historical legitimacy and roots, it is probable that some scholars did not hesitate to replace one name with another in the poetical fragments and in the list, to such an extent that the number of variants increased. We know the bad reputation that the genealogists had; was not al-Hamdānī himself accused of falsification for payment (Bāfaķīh, *al-Ḥārith*, 428)?

Finally, one should mention that the name Mathāmina was also borne by a branch of the ^c^Alids of Yemen (see al-Malik al-Ashraf, *Ṭurfat al-aṣḥāb*, 116).

AL-MATHĀNĪ [see AL-ĶUR^ʾ^ĀN].

MATHEMATICS [see DJABR, HANDASA, ḤISĀB].

MATHNAWĪ (A.), the name of a poem written in rhyming couplets.

1. In Arabic literature, see MUZDAWIDJ.

2. In Persian.

According to the prosodist Shams-i-Ķays (7th/13th century), the name refers to "a poem based on independent, internally rhyming lines (*abyāt-i mustaķill-i muṣarra^c^*). The Persians call it *mathnawī* because each line requires two rhyming letters.... This kind (*naw^c^*) is used in extensive narratives and long stories which cannot easily be treated of in poems with one specific rhyming letter" (*al-Mu^c^djam*, ed. Tehran 1338/1959, 418f.). The first part of this definition mentions the single characteristic which separates the *mathnawī* from all other classical verse forms, namely its rhyme scheme *aa bb cc*, etc. Otherwise, the name is given to poems differing greatly in genre as well as in length.

Etymologically, it is often explained as a *nisba* adjective to the Arabic word *mathnā*, "two by two"; but *mathnāt^un^* (according to al-Djawharī, the equivalent of the Persian *du-baytī*, "which is a song") is mentioned as another possibility in the *Tādj al-^c^arūs* (cf. Lane, *s.v.*). It is reasonable to think that the term was coined by the Persians in spite of its Arabic derivation. The Arabs used the term *muzdawidj* [*q.v.*] instead. By this they designated poems with rhyming couplets, usually written in the trimeter of the *radjaz* which has either eleven or twelve syllables. Such poems were composed at least since the beginning of the 8th century A.D., but the verse form remained of little importance in Arabic literature (cf. G. E. von Grunebaum, *On the origin and early development of Arabic* muzdawij *poetry*, in *JNES*, iii [1944], 9-13, repr. in *Islam and medieval Hellenism*, London 1976).

The much more successful Persian *mathnawī* is first known from the Sāmānid period (4th/10th century). Although it made its appearance at a much later date than the *muzdawidj*, the *mathnawī* is regarded by nearly all modern scholars as a continuation of an Iranian verse form and not of its Arabic counterpart. Yet this theory meets with a few thorny problems pertaining to the history of prosody in Iran. Prior to the Islamic period, rhyme—the most prominent feature of a *mathnawī*—was apparently not in use as a characteristic of a verse form. The metrical system of pre-Islamic Iranian poetry is still very imperfectly understood. The early opinion of modern scholarship was that it must have been governed by the principle of syllable counting. On the basis of this assumption, an Iranian origin of some Persian metres, which were frequently used in early *mathnawīs*, was held to be likely (cf. G. E. von Grunebaum, *Islam. Essays in the nature and growth of a cultural tradition*, London 1955, 177-80).

The syllabic principle was rejected by W. B. Henning and M. Boyce in favour of the theory that the pre-Islamic metres were accentual and allowed a variable number of syllables within certain limits. It has been shown more recently that a rather great irregularity in the length of verse lines was permitted, probably under the influence of the accompanying music (see S. Shaked, *Specimens of Middle Persian verse*, in *W. B. Henning memorial volume*, London 1970, 395-405, with further references). L. P. Elwell-Sutton, on the other hand, arguing in support of his thesis that the metres of classical poetry continue the system used in pre-Islamic Iran, opted for the principle of syllabic quantity (*Persian metres*, 168ff.). It has often been observed that the Persian *mathnawīs* are written in a restricted number of metres. These metres always have eleven or, more rarely, ten syllables. A verse form marked by such inflexible rules for its rhyme and the number of its syllables can only have developed in the early Islamic period. It is most likely, therefore, that the *mathnawī* came into being through a process of adaptation of pre-Islamic verse forms to the prosody of the Islamic period which was dominated by the

metric principles of Arabic poetry. The stages of this process can no longer be traced from the scant remains of pre-classical Persian poetry which have been preserved (cf. e.g. Chr. Rempis, *Die ältesten Dichtungen in Neupersisch* in *ZDMG*, ci [1951], 235-8; Fr. Meier, *Die schöne Mahsatī*, Wiesbaden 1963, 9ff.; G. Lazard, *Les premiers poètes persans*, Paris 1964, 10ff.).

In the view of the classical poets, the *mat̲h̲nawī* was undoubtedly on a par with other forms of poetry. To Gurgānī [*q.v.*], the treatment in a *mat̲h̲nawī* of the story about Vīs and Rāmīn, known up to his days only in an unadorned "Pahlawī" form, amounted to bringing it to the level of poetic expression (*Vīs-u Rāmīn*, ed. Tehran 1337/1959, 20). The poems of Niẓāmī [*q.v.*] show which heights of stylistic art could be reached in this form. In some respects, however, it was also akin to prose. The narrative and didactic contents of many poems could equally be dealt with in prose works. In principle, there were no limits to the length of a *mat̲h̲nawī*. A few works of exceptionable size like the *S̲h̲āh-nāma*, some of the later heroic poems, and the *Mat̲h̲nawī-yi maʿnawī* left aside, most of the better-known poems fall within a range of 2,000 to 9,000 *bayts*, but the form was also used for texts of a much lesser extent. Fragments of no more than a few lines with the rhyme scheme of the *mat̲h̲nawī* can be found as inserted lines in prose works, for example in the *Gulistān* of Saʿdī [*q.v.*], who sometimes wrote an entire story on this scheme in 10 or 12 *bayts*.

Other poems were occasionally inserted into a *mat̲h̲nawī* text, either with or without the use of their specific rhyme scheme. The first poet to do the former was, to our knowledge, ʿAyyūḳī (*fl.* in the early 5th/11th century), who put short poems in monorhyme into the mouths of the protagonists in his *Warḳa u Guls̲h̲āh* (ed. by D̲h̲. Ṣafā, Tehran 1343/1964). This insertion of *g̲h̲azals* was also a characteristic of the *Dah-nāma* genre and occurs sometimes in versions of the legend of Mad̲j̲nūn Laylā [*q.v.*], notably in the poem of Maktabī (9th/15th century). Lyric poems adjusted to the pattern of the *mat̲h̲nawī* can be found frequently in the works of Firdawsī [*q.v.*], Gurgānī, Niẓāmī and others.

Prose and poetry were in some cases used alternatively, e.g. in the *Walad-nāma* of Sulṭān Walad [*q.v.*]. The *Tuḥfat al-ʿIrāḳayn* of K̲h̲āḳānī [*q.v.*] is in most copies introduced by a prologue in ornate prose; a similar prologue belongs to one of the early versions of the *Ḥadīḳat al-ḥaḳīḳa* of Sanāʾī [*q.v.*], but was certainly not written by the poet himself. D̲j̲alāl al-Dīn Rūmī [*q.v.*] added a composition of this kind to each of the six books into which his *Mat̲h̲nawī* is divided.

The composition of *mat̲h̲nawīs* shows the same variety as most of their other features. Yet certain conventions can be recognised in a number of poems and can be used therefore as the basis of a classification. A common type is exemplified in *mat̲h̲nawīs* with a clear distinction between introductory sections and the proper text of the poem concerned. The former (which are often collectively designated as the *dībāča*, a term also applied to prologues in prose) deal with a series of topics, some of which can be regarded as obligatory whereas others were added at the pleasure of the poet. To the first category belonged praise of the One God and prayers (*tawḥīd, munād̲j̲āt*), a eulogy of the Prophet (*naʿt*), which usually included the praise of his Family and his Companions, a dedication to the poet's patron, and digressions on the occasion for writing the poem, its subject matter, etc. Reflections of the value of poetry, usually referred to as *suk̲h̲an*, meaning both "speech" and "logos" (see e.g. J. Chr. Bürgel, *Niẓāmī über Sprache und Dichtung*, in *Festschrift für Fr. Meier*, Wiesbaden 1974, 9-28), and other sections of a moralising nature have frequently been added. A *dībāča* of this kind can already be found in the *S̲h̲āh-nāma* together with a series of sections on the origin of the world which form a prelude to the subject-matter of Firdawsī's epic. The obligatory part of the scheme was further enlarged by Niẓāmī, who added it to the treatment of the *miʿrād̲j̲* [*q.v.*] of Muḥammad following upon the *naʿt*. Ṣūfī poets like Amīr K̲h̲usraw and D̲j̲āmī [*q.vv.*] inserted the praise of their spiritual guides. In some poems, a few sections of the *dībāča* were placed at the end by way of an epilogue.

Less frequently found is a type of poem introduced by the description of one particular object treated as an emblem from which symbolic meanings relevant to the following poem are derived. This device may have been borrowed from the *nasībs* of *ḳaṣīdas*. Such emblems were: the wind in Sanāʾī's *Kār-nāma* and *Sayr al-ʿibād ilā 'l-maʿād*, the sun in *Tuḥfat al-ʿIrāḳayn*, the flute in the *Mat̲h̲nawī-yi maʿnawī*, and the *rabāb* in Sulṭān Walad's *Rabāb-nāma*.

A distinction between an introduction and the poem itself cannot always be recognised. This is especially not possible in many of the shorter *mat̲h̲nawīs* and in some didactic works like the *Ḥadīḳat al-ḥaḳīḳa*.

Several devices could serve to articulate the contents of poems. Firdawsī inserted passages of various kinds into the *S̲h̲āh-nāma* to introduce the major stories contained in the text. The night scene describing how the poet was inspired by a "beloved idol", who brought him a lamp, and the theme of the tale of Bīz̲h̲an and Manīz̲h̲a, is the best known example. The genre of nature poetry provided Niẓāmī with the means to mark transitions in the structure of his romances; reflective intermezzi could fulfil the same purpose. More systematic was his use of short addresses to the cupbearer (*sāḳī*) and the singer (*mug̲h̲annī*) respectively in the two parts of the *Iskandar-nāma* as introductions to each section of the narrative. Didactic poems were often, like treatises in prose, divided into chapters styled *bāb*, *maḳāla* or otherwise.

The genres cultivated in *mat̲h̲nawīs* are not restricted to the heroic [see ḤAMĀSA], the romantic and the didactic, the three usually associated with this verse form. Panegyrics and satire, topical events, love and wine, and many others subjects could also be dealt with in a *mat̲h̲nawī*. The larger poems nearly always contain passages of other genres than the one they are mainly concerned with. Sections dealing with ethical, philosophical or religious themes are hardly ever missing in narrative poems. The didactic poet, on the other hand, used both long and short tales to exemplify the ideas propounded in his works. They can be found already in one of the oldest specimens of the didactic genre, the *Āfarīn-nāma* of Abū S̲h̲akūr Balk̲h̲ī [*q.v.* in Suppl.].

The *mat̲h̲nawī* was also a useful tool to present factual information on account of its memotechnic advantage. An early example of this is Ḥakīm Maysarī's *Dānis̲h̲-nāma*, the oldest integral text in rhyming couplets which has been preserved. It was completed in 370/980-1 and treats of medical matters (partial edition and translation by G. Lazard, *Les premiers poètes persans*, Tehran-Paris 1964, ii, 178-94; i, 163-80, see also 36-40). A wide range of subjects pertaining to the religious and the natural sciences, astrology, occultism and the arts were treated in the same fashion.

The choice of a metre for a *mat̲h̲nawī* was deter-

mined by convention and not by some intrinsic quality of the metre concerned. A clear example is provided by the metre *mutaḳārib-i muthamman-i maḥdhūf* which, because of its occurrence in the *Shāh-nāma*, was chosen by most poets who subsequently wrote heroic *mathnawīs*. Already in the time of Firdawsī, however, it was used also in a didactic poem by Abū Shakūr and in a love story by ʿAyyūḳī. Similar divergences of use can be noticed in the case of other metres. A decisive factor was the tendency towards the imitation of authoritative models according to their most important characteristics of form and content. The classical poets tried to bring their originality to bear through the emulation of predecessors. This consisted both of repetition and of change. The former made it clear that they were following the example of a great master; the latter that they were clever enough to find new variations on one aspect or the other of their model. The long series of imitations based on the *khamsa* [*q.v.*] of Niẓāmī provides the best-known instance of the workings of this artistic principle. The metre was usually among the features which were retained in an imitating poem. The metre of a genuine work was also carefully maintained in pseudepigraphical forgeries as they were based, e.g., on the works of Sanāʾī' and ʿAṭṭār [*q.v.*]. On the other hand, a change of the metre could also serve to demonstrate a poet's independence with regard to a model followed in other respects, e.g. in the case of Niẓāmī's replacing the *khafīf* of Sanāʾī's *Ḥadīḳat al-ḥaḳīḳa* for the *sarīʿ* of his own *Makhzan al-asrār* (cf. E. É. Bertel's, *Nizami i Fuzuli*, Moscow 1962, 183).

Sometimes the imitation of one particular element of a poem gave rise to an independent genre of *mathnawīs*. The exchange of ten letters between Wīs and Rāmīn in Gurgānī's poem became the source of the *Dah-nāmas*, short works in *mathnawī* and *ghazals*, which were written from the beginning of the 8th/14th century onwards (cf. T. Gandjeï, *The Genesis and definition of a literary composition: the Dah-nāma ("Ten love-letters")*, in *Isl.*, xlvii [1971], 59-66). Another example is the even longer sequence of *Sāḳī-nāmas* which had its origin in the call of the cup-bearer used by Niẓāmī in the first book of his *Iskandar-nāma*. It was a genre of anacreontic verse written in the *mutaḳārib* metre of its original. The authors of *Sāḳī-nāmas* were numerous enough to become the subject of a special *tadhkira*, the *Maykhāna* of ʿAbd al-Nabī Fakhr al-Zamānī, completed in 1028/1619 (Storey, i/2, 813; ed. by A. Gulčīn-i Maʿānī, Tehran 1340/1961).

During the later Middle Ages, new subjects were added to the répertoire of the narrative *mathnawī* by poets like Khwādjū Kirmānī [*q.v.*], ʿImād al-Dīn Faḳīh-i Kirmānī [*q.v.* in Suppl.] and Djāmī. At the same time, mystical poems continuing the examples set by Sanāʾī, ʿAṭṭār and Djalāl al-Dīn Rūmī proliferated. The didactic genre includes several masterworks of Persian poetry, such as Saʿdī's *Būstān*, the often-imitated *Makhzan al-asrār* and the didactic poems of Djāmī's *Haft awrang*. Among the many writers of short Ṣūfī *mathnawīs*, Maḥmūd Shabistarī [*q.v.*] and Ḥusaynī Sādāt Amīr [*q.v.*] should be mentioned. The Indo-Persian poet Bīdil [*q.v.*] was the most versatile author of mystical *mathnawīs* in later centuries. The narrative and the didactic strains were intertwined in allegoric poems, for which Fattāḥī [*q.v.*] provided influential models. The great variety of subjects dealt with in shorter poems cannot be completely described here. Mention should be made, however, of a few genres which were fashionable in the 10th-11th/16th-17th century: *shāhrāshub* or *shahrangīz*, poems dealing with the playful description of young craftsmen and artisans which also exist in the form of series of quatrains (cf. A. Gulčīn-i Maʿānī, *Shahrāshūb dar shiʿr-i fārsī*, Tehran 1346/1967); *sarāpāy*, devoted to the description of an ideal human body "from top to toe"; *sūz-u gudāz*, the description of painful experiences (see for a specimen, Ṭālib-i Āmulī, *Kulliyyāt-i ashʿār*, ed. Tehran 1346/1967-8, 193-208); and *ḳaḍāʾ u ḳadar*, stories about the workings of fate (cf. *Armaghān*, viii [1306/1927], 120-3; x [1308/1929], 458-64, 554-60: specimens by Ruknā Masīḥ-i Kāshānī and Muḥammad-Ḳulī Salīm). Biblical themes were taken as the subject of *mathnawīs* in Judaeo-Persian literature [*q.v.*].

In modern literature, the *mathnawī* proved still to be a useful medium for the Persian poets as long as they were mainly interested in a renewal of contents. Imitations of the *Shāh-nāma* with a nationalist tendency were the *Nāma-yi bāstān* or *Sālār-nāma* (1313/1895-6) by Āḳā Khān Kirmānī [*q.v.* in Suppl.], the *Ḳayṣar-nāma* by Adīb Pīshāwarī [*q.v.* in Suppl.] and the *Pahlawī-nāma*, an unfinished history of Islamic Iran in heroic verses by Nawbakht, published in 1926-8. Social and political criticism was voiced in *mathnawīs* by Amīrī [*q.v.* in Suppl.] and Parwīn [*q.v.*]. Īradj Mīrzā (1874-1924) used the form for satire in his *ʿĀrif-nāma* and for a modern love story in *Zuhrā wa Manučihr*. The Indo-Persian poet Muḥammad Iḳbāl [*q.v.*] adopted it for some of his most famous works, like the *Djawīd-nāma* and *Gulshan-i rāz-i djadīd*, an imitation of the short mystical poem of Maḥmūd Shabistarī. The last major *mathnawī* to be written by a Persian poet was the *Kār-nāma-yi zindān* by Malik al-Shuʿarā Bahār [*q.v.*]. It contains the account of the poet's imprisonment and exile during the 1930s in the style of the great didactic poets of the past (*Dīwān-i ashʿār*, ed. Tehran 1345/1966, ii, 2-126).

Other prosodic forms—stanzaic poems and even *ḳaṣīdas*—were however increasingly used for epic poetry, even by poets who remained faithful to the classical canons. The experiment with a *mathnawī-yi mustazād* made by Bahār (*op. cit.*, ii, 234-8) was not pursued. Under the influence of the theories of Nīmā Yūshīdj [*q.v.*], the *shiʿr-i naw* poets of the period after the Second World War abandoned the *mathnawī*, mainly because the rigid isochronism of its verse was considered to be an impediment to the expressive use of metre (see e.g. Mahdī Akhawān-Thālith (M. Umīd), *Bidāʿathā wa badāyiʿ-i Nīmā Yūshīdj*, Tehran 1357/1978, 70 ff.).

Persian literary theory had little to add to the brief definition of the *mathnawī* given by Shams-i Ḳays. A few remarks on the subject by later writers were assembled by H. Blochmann, *The prosody of the Persians*, Calcutta 1872, 87-90. Works on *inshāʾ* [*q.v.*] sometimes pay attention to the corrections of the *dībāča* of a *mathnawī* (one of such works is quoted by Aḥmad ʿAlī, *Haft Ásmán or History of the Masnaví of the Persians*, ed. Blochmann, Calcuta 1873, 41-2; ʿAlī's book contains the introduction to an unfinished work on *mathnawī* poets).

3. In Turkish.

The Turkish *mathnawī* developed late under the influence of that of Persia and alongside it. The oldest monument of Muslim Turkish literature that has chanced to be preserved, the *Kutadghu bilig* [*q.v.*], is a long didactic *mathnawī* (R. Dankoff, *Yūsuf Khāṣṣ Ḥājib. Wisdom of Royal Glory (Kutadgu Bilig). A Turko-Islamic Mirror for Princes*, Chicago 1983). Turkish and Persian *mathnawīs* shared a great stock of authoritative models, ranging from the themes themselves to the choice of the appropriate metres (*mutakārib* for the heroic genres [see ḥamāsa], *ramal* for the religio-didactic type and *hazadj* for the romance). Up to now, this division into three genres has served as the main principle of organisation. But more attention needs to be paid to the social and cultural context in which these works were written, and to the way in which the three genres overlap. Turkish *mathnawīs* had the same architectural framework as their Persian counterparts [section 2 above]. The authors' possibilities lay in the "internal" significance of the details rather than in the "external" aspects of plot and metre, the choice of the formal means being largely determined by the theme, for which terms as *kiṣṣa* [*q.v.*], *dāstān*, or *ḥikāya* [see ḥikāya. iii] were used.

The chief element of the narrative *mathnawī* was the plot, turning on love between two chief characters, male and female, who gave it its title. Opening chapters dealt with the reason for writing and its true purpose, incidentally drawing the patron's attention to his skills as a poet. Structure and contents of the framework could be modelled on that of the *kaṣīda* [*q.v.*], without the tautness of that form. Changing metres could be used as structural boundaries dividing parts of the prologue. In his religious exordium, an author could combine the praise of the One God with a meditation on the works of creation. The eulogy of the prophet Muḥammad and his heavenly journey [see miʿrādj] have been treated in all Islamic poetry, whereas the praise of the four first caliphs would only be found in the *mathnawī* of a Sunnī author. In the dedicatory passage, a local patron could be praised next to the ruler. If there was no response, the dedication might be removed and replaced with a complaint to Fate. Since it was the poets' desire to prove their own superiority, they hardly ever felt the need to mention their immediate predecessors. An attitude of reverence for the great classical models was present in the poets' reflections on the value and essence of poetry. A favoured way of expression was that of mystically-coloured love poetry, depicting the author in a dialogue with the "speaker of the heart", the cupbearer, *sāḳī*, or the pen, *ḳalem*. In the epilogue, the date and the author's name could be transmitted. The author would seek to disarm adverse criticism, justifying his adaptation of a foreign classic or an old "native" story in the Turkish of his own time and environment. Disavowal of the vernacular in general need not prevent a poet from praising his own elegant idiom which he had substituted for the obsolete language of the original.

As for his narrative, the themes being familiar and speaking for themselves, a mediaeval author could trust his audience to appreciate the significance of his particular treatment. In this way, the *mathnawī* could combine religious teachings, offer historical truth, serve as tool of learning or simply offer entertainment. Chapter headings divided the more voluminous texts. Short lyrical insertions belonging to *ghazal* [*q.v.*, iii. In Ottoman Turkish literature, in Suppl.] poetry acted as breathing spaces. Without shifting his point of view, the author presented the inmost thoughts of his protagonists, using lyrical monologues, dialogues of the lovers or the old technique of inserting letters; he could also express his own feelings in signed *ghazals*, using mystical images (R. Dankoff, *The lyric in the romance*, in *JNES*, xliii [1984], 9-25). Much research is needed into the great mass of Turkish *mathnawīs* in order to relate them to the social and cultural contexts which define their significance. Most of the old poems did not appear in print before the Republic. Only a fragment of this material has been translated into a modern language.

Mystic-didactic *mathnawīs* were introduced into Anatolia by Djalāl al-Dīn Rūmī [*q.v.*] and his son Sulṭān Walad [*q.v.*]. The short *Čarkh-nāme* seems to have been overvalued as compared with Gülshehrī's [*q.v.*] *Manṭiḳ al-ṭayr* and ʿĀshiḳ Pasha's [*q.v.*] *Gharīb-nāme*. Süleymān Čelebi's *Wesīlet el-nedjāt (Mewlid)* on the birth and miracles of the Prophet, completed in 1812/1409, has remained immensely popular (N. Pekolcay, art. *Süleyman Çelebi*, in *İA*). *Khusraw and Shīrīn* [see farhād wa-shirīn], *Madjnūn and Laylā* [*q.v.*] and *Yūsuf and Zulaykhā* were loved as moving romances; such compositions were often religious in their purport, even though the actions and emotions they displayed did not always accord with an orthodox ethical code.

In Čaghatay, Azeri and Ottoman literatures, great poets like Mīr ʿAlī Shīr Nawāʾī [*q.v.*] and Fuḍūlī [*q.v.*] deployed all the resources of Persian and Turkish literature in the perfection of this form. From the 8th/14th century onwards, Turkish poets supplied inventive translations and adaptations of Persian originals. The anonymous author of the *ʿIshk-nāme* (S. Yüksel, *Mehmed. Işk-Nâme. İnceleme metin*, Ankara 1965) already made satirical use of the stock formulas of the epic with its exciting adventures in strange lands. Ḍarīr [*q.v.*] composed early versions of the Yūsuf-Zulaykhā theme, to which the great *muftī* Kemālpashazāde [*q.v.*] later was to contribute a *mathnawī*; Ḳuṭb and Fakhrī (both 8th/14th century). must now be looked upon as pioneers in the Turkish Khusraw-Shīrīn versions. Weighted with a heavily Persianised vocabulary, Sheykhī's version (F. K. Timurtaş, *Şeyhi'nin Husrev ü Şirin'i*, Istanbul 1963), in which Fakhrī's verses can be traced, had a great influence on later poets. Under the Ottomans, new subjects were added to the répertoire. Dāʿī [*q.v.*] contributed an allegorical *Čeng-nāme*; Lāmiʿī [*q.v.*] dealt with comparatively new (Salāmān and Absāl) or nearly forgotten themes, such as Vīs and Rāmīn [see gurgānī], and Wāmiḳ and ʿAdhrā. It is doubtful whether he ever saw a complete copy of the latter poem in the version of ʿUnṣurī [*q.v.*], who ultimately drew from a Greek source (see M. Nazif Şahinoğlu, art. *Unsuri*, in *İA*; art. *Vâmik u Azrâ*, in *İA*; B. Utas, in *Orientalia Suecana*, xxxiii-xxxv [1984-6]). Lāmiʿī and Dhātī [*q.v.*] both composed a *Shemʿ u Perwāne*; Faḍlī [*q.v.*] introduced the *Gül we Bülbül* theme. Djaʿfar Čelebi [*q.v.*] wrote an original *Heves-nāme*; to Mesīḥī (d. 918/1512 [*q.v.*]) the first Ottoman *shehr-engīz* is attributed, a genre later to be elaborated as a social satire by Faḳīrī [*q.v.*]. Indeed, as in the *kaṣīda*, praise could turn into satire and invective; Aḥmadī [*q.v.*] in his medical *Tarwīḥ el-erwāḥ* flung abuse at the people of Bursa who had obstructed his work; the *Khar-nāme*

by Sheykhī [*q.v.*] contains a vigorous satire on the bad luck of a poet who is robbed of his *tīmār* (F. Timurtaş, *Şeyhî'nin Harnâmesi*, Istanbul 1971). In 933/1526 Güwāhī completely rewrote ʿAṭṭār's [*q.v.*] popular moral *Pand-nāma*, using colloquial expressions and a whole collection of Turkish proverbs (P. N. Boratev, in *Oriens*, vii) and fables (R. Anhegger, in *TM*, ix). Aḥmadī appended the first versified chronicle of the Ottomans to his *Iskender-nāme*. The term *ghazāwāt-nāme* is used with reference to narrative poems celebrating the military triumphs of the Ottomans. Epics to honour contemporary sultans in Persian and Turkish in the *shāh-nāme* style, sumptuously produced in the 10th/16th century (see LUḲMĀN; H. Sohrweide, in *Isl.*, xlvi), were already criticised by contemporaries for their lack of literary or historical merit. *Sūr-nāmes* celebrated royal festivities in the capital. Prognostics deduced from meteorological phenomena of the solar year had been the subject of an old *mathnawī* entitled *Shemsiyye* by Yazîdjî Ṣalāḥ al-Dīn; the poet-calligrapher Djevrī reworked them in his *Melḥeme* (Gibb, *HOP*, iii, 298; Levend, *Ümmet Çağı Türk edebiyatı*, Ankara 1962, 46-7), Apocalyptic aspects of history [see DJAFR] dominated Mewlānā ʿĪsā's rhymed chronicle *Djāmiʿ el-meknūnāt*, which predicted the advent of the Mahdī after Sultan Süleymān (B. Flemming, in *Studien zur Geschichte und Kultur des Vorderen Orients* [= *Festschrift Spuler*], ed. H. H. Roemer and A. Noth, Leiden 1981, 79-92).

Not every poet had the time and concentration to work with this epic form; sultans and princes wrote *ghazals*. But an author who had composed one *mathnawī* from hundreds or thousands of *beyts* could go further and compose a set of five [see KHAMSA]; Bihishtī, Ḥamdī, ʿAṭāʾī [*q.vv.*] and others performed this feat. Dukaginzāde Yaḥyā Beg (d. 990/1582), who turned his back on "the dead Persians", brought homoerotic love to the traditionally heterosexual romance by giving the (Persian) theme of the King and the Beggar, *Shāh u Gedā*, an Ottoman background and including it in his *Khamsa* (*İstanbul kütüphaneleri Türkçe Hamseler kataloğu*, Istanbul 1961). By the end of the 10th/16th century, the straightforward versified adventure story seems to have lost its appeal, while allegorical, didactic and descriptive *mathnawīs* remained in demand. Nābī's long didactic *Khayriyye*, addressed to his son in plain Turkish, and his *Khayrābād*, "out-Persianising" the Persians, are typical for the late 11th/17th and early 12th/18th centuries (*HOP*, iii, 370-74), Sheykh Ghālib [*q.v.*] Dede's allegorical subject is the mystic devotion of Beauty and Love. Fāḍil-i Enderūnī [*q.v.*] described the attractions of young men and women. Subtlety remained the stock-in-trade of the inevitable *Sāḳī-nāme*. But as more people learned to read for themselves, there was a great increase in the quantity of Turkish prose works of all sorts; standard ingredients of the rhymed romances of action found their way into prose; ʿAlī ʿAzīz [*q.v.*] stands out with his famous collection. He is a forerunner of literary westernisation, which led to the introduction of the novel and the drama. In the 19th century, the *mathnawī* form was cultivated for some last *Ẓafer-nāmes* "Books of victory" on the wars with Russia and on uprisings of the Greeks and Serbians. ʿIzzet Mollā [*q.v.*] revived the narrative *mathnawī* for his great autobiographical elegy *Miḥnet-keshān*, completed in 1825. As late as 1874. Ḍiyāʾ (Żiyā) Pasha [*q.v.*] prefaced his *Kharābāt*, a three-volume anthology of classical poetry, with a long and elaborate *mathnawī* in the old manner (*HOP*, v, 78-83); Nāmiḳ Kemāl [see KEMĀL, NĀMIḲ] responded in prose. The vitality of the *mathnawī* was sustained right to the end of Ottoman literature; the Islamist poet Meḥmed ʿĀkif [*q.v.*] Ersoy brought a new ease to it, using it for conversational verses as well as rhetorical passages in his written sermons on religious and moral subjects.

4. In Urdu.

The development of the Urdu *mathnawī* falls broadly into three periods: early, middle and modern. The early period is associated mainly with the Dakkanī phase of Urdu literature. In Dakkanī verse, the *mathnawī* constitutes the most popular form, and is represented by a large output of both religious and secular poems. Many of these are long pieces comprising several thousand couplets. Often they are translated or adapted from Persian sources, but not a few of them are works of an original character.

The growth of the early *mathnawī* reached its most productive stage in the 10th/16th and 11th/17th centuries with the emergence of Bīdjāpūr and Golkonda as the main centres of Dakkanī literature. Hitherto, the *mathnawīs* were more concerned with religious subjects, but subsequently stories of love and heroism began to find increasing prominence in their content. In Bīdjāpūr, under the enlightened patronage of the ᶜĀdil Shāhī dynasty (895-1097/1490-1686 [*q.v.*]), there flourished many important poets who are known exclusively for their *mathnawīs*. One of them was Mīrzā Muḥammad Muķīmī (d. *ca.* 1075/1665), author of *Čandarbadan u Mahyār*, which was the first *mathnawī* with a purely literary motif. Its subject deals with a contemporary incident involving the tragic love of a Muslim merchant, Mahyār, for Čandarbadan, daughter of a Hindu rajah. Another poet living at the same time was Kamāl Khān Rustamī, who composed in 1059/1649 the first artistic work of epic poetry in Urdu, the *mathnawī Khāwar-nāma* ("The book of the East"). This poem, written in imitation of Ibn Ḥusām's Persian epic of the same name, follows the model of *Dāstān-i Amīr Ḥamza*, and also borrows some topics from Firdawsī's *Shāh-nāma*. At the court of ᶜAlī ᶜĀdil Shāh II (1068-83/1656-73) was the poet laureate Muḥammad Nuṣrat Nuṣratī (d. 1095/1684), who has left behind several *mathnawīs*, the most famous being the *Gulshan-i ᶜishk* ("The rose-garden of love"). This poem, written in 1067/1657, is a fairy tale describing the love between prince Manohar and princess Madhumāltī. His other notable *mathnawī* is the long historical epic *ᶜAlī-nāma* ("The book of ᶜAlī"), which contains a narrative of the wars fought by ᶜAlī ᶜĀdil Shāh with the Mughals and the Marāthās. He also composed the historical *mathnawī Taʾrīkh-i Iskandarī* ("The history of Iskandar"), a poem dealing with events during the reign of ᶜAlī ᶜĀdil Shāh's son and successor, Sikandar (1083-97/1673-86). Other commonly known *mathnawīs* produced by ᶜĀdil Shāhî poets include *Bahrām u Bāno Ḥusn*, a love poem begun in about 1029/1620 by Amīn and completed in 1049/1639 by Dawlat; *Ķiṣṣa-yi bēnaẓīr* ("The incomparable story"), written by Ṣanᶜatī in 1054/1644 to describe the exploits attributed to Abū Tamīm Anṣārī, a companion of the Prophet Muḥammad; the poetical adaptation of Amīr Khusraw's *mathnawī Hasht bihisht*, executed by Malik Khushnūd in about 1056/1646; and *Yūsuf u Zulaykhā*, composed in 1098/1687 by the last major poet of the ᶜĀdil Shāhī era, Sayyid Mīrān Hāshimī (d. 1108/1697).

Rivalling Bīdjāpūr in the patronage of literature and literary men was the Ķuṭb Shāhī dynasty (918-1098/1512-1687 [*q.v.*]) of Golkonda. Several of its rulers were poets themselves, and their generous support of literary activities provided encouragement to the development of Dakkanī verse. Many outstanding *mathnawīs* were written during this time. In 1018/1609 Mullā Wadjhī, poet laureate of Muḥammad Ķulī Ķuṭb Shāh (988-1020/1580-1611), composed a *mathnawī* entitled *Ķuṭb u Mushtarī* ("Polar Star and Jupiter"), which allegedly describes the love affair of his patron with a famous courtesan of the day. In 1034/1625 the most outstanding poet of ᶜAbd Allāh Ķuṭb Shāh's reign (1034-83/1625-72), Ghawwāṣī, composed for the ruler the *mathnawī Sayf al-Mulūk wa Badīᶜ al-Djamāl*, which took its theme from a story of the *Arabian Nights*. Another *mathnawī*, the *Ṭūṭī-nāma* ("The book of the parrot"), which he wrote in 1050/1640, was a poetical rendering of Ḍiyāʾ al-Dīn Nakhshabī's earlier Persian adaptation of the same name. Ghawwāṣī's contemporary, Maẓhar al-Dīn Ibn Nishāṭī, was the author of the *mathnawī Phūlban* ("The flower garden"), which he completed in 1065/1655 and dedicated to ᶜAbd Allāh Ķuṭb Shāh. Adapted freely from a lost Persian work, *Basātīn* ("Gardens"), written under Muḥammad Shāh II Tughluķ (725-52/1325-51), Ibn Nishāṭī's *mathnawī* provides a picture of the life in Deccan in the late 11th/17th century, and is interesting both from a literary as well as historical point of view. During the reign of Abu 'l-Ḥasan Tānā Shāh (1085-98/1674-87), who was the last ruler of the Ķuṭb Shāhī dynasty, two important *mathnawīs* were written. The first was *Bahrām u Gulandām*, composed in 1081/1670 by Ṭabᶜī in imitation of Niẓāmī's *Haft Paykar*, and the second was *Riḍwān Shāh u Rūḥafzā*, a romance by Fāʾiz written in 1094/1683 and based upon a Persian prose tale describing the love between the Chinese prince Riḍwān and the princess of the djinns.

The middle period of the Urdu *mathnawī* may be said to begin from the early 12th/18th century, when the language of Urdu poetry acquired an idiom distinct from the Dakkanī. This period, known also for the impetus received in it by the *ghazal* [*q.v.*], witnessed the appearance of some excellent *mathnawīs* which have left their mark on Urdu literature. Heroic *mathnawīs* lost favour during this period, but romantic *mathnawīs* continued to prosper and gained a richness in their diction and approach. Of particular significance was the growth of *mathnawīs* dealing with love themes based upon personal experience.

The poem *Būstān-i khayāl* ("The garden of imagination") must be regarded as the first important *mathnawī* of the middle period. Written in 1160/1747 by Sirādj al-Dīn (1126-76/1714-63) of Awrangābād, it describes a love episode in the life of the poet. The chief distinction of the poem lies in its intimate note and, especially, in its refined language which almost verges on the modern idiom. Personal love found an outspoken exponent in Mīr Athar (d. 1208/1794), best known for his *mathnawī Khʷāb u khayāl* ("Dream and imagination"), which represents a plaint by the poet suffering the loss of his mistress. The famous poet Muḥammad Taķī Mīr (1136-1225/1724-1810 [*q.v.*]), who excelled in the *ghazal*, is equally noted for his *mathnawīs*, some of which express the disappointment of love, and are regarded as autobiographical by the

critics. The *mathnawīs* of Muḥammad Muʾmin Khān Muʾmin (1215-67/1800-51), like those of Mīr, provide a record of the poet's emotional involvements, whether real or imaginary, and have won recognition from literary authorities.

In the poetic creations of Nawwāb Mīrzā Shawḳ (1197-1288/1783-1871), whose real name was Taṣadduḳ Ḥusayn, the Urdu romantic *mathnawī* with a personal motif reached its maturity. Shawḳ, who devoted his talents almost exclusively to the writing of *mathnawīs*, is the author of three works in that genre, namely *Farīb-i ʿishḳ* ("The deception of love"), *Bahār-i ʿishḳ* ("The spring of love") and *Zahr-i ʿishḳ* ("The poison of love"). The last-named poem, written probably in about 1860, is Shawḳ's masterpiece, and indeed stands out as one of the great narrative pieces of Urdu literature. Both in diction as well as theme it displays a level of realism seldom attained by any other Urdu *mathnawī*.

Among the writers of non-personal romantic *mathnawīs*, Mīr Ghulām Ḥasan (d. 1200/1786), generally known as Mīr Ḥasan, holds a distinguished position. He is the author of one dozen known *mathnawīs* of varying length. His reputation rests chiefly on his long *mathnawī Siḥr al-bayān* ("The magic of eloquence"), which was finished in 1199/1784-5, and comprises approximately 2,500 couplets. It is a fairy tale of the conventional type containing a description of the love between prince Bēnaẓīr and princess Badr-i Munīr. Besides its literary qualities, such as simple and elegant language, faithful interpretation of emotions, effective portrayal of nature and convincing characterisation, it also provides details regarding such contemporary topics as people's dress, social etiquette, customs and ceremonies.

Sharing honours with Mīr Ḥasan's *Siḥr al-bayān* is the poem *Gulzār-i Nasīm* ("The rose-garden of Nasīm") written in 1838 by Pandit Dayā Shankar Nasīm (1811-43). This work has left a marked impact on contemporary and later poets, as seen from the *mathnawīs* composed after its example. Its central plot revolves around the adventures of prince Tādj al-Mulūk, whose search takes him into a fairyland where he expects to find the magical flower needed to cure his father's blindness. The poem has been praised for its terse description, its flights of fancy, and its choice of similes, words and idioms.

The Urdu *mathnawī* in its modern phase dates from the latter part of the 19th century, and its origin is linked with the campaign initiated at that time to achieve literary reforms. The reformers, dissatisfied with the *ghazal*, advocated the adoption of the *naẓm* or "thematic poem" patterned after Western models. The *mathnawī*, with its tradition of continuous themes and a comparatively less inhibiting rhyme scheme, provided a ready-made form for the *naẓm*, and it came to be employed by the reformers as an effective literary instrument to popularise the new trends in Urdu poetry.

The predominant theme of the modern Urdu *mathnawī* is social. As such, it differs from the earlier *mathnawī* which was identified with romantic subjects. In other respects also, it evokes differences from older models. Lengthy *mathnawīs* like those composed in the past are now extremely rare, and the restriction imposed by custom on the type of metres to be employed by the *mathnawī* is no longer observed.

It was the poet Alṭāf Ḥusayn Ḥālī (1837-1914 [*q.v.*]) who critically examined the role of the *mathnawī* in Urdu poetry and laid the foundation for its future development. He pointed out that the *mathnawī* provided a medium best suited for expressing continuous themes. The *mathnawīs* he wrote reflect his social and reformist leanings. Conspicuous among them are *Ḥubb-i waṭan* ("Patriotism"), *Taʿaṣṣub u inṣāf* ("Bigotry and justice") and *Munādjāt-i bēwa* ("The widow's prayer"), which appeared respectively in 1874, 1882 and 1884.

Following the pioneering efforts of Ḥālī, the *mathnawī* acquired a new dimension. It was used by Muḥammad Ismāʿīl Mērathī (1844-1917) for his short, descriptive poems which, written in a simple language and dealing with everyday subjects, represent the first successful attempts in Urdu to compose children's poetry. Aḥmad ʿAlī Shawḳ Ḳidwāʾī (1853-1925) gave special attention to *mathnawīs*, his most famous work being the *ʿĀlam-i khayāl* ("The world of imagination"), a sentimental poem expressing the feelings of a lonely woman whose husband has gone on a journey. Shawḳ's contemporary Sayyid ʿAlī Muḥammad Shād ʿAẓīmābādī (1846-1927) was an avid *mathnawī* writer displaying a maturity of style. The greatest Urdu poet of the 20th century, Muḥammad Iḳbāl (1877-1938 [*q.v.*]) adopted the *mathnawī* for many of his poems, of which the *Sāḳī-nāma* ("The book of the cup-bearer") is undoubtedly one of the great masterpieces of Urdu literature. Mention must also be made of Ḥafīẓ Djalandharī's (1903-82) *mathnawī*-style narrative *Shāh-nāma-yi Islām*, which appeared in four volumes from 1929 to 1947, and represents a lengthy attempt to record the history of Islam in a versified form.

(MUNIBUR RAHMAN)

MATHURĀ (earlier English spelling, now discarded, "Muttra"), an Indian city lying between Dihlī and Āgrā, of considerable antiquity and of high reputation in India as a place of high religious sanctity for Hindūs and, formerly, for Djayns and Buddhists also; it was already a place of some renown when it became the eastern of the two Kushāna capitals.

It is, surprisingly, not mentioned in the *Ḥudūd al-ʿālam*, and only incidentally by al-Bīrūnī, although for Ptolemy it had been Μόδουρα τῶν Θηῶν. Its great reputation led to its being plundered by Maḥmūd of Ghazna in 408/1018 and by many later Muslim rulers, more in an excess of iconoclastic zeal than in a settlement of the district; notably by Sikandar Lōdī *ca.* 905/1500, who is reported to have destroyed many idols and to have prohibited head-shaving and ritual bathing. Some temples were allowed to be built in the tolerant reign of Akbar (the temple of Govind Dēva at Brindāban in the Mathurā district, built by Mān Singh [*q.v.*], even shows architectural borrowings from north Indian Muslim art); but Shāhdjahān in 1046/1636-7 appointed a governor to "extirpate idolatry", Awrangzīb some thirty years later destroyed its finest temple and built a mosque on top of it, and Aḥmad Shāh Durrānī in 1170/1757 not only plundered the temples but butchered a large group of pilgrims. Otherwise, it saw little of Islam, the Mēwātīs, in whose territories it lay [see MEWĀT] not being renowned for their orthodoxy. A Djāmiʿ mosque, built in 1071/1660-1 (inscr. chronogram) by ʿAbd al-Nabī, a governor under Awrangzīb, is an excellent building for its period, with fine inlay in encaustic tilework, four tall *mīnārs*, and two side pavilions with the curved-cornice "Bengali" roof flanking the courtyard which stands 4 m. above road level; Awrangzīb's own mosque is rather effete.

Bibliography: F. S. Growse, *Mathura: a district memoir*, Benares 1874 and many subsequent reprints, is highly praised but barely acknowledges the presence of Muslims. The mosque has not been adequately published. (R. F. Chisholm's account of "Tiroomal Naik's palace, Madura", listed in Creswell, *Bibliography*, s.v. Mathura, is not at Mathura at all but at Madurai, the former capital of the Madura sultanate = Maʿbar [*q.v.*].)

(J. BURTON-PAGE)

AL-**MAṬLAʿ** (A.), the rising point of a celestial body, usually a star, on the local horizon. This concept was important in Islamic folk astronomy [see ANWĀʾ and MANĀZIL on some aspects of this tradition], as distinct from mathematical astronomy [see ʿILM AL-HAYʾA], because it was by the risings and settings of the sun and stars that the *ḳibla* [*q.v.*] or direction of Mecca was usually determined in popular practice. The terms used for the rising and setting points of the sun were usually *mashriḳ* and *maghrib*, *maṭlaʿ* being generally reserved for stars. The directions of sunrise at the equinoxes and solstices were usually associated with the corresponding zodiacal signs [see MINṬAḲA] or seasons, thus e.g. *mashriḳ al-djady* and *mashriḳ al-shitāʾ* both refer to winter sunrise, since the sun enters the sign of Capricorn at midwinter.

In pre-Islamic Arabian folklore, the directions of the winds (see RĪḤ) were defined in terms of astronomical risings and settings (see Fig. 1) and one such wind scheme is associated with the Kaʿba itself (see Fig. 2). These wind schemes are recorded in later Arabic treatises on lexicography, folk astronomy, cosmography, as well as in encyclopaedias and various legal treatises on the *ḳibla*. The major axis of the rectangular base of the Kaʿba points towards *maṭlaʿ Suhayl*, the rising point of Canopus, and the minor axis roughly towards *mashriḳ al-ṣayf*, the rising point of the sun at midsummer. The later Islamic attempts to define the *ḳibla* for different localities in terms of astronomical risings and settings stem from the fact that these localities were associated with specific segments of the perimeter of the Kaʿba, and the *ḳibla*s adopted were the same as the astronomical directions which one would be facing when standing directly in front of the appropriate part of the Kaʿba [see MAKKA iv].

The term *maṭlaʿ* was also used to denote the "time of rising" in the expression *maṭlaʿ al-fadjr*, daybreak or the beginning of morning twilight.

Bibliography: That given in the article ḲIBLA is to be supplemented with the information con-
Fig. 1. Four early Arabian wind schemes defined in terms of astronomical risings and settings and attributed to early Muslim authorities.

I Khālid b. Ṣafwān. Limits of winds: 1-4 cardinal directions (defined in terms of the Pole Star and sunrise and sunset at the equinoxes); names of the winds: a *ṣabā*, b *djanūb*, c *dabūr*, d *shamāl*.

II ʿAlī b. Abī Ṭālib. Limits: 1, 2, 4 cardinal directions; names: as in I.

III Ibn Djandab. Limits: 1 north, 2 summer sunrise, 3 winter sunrise, 4 south, 5 winter sunset, 6 summer sunset; names: a *nakhbāʾ*, b *ṣabā* or *ḳabūl*, c *maḥwa*, d *djanūb*, e *dabūr*, f *shamāl*.

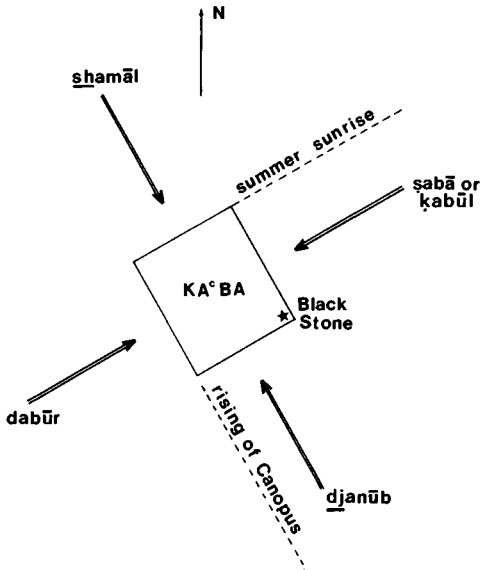
IV Ibn al-Aʿrābī. Limits: 1 setting (or rising ?) of the Banāt Naʿsh, 2 rising of the Pleiades, 3 rising of Canopus, 4 setting of Vega; names: as in I.


Fig. 2. The most popular early Arabian wind scheme, in which the four winds strike the walls of the Kaʿba head-on. The rectangular base of the Kaʿba points in astronomically significant directions, and so the limits of the four winds are likewise astronomically defined. The rising of Canopus and the solstitial risings and settings of the sun were widely used for finding the *ḳibla* in popular practice, in order to ensure that one would be "facing" a particular wall of the Kaʿba, that is, standing in a direction "parallel" to the appropriate axis of the Kaʿba.

King, *Astronomical alignments in medieval religious architecture*, in *Annals of the New York Academy of Sciences*, ccclxxxv (1982), 303-12, and *The sacred geography of Islam*, in *Islamic Art*, iii (to appear); G. S. Hawkins and King, *On the orientation of the Kaʿba*, in *Jnal. for the History of Astronomy*, xiii (1982), 102-9. For a survey of the whole problem, see King, *The world about the Kaʿba: a study of the sacred direction in Islam* (forthcoming); summaries are given in *Proceedings of the Second International Qurʾān Conference, New Delhi, 1982* and *Interdisciplinary Science Reviews*, ix (1984), pp. 315-328. See also MAṬĀLIʿ. (D. A. KING)

MAṬMĀṬA, name of a large Berber people mentioned as early as the middle of the 3rd/9th century in the geographical work of Ibn Khurradādhbih as being among the thirty most important Berber tribes of this period. According to the majority of Berber genealogists cited by Ibn Khaldūn (including Sābiḳ al-Maṭmāṭī), the Maṭmāṭa, who were brothers of the Maṭghara, Ṣadīna, Malzūza, Madyūna and Lamāya, belonged to the great Berber family of the Butr; they constituted, with the above-mentioned tribes, the family of Fāṭin, son of Tamzīt. However, some other genealogists mentioned by Ibn Khaldūn hold that the Maṭmāṭa belonged, along with the Barghawāṭa and Azdādja, to the Berber stock of Barānis (Brānes). There is also another genealogy of the Maṭmāṭa, according to which this tribe is regarded as belonging, along with the Barghawāṭa and Azdādja, to the great Berber family of the Zanāta, being descended from Djānā, ancestor of the Zanāta.

1. Tunisia. It seems that the original homeland of the Maṭmāṭa, a people who were early converts to Islam and who adopted, around the middle of the 2nd/8th century the beliefs of the Ibāḍī sect, was the land situated in the south-east of Tunisia and more exactly to the west and south of the town of Gabès, ancient Tacapae, Ḳābis of the mediaeval Arab geographers. They were called by this name by around 196/811, at the time when the Ibāḍī *imām* of Tāhart ʿAbd al-Wahhāb b. ʿAbd al-Raḥmān b. Rustam sent, on the occasion of his siege of the town of Tripoli, the Ibāḍī general Ḳaṭʿān b. Salma al-Zawāghī to Ḳābis with orders to besiege it. We owe this information to the Ibāḍī historian Abu 'l-ʿAbbās al-Shammākhī (928/1522), who used in his work several much older sources. In speaking of Ḳaṭʿān b. Salma (in another passage of al-Shammākhī's work this person is called Salma b. Ḳaṭfa), who was appointed governor of Ḳābis in this period by the *imām* ʿAbd al-Wahhāb, the Ibāḍī historian in question adds that under this governor's régime, the Berber tribes of the Maṭmāṭa, Zanzafa, Dammar, Zawāgha and others were still living outside Gabès. It seems that the Maṭmāṭa in this period were already occupying the mountainous country called Djabal Maṭmāṭa, situated about 30 or 40 km. south of Gabès. This country was also at one time called Djabal Lawāta, owing to the Lawātī population which lived there with the Maṭmāṭa. The survivors of the Maṭmāṭa and Lawāta still live there today. Apart from this area, the Maṭmāṭa also inhabited, in times gone by, the town of al-Ḥāmma (ancient Aquae Tacapitanae), situated 23 km. to the west of Gabès. According to Ibn Khaldūn's *Histoire des Berbères*, al-Ḥāmma was founded by the Maṭmāṭa. According to the *Kitāb al-Istibṣār* of *ca.* 587/1191, al-Ḥāmma was a very ancient town inhabited by the Maṭmāṭa. The Tunisian scholar of the 7th-8th/13th-14th century al-Tidjānī mentions, in his account of a journey from Tunis to Tripoli, this place by the name of Ḥāmmat Maṭmāṭa, although in the view of this scholar, the Maṭmāṭa may already have left, ceding the place to the Zanāta who were divided into three groups: the Banū Tūdjīn, Banū Wartadjīn and Awlād Yūsuf.

The later history of the Tunisian Maṭmāṭa (who, apparently having adopted in the 4th/10th century the beliefs of the Ibāḍī sub-sect of the Nukkāriyya [*q.v.*], as had their neighbours the Banū Dammar, established in the south of the area occupied by the Maṭmāṭa in the Djabal Dammar) is little known. It seems that the Maṭmāṭa living in the Djabal of this name recognised the authority of the last representative of the Almoravid family of the Banū Ghāniya, Yaḥyā, who, having his seat and base of operations in the Bilād al-Djarīd, extended his power, around 1200 A.D., over the whole of Ifrīḳiya. In any case, the *sayyid* Abū Isḥāḳ who pursued, in 603/1207, in the name of his brother the Almohad caliph al-Nāṣir, the Almoravid rebels in Ifrīḳiya, subdued the country situated behind Tripoli and chastised, according to Ibn Khaldūn, "the Banū Dammar, the Maṭmāṭa and the Nafūsa", the inhabitants at that time of the vast mountainous crescent which stretches from Gabès to ancient Leptis Magna, on the edge of the plain of Djefāra (Djeffāra). Under the domination of the Turks, the inhabitants of the Djabal Maṭmāṭa and the Djabal Dammar who, until this period, had remained practically independent and had not recognised the authority of the sovereigns of Ifrīḳiya, refused to pay taxes. The Turkish bey of Tunisia, Muḥammad Bey (1631-63 A.D.), had a fort built in the Maṭmāṭa Mts. in order to contain the rebels. We owe this information to the Tunisian historian Ibn Abī Dīnār, who dealt with this event in *al-Muʾnis fī akhbār Ifrīḳiya wa-*

Tūnis, probably written in 1092/1681 or 1100/1698. In the 18th and the first part of the 19th century, in the reign of the Ḥusaynid dynasty (from 1705), there took place various rebellions by Berber and Arab tribes in south-east Tunisia, whose instigators sought refuge in the Maṭmāṭa Mts.

The survivors of the Maṭmāṭa, partially Arabised, still live in their old homeland in south-east Tunisia.

2. Algeria. It seems that at an unknown period, probably in the 2nd/8th century, or perhaps even before this date, one or several important clans of the Maṭmāṭa detached themselves from the main body of this people inhabiting south-east Tunisia and may have come to settle in western Algeria and Morocco. If it is a case of some Maṭmāṭa elements being settled in western Algeria, it is necessary to mention firstly a clan which was settled on the plateaux of Sersū to the north-east of Mindās and to the north of the town of Tāhart and in the Ouarsénis Mts. According to Ibn Khaldūn, these Maṭmāṭa adopted the beliefs of the Ibāḍīs at a time when the Khāridjī doctrine was widespread among the Berbers, i.e. around the middle of the 2nd/8th century. Besides, it is not impossible that the Maṭmāṭa of the Tāhart district may have been settled in this area in the time of Abu 'l-Khaṭṭāb, Ibāḍī *imām* of Tripoli (from 140/757-8), who also seized al-Ḳayrawān and the whole of Ifrīḳiya. This man entrusted the government of al-Ḳayrawān to ʿAbd al-Raḥmān b. Rustam. After the defeat of the Ibāḍi Berber army of Abu 'l-Khaṭṭāb by the ʿAbbāsid general Muḥammad b. al-Ashʿath al-Khuzāʿī in 144/761-2, ʿAbd al-Raḥmān b. Rustam then hastened, if we are to believe Ibn Khaldūn, to evacuate al-Ḳayrawān and to take his sons and household to the Ibāḍī Berbers of the central Maghrib. Having reached his old friends and allies the Lamāya, he rallied them to his side and decided to found the town of Tāhart, future capital of the Rustamid imāmate. It is not impossible that a party of the Maṭmāṭa who were neighbours of the Lamāya in south-east Tunisia, original homeland of the first of these peoples, may already have been in the vicinity of the future Tāhart around 144/761-2. In any case, the Maṭmāṭa belonged by the reign of the Rustamid *imām* Aflaḥ b. ʿAbd al-Wahhāb b. ʿAbd al-Raḥmān b. Rustam (*ca.* 308-58/823-71) to the rich and powerful Ibāḍī Berber tribes of the Tāhart district. We owe this information to Ibn Ṣaghīr, historian of this town and of the Rustamid dynasty, who wrote his chronicle *ca.* 290/902-3. After the fall of the Rustamid imāmate, the Maṭmāṭa of the Tāhart district were forced (*ca.* 298/910) to abandon, in the words of Ibn Khaldūn, "for ever" Ibāḍī beliefs and to embrace Shīʿī doctrines. To judge by the Arabic sources, the Maṭmāṭa later rejected Shīʿī doctrines and became Sunnīs.

Some groups of the Maṭmāṭa, having come to settle in the central Maghrib, occupied the plateaux of Sersū in the neighbourhood of Tāhart, in the north-east of the Mindās area, which was inhabited in the first place by a clan of the large Berber tribe of the Hawwāra. Later, these Maṭmāṭa came to settle in the Mindās area, having driven out the Hawwāra in question. Then the Maṭmāṭa were expelled from the plateaux of Sersū by the Zanāta tribe of Banū Tūdjin, and were forced to seek refuge in the mountainous massif of Wānsharīs (present day Ouarsénis), where al-Bakrī mentions them in the 5th/11th century, al-Idrīsī in the 6th/12th century and Ibn Khaldūn in the 8th/14th century.

We know also, thanks to al-Yaʿḳūbī, the name of another clan of Maṭmāṭa living, around the end of the 3rd/9th and beginning of the 4th/10th century, in the central Maghrib. One should mention here a clan of this tribe living to the west of Ouarsénis and Sersū and to the west of the town of Yalal (Hilil of our maps) under the domination of the dynasty descended from Muḥammad b. Sulaymān b. ʿAbd Allāh b. al-Ḥasan b. al-Ḥasan, related to the Idrīsids of Morocco, who ruled in this period in Tlemcen and the district around it. This clan of the Maṭmāṭa had nothing in common with the Maṭmāṭa of Ouarsénis, who were Ibāḍīs and who recognised the suzerainty of the Rustamid *imāms* of Tāhart. One of the clans of the Maṭmāṭa of Tlemcen was in control of the town of Ayzradj (?) situated near the western fringes of Tlemcen, probably in the area of the modern Algero-Moroccan frontier.

The history of the Maṭmāṭa of the Tāhart district, after the fall of the Rustamid imāmate and the forced conversion of this clan to Shīʿī beliefs at the beginning of the 4th/10th century, is little known to us. We know, however, that they took an active part in the war which broke out between the Zīrid princes Ḥammād b. Buluggīn (405-19/1015-28) and Bādīs b. al-Manṣūr (396-406/996-1016), Ibn Khaldūn even mentions a famous *amīr* of the Maṭmāṭa of the Tāhart district; he was called Zīrī and lived towards the end of the 4th/10th century and beginning of the 5th/11th; defeated by the Ṣanhādja Zīrids, he was forced to go to Spain.

The survivors of the powerful Maṭmāṭī clan of the Tāhart district were still living in this area in the 19th century. They were living to the north of the plateau of Sersū, in Thaza (Tāza) and the surrounding district.

3. Morocco. Some advanced groups of the Maṭmāṭa pressed on, probably a little before the 4th/10th century, as far as Morocco. A group of this people settled in the territory of Nukūr, in the eastern Rīf, where they are mentioned by al-Bakrī in the 5th/11th century. Al-Yaʿḳūbī (3rd/9th century) mentions also the clans of Maṭmāṭa settled in the town of Fālūsen (?) situated to the east of the town of Nukūr. Another clan of the Maṭmāṭa lived on the upper course of Wadi Moulouya, in an area called Maṭmāṭa Amaskūr, to the south of Fās. It is mentioned by al-Bakrī and by Ibn Khaldūn. The latter author also speaks of a mountain called Maṭmāṭa situated between Fās and Sefrou (Ṣufrūy). One should add that there were also some Maṭmāṭa between Fās and Tāza; furthermore, a place in this area still bears the name Maṭmāṭa.

Finally, there was also a group of Maṭmāṭa settled in the far west of Morocco, in the region called Tāmasnā, where there existed in the Middle Ages a kingdom founded by the anti-Muslim Berber tribe of Barghawāṭa [*q.v.*]. The Maṭmāṭa of Tāmasnā formed part of the confederation of Barghawāṭa and professed the faith of this tribe. We know of it through the account of Zammūr, sent by the Barghawāṭa to the caliph of Cordova in 352/963, which is cited in the *Kitāb al-Masālik wa 'l-mamālik* of al-Bakrī. Zammūr gives in this account two lists of Berber tribes of Tāmasnā under the suzerainty of the Barghawāṭa empire, that is, those who profess the Barghawāṭī faith and the Muslims. The Maṭmāṭa of Tāmasnā are mentioned in the first of these lists. The history of this clan of the Maṭmāṭa is entirely unknown to us; however, we know, thanks to al-Idrīsī, that it still existed in the 6th/12th century.

4. Spain. There were also some Maṭmāṭa groups among the Berber tribes who went across to Spain at different periods. We know this from Ibn Khaldūn, who gives us some details in his *Histoire des Berbères*. We have already mentioned a famous Maṭmāṭi *amīr* of

the central Maghrib called Zīrī, who lived towards the end of the 4th/10th century and beginning of the 5th/11th century; this *amīr* was originally chief of the Maṭmāṭa of the Wānsharīsh (Ouarsénis) plateaux, as well as of Ghazūl, a mountain dominating the country around Tāhart. Defeated by the Ṣanhādja, he crossed into Spain, where he went to see the powerful Umayyad *wazīr* al-Manṣūr b. Abī ʿĀmir [*q.v.*], who received him with alacrity and enrolled him among the Berber *amīrs* admitted to his service. It is very likely that Zīrī was accompanied, on his journey to Spain, by members of his household and perhaps by several Maṭmāṭī warriors; he soon became one of the most distinguished officers in al-Manṣūr's Berber corps. After the latter's death in 392/1002, his sons al-Muẓaffar (d. in 398/1008) and ʿAbd al-Raḥmān continued to treat Zīrī with the same favour as their father. However, from the time of the revolt of the Umayyad Muḥammad II b. Hishām b. ʿAbd al-Djabbār (399-400/1008-10), Zīrī and all the other Berber *amīrs* and officers, recognising the lack of ability in their chiefs, went over to the side of Muḥammad b. Hishām b. ʿAbd al-Djabbār, who had become caliph with the title of al-Mahdī. The end of Zīrī is unknown to us. According to Ibn Khaldūn, he stayed in the service of al-Mahdī until the great revolt of the Berbers in Spain. The year of his death is unknown.

Another great Maṭmāṭī figure, probably originally from Wānsharīsh and Ghazūl and who crossed into Spain, is Kahlān b. Abī Lawā, one of the most famous Berber genealogists. He made his way to al-Nāṣir, first ruler of the Banū Ḥammūd dynasty (is this the Muḥammad, lord of Algeciras who reigned in 428-40/1036-48, or the Ḥammūdid prince ʿAlī, lord of Malaga in 1001-21 and 1022-25?).

Finally, one should add that the greatest Berber genealogist, Sābiḳ b. Sulaymān b. Harāth b. Mūlāt. Ibn Dūnās, who is one of Ibn Khaldūn's sources, belonged to the Maṭmāṭa tribe.

(T. Lewicki)

MAṬMŪRA (a), from *ṭamara*, which signifies in particular "to hide", denotes a natural or man-made cavity used for the concealment of victuals (*ṭaʿām*) or of riches (*māl*); such is the definition adopted by the *LA* (s.v.), which specifies that it is the plural *maṭāmīr* which should be applied to underground silos where grain is stored. In fact, the singular currently denotes a silo, and the plural, a group of silos garded by a *ṭammār* and called *mərs* in Morocco (*rətba* in Takrūna, where the guardian is known as *rattāb*; W. Marçais, *Glossaire de Takroûna*, v, 2408-9, with discussion of the figurative expressions drawn from the root).

In the Maghrib, in addition to the communal granaries [see agadir], silos were the most usual method of storing cereals. The authorities sometimes dug out such silos, which reached vast sizes. Thus the ʿAlawid sultan Muḥammad b. ʿAbd Allāh [*q.v.*] caused to be built at Marrakesh, between 1173 and 1181/1760-8, two enormous silos on top of which was an inclined plane from which the grain, brought thither by beasts of burden, was despatched down chutes to the different parts of the subterranean storehouse, which was not visible from the outside (G. Höst, *Nachrichten von Marokos und Fes*, Copenhagen 1781, 75-7; cf. J. Delarozières, *Habs Zebbala à Fès Djedid*, in *IV^e Congrès des Soc. savantes*, ii, Algiers 1929; G. Deverdun, *Marrakech*, i, 495). In Algeria, as early as 1848, an officer had presented a project for setting up reserve silos (or "matmores") and this was actually done some years later (see Capasset, *Mémoires sur la colonisation* ..., Algiers 1848). The CNRS has recently organised in Paris a series of conferences on *Les techniques de conservation des grains à long terme*, vol. iii of whose proceedings was published in 1985.

The technique for the excavation of silos differs little from one region to another. In general, the opening is narrow in such a way that it may be hermetically sealed, and the cavity is enlarged lower down, although attaining no great depth. If the nature of the soil requires it, the interior walls are lined with the object of protecting the cereals stored from humidity. But the latter must also be shielded from some subtle dangers, so that ensilage, entry into a silo and the withdrawal of a quantity of grain, are surrounded by precautions of a magical nature which, as regards Berber Morocco, have been fully documented by E. Laoust, *Mots et choses berbères*, Paris 1920, 403-5.

The plural *maṭāmīr* (or *maṭāmir*, from *maṭmar*, which also has the sense of "pit") is a toponym which may be quite frequently encountered (see Le Strange, *Lands*, 138). It is in any case the name of a locality in ʿIrāḳ close to Ḥulwān (see al-Masʿūdī, *Murūdj*, § 3597; Ibn Ḥawḳal[2], 358, tr. Kramers-Wiet, 350; Yāḳūt, iv, 562), while Dhāt al-Maṭāmīr, or simply Maṭāmīr, was the name for homes of cave-dwellers situated in the "Syrian March" (see A. A. Vasiliev, *Byzance et les Arabes*, ii/1, Brussels 1968, 82; M. Canard, *H'amdanides*, 730; cf. Ibn Ḥawḳal, 200, tr. 194-5; al-Masʿūdī, *Tanbīh*, ed. Ṣāwī, 151, which seems to give to *maṭmūra* the sense of "village of cave-dwellers"). It should be noted that the (subterranean?) cells of monks are called *maṭāmir* by al-Djāḥiẓ, *Ḥayawān*, iv, 458-9.

Besides the character from the Spanish comedy (*Matamoros*) whose (masculine) name in French is *Matamore*, the traveller Jean Mocquet has noted in his *Voyages en Afrique*, etc., 1617, 166, a feminine *matamore* denoting a large and deep pit, and C. P. Richelet (*Dictionnaire français*, ed. of 1693) supplies the following definition of the same term: "It is a prison where slaves are confined underground every night ... The matamore is very uncomfortable and cruel, and it seems that it was invented solely with the purpose of tormenting the slaves. A flight of 20 or 30 steps leads down to it. Air and light are supplied only through a

small aperture. The slaves there are horribly overcrowded ... A. Gallard, *Histoire d'une esclave*" (F. Nasser, *Emprunts lexicologiques du français à l'arabe*, Beirut 1966, 472). It is a fact that, among the meanings of *maṭmūra* recounted by Dozy (*Suppl.*, s.v.), there figures the sense of "a cave, large or small and very deep, in which prisoners or Christian slaves are confined; in these subterranean prisons, which are beneath fortresses or in the country, the only contact with the world outside is through very narrow ventilators" (see also R. Brunschvig, *Ḥafṣides*, i, 449-50 about a *maṭmūra* in Tripoli). Dozy's account applies to Muslim Spain, where *maṭmūra* has given rise to the Spanish word *mazmorra* (see J. Corominas, *Diccionario crítico etimológico de la lengua castellana*, Berne 1954-7, iii, 306-9), which denotes, like the Portuguese *masmorra* or *matamorra*, a subterranean prison (on those which have been discovered at Granada, see L. Torres Balbás, *Las mazmorras de la Alhambra*, in *al-And.*, ix/1 (1944), 198-218; see also R. Arié, *L'Espagne musulmane au temps des Naṣrides*, Paris 1973, 322).

Bibliography: Given in the article.

(CH. PELLAT)

MATN (A.), a term with various meanings, of which that of text of a *ḥadīth* [*q.v.*] is to be noted. *Matn* already appears with the sense of "text" in pre-Islamic poetry, and has been used thus in Arabic literature up to the present day. It denotes especially the text of a book as distinguished from its oral explanation or its written or printed commentary.

In connection with traditions, *matn* denotes the content or text itself, in distinction from the chain of traditionists who have handed it down (*isnād* [*q.v.*]). The choice of this term to designate the body of a *ḥadīth* led Goldziher to put forward the view that the traditions were put into writing at an early date, but he recognised that he was unable to determine the first occurrence of this. However, it should be remarked that the *matn* has rarely been the subject of textual criticism on the part of the *fuḳahāʾ* and, as G. H. A. Juynboll observes (*The authenticity of the tradition literature*, Leiden 1969, 139), if the criteria which modern authors enumerate had been applied, there would have been very little left of the "authentic" collections.

(A. J. WENSINCK*)

MAṬRAḤ (lat. 23° 38 N., long. 58° 34 E.) the largest city and major port of the Sultanate of ʿUmān. Maṭraḥ was only a small fishing village in September 1507 when Afonso d'Albuquerque anchored his fleet there in preparation for the sacking of Masḳaṭ [*q.v.*]. The Portuguese later fortified Maṭraḥ with one fort on the waterfront and a second on a hill at the southwest corner of the town. The Yaʿāriba *imām* Sulṭān b. Sayf expelled the Portuguese from Maṭraḥ in 1651. During the ʿUmānī civil war of the early 18th century, the city was occupied by Persian troops, who were driven out by Aḥmad b. Saʿīd of the Āl Bū Saʿīd [*q.v.*] in 1741. Since the establishment of the Āl Bū Saʿīd dynasty, Maṭraḥ has been subjected to attacks by opponents of the régime on several occasions.

Maṭraḥ's rise to commercial prominence began during the period of Portuguese occupation. Masḳaṭ was the entrepot for Portugal's trade, but that city was made inaccessible to the rest of ʿUmān by the mountains surrounding it. Maṭraḥ, with its excellent harbour and ease of access to both Masḳaṭ, only 4 km. distant by water, and to the population centres of interior ʿUmān via Wādī Samāʾil, came to dominate the domestic trade. In addition, Maṭraḥ had important weaving and ship-building industries. With Masḳaṭ's decline as an entrepôt during the 19th century, Maṭraḥ's commercial importance increased, and the construction of Mīnā Ḳābūs in the early 1970s has insured the city's dominant position.

Because of its commercial activity, Maṭraḥ historically has had a cosmopolitan population, with Arabs, especially Banū Djābir and Banū Ḥasan tribes, Balūčīs, Africans, Persians and Indians all residing there. Among the Indians, the Liwātiyya from Sind are distinctive. The Liwātiyya (sing. Lūtī), who were originally Khōdja Ismāʿīlīs but converted to Ithnā ʿAsharī Shīʿism in the 1860s, have been in Maṭraḥ for more than 100 years. Although very active in business, the Liwātiyya were, until recent times, socially isolated in a walled portion, probably the original Portuguese fort, of Maṭraḥ known as Sūr Liwātiyya, from which all outsiders were excluded. During the 19th century, many Hindu Banyans began leaving Masḳaṭ and settling in Maṭraḥ to take advantage of the better business opportunities. ʿUmān's recent economic development has served to increase Maṭraḥ's international flavour.

Bibliography: The best description of Maṭraḥ during the Portuguese period is Pedro Barretto de Resendes, *Livro do Estado da India Oriental*, 1646, mss. B.L., Sloane 197, Sch. no. 11690, fols. 124-7. The principal Arabic sources are: to 1728, Sirḥān b. Saʿīd al-Azkawī, *Kashf al-ghumma*, and a continuation to the 1780s by al-Maʿwalī, *Ḳiṣaṣ wa-akhbār*, ed. ʿAbd al-Madjīd Ḥasīb al-Ḳaysī, *Taʾrīkh ʿUmān* [Beirut 1976], 101-2, 140, 142, 157; two works by Ibn Ruzayḳ (Ḥumayd b. Muḥammad), *al-Shuʿāʿ al-shāʾiʿ* [Cairo] 1398/1978, 206, 215, 234-5, 297, 312, 337-8, 340, 343-5, 347, and *al-Fatḥ al-mubīn*, Masḳaṭ 1397/1977, 275, 284-90, 345-9,. 356, 364, 374-5, 396, 412-3, 516, tr. G. P. Badger, *History of the Imāms and Seyyids of ʾOmān* ..., London 1871, see index, concluded in 1856; and ʿAbd Allah b. Ḥumayd al-Sālimī, *Tuḥfat al-aʿyān*[5], Kuwayt 1394/1974, ii, 10, 64-7, 153-8, 242-4, 298, concludes with 1910. Modern descriptions of Maṭraḥ are to be found in J. R. Wellsted, *Travels in Arabia*, London 1837, i, 31-3; W. S. W. Ruschenberger, *Narrative of a voyage round the world*, London 1838, i, 120-5; G. B. Brucks, *Memoir descriptive of the navigation of the Gulf of Persia*, in *Selections from the records of the Bombay Government*, n.s. xxiv, Bombay 1856, 629; J. G. Lorimer, *Gazetteer of the Persian Gulf*, ii, Calcutta 1908, 1197-1200; I. Skeet, *Muscat and Oman*, London 1974, 53-9. Important secondary works include: S. B. Miles, *Countries and tribes of the Persian Gulf*, London 1919; R. G. Landen, *Oman since 1856*, Princeton 1967; J. Peterson, *Oman in the twentieth century*, London 1978; and C. H. Allen, Jr., *The Indian merchant community of Masqat*, in *BSOAS*, xliv (1981), 48-52, which discusses the Liwātiyya.

(C. H. ALLEN, JR.)

MAṬRĀḲČĪ, NAṢŪḤ AL-SILĀḤĪ AL-MAṬRĀḲĪ, or Naṣūḥ b. Ḳaragöz b. ʿAbd Allah al-Bōsnawī (?-971/-?1564), outstanding knight, inventor of some new forms of the game of *maṭrāḳ* (a contest with a stick, cudgel or rapier for training and knight-errantry), mathematician, historian, calligrapher and painter of the period of Süleymān the Magnificent (926-74/1520-66).

He was a student in the Palace School during the reign of the Bāyezīd II (886-918/1481-1512). His first book *Djamāl al-kuttāb wa-kamāl al-ḥussāb* on mathematics was written in 923/1517 and dedicated to Selīm I (918-26/1512-20). He had started by this time also

to distinguish himself as a knight. He began his career as an historian to translate al-Ṭabarī's famous history from Arabic into Turkish in 926/1520. The title of his translation was *Madjma^c al-tawārīkh*, and the manuscripts of this translation constitute three huge volumes. He wrote also a Turkish supplement to his translation as the fourth volume of his work, which includes the history of the Ottomans from the beginning to the year of 958/1551. But we have manuscripts from this period dealing only with the time of Bāyezīd II, Selīm I and Süleymān I, such as *Taʾrīkh-i Sulṭān Bāyezīd wa-Sulṭān Selīm*, the illuminated *Taʾrīkh-i Sulṭān Selīm*, the illuminated *Taʾrīkh Sulṭān Bāyezīd*, the illuminated *Beyān-i menāzil-i sefer-i ʿIrāḳeyn* (944/1537), *Süleymān-nāme* (926-44/1520-37), *Feth-nāme-i Ḳaraboghdān* (945/1538), the illuminated *Taʾrīkh-i Feth-i Shiklos* (950/1543), and the second part of the *Süleymān-nāme* (950-8/1543-51).

He was also the painter, with a group of other artists, of his illuminated historical works indicated above. He participated in different expeditions and sketched at least the outlines of his documentary paintings of townscapes in their own localities. Meanwhile, a letter of 936/1529 of Sultan Süleymān praises him as the master knight of his time, incomparable in the whole Ottoman Empire. He completed his *Tuḥfat al-ghuzāt* on the art of using various weapons in 939/1532, and his *ʿUmdat al-ḥisāb* in 940/1533. Finally, he produced a second version of al-Ṭabarī's history, the *Djāmiʿ al-tawārīkh*, by abridging its original with the encouragement of Rüstem Pasha, the famous Grand Vizier of Süleymān, in 957/1550. The part of the *Djāmiʿ al-tawārīkh* which concerns Ottoman history, in one large volume containing the events of the reign of Süleymān until 968/1561, is attributed to Rüstem Pasha himself. When he died on 16 Ramaḍān 971/28 April 1564, he was the head of the office of the *ketkhüdā-yi bārgīr (ketkhüdā-yi iṣṭabl-i ʿāmire).*

MAṬRĀN, KHALĪL [see MUṬRĀN].

MATRŪK, a technical term of Ottoman Turkish law concerning a category of land, See MARʿĀ. 3. Turkey.

MATTĀ B. **YŪNUS** (YŪNĀN) AL-ḲUNNĀʾĪ, ABŪ BISHR, translator of and commentator on Aristotle, was one of the principal initiators of the reception of Peripatetic philosophy through Arabic translations from Syriac in its final phase in the 4th/10th century. He was a Nestorian Christian who studied and taught at Dayr Ḳunnā [*q.v.*] (see also J. M. Fiey, *Assyrie chrétienne*, iii, Beirut 1968, 187-93) in the *schola* of the convent of Mār Mārī before he came to Baghdād during the caliphate of al-Rāḍī (i.e., after 322/934). He died on Saturday, 11 Ramaḍān 328/20 June 940.

Among his teachers were some of the Syrian Christians who brought the tradition of the Alexandrian school, which had been continued in Antioch and Ḥarrān, to Baghdād, as reported by al-Fārābī and al-Masʿūdī (see Meyerhof, *Von Alexandrien nach Bagdad*, 19-21, 27-8; Zimmermann, *Al-Farabi's commentary*, pp. cv-cviii): Abū Yaḥyā al-Marwazī, a doctor who taught logic in Syriac (with him Mattā read Aristotle's *Analytica posteriora*; Ibn al-Nadīm, *Fihrist*, 249_{14}, 263_{16}; Walzer, *Greek into Arabic*, 100f.), and Abū Isḥāḳ Ibrāhīm Ḳuwayrā (*sic*, i.e. Kyros), who commented on the *Organon* (*Fihrist*, 262; his commentary on the *Sophistici elenchi*, I, 1-11, mentioned in Badawī [ed.], *Manṭiḳ Arisṭū*, 951); also the Muslim Abū Aḥmad al-Ḥusayn b. Isḥāḳ Ibn Karnīb, a *mutakallim* interested in natural philosophy (*Fihrist*, 263).

His own translations—which were all made from Syriac versions of the 8th and 9th centuries—go far beyond the Aristotle reading (confined to elementary logic) of both the Nestorian *scholae*, where the Alexandrian curriculum of Ammonius and his disciples had been all but forgotten, and the medical schools which, for logic, preferred Galen's *De demonstratione* (cf. Zimmermann, *Al-Farabi's commentary*, pp. lxxvi, ciii-cviii). They represent a revival of Aristotelian studies which, relying on the available commentaries of Alexander of Aphrodisias and Themistius, recovered an Aristotle more complete and more authentic than had been known heretofore to Arabic readers. The works of Aristotle known to Ibn al-Nadīm in Mattā's translation (*Fihrist*, 249-51, 263-4) comprise the *Analytica*

posteriora, including the commentary of Alexander and Themistius's paraphrase, the *Sophistici elenchi* (revision of an older version, cf. Badawī (ed.), *Manṭiḳ Arisṭū*, 785 n. 2, 1018), the *Poetica*, *De caelo* ("part of book I") and its paraphrase by Themistus, *De generatione et corruptione* with the commentaries of Alexander and Olympiodorus, the *Meteorologica* with Olympiodorus's commentary, and book *Lambda* of the *Metaphysica* with Alexander's commentary as well as Themistius's paraphase. Only three of these have survived:

(a) The Paris ms. of the Arabic *Organon* (Bibl. nat., ar. 2346) contains the *Analytica posteriora* in Mattā's version as copied from the exemplar of his pupil Yaḥyā b. ʿAdī (ed. ʿAbd al-Raḥmān Badawī, *Manṭiḳ Arisṭū*, Cairo 1948-52, 309-465); for the revised version of Book I read by Ibn Rus̲h̲d and translated into Latin by Gerard of Cremona, see H. Gätje and G. Schoeler, *Averroes' Schriften zur Logik. Der arabische Text der zweiten Analytiken im Grossen Kommentar des Averroes*, in *ZDMG*, cxxx (1980), 556-85, esp. 564-83.

(b) His version of Alexander's commentary on *Metaph.* Λ, 1-7 (1069 a 18-1072 b 16), including the lemmata of Aristotle's text, served Ibn Rus̲h̲d as the basis of his *Tafsīr* (ed. M. Bouyges, *Averroès. Tafsîr Mâ baʿd aṭ-ṭabîʿat*, Beirut 1938-52; cf. Notice, pp. cxxx f.); see also the quotations from a commentary of Mattā on *Metaph.* α, B, and Θ in Ps.-Mad̲j̲rīṭī, *Picatrix. Das Ziel des Weisen*, ed. H. Ritter, Leipzig-Berlin 1933, 282-3 = tr. H. Ritter and M. Plessner, London 1962, 290, 292.

(c) Mattā's translation of the *Ars poetica* (edd. D.S. Margoliouth, London 1887; J. Tkatsch, Vienna 1928-32; ʿAbd al-Raḥmān Badawī, Cairo 1953; S̲h̲ukrī ʿAyyād, Cairo 1967) has become notorious for its inadequacies rather than for its merits [cf. BALĀG̲H̲A, ḤAMĀSA, ḤIKĀYA, HID̲J̲Āʾ, ISTIʿĀRA], but it must be kept in mind that the *Poetics*, as well as the *Rhetoric*—both regarded as part of the *Organon* in the Alexandrian curriculum (Walzer, *Greek into Arabic*, 129-36)—were read for the study of certain types of "logical" argument, but not with regard to a literary tradition which had become extinct already in late Hellenism.

The commentaries of Mattā and his school, if we may judge from the little that is preserved, were in the form of more or less extensive notes, marginal or annexed to lemmata of the texts (*taʿālīḳ*) and in some cases combined with those of other teachers in the style of the late Patristic *catenae* on the Bible. An important number of such notes is to be found in the Paris *Organon*, referring to *An.pr.* (see Walzer, *Greek into Arabic*, 78), *An. post.* (see *ibid.*, 102), the *Topica* (ed. Badawī, *Manṭiḳ Arisṭū* 630 n. 3), and Porphyry's *Isagoge* (*ibid.*, 1046 n. 1, 1048, n.1. 3, 1053, n. 2, 1054 n. 1), in a 10th-century *catena* commentary on the *Categories* (see M. [Küyel-] Türker, *El-ʿÂmirî ve Kategorîler'in şerhleriyle ilgili parçalar*, in *Araştırma*, iii [1965], 65-122), and on the margins of Alexander's treatise on the *differentia specifica* (*M. fi 'l-Fuṣūl*, ed. Badawī, *Arisṭū ʿind al-ʿArab*, 295-308, cf. J. van Ess, *Über einige neue Fragmente des Alexander*, etc., in *Isl.*, xlii [1966], 146-68, esp. 154-8); others are quoted by his pupil Yaḥyā b. ʿAdī (Endress, *The works of Yaḥyā ibn ʿAdī*, 52, 93) and by Ibn al-Muṭrān (d. 587/1191, see M. Riḍā al-S̲h̲abībī, *Bustān al-aṭibbāʾ wa-rawḍat al-alibbāʾ*, in *MMIA*, iii [1923], 2-8 [p. 7, nos. 9, 19, 20]: notes on *Isag.*, *Cat.*, *De int.*); still others were available to Ibn al-Nadīm (who also mentions two introductory treatises on the *Analytica*, *Fihrist*, 264) and ʿAbd al-Laṭīf al-Bag̲h̲dādī (*R. fī Mud̲j̲ādalat al-ḥakīmayn al-kīmiyāʾī wa'l-naẓarī*, ms. Bursa, Hüseyin Çelebi 823, fol. 113b 5-7, see S. M. Stern, *A collection of treatises by ʿAbd al-Laṭīf al-Baghdādī*, in *Islamic Studies*, i [Karachi 1962], 55, 66).—Fairly extensive commentaries of his on the *Physica*, books II, 3-III,4, have survived in ms. Leiden, Or. 1433 (containing Isḥāḳ b. Ḥunayn's Arabic translation and a course on the *Physics* edited in 395/1004 by Abu 'l-Ḥusayn al-Baṣrī from the lectures of Abū ʿAlī Ibn al-Samḥ, ed. Badawī, *Arisṭūṭālīs. al-Ṭabīʿa*, Cairo 1965-6). His view of Nature as an immanent creative being (*al-ṭabīʿa al-faʿʿāla*, ed. Badawī 151, cf. Ioh. Philoponus, *In Phys.*, ed. Vitelli, 317_{18}) was explicitly attacked by Ibn Sīnā (H.V.B. Brown, *Avicenna and the Christian philosophers in Baghdad*, in *Islamic philosophy and the classical tradition*, Oxford 1972, 35-47, esp. 43-5).

Among his Christian and Muslim contemporaries of the *falāsifa*, he was recognised unanimously as the scholarch of logic in his time (*Fihrist*, 263_{25}; al-Masʿūdī, *Tanbīh*, 122). With him, al-Fārābī [*q.v.*] studied the *Organon*, and the Jacobite Yaḥyā b. ʿAdī [*q.v.*] transmitted his teaching to the subsequent generation of Muslim and Christian philosophers in Bag̲h̲dād, notably ʿĪsā b. Zurʿa, al-Ḥasan b. Suwār, and the Muslim Abū Sulaymān al-Sid̲j̲istānī [*q.v.*]. On the other side, a vehement polemic, surging since the traditionalist reaction of the mid-9th century, was directed by the religious establishment of the *ʿulūm al-s̲h̲arʿiyya* against the claim of Greek logic and philosophy to universal truth, and more especially against the influence of logic apparent in the *uṣūl al-naḥw* of contemporaries like Ibn al-Sarrād̲j̲ [*q.v.*] and his pupil al-Rummānī [*q.v.*] (cf. *Fihrist*, 62; Ibn al-Anbārī, *Nuzha*, ed. Amer, 189). The attack led by Abū Saʿīd al-Sīrāfī against Mattā in the *mad̲j̲lis* of the vizier Abu 'l-Fatḥ Ibn al-Furāt in 326/937-8, as reported by al-Rummānī to Abū Ḥayyān al-Tawḥīdī (*al-Imtāʿ wa 'l-muʾānasa*, i, 107-28), is an impressive illustration. The leader of the logicians (depicted by al-Tawḥīdī's informants as a covetous drunkard who sells his learning for profit) is shown, not without malicious tricks, to be unable to defend the philosophers' claim that logic is a tool necessary "to know truth from falsehood, veracity from lying, good from bad", and to dispute his opponent's argument that the only way to "logical speech" (*nuṭḳ*) is through the grammar of a particular conventional language. But if Mattā had no more to say to his unsympathetic audience than the report credits him with, his pupils al-Fārābī (cf. Zimmermann, *Al-Farabi's commentary*, pp. cxxvi ff.) and Yaḥyā b. ʿAdī (cf. Endress, *The works of Y. b. ʿA.*, 45f.), defending logic as universal grammar while assigning to grammar the rules peculiar to the utterances (*alfāẓ*) of a particular language, made up for his silence.

MATTER [see HAYŪLĀ].

AL-**MĀTURĪDĪ**, ABŪ MANṢŪR MUḤAMMAD B. MUḤAMMAD B. MAḤMŪD AL-SAMARḲANDĪ, Ḥanafī theologian, jurist, and Ḳurʾān commentator, founder of a doctrinal school which later came to be considered one of the two orthodox Sunnī schools of *kalām* [see MĀTURĪDIYYA].

His *nisba* refers to Māturīd (or Māturīt), a locality in Samarḳand. On the basis of a misunderstood reference of al-Samʿānī (fol. 498b) to his son-in-law, some late sources consider him of distinguished Medinan descent and call him al-Anṣārī. His main teacher, Abū Naṣr Aḥmad b. al-ʿAbbās al-ʿIyāḍī, was killed between 261/874 and 279/892, probably closer to the latter date. Al-Māturīdī thus must have been born before 260/873, especially since he is described as having been highly esteemed by his teacher, who would not engage in scholarly debate except in his presence. According to some late authors, al-Māturīdī also studied under al-ʿIyāḍī's teachers Abū Sulaymān al-Djūzdjānī, Nuṣayr b. Yaḥyā al-Balkhī (d. 268/881-2) and Muḥammad b. Muḳātil al-Rāzī (d. 226/841). The latter cannot have been his teacher, and the report is most likely unreliable also in respect of the other two. Not much else is known about his career. He is described as leading an ascetic life and as occasioning miracles (*karāmāt*). The death date given by the later sources, 333/944, may be approximately correct, though the earliest biographer, Abu 'l-Muʿīn al-Nasafī (d. 508/1114), did not know it. Alternate dates mentioned in two late sources are 336/947 and 332/943. Al-Māturīdī's tomb in the cemetery of Djākardīza in Samarḳand was still known in the 9th/15th century. Among his students were Abū Aḥmad al-ʿIyāḍī, son of his teacher Abū Naṣr, Abu 'l-Ḥasan al-Rustughfanī, and ʿAbd al-Karīm b. Mūsā al-Bazdawī (al-Pazdawī), great-grandfather of Abu 'l-Yusr al-Bazdawī.

Of al-Māturīdī's works, the published text of the *Kitāb al-Tawḥīd* (ed. F. Kholeif, Beirut 1970) is definitely authentic. The book, however, seems to have existed in different versions since some quotations from it in Abu 'l-Muʿīn al-Nasafī's *Tabṣirat al-adilla* are missing in the edited text (see D. Gimaret, *Théories de l'Acte humain et théologie musulmane*, Paris 1980, 175-8). Al-Māturīdī's extensive Ḳurʾān commentary *K. Taʾwīlāt al-Ḳurʾān* (vol. i, ed. Ibrāhīm ʿAwaḍayn and al-Sayyid ʿAwaḍayn, Cairo 1391/1971) was, according to its commentator ʿAlāʾ al-Dīn Abū Bakr Muḥammad b. Aḥmad al-Samarḳandī (d. *ca.* 540/1145), assembled by his pupils and therefore less obscure than his other works which were written by himself. Also attributed to al-Māturīdī are three short published texts, a *Risāla fī 'l-ʿaḳāʾid*, a *K. al-Tawḥīd* (both ed. Y. Z. Yörükan, *Islam akaidine dair eski metinler*, Istanbul 1953), and a *sharḥ* on Abū Ḥanīfa's *al-Fiḳh al-akbar*. These works appear to have been composed by later representatives of the school on the basis of his doctrine. Abu 'l-Muʿīn al-Nasafī does not list them among his works. He mentions, on the other hand, the following, apparently lost, books: *K. al-Maḳālāt*; *K. Bayān wahm al-Muʿtazila*; refutations of three books of the Muʿtazilī Abu 'l-Ḳāsim al-Balkhī al-Kaʿbī (d. 319/932), his *K. Awāʾil al-adilla*, *K. Tahdhīb al-djadal*, and his *K. fī waʿīd al-fussāḳ*; a refutation of *al-Uṣūl al-khamsa* by the Muʿtazilī Abū ʿUmar al-Bāhilī, a close companion of Abū ʿAlī al-Djubbāʾī; a refutation of a *K. al-Imāma* by an Imāmī Shīʿī author; two refutations of the Ismāʿīlīs (Ḳarāmiṭa); and two books on legal methodology (*Uṣūl al-fiḳh*), *K. Maʾkhadh al-sharāʾiʿ* and *K. al-djadal.*

In contrast to al-Ashʿarī, the founder of the other Sunnī *kalām* school, who espoused the doctrines of Ḥanbalī traditionalism, al-Māturīdī adhered to the doctrine of Abū Ḥanīfa as transmitted and elaborated by the Ḥanafī scholars of Balkh and Transoxania. He developed previous eastern Ḥanafī teaching systematically in arguing against the positions of the Muʿtazila, in particular, their chief representative in the east Abu 'l-Ḳāsim al-Balkhī; of the Karrāmiyya, Sunnī traditionalists (Ḥashwiyya); of the Imāmī Shīʿa; and of the Ismāʿīlīs, represented in Transoxania by Muḥammad b. Aḥmad al-Nasafī (d. 332/943). Of other religions, he refuted the views of Christians, Jews, Zoroastrians, Manichaeans, Bardesanites and Marcionites (see G. Vajda, *Le témoignage d'al-Māturīdī sur la doctrine des Manichéens, des Daysanites et des Marcionites*, in *Arabica*, xii [1966], 1-38, 113-28). His doctrine was in substance generally more rationalist and, with the exception of his Murdjiʾī definition of faith (*īmān*), closer to Muʿtazilism than al-Ashʿarī's. In his concepts and technical terminology he was, however, less influenced by the Muʿtazila than al-Ashʿarī, who had been a trained Muʿtazilī before his break with them.

In substantial agreement with the Muʿtazilī position, al-Māturīdī held that man is able and obliged to gain knowledge of God and his obligation to thank Him through reason independent of prophetic revelation. In respect of the attributes of God, he, like the Muʿtazila, allowed and practised metaphorical interpretation of anthropomorphic expressions in the Ḳurʾān, though he rejected some specifically Muʿtazilī interpretations. In other instances he relied on the traditionalist *bilā kayf* formula, insisting on unquestioning acceptance of the revealed text. Against the Muʿtazila, he considered divine attributes like knowledge and power as real and eternally subsisting in his essence (*ḳāʾima bi 'l-dhāt*). Although he accepted the terminological distinction between attributes of essence and attributes of act, he maintained, against the Muʿtazila and al-Ashʿarī, that the attributes of act are equally eternal and subsistent in the divine essence. Thus he insisted that the expressions "God is eternally the Creator" and "God has been creating from eternity (*lam yazal khāliḳ^an^*)" are equally valid, even though the created world is temporal. In particular, his doctrine that the *takwīn*, bringing into existence, was eternal and distinct from the *mukawwan*, the existing things, became a famous point of controversy with the Ashʿarīs. Al-Māturīdī affirmed the vision (*ruʾya*) of God by the faithful in the hereafter, but consistently rejected the possibility of *idrāk*, which he understood as grasping, of God by the eyes. He held speech (*kalām*) to be an eternal attribute of God which could, however, not be heard. Like the Muʿtazila, he thus affirmed, in respect to Ḳurʾān, IV, 165, *wa-kallama llāhu Mūsā taklīm^an^*, that God created a voice which He made Moses hear.

In regard to predestination and human free will, al-Māturīdī's position was intermediate between the Muʿtazila and al-Ashʿarī. He affirmed that the acts of man are created by God, subject to His will and decree. While they are thus acts of God in one respect

(*djiha*), they are in another respect really, and not metaphorically, man's acts and his free choice (*ikhtiyār*). Al-Māturīdī insisted that God will lead astray (*aḍalla*) only those who, He knows, will choose the wrong way and will guide only those who, He knows, will choose the straight path. The initial choice is man's, not God's as for al-Ashʿarī. Al-Māturīdī thus also rejected the predestinarian interpretation of the primordial covenant (*mīthāḳ*, according to Ḳurʾān, VII, 137), according to which God separated the chosen from the condemned before creation and the latter confessed belief in His Lordship falsely under duress. Man's power (*ḳudra*), given by God, is valid for opposite acts. Capability (*istiṭāʿa*) is of two kinds, one preceding the act, the other simultaneous with it. The imposition by God of something beyond man's capacity (*taklīf mā lā yuṭāḳ*) is in principle inadmissible.

Faith (*īmān*) was defined by al-Māturīdī essentially as *taṣdīḳ bi 'l-ḳalb*, inner assent, expressed by verbal confession (*iḳrār bi 'l-lisān*). Works (*aʿmāl*) are not part of faith. Faith cannot decrease nor increase in substance, though it may be said to increase through renewal and repetition. Al-Māturīdī condemned *istithnāʾ*, adding the formula "if God will" to the affirmation "I am a believer". The faithful sinner may be punished by God but will eventually enter Paradise. The traditionalist tenet backed by al-Ashʿarī that faith is uncreated was rejected by al-Māturīdī.

(W. MADELUNG)

MĀTURĪDIYYA, a theological school named after its founder Abū Manṣūr al-Māturīdī [*q.v.*] which in the Mamlūk age came to be widely recognised as the second orthodox Sunnī *kalām* school besides the Ashʿariyya. The name Māturīdiyya does not appear to have been current before al-Taftazānī (d. 792/1390), who used it evidently to establish the role of al-Māturīdī as the co-founder of Sunnī *kalām* together with his contemporary al-Ashʿarī. In view of the late appearance of the name, the reality of a theological school founded by al-Māturīdī has been questioned. In earlier times, the school was commonly called that of the scholars of Samarḳand or of Transoxania. It claimed to represent the doctrine of Abū Ḥanīfa and sometimes identified itself as the *ahl al-sunna wa 'l-djamāʿa* and "the great mass", *al-sawād al-aʿẓam*. The dominant influence of al-Māturīdī's thought and works on the later representatives of the school is, however, evident, and the latter did not deviate more substantially from his doctrine than did the later Ashʿarīs from the doctrine of al-Ashʿarī. The latter was more readily recognised as the founder of a new school both because he was originally a Muʿtazilī and because he was repudiated by the Ḥanbalī traditionalists whose doctrine he claimed to defend, while al-Māturīdī was considered fully representative of traditional Transoxanian Ḥanafism whose theology he elaborated.

The theological doctrine of the Ḥanafī scholars of Samarḳand spread in the 4th/10th and 5th/11th centuries throughout Transoxania, eastern Khurāsān, Balkh and among the newly converted Turks in the Ḳarakhānid territories of Central Asia. In the 4th/10th century there were some differences on a few theological questions with the Ḥanafī scholars of Bukhārā, who were more strongly influenced by traditionalist, anti-rationalist tendencies. These were mostly harmonised by later Māturīdī scholars with compromise solutions. Māturīdī teaching remained virtually unknown west of Khurāsān, where the Ḥanafīs adhered to other theological schools, many of them to Muʿtazilism. Only the Saldjūḳ expansion into the central Islamic world since the middle of the 5th/11th century brought a radical change. Ashʿarī authors now took note of Māturīdī doctrine concerning the divine attributes, characteristically describing it as an innovation propounded only after the year 400/1009. The militant support of the Turks for eastern Ḥanafism including its theological doctrine led to a major clash with the Shāfiʿīs, now identified with Ashʿarī theology. This is the background of the official cursing of al-Ashʿarī from the pulpits in Khurāsān ordered by the Saldjūḳ Ṭoghrīl Beg in 445/1053 and of the persecution of Ashʿarīs and the extensive factional warfare between Ḥanafīs and Shāfiʿīs in the major towns of Iran in the later Saldjūḳ age. Māturīdī works of this period are highly critical of Ashʿarism, excluding the Ashʿariyya from the *ahl al-sunna wa 'l-djamāʿa* and describing some Ashʿarī doctrines as *kufr*. As a result of the Turkish expansion, eastern Ḥanafism and Māturīdī theological doctrine were spread throughout western Persia, ʿIrāḳ, Anatolia, Syria and Egypt. Numerous Transoxanian and other eastern Ḥanafī scholars migrated to these regions and taught there from the late 5th/11th to the 8th/14th century. Māturīdī doctrine thus gradually came to prevail among the Ḥanafī communities everywhere. In Damascus and Syria it was first propagated by Burhān al-Dīn ʿAlī b. al-Ḥasan al-Sikilkandī al-Balkhī (d. 548/1153), to whom the Ḥanafī scholars of Samarḳand send a copy of Abū Ḥafṣ al-Nasafī's *ʿAḳāʾid* with their explanations, describing it as the creed of the *ahl al-sunna wa 'l-djamāʿa* on which they had agreed.

As the antagonism between the Ḥanafīs and Shāfiʿīs subsided in the Mamlūk age, the Ashʿarī Shāfiʿī Tādj al-Dīn al-Subkī (d. 771/1370) composed a *nūniyya* poem about the points of difference between al-Ashʿarī and "Abū Ḥanīfa", meaning Māturīdī doctrine. He listed thirteen such points, defining seven of them as merely terminological (*lafẓiyya*) and six as objective (*maʿnawiyya*). The latter were in his view so minor that they could not justify mutual charges of infidelity or heresy (*tabdīʿ*). A commentary on the *Nūniyya* was composed by al-Subkī's student Nūr al-Dīn Muḥammad b. Abi 'l-Ṭayyib al-Shīrāzī. This commentary with al-Subkī's thirteen points of difference was largely copied by Abū ʿUdhba, writing *ca.* 1125/1713, in his well-known *K. al-Rawḍa al-bahiyya fī mā bayn al-Ashāʿira wa 'l-Māturīdiyya* (a summary of the thirteen points is given by A. S. Tritton, *Muslim theology*, London 1947, 174-6).

Notable representatives of the school of al-Māturīdī in the later 5th/11th century were Abū Shakūr al-Sālimī al-Kishshī, author of a *K. al-Tamhīd fī bayān al-tawḥīd*, and Abu 'l-Yusr al-Bazdawī (d. 593/1099), *ḳāḍī* of Samarḳand and author of the *K. Uṣūl al-dīn*. Most influential in expounding and elaborating the doctrine of al-Māturīdī was, however, Abu 'l-Muʿīn al-Nasafī al-Makḥūlī (d. 508/1114), who wrote the largest comprehensive work of Māturīdī theology

entitled *K. Tabṣirat al-adilla*, a shorter *K. Baḥr al-kalām* and a *K. al-Tamhīd li-ḳawāʿid al-tawḥīd*.

Most important in the dissemination of Māturīdī dogma was the creed (*ʿAḳāʾid*) of Nadjm al-Dīn Abū Ḥafs al-Nasafī (d. 537/1142) which closely followed Abu 'l-Muʿīn's formulations in his *Tabṣirat al-adilla*. It received many commentaries and glosses for scholastic teaching and was repeatedly versified. Another popular Māturīdī creed in verses, known as *al-Lāmiyya fi 'l-tawḥīd* or *Badʾ al-amālī*, was composed by ʿAlī b. ʿUthmān al-Ūshī (d. 569/1173) and was later explained in numerous commentaries, some in Persian and Turkish. Also in the 6th/12th century, there wrote Nūr al-Dīn al-Ṣābūnī al-Bukhārī (d. 580/1184), whose *K. al-Bidāya min al-kifāya*, extracted from his larger *K. al-Kifāya fi 'l-hidāya*, has been published.

Among the later Māturīdī authors, Abu 'l-Barakāt al-Nasafī (d. 710/1310) composed a popular brief treatise *ʿUmdat al-ʿaḳīda li-ahl al-sunna* with his own commentary entitled *K. al-Iʿtimād fi 'l-iʿtiḳad*, both strongly influenced by Abu 'l-Muʿīn al-Nasafī's *Tabṣirat al-adilla*. A theologian with a more personal profile was ʿUbayd Allāh b. Masʿūd al-Maḥbūbī (d. 747/1346), who dealt with theological questions in the context of both his *K. Taʿdīl al-ʿulūm* and his *K. al-Tawḍīḥ*, a work on legal methodology (*uṣūl al-fiḳh*). Saʿd al-Dīn al-Taftazānī (d. 792/1310) wrote the best-known commentary on Abū Ḥafṣ al-Nasafī's *ʿAḳāʾid*. A student of ʿAḍud al-Dīn al-Īdjī, representative of the philosophical *kalām* of late Ashʿarism, he himself seems to have progressively moved towards Ashʿarī positions. This is apparent in his later *K. al-Maḳāṣid* and his own commentary on it, which were patterned after al-Īdjī's *K. al-Mawāḳif*, and its commentary by the Sharīf al-Djurdjānī. The Egyptian Ḥanafī theologian Kamāl al-Dīn Ibn al-Humān (d. 861/1457), author of a *K. al-Musāyara fi 'l-ʿaḳāʾid al-mundjiya fi 'l-ākhira*, fully accepted the now prevailing view of the equal orthodoxy of Ashʿarism and Māturīdism, but showed a degree of independence in regard to both schools. In contrast, the Ottoman Ḥanafī Kamāl al-Dīn al-Bayāḍī (d. 1078/1687) in his *K. Ishārāt al-marām min ʿibārāt al-imām* emphasised the independence and priority of Māturīdī *kalām*, founded on the teaching of Abū Ḥanīfa, in relation to Ashʿarism.

Unlike Muʿtazilism and Ashʿarism, Māturīdī theology always remained associated with only a single legal school, that of Abū Ḥanīfa. It also generally lagged behind the other two *kalām* schools in methodical sophistication and systematisation, especially in the questions of natural science treated by them, and was less subject to the pervasive influence of the terminology and concepts of *falsafa* on later Ashʿarism and later, particularly Imāmī Shīʿī, Muʿtazilism. While the conflict of the Māturīdiyya with the Muʿtazila was obviously most fundamental, the differences with the Ashʿariyya were more substantial than the later harmonising theologians would admit. They involved mainly Māturīdī doctrine affirming the eternity of God's attributes of act subsisting in His essence, the rational basis of good and evil, the reality of free choice (*ikhtiyār*) of man in his acts, and the Murdjiʾī definition of faith as assent and confession excluding works (*aʿmāl*). However, other, less significant points of difference dominated at times the controversy between the two schools.

(W. MADELUNG)

MAʿŪNA (A., pl. *maʿūnāt*, *maʿāwin*), "assistance", an administrative term of early Islamic history with several meanings.

In texts relating to the pre-ʿAbbāsid period, it refers to allocations comparable with, but distinct from, stipends (*ʿaṭāʾ* [*q.v.*]) and rations (*rizḳ* [*q.v.*]). *Maʿūna* was sometimes a gratuity paid to those who were not in receipt of stipends (al-Ṭabarī, i, 3410; ii, 1794), sometimes a bonus supplementary to stipends (al-Ṭabarī, ii, 407; al-Balādhurī, *Futūḥ*, 187-8; cf. idem, *Ansāb*, ivb, 33), and sometimes a regular (more precisely annual) payment made to those in receipt of stipends and rations alike (al-Ṭabarī, i, 2486, 2524; ii, 755; Ibn Saʿd, v, 277); *maʿūnāt* is even used as a global term for private income from public funds (al-Ṭabarī, i, 3026). One would assume the *ʿāmil* or *ṣāḥib al-maʿūna* of this period to have been a fiscal officer, especially as he was often appointed to the *kharādj* [*q.v.*] as well, or to the civil administration in general (al-Ṭabarī, ii, 822, 929, 1069; cf. iii, 863); but it is possible that he was an officer charged with the maintenance of law and order (al-Ṭabarī, ii, 1470f. could be read in support of either view).

From the 3rd/9th century onwards, there is at any rate no doubt that the leader of the *maʿūna* was charged with police duties. He might be identical with the leader of the *shurṭa* (later *shiḥna*) [*q.vv.*] or with the military governor (al-Ṭabarī, iii, 1816, 1822, 1875). In so far as he was not, he performed functions such as bringing accused persons to court, executing verdicts and collecting fines (Hilāl al-Ṣābī, *Rusūm dār al-khilāfa*, ed. M. ʿAwwād, Baghdād 1964, 9 and n. 3 thereto; A. A. Duri, *Governmental institutions*, in R. B. Serjeant (ed.), *The Islamic city*, Paris 1980, 61; R. Levy, *The social structure of Islam*, Cambridge 1969, 332, 381; see also E. Tyan, *Histoire de l'organisation judiciaire en pays d'Islam*, Paris 1938-43, ii, 69, 365-6; and ʿĀMIL). The actual police building was called *maʿūna* too, at least by the time of the Geniza documents (S. D. Goitein, *A Mediterranean society*, ii, Berkeley and Los Angeles 1971, 368, cf. also Tyan, *op.cit.*, ii, 401, 432.

Bibliography: Given in the article.

(P. CRONE)

MAURITANIA [see MŪRĪTĀNIYĀ].

MAURITIUS, an island of the south-western Indian Ocean, one of the three Mascarene Islands (together with Réunion and Rodrigues), located some 2,300 miles (3,680 km) north-west of Cape Town, a similar distance south south-east of Aden, and 2,000 miles (3,200 km) south-west of Colombo.

Although probably known to Arab navigators from as early as the 12th century A.D., none of the Mascarene Islands (or of the more northerly Seychelles) were ever colonised by Muslim—or any other—peoples before their discovery by Europeans in the early 16th century A.D.

During subsequent centuries, the Island of

Mauritius (named by the Dutch, after the *Stadthouder* Maurice of Nassau in 1598) passed successively under Dutch, French and British suzerainty, falling to the latter power during the Napoleonic Wars on 3 December 1810. Whilst the Portuguese discoverers of Mauritius in the early 16th century made no attempt to settle or develop the Mascarenes, Dutch settlers began the colonisation of Mauritius in 1638 when numbers of European convicts, together with slaves from Indonesia and Madagascar, were landed on the island. It is probable that most of the Indonesians, and certainly some of the Madagascans, were Muslims. By 1710, however, Dutch attempts at settling Mauritius ended in failure, and during the subsequent French administration of the island slave labour was imported almost exclusively from Madagascar and the Swahili Coast. Few of these enforced settlers are likely to have been of Muslim origin, however, for the African Muslims of the Swahili Coast tended to be the controllers, rather than the victims, of the Arabian Sea slave traffic.

Muslims, therefore, came to Mauritius in large numbers only after the British seizure of power in 1810 and, more particularly, after the abolition of slavery in 1835 and the introduction of large-scale indentured labour from the Indian subcontinent, for work in the sugar plantations, at about the same time. Indian migrants to Mauritius during the mid-19th century tended to bc drawn mainly from the poor labouring classes of Bihar, the United Provinces (Uttar Pradesh), Orissa and Bengal (migrating via Bombay and Calcutta), or from similar social groups in Tamil Nadu and southern India (migrating via Madras). In this way, nearly 450,000 Indians entered Mauritius between about 1835 and 1907, with a few additional South Asians entering the colony in 1922-3. The indentured labourers who made up the great majority of Indian migrants were generally engaged on five-year contracts, but during the whole period of immigration only 160,000 were returned to India, the great majority remaining beyond the end of their contracts to swell the population of Mauritius. In addition to these poorer, indentured classes, comparatively well-to-do Indians, particularly Muslim traders from Gudjarāt (erroneously known as "Arabs" in contemporaneous Mauritian circles) and *Chettiars* from South India also began to settle in the island, where they soon became to dominate the trade of Port Louis and the outlying provincial centres.

Thus in 1835 Indo-Mauritians numbered a minute and demographically insignificant portion of the Mauritian population, whilst by 1845 their numbers had grown to *ca.* 33%, and by 1861 fully 64% of the total population. The process of Indian migration to Mauritius was officially halted in 1909, but by this time the ethnic composition of the island had been radically transformed, with Indo-Mauritians comprising the overwhelming majority of the population, a situation which continues today; other important sections of the Mauritian population include Creoles, Chinese, and an influential French community.

Among Indo-Mauritians, approximately 25% (or 16% of the total population) are of Muslim faith. They live scattered throughout the island, with about 43% of their number located in urban communities (especially in Port Louis, the capital), and 57% located in smaller rural communities. Within Port Louis, the Gudjarātī Muslims are chiefly engaged in trade, whilst those descended from poorer indentured labourers form an urban labour force.

The great majority of Muslim Mauritians are Sunnīs, especially of the Ḥanafī *madhhab* (83%); Sunnī Shāfiʿīs are also well represented (*ca.* 7%), whilst smaller identifiable groups include the Shīʿa (0.8%), the Bohrās [*q.v.*] (0.3%) and (counted as Muslim for census purposes) a flourishing Aḥmadiyya [*q.v.*] community (*ca.* 9%). According to Benedict (1965), in general terms Muslim Mauritians are more highly organised on a religious basis than the Hindu Indo-Mauritians. This is related to their minority status, to the appearance early in Mauritian history of wealthy Muslims who supported their religion through *wakf* endowments, and "most of all to the nature of Islam itself, which lays down tenets for a religious community". In 1965, there were 65 mosques on the island, governance of each being in the hands of a *mutawali* or manager, usually elected by the congregation. All but one of these mosques have been constituted as a *wakf* endowment for purposes of support. The mosque is the focal point of Mauritian Muslim society, around which are formed *jammats* or religious associations. In 1952 the total Muslim population of Mauritius was listed as 77,014; by 1962 this had reportedly risen to 110,332.

MAWĀKIB (A., sing. *mawkib*), processions.

1. Under the ʿAbbāsids and Fāṭimids

The basic meaning of procession (mounted or unmounted), cortège, is found in *ḥadīth* (al-Bukhārī, *Badʾ al-khalk*, 6; Ibn Ḥanbal, iii, 213; al-Dārimī, 2695). This is the precise sense given in the dictionaries, and that used by the Umayyads, ʿAbbāsids and Fāṭimids, often to describe the cortège of an *amīr*, *wazīr*, or other official (see, e.g., al-Ṭabarī, ii, 1731; Hilāl al-Ṣābī, *Rusūm dār al-khilāfa*, 9-10, 12, 14ff.).

By the 4th/10th century, it had acquired the broader meaning of audience as well as procession. Examples of this usage of *mawkib* abound in the literature. In addition to the references for the ʿAbbāsids in Sourdel, *Vizirat*, ii, 452, 653, 684, 685, see also *Tadjārib al-umam*, 195 (*yawm mawkib wa-dawla djadīda*), and al-Ṣābī, *Rusūm*, 71-2 (under rules for *hidjāba*), 78, 90; for the Fāṭimids, al-Kalkashandī, *Ṣubḥ*, iii, 481, 494 (*djulūs al-khalīfa fi 'l-mawākib*). The phrase most often designating an audience is *ayyām al-mawākib*. In both ʿAbbāsid and Fāṭimid sources, this seems to refer specifically to the general audiences held on Mondays and Thursdays (Hilāl al-Ṣābī, *Historical remains* ..., ed. Amedroz, Leiden 1904, 242, 244 (Thursday); *Tadjārib*, 195, refers to a Monday; al-Kalkashandī, *Ṣubḥ*, iii, 494, 496, 518, 523). For details on audiences, see MARĀSIM).

There was a strict protocol to be observed when accompanying the ruler (*al-musāyara*) in procession. The most important and oft-repeated exhortation was to be vigilant in keeping to one's assigned place (*yalzam al-mawḍiʿ alladhī fīhi rutbatuhu*), reflecting the emphasis on *tartīb*, arrangement of the *mawkib* according to rank. The rider must know the position of the caliph, without, however, turning too often to see him. He must maintain a silent and dignified bearing, speaking only in response to the caliph's questions. He should not ride where the caliph will get wind of his horse or where dust will be kicked up into his face.

He should not enter the caliph's shadow; but he must ride on the sunny side of the *mawkib* to shade the caliph from the sun.

If a person was chosen to accompany the caliph, he was cautioned not to consider this as a permanent position but rather as a privilege granted each time the caliph invited him. If the caliph decided to walk, all had to follow suit. If he were to dismount because of a call of nature, everyone had to dismount because they may not be mounted while he stands on the ground. If he dismounts to prayer, they should pray with him. And if he drinks something, they should avert their glance (further elaboration in al-Ṣābī, *Rusūm*, 86-9; al-Ḳāḍī al-Nuʿmān, *Kitāb al-Himma*, 116-19; al-Djāḥiẓ, *K. al-Tādj*, 72, 77-83).

There are precious little data on the processions of the ʿAbbāsids, almost certainly a reflection of the static and non-processional character of ʿAbbāsid ceremonial. Neither of the two *mawākib* about which we have significant details (al-Ṣābī, *Rusūm*, 9-10, the *mawkib* of Nāzūk; 12-14, Byzantine embassies) describes a caliphal procession.

The Fāṭimids had, perhaps, the most elaborate processions of any of their contemporaries. This has been attributed to the influence of Byzantium (see M. Canard, *Le cérémonial fâtimide et le cérémonial byzantin: essai de comparaison*, in *Byzantion*, xxi [1951], 408ff.). Where there is a dearth of information for the ʿAbbāsids, there is an abundance for the Fāṭimids. This is probably due largely to the fact that most of the sources for the Fāṭimids were transmitted by Mamlūk authors, reflecting the Mamlūk predilection for elaborate public processions.

The Fāṭimids staged grand processions on the New Year, the first of Ramaḍān, the last three Fridays of Ramaḍān, the Two Festivals and the inundation of the Nile. The most complete descriptions are those of Ibn al-Ṭuwayr, the late Fāṭimid-early Ayyūbid historian. Both Ibn Taghrībirdī and al-Ḳalḳashandī rely almost exclusively (albeit without attribution) on his undated descriptions. Only al-Maḳrīzī, in the monumental *Khiṭaṭ* and his history of the Fāṭimids, *Ittiʿāẓ al-ḥunafāʾ* (published in 3 volumes, Cairo 1967-72), relies on the dated accounts of Ibn Zūlāḳ, al-Musabbiḥī and Ibn al-Maʾmūn al-Baṭāʾiḥī, in addition to Ibn al-Ṭuwayr. These dated accounts reveal considerable changes in processions over the course of time, although many general features remained constant.

Al-Ḳalḳashandī enumerates the insignia of sovereignty (*al-ālāt al-mulūkiyya*) used in processions (*Ṣubḥ*, iii, 468-71; cf. Ibn Khaldūn, *Muḳaddima*, tr. Rosenthal, ii, 48-73, and Canard, *Cérémonial fâtimite*, 388-93): crown (*tādj*—not a crown *per se*, but an elaborate turban wound in a particular fashion); sceptre (*ḳaḍīb al-mulk*), held by the caliph during the procession; sword (*al-sayf al-khāṣṣ*); inkstand (*dawāt*); lance (*rumḥ*); shield (*daraḳa*); *ḥāfir*, "horseshoe", a crescent-shaped ruby affixed to a piece of silk and attached to the top of the *tādj*; parasol (*miẓalla*, carried over the head of the caliph); flags (*aʿlām*); fly-swatters (*midhabba*); arms (*silāḥ*); drums (*naḳḳārāt*); and tents (*al-khiyām wa 'l-fasāṭīṭ*).

Not all of these insignia appeared in every procession. For example, on the processions for the *ʿīd al-naḥr* and the anointment of the Nilometer during the time of Ibn al-Maʾmūn, the caliph carried no *ḳaḍīb* (al-Maḳrīzī, *Khiṭaṭ*, i, 436, 473). Ibn al-Ṭuwayr notes that the caliph did not have a *miẓalla* on the procession to the anointment (*ibid.*, i, 476). The *miẓalla* was not carried in the palace. When the caliph rode in a procession in which the *miẓalla* was carried, it was customary for him to visit the tomb of his ancestors (*al-turba al-muʿizziyya*) upon his return to the palace (*ibid.*, i, 407). The costumes of the caliph and his retinue, and of the *wazīr*, produced in the *dār al-kiswa* (see *ibid.*, i, 409-13) were different in each procession; the caliph sometimes changed costume for the return to the palace (*ibid.*, i, 436, 471).

The *rukūb* on the New Year (*awwal al-ʿām*) is considered as the prototype for Fāṭimid processions by Ibn al-Ṭuwayr, a claim not made by other historians of the Fāṭimid period, and perhaps representing later practice (see al-Maḳrīzī, *Khiṭaṭ*, i, 446-50; Ibn Taghrībirdī, *Nudjūm*, iv, 79-94; al-Ḳalḳashandī, *Ṣubḥ*, iii, 499-505; and Canard's translation of al-Maḳrīzī's text, *La procession du nouvel an chez les Fatimides*, in *AIEO Alger*, x [1952], 364-98, with copious annotation, based on Inostrantsev, *La sortie solennelle des Califes Fatimides*, St. Petersburg 1905 [in Russian]).

The preparations for the New Year procession began in the last ten days of Dhu 'l-Ḥidjdja, when the arms, swords, saddles, shields, spears, flags, banners, mounts and costumes were brought out of their respective treasuries for inspection. On the 29th, the caliph sat in the *shubbāk* (grilled loge) to review the horses and costumes chosen for the procession.

On Muharram, the caliph's *mawkib* was arranged in *bayn al-ḳaṣrayn*, the parade ground between the two palaces. When the caliph appeared at the gate of the palace, wearing a *mandīl* with the *yatīma*, girded with the *maghribī* sword and holding the sceptre, the drums were struck and trumpets sounded. The *miẓalla*, which matched the costume of the caliph, was unfurled. The caliph's entourage mounted up, and the whole cortège began to move.

The prefect of Cairo (*wālī al-Ḳāhira*) and the *isfahsalār* rode up and down the length of the procession, keeping the route clear and maintaining order. The caliph was surrounded by his *ṣibyān*, who were followed by the *wazīr* and his entourage. Then came the bearer of the lance, detachments of soldiers, standard bearers, and squadrons of the cavalry. The mounted soldiers numbered more than 3,000.

The *mawkib* departed from Bāb al-Naṣr and re-entered through Bāb al-Futūḥ (sometimes vice-versa), returning to *bayn al-ḳaṣrayn*. The procession dispersed, and coins struck for the New Year were distributed.

A procession inaugurated the month of Ramaḍān. The sources provide almost no details other than the fact that the procession was modelled exactly on the *rukūb* of the New Year (al-Maḳrīzī, *Khiṭaṭ*, i, 491; al-Ḳalḳashandī, *Ṣubḥ*, iii, 509). Only two accounts are imbedded in a historical narrative. Al-Musabbiḥī describes the procession of the caliph al-Ẓāhir and his troops on 1 Ramaḍān 415/6 November 1024 with a *miẓalla* and *rumḥ* (al-Maḳrīzī, *Ittiʿāẓ*, ii, 158-9; al-Musabbiḥī, *Akhbār Miṣr*, ed. Ayman Fuʾād Sayyid and Thierry Bianquis, *IFAO*, 1978, 61). Ibn al-Maʾmūn provides a very brief account of the procession of al-Āmir in 517/23 October 1123 (*Ittiʿāẓ*, iii, 102).

The caliph rode in procession to lead the prayer on three Fridays during Ramaḍān. The locations of the prayers varied somewhat. Ibn al-Ṭuwayr reports Friday prayers at the Anwar, Azhar and ʿAtīḳ mosques. Under al-Ḥākim, the Rāshida mosque was also the site of Friday prayer (see *Ṣubḥ*, iii, 509-12; Ibn Taghrībirdī, *Nudjūm*, iv, 102-4; *Khiṭaṭ*, ii, 280-2; *Ittiʿāẓ*, ii, 20, 58, 96-7, 104, 109, 118-19, 160).

The mosque was furnished and carpeted with tapestries and rugs by the *ṣāḥib bayt al-māl* (director of the public treasury). On each side of the *minbar*, curtains embroidered in red silk, containing the *basmala*,

fātiḥa, and Sūra LXII on one and Sūra LXIII on the other, were hung. The caliph delivered the *khuṭba* under a perfumed *ḳubba*, which was fastened to conceal him from view (mentioned as early as 388/998 and 415/1024, al-Maḳrīzī, *Ittiʿāẓ*, ii, 20, 161). Then the caliph descended to the *miḥrāb* and led the prayer from inside the *maḳṣūra* [see MASDJID].

On the *ʿīd al-fiṭr* and *ʿīd al-aḍḥā* (or *al-naḥr*), the caliph rode in procession to the *muṣallā* outside of Bāb al-Futūḥ. Muezzins, sitting upon *maṣṭaba*s from Bāb al-ʿĪd to the *muṣallā*, pronounced the *takbīr* continuously while the caliph was en route. The caliph wore his full costume with the *miẓalla* and the *yatīma*. Like prayer during Ramaḍān, the *miḥrāb* was hung with two curtains, the one on the right with the *basmala* and Sūra LXXXVII, on the left with Sūra LXXXVIII (*Khiṭaṭ*, i, 451-7; *Ittiʿāẓ*, i, 137-8; ii, 5, 58, 79, 82, 87, 97, 109, 160-1; iii, 60, 83-168-9).

Upon returning from the *muṣallā*, a banquet was held in the *īwān* (in some periods, in the *ḳāʿat al-dhahab*), when the silver *māʾida* called *al-mudawwara* was set up, covered with magnificent foods, including sugar castles made in the *dār al-fiṭra*. There were two banquets on *ʿīd al-fiṭr*, one before and one after prayer. People were encouraged to carry food away from the banquet and redistribute it (on banquets, see *Khiṭaṭ*, i, 387-8).

On the *ʿīd al-naḥr*, the caliph sacrificed animals either in the *muṣallā* or the *manḥar*, which were then distributed to notables of the state (see *Khiṭaṭ*, i, 436-8; *Ṣubḥ*, iii, 523-4; *Nudjūm*, iv, 97-8). Ibn al-Maʾmūn describes in detail the inventory of sacrifices and distributions for the years 515 and 516 (*Khiṭaṭ*, i, 437, and *Ittiʿāẓ*, iii, 95-6). Ibn al-Ṭuwayr reports three consecutive *rukūb*s: on the first day to the *muṣallā*; on the second and third to the *manḥar* next to Bāb al-Rīḥ (cf. Ibn al-Ṭuwayr's description of the way the caliph slaughters, with the general rules as described in art. DHABĪḤA]. These rich details about the distribution of portions constitute important data for the as-yet unwritten social history of ritual (for individual years, see *Ittiʿāẓ*, i, 141-2; ii, 7, 37, 41, 59, 79, 83, 88, 91, 104, 110, 124).

Two processions took place at the time of the inundation of the Nile (*wafāʾ al-Nīl*): one to anoint the Nilometer (*takhlīḳ al-miḳyās*) and the other to cut the canal (*ḳaṣr al-khalīdj, fatḥ al-khalīdj*). When the water reached sixteen cubits, the *ḳayyās*, Ibn Abi 'l-Raddād (always called thus), sent a formal announcement to the caliph. The height of the rising water was measured every day, but a policy established under al-Muʿizz prohibited public announcement until it was only a few marks short of sixteen (*Khiṭaṭ*, i, 61; *Ittiʿāẓ*, i, 138-9).

The preparations for the anointment of the Nilometer began as soon as the caliph received word that the water was close to inundation. The *ḳurrāʾ* spent the night in the Nilometer, reciting the Ḳurʾān continuously. The next day, the caliph went in an *ʿushārī* (Nile boat) to the Nilometer (without a *miẓalla*, Ibn al-Ṭuwayr, *Khiṭaṭ*, i, 476, 1. 16). He entered along with the *wazīr* and the *muḥannak ustādh*s. The caliph and the *wazīr* each prayed two *rakʿa*s. Then the director of the public treasury brought out saffron and musk, which the caliph mixed in a vessel and then handed over to Ibn Abi 'l-Raddād. The *ḳayyās* threw himself into the *fisḳiyya*, took hold of the pillar with his feet and left hand, and anointed it with his right hand, while the *ḳurrāʾ* recited.

The next day, Ibn Abi 'l-Raddād received a robe of honour (*khilʿa* [*q.v.*]; see an early reference in *Ittiʿāẓ*, ii, 150). On the third or fourth day following the anointment, the caliph went out in procession to the banks of the Nile, passing through Fusṭāṭ (decorated by its residents) and crossing to the west bank, where grand tents had been erected for the occasion. The magnificent *khayma* known as *al-Ḳātūl* (so-called because someone was invariably killed when it was set up) was put up (*Khiṭaṭ*, i, 471; *Ittiʿāẓ*, iii, 72-3). The canal was cut and the *ʿushārī*s sailed in it. The caliphs used to take up residence in one of two pleasures-houses (*manẓara*s) during the days of these festivities (for complete descriptions, see *Khiṭaṭ*, i, 470-9; *Ṣubḥ*, iii, 518ff.; *Nudjūm*, iv, 99-100; Schefer, *Relation du voyage de Nasiri Khosrau en Syrie, en Palestine, en Egypte, en Arabie*, Paris 1881, 136-7; particular years, in Ibn Muyassar, *Akhbār Miṣr*, 44; *Ittiʿāẓ*, i, 319, ii, 59, 148-50, iii, 72-3, 81, 108, 129).

These major processions were announced to the provinces in letters from the *dīwān al-inshāʾ*. A number of these literary specimens remain, most from the pen of the celebrated *kātib* Ibn al-Ṣayrafī (*ʿĪd al-fiṭr*; *Khiṭaṭ*, i, 456-7 (536/1141-2); *al-Sidjillāt al-mustanṣiriyya*, ed. ʿAbd al-Munʿim Mādjid, Cairo 1954, no. 1 (451/1059), no. 13 (445/1053); *Ṣubḥ*, viii, 320-4. *ʿĪd al-naḥr*: *Khiṭaṭ*, i, 437-8; *Ṣubḥ*, viii, 324-8; *Sidjillāt*, no. 64 (476/1083). New Year: *Ṣubḥ*, viii, 314-15. Ramaḍān and Friday prayer: *Ṣubḥ*, viii, 316-19. Nile: *Khiṭaṭ*, i, 479; *Ṣubḥ*, viii, 328-9. An unidentified procession is described in *Rasāʾil al-ʿĀmidī*, ms. 4059 [Cat. 4365], fols. 24-5, in the Garrett Collection, Princeton University Library).

There were several minor processions, called "abbreviated" (*al-mawākib al-mukhtaṣara*) between the New Year and Ramaḍān, but there are almost no details on them except that they took place on Tuesday and Saturday, four or five times. They were much less elaborate than the major processions (see *Ṣubḥ*, iii, 521-2).

The only Shīʿī holiday marked by a procession was the *ʿĪd al-ghadīr* on 18 Dhu 'l-Ḥidjdja, commemmorating the *waṣiyya* to ʿAlī by the Prophet [see GHADĪR KHUMM]. In the early part of the Fāṭimid period, it was essentially a popular celebration of the Shīʿī population. During the time of Ibn al-Maʾmūn, it had become a court ceremony modelled on the rituals of *ʿīd al-naḥr*, with a procession to the *manḥar*. At the end of the Fāṭimid period, it had acquired a much different and complex character. Now an internal palace procession, attended only by professed Ismāʿīlīs, it took place at the Shrine of Ḥusayn and the *īwān*. The caliph delivered a *khuṭba*, but rode without insignia or *miẓalla*. Upon returning to the *īwān*, the text of the *naṣṣ* of ʿAlī was read to the assembly. This late procession was, in fact, a ceremonial polemic against the Ṭayyibīs (on the history of the celebration, see al-Maḳrīzī, *Ittiʿāẓ*, i, 273, 276, 280, 284, ii, 24, 67, 74, 91, 168, iii, 96; *Khiṭaṭ*, i, 388-90, 436, 492-3; al-Musabbiḥī, *Akhbār Miṣr*, 84-5; on the late Fāṭimids, see S. M. Stern, *The succession to the Fāṭimid Imām al-Āmir, the claims of the later Fāṭimids to the Imamate, and the rise of Ṭayyibī Ismailism*, in *Oriens*, iv [1951], 193-255).

2. IN MUSLIM SPAIN

The sovereign power of the *amīr*s and caliphs of al-Andalus showed itself in the etiquette [see MARĀSIM] of public audiences and during their official movements when, surrounded by their processional retinue (*mawkib*), they went into or came out of their residence. This was generally at the departure for a military campaign, to review the troops or to travel from one residence to another.

According to Ibn Khaldūn's *Muḳaddima*, "the

insignia of sovereignty are the displaying of flags, the beating of drums and the sounding of trumpets and horns", but as it happens, the historical sources for Muslim Spain have not preserved any traces of this use of wind instruments. Already under Hishām I (172-80/788-96), "the hubbub and din of the procession (*ladjab al-mawkib*) prevented the complaint of a petitioner being heard" (*Akhbār*, 121). This was the occasion for the people to see the *amīr* ʿAbd Allāh; the latter was surrounded by cavalrymen at the moment when the future al-Nāṣir's mule bolted; before the battle of Polei, the *amīr* had his canopy (*maẓall*) raised; that of the prince Abān was carried off by a gust of wind at the same time as the *ḳāʾid*'s *ḳubba* (Ibn Ḥayyān, *Muḳtabas*, iii, 36, 40, 95, 120). These processions were festivals, in the words of Ibn ʿAbd Rabbihi (*Crónica anónima*, 40).

The first riding forth of al-Nāṣir was in order to go hunting. In 322/934, it seems, at the time of his departure for the Osma campaign, "dressed in a coat of mail, with his sword at his side, mounted on a chestnut-coloured charger and surrounded by his generals and his troops", this was the first time that "the eagle standard was unfurled". In 326/938, Muḥammad b. Hāshim al-Tudjībī had the honour of accompanying him on horseback from the caliphal palace to the residence at al-Ramla. For the attack on Osma and on Ega, the caliph had his *maẓall* raised. It would thus appear that we have here a tent or a fixed canopy and that the *maẓall* is synonymous with the *ḳubba*. But there was also a mobile "parasol" or sunshade, for at the time of the attack on Calatayud, al-Nāṣir rode along until the evening in full exposure to the sun (*ghayr muẓallal*). The caliph used to travel along surrounded by guards, who on one occasion killed a madman who threw himself at his mount's head. The caliphal procession was regarded as something of a serious occasion, and imitating or parodying it was considered to be a "crime" on the part of al-Nāṣir "when he set astride a mount his female buffoon Rasīs, rigged out in a *ḳalansuwa* and a sword" (*Muḳtabas*, v, 22-3, 34, 109, 124, 225, 269, 287). Kettledrums were known and must have formed an element of the procession since al-Nāṣir sent some of them to the rallied Maghribīs (*ibid.*, 239, 290, 312).

In 361/972, the street of the Furn Burriel proved too narrow for the procession of al-Ḥakam II; it was after one of these march-pasts that he ordered the burning of the Berber saddle of one of his *ghulāms*. Surrounded by his chief *fatās*, his approach was regulated by the *aṣḥāb al-madīna* of Cordova and al-Zahrāʾ, and the people kissed the ground and greeted and blessed the caliph before making known their petitions. The route was always "lined with the troops". To march past was a signal honour which was given to the emigrés Djaʿfar and Yaḥyā b. ʿAlī, who marched along preceded by the heads of the fallen Zīrids and by flags and escorted by the troops, Abu 'l-ʿAysh, the *fatā* Fāʾiḳ and Ghālib, returned victorious from his campaigns in the Maghrib. The *maẓall* continued to be an attribute of the sovereign which he delegated for the expedition against the Madjūs [*q.v.*] in 361/972 or else to the Dhu 'l-Sayfayn Ghālib (*Muḳtabas*, vi, 45, 67, 79, 115, 152, 173, 190, 195-6, 212).

In 387/997, after having thwarted the plot of Ṣubḥ, al-Manṣūr [*q.v.*] decided to show to the people the caliph Hishām II "clothed in a *ḳalansuwa* wound round with a white turban, whose ends were flowing free, and with a sceptre in his hand" (*muʿammam^an^ ʿalā 'l-ṭawīla sādil^an^ li 'l-dhuʾāba wa 'l-ḳaḍīb fī yadihi*); to his left rode forward al-Manṣūr, preceded by the *ḥādjib* ʿAbd al-Malik who went on foot, followed by the army, *djund*, *ghilmān* and *fityān*, "in front of an enormous crowd" (Ibn Bassām, *Dhakhīra*, vii, 73; *Dhikr*, 156). In 393/1003, al-Muẓaffar went forth "armed from top to toe in a new coat of mail, with a new golden helmet on his head, surrounded by generals, freedmen, etc." (*Bayān*, iii, 5). The assassination of ʿAlī b. Ḥammūd in his bath was discovered because "the army was waiting for the order to march forth, with its standards unfurled and the kettledrums ready" (*Dhikr*, 170). If Ibn ʿAmmār [*q.v.*] entered Silves at the head of "a splendid procession, followed by black slaves and guards", al-Muʿtamid [*q.v.*] mockingly made him enter Cordova "in the most shameful manner, mounted on a mule, between two sacks of straw, bare-headed and loaded with fetters, and having ordered everybody, nobles and plebs, to come out and see the spectacle" (al-Marrākushī, *Muʿdjib*, 80, 86). When the *ḳāḍī* Ibn Djaḥḥāf [*q.v.*] of Valencia got rid of al-Ḳādir b. Dhi 'l-Nūn [*q.v.*], "he behaved like a sovereign ruler, surrounded by royal pomp ... he only mounted his horse when preceded by black soldiers and guards, escorted by troops, whilst his creatures decorated the streets, shouting out blessings and praises" (Ibn ʿIdhārī, *Nuevos fragmentos* ..., 69-70).

The processions of the Almohads or Muwaḥḥidūn [*q.v.*] were rich and complex. The caliph rode forth surrounded by the great leaders of the Almohads, preceded by a richly-caparisoned camel bearing the Ḳurʾān of ʿUthmān and followed by another with that of the Mahdī. The caliph was accompanied by his sons, standard-bearers and a hundred kettledrummers, and followed by the high dignitaries of state. The caliph would mount at the entrance of his tent or his residence, whilst the vizier walked at the side of his stirrup. The order of precedence was immutable and fixed by custom (*ʿāda*) (Ibn Ṣāḥib al-Ṣalāt, *al-Mann bi 'l-imāma*; al-Marrākushī, *Muʿdjib*; Ibn ʿIdhārī, *Bayān*, ed. Huici Miranda, Tetouan 1963). Certain items of clothing were special to the caliph. In 582/1186, during his campaign of Gafsa, "al-Manṣūr inspected his retinue and observed that the majority of his brothers and uncles had distinguished themselves by wearing violet-coloured mantles and musk-coloured burnouses (*libās al-ghafāʾir al-zabībiyya wa 'l-barānis al-miskiyya*). He reproached them for this, since these adornments formed part of the caliph's prerogatives of state, whether he were mounted on horseback or seated in his audience chamber ... he reminded them of the usages of royal power which they should respect and should refrain from imitating the royal privileges and using the royal colours". In 568/1172, during the siege of Huete, Abū Yaʿḳūb was "surrounded by his guard, accompanied by the sons of the *djamāʿa* and by those of the Fifty, by the *ahl al-bayt* and by the slaves; behind him came his brother, the Sayyid Abū Ḥafṣ and his other brothers, followed by standards and by a hundred kettledrums playing" (*Mann*, 493). When in 578/1182 his remains were brought from Santarem to Seville, the great men of state, in order to conceal his death, "began to walk, in accordance with the customary procedure, at the side of the animals bearing his litter, then they mounted their horses and the litter was covered with a green flag" (*Muʿdjib*, 192).

We do not possess any exact information about the processions of the Naṣrids [*q.v.*]; one can only suppose that they were very simple, in view of the exiguousness of their territories. Ibn Khaldūn seems to confirm this, mentioning that "the Banu 'l-Aḥmar used only seven musical instruments in their processions".

3. In Iran

From ancient times, processions were connected with court ceremonial. Religious and triumphal processions are illustrated on ancient monuments. In Islamic times, the purpose of processions was mainly to emphasise the glory and power of the ruler. Only those concerned with the ruler and his entourage will be considered in this article. (For the Muḥarram processions see TAʿZIYA.) On the whole, processions do not appear to have been highly organised, but often to have consisted of a great concourse of men, mainly mounted but also on foot. Only in the immediate vicinity of the ruler was there a certain order and discipline. It was customary for the ruler to ride in procession from time to time to the Friday mosque for the performance of the Friday prayers and also to the *muṣallā*, the place outside the town where prayers were held to celebrate the breaking of the fast at the end of Ramaḍān (*ʿīd al-fiṭr*) and on the *ʿīd-i ḳurbān* (*ʿīd al-aḍḥā*). On such occasions, he would be accompanied by a cortège formed by his officials, officers and followers, and standard-bearers would bear his standards before him (*liwāʾ*, *ʿalam* [*q.v.*]; see also Spuler, *Iran*, 349). Sometimes a parasol (*čatr*, see MIẒALLA) would be held over his head.

Whereas the mule was customarily the mount of the caliph and religious dignitaries, the horse was the mount of him who held temporal power. The point at which a visiting ruler or envoy dismounted was a frequent cause of contention and the privilege of remaining mounted when entering the presence of another ruler was eagerly contested (see further Spuler, *Iran*, 343). ʿAḍud al-Dawla, the Būyid, sent a message to the caliph al-Ṭāʾiʿ in 367/977-8 asking permission to enter the court (*ṣaḥn*) of the caliph's palace (*dār al-khilāfa*) mounted (Faḳīhī, *Shāhinshahī-i ʿAḍud al-Dawla*, Tehran, AHS 1347/1969, 59; Hilāl al-Ṣābī, 80).

The custom of having a saddled horse (*asb-i nawbatī*, *faras al-nawba*) at the palace gate on which the ruler could mount in an emergency or on other occasions apparently existed from the 2nd century A.H. The practice appears to have been started by Abū Muslim. According to Djūzdjānī, a saddled horse was always kept ready at the gate of the palace which had been built for him in Marw-i Shāh-Djahān until the Mongol invasion in 617/1220-1 (*Ṭabaḳāt-i Nāṣirī*, ed. ʿAbd al-Ḥayy Ḥabībī, Kābul 1964, i, 107; see also Muḥammad Taḳī Dānishpazhūh, *Asp-i nawbatī bar dar-i kākh-i Abū Muslim*, in *Rāhnamā-yi kitāb*, xii [AHS 1348/1967-8], 225-8). The anonymous author of the *Mudjmal al-tawārīkh* states that the ʿAbbāsid caliph al-Manṣūr mounted the *asb-i nawbatī* during operations against the Rāwandīs (ed. Malik al-Shuʿarāʾ Bahār, Tehran AHS 1318/1939-40, 329). The Sāmānid rulers Aḥmad b. Ismāʿīl (295-301/907-14) and Naṣr II (301-31/914-43) always had a saddled horse ready at the gate of the palace (Spuler, *Iran*, 352; see also Browne, *LHP*, i, 317). The Saldjūḳs of Kirmān also appear to have kept a saddled horse ready. Afḍal al-Dīn Kirmānī relates an occasion when Muḥammad b. Arslānshāh (537-51/1142-56) gave the *asb-i nawbatī*—an Arab horse with *maghribī* harness—to one of his intimates, Mukhtaṣṣ al-Dīn ʿUthmān (*Badāyiʿ al-azmān wa waḳāyiʿ Kirmān*, reconstructed text by Mihdī Bayānī, Tehran AHS 1326/1947-8, 26; Muḥammad b. Ibrāhīm, *Tārīkh-i Saldjūḳiyān-i Kirmān*, ed. Th. Houtsma, Leiden 1886, 31).

Whether the *asb-i nawbatī* was used for processions or not, saddled horses, magnificently caparisoned, were an important part of royal pageantry. They were also often given by rulers, together with *khilʿas* [*q.v.*] to high officials, visiting envoys and others [see MARĀSIM. 3]. The Ghaznawids kept many elephants, and Masʿūd probably more often rode an elephant than a horse on ceremonial occasions. Bayhaḳī states that when Masʿūd went from Ghazna on 5 Shawwāl 422/29 July 1031 to the Dasht-i Shābahār to hold a *maẓālim* court, he was mounted on an elephant. It was an occasion of great pomp and splendour. Three hundred *ghulāms*, magnificently apparelled, and many elephants and led horses, including 30 caparisoned with jewel-encrusted harness and 50 with golden harness, were in his train. The *ghulāms* of the palace, equipped with bows and arrows and golden and silver staffs went on foot in front with armour-bearers from Marw and 3,000 footmen of various origins and other soldiers and the notables and the "pillars of the state" (Abu 'l-Faḍl Bayhaḳī, *Tārīkh-i Masʿūdī*, ed. ʿAlī Akbar Fayyāḍ, Mashhad AHS 1350/1971, 372-3).

When the ruler rode out to a garden or to summer quarters, or made a progress through his domains, he would be accompanied by his retinue. Royal marriages and betrothals, the sending of the marriage portion of the bride (*mahr*, *ṣadāḳ*), and funerals were other occasions for processions. When the daughter of the Ḳarā Khānid Ḳadīr Khān Yūsuf of Turkistān, who had been betrothed to Masʿūd b. Maḥmūd, was brought to Ghazna in Shawwāl 425/August-September 1034, the *martabadārān* (for the meaning of this term, see MARĀSIM. 3), the head of the royal guard (*wālī-yi ḥaras*) and the officials charged with the reception of envoys (*rasūldārān*) went out with led horses to meet the envoys of Ḳadīr Khān, who had come with the bride, and to bring them to Ghazna. The city was decorated from end to end and when the envoys arrived coins were cast at their feet. Then, at the time of the afternoon prayer, the women of the great men of Masʿūd's court, accompanied by eunuchs, set out to greet the bride with a cortège "such as no one could remember" (Bayhaḳī, 548-9).

Processions took place when envoys and others came to the ruler's court. When the caliph's envoy arrived at the court of Masʿūd b. Maḥmūd in Balkh at the end of 422/1032 to announce the death of the caliph al-Ḳādir and the accession of al-Ḳāʾim, he was brought with great ceremony into the presence of Masʿūd on 1 Muḥarram 423/19 December 1031. Four thousand palace *ghulāms*, magnificently attired, were drawn up at the palace in several lines; half of them held silver maces and half were armed with swords and carried bows and three wooden arrows. Three hundred *ghulāms* of the royal bodyguard with golden maces stood near the throne. The great men of the court, provincial governors and chamberlains in their court dresses were also there. The *martabadārān* stood outside the palace. There were also large numbers of elephants [see FĪL. 2. As beasts of war]; soldiers with their arms and standards were drawn up in two lines, between which the envoy was to pass. The *rasūldār* with led horses and a great crowd went to fetch him from his lodging, mounted him on one of these horses and, amid the sound of drums and trumpets, brought him to the palace where Masʿūd was awaiting him (*ibid.*, 382). On the following Friday, Masʿūd went to the Friday mosque for the pronouncement of the *khuṭba* in the name of the new caliph. The scene was again one of great splendour. The procession was led by 4,000 splendidly dressed foot *ghulāms*, followed by the Ghaznawid general Beg Toghdī and the royal *ghulāms* with the ruler's banner, the *martabadārān* and chamberlains. After them Masʿūd, preceded by the chief chamberlain, set out along the road from the palace to the mosque, which

had been decorated on his orders by the notables of the city. Behind him came his chief minister, more chamberlains and the notables of the court. They were followed by the *ra*ʾ*īs*, Kh^w^ādja ʿAlī Mīkālī [see MĪKĀLĪS], with the caliph's envoy on his right, the *ḳāḍīs*, *fuḳahā*ʾ and ʿ*ulamā*ʾ and the headman (*za*ʿ*īm*) of Balkh. As the procession slowly approached the mosque, "no sound was heard except the sound of the whips and the shouts of the *martabadārān* to clear the way" (*ibid.*, 384-5).

The following year when an envoy from al-Ḳāʾim reached Rayy on his way to Masʿūd's court, with a diploma from the caliph, Masʿūd ordered a reception (*istiḳbāl*) to be prepared for him. An escort was sent with him from Rayy and when he reached Nīshāpūr on 8 Rabīʿ I 424/11 February 1033, the *fuḳahā*ʾ, *ḳāḍīs* and notables of the city went out to meet him. On the following day, the *martabadārān* and *rasūldārān* also went to welcome him. The road from the Rayy gate to the Friday mosque was decorated, as also was the bazaar. *Dirhams* and *dīnārs* and valuable objects were scattered before him. A week later, after the envoy had rested from his journey, he was brought to Masʿūd's presence with great ceremony. Crowds assembled along the road from the residence of the envoy to the gate of the garden in Shādyākh, where Masʿūd was to receive him. The soldiers, notables and army leaders were mounted and held standards in their hands. Heavily-armed foot soldiers stood in front of the mounted soldiers. The *martabadārān* were drawn up in two rows. Army leaders (*sālārān*) and chamberlains were also present. A chamberlain, together with several attendants, led horses and a mule, was taken early in the morning by the *rasūldār* with twenty *khil*ʿ*as* to the envoy's residence to bring him to Masʿūd, who was to receive him sitting on his throne on a platform (*ṣuffa*). The *rasūldār* caused the envoy and the eunuch (*khādim*), who accompanied him, to mount and had the *khil*ʿ*as* which the caliph had sent with them put in boxes on mules. The cortège set out amid the sound of drums and trumpets preceded by treasury officials (*shāgirdān-i khazīna*) and eight horses with golden saddles and harness led by their bridles. Then came the envoy, preceded by the royal chamberlains and *martabadārān*, followed by the envoy and behind him two horsemen, one carrying a standard and the other the diploma and letter of the caliph rolled up in black brocade (*ibid.*, 471-2; see also MARĀSIM. 3).

A new feature of royal ceremonial was introduced by the Saldjūḳs, namely the *ghāshiya* [*q.v.*]. This was a kind of saddle-cover, probably covered with precious stones, which was carried before the sultan in processions. This custom appears to have died out in Persia after the Saldjūḳs, but was found later in Egypt (see GHĀSHIYA, and also Ibn Baṭṭūṭa, *Travels*, tr. H.A.R. Gibb, Cambridge 1956-71, iii, 664). When Ṭoghrïl Beg brought the ʿAbbāsid caliph al-Ḳāʾim back to Baghdād after he had left the city on the attack of al-Basāsīrī in 450/1059, he dismounted at the gate of Baghdād but was told by the caliph to remount (Rāwandī, *Rāḥat al-ṣudūr*, ed. Muḥammad Iḳbāl, London 1921, 110, and see Spuler, *op.cit.*, 343). On entering Baghdād, it appears that Ṭoghrïl Beg again dismounted and carried the *ghāshiya* in front of the caliph until they came near to the caliph's palace, when Ṭoghrïl took the bridle of the caliph's mule and walked beside him until they entered the Bāb al-Ḥudjra (the Privy Chamber Gate) (Ṣadr al-Dīn al-Ḥusaynī, *Akhbār al-dawla al-Saldjūḳiyya*, ed. Muḥammad Iḳbāl, Lahore 1933, 21).

On an earlier occasion, when Ṭoghrïl Beg was to have an audience with the caliph in 449/1057-8, the caliph's boat was sent to bring him down the Tigris to the caliph's palace. He was accompanied by his intimates (*khawāṣṣ*), some in boats and some mounted on elephants. Alighting from the boat, Ṭoghrïl mounted one of the caliph's horses which had been sent to meet him and entered the caliph's palace, preceded by the sons of Abū Kālīdjār b. Būya and Ḳutlumush, army leaders and Daylamīs and nearly 500 unarmed Turkish and Gīlānī *ghulāms*. When he reached the gateway of the passage (*dihlīz*) leading to the audience hall, he was kept waiting for a long time on his horse until the gate was opened for him and then he entered on foot (Sibṭ Ibn al-Djawzī, *Mirʾāt al-zamān*, ed. Ali Sevim, Ankara 1968, 25). On a subsequent occasion in Muḥarram 455/January 1063 when Ṭoghrïl came to Baghdād, the caliph excused himself from going to meet him and sent instead his *wazīr* Ibn Djahīr, who took with him two horses and other presents. On the following day, Ṭoghrïl entered the Dār al-Mamlaka in a boat sent by the caliph (*ibid.*, 97).

In 480/1087, when the caliph invited Malikshāh to the Dār al-Khilāfa, he sent a boat for him. Disembarking at the Bāb al-Ghurabāʾ, Malikshāh mounted a richly caparisoned horse sent for him by the caliph, which carried him to the gate of the caliph's audience chamber (*ibid.*, 244-5). In Muḥarram of that year, when Malikshāh sent the marriage portion (*djahāz*) of his daughter to the caliph, to whom she had been betrothed, it was carried by 130 camels (a second instalment being apparently carried by 74 mules on the following day), preceded by 30 led horses, all splendidly caparisoned. The cortège was led by Saʿd al-Dawla Gōhar-Āʾīn, the *shiḥna* of Baghdād, and the *amīr* Bursuḳ. The city was decorated for the occasion and as the cortège went through the Nahr Muʿallā quarter the people cast *dīnārs* and precious stuffs before it. The sultan had meanwhile left Baghdād on a hunting trip, and so the caliph sent his *wazīr* Abū Shudjāʿ to Terken Khātūn, Malikshāh's chief wife and mother of the bride, with some 300 men bearing lanterns with a litter to bring the princess to the caliph's palace. She set out by night riding in the litter, surrounded by 200 Turkish slave girls on splendid mounts, preceded by the women of the *amīrs* and others, led by Niẓām al-Mulk, the *mustawfī* Abū Saʿd and the *amīrs*, all bearing lanterns (*ibid.*, 245-6; Ibn al-Athīr, *sub anno* 480; Ibn al-Djawzī, *al-Muntaẓam*, Hyderabad 1359/1940-1, ix, 36-7).

Processions do not appear to have been a special feature of Ilkhānid or Tīmūrīd ceremony. Women of the royal house took part from time to time in public ceremonies. Clavijo describes the cortège which accompanied Tīmūr's chief wife on the occasion of a public audience which he gave in the Great Pavilion in Samarḳand. She was attended by some 300 women and eunuchs. "Over the head of the princess was borne a parasol, a man holding it, and the stick was a pole the size of a lance. This parasol was of white silk, dome-shaped and round like the top of a tent, with wooden ribs that kept the stuff extended: it was very carefully held over her head as she walked to keep the sun off her face. In front preceding her and the ladies of her suite marched many eunuchs ... Thus the procession advanced entering the Pavilion where Timur was already seated. The Great Khanum now took her place beside his Highness but slightly behind on a low dais" (*Embassy to Tamerlane 1403-1406*, tr. from the Spanish by G. Le Strange, London 1928, 259-60). Others of the Tīmūrid princesses in succession then came into the pavilion with similar proces-

sions (*ibid.*, 260-1). Clavijo also mentions the presence of elephants at Tīmūr's court. They appear to have been used to entertain visitors (*ibid.*, 257).

Information on processions and court ceremonial in Ṣafawid times is fuller than for earlier periods; and it would seem that both became more elaborate. Much importance was attached to the procedure for welcoming the shah when he returned to his capital after some expedition or when he entered some city, and similarly for welcoming honoured guests. This ceremony was known by the term *istiḳbāl*. When Shāh ʿAbbās returned to Ḳazwīn in 1007/1598 after crushing the Özbegs in Khurāsān, Sir Antony Sherley and his party, which included, among others, Abel Pinçon, had already been some three weeks in Ḳazwīn awaiting the return of the shah. When the shah approached within five miles of the city, he encamped. He ordered Sherley and his party to come out two miles outside the gates of the city to meet him. Abel Pinçon describes the shah's triumphal entry in the following words. "When our company had approached to within five or six steps of the King, the steward made a sign to Monsieur Sherley, his brother and myself to dismount in order to kiss His Majesty's feet ..... He was five or six steps ahead of a large squadron of cavalry, and while he stretched out his leg he pretended the whole time to look in another direction. After we had kissed his boot he spurred his horse sharply and, guiding it dexterously, dashed across the camp after the manner of the country .... In his hand he carried a battle-axe, playing with it, carrying it now high, now low, and now and then placing it on his shoulder with rather strange movements.

"In his triumphal entry he caused to be carried on the end of strong and heavy spears twenty thousand heads of Tartars whom he had defeated in Usbeg, which appeared to me a hideous spectacle. After those who carried the heads came young men dressed like women richly decked, who danced in a manner and with movements which we had never seen elsewhere, throwing their arms about and extending them above their heads even more than they raised their legs from the ground, to the sound of *atabales* (sc. drums), flutes and certain instruments which are provided with strings, and to the sound of a song composed on the victory which they had gained, this being sung by four older women. In the midst of these young men were two grown men who carried while dancing, two lanterns like those of the largest galleys at the end of a stick which was attached to their girdle. On these lanterns were painted flowers, crowns, laurel-leaves, and birds, and along the stick hung mirrors and other glittering things. Among all this crowd was a large troop of courtesans, riding astride in disorder, and shouting and crying in every direction as if they had lost their senses, and frequently they approached the person of the King to embrace him. Behind the noble squadron there came on foot a number of pages who carried good bottles and flasks of wine and cups, which they presented very frequently to the King and his nobles. On either flank followed the cavalry, and in the first ranks there were four trumpeters who played on certain trumpets and sackbuts of extraordinary dimensions, which gave a bitter and broken sound very alarming to hear. The cavalry numbered two thousand five hundred horse; the first and those which were near the King were in good condition, covered with large cloths of brocade on which were represented angels and horses and other animals of all kinds, after the manner in which they decorate their materials in this country. All the inhabitants of Casbin and of the neighbourhood were come to receive their King two miles outside the gates of the city. They were separated into two groups between which the King was to pass with his triumphal retinue. And so the King on entering the town would go straight to the Midan (sc. the *maydan*), which is the public square, in which they have horse-races and training and shooting with the bow and other exercises" (*Sir Antony Sherley and his Persian adventure, including some contemporary narratives relating thereto*, ed. E. Denison Ross, London 1933, 153-5. See also the accounts of William Parry, in *ibid.*, 116-7, and George Manwaring, in *ibid.*, 204-6).

Chardin, describing Shāh Sulaymān's coronation in Iṣfahān in 1077/1677, states that after the ceremony he sat until 10 o'clock in the Tālār-i Ṭawīla to receive the homage of the grandees of Iṣfahān who came to kiss the ground before him, and then "rising from his Seat took Horse; and that was the first time that ever he rode out of the Place where he was born [having been immured in the *ḥaram*]. And according to the Custom of the *Persians*, he made a Cavalcade round his Palace very leisurely, and with little attendance, riding in the middle of the distance of twenty Paces from them that marched before, and those that followed after, only twelve Footmen went on each side before and behind his Horse; and all this to the end he might be the better seen by the People" (*The coronation of Solyman III. The present king of Persia*, published with *The Travels of Sir John Chardin into Persia and the East Indies*, London 1691, 56). Normally, however, when the shah rode abroad he was accompanied by a large retinue. Kaempfer describes the procedure under Shāh Ṣafī (by which name Shāh Sulaymān was known after his second coronation). In the case of his daily ride, when he came out of the *ḥaram* and prepared to proceed along the Čahār Bāgh, the master of the horse would lead out three horses, one of which the ruler would choose. Two groups of the bodyguard, on foot and armed, would set out in front, followed by the *ishiḳaḳasi-bashi* on horseback and the *ḳurči-bashi*, and behind them some twenty mounted troops with their leader, all wearing red twelve-sided head-dresses, adorned in the case of some by a magnificent plume of feathers. They rode without discipline, but watched over the safety of the shah. The shah followed, surrounded by twelve *shāṭirs* (runners); behind him rode the grand *wazīr* or some other high dignitary. The presence of the shah was indicated by his *čatr* carried by a standard-bearer. Among the retinue, not in any special order, there would also be some twenty eunuchs, some white, some black, who carried the weapons, water-pipe and other paraphernalia of the shah. Then came those courtiers whom the shah had bidden to his table and the sons of the great men, for whom it was considered an honour to be allowed to accompany the shah. When possible, there was also a physician and an astrologer present. Officials armed with axes would be sent in front of the procession to remove any obstacles in the way of the shah's progress (*Am Hofe des persischen Grosskönigs 1684-1685*, tr. W. Hinz, Tübingen-Basle 1977, 237-8. Cf. also Du Mans, *Estat de la Perse en 1660*, ed. Schefer, Paris 1890, repr. 1969, 33).

On certain special occasions, the shah also rode out. Kaempfer describes the celebration of the *ʿĪd-i ḳurbān* in 1095/1684 in the Hazār Djarīb district of Iṣfahān. A large and fine camel was prepared for the sacrifice. For ten days preceding the *ʿīd* on 10 Dhu 'l-Ḥidjdja, it was paraded through the different quarters of the town. On the day of the sacrifice it stood in the appointed place, with its feet tied, surrounded by thousands of people, waiting for the arrival of the

shah. As soon as he arrived, he dismounted and was given a lance with which he struck the camel. After its throat had been slit and its head cut off, its corpse was divided into twelve parts, one for each quarter of the city. The shah then remounted and rode back as he had come, while the people of the city assembled round their banners and accompanied their portion of the camel, which was laid on a horse and went before them to their several quarters to the sound of trumpets and drums (*op.cit.*, 239-40; see also Du Mans, *op.cit.*, 74-5; *The Travels of Monsieur de Thevenôt into the Levant*, London 1687, 107 (*bis*)-108(*bis*)).

Exceptionally, the shah rode out himself to welcome distinguished guests. In the case of a guest of royal blood, he would go half-a-mile, having sent his representative with a company of *ḳurčis* one *farsakh* (or one hour's ride) in advance. The townspeople, in festal dress, would line the streets and spread precious stuffs in front of the horses of the royal guest. Such was the procedure when the Özbeg khān ʿAbd al-ʿAzīz came back after performing the *ḥadjdj* in 1670 and when Akbar the son of Awrangzīb came to Persia in 1099/1688 (Kaempfer, *op.cit.*, 242).

If the shah went out hunting and took his women with him, he was accompanied by a large cavalcade, and when he moved to summer quarters in Māzandarān an enormous train accompanied him. Men would be sent in front to choose a suitable place for the camp. When they came back with their report, if the shah approved, some 7,000 camels with tents, carpets and household equipment would be sent in advance. Some days later the *ḳuruḳčis* would follow to clear all males from the neighbourhood of the road along which the royal cavalcade would travel. The shah's women, or those of them whom he decided to take with him, travelling in litters and accompanied by eunuchs, would follow. After them would come the shah with his retinue. In front would be the master of the horse with his subordinates and five or six led horses richly caparisoned, with sixty or so of the bodyguard, also mounted. Then would come the standard-bearers followed by the *ishiḳaḳasi-bashi*, the *ḳurči-bashi*, and the master of the hunt (*mīr-shikār*), accompanied by falconers with falcons on their wrists, and the chief kennelman with hunting-dogs led by attendants on foot. Then would come the shah with twelve personal attendants. Immediately behind the shah came the great men of the court, and finally numerous mounted slaves, among them the water-pipe carriers and those in charge of boxes of ice, sugar and other condiments carried on mules, and carpet-spreaders with carpets, mats and cushions for use on the way and light tents, and lastly water-bearers with water-pipes on camels or mules for the use of men and animals. Twelve dancing girls of great beauty, who were always present when the shah went on a journey, followed several hours behind (*ibid.*, 242-5). The *Dastūr al-mulūk* mentions an official called the *ḳurčı-yi rikāb*, who was always in attendance on the shah. When the latter went riding, it was the duty of the *ḳurči-yi rikāb* to hold the bridle of the horse which the shah was to mount with one hand and to help him mount with the other. In the royal assembly, the *ḳurči-yi rikāb* sat below the *muḥtasib al-mamālik* (ed. Muḥammad Taḳī Dānishpazhūh, in *Rev. de la Faculté des lettres et des sciences humaines*, Tehran, xvi/3 [1968], 318).

Hanway describes the procession of the Afghān Maḥmūd on his entry to Iṣfahān after Shāh Sulṭān Ḥusayn had resigned his throne to him on 29 Dhu 'l-Ḥidjdja 1134/11 October 1722): "The procession was opened by ten officers on horseback, and about two thousand cavalry, among whom were several lords of the PERSIAN court. Next came his master of the horse, at the head of fifteen led horses magnificently caparisoned: this officer was followed by some musketeers on foot, and these by a thousand common infantry. Immediately after came the grand master of the ceremonies, in the midst of three hundred negroes dressed in scarlet cloth: these negroes had been chosen from among the slaves of ISFAHAN to compose the conqueror's guard. Forty paces from thence was MAGHMUD, mounted on a horse, of which the VALI of ARABIA had made him a present, on the day of the abdication. The unfortunate HUSSEIN rode on his left. The princes were followed by about three hundred pages on horseback" (*The Revolution of Persia*,[3] London 1762, ii, 182). Maḥmūd's chief officials followed, and behind them came the principal officials of the dethroned monarch. The procession was closed by a hundred camels carrying arquebuses, preceded by a great band of musicians and followed by nearly six thousand horse. Having crossed the Shīrāz bridge, Shāh Sulṭān Ḥusayn was sent to his place of confinement, and Maḥmūd continued alone. Arriving at the gates of the town the inhabitants laid rich stuffs under his horse's feet and filled their air with perfumes. The guns on the camel's backs were often fired as they marched along; "and in the intervals, the ten AFGHANS who walked at the head of the procession, pronounced loud imprecations against the followers of ALI" (*ibid.*).

The practice of *ḳuruḳ*, i.e. the prohibition of men and boys from any place where the king's wives were to pass, though probably not new, was rigorously enforced under the Ṣafawids and caused great inconvenience to the population. Olearius states that when the shah went hunting, taking his *ḥaram* with him, runners were sent in advance through the streets so that the population remained in their houses and the streets were empty (*Vermehrte Newe Beschreibung der Muscowitischen und Persischen Reyse*, Schleswig, 1656, ed. Dieter Lohmeier, repr. Tübingen 1971, 529). Chardin claims that Shāh Ṣafī commanded no less than 62 *ḳuruḳs* as he went abroad with his wives visiting places around Iṣfahān during the five months from his coronation till the year 1078/1667 (*Coronation, op.cit.*, 77. Cf, also Jean-Baptiste Tavernier, *Voyages en Perse*, Geneva 1970, 186-7, 188). The custom continued under later rulers. According to Hanway, the consequences to those who failed to get out of the way when notice of Nādir Shāh's approach was given were sometimes fatal (*op.cit.*, i, 169).

Under the Ḳādjārs, processions took place very much on the same sort of occasions as under earlier rulers. Special importance was attached to the ceremony of *istiḳbāl*. This was *de rigueur* when the shah or one of the princes visited some town or village or when he returned to his seat of government after absence on some expedition or other. On these occasions, civil and military officials and local notables would take part in the *istiḳbāl*, while wrestlers, jugglers, tumblers and other would display their skills; the slaughter of oxen, cows and sheep and the breaking of vessels containing sugar candy in the way of the prince was also customary. Morier states that when Fatḥ ʿAlī approached Tehran on his return after an expedition to Khurāsān in 1815, rows of well-dressed men were drawn up at some distance from the road and made low bows as he passed, while members of the religious classes were drawn up nearer the city. Oxen and sheep in great numbers were sacrified as he passed and their heads thrown under his horse's feet. Glass vases, filled with sugar, were broken before him

and their contents strewed on his road. Dervishes made loud exclamations for his prosperity, while wrestlers and dancers twirled their clubs and performed all sorts of antics to the sound of drums. "Amongst the crowd", Morier continues, "I perceived the whole of the Armenians headed by their clergy bearing crosses, painted banners, the Gospels, and long candles. They all began to chant Psalms as His Majesty drew near; and their zeal was only surpassed by that of the Jews, who also had collected themselves into a body, conducted by their rabbis, who raised on high a carved representation of wood of the tabernacle.... In all the bustle I perceived the King constantly looking at the watch carried by Shatir Bashi, anxious that he should enter the gates exactly at a time prescribed by his astrologers" (*A second journey through Persia, Armenia, and Asia Minor to Constantinople 1810-16*, London 1818. 387-8).

Fraser, describing the return of Fatḥ ʿAlī to Tehran in April 1833 after a visit to Ḳumm, states that half the town went out to welcome him, while the other half lined the bazaars to make a show upon his entrance. "A confused assemblage of horsemen of all ranks and distinctions, from whom were continually issuing individual pairs to skirmish and show off, were followed by those of more respectability ... gholaumpeishkhidmats, nassakchees, and personal attendants on his majesty; then a number of shatirs, or running footmen; and then after a long vacant space came Futeh Alee Shah himself, mounted on a horse ... Behind, at a due distance, came a group of princes and nobles ... a dense crowd of horsemen, gholaums, jeloodars, peishkhidmats, and servants of all sorts, brought up the rear, crossing the road and country in a line at right angles to the line of march; from these it was that most of the skirmishers issued ... tearing across the plain, and firing guns at each other or nothing at all, and showing off some very fine horses with great spirit and address (*A winter's journey (Tatar) from Constantinople to Tehran*, London 1838, ii, 76ff.).

It was the custom of Fatḥ ʿAlī to march out of his capital on the Naw Rūz, attended by his ministers and as many of the army as could be assembled [see MARĀSIM. 3]. He would be mounted sometimes on a horse, sometimes on an elephant (cf. Morier, *A journey through Persia*, 210). Among the amusements were horse-racing (Malcolm, *History of Persia*, London 1829, ii, 405). Naw-Rūz audiences were also held in the capital. Ker Porter describes the royal procession as it came into the audience hall on one such occasion. First, the elder sons of the shah entered, ʿAbbās Mīrzā went to the right side of the throne, followed by his brothers; his younger brothers then took up their places opposite. They were all superbly dressed. Near the front of the palace, mullas and astrologers were drawn up. Fatḥ ʿAlī's entry into the gate of the citadel was announced by a volley fired by the camel corps and the clang of trumpets and "the appalling roar of two huge elephants" (*Travels in Georgia, Persia, Armenia, ancient Babylon*, London 1921, i, 320ff.

The Naw-Rūz races were a state occasion under Nāṣir al-Dīn S̲h̲āh, who would attend them either on horseback or in a carriage drawn by eight horses (Muʿayyir al-Mamālik, *Yāddās̲h̲thā-ī az zindagānī-i k̲h̲uṣūṣī-i Nāṣir al-Dīn S̲h̲āh*, Tehran n.d., 120-1). When the shah mounted his carriage at the races, or his horse to go to his special stand, the camel corps would fire a volley. Muʿayyir al-Mamālik describes the scene in the following words. "Runners (*s̲h̲āṭirs*) on either side and the camels bearing the ruler's kettledrums would set off in front followed by the shah in his carriage. Covered in jewels and wearing the aigrette (*d̲j̲īg̲h̲a*) on his headdress, with a red parasol with diamond tassels held over him, he would look out benevolently on the people who hurried forward to welcome him. Thus, surrounded by this pomp and magnificence, he would drive up to the special stand from which he would watch the races, where the great men and ministers would be awaiting the arrival of the royal cortège" (*ibid.*, 121-2).

The reception of foreign envoys was also the occasion for processions and cavalcades. Morier states that at every place through which the Harford Jones' mission passed in 1808 on its way to Tehran, the local people came out to welcome him. They were frequently armed with pikes, matchlocks, swords and shields, and would often fire a volley as a salute (*A Journey into Persia*, 76). At Kāzirūn, "a bottle, which contained sugar candy, was broken under the feet of the Envoy's horse, a ceremony never practiced in Persia to any but royal personages" (*ibid.*, 84-5). Displays of wrestlers, jugglers and tumblers, as in the case of receptions welcoming the shah, often formed part of the *istiḳbāl*. Lady Sheil describes the welcome given to her husband in Tabrīz on his way to Tehran as envoy to the court of Persia in 1849 in the following words: "There were princes and priests, and merchants, and mollas, and mountebanks, and dervishes, and beggars; there were Koordish and Toork horsemen of the tribes, and soldiers, and Ghoolams... The cavalcade began four miles from the town, and each step brought a fresh reinforcement to the procession" (*Glimpses of life and manners in Persia*, London 1856, 86). Writing of the procedure for her husband's *istiḳbāl* in Tehran, she states: "The village we were residing in was three miles distant from Tehran, and etiquette requires the ceremony to commence four miles from the city ... A tent was pitched at the requisite distance; and my husband was accordingly obliged to return a mile towards Tabreez, to receive the congratulations of the Shah's representatives" (*ibid.*, 120-1).

The shah or one of the royal princes used to take part in the procession on the *ʿīd-i ḳurbān*. Fraser, describing the celebration in Tehran on 20 April 1833, states: "It was customary for the king himself, or, in his default, for one of the elder princes, with a grand cortège of the rest, and their followers, to superintend the ceremony, which consists of a procession to a particular appointed place, where a camel is provided for the sacrifice. The king or elder prince, taking a knife, draws it across the animal's throat, which is then despatched and cut up on the spot .... On the present occasion not one of the princes attended, except Saheb-keran Meerza (aged about ten) ..... nor was he accompanied by a single person of distinction.

"The first part of the show which issued from the gate was a parcel of ragamuffin musicians with kettledrums, and horrid screeching pipes, who preceded a number of mules and horses, strangely caparisoned and painted, having tawdry trappings on, and gold and silver tinsel, with ostrich feathers on their heads, and along with these came sundry flags of silk, red, green, and scarlet, and some striped like shawls; and the animals were mounted and ridden to and fro at speed by the fellows who brought them. These, as I understood, were intended to carry away pieces of the unhappy camel when he should be cut up: they were attended also by a number of dervishes, in their caps and patched robes. Next came six of the King's *kernechees*, or trumpeters, in their scarlet coats, with spears and horns; then came three or four led horses; than a couple of hundred *topechees*, or artillerymen, in

two lines, forming a street, through which rushed thirty or forty furoshes with sticks, and gholaums with shields. After these came the little prince, gallantly dressed in a scarlet coat, well bedizened with embroidery of pearls and diamonds, his sword-belt to match, and having handsome diamond ornaments on his cap and on his breast, and a pretty little sabre depending from his side. He was mounted on a fine horse .... Behind the prince at due distance, came a rabble of horsemen, tofungchees, etc...... Before the gates of the Nigaristan ..... the poor camel lay bound and ready" (*A Winter's journey*, ii, 73-5; see also Muʿayyir al-Mamālik, *op.cit.*, 93-5; and for a description of the procession in Iṣfahān, see Mīrzā Ḥusayn K͟hān b. Muḥammad Ibrāhīm K͟hān Taḥwīldār, *D͟jug͟hrāfiyā-yi Iṣfahān.* ed. Manučihr Sotoodeh, Tehran AHS 1342/1963, 88-90).

Towards the end of the 19th century the tendency was for royal processions to become less elaborate. Curzon writes that formerly the Shah's court ceremonial was a blaze of splendour but that "he now affects a simplicity of costume in striking contrast to his predecessors. The bediamonded sword and the flashing aigrette, which was so familiar on his first visit to England in 1873, had disappeared in 1889; and in Tehran I have seen him walking in the streets in a braid frock coat with prodigious skirts ... holding a walking stick in his hand. Upon other occasions he either appears on horseback, or, more commonly, is driven through the streets of the town in a sort of coach with glass panels drawn by six or eight white horses with henna-dyed tails. In front and behind ride a small detachment of the royal bodyguard or gholams, whose full number stands at 2,000, or two corps of 1,000 apiece, who are recognizable by their gold-braided tunics and by the muskets, wrapped up in red cases, which they wear slung across their shoulders. A number of the liveried harlequins, or royal runners ..... are also in attendance to clear a way, while the less ornamental ferashes, with their long switches, keep back the crowd" (*Persia*, London 1892, i, 396). The royal runners or *s͟hāṭirs* (whose dress was a faithful representation of that worn by the *s͟hāṭirs* of the Ṣafawid kings) preceded the shah whenever he went out riding or in his carriage (*ibid.*, i, 332).

4. In the Ottoman empire

Ottoman processions (Tk. *ālāy*) were frequently assembled on festive and solemn occasions. The Ottoman court celebrated the birth and circumcision of a prince, or the marriage of a princess, a victory of the army, a new campaign of a sultan, or his succession to the throne, the arrival of a royal guest, or an important foreign ambassador, with imperial festivities, which sometimes lasted 50 days and nights (like that of the circumcision festival of Prince Meḥmed, later Meḥemmed III, in 990/1582) or more (the festival of 853/1449, under Murād II, to celebrate the wedding of his son, Prince Meḥmed—later Meḥemmed II, the conqueror of Constantinople in 857/1453—and Sitt K͟hātūn, which continued for three months). Sometimes an occasion for a public rejoicing was created after an unsuccessful campaign or a defeat of the Ottoman army, with the intention of turning the attention of Sultan's subjects elsewhere and to falsify the result of a battle (the best examples of such festivities are in 862/1457, after Meḥemmed II was compelled to draw back from Bag͟hdād; and in 937/1530, when Süleymān the Magnificent had to retreat from the siege of Vienna; and also in 990/1582, after the failure of Murād III in the war against the Persians). The wedding and circumcision ceremonies very often and deliberately coincided with *ḳurbān bayramî* [see ʿĪd]. There were also court festivities, which were organised merely to solemnise the pilgrimage of the Prophet (among others, a recent one was in 1866, under Sultan ʿAbd al-ʿAzīz). All these festivals were enriched by spectacular and colourful processions, which consisted *inter alia*, of architectural displays, festival palms, sugar work in figures and of artificial flower gardens; these are considered below. One should note as a preliminary the following three definitions, before proceeding to examine the different types of processions: 1. *Ālāy-ı Hümāyūn*, Imperial procession. A customary procession organised when the Sultan or the Grand-Vizier started for or returned from a campaign, on a route between the palace and the barracks at Dāwūd Pas͟ha (a district in Old Istanbul). 2. *Ālāy Ḳānūnu*, Code for processions: the Ottoman code pertaining to the rules for the arrangement, order and the costuming of the viziers, scholars, high officials, staff and the military personnel, who were prescribed by the government to participate in the imperial processions. 3. *Ālāy Kös͟hkü*, Kiosk for spectacles: a kiosk built especially for the Sultan and his harem, from where they watched the processions, celebrations and the festivities. This kiosk was generally used by the Sultanas and the ladies of the court. The Sultan had a special room with attendants.

Bibliography: A detailed description of such processions is to be found in D͟jelāl-zāde, (Muṣṭafā b. D͟jelāl), *Ṭabaḳāt al-memālik ve dered͟jāt el-mesālik*, ms. Nationalbibliothek, Vienna, H.O. 41; and in Tes͟hrīfātīzādē Meḥmed b. Aḥmed's *Defter-i tes͟hrifāt*, ms. Nationalbibliothek, Handschriften-Sammlung, Mxt. 301; the processions in the festival of 1086/1675, in Edirne, under the reign of Meḥemmed IV, are given by Ḥüseyin Hezār-fenn, *Telk͟hīṣ al-beyān fī ḳawānīn-i Āl-i ʿOt͟hmān*, ms. B.N., Fonds Turc, 40; ʿAbdī, *Sūr-i pūr sūrūr-i hümāyūn*, ms. Millet Kütüphanesi, Istanbul, Ali Emirī Kit. 343; John Covel, *Diary*, ms. B.L., Add. 22,912; vivid sketches of the processions in the 18th century may be seen in *Sūr-nāme*, ms. Nationalbibliothek, Vienna H.O. 95, written for the festival of 1724, under the reign of Aḥmed III, and also in ʿĀkif Bey's *Tes͟hrīfāt-nāme*, Süleymaniye Kit. Esʿad Ef. no. 2108, written for the birth of a prince, during the reign of Muṣṭafā III, modern Tkish. tr., *Beşik Alayı*, by Şevket Rado, in *Tarih Mecmuası*, x (Nov. 1972), 4-5; for the etymology of *alay*, see Fuat Köprülü, *Bizans müesseselerinin Osmanli müesseselerine te'siri*, in *Türk hukuku tarihine dair tetkikler*, Istanbul 1931, 277, in which the author indicates that the Byzantine Greek word *alagion* is the source of the Ottoman word *alay*. In the beginning, *alagion* meant a ceremonial detachment of troops in an emperor's suite and later, in the 13th century, it meant a regiment. E. Stern, *Untersuchungen zur Verfassung und Wissenschaftsgeschichte*, in *MOG*, ii/1-2, 49, supports Köprülü's statement; an illuminating book about the processions is İ. H. Uzunçarşılı's *Osmanlı devletinin saray teşkilâtı*, Ankara 1945, 168-71; also see Özdemir Nutku, *IV. Mehmet'in Edirne şenliği*, Ankara 1972, 57-60, 62-76; the basic books on the *Ālāy Kös͟hkü* are by İbrahim Hakkı Konyalı, *Istanbul sarayları*, Istanbul 1942; Oktay Aslanapa, *Edirne'de Osmanlı devri abideleri*, Istanbul 1949; and Rifat Osman, *Edirne sarayı*, ed. Süheyl Ünver, Ankara 1957.

The different types of procession.

1. BAYRAM ĀLĀYĪ, "Holiday procession", traditionally organised to accompany the Sultan to the mosque and back to the palace, on the first days of two religious holidays, *Ḳurbān Bayramī* (festival of sacrifices) and *Sheker Bayramī* (the feast during the first three days after the Ramaḍān fast). The respective order of the participants in this procession was generally as follows:

— the *khōdjas* of the imperial palace, on foot;
— the Chief White Eunuchs, on foot;
— the Director of the Registry of landed property, on horseback;
— the second and third Accountants, on horseback;
— the Finance Minister, on horseback;
— the Master of Orders, on horseback;
— the Steward to the Grand Vizier, on horseback;
— the Grand Vizier and the viziers, on horseback, on both sides the Janissaries, on foot;
— the Steward to the chief white eunuchs, carrying a silver sceptre in his right hand, and wearing a short fur-coat, a *selīmī* turban, Tatar baggy trousers of violet velvet and a pair of Circassian shoes, on foot;
— the first and the second Masters of the horse, on foot;
— the Sultan, on horseback: on each side walked the bodyguards with their red and light brown conical hats and five-edged sceptres in their hands; lackeys and messengers; the clothing masters, wearing large wadded headgears with bejewelled crests;
— the Chief Lifeguard of the Janissaries and the Chief Clothing Master, both wearing bejewelled knitted caps with tassels, loose robes embroidered with gold threads, over it valuable robes of honour, girdles made of pearls and bejewelled daggers;
— the Head of the Black Eunuchs, wearing a *selīmī* turban, an embroidered robe with a bejewelled girdle and a four-sleeved sable skin coat;
— the Masters of the Porte, with *selīmī* turbans;
— the Chief Treasurer and the officials of the palace, wearing headgear, bejewelled daggers and knives and with bracelets of solid gold.

E. Koçu, *Osmanlı sarayında Bayram tebriki ve Bayram Alayı*, in *TM*, xii (Jan. 1972), 6-11; for an extensive article, see *Das Fest des Kurban-Beiram in Konstantinopel*, in *Globus*, xiii (1866), 148-52.

2. BESHIK ĀLĀYĪ, "Cradle procession", customarily organised to conduct the cradle of a new-born prince or a princess through the streets to the birth place of the baby. There were two specific processions for such an occasion: one was the procession disposed by the Sultana-Mother, and the other was arranged by the orders of the Grand-Vizier. The procession of the Sultana-Mother took place subsequent to the birth of the baby. The cradle, the bejewelled quilt and the valuable blanket were all taken from the old Saray and brought to the Ṭopkapî Palace. This procession consisted respectively of the following participants:

— the guide, in uniform;
— the officers of the Harem, two in a row;
— all the stewards of the lady who gave birth to the child, with their ceremonial girdles, equipments and headgears;
— numerous itinerant vendors, carrying trays of fruits, candies, flowers and cakes;
— the master vendors of sweetmeats, carrying the silver cradle;
— numerous coaches with lattice-windows, and two eunuchs at the sides of each coach: in these coaches were the visiting ladies;
— the Messenger to the Chief of the Flag, and the Head of Musicians;
— the musicians.

The procession walked most of the way to the accompaniment of rhythmical beats of a kettledrum. When the procession was over, various presents were given to the participants.

The procession disposed by the Grand Vizier was much more spectacular and crowded. It was a custom to put on this display six days after the birth of the child. The Grand Vizier, immediately after the imperial baby was born, ordered a cradle, a quilt and a blanket, embroidered with pearls, diamonds, emeralds and with other precious stones. The procession comprised the following participants in respective order:

— the guide, together with the attendants of the imperial house;
— the officers of the Grand Vizier's Harem;
— the Clerk of the Attendants and the Superintendent to the Attendants;
— the adjutants and the messengers of the court;
— the Steward to the Chief White Eunuchs of the Grand Vizier, and the Superintendent to the Grand Vizier;
— the vendors, carrying trays of fruits and flowers;
— the *telkhīṣī* (an official charged with making summaries and reports);
— the bodyguards;
— the Assistant of Ceremonies, and the Treasurer of Ceremonies;
— the Master of Ceremonies;
— the stewards to Sultanas;
— the Head of Musicians, carrying the blanket, and the footmen holding the blanket from its four corners;
— the Second Clothing Master, carrying the quilt;
— the First Clothing Master, carrying the cradle;
— the Steward to the Grand Vizier;
— the military band.

When the procession was completed, presents were given to all the participants, according to their ranks. The procession looked like a huge flower garden. The coloured turbans, caps and headgears, various fur-coats, yellow, red, green shoes, light boots, top-boots, etc., the artificial flower gardens, and hundreds of sugar boxes in different colours gave the atmosphere of a spectacular celebration.

Bibliography: The principal source is ʿĀkif Bey's *Teshrīfāt-nāme*; the author was the master of ceremonies of the court during the reign of Muṣṭafā III (second half of the 18th century), tr. Rado, 4-5; for the festivities of 1189/1775, to celebrate the birth of Khadīdje Sulṭān, the daughter of ʿAbd al-Ḥamīd I, on 20 Dhu 'l-Ḳaʿda 1189/14 February 1775, see Topkapı Archive E. no. 1562; for an illuminating example of a letter of congratulation,

see the letter of the Grand Vizier written for the birth of Khayriyye Sulṭān, the daughter of Maḥmūd II, on 8 Shawwāl 1246/21 March 1830, Topkapı Archive, E. no. 5932, for the celebrations of the birth of Ṣāliḥa Sulṭān, the daughter of Maḥmūd II, see Uzunçarşılı, *op.cit.*, Çağatay Uluçay, *Harem*, ii, Ankara 1971, 78-9.

3. DJĀʾIZ ĀLĀYİ, "Procession of the trousseau" arranged to transport the trousseau of an imperial bride to the house of the bridegroom. Before the procession started, the festal palms (*nakhīls*) were brought to the palace very early in the morning, and were included in the procession as symbols of fecundity of the bride; for this reason, the festal palms prepared for a bride should be made of fruits, candies and flowers. The procession started after the prayer for the newly-wedded was completed. The respective order of the participants in this procession was generally as follows:

— the Commander-in-Chief of the Janissaries, with ceremonial dress;
— the Steward to the Commander-in-Chief, with crest;
— the chiefs of various Janissary corps, with crests;
— the Chief of Cavalry and the Chief Lifeguard of Janissaries, with their men;
— the Chief Reciter of the Ḳurʾān, accompanied by his assistants;
— the Chief of Police, accompanied by the policemen;
— the Police Superintendent, with his men;
— the court messengers;
— the court adjutants;
— the court assayers;
— the *khōdjas* and the scholars of the court;
— the Chief of the White Eunuchs;
— the Steward to the Sultana-Mother, and the Steward to the favourite wife of the Sultan;
— the Chief Architect, and the Steward of the Dockyards;
— two artifical sugar gardens with figures made of sugar, and numerous festal palms of gold and silver, adorned with fruits, candies and flowers;
— the vendors and attendants, carrying the boxes containing the trousseau: mosquito-nets with gold lanterns; bejewelled clogs, slippers, boots, shoes; crowns full of diamonds, emeralds, rubies, turquoises, jades; necklaces, bracelets, earrings set with pearls, emeralds and brilliants; trays of precious stones; bejewelled cases for reed pens and ink; hundreds of embroidered cushions. At both sides of the vendors and the attendants, walked the guards to watch over;
— the Chief of Messengers;
— the Minister of Foreign Affairs and the two Chief Military Judges;
— the viziers;
— the Grand Vizier and the *Shaykh al-Islām*;
— the Captain of the festal palms;
— artificial fruit gardens;
— the imperial military band;
— pure-bred rams guarded by the black eunuchs, one at each side;
— the concubines of the trousseau, and the Chief of Palace Guards, accompanied by his men. The furniture and the big pieces were carried by mules, adorned with precious clothes, such as brocade, satin and silk.

When the procession arrived at its destination, the participants were rewarded according to their ranks, with gold coins fur coats and silk robes.

Uluçay, *Fatma ve Safiye Sultanların düğünleri*, in *Istanbul Enstitüsü Mecmuası*, iv (Istanbul 1958); idem, *Harem*, ii, 104; Nutku, *op.cit.*, 63-4.

4. EṢNĀF ĀLĀYİ, "Procession of the guilds or corporations", held in the presence of the Sultan, where each guild displayed its own profession, as well as acted scenes mostly concerning the special field with which the guild was occupied. Some of the guilds, however, had clowns, rope dancers, illusionists, equilibrists, some others, mimics and actors; and the bigger corporations possessed all of these.

It was a custom in the imperial festivals that the procession of the guilds should take place always in the afternoons, and that they should appear in alphabetical order. Only four or five guilds were allowed each day to have a procession; for example, the processions of 181 guilds in the festival of 990/1582 first started on 11 June and ended on 6 July. Before the procession was over, each guild had to give to the Sultan its gifts, which were determined long before by the treasurer of the court. The representatives of the guilds, after presenting their gifts, would pray for the Sultan. After the ceremony, all members of these guilds would take their seats at dinner tables prepared for them as guests at the feast given by the Sultan.

All the guilds and the corporations had their own pennants; for example, the guild of lady's slipper-makers had a pennant with golden and silver threads and tassels, the cord-makers had a red and a white pennant, and the sword-makers had a red and green one. The weavers had two different pennants: one, red, and the other red, yellow and green. Sometimes these guilds included wild animals in the procession, just for the sake of attracting the interest of the spectators. Some guilds, which preserved the tradition of having warriors, namely swordsmen and archers, would include them into the procession as symbols of traditional combatants; these men walked with their traditional uniforms and demonstrated their skill when the time came.

The representative scenes of each guild, showing the profession, were exhibited on carts, pulled by horses or oxen. The bakers, for instance, while passing ceremonially, displayed their profession on two

successive carts: on the first, the millers ground wheat with an all-functioning miniature mill, while on the next the bakers baked bread in a burning furnace; and the products were presented to the Sultan and given to the spectators. The guild of tailors, in the festival of 990/1582, sewed an interesting and valuable dress, which could be worn on both sides; one side of this dress was red and yellow, the other white and blue.

Another kind of demonstration was either to show skills or to perform farces of mythological stories, in which the actors and clowns generally had stylised phalluses in their hands and wore costumes of cloth, paper and grass.

Most of the guilds presented gifts related to their profession: for example, the weavers presented the cloth they had been weaving during the procession. A few of the guilds presented things other than their profession: the haberdashers, for instance, presented to the Sultan, in the festival of 1086/1675, the following items: 2 silver decanters, 2 silver trays, 4 ornamented silver candlesticks, 8 silver candlesticks, 1 *okka (ūḳiyye*, equivalent to 1283 gr.) of rose-water, 2 plates with a case, 3 plates full of cloves, 4 plates full of walnuts, 3 plates full of coconuts, 2 plates full of cinnamon, 1 tray full of musk-soap, 4 jars of sugar candy, 18 bottles of incense water, 60 bottles of flower-water, 3 trays full of dates, 6 plates full of sugar, 15 plates of candy, 4 plates full of sugar candy (of a different sort) and 7 Kaʿba glasses.

In every festival, the procession of the guilds were the centre of attraction, with presentations of products, displays of professional occupations, demonstrations of skills and performances of plays.

Abbot, *Under the Turk in Constantinople: a record of Sir John Finch's embassy, 1674-1681*, London 1920; for the rules of ceremony, Fîndîklîlî Meḥmed Agha, *Silaḥtār taʾrīkhī*, ii, Istanbul 1928, 645; further reference to the procession of the guilds is to be found in Nutku, *op.cit.*, 73-6; and in Metin And, *Osmanlı şenliklerinde Türk sanatları*, Ankara 1982, 227-48.

5. GELIN ĀLĀYÎ. "the Procession for the bride", to chaperone the bride to the house of the bridegroom. Up till the 18th century it was deemed lucky to have the bridal procession on Thursdays. This solemnity surpassed the pomp of the procession organised for the transportation of the trousseau. Almost all the viziers, the scholars and the high officials of the state took their places in this ceremony. The respective order of the train was generally as follows:

— the Chief of Police;
— the messengers of the palace;
— the holders of the fief;
— the *khōdjas*, the scholars of the court, and the Chief of Artillery, the Chief Armourer and the Steward to the Commander-in-Chief;
— the Master of Janissaries and a commanding officer of a division;
— the chiefs of various Janissary corps, cavalry and the Chief Lifeguard;
— the Chief White Eunuch;
— the Minister of Finance, Master of Orders and the Commander-in-Chief;
— the Chief of Messengers and the memoranda officials;
— the *Sherīf* of Mecca and the *Ḳāḍī* of Istanbul;
— the Chief Military Judges;
— the pashas, who act as intimates of the bridegroom;
— the Grand Vizier and the *Shaykh al-Islām*;
— the Inspector and the Accountant of the Prophet's Tomb at Medina;
— the Revenue-collector and the Senior official of Mecca and Medina;
— the Stewards to the Sultana-Mother and to the bridegroom;
— the Steward to the bride;
— two big festival palms carried by the dockyard stewards, the stewards walking at each side, and the white eunuchs in the middle;
— the Steward to the palace guards and the Secretary to the Chief Black Eunuch of the Sultan's Harem;
— two smaller festal palms of silver carried by the dockyard stewards;
— the guards of the old serail;
— two other silver festal palms, followed by the secretary of the guards of the old serail, on horseback, holding a Ḳurʾān with a bejewelled cover and case;
— the Chief Saddler to the Chief Black Eunuch, leading thoroughbred horses, which were richly equipped;
— the Chief Black Eunuch; the guards of the old serail at each side, and in front of the Chief, the men carrying purses and throwing gold pieces to the spectators;
— the bride in a silver or a bejewelled coach;
— numerous carriages of accompaniment, with the ladies of the court;
— the military band;
— numerous coaches carrying the ladies of the Harem.

The horses of the coaches were generally covered with expensive cloths, such as brocade, silk and satin. All the coaches were surrounded by the black eunuchs on horseback. The stewards, who carried the silver palms were richly dressed. This procession was so long that it usually took one hour or more from the beginning to the end.

6. ḲADİR ĀLĀYĪ, "Procession for the 'Night of Power'", sc. of Ramaḍān, (*Ḳadīr Gedjesi*), because it is the night when the Ḳurʾān was revealed, and it was the custom to organise a procession. One of the squares of the city, where a big mosque existed, was illuminated by lamps and lanterns. The sultanas and the women in the Harem would go to the square with coaches to watch the procession. The black eunuchs offered them light food, fruits, ice cream and coffee on silver trays. In front of each coach two attendants waited, with silver-framed lanterns of camel skin in their hands. The Sultan came to the mosque with a train, resembling that escort of the *Bayram Ālāyī*, with *k͟hōdjas* of the imperial palace, the Chief White Eunuchs, the Minister of Finance, the Master of Orders, the Grand Vizier, the *S͟haykh al-Islām*, the viziers, the Head of the Black Eunuchs, the Master of the Porte, etc., guarded by Janissaries and the cavalry. When the Sultan entered the mosque, *pide* (a kind of bread baked in thin flat strips), candy and *s͟herbet* were distributed to the soldiers. While the procession was on its way back to the palace, fireworks would begin illuminating the sky with various kinds of rockets.

Bibliography: This is only very limited for this procession; see, however, Halit Ziya Uşaklıgil, *Saray ve ötesi*, ii, Istanbul 1941, 129-34; Leyla Saz, *Saray ve harem hatıraları*, in *Yeni Tarih Dergisi*, ii, Istanbul 1958, 539; Ayşe Osmanoğlu, *Babam Abdülhamid*, Istanbul 1960, 88; Safiye Ünüvar, *Saray hatıralarım*, Istanbul 1964, 110; Uluçay, *op.cit.*, ii, 163.

7. ḲILIČ ĀLĀYĪ, "The Procession to gird on the sword". The Sultan, as Caliph of all Muslims, had to take the oath of allegiance when he succeeded to the throne. The procession would usually take place two weeks later. The place of this ceremony was the tomb of Abū Ayyūb al-Anṣārī in Eyüp (a district named after this tomb). The Sultan, with a long train of high officials and soldiers would go to Eyüp either by boat or on horseback. If he went to Eyüp via the sea, then he would return via the land, or vice-versa.

The procession was generally composed of the following persons: the Grand Vizier, the *S͟haykh al-Islām*, the Chief Military judges, the *S͟herīf* of Mecca, the Viziers, and certain number of high officials.

The ceremony was usually directed by the *S͟haykh al-Islām* and sometimes by the *S͟herīf* of Mecca. After the ceremony, the Sultan visited the tombs of his ancestors, and returned to the palace in processional order.

This tradition was started by Selīm I. It was a custom that every Sultan issued money, sacrificed sheep and distributed these to the poor. It was the task of the Steward to the Chief White Eunuch and the First Master of the Horse to take the petitions of the subjects while the procession was on its way to the palace.

8. MEKTEB (ĀMĪN) ĀLĀYĪ, "School (or Amen) procession", to celebrate the first school day of a prince. In this ceremony, the *S͟haykh al-Islām* and the *k͟hōdjas* of the court would stand on the right side of the throne, and on the left were the Grand Vizier, viziers, chief military judges and the captains of the sea. The prince would come, with his escort, towards the throne and would kiss the skirt of his father, the Sultan. He would then sit on a sofa placed between the throne and the *S͟haykh al-Islām*. After the prayer, the prince was delivered to the *k͟hōdjas* for his education. One such a celebration was ordered by Maḥmūd II for his elder son ʿAbd al-Medjīd in 1248/1832, when the Prince was nine years of age.

The procession took place both on the Marmara Sea with war-galleys and on land with the army. The Sultan and the Prince had an escort of high officials and soldiers amounting to 24,000 men. The escort included the infantry, the cavalry and the artillery.

Bibliography: For a vivid description of the procession in 1832, see *Ein Volksfest in Konstantinopel*, in *Magazin für Literatur des Auslands*, Berlin 1833, 531; also Uluçay, *Haremden mektuplar*, Istanbul 1956; Ayşe Osmanoğlu, *op.cit.*, 106; Safiye Ünüvar, *op.cit.*, 27, 88; Uluçay, *Harem*, ii, 87.

9. MEWLID ĀLĀYĪ, "The imperial procession organised to celebrate the birthday of the Prophet", on 12 Rabīʿ al-Awwal, for which the Sultan went to the mosque for the ceremony and returned to his palace. The high officials of the state gathered in the mosque, which was, until the second half of the 18th century, the Blue Mosque (sc. of Sultan Aḥmed), and waited for the Sultan to come. The *S͟haykh al-Islām*, the Chief Military Judges of Rumeli and Anadolu, all provincial *ḳāḍīs*, who were at that time in Istanbul, the scholars and the *k͟hōdjas*, had to take their places on the left side of the pulpit (*minber*) according to their ranks. The viziers had to sit on the prayer rugs on the left side of the niche (*miḥrāb*). Next to them were the Commander-in-Chief of the Janissaries, the Minister of Finance, the First Adjutant, the Minister of Foreign Affairs, the Steward to the Commander, the second and third accountant, the Chief of the Flag, the Chief of Messengers, the Chief Lifeguard, the First Master of the Horse, the commanding officers of Cavalry, the Chief Armourer, the Chief of Artillery and other high officials in their places. If the Commander-in-Chief were not present, because of a war or of any reason, the senior commanding officer had to represent him in the mosque.

The high officials of the palace, namely, the commanding officers of various regiments, were arranged standing in a line from the door of the pulpit to the desk, and the Janissaries would form a square arranged in rows between the centre columns of the mosque.

The Grand Vizier (wearing his ceremonial *kallāwī* turban) was accompanied by the palace guards to the mosque, where he was to be before the Sultan arrived. The Chief White Eunuch (wearing the ceremonial *selīmī* turban) would go to the palace, in order to escort the Sultan to the mosque, together with the palace guards. This procession was not as spectacular

as the others, but was nevertheless effective and colourful.

On entering the mosque, the Sultan was met by the Commander-in-Chief and the Trustee of the Pious Foundations. It was the duty of the Commander-in-Chief to take off the boots of the Sultan and offer him slippers. It was an honour given to him by the Sultan. If it was the first time that the Commander was doing this, he was rewarded with a dagger with diamonds on the handle. After this welcome, Sultan was escorted to his private pew by the Commander and the Chief Lifeguard. On leaving the mosque, the boots of the Sultan were put on again by the Commander.

In the procession back to the palace, the Commander walked in front of the Sultan's horse and the Trustees, carrying censers at each side, until they were dismissed by the Sultan.

Bibliography: For such a procession, see Hezār-fenn, fols. 170b-171b; Česhmī-zāde Muṣṭafā Reshīd, *Česhmī-zāde taʾrīkhi* (1180-2/1766-8), ed. Bekir Kütükoğlu, Istanbul 1959, 47; a vivid description may be seen in Ayşe Osmanoğlu's autobiography, 59-61; and in Safiye Ünüvar's one, 103; also see, Midhat Sertoğlu, *Osmanlı imparatorluğu devrinde mevlid alayı*, in *TM*, iv (April 1976), 45-9; also *op.cit.*, ii, 160.

10. NISHĀN ĀLĀYĪ. "Procession of engagement", held on the engagement of a sultan or a princess. In this procession, the gifts of the bridegroom were taken to the bride's house with an escort, which was generally composed of the following persons:
— the guide;
— the Chief Saddler of the palace;
— the Steward to the Chief White Eunuch;
— the Superintendent to the Grand Vizier;
— the Steward to the Grand Vizier;
— the Steward to the bride;
— the vendors and attendants carrying the gifts;
— twenty festal palms, each carried by two Janissaries;
— thirty large, ornamented trays full of confectionery;
— two artificial gardens made of sugar;
— one silver festal palm, at each side of which silver boxes of jewelry, carried by the attendants;
— bejewelled girdles, diamond rings, earrings with emeralds and diamonds, mirrors covered with precious stones, bejewelled clogs, shoes, light boots, slippers, all carried by the white eunuchs and guarded by palace watchmen;
— the Stewards to the bridegroom;
— the pashas, who act as intimates of the bridegroom;
— the Captain of the Sea, with his men;
— the Janissaries;
— the military band.

The gifts were delivered to the Chief Black Eunuch, who showed them to the Sultan, and upon the Sultan's approval sent them to the Harem with the black eunuchs.

Bibliography: *Sūr-nāme*, Nationalbibliothek, Vienna, cod. H.O. 95, fols. 2b-4a; N. M. Penzer, *The Harem*, London 1936; for the values of the gifts, Uluçay, *op.cit.*, 100-1.

11. SÜNNET ĀLĀYĪ, "Procession of circumcision". This escorted the prince, who was going to be circumcised, from his residence to the field where the festivities took place. The respective order of the train was generally as follows:
— the Janissary corps;
— the adjutants, the messengers, and the white eunuchs of the court;
— forty small festal palms, twenty at each side, each carried by three Janissaries;
— the Chief Architect and the Steward to the Dockyards;
— two giant festal palms, "as high as pine trees", each carried by 160 to 200 dockyard slaves, who according to the custom, were released for this occasion. These palms were balanced by the captains of the sea, holding ropes tied to the top of the palms; on each rope hung three different kinds of expensive cloth, each adequate in size for one dress;
— artificial gardens made of sugar: these gardens were full of trees, flowers, birds, domestic and wild animals; and in these gardens were jets of water running from the fountains, with nightingales singing;
— the viziers;
— the Grand Vizier and the *Shaykh-al-Islām*;
— the Master of the Horse, followed by thoroughbred horses, the harnesses of which were adorned with jewels;
— the Prince on horseback, with the private bodyguards on each side of him;
— the Chief Black Eunuch, followed by black eunuchs;
— the gentlemen-in-waiting, and the Chief White Eunuch;
— the Chief Ushers;
— the military band;
— the Chief Lifeguard, followed by the guards;
— the Chief of Cavalry, followed by the cavalry corps;
— the Chief of Artillery, with artillerymen;
— the Chief Armourer, with armourers.

When the procession was over, some of the festal palms would be set up in front of the imperial tent, and the others would be stuck up before the kiosk where the prince was going to be circumcised, as symbols of power and virility.

12. ṢURRE ĀLĀYĪ, "Procession of the Purse", organised when the donation was sent by the Sultan, as the Caliph of Islam, to the people of Mecca and Medina. This procession took place at the courtyard of the palace. The camel carrying the gift made tours, together with a small group of participants, in the presence of the Sultan and his suite. The procession was directed by the Chief White Eunuch. Before the group set forth on its journey, the Ḳurʾān was recited. After leaving the palace, the crowd waiting for the procession hailed and blessed the small caravan as far as the city limits.

Bibliography: Penzer, *op.cit.*; Česhmī-zāde, *Taʾrīkh*, 10; Ayşe Osmanoğlu, *op.cit.*; Uluçay, *op.cit.*, ii, 161; *Meydan Larousse*, xi, Istanbul 1973, 628.

13. WĀLIDE ĀLĀYĪ, "Procession of the Sultana-Mother". This had become a custom since the enthronement of Aḥmed I (1012/1603), and with it the Sultana-Mother was brought to the palace. When a Sultan succeeded to the throne, he would invite his mother to the palace; and for this occasion a cortège was organised, the order for it being given a few days before his accession to the throne. It was generally composed of the following officials:

- the messengers of the court;
- the hunters of the court;
- the Chief White Eunuch;
- the trustees of the Sultan's Pious Foundations;
- the high officials of the pious foundations of Mecca and Medina;
- the black eunuchs;
- the palace guards;
- the Chief Black Eunuch;
- the Steward to the Sultana-Mother;
- the Sultana-Mother, formerly on a closed palanquin, and later in a coach with lattice windows;
- the attendants, scattering silver and gold pieces to the crowd;
- the ladies of the court, in 80 to 100 carriages;
- the military band.

Bibliography: For a detailed description of the procession, Waṣīf Efendi, *Waṣīf taʾrīkhi*, Maṭbaʿa-yi ʿĀmire, Istanbul 1219/1804, 42, 44; further, Uzunçarşılı, *op.cit.*, 155-6; and Uluçay, *op.cit.*, ii, 62-3.

Adjuncts of the processions included:

1. NAKHĪL, "Festal palm". This phallophoric symbol sometimes took the form of a wreath or a fir branch, but generally it was made in the form of a cypress. In earlier periods it was in the shape of a date palm decorated with different kinds of ornaments, mouldings, fruits and emblems. We observe such emblems in Anatolia as far back as the Hittites and Phrygians (terracotta panels with reliefs decorated in coloured glaze from the Phrygian city of Pazarlı, near Ankara, show such palms as fertility symbols). The excavations at Altıntepe, situated on the plain of Erzincan (eastern central Anatolia), have revealed panels decorated with palmettes belonging to the period of Urartu in Anatolia; also, the sculptures of the main gallery in Yazılıkaya (east of Ankara) show the Hittite phallophoric symbols. In the region of Afyon and Konya (central Anatolia), during the reign of the Phrygian kings, the symbols headed ritualistic processions, mostly in spring.

In the Ottoman processions, these *nakhīls* had an important place not only in the weddings, but also in the circumcision ceremonies. For the weddings, they were prepared by the bride's family, and in the circumcisions by the parents of the boy. In these ceremonies, the palms were carried in front of the procession, and if it was an imperial celebration, the Grand Vizier, the viziers and the high officials walked behind them. If the *nakhīls* were in various sizes, the biggest would generally be carried first, and it would be followed by other smaller ones, together with gardens of sugar work, sweets in gold, silver and bronze trays, gold and silver decanters of *sherbet* (a sweet, cold drink, made of various fruit juices), bundles of the bride's trousseau, coloured purses full of silver coins, and caskets full of precious stones. Of course, the arrangement of *nakhīls* differed according to the taste of the superintendent of the procession.

There were special craftsmen who constructed these festal palms. Ewliyā described them in his travel journal as *eṣnāf-ī nakhīldjiyān-ī sūr-i hümayūn* ("guild of *nakhīl*-makers for imperial festivities"). According to him, the guild had four workshops in Istanbul, with 55 skilled members in the 17th century. The founder of this guild was Meyser Ezherī. These craftsmen, Ewliyā writes, "constructed *nakhīls* in wax as tall as the minaret of the Süleymāniyye Mosque, with coloured ribbons, silver and golden threads, which could also be illuminated". The iron-structured gigantic *nakhīls* "were carried by hundreds of galley-slaves supervised by guards, who gave with whistles such orders as: 'pull it to the right, to the left,' etc." A similar scene is described in detail by an English priest, Dr. John Covel, who had the occasion to see the festivities of Sultan Meḥmmed IV, in the summer of 1086/1675 in Edirne. He witnessed these guards—generally dockyard stewards—with whistles, directing each group, carrying gigantic *nakhīls*, approximately 25 metres high. The lower end (approximately 4.50 to 5.50 metres in diameter) had eight or ten long parallel bars, and the slaves carried the *nakhīls*, holding these bars. There was someone who directed them: he commanded the slaves to rest or to carry on at the sound of the whistle.

The gigantic *nakhīls* were so big that in order to carry them through the narrow streets of old Istanbul, very often, the projecting parts of the houses, such as eaves and balconies, were pulled down and afterwards rebuilt. Although the rebuilding of the houses required a great deal of money, the value of the *nakhīls* were almost twice the expenses thus incurred. The most important fertility symbols were each a work of art and very expensive. Some of them were entirely in silver and some were adorned with jewelry. At the wedding in 931/1524 of Khadīdje Sulṭān, sister of Süleymān the Magnificent, one of the *nakhīls* consisted of 40,000 and another of 60,000 pieces of handwork; and they were skilfully ornamented with beautiful, precious stones, in the shape of legendary birds.

In sum, the *nakhīls* represented the virility of men and the fecundity of women, as well as the economic power and marks of supremacy in society.

Bibliography: *Sūr-nāme-i hümayūn*, Nationalbibliothek, Vienna, cod. H.O.70; Lebelski, *A True Description*...; Palerne, *op.cit.*, 442-88; von Haunolt, *Verzeichnuss des hochzeitlichen Fest*...., in *op.cit.*, 532,

534; idem, *Particular Verzeichnuss*..., 469, 473; Melchior Besolt, *Dess Wolgeborenen Herrn Heinrichs Herrn von Lichtenstein von Nicolspurg u. Röm. Keys. Maiest. Abgesandten Reyss auff Constinopel im 1584*, in Lewenklaw, 515-31; Salomon Schweigger, *Ein newe Reisbeschreibung aus Deutschland nach Constantinopel und Jerusalem*, Nürnberg 1608; Stephan Gerlach (d. Aeltere), *Tagebuch*..., Franckfurt am Mayn 1674, 265; Hezār-fenn, *op.cit.*, fol. 178a; ʿAbdī, fol. 8a-b; Nāʿīmā writes that, in the festival of 1056/1646 to celebrate the wedding of Fāṭima Sulṭān, the daughter of Sultan Ibrāhīm, who was then four years of age, since the two minarethigh *nakhīl*s were too tall and too wide to pass through the streets of Istanbul, terraces, balconies and the eaves of various houses had to be pulled down, and the streets to be widened, see his *Taʾrīkh*, Maṭbaʿa-yi ʿĀmire, Istanbul 1280/1863; the case was the same in the festival of 1086/1675. Dr. Covel witnessed the demolishing process in Edirne: some of the houses were completely pulled down, see his *Diary*, fol. 200a; Wehbī states that in the festival of 1133/1720, the money for the reconstruction was granted to the owners of the houses while the process of demolishing was under way, see his *Sūr-nāme-yi Sulṭān Aḥmed*, Nationalbibliothek, Vienna, H.O. 94; Keshfī, *Sūr-nāme*, Nat. bibl. Vienna, H.O.95, fols. 3b, 13a-b; also Haunolt, *Verzeichnuss des Hochzeitlichen Fest*..., 432; he describes some of the expensive *nakhīl*s constructed for the wedding of ʿĀʾishe Sulṭān, one of the daughters of Murad III, in 1586, which were decorated with gilded balls, big pieces of turquoise and hundreds of pearls. One such palm cost forty or fifty thousand golden ducats; J. von Hammer, *GOR*, iv, Vienna 1829, 451 (von Hammer is the first Ottoman historian to have drawn attention to the symbolical significance of the *nakhīl*s). According to him, the size of these palms implied the power of virility of the bridegroom, and the fruits on their branches alluded to the fecundity of the bride. He indicates that while the *nakhīl*s represented the phallophores, the red tulle on the wedding palanquin suggests the flammeum and the torches the flambeau of Cupid and Hymen; here the fescennium and corybantes are replaced by sensual songs and orgiastic dances in unison with the pulsating beats of drums and castanets; he shows 24 kinds of festal palm, see *ibid.*, iv, 312; Ewliyā, *Seyāhāt-nāme*, i, Istanbul 1314/1896, 612; Lubenau, *Beschreibung der Reisen*..., i, 277, ii, 50; Konyalı, *İstanbul sarayları*, Istanbul 1942, 137-8: here the author describes how the Arabic word *nakhl* later became *nahil*, *nakıl* or *nakil* in common Turkish usage; İ. 2. SHEKER TAṢWĪRLER, "Sugar figures". The confectionery displayed in various processions was one of the most attractive spectacles in this event. The sugar figures made by skilled confectioners had always been a colourful public attraction. These figures, together with artificial gardens, were almost indispensable parts of the festal palms; and that is why they had always been considered all together. If the festal palms were necessary, so were the sugar figures and the artificial gardens, all being meaningful in the matrimonial and circumcisional processions as symbols of fertility and fecundity.

The confectionery played an important role in the Ottoman celebrations from the beginning. The figures of lions, birds, fishes, peacocks, camels, elephants, gazelles, horses and a variety of monsters made of sugar in different colours and flavours, were generally between 75 cm. and 1.35 m. in size. These and the figures of mermaids, lanterns, ewers, pots, fruits, flowers, festal palms and jugs filled with water were all made by the skilled confectioners. Yet the most astonishing works in sugar were the ones in bigger sizes, such as models of a mosque, a castle, a town, a kiosk, a garden or a fountain with running water.

Apart from these models and the figures, there were also large circular trays or large boxes of confectionery, carried by two attendants and sometimes by three or four. In the festivities of 1086/1675, for instance, there were 200 coffers of confectionery, all distributed to the spectators.

Bibliography: An illuminating description of sugar figures may be seen in Gerlach's *Tagebuch*..., 97, 265; for the confectionery and the confectioner, Haunolt, *Particular Verzeichnuss*..., 472, 476, 489-90; and idem, *Verzeichnuss des Hochzeitlichen Fest*..., 528, 534; ʿAbdī, *Sūr-nāme*, fol. 8b; Covel, *Diary*, fol. 215a; Hezār-fenn, fols. 168a, 174b; *Sūr-nāme* of 1137/1724, ms., Nat. bibl. Vienna, H.O.95, fols. 3b, 7a; for Nointel's letter to his friend Pomponne, de Nointel, *L'Odyssée d'un ambassadeur*, 197; a later description of confectionery may be seen in Lebīb's *Sūr-nāme*, ms. T. no. 6197, fols. 13b, 89a-90b; for the skill of confectioners, *Beschreibung der Reisen*, ii, 50; a detailed description may be found in Dursun Bey's *Taʾrīkh-i Ebu 'l-Feth*, Istanbul 1330/1911, 80; Nabī, *Sūr-nāme*, 62; for recent information, Nutku, *IV. Mehmet'in Edirne şenliği*, 72; and And, *Osmanlı şenliklerinde Türk sanatları*, 209-24.

3. YAPMA BAGHČE, "Artificial garden". In the processions organised for weddings, and circumcision celebrations, the artificial gardens were one of the exhibits, which interested the spectators, together with the festal palms and the sugar figures. These models were approximately 2.70 m² or 3.60 m² in size, with fruit trees, flowers, kiosks and fountains. There were nightingales singing on the trees, and water running from the hill tops. If the model was going to be presented to the Sultan, it was decorated with precious stones, mostly turquoise and mother-of-pearls. These artificial gardens moved on four, six or sometimes eight wheels, and each garden were pulled by four or six dockyard slaves, who were later liberated by the Sultan. In some cases, there were also real musicians on these models, playing for the public. In short, the artificial gardens were pieces of artistic composition.

5. IN MUSLIM INDIA

Many of the terms used here have already been defined in the account of court ceremonial above, for which see MARĀSIM, 5.

Processions in India are of great popular appeal, from the panache of the simple wedding ceremonies to

the pomp of royal ceremonial; and even these extremes have something in common.

The wedding (for full details see NIKĀḤ) involves a procession to escort the first contractual presents from bridegroom to bride, the preliminary exchange of presents (*sāčaḳ*) between bride and groom, the bride's night procession (*mĕhndī*) to anoint the bridegroom with henna, and the bridegroom's procession in which he comes to carry away his bride; even in the simplest forms the bridegroom is mounted on a decorated horse, or the bride carried in a palanquin (*pālkī*) or on a litter (*ḍōlī*) [see NAḲL] accompanied by friends on foot and by a musical escort. The essentials of Muslim weddings in India (which incorporate many details derived from Hindū customs) are described, especially for the Deccan, in Dja^cfar Sharīf, ch. viii; but the difference is only one of degree from such an elaborate wedding ceremonial as that of the (Anglo-Muslim) granddaughter of Col. W. L. Gardner at Kāsgandj in 1835 to a grandson of Shāh ᶜĀlam II, sultan of Dihlī, described in Fanny Parks, *Wanderings of a pilgrim in search of the picturesque*, London 1850 (repr. Karachi 1975), i, 420-50, and similar in its lavish ostentation to the processions, for various purposes, of the royal court: the escort for the bride's dress in *ᶜamārīs* on elephants and in covered bullock-carts (*ratha*) and palanquins with 100 trays of presents carried on men's heads; a similar procession to escort the bridegroom's dress; the *sāčaḳ* procession, with fully caparisoned elephants and horses, *nālkīs*, palanquins and *rathas* [see NAḲL], 200 earthen pots, covered with leaf silver, containing sweetmeats and carried on men's heads, "a number of men dressed up as horses ... playing antics", and ten travelling platforms (*takht-i rawān*), each supporting two dancing-girls and a musician, also carried on men's heads and accompanied by kettle-drums; the *mĕhndī* procession, the grandest of all, when the road was enclosed with bamboo screens and had triumphal arches at intervals, all lighted with thousands of small lamps, fireworks were let off all along the route, and the usual elephants, horses, *nālkīs*, palanquins, *rathas*, and the portable stages, were lit up by men carrying 5,000 torches; and the bridegroom's procession to carry away his bride (described as an old Tatar, or Tīmūrid, custom; but Ibn Baṭṭūṭa, iii, 275, tr. Gibb, iii, 687, writes of a similar ceremony at the marriage of the sister of Muḥammad b. Tughluḳ), similarly accompanied by many musical bands and innumerable flags, with the young prince at the head on a horse with an ornamental armour made of flowers, flanked by an *āftābgīr* and followed by a gold-embroidered *čhatr*; besides the usual train of elephants and horses, etc., carrying the escort, and the portable stages, there were added a great number of led horses, and a small forest of artificial trees of wax and paper, decorated with gold and silver foil and mica. Not mentioned in the above account, but known from other sources, are the distribution of small copper coins from one of the elephants to the bystanders lining the route, and the liberation of caged birds at frequent intervals.

Descriptions of royal processions are less frequent than notices of other ceremonial observances. Ibn Baṭṭūṭa does, however, describe, sketchily, certain processions in the time of Muḥammad b. Tughluḳ: on his return to his palace from a journey, wooden pavilions were set up at intervals on the road from city gate to palace gate, several storeys high with well-dressed singers and dancing girls on each storey; the street walls were hung with silk cloths, and silk cloths carpeted the space between the pavilions for the sultan's horse to walk on. He was preceded by several thousand of his own slaves on foot, sixteen brocaded and jewelled elephants bearing sixteen parasols, and the *ghāshiya*, and followed by mounted troops; three or four small catapults set up on elephants might scatter silver coin among the populace (iii, 237-8, tr. Gibb, iii, 668; another ceremonial entry is described at iii, 395-6, tr. Gibb, iii, 744). At the reception of a person of rank (e.g. the *amīr* Ghiyāth al-Dīn Muḥammad, descendant of the ᶜAbbāsid caliph al-Mustanṣir bi'llah) the sultan sent envoys to a distance to meet him, and himself rode out ten miles to greet him personally, dismounting to pay homage and offer a *khilᶜa* before both mounted for the journey to the palace shaded by the one royal umbrella (*ibid.*, iii, 260, tr. Gibb, iii, 680). When the sultan rode out to the great festival of the *ᶜīd al-aḍḥā* [*q.v.*] the procession was headed by the *ḳāḍīs* and by *mu'adhdhins*, calling out *allāhu akbar*, mounted on elephants; then came the slaves and *mamlūks* on foot and some 300 *nāḳibs*, all wearing gold caps and girdles; then the sixteen royal elephants with their sixteen parasols, one of them bearing the sultan himself, preceded by his *ghāshiya*. Foreign dignitaries later in the procession were also mounted on elephants. Behind the sultan were his "honours" [see MARĀTIB] and all the members of his personal entourage, and then his half-brother, his father's adopted son, his nephew Fīrūz b. Radjab, the *wazīr*, and some half-dozen "great *amīrs* who are never separated from his company", all mounted and followed by their *marātib* and troops; other *amīrs* rode without "honours"; those riding in the procession wore armour, both on themselves and on their horses. At the gate of the *ᶜīdgāh*, the procession halted and the judges, the principal *amīrs* and the "chiefs of the foreigners" (envoys from other courts?) entered before the sultan; after the prayers and the address by the *imām*, the sultan protected his dress by a silk overall and himself stabbed the sacrificial camel in the throat with a spear before returning to his palace. Ibn Baṭṭūṭa also describes (iii, 109ff., tr. Gibb, iii, 600-2) a river-journey with the governor of Lāharī in Sind: the governor rode in a central raised cabin in an *ahawra* (possibly connected with the Hindī *hōlā*, a cargo boat of some 35-55 tonnes; here evidently a state barge) rowed by 40 men; of the fifteen vessels which made up his baggage-train, four flanked the *ahawra*, two carrying his *marātib* and two carrying singers. Singers and the instruments of the *marātib* performed alternately until the midday meal, when the ships closed up and gangways were set between them; at dusk the parties disembarked and set up camp on the river bank. When the procession moved to land, six horsemen rode ahead with drums and reed pipes, followed by the governor's *ḥādjibs*, flanked by singers, and his personal troops, and the governor himself.

There is little difference on the composition of royal processions over the years, as far as can be determined from the limited evidence available; certain practices mentioned later, such as water-carriers walking ahead of the procession to lay the dust, may in fact not be innovations. When the Mughal ruler moved out of his palace he was accompanied almost always by the bearer of the flywhisk, and invariably by the *ḳur*, as described above s.v. MARĀSIM. 5; the ruler's person would be further guarded by mace-bearers (*gurz-bardār*), who obviously inherited the functions of the *dūrbāsh* [*q.v.*] as described by Amīr Khusraw and Baranī. Processions are the subject of frequent illustration in Mughal painting; the use of the *ghāshiya* seems by now to have been discontinued. There is evidence of some rulers taking part in processions on

foot on grounds of piety; Akbar so covered part of the journey to the shrine of Muʿīn al-Dīn Čishtī at Adjmēr, and Djahāngīr visited Akbar's tomb on foot in 1017/1608; in 1028/1619, however, he rode to the tomb in full procession, as shown by a superb miniature painting in the Chester Beatty collection. The height of ostentation and opulence is perhaps best expressed in the royal participation in the *ʿīd al-aḍḥā* celebrations at Lucknow [see LAKHNAʾŪ] in the first quarter of the 19th century, as described by Mrs. Meer Hassan Ali, *Observations on the Mussulmanns of India...*, [1832], ed. Crooke, London 1917, 142-4; here the procession started with 50 camels carrying swivelguns, each with two gunners and driver, then a body of artillery, two troops of armed cavalry, and a regiment of militia, all in new uniforms of different colours; the horses were caparisoned with embroidered horsecloths, silver ornaments and necklaces, with tails and manes dyed red with henna. These were followed by the mounted kettledrums, these with horse and rider ornamented with the royal fish emblem (representing the *māhī-marātib*; see under MARĀTIB. 5. Fanny Parks remarks, *op.cit.*, i, 178, that the royal pleasure-boat on the river Gōmatī was "made in the shape of a fish, and the golden scales glittered in the sun"). The ruler followed in an open silver carriage drawn by four elephants with costly caparisons, flanked by chowry-bearers and the *āftābgīr* and guarded by cavalry, and followed by the king's horses, led by grooms; other elephant-carriages, with two elephants apiece, conveyed the British Resident, the *wazīr*, and other favoured nobles. The golden *nālkī* followed, with a golden palanquin and a state carriage drawn by eight horses with a European coachman. Some fifty ridden elephants followed, wtih the Europeans of the King's court and the *umarāʾ* and the great officers of state, and the regiments, both horse and foot, marching with their colours unfurled, and their bands "playing English pieces". After the sacrifice at the *ʿīdgāh*, the procession returned to the royal palace in the same order, where the king held court firstly to receive *nadhrs* [*q.v.*], then to garland his favoured guests and to award distinctions and present *khilʿas*; a feast followed, with animal fights, music and dancing, and fireworks. "This magnificent style of celebrating ... is perhaps unequalled by any other Native Court now existing in Hindoostaun."

The royal hunt—highly esteemed in India since it kept the army ready and exercised—involved the sultan and his retinue and troops marching out in battle array; Baranī (*Taʾrīkh-i Fīrūz-Shāhī*, Bibl. Ind. ed., 55) estimates that the sultan might be accompanied by 500-600 courtiers, 1,000 mounted troops and 1,000 foot-soldiers (the beaters, perhaps 3,000 in number, were probably engaged locally); the trainers of the hunting-leopards [see FAHD], dogs and hawks [see BAYZARA] would also have marched out with the sultan from the *kārkhānas* specialising in breeding and training these animals (Shams-i Sirādj ʿAfīf, *Taʾrīkh-i Fīrūz-Shāhī*, Bibl. Ind. ed., 317-18). When Ibn Baṭṭūṭa accompanied Muḥammad b. Tughluḳ (iii, 414-15, tr. Gibb, iii, 752-3) the royal procession was similar to those described above, and each traveller of importance had to provide his own camping enclosure (*sarāča*) and tent to be erected within it, carpets, cooking utensils, litter (*dōlā*), and camels and men to carry everything, grass-cutters for fodder for the animals, and torch-bearers for night travel. The sultan selected each camping site, and his own red *sarāča* was erected before any other *sarāčas* (white trimmed with blue) were allowed to be set up. (A story is told of Akbar by Manucci, *Storia do Mogor*, i, 87, Eng. tr. W. Irvine, i, 133, who while graciously dismissing a Hindū prince demanded the surrender of his scarlet tents, reserving this colour for himself and for princes of the blood royal.) It is notable that in depictions of the hunt in Mughal painting, the *ḳur* is almost always present, close to the royal person, no matter how attenuated the retinue has become during the chase. (For the royal hunt, see ṢAYD; for the camp, see URDŪ.)

The processions at the Muḥarram are described s.v. TAʿZIYA; certain features of them must however be noticed here. The Muḥarram procession at Lucknow, as described by Mrs. Meer Hassan Ali, *op.cit.*, 42ff., is scarcely less elaborate than the royal procession described above, except that the ruler himself does not take part; but the royal umbrella is carried over the head of the Duldul, a mule representing that which the Prophet gave to ʿAlī. There is also much distribution of food to the poor as the cavalcade passes along; and the kettledrums are muffled. There are many extraneous events, however, in the Muḥarram processions as celebrated in the Deccan; besides the orthodox *faḳīrs* there are many who personate the *faḳīrs*, and others, such as those intended to represent paddy-birds (the heron *Ardeola grayii*) and the hawk who catches them; the Crow King, who carries a cage of crows and makes jokes; the *hādjdjī bī-wuḳūf*, the sham *ḥakīm*, the *sharābī*, the *ḳāḍī bī-dīn*, whose irreverent names reveal their functions, join with men dressed as tigers or camels, or personating Hindū shopkeepers or Djayn moneylenders, in coarse buffoonery all along the procession, rather like the men "dressed as horses and playing antics" mentioned earlier. There are many similar by-plays, nothing at all to do with, or in keeping with, the solemnity of the occasion. (Djaʿfar Sharīf, *Ḳānūn-i Islām*, ed. as *Herklots' Islam in India* by W. Crooke, Oxford 1921, 168-82). The author has observed quarter-staff fights, doubtless derived from the *idea* of the battle of Karbalāʾ, enacted in the Muḥarram procession at Udaypur [*q.v.*] by obviously non-Muslim Rādjpūts, showing the Indian love of turning any procession into a *tamāsha*.

Bibliography: In addition to references in the article, see *Bibl.* to MARĀSIM. 5. Muslim India.

(J. BURTON-PAGE)

MAWĀLĪ [see MAWLĀ].

MAWĀLIYĀ (A., pl. *mawāliyāt*) or *mawāliyyā*, also reportedly *mawālī* and *muwālayāt*, a non-classical Arabic verse form. Together with the cognate *mawwāl*, this is best considered in three contexts.

1. In written sources.

Among the "seven arts" *al-funūn al-sabʿa* [see KĀN WA-KĀN])—non-classical verse forms are always made to number seven, although the lists are not identical—the *mawāliyā* is given pride of place next to the *muwashshaḥ* and the *zadjal*, on the ground that its metre is classical and its language either classical or colloquial.

Two traditions place its beginnings in ʿIrāḳ in early ʿAbbāsid times. One is that non-Arab (*mawālī*) labourers in the orchards of Wāsiṭ sang it, using the words *yā mawāliyā* ("O, my master!") as a refrain. The other is that a slave-girl of the Barmakīs, herself called Mawāliyā, created the form to circumvent Hārūn al-Rashīd's ban on poetry praising her disgraced masters, the contention being that since the language was uninflected, the composition could not be said to be *shiʿr*. Both accounts are suspect as they occur only in late sources and appear to have been fabricated to account for the otherwise unexplained appellation.

The form was, however, well-established by the

6th/12th century, when it always occurs as four hemistichs of *basīṭ*, all with the same rhyme. Later, perhaps from the 11th/17th century onward, it was elaborated into a variety of multi-rhyme compositions (see section 2, below).

The composer of *mawāliyās* was sometimes called a *mawwāl*.

2. In folk-verse.

The form is a favourite in Arab lands, extending all the way from ʿIrāḳ to North Africa. Variations are almost innumerable, and the observations that follow relate to prevalent practice in Egypt alone.

The terminology is often vague and inconsistent. The word *mawāliyā* itself is still used, especially in writing, but in common parlance the composition itself is almost always called a *mawwāl*, and a master of the art is known as *rayyis il-mawwāl*.

The metre is seldom as regular as the pundits would have it, but if the composition can be scanned at all it is recognisably in the *basīṭ*, with two variations added to those allowed by the classical prosodists: the *fāʿilun* foot is often reduced to two long syllables even in the body of the line, and the *mustafʿilun* foot is occasionally changed to *mutafāʿilun*. It may therefore be scanned:

What in classical prosody is a hemistich is here clearly the basic metrical unit, for it is always rhymed, occurs more often in odd than in even numbers, and is never enjambé. In this entry, it will be referred to as a line.

The most marked development has been in rhyme schemes. The monorhyme quatrain (*aaaa*), called *rubāʿī* or *mirabbaʿ*, is now comparatively rare. Variations appear to have been created mostly by insertions between the third line and the last. The first three lines are then called the *ʿataba* ("doorstep")—although the term is also sometimes applied to each of the three lines—or the *farsha* ("spread, mat"), and the last line is then the *ghaṭā* ("cover") or, in longer compositions, the *ṭāḳiyya* ("skull-cap").

The simplest elaboration consists of the addition of an unrhymed line in fourth place: *aaaxa*. This line is said to be *ʿardjā* ("lame"), and the *mawwāl* itself is *aʿradj*.

Another augmented form has the rhyme scheme *aaa zzz a*. The composition is then called *sabʿānī* or *misabbaʿ* ("sevener"), *nuʿmānī*, or *baghdādī*.

Yet another elaboration is brought about by adding a number of lines, usually six, with alternating rhymes after the *farsha*—*aaa bcbcbc zzz a*—the last line also having an internal *z* rhyme. The sestet of alternating rhymes is called *shadjara* ("tree") or *ridfa* ("alternate"), or else each of the two rhymes is called a *ridfa*, and they are distinguished from each other as *dakar* and *intāya* ("male" and "female"). The *mawwāl* is then said to be *mardūf* or *Ṣaʿīdī* ("Upper Egyptian").

By multiplying the number of sestets, or by using any variety of the *mawwāl* as a stanza, the composition can be extended indefinitely, particularly for narrative purposes.

A somewhat rare further refinement is the addition of internal rhymes to some of the lines; these are then called *misakkaf* ("clapping or roofed").

Another feature strongly associated with the folk *mawwāl* but not exclusive to it is the expansion of the rhymes into polysyllabic paronomasias, achieved by deliberate distortion of the normal pronunciation. The art is called *zahr* ("flower'). A *mawwāl* devoid of it is described as *abyaḍ* ("white, blank"); if so ornamented, it is either *aḥmar* ("red") or *akhḍar* ("green"), the distinction most often made—but not consistently applied—between these two being that the first deals with sad themes and the second with joyful ones.

The following illustrates the rhyme scheme, metrical variations, and the *zahr*, with the normal pronunciation of the punning rhymes added between square brackets:

yā dākhil il-karm(i) khud bālak min illī fīh
You who enter the vineyard, beware of what is in it;
wi giss(i) nabḍ il-ʿinab w iḥras min illifīh [līfuh]
Feel the pulse of the grapes, be watchful of its fibres,
w ittabbaʿ il-ʾaṣl(i) law titʿab min illifīh [il-laffa]
And trace back the root, though you weary of the winding trail.
il-ḥilw(i) fōḳ ish-shawāshī w il-wiḥish ʿa l-ʾarḍ
What is good is high on the trellises; what is bad is on the ground.
iʿlam bi ʾinn il-hawā li l-ḥukm(i) ʾawʿādī ['awʿad]
Take note that passion is a threat to wisdom.
il-ward(i) lammā zuhī ḳaṭafu l-gabān ʿal-ʾarḍ [ʿalā riḍā]
Roses when deluded consent to being plucked by the unworthy;
khallāni tayhān m aʿraf ʾahli ʾawʿādī [ʾaw ʾaʿādiyya]
They so befuddle me, I make out neither my kinsmen nor my foes.
shuft il-ghazāl māl min ḥubb il-fulūs ʿal-ʾarḍ [ʿalā l-ḳird]
I have seen the gazelle, for love of money, lean towards the monkey.
ya ma ḳult(i) li l-ḳalb(i) buṣṣ(i) w shūf ʾaʿwādī [ʾiwʿa di]
How often have I told my heart: Look! Consider! Guard against this!
bēn il-milīḥ wi l-ḳabīḥ farḳ(i) b-dalīl wisabāt [wi ʾisbāt]
The fair and the ugly differ—for this there is evidence and proof.
wi ṭ-ṭabʿ(i) wi r-rūḥ fi l-gasad is-salīm wisabāt [wasabāt]
In a healthy body, one's nature and spirit leap up.
il-ḥurr(i) ʿanduh shahāmah fi l-karam wi sabāt
The freeborn man is resolute and staunch in his nobility,
wi n-nadl(i) law māt ma ytubshī ʿan illifīh [il-ʾāfa]
Whereas the vile one—though he die—never turns away from shame.

3. In folk music.

The word *mawwāl* stands for an interpretative freesong, with no set tune. The words sung may fall within the norms detailed above, but more often than not metrical regularity and even rhyme are sacrificed to dramatic effect.

Bibliography: For earlier works, see the *Bibl.* to *EI*[1] art. *Mawālīyā* (Moh. Bencheneb). Of more recent ones, see Ṣafiyy ad-Dīn al-Ḥillī, *Die vulgärabische Poetik—al-Kitāb al-ʿAṭil al-Ḥālī wal-Muraḫḫaṣ al-Ġālī*, ed. W. Hoenerbach, Wiesbaden 1956; ʿAbd al-Karīm al-ʿAllāf, *al-Mawwāl al-Baghdādī*, Baghdād 1964; Aḥmad Mursī, *al-Ughniya al-shaʿbiyya*, Cairo 1970; P. Cachia, *The Egyptian Mawwāl*, in *JAL*, viii (1977), 77-103; Serafin Fanjul, *El Mawwāl Egipcio*, Madrid, Instituto Hispano-Árabe de Cultura 1976; Tiberiu Alexandru, *The folk music of Egypt* (booklet and two discs), Cairo, Ministry of Culture n.d. [*ca.* 1970].

(P. Cachia)

At the end of his article in *EI*[1] Mawāliyā, Mawwāl, M. Bencheneb adds numerous bibliographical references, amongst which should be given here the following in particular: Ibn Khaldūn, *Muḳaddima*, tr.

de Slane, iii, 451 ff., tr. Rosenthal, iii, 475 ff.; Sayyid Amīn, *Bulbul al-afrāh ... fi 'l-mawāwīl al-khudr wa 'l-humr*, Cairo 1316/1898-9; J. David, *Les Maouals*, Caen 1864. To these may be added Muḥammad b. Abī Shanab, *Tuḥfat al-adab*², Paris 1954, 129-31.

(Ed.)

AL-MĀWARDĪ, Abu 'l-Ḥasan ʿAlī b. Muḥammad b. Ḥabīb, Shāfiʿi *faḳīh*, was born in Baṣra in 364/974 and died in Baghdād on 30 Rabīʿ I 450/27 May 1058, aged 86 years.

After completing his studies in Baṣra and in Baghdād, he became a teacher. The renown which he acquired, owing to the extent and the variety of his knowledge, drew to him the attention of the authorities; he was appointed *ḳāḍī* and fulfilled the responsibilities of this post in various towns, in particular at Ustuwā, near Nishāpūr, before being entrusted with the role in Baghdād itself. In 429/1038, he was awarded the honorific surname (*laḳab*) of *aḳḍā 'l-ḳuḍāt* or supreme *ḳāḍī* in spite of the opinions of eminent jurists, including al-Ṭabarī, who denied the legality of this title. In addition, he was on four occasions chosen by the caliph al-Ḳāʾim (422-67/1031-74) to perform diplomatic missions in 422/1031, 428/1037, 434/1042-3 and 435/1043-4. Anecdotes confirm that his rank and his vast learning did not in any way detract from his modesty and that he was an enthusiastic and eloquent speaker. He was furthermore highly regarded by the preceding caliph al-Ḳādir (381-422/991-1031), who employed him not only in the conduct of his negotiations with the Būyids who were then the rulers of ʿIrāḳ (al-Māwardī was thus the contemporary of two caliphs known for their pro-Sunnī policy), but also for the purpose of restoring Sunnism, this accounting for the composition of manuals propounding the doctrines of each of the four orthodox schools.

Other details regarding the biography of al-Māwardī are supplied by Arab writers. From the account given by the Shāfiʿī al-Khaṭīb al-Baghdādī (d. 463/1072), in his *Taʾrīkh Baghdād*, i, 53-4, ix, 358, it is known that his father was a manufacturer and seller of rose-water and that our *faḳīh* was buried in Baghdād. Ibn Kathīr (d. 774/1373) in *al-Bidāya wa 'l-nihāya* (xi, 80, xii, 79) says of him that he was gentle, dignified and polite, qualities which had been attributed to him even earlier by the Ḥanbalī Ibn al-Djawzī (d. 597/1200) in the *Muntaẓam* (viii, 199-200). Al-Dhahabī (d. 748/1348) in the *Mīzān al-iʿtidāl fī naḳd al-ridjāl* (no. 342) and Ibn Ḥadjar al-ʿAsḳalānī (d. 852/1449) in the *Lisān al-Mīzān* (iv, 260) give examples of the perfect rectitude of al-Māwardī even when confronted by the powerful. The most striking example is that of the *fatwā* declared in 429/1037-8 against the Būyid Djalāl al-Dawla, who was demanding from al-Ḳāʾim the right to bear the title of *shāhanshāh*. However, al-Māwardī did not escape the suspicions of the orthodox, and the great Shāfiʿī jurist al-Subkī (d. 756/1355) speaks of Muʿtazilī views for which he was criticised (*Ṭabaḳāt al-Shāfiʿiyya*, iii, 303, v, 12).

As regards the works of al-Māwardī, the classification followed is that of Muṣṭafā al-Saḳḳāʾ, in the introduction to the *Adab al-dunyā wa 'l-dīn*:

1. Religious works: *Tafsīr al-Ḳurʾān*, also known as *al-Nukat wa 'l-ʿuyūn* (still in manuscript); *Kitāb al-Ḥāwī al-kabīr fi 'l-furūʿ*, on the legal system of the Imām al-Shāfiʿī, of which the various portions (more than thirty) are scattered throughout the East and the West; *Kitāb al-Iḳnāʿ*, a summary in 40 pages of the preceding, which numbered 4,000 pages, mentioned by Ibn al-Djawzī in *al-Muntaẓam* (viii, 199); *Kitāb Aʿlām al-nubuwwa* (ed. Cairo 1319, 330); *Kitāb Adab al-dunyā wa 'l-dīn* (ed. in the margins of the *Kashkūl* of al-ʿĀmilī, Cairo 1316/1898-9; ed. M. al-Saḳḳāʾ, Cairo 1955).

2. Works of a political and social nature: *Kitāb al-Aḥkām al-sulṭāniyya*, translated notably by Fagnan (Algiers 1915; new edition, Paris 1982) under the title of *Traité des statuts gouvernementaux* or *Constitutiones politicae*; this is the work which made al-Māwardī known in the West, and it is considered a classic work of public law; *Kitāb Ḳawānīn al-wizāra wa-siyāsat al-mulk*, on the *adab* of the vizier (ms. in Vienna); *Kitāb Tashīl al-naẓar wa-taʿdjīl al-ẓafar*, on politics and different forms of government (ms. in Gotha); *Kitāb Naṣīḥat al-mulūk* (ms. in Paris).

3. Studies of language and of *adab*: *Kitāb fi 'l-naḥw*, on grammar (lost); *Kitāb al-Amthāl wa 'l-ḥikam*, collection of 300 traditions, 300 proverbs and 300 verses (ms. Univ. of Leiden); *Kitāb Ādāb al-takallum* (selection from works of al-Māwardī chosen by Muḥammad b. ʿĀli al-Zuhra; ms. Univ. of Leiden, Or. 989-9); *Kitāb Adab al-ḳāḍī*, which in fact represents two of the thirty sections of the *Ḥāwī* (ed. Baghdād 1971); *Kitāb Maʿrifat al-faḍāʾil, Tractatus paroeneticus de virtutibus moralibus*, attributed to al-Māwardī (ms. Escurial).

MAWĀT (a.), juridical term designating dead lands.

Fiḳh makes the practical distinction between dead land (*arḍ mawāt*) and living land. According to Abū Ḥanīfa, dead land is that which is not well cultivated and is without water; for al-Shāfiʿī, it is all that is neither cultivated nor dependent on a cultivated place. Dead land is of two kinds: that which, from time immemorial, has always been in this state, of a kind that bears no mark of cultivation and concerning which no property right has been established; whereas dead land of the second category is that which, once cultivated, has then been neglected, become dead and allowed to lie fallow.

But dead land can be brought to life. Revivification (*iḥyāʾ*) is a task performed on the land and intended to make it usable. Both near neighbours and those at a greater distance have the right of revivification. For Mālik, however, the nearest neighbours are the most qualified to undertake the work of revivification. Giving value to the land allows the one who has carried out the task of revivification to become a man of property. A piece of dead land that has been revivified becomes the property (*milk*) of the revivifier. According to the Ḥanafīs, revivification of the land is only allowed with the caliph's authorisation, but, according to al-Shāfiʿī, the one who revivifies dead pieces of land becomes the owner with or without the caliph's permission.

On the nature of what constitutes giving value to land so as to create a property right, the different juridical schools are not in agreement: according to the Mālikīs, it is not enough to enclose the land, to sink a well in it or to pasture a flock on it. One must,

for example, find a spring and then exploit the spring by means of water channels, or else clear the land in such a way as to make it usable, or even build; in short, giving value to it must consist of useful and productive work. The Mālikīs, however, appear less demanding than the other juridical schools on the subject of the conditions required to acquire the soil by revivification.

The land surrounding the revivified land (*ḥarīm*) also becomes revivified land, but on this the four juridical schools are not in agreement on the extent of these neighbouring lands which satisfy the juridical condition of revivified land. As for that which has channels dug in it to revivify the dead lands, it becomes the property of those who have them dug, and no-one else has the right to draw water there or to make a side channel leading off from them. It should be noted that the channel or water-pipe, is regarded simply as a hidden water-course.

Dead lands can be made into reserves and charges levied on them. To reserve dead lands is to protect them from revivification and private ownership, so that they may remain accessible to all and so that cattle can be put out to pasture on them. They can also be granted as a concession. A piece of dead land that has been reserved can lose its character as a "reserve", under certain conditions, if someone comes to revivify it. In the same way, if dead land granted as a concession is revivified by an individual who takes possession of it to the detriment of the one who has been granted the concession, the right of the revivifier does not prevail over that of the concessionary; in any case, where dead lands are granted as concessions, the beneficiaries of the concessions do not really become the owners before having revivified them. According to *fiḳh*, this is explained by the Prophet's saying "To the one who quickens a dead piece of land, that land belongs." In practice, one can understand all the importance that could be attached to making an ownerless and abandoned land usable and productive, a fiscal importance especially, since quickening involved the payment to the public treasury of the tax for the land, tithe or *kharādj*, in accordance with regional conditions.

MAWĀZĪN [see makāyīl].

MAWDŪD b. ʿIMĀD al-DĪN ZANKĪ, Ḳuṭb al-Dīn, Atabeg [see atabak] of al-Mawṣil.

ʿImād al-Dīn Zankī, on his death on 6 Rabīʿ II 541/15 September 1146, left four heirs: of these Mawdūd b. ʿImād al-Dīn Zankī, Ḳuṭb al-Dīn al-Aʿradj, the youngest of his sons, was only sixteen years old. The eldest, Sayf al-Dīn Ghāzī represented his father at al-Mawsīl of which Zankī [*q.v.*] held only the usufruct; the second son, Nūr al-Dīn Maḥmūd [*q.v.*], twenty-nine years old, accompanied his father in his campaigns; the third, Nuṣrat al-Dīn Amīr-Amīrān was named as heir presumptive when the former was ill, in Ramaḍān 552/October 1157, and later sent to Ḥarrān as governor. Mawdūd also had a sister who married the *amīr* Nāṣir al-Dīn al-Ṣūrī. The task of appointing Zankī's successor was in the hands of two trusted counsellors: the vizier Djamāl al-Dīn Muḥammad b. ʿAlī al-Djawād al-Isfahānī, and the chamberlain (*ḥādjib*) Ṣalāḥ al-Dīn Muḥammad al-Yāghīsiyānī, titulary *amīr* of Ḥamāt.

At the time of his illness, Sayf al-Dīn Ghāzī I transferred power to his youngest brother Ḳuṭb al-Dīn Mawdūd at the request of his loyal counsellors Djamāl al-Dīn and Zayn al-Dīn Küčük, who had previously served Zankī. The young prince was placed under the supervision of the vizier and the Begteginid [*q.v.*] *amīr*. Some weeks later, in Djumādā II 544/October 1149, Sayf al-Dīn died at about forty years old, leaving a son of tender years. Mawdūd, on his succession, maintained in office the two loyal retainers of his father and of his eldest brother. The council was completed with the appointment of the *amīr* ʿIzz al-Dīn Abū Bakr al-Dubaysī. Also associated with this triumvirate was another loyal supporter of Zankī, a jurist, the *ḳāḍī* Kamāl al-Dīn Abu 'l-Faḍl Muḥammad al-Shahrazūrī. On his assumption of power, Ḳuṭb al-Dīn Mawdūd, succeeding to the eldest of the family, took up residence in the governor's palace and ordered the imprisonment of his elder brother Nuṣrat al-Dīn Amīr-Amīrān who had sought to establish a faction of *amīrs*. Nūr al-Dīn, for his part, had favoured the installation of Mawdūd at al-Mawṣil. Recognised by the army and the population as sovereign of the entire Djazīra, his position was confirmed by the investiture of the Saldjūḳ sultan Masʿūd b. Muḥammad [*q.v.*] and that of the caliph al-Muḳtafī [*q.v.*]. Shortly after his accession to power, Ḳuṭb al-Dīn Mawdūd married the princess Zumurrud Khātūn, daughter of Tīmurtāsh, the Artuḳid prince of Mardīn [*q.v.*] who had previously offered her to Sayf al-Din as a means of sealing an alliance with the Zankids.

A crisis soon erupted in 544/1149 between Ḳuṭb al-Dīn and his elder brother Nūr al-Dīn regarding the town of Sindjār [*q.v.*], where a third of the treasure of Zankī was stored in the citadel. The *amīr* ʿAbd al-Malik, governor of Sindjār, receiving no reply from Aleppo to the overtures that he had made to Nūr al-Dīn, made his way to al-Mawsīl to pledge allegiance to Mawdūd. Meanwhile, his son Shams al-Dīn had offered Sindjār to Nūr al-Dīn on condition that he himself should retain the treasure. On Monday 10 Radjab 544/13 November 1149, Nūr al-Dīn occupied Sindjār and succeeded in winning over to his side the *amīr* Fakhr al-Dīn Ḳara Arslān b. Dāwūd of Ḥiṣn Kayfā, a rival of Tīmurtāsh of Mārdīn, the father-in-law of Ḳuṭb al-Dīn. Learning of the forthcoming alliance of the Aleppo and the Artuḳid troops, Mawdūd returned to Sindjār. Accused of improperly appropriating the treasure. Nūr al-Dīn was able to argue his right of superior age in his defence; he expressed his wish to discuss with Mawdūd the problems raised by the succession to Sayf al-Dīn, and drew his attention to the considerable number of *amīrs* who had rallied to his cause. Mawdūd's counsellors feared desertions to the side of Nūr al-Dīn and considered that if the ruler of Aleppo were to emerge the victor in the confrontation, the sultan would come to attack al-Mawṣil which, enfeebled, would be incapable of resisting him. On the other hand, if Nūr al-Dīn were to be defeated, the most reliable bastion against the Crusaders would collapse and the Franks would then be able to extend still further. With the threat from common adversaries, the Saldjuḳ sultan to the East and the Crusaders to the West, the only solution was to make peace between the members of the Zankid family. The negotiations, skilfully conducted by Djamāl al-Dīn al-Djawād, led to an agreement between the two brothers. Nūr al-Dīn returned Sindjār in exchange for Ḥimṣ which had been given to his brother Sayf al-Dīn to reward him for his support against the second Crusade. Nūr al-Dīn also received al-Raḥba and al-Raḳḳa on the Euphrates as well as Edessa or al-Ruhā [*q.v.*]. The portion of the treasure

of Zankī stored at Sindjar was to be used to finance the djihād of Nūr al-Dīn.

In 553/1158, when ill, Nūr al-Dīn named his brother Ḳuṭb al-Dīn Mawdūd as eventual successor and made his own *amīrs* promise to obey him. Mawdūd, crossing the Euphrates between Ṣiffīn [*q.v.*] and al-Raḳḳa, made his way towards Damascus to visit his brother. Meanwhile, having recovered, Nūr al-Dīn had returned to northern Syria; the two Zankid princes set out to take Ḥarrān, which they entrusted to the *isfahsālār* Zayn al-Dīn ᶜAlī Küčük.

In the following year, Mawdūd arrived with powerful reinforcements to assist Nūr al-Dīn, who was threatened at Aleppo by the advance of a Frankish-Byzantine coalition. In Dhu 'l-Ḥidjdja 554/December 1159-January 1160, news came of the death of the Saldjūḳ sultan Muḥammad b. Maḥmūd [*q.v.*] at Hamadhān. This event was of importance to Mawdūd, who was holding prisoner at al-Mawṣil Sulaymān Shāh, one of the candidates for the succession. After long negotiations, Mawdūd agreed to release his prisoner on condition that he be appointed Atabeg of the new sultan and that the latter take Djamāl al-Dīn al-Djawād as vizier and ᶜAlī Küčük as commander of the sultan's armies. Escorted by troops from al-Mawṣil, Sulaymān Shāh set out for Hamadhān, but, the victim of a conspiracy, he was poisoned and died on the way. Mawdūd's troops turned back, and there were no further links between al-Mawṣil and Khurāsān. In Ramaḍān 559/August 1164, Mawdūd received an appeal yet again from Nūr al-Dīn, who wanted the assistance of his allies in causing a diversion in northern Syria with the aim of averting an invasion of Egypt by the Franks. Mawdūd responded by sending considerable contingents which laid siege to Ḥarīm [*q.v.*], but on hearing of the presence in the region of the Byzantine troops of the Emperor Manuel, the army of al-Mawṣil withdrew, linked up with the contingents of Nūr al-Dīn and contributed to the victory of ᶜImm which enabled the Zankid princes to take Ḥarīm.

During the second campaign of the *amīr* Shīrkūh in Egypt, Mawdūd sent, at the request of Nūr al-Dīn, reinforcements to take part in operations against the Count of Tripoli.

At the end of summer 562/1167 he returned to al-Mawṣil with troops exhausted by the campaign and by the fast of Ramaḍān. In token of gratitude to his brother, Nūr al-Dīn ceded al-Raḳḳa to him. Having learned that after the death on 27 Ramaḍān/17 July of Ḳara Arslān, the prince of Ḥiṣn Kayfā and of Diyār Bakr, his succession reverted to his son and designated heir, Nūr al-Dīn Muḥammad (562-81/1167-85), Mawdūd wanted to attack the territories of the young Artuḳid prince; but Nūr al-Dīn Maḥmūd ordered his brother to abstain from any hostile action. In 563/1168, the Begteginid *amīr* Zayn al-Dīn ᶜAlī Küčük, who had served Zankī and then Mawdūd, asked leave to go into retirement; he then returned to his master all the places that he had received in *iḳṭāᶜ* in order to cover the expenses incurred by his professional duties. The *amīr* Ṭāhir, the lieutenant of Zayn al-Dīn at Takrīt [*q.v.*], refused to concede his charge to the representatives of Mawdūd, but promised his continuing loyalty to him. In order to avoid any intervention on the part of the caliph, the Zankid princes accepted the *status quo* at Takrīt. As a replacement for the retired *amīr*, Mawdūd appointed as vizier at al-Mawṣil one of his own *mamlūks*, the eunuch Fakhr al-Dīn ᶜAbd al-Masīḥ. When Mawdūd's illness worsened, he decided to name as his successor his eldest son ᶜImād al-Dīn Zankī, who had married one of his cousins, the daughter of Nūr al-Dīn Maḥmūd. Fakhr al-Dīn, who conducted affairs of state at al-Mawṣil, did not approve of this decision, since he wanted to withdraw from the tutelage of the ruler of Aleppo, who did not like him. He decided to engineer the downfall of ᶜImād al-Dīn, and allied himself with one of the wives of Mawdūd, the daughter of the Artuḳid Ḥusām al-Dīn Tīmurtāsh b. Īlghāzī and mother of Sayf al-Dīn Ghāzī. The vizier succeeded in making his master revoke his decision. Mawdūd, being close to death, summoned his *amīrs* together and made them pledge allegiance to his youngest son. It was thus that the young Sayf al-Dīn Ghāzī acceded to the throne as legitimate heir when his father died following his illness on 22 Dhu 'l-Ḥidjdja 565/6 September 1170. Fakhr al-Dīn ᶜAbd al-Masīḥ continued to administer all the business of al-Mawṣil, while Nūr al-Dīn lost the control which he had exercised over the city during the lifetime of his youngest brother.

One of the daughters of Mawdūd, ᶜAzīzat al-Dīn Akhshāwrā Khātūn, wife of al-Malik al-Muᶜaẓẓam, constructed in 610/1213, on the banks of the river Ṭawra, at Ṣāliḥiyya, the Ḥanafī funerary *madrasa* of al-Māridāniyya. One of his grand-daughters, Tarkan Khātūn, daughter of ᶜIzz al-Dīn Masᶜūd b. Ḳuṭb al-Dīn Mawdūd, wife of al-Malik al-Ashraf Mūsā, who died in 640/1242, constructed at Ḳāsiyūn [*q.v.*] in the same suburb of Damascus the Shāfiᶜī funerary *madrasa* of al-Atābakiyya.

In the writings of western chroniclers of the Crusades the name of Mawdūd is transcribed in such renderings as Malducus, Maldutus or Manduit.

(N. Elisséeff)

MAWDŪD B. **MASᶜŪD**, Abu 'l-Fatḥ, Shihāb al-Dīn wa 'l-Dawla, Ḳuṭb al-Milla, sultan of the Ghaznawid [*q.v.*] dynasty, reigned 432-40/1041-winter of 1048-9.

He was probably born in 401/1010-11 or 402/1011-12 as the eldest son of Masᶜūd b. Maḥmūd [*q.v.*], and during his father's reign was closely associated with the sultan on various military expeditions. When Masᶜūd was deposed and then killed in Djumādā I 432/January 1041, Mawdūd made himself the avenger against the rebellious commanders and their puppet, his uncle Muḥammad b. Maḥmūd. He marched from Balkh, secured the capital Ghazna, and met Muḥammad's army coming from India near Djalālābād, at a place subsequently named Fatḥābād, for Mawdūd completely defeated the rebels in Radjab 432/March 1041. Muḥammad and all but one of his sons were executed, and a threat from Mawdūd's younger brother Madjdūd, governor of Multān, scotched by the latter's mysterious death, so that Mawdūd became unchallenged ruler now in Ghazna.

He faced formidable problems in combatting the Saldjūḳs in eastern Khurāsān and Sīstān. He attempted an alliance with the Saldjūḳ's Ḳarakhānid enemies in Transoxania [see ILEK-KHĀNS], and in 435/1043-4 invaded Ṭukharistān, but was repulsed by Čaghrī Beg's son Alp Arslan. Northern Afghānistān now passed definitively to the Saldjūḳs, and a further endeavour by Mawdūd to organise a grand coalition of anti-Saldjūḳ princes in Transoxania and Persia was cut short by his own death. Early in his reign, Mawdūd sent forces into Sīstān in order to retain Ghaznawid overlordship over the Ṣaffārids there and to exclude Saldjūḳ influence, but the local *amīr* Abu 'l-Faḍl Naṣr b. Aḥmad had to pursue a policy of balance between his two powerful neighbours. The concerns of India had latterly much occupied Masᶜūd, but his violent end provided an opportunity for the reassertion of independence by various Indian tributary rulers. A coalition of *rādjās* recaptured Hānsī, Thānesar, etc., but was however driven back from Lahore in 435/1043-4.

Mawdūd died of an internal complaint just at the beginning of his new attempt at a revanche against the Saldjūḳs, probably in Djumādā II 440/December 1048, although the sources diverge on this. He was clearly a skilful commander and able ruler who managed to pull the empire together after the cataclysms which had come upon it and who withstood the eastwards pressure of the Saldjūḳs; but even had he been granted a long reign, it is doubtful whether he would have been able to recover the lost western provinces.

Bibliography: The main primary sources are Gardīzī, Djūzdjānī, Ibn al-Athīr, Ibn Bābā and Fakhr-i Mudabbir; these are used in C. E. Bosworth, *The later Ghaznavids, splendour and decay. The dynasty in Afghanistan and Northern India 1040-1186*, Edinburgh 1977, 20-37. (C. E. Bosworth)

MAWDŪDĪ, SAYYID ABU 'L-AᶜLĀ (commonly anglicised to Maudoodi), journalist, fundamentalist theologian, major influence in the politics of Pakistan and one of the leading interpreters of Islam in the twentieth century. He was born on 3 Radjab 1321/25 September 1903 at Aurangabad in India's Hyderabad State. His family claimed direct descent from Khʷādja Ḳuṭb al-Dīn Mawdūd Čishtī (d. 577/1181-2); his ancestors migrated to the subcontinent in the later 9th/15th century and produced many spiritual leaders. His father, a lawyer, came from Dihlī and was associated with Sayyid Aḥmad Khān [*q.v.*], but preferred to live in Hyderabad, which was the last significant centre of the Mughal tradition. When young, Mawdūdī was carefully insulated from western culture and the English language; educated at home, and briefly in one of Hyderabad's *madrasas*, he experienced neither the typical schooling of the *ᶜālim* nor that of the British Indian government. After Mawdūdī's father died when he was sixteen, he supported himself for a decade as a journalist, most notably as editor of *al-Djamᶜiyyat* from 1924 to 1927, the organ of the *Djamᶜiyyat-i ᶜUlamāʾ-i Hind.* During this decade he was involved in the *Khilāfat* movement [see KHILĀFA], came to know many *ᶜulamāʾ* and became thoroughly versed in Arabic. He also learned English, went clean-shaven and wore western dress.

In the mid-1920s, Mawdūdī's activities gained a significant new focus. Stung by Hindu accusations that Islam was spread by the sword, after a Muslim assassinated the Arya Samaj leader, Swami Shraddhanand, he embarked on an exhaustive study of the doctrine of *djihād* [*q.v.*]. This work, which was first serialised in *al-Djamᶜiyyat* and then published under the title *al-Djihād fi 'l-Islām*, heralded most elements of his later thought. The effort of composition greatly intensified his understanding of his faith, and in 1928 he retired to Hyderabad to do further research and writing. In 1932 he undertook the editorship of the monthly journal *Tardjumān al-Ḳurʾān*, which was to be the main vehicle of his ideas for the rest of his life. He knew now what he had to do: "The plan of action I had in mind was that I should first break the hold which Western culture and ideas had come to acquire over the Muslim intelligentsia, and to instil in them the fact that Islam has a code of life of its own, its own culture, its own political and economic systems and a philosophy and an educational system which are all superior to anything that Western civilisation could offer. I wanted to rid them of the wrong notion that they needed to borrow from others in the matter of culture and civilisation." (Sayyid Abul Ala Maudoodi, *Twenty-nine years of the Jamaat-e-Islami*, in *The Criterion*, v/6, 45). The intensity of this feeling runs through the pages of his *Risāla-yi Dīniyyāt* of 1932; the fear of the corrupting influence of western civilisation is manifest in his articles on *pardah* first published in 1935.

The last decade of British rule brought new fears: that independence would bring the absorption of the Muslim identity into a secular Hindu-dominated nation-state, and that the Muslim response of aiming to found a separate Muslim nation-state of Pakistan was not the right one. Mawdūdī now intervened in politics. In a series of articles, later published under the title *Musalmān awr mawdjūda siyāsī kashmakash*, he reminded Muslims that they were a separate nation in the Indian environment, while at the same time emphasising that they were not one in any European sense, as the All-India Muslim League was suggesting. Muslims were in danger of forgetting that they had a message for all humanity. The way to carry this message forward was to establish not a nation state of Muslims but an Islamic state in which every constituent part would reveal Islam in ideal and practice. In August 1941 Mawdūdī founded the *Djamāᶜat-i Islāmī*, a carefully-selected righteous élite of which he was the leader, to put these ideas into effect.

The emergence of Pakistan in 1947 gave Mawdūdī a forum in which he could act. From 1948 to 1956 his writings and deeds, supported by the *Djamāᶜat-i Islāmī*, played the key role in directing Pakistan away from developing the form of the secular state which its founders had in mind towards the goal of an Islamic state. His pressure was primarily responsible for the Islamic content of the "Objectives Resolution" of the Constituent Assembly (March 1949) which laid down the main principles on which Pakistan's constitution

was to be based. His leadership brought the representatives of all groups of *ʿulamāʾ* to agree in January 1951 on twenty-two principles of an Islamic state, which were to remain for all concerned in constitution-making the benchmark of the "conservative" position. His authority brought him to the fore in the agitation of 1952-3 against the Aḥmadiyya community of Pakistan, which helped to keep these twenty-two principles alive in the constitution-making process. It was in large part his achievement that the first constitution, which was promulgated in 1956, looked towards reconstructing "Muslim society on a truly Islamic basis and revising all existing laws in the light of the Qurʾan and Sunna". In 1953 Mawdūdī was for a period condemned to death; he was imprisoned during the years 1948-50 and 1953-5.

From 1956 the discussion of the role of Islam in the constitution died down and Mawdūdī, until restricted by ill-health in 1969, travelled widely outside Pakistan. He was a particularly frequent visitor to Saudi Arabia, where he took part in both the establishment and the running of Medina's Islamic university and the World Muslim League. Whenever an Islamic issue arose in Pakistan, like the Muslim Family Laws Ordinance of 1961 or the Aḥmadiyya question in 1974, he was prominent. Throughout he opposed the régimes governing Pakistan and, although he resigned from the headship of the *Djamāʿat-i Islāmī* in 1972, he was behind its involvement in the movement to overthrow Z. A. Bhutto in 1977. General Ḍiyāʾ (Ziyā) al-Ḥaḳḳ's régime, with its promise of Islamisation, was the first that he felt able to support. When Mawdūdī died on 22 September 1979, he did so knowing that Pakistan was at last ruled by a government that was trying to realise a version of his Islamic order.

Mawdūdī's academic output was voluminous: tradition, law, philosophy, history, politics, economics, sociology and theology being amongst the subjects covered. Many of his works have been translated, some into over a dozen languages. His masterwork is his Ḳurʾān commentary, *Tafhīm al-Ḳurʾān*, which took him thirty years to finish. His Islamic vision, nevertheless, is scattered through many different publications, many of which were written to meet problems of the moment. Good points of access are a series of radio talks he gave in 1948, *Islām kā niẓām-i ḥayāt*, and the collection of his writings on the Islamic state *The Islamic law and constitution*.

Central to Mawdūdī's vision is the belief that God alone is sovereign; man has gone astray because he has accepted sovereigns other than God, for instance, kings, nation states or custom. All the guidance which man needs can be found in the *Sharīʿa*, which offers a complete scheme of life where nothing is superfluous and nothing lacking. Political power is essential to put this divinely-ordained pattern into effect; the Islamic state has a missionary purpose. Moreover, because God's guidance extends to all human activity, this state must be universal and all-embracing, and because the state's purpose is to establish Islamic ideology it must be run by those who believe in it and comprehend its spirit—those who do not may just live withing the confines of the state as non-Muslim citizens (*dhimmīs*). Naturally, this state recognises that God not man is the source of all law. The state is merely God's vicegerent (*khalīfa*) on earth. It is a vicegerency, however, which is shared by all Muslim citizens of the state with whom, in consequence, the ruler must consult in the process of government. So Mawdūdī describes his policy as a "theo-democracy" in which the whole community of Muslims interpret the law of God within the framework supplied by the *Sharīʿa*. The ruler (*amīr*) is to be elected by whatever means are appropriate, providing that they ensure that the man who enjoys the greatest mesure of national confidence is chosen. His legislature (*madjlis-i shūrā*) is also to be elected by whatever means are appropriate, provided that they ensure the choice of men with the confidence of the people. Legislation itself takes place in four ways: by interpretation, by analogy, by inference, and, in that area of human affairs about which the *Sharīʿa* is silent, by independent judgement.

The major feature of Mawdūdī's thought is to have transformed Islam into an ideology, an integrated and all-embracing system. He aimed to set out the ideal order of the time of the Rightly-Guided Caliphs. The outcome is the most comprehensive statement of the nature of the Islamic state in modern times, and one which, while conjuring an ideal from the past, has been shaped by contemporary concerns and modes of thought. His exposition, as might be expected from a man who was primarily a theologian, is strong on general principles but weak on detail.

Mawdūdī is amongst the most influential of those Muslims who have felt, as the 20th century has progressed, that the answer to western domination need not be formulated in terms of nationalism and secularism but in terms of Islam. Himself inspired by Ibn Khaldūn, Shāh Walī Allāh, Muḥammad Iḳbāl and Ḥasan al-Bannāʾ [*q.vv.*], he has influenced in his turn men ranging from the leaders of Islamic movements in Egypt, Syria and Iran to many ordinary Muslims throughout the Islamic world.

Bibliography: A list of Mawdūdī's 138 works, with the details of English translations, and an indication of translations into other languages, plus a list of writings about Mawdūdī, can be found in Khurshid Ahmad and Zafar Ishaq Ansari (eds.), *Islamic perspectives: studies in honour of Mawlana Sayyid Abul Aʿla Mawdudi*, Leicester 1979, 3-14. Among Mawdūdī's more important publications the following should be noted: *Dīn-i ḥaḳḳ*, Lahore 1952, Eng. tr. *The religion of truth*, Lahore 1967; *Insān kā maʿāshī masʾala awr us kā islāmī ḥall*, Lahore 1941, Eng. tr. *Economic problem of man and its Islamic solution*, Lahore 1947; *Islām kā akhlāḳī nuḳta-yi naẓar*, Lahore 1955, Eng. tr. *Ethical viewpoint of Islam*, Lahore 1966; *Islām kā naẓariyya-yi siyāsī*, Lahore 1939, Eng. tr. *Political theory of Islam*, Delhi 1964; *Islām kā niẓām-i ḥayāt*, Lahore 1948, Eng. tr. *Islamic way of life*, Lahore 1950; *The Islamic law and constitution*, ed. and tr. Khurshid Ahmad, Lahore 1955; *al-Djihād fi 'l-Islām*, Aʿẓamgaṛh 1930; *Khuṭbāt*, Lahore 1957, Eng. tr. *Fundamentals of Islam*, Lahore 1975; *Musalmān awr mawdjūda siyāsī kashmakash*, 3 vols., Lahore 1937-9; *Pardah*, Lahore 1939, Eng. tr. *Purdah and the status of women in Islam*, Lahore 1972; *Ḳādiyānī masʾala*, Karachi 1953, Eng. tr. *The Qadiani problem*, Karachi 1953; *Risāla-yi dīniyyāt*, Hyderabad, Deccan 1932, Eng. tr. *Towards understanding Islam*, Lahore 1940; *Tafhīm al-Ḳurʾān*, 6 vols., Lahore 1949-72, Eng. tr. *The meaning of the Qurʾān* (incomplete), Lahore 1967-

The following writings about Mawdūdī should be noted: Freeland K. Abbot, *Maulana Maududi and Quranic interpretation*, in *MW*, xlviii/1 (1958), 6-19, and *Islam and Pakistan*, Ithaca 1968, 171-228; Charles J. Adams, *The ideology of Mawlana Mawdudi*, in D. E. Smith (ed.), *South Asian politics and religion*, Princeton 1966, 371-97, and *Mawdudi and the Islamic state*, in J. L. Esposito (ed.), *Voices of resurgent Islam*, New York 1983, 99-133; Aziz Ahmad, *Islamic modernism in India and Pakistan, 1857-1964*, London

1967, 208-23; Sayed Riaz Ahmad, *Maulana Maududi and the Islamic state*, Lahore 1976; Kalim Bahadur, *The Jamaʿat-i-Islami of Pakistan; political thought and political action*, New Delhi 1977; L. Binder, *Religion and politics in Pakistan*, Berkeley 1961; Maryam Jameelah, *Who is Maudoodi?*, Lahore 1973; Khalid bin Sayeed, *The Jamaat-i-Islami movement in Pakistan*, in *Pacific Affairs*, xxx/1 (March 1957), 59-68; Cheila McDonough, *Muslim ethics and modernity: a comparative study of the ethical thought of Sayyid Ahmad Khan and Mawlana Mawdudi*, Waterloo, Ont. 1984; H. Mintjes, *Mawlana Mawdudi's last years and the resurgence of fundamentalist Islam*, in *al-Mushir*, xxii/2 (1980), 46-73; E. I. J. Rosenthal, *Islam in the modern national state*, Cambridge 1965, 137-53, 221-72.

(F. C. R. Robinson)

MAWḲIF (A.), nomen loci from *w-ḳ-f* "to stand" hence "place of standing". Of the technical meanings of the term, three may be mentioned here:

(a) The place where the *wuḳūf* [*q.v.*] is held during the pilgrimage, viz. ʿArafāt [*q.v.*] and Muzdalifa [*q.v.*] or Dj̲amʿ. In well-known traditions, Muḥammad declares that all ʿArafāt and all Muzdalifa is *mawḳif* (Muslim, *Ḥadjdj*, trad. 149; Abū Dāwūd, *Manāsik*, bāb 56, 64, etc.; cf. Wensinck, *Handbook of early Muhammadan tradition*, s.v. ʿArafa). Snouck Hurgronje (*Het mekkaansche feest*, 150 = *Verspreide Geschriften*, i, 99) has conjectured that these traditions were intended to deprive the hills of ʿArafāt and Muzdalifa of their sacred character, which they doubtless possessed in pre-Islamic times.

(b) The place where, on the day of resurrection, several scenes of the last judgment will take place; cf. al-G̲h̲azālī, *al-Durra al-fāk̲h̲ira*, ed. Gautier, 577, 683,12, 813; cf. *Kitāb Aḥwāl al-kiyāma*, ed. M. Wolff, 65ff.

(c) In pre-Islamic times, *mawḳif* was one of the terms (together with *mash̲ʿar*, *nuṣub*, *mansak*, etc.) used to designate the religious shrines, usually in the form of stones, to be found along tracks and at camping sites, of the nomadic Arabs; cf. Wellhausen, *Reste*², 101ff., and T. Fahd, *Le panthéon de l'Arabie centrale à la veille de l'hégire*, Paris 1968, 238ff.

Bibliography: Given in the article; see also ḤADJDJ and ḲIYĀMA. (A. J. Wensinck)

MAWLĀ (A.), pl. *mawālī*, a term of theological, historical and legal usage which had varying meanings in different periods and in different social contexts. Linguistically, it is the noun of place of the verb *waliya*, with the basic meaning of "to be close to, to be connected with someone or something" (see *LA*, xx, 287ff.; *TA*, x, 398-401), whence acquiring the sense "to be close to power, authority" > "to hold power, govern, be in charge of some office" (see Lane, s.v.) and yielding such administrative terms as *wālī* "governor", and *wilāya* [*q.v.*] "the function of governor" or, in a legal context, "sphere of jurisdiction, competence".

I. In the Ḳurʾān and Tradition

Here we find *mawlā* used in two meanings.

(a) Tutor, trustee, helper. In this sense, the word is used in the Ḳurʾān, XLVII, 12: "God is the *mawlā* of the faithful, the unbelievers have no *mawlā* (cf. III, 143; VI, 62; VII, 41; IX, 51; XXII, 78; LXVI, 2). In the same sense, *mawlā* is used in the S̲h̲īʿī tradition, in which Muhammad calls ʿAlī the *mawlā* of those whose *mawlā* he is himself. According to the author of the *Lisān*, *mawlā* has the sense of *walī* in this tradition, which is connected with G̲h̲adīr K̲h̲umm (*q.v.*; cf. C. van Arendonk, *De opkomst van het Zaidietische imamaat*, 18, 19). It may be observed that it occurs also in the *Musnad* of Aḥmad b. Ḥanbal (i, 84, 118, 119, 152, 330-1; iv, 281, etc.).

(b) Lord. In the Ḳurʾānit it is in this sense (which is synonymous with that of *sayyid*) applied to Allāh (II,286; cf. VI,62; X,31), who is often called *Mawlānā* "our Lord" in Arabic literature. Precisely for this reason, in Tradition the slave is prohibited from calling his lord *mawlā* (al-Buk̲h̲ārī, *Dj̲ihād*, *bāb* 165; Muslim, *Alfāẓ*, trad. 15, 16).

It is not in contradiction to this prohibition that Tradition frequently uses *mawlā* in the sense of "lord of a slave", e.g. in the well-known *ḥadīth* "Three categories of people will receive a two-fold reward ... and the slave who fulfils his duty in regard to Allāh as well as to his lords" (al-Buk̲h̲ārī, *ʿIlm*, *bāb* 31; Muslim, *Aymān*, trad. 45).

Composition of *mawlā* and suffixes are frequently used as titles in several parts of the Muslim world, e.g. *mawlāy(a)* *(mulay)*, "my lord (especially in North Africa and in connection with saints); *mawlawī* (*mullā* [*q.v.*]), "lordship" (especially in India and in connection with scholars or saints).

The term *mawlā* is also applied to the former lord (patron) in his relation to his freedman, e.g. in the tradition "Who clings to a [new] patron without the permission of his [legal] *mawlā*, on him rests the curse of Allāh" (al-Buk̲h̲ārī, *Dj̲izya*, *bāb 17;* Muslim, *ʿItḳ*, trad. 18, 19).

II. In Historical and Legal Usage

Here the meaning of *mawlā*, a person linked by *walāʾ* ("proximity") to another person, similarly known as *mawlā*, varies according to the context in which it is found. In pre-Islamic poetry, it usually designates a party to an egalitarian relationship of mutual help, that is, a kinsman (*ibn ʿamm*), confederate (*ḥalīf*), ally or friend, a meaning also attested in the Ḳurʾān (IV, 37; XIX, 5; XLIV, 41) and some later literature (P. Crone, *Slaves on horses*, Cambridge 1980, appendix VI). In later literature, however, it more commonly designates a party to an unequal relationship of assistance, that is a master, manumitter, benefactor or patron on the one hand, and a freedman, protégé or client on the other. This sense too is attested in the Ḳurʾān, where the typical *mawlā* is God (VIII, 41; XXII,78, and *passim*; cf. XXXIII,5, where it means protégé). Applied to the inferior party in an Islamic context, *mawlā* almost always means a client of the type recognised in early Islamic law, though its use in the opposite sense was more flexible. The Islamic world has of course known many other types of client, but not by this name.

The client recognised in early law was a non-Arab freedman, convert or other newcomer in Muslim society. Since non-Arabs could only enter this society as clients, *mawlā* came to be synonymous with "non-Arab Muslim", and the secondary literature usually employs the word in this sense (though the lexicographers fail to list it, cf. *LA* and *TA*, s.v. *w-l-y*). It is also with non-Arab Muslims that this article will be concerned.

1. Pre-Islamic Arabia.

The Islamic institution of *walāʾ* is generally assumed to be of Arabian origin (cf. Goldziher, *Muh. Stud.*, i, ch. 3; J. Juda, *Die sozialen und wirtschaftlichen Aspekte der Mawālī in frühislamischer Zeit*, Tübingen 1983), but this is scarcely correct. Leaving aside

foreign merchants and colonists under imperial protection, the non-Arab population of pre-Islamic Arabia consisted of Jews, slaves and freedmen of African and Middle Eastern extraction, half-bred descendants of colonists, and presumably also ethnic and occupational pariah groups of the type attested in modern times (Ḳawāwila, Bayādīr, Ṣulubbīs, etc.). There is no reason to doubt that all were known as *mawālī* in the sense of "kinsmen", in so far as they were free and came under Arab protection (cf. the modern use of the word *akh* "brother"), but the question is, what this implied. Are we to take it that all non-Arabs were individually assigned to Arab patrons and acquired partial membership of Arab tribes through them, having no social organisation of their own? Or did they form social groups of their own, so that they were collectively placed under the protection of Arab tribes in which they acquired no membership at all, merely becoming their satellites? The first solution is that enshrined in Islamic *walāʾ*, but it is the second which is attested for Arabia.

Thus it is well known that the Jews of Arabia formed tribal groups of their own. In fact, Jewish tribes were sometimes strong enough to escape Arab protection altogether (and thus also the status of *mawālī*). But this was hardly the common pattern. The Jews of Fadak, for example, paid protection money to Kalb (M. J. Kister, *On the wife of the goldsmith from Fadak and her progeny*, in *Muséon*, xcii [1979], 321); the Jews of Wādī 'l-Ḳurā similarly paid what would nowadays be known as *khuwwa* to Arab overlords (al-Bakrī, *Muʿdjam mā istaʿdjam*, ed. F. Wüstenfeld, Göttingen 1876-7, i, 30); and those of Yathrib were reduced to client status by the Aws and Khazradj [*q.vv.*] some time before the rise of Islam (J. Wellhausen, *Skizzen und Vorarbeiten*, iv, Berlin 1889, 7ff.). Naturally, client status weakened the tribal organisation of the Jews; the same is true of modern pariah groups. But the Jewish tribes were not dissolved, nor were the Jews assigned to individual patrons: clientage was a relationship between groups. Similarly, the Arabised descendants of the Persian workmen and prostitutes of Hadjar clearly formed a quasi-tribal group of their own under ʿAbdī protection, for all that they adopted the *nisba* of their protectors (al-Ṭabarī, i, 986).

The question is thus, whether freedmen were treated differently? On this point, the evidence is less conclusive. Continuing relations between manumitter and freedman were clearly common, and there is evidence that the pre-Islamic Arabs practised manumission with what the Greeks called *paramonē*, a clause requiring the freedman to stay with the manumitter for a specified number of years or until the latter died (P. Crone, *Roman, provincial and Islamic law*, Princeton 1987). But continuing relations between manumitter and freedman in no way imply that the latter was incorporated in the manumitter's kin; the paramonar freedman only became a member of his household, and then only for a specified time; and one would in general have thought the pre-Islamic Arabs as reluctant to contaminate their agnatic kin with non-Arab freedmen as were their descendants in more recent times. The freedmen (and indeed slaves) of modern Arabia formed lineages of their own, and it was through them, not through their manumitters, that they acquired their rights and duties in respect of marriage, succession and vengeance; and it was to the manumitters' tribe as a political entity that they stood in a relationship of dependence, paying it military assistance and/or *khuwwa* (J. L. Burckhardt, *Notes on the Bedouins and the Wahábys*, London 1830, i, 181f.; A. Jaussen, *Coutumes des Arabes au pays de Moab*², Paris 1948, 125f.; cf. A. Musil, *The manners and customs of the Rwala Bedouins*, New York 1928, 276).

It should be noted that non-Arabs were not generally affiliated as confederates. *Ḥilf* [*q.v.*] was a mechanism for the partial or total incorporation of foreigners, individually or as groups, and it is frequently regarded as ancestral to Islamic *walāʾ*. But *ḥilf* was used only for *Arab* foreigners, or more precisely for foreigners with full tribal status. The Jews thus qualified on occasion, as did others such as the Abnāʾ [*q.v.*] but only to the extent that they escaped client status (though there are admittedly ambivalent cases); non-Arab freedmen never qualified (cf. Goldziher, *Muh. Stud.*, i, 106). The *ḥalīf* is thus irrelevant to the question. By the same token, so is most of pre-Islamic poetry. The vast majority of *mawālī* mentioned in this poetry (where the word is exceedingly common) are Arabs from whom help of one sort or another could be expected: real, fictitious or metaphorical kinsmen (cf. *ibid.*, 105 n.; many more examples are given in Crone, *Roman, provincial and Islamic law*). Confederates are occasionally singled out as *mawālī 'l-yamīn*, "kinsmen by oath", as opposed to *mawālī 'l-wilāda* or *ḳarāba*, "kinsmen by birth/kinship" (G. W. Freytag, *Hamasae carmina*, Bonn 1828, 187; C. Lyall, ed. and tr., *The Mufaḍḍalīyāt*, Oxford 1918-21, no. 12:3; Ibn Hishām, 467; Nābigha al-Djaʿdī, *Dīwān*, ed. and tr. M. Nallino, Rome 1953, no. 12:41). But the distinction is usually quite neutral, and though confederates could obviously find themselves in a subservient position so that the dividing line between them and client groups was blurred (as it is in Nābigha; cf. Juda, *Aspekte*, 14-15) they were followers of a type quite different from that of non-Arab clients. It is only when the poets distinguish between *ṣamīm* (or *ṣarīḥ*) and *mawālī* that the latter would seem regularly to encompass servile and non-Arab elements, and the same is perhaps true when they speak of "tails" and "fins" of tribes (cf. Goldziher, *Muh. Stud.*, i, 105-6); but these passages are perfectly compatible with the proposition that freedmen and other non-Arabs should be seen as members of satellite groups rather than as persons "assimilated to the tribe by affiliation" (Goldziher).

2. The Rāshidūn caliphs and the Umayyads.

With the conquests, the Arabs found themselves in charge of a huge non-Arab population. Given that it was non-Muslim, this population could be awarded a status similar to that of clients in Arabia, retaining its own organisation under Arab control in return for the payment of taxes [see DHIMMA]. But converts posed a novel problem in that, on the one hand they had to be incorporated, not merely accommodated, within Arab society; and on the other hand, they had "forgotten their genealogies", suffered defeat and frequently also enslavement, so that they did not make acceptable *ḥalīfs*; the only non-Arabs to be affiliated as such were the Ḥamrāʾ and Asāwira, Persian soldiers who deserted to the Arabs during the wars of conquest in return for privileged status (al-Balādhurī, *Futūḥ*, 280, 373). It was in response to this novel problem that Islamic *walāʾ* was evolved, presumably by the authorities and at an early stage, though nothing can be said with certainty about its emergence.

(a) Early Islamic *walāʾ*. What follows is based on a collation of information in classical law (below, section 5), *ḥadīth* and historical sources. All non-Arabs who aspired to membership of Arab society had to

procure a patron (an "upper" *mawlā* in the terminology of the lawyers). Freedmen automatically acquired a patron in their manumitter, unless the latter renounced the tie. Free persons and those freed without *walāʾ* had to acquire one by agreement. Contractual clientage was known as *walāʾ* of *muwālāt* ("inclination", "attachment", the term generally used in Ḥanafī literature), *tibāʿa* ("following", al-Ṭabarī, ii, 1853), *khidma* ("service", *Aghānī*, xii, 48) or *islām*, conversion: whoever converted "at the hands of" another became a client of the other according to a famous *ḥadīth* (*man aslama ʿalā yad ghayrih fa-huwa mawlāhu*). *Walāʾ* was a solution to the problem of affiliating non-tribesmen to a tribal society, and though most such non-tribesmen were clearly converts, conversion was not necessary for the legal validity of the tie. A fair number of non-Muslim clients, both freeborn and freed, are attested (Crone, *Slaves*, n. 358; al-Ṭabarī, i, 3185).

From the point of view of the authorities, the main role of the patron was to provide the client with an *ʿākila* [*q.v.*]. The patron and his agnates were required to pay compensation (*ʿakl, diya* [*q.v.*]) for bodily harm inflicted by the client, to the extent that the latter had no agnates of his own. Refusal to pay seems to have been a common problem (al-Kindī, *The governors and judges of Egypt*, ed. R. Guest, Leiden and London 1912, 333f., 335f.). Conversely, if the client was killed they were entitled to blood-money in compensation for him (cf. al-Kindī, *op.cit.*, 333f.). In return for his obligations, the patron acquired a title to the client's estate, though not an indefeasible one. The classical rules of exclusion are not, on the whole, favourable to the patron, but it is not known whether they applied in pre-classical law. The role of the client, on the other hand, was purely passive. He did not contribute to blood-money payable for damage inflicted by the patron, nor did he share in the receipt of blood-money if the patron was killed or acquire a title to his estate. He was not formally obliged to render *obsequium*. The patron by manumission could make over the patronate to a third party by sale, gift or bequest, and the parties to the contractual relationship could terminate theirs (in which case the client would need a new patron). If not, it would pass to the descendants of the two parties in perpetuity, though it would lose legal (but not necessarily social) importance as the client acquired agnates in Islam, Muslim clients could and frequently did have clients of their own.

From the point of view of the client, the main role of the patron was to provide him with access to a privileged society, and in practice the patron's rewards were far greater than those provided by the authorities. For one thing, the patron might qualify his grant of freedom with stipulations requiring the freedmen to pay regular sums, gifts or labour services to himself or a third party for a specified period, or reserving part or all of the freedman's estate for himself regardless of the presence of heirs (practices condemned in early *ḥadīth*; cf. Crone, *Roman, provincial and Islamic law*). For another thing, freedmen were notoriously loyal. They would stay by their manumitters in danger (al-Ṭabarī, i, 3001f., ii, 1959; cf. Ch. Pellat (tr.), *The life and works of Jāḥiẓ*, London 1969, 215, 260), share their sorrows (cf. al-Ṭabarī, ii, 384), assist them in need (though for one who refused, see *Aghānī*[3], xvi, 107), attend to them in death (al-Ṭabarī, i, 3046, ii, 1751) and seek to avenge them (*ibid.*, ii, 1049; al-Balādhurī, *Ansāb*, v, 338). Concerning the services provided by contractual clients, we are less well informed. Like freedmen, they clearly went to swell their patrons' retinues, both military and civilian (M. J. Kister, *The Battle of the Ḥarra*, in *Studies in memory of Gaston Wiet*, Jerusalem 1977, 44; Crone, *Slaves*, 53f.), and they must have performed other types of *khidma* too. But patrons preferred freedmen to *mawālī tibāʿa* (al-Ṭabarī, ii, 1852f.).

(b) The *mawālī* in Umayyad society. No formal disabilities seem to have attached to the status of client in public law. In principle, clients were in a dependent position only vis-à-vis their patrons, enjoying the same rights and duties as other Muslims in society at large (*lahum mā lanā wa-ʿalayhim mā ʿalaynā*). In practice, of course, there was massive prejudice against them. The Arabs generally equated them with slaves, partly because they were unwarlike agriculturalists (Ḥassān b. Thābit, *Dīwān*, ed. and tr. H. Hirschfeld, Leiden and London 1910, no. 189:8; cf. Dhu 'l-Rumma, *Dīwān*, ed. C. H. H. Macartney, Cambridge 1919, no. 29:48), partly because they had suffered spectacular military defeat ("O men, do you not see how Persia has been ruined and its inhabitants humiliated? They have become slaves who pasture your sheep, as if their kingdom was a dream", Nābigha al-Djaʿdī, no. 8:12f.), and, finally, because the majority of clients were freedmen. Christian and Muslim sources are agreed that the Arabs took enormous numbers of prisoners-of-war during the wars of conquest. "He killed and took prisoners" is the standard expression for the activities of a conqueror in the Muslim ones (Khalīfa b. Khayyāṭ, *Taʾrīkh*, ed. S. Zakkār, Damascus 1967-8, i, 127, 163, 168, 171, 178, 237, 242; Sebeos, *Histoire d'Héraclius*, tr. F. Macler, Paris 1904, 100f., 110, 146; Bar Penkaye in A. Mingana, ed. and tr., *Sources syriaques*, Leipzig [1907], *147 = *175; Michael the Syrian, *Chronique*, ed. and tr. J.-B. Chabot, Paris 1899-1910, iv, 417 = ii, 422); and the usual fate of prisoners-of-war was enslavement. Moreover, many localities were required by treaty to supply a specified number of slaves to the Arabs, such as 30,000 or 100,000 once and for all or a smaller number annually (al-Ṭabarī, ii, 1238, 1245, 1246, 1321, 1329, 1667; al-Balādhurī, *Futūḥ*, 208; C. E. Bosworth, *Sīstān under the Arabs*, Rome 1968, 17; M. Hinds and H. Sakkout, *A letter from the governor of Egypt to the King of Nubia and Muqurra concerning Egyptian-Nubian relations in 141/758*, in *Studia Arabica et Islamica I. ʿAbbās*, ed. W. al-Qāḍī, Beirut 1981; Juda, *Aspekte*, 64-5). Victims of war and their descendants thus outnumbered freeborn clients, and "slaves" was the standard term of abuse for a client of any kind (al-Ṭabarī, ii, 1120, 1431; al-Balādhurī, *Ansāb*, iva, 247, v, 356; *Aghānī*[3], xvi, 107). Naturally, such men were subject to numerous disabilities in the society of their conquerors. Slaves and clients were "vile" (*TA*, s.v. *h-w-y*), and clients of clients were "the most miserable persons to walk on earth" (al-Balādhurī, *Ansāb*, ivb, 10; cf. al-Farazdak in *LA* and *TA*, s.v. *w-l-y*). Thus a *mawlā* who married an Arab woman risked both penalties and the dissolution of his marriage (*Aghānī*[3], xvi, 106f.; cf. also Goldziher, *Muh. Stud.*, i, 128ff.), though such marriages are unlikely to have been officially prohibited (below, (d)). A *mawlā*'s life was felt to be worth less than that of an Arab, so that an Arab should not be killed in retaliation for a client (al-Balādhurī, *Ansāb*, iva, 220), while conversely, retaliation inflicted upon a client failed to compensate for harm suffered by an Arab (al-Ṭabarī, ii, 1849). A *mawlā* was not worth avenging (though Ḳutayba b. Muslim [*q.v.*] invoked a moral obligation to do so in an unusual situation where the client was a Transoxanian prince, al-Ṭabarī, ii, 1249); it was by way of insult to their victim that Arab avengers would claim to have killed so-and-so for a mere *mawlā* or slave (al-

Azdī, *Ta'rīkh al-Mawṣil*, ed. ʿA. Ḥabība, Cairo 1967, 62; al-Dīnawarī, *al-Akhbār al-ṭiwāl*, ed. V. Guirgass, Leiden 1888, 350; al-Ṭabarī, i, 3276, ii, 710). Above all, *mawālī* were felt to be unsuitable for positions of authority, such as that of prayer-leader, judge or governor (Goldziher, *Muh. Stud.*, i, 109 n., 116; Ṣ. A. al-ʿAlī, *al-Tanẓīmāt al-idjtimāʿiyya wa 'l-iḳtiṣādiyya fi 'l-Baṣra*², Beirut 1969, 96f.; Ibn Ḳudāma, *al-Mughnī*, ed. T. M. al-Zaynī and others, Cairo 1968-70, vii, 33; Juda, *Aspekte*, 182-4); as late as 133/750-1 the inhabitants of Mawṣil objected to the appointment of a *mawlā* as governor (al-Azdī, *Mawṣil*, 146). Confronted with this prejudice, non-Arab Muslims initially made their careers mainly in the service of their patrons, and the tie between patron and client remained important throughout the Umayyad period; but their education, skills and sheer number was such that they rapidly achieved positions of influence in their own right.

Civilian careers. Many non-Arabs had worked as labourers, craftsmen, traders and shopkeepers while still slaves, and many continued in such occupations on their manumission (cf. Juda, *Aspekte*, 109ff.) But we hear more about those who remained members of their patrons' households, especially those of governors, who would employ them as messengers, spies, executioners and other agents of various kinds (al-Ṭabarī, i, 2138, ii, 40, 246f., 268, 1276, 1649). Governors and caliphs alike also employed their own freedmen as *ḥādjibs* [*q.v.*], see the information at the end of each reign in Khalīfa, *Ta'rīkh*, and al-Masʿūdī, *Tanbīh*, 284ff.; al-Balādhurī, *Ansāb*, v, 172; al-Ṭabarī, ii, 1650). But *mawālī* played a more important role as administrators. Some administered their patron's estate (al-Balādhurī, *Futūḥ*, 8; al-Ṭabarī, ii, 1734; Juda, *Aspekte*, 119-20); a great many administered the empire. Thus a secretary (*kātib* [*q.v.*]) was usually a non-Arab, sometimes a non-Muslim (al-Masʿūdī, *Tanbīh*, 302, 307, 312; al-Balādhurī, *Ansāb*, xi (= *Anonyme arabische Chronik*, ed. W. Ahlwardt, Greifswald 1883, 343), but more commonly a convert (cf. al-Djahshiyārī, *Kitāb al-wuzarā' wa 'l-kuttāb*, ed. M. al-Saḳḳā' and others, Cairo 1938, 61) or a freedman; being appreciated for their skills rather than their personal loyalties, such men were employed not only by their own patrons (e.g. al-Djahshiyārī, 54, 64; al-Ṭabarī, ii, 837ff.) but also by others (e.g. al-Masʿūdī, *Tanbīh*, 302, 312, 316, 317, etc.; al-Ṭabarī, *loc.cit.*; al-Djahshiyārī, 66).

The various sections of the *dīwān* [*q.v.*] in a particular province, or indeed the entire *dīwān*, were commonly headed by *mawālī* (al-Ṭabarī, ii, 837ff., 1649, 1650; al-Djahshiyārī, 42, 69; al-Balādhurī, *Ansāb*, ivb, 83, 123). Moreover, *mawālī* soon came to be appointed as fiscal governors, sometimes on behalf of top Arab governors, but frequently in their own right. We hear of such appointments in Mecca and Medina (Ibn Ḥabīb, *al-Muḥabbar*, ed. I. Lichtenstädter, Hyderabad 1942, 379). Transoxania (al-Ṭabarī, ii, 1253, 1421, 1509), and ʿIrāḳ, where non-Arab fiscal governors played a major role in Arab politics (*ibid.*, 1282f., 1648; al-Djahshiyārī, 42f., 49, 63; Ibn ʿIdhārī, i, 39; al-Balādhurī, *Ansāb*, ivb, 123), as well as in Egypt, where three non-Arabs rose to the position of effective governor thanks to their control of the taxes, that is Usāma b. Zayd al-Salīḥī, a *mawlā* of Muʿāwiya (al-Djahshiyārī, 51) under Sulaymān, ʿUbayd (or ʿAbd) Allāh b. al-Ḥabḥāb [*q.v.*], a *mawlā* of Salūl under Hishām, and ʿAbd al-Malik b. Marwān b. Mūsā b. Nuṣayr, a *mawlā* of Lakhm (or the Umayyads) under Marwān II (al-Kindī, *Governors*, 93). Lesser administrative jobs were also in the hands of *mawālī* (al-Ṭabarī, ii, 1845; in general, see also Juda, *Aspekte*, 119-20).

Outside the administration, non-Arab Muslims rapidly came to dominate the world of scholarship. *Mawālī*, mainly descendants of captives, played a crucial role in the formation of the Islamic faith [see AL-ḤASAN AL-BAṢRĪ], Islamic law [see ABŪ ḤANĪFA, AL-AWZĀʿĪ, ṬĀWŪS], Ḳur'ānic studies [see ABŪ ʿUBAYDA] and the Prophet's biography [see IBN ISḤĀḲ], as well as in the collection of pre-Islamic poetry [see ḤAMMĀD AL-RĀWIYA]. They also produced some notable poets [see BASHSHĀR B. BURD]. Contemporaries were well aware of the preponderance of *mawālī* in scholarship (Goldziher, *Muh. Stud.*, i, 114f.), and in the second half of the Umayyad period it was usually *mawālī* who were accorded the role of tutor to the caliph's children (Ibn Ḥabīb, *Muḥabbar*, 476ff.; al-Ṭabarī, ii, 1741). In the same period they also began to receive appointment as judges (al-ʿAlī, *Tanẓīmāt*, 96 n).

Careers in the army. Leaving aside the Persian soldiers enrolled during the wars of conquest, non-Arabs initially entered the army only as private servants of their patrons. Every soldier had a number of slaves and freedmen registered under him in the *dīwān*; some governors acquired sizeable bodyguards of slaves and freedmen; and towards the end of the period it was common for governors and generals to have semi-private retinues of freedmen, contractual clients and other protégés (Crone, *Slaves*, 38, 53, 198f.). The *ḥaras*, or palace-guard, of the caliphs and their governors also seems usually to have been composed of and headed by *mawālī*, though not necessarily *mawālī* of the employer (cf. Khalīfa, *Ta'rīkh*, at the end of each reign; al-Ṭabarī, ii, 1384, 1499, 1569, 1650; al-Balādhurī, *Ansāb*, v, 172f.). But already Muʿāwiya placed a *mawlā* in command of troops in an expedition against Byzantium (Khalīfa, *Ta'rīkh*, i, 198, cf. 102), an example followed by ʿAbd al-Malik (al-Ṭabarī, ii, 1487; al-Balādhurī, *Futūḥ*, 160f.); and the Second Civil War decisively undermined the Arab monopoly of military power. Non-Arabs being available, everybody made use of them: thus Mukhtār [*q.v.*]; adherents of Ibn al-Zubayr (Kister, *Battle of the Ḥarra*, 44f.); and the Umayyads themselves (Crone, *Slaves*, 198; Khalīfa, *Ta'rīkh*, i, 335; al-Balādhurī, *Ansāb*, v, 356ff.), with the result that a *mawlā* became military governor of Medina for ʿAbd al-Malik (al-Ṭabarī, ii, 834, 852, 854). Thereafter, non-Arabs were regularly admitted as soldiers in their own right (cf. the rich documentation in Juda, *Aspekte*, 120ff.). Some were placed in special corps for *mawālī* with native skills of their own, such as the Berber *Waddāḥiyya* or the Indian *Ḳīḳāniyya*. Others joined the ordinary army, *mawlā* divisions being set up for their reception. According to a *Kitāb Mawālī ahl Miṣr* cited by Yāḳūt (i, 734), there were *mawlā* divisions in the Egyptian army already at the end of the First Civil War, when a freedman from Balhīb was made *ʿarīf* [*q.v.*] of the *mawālī* of Tudjīb. But the *ʿarīf* in question belongs to the end of the Second Civil War (cf. al-Kindī, *Governors*, 51), and it is only after the Second Civil War that such divisions are regularly mentioned, be it in Egypt, Khurāsān or elsewhere (Crone, *Slaves*, 38). There were *mawālī* in the Syrian army too, for all that *mawlā* divisions are not mentioned here after ʿAbd al-Malik (cf. *ibid.*, 274); we are incidentally given to understand that the Syrian troops in Egypt in 125/742-3 included *mawālī ahl Ḥimṣ* (al-Kindī, *Governors*, 83), and that those brought to Spain by Baldj b. Bishr [*q.v.*] included *mawālī* of the Umayyads, clearly among others (Lévi-Provençal, *Hist. Esp.* mus., i 98;

cf. also Juda, *Aspekte*, 84-5). *Mawālī* also participated in the revolt against al-Walīd II, but whether as regular soldiers or private retainers is not clear (al-Ṭabarī, ii, 1800, 1806f., 1809).

The proportion of non-Arabs to Arabs in the late Umayyad armies cannot be estimated. In 96/714-15 the *mawālī* of Khurāsān were numerically on a par with Bakr b. Wāʾil [*q.v.*], numbering 7,000 out of a total of 54,000 (al-Ṭabarī, ii, 1290f.). They must have become more numerous thereafter. Contrary to what is often stated, the Umayyads did not try to keep non-Arabs out of the army (cf. below); and the attempt to show that their numbers decreased after 96, at least in Khurāsān, rests on a misreading of the sources (M. A. Shaban, *The ʿAbbāsid revolution*, Cambridge 1970, 113, 115 and *passim*: the figure of 1,600 given for the rearguard in the Battle of the Pass scarcely refers to *mawālī*, and at all events, not to their total number; we are explicitly told that the governor had dispersed his troops before the battle and that two *mawlā* commanders, one in charge of 10,000, were among those who had gone elsewhere, cf. al-Ṭabarī, ii, 1532f., 1538, 1549, 1551). In fact, *mawālī* must have been particularly numerous in Khurāsān, where they are constantly mentioned and their participation in all military activities is taken for granted, be it in campaigns (*ibid.*, 1023, 1080, 1225, 1447, 1478, 1485, 1516, 1518, 1538, 1630f., cf. 1184f.) feuds (*ibid.*, 1856), or revolts and their suppression (*ibid.*, 1582, 1589, 1605, 1920f., 1926, 1933, cf. 1163, 1867, 1918f., 1922).

Once admitted to the army, *mawālī* began to receive both military *and* fiscal governorship. Thus the governor and general of Ḳinnasrīn in 75/694-5 was a *mawlā* of ʿAbd al-Malik (al-Balādhurī, *Futūḥ*, 188), and we incidentally learn that the governor of Baʿlabakk in 126/743-4 was also a client of the Umayyads (al-Ṭabarī, ii, 1790). The Djazīra received its first non-Arab governor under ʿUmar II and/or Yazīd II in Maymūn b. Mihrān, a *mawlā* of B. Naṣr (or Azd) who had been tutor to ʿUmar II's children and who was later to command the Syrian army against Byzantium (al-Azdī, *Mawṣil*, 37; Ibn Ḥabīb, *Muḥabbar*, 478; al-Ṭabarī, ii, 1487). *Mawālī* appear as sub-governors in Transoxania from the time of Ḳutayba onwards (al-Ṭabarī, ii, 1206, 1448, 1694f.), and they regularly ruled North Africa. Abu 'l-Muhādjir, who administered North Africa for ten years under Muʿāwiya, was appointed by his own patron, the governor of Egypt (al-Ṭabarī, ii, 94; al-Balādhurī, *Futūḥ*, 228). Similarly, Mūsā b. Nuṣayr [*q.v.*], a *mawlā* of disputed origin who enjoyed the protection of ʿAbd al-ʿAzīz b. Marwān [*q.v.*], ʿAbd al-Malik's governor of Egypt, was appointed by his protector. He in turn appointed a *mawlā* of his own, Ṭāriḳ b. Ziyād [*q.v.*] as commander in the conquest of Spain (al-Balādhurī, *Futūḥ*, 230f.; Ibn ʿIdhārī, i, 39f., 43). Thereafter, a succession of *mawālī* were appointed by the caliphs themselves. Sulaymān chose Muḥammad (or ʿAbd Allāh) b. Yazīd, a *mawlā* of the Umayyads (Ibn ʿIdhārī, i, 47). ʿUmar II appointed Ismāʿīl b. ʿAbd Allāh b. Abi 'l-Muhādjir, a *mawlā* of Makhzūm who had worked as tutor to his children (al-Balādhurī, *Futūḥ*, 231; Ibn Ḥabīb, *Muḥabbar*, 476). Ismāʿīl was followed by Yazīd b. Abī Muslim, a freeborn *mawlā* of al-Ḥadjdjādj's [*q.v.*] appointed by Yazīd II (al-Djahshiyārī, 42; al-Balādhurī, *Futūḥ*, 231); and when he in turn was murdered for his harsh policies, a *mawlā* of the Anṣār by the name of Muḥammad b. Yazīd was elevated from the troops by popular choice and, subsequently, caliphal appointment (al-Ṭabarī, ii, 1435; al-Djahshiyārī, 57; according to al-Ṭabarī, he was identical with the previous governor of that name). Hishām appointed ʿUbayd Allāh b. al-Ḥabḥāb, *mawlā* of Salūl, to Egypt, North Africa and Spain, and ʿUbayd Allāh neatly reversed the pattern by appointing his own patron to Spain (Ibn ʿIdhārī, i, 51ff.; al-Balādhurī, *Futūḥ*, 231).

Local influence. From the Second Civil War onwards, *mawālī* begin to appear in Muslim society and politics as men of local importance. Thus Ḥumrān b. Abān, a captive from ʿAyn al-Tamr [*q.v.*] and former secretary of ʿUthmān's, joined the pro-Umayyad Djufriyya in Baṣra in the Second Civil War and briefly achieved the position of governor there (Ch. Pellat, *Le milieu baṣrien et la formation de Ǧāḥiẓ*, Paris 1953, 270, 278; cf. 268, probably a doublet). Similarly, the wealthy family of ʿAbd Allāh b. Hurmuz, *mawālī* of the Umayyads and directors of the Baṣran *dīwān al-djund* from the time of al-Ḥadjdjādj onwards, are said to have been very influential in this city (al-Balādhurī, *Ansāb*, ivb, 123). In Khurāsān, the B. Ṣuhayb, *mawālī* of the B. Djaḥdar, enjoyed a position of eminence among the Rabīʿa and intervened in the local feuds during the Second Civil War (al-Ṭabarī, ii, 491ff.). In the Third Civil War, a certain Muḥārib b. Mūsā, *mawlā* of the B. Yashkur, emerged as *ʿaẓīm al-ḳadr* in Fārs, where he took to expelling Umayyad governors (*ibid.*, 1976f.). And of Ḥarīsh, a *mawlā* of Khuzāʿa who joined the ʿAbbāsid revolution, we are told that he was *ʿaẓīm ahl Nasā* (al-Dīnawarī, *Akhbār*, 341).

All in all, the *mawālī* must thus be said to have penetrated Arab society extremely fast. They played a predominant role in most activities outside the world of politics, controlled the civil administration almost from the start and made their presence felt in military politics within a generation of the conquests. Certainly, the Arabs retained their control of military politics until the end of the Umayyad period, most governorship and other politically influential posts being allocated to them; but the popular image of *mawālī* as an excluded people passively exposed to Arab whim and prejudice is quite wrong. Given the cultural and numerical discrepancy between the conquerors and their subjects, it is not really surprising that the latter acquired influence so fast: the conquerors simply could not govern without non-Arab help, as later Shuʿūbīs were to point out; indeed, they needed their advice even in matters of food and drink (al-Ṣūlī, *Adab al-kuttāb*, ed. M. B. al-Atharī, Cairo 1341, 193). What is surprising is that the Arab integument of Muslim society withstood the pressure.

(c) Fiscal status. The secondary literature generally associates *mawālī* with fiscal disabilities. Thus all the Umayyads other than ʿUmar II are said wrongfully to have collected poll tax (*djizya* [*q.v.*]) from converts and to have refused them registration in the army, being assisted in this by the leaders of the non-Muslim communities who had an interest in penalising conversion (J. Wellhausen, *The Arab kingdom and its fall*, Calcutta 1927, ch. 5; D. C. Dennett, *Conversion and poll-tax in early Islam*, Cambridge Mass. 1950; H. A. R. Gibb, *The fiscal rescript of ʿUmar II*, in *Arabica* ii/1 [1955], 1-16). But this view is in need of modification. On the one hand, the vast majority of *mawālī* were freedmen and descendants of freedmen who had never paid any poll-tax at all; and free converts who acquired a respectable patron also escaped fiscal disabilities (Crone, *Slaves*, 52). The conventional picture applies only to a special type of convert, the fugitive peasant. On the other hand, the Umayyad treatment of such *mawālī* should not be seen as a violation of the law; the law on this question was what the

Umayyads themselves decreed. The fact that the classical rules of taxation have been attributed to ʿUmar I does not mean that they in fact existed so early (cf. K. Morimoto, *The fiscal administration of Egypt in the early Islamic period*, Kyoto 1981); and they would not have helped the Umayyads even if they had. Thus the classical rules lay down that the convert should be freed of his poll-tax, but not of his land-tax (*kharādj* [*q.v.*]). In the Umayyad period, however, no villager converted without leaving his villages and thus also such land as he might possess: the distinction between a *dhimmī* poll-tax and a religiously neutral land-tax was quite irrelevant. Converts invariably left their land because the attraction of conversion lay in its promise of access to the ranks of the conquerors: converting without joining these ranks would have been pointless and, locally, extremely unpleasant. To convert was thus to make a *hidjra* [*q.v.*] from the land of unbelief to the land of Islam, that is, the garrison cities, as ʿUmar II explained (Ibn ʿAbd al-Ḥakam, *Sīrat ʿUmar b. ʿAbd al-ʿAzīz*, ed. A. ʿUbayd, Beirut 1967, 93f.); and the problem confronting the Umayyads was not whether converts should be freed of this or that part of their fiscal burden, but whether they should be allowed to make their *hidjra* and thus escape their fiscal burden altogether. Naturally, Umayyad policies varied. ʿUmar II accepted such converts (his problem was thus the fate of their land, cf. *ibid.*). But most Umayyads adopted a harsh policy vis-à-vis fugitives regardless of whether they claimed conversion or not (cf. Morimoto, *Fiscal administration*, 120ff.; Crone, *Slaves*, 52), resettling them in their villages or at best allowing them to stay where they were in return for continuing fiscal liability. Three points follow from this. First, the fugitives in question were required to pay all their customary taxes, whatever these might be, not merely a religiously neutral land-tax: having been denied access to the conquest society, they were not Muslims at all in the eyes of the authorities; and all their taxes, not merely the poll-tax, were regarded as *dhimmī* taxes at this stage. Secondly, such converts were not eligible for membership of the army. Naturally, when ʿUmar II decided to admit them to Muslim society, he admitted them to the army as well; but the fact that others refused them entry to the army does not mean that *mawālī* as such were kept out of the *dīwān*. The numerous *mawālī* who fought in the army without pay were runaway peasants who were still being held to their fiscal obligations and who fought as volunteers in the hope of being picked up by a patron, as is clear from the story of Yūnus b. ʿAbd Rabbih, who acquired a patron in Nasr b. Sayyār (Crone, *Slaves*, 52f.). Thirdly, it was such converts, not converts in general, who were open to penalisation by the leaders of the Christian, Jewish and Zoroastrian communities; had their *hidjra* been accepted, they would of course have been placed under Muslim administration (cf. al-Ṭabarī, ii, 1688; Dennett, *Conversion*, 124ff.).

It should be clear that the entire problem of the fiscal treatment of converts was a problem for *dhimmīs*, not for *mawālī*. It was *dhimmīs* who were frustrated by the closure of "the gate of the *hidjra*" (cf. Ibn ʿAbd al-Ḥakam, *Sīra*, 94); a *mawlā*, by contrast, was somebody already admitted. It was accordingly also *dhimmīs*, not *mawālī*, who would enrol in the service of anyone who promised them tax-relief. "Whoever converts is freed from *kharādj*" is a slogan on a par with that addressed to slaves, "whoever joins us is free" (cf. Crone, *Slaves*, nn. 399-400, 647). Both are addressed, usually by rebels, to malcontents *outside* free Muslim society, not to oppressed elements within in; it was only on responding to such slogans that the non-Muslims and slaves in question acquired client status.

(d) The issue of assimilation. The Umayyads are generally credited with an active policy of discrimination against non-Arab Muslims (cf. most recently, M. A. Shaban, *Islamic history*, i, Cambridge 1971). This impression arises largely from their treatment of fugitive peasants. But though they discouraged flight from the land and no doubt shared the common prejudice against non-Arabs, they do not seem to have had an actual policy of discrimination against accredited members of Muslim society. Practically every Umayyad caliph is known to have appointed a *mawlā* governor. Al-Ḥadjdjādj, a man notorious for his harsh treatment of runaway peasants, appointed the first non-Arab judges in ʿIrāḳ (al-ʿAlī, *Tanẓīmat*, 96 n); he also appointed a *mawlā* to his *shurṭa* (al-Yaʿḳūbī, ii, 328), an unusual step (for a later example, see al-Kindī, *Governors*, 70). ʿUmar II, a caliph famous for his encouragement of conversion, is said to have disapproved of intermarriage between Arabs and *mawālī* (al-ʿAlī, *Tanẓīmāt*, 96 n). But no prohibition of such unions has been recorded, and *mawālī* are known to have married female relatives of other Umayyads (al-Balādhurī, *Ansāb*, iva, 247; al-Ṭabarī, ii, 1420); the right to repudiate or endorse such unions presumably rested with the guardians of the bride (cf. also Juda, *Aspekte*, 178ff.). The fact that *mawālī* formed quasi-tribal groups of their own in the army reflects the tribal organisation of this army, not a policy of segregation; and it was the Umayyads themselves, not Abū Muslim, who abolished this organisation in Khurāsān (Crone, *Slaves*, 38). The belief that *mawālī* were relegated to the infantry rests on a failure to distinguish *mawālī* inside Muslim society from runaway peasants trying to enter it: governors and generals such as Ṭāriḳ b. ʿAmr, Dīnār b. Dīnār, Mūsā b. Nuṣayr, Ṭāriḳ b. Ziyād or Ibrāhīm b. Bassām were scarcely disqualified from riding horses. (See also al-Ṭabarī, ii, 1118f., 1599; Lévi-Provençal, *Hist. Esp. mus.*, i, 98.) Conversely, the enemies of the Umayyads do not seem to have regarded assimilation as an issue of political opposition. No rebel of the Umayyad period mentioned the treatment of non-Arab Muslims in his proclamations, and the belief that the ʿAbbāsids [*q.v.*] regarded assimilation as their prime objective is gratuitous. Obviously, assimilation accelerated on the fall of the conquest society, but scarcely as a result of official encouragement. The legitimacy of favouring Arabs over non-Arab Muslims in matters of appointment, vengeance and marriage clearly did become an object of debate in the Umayyad period, as did the refusal to accept runaway converts as Muslims, and in principle the question could have been taken up by politicans. In practice, however, the debate remained divorced from politics, and it continued long after the Umayyads had fallen.

(e) *Mawlā* grievances. As the prominence of non-Arab Muslims in Muslim society increased, so did their contribution to revolts. It is customary to interpret their participation in rebellious and/or heterodox movements as an expression of protest against a social inequality which ultimately led to the fall of the Umayyad dynasty. But for one thing, it is by no means clear that *mawālī* were disproportionately represented in movements of protest. For another, they scarcely clamoured for social equality. Not one revolt of the Umayyad period was conducted exclusively by *mawālī* in the name of concerns

exclusive to them; and the only two revolts in which such concerns came to the forefront, revealed somewhat different aims. The first is that of Mukhtār, an Arab opportunist whose non-Arab followers are described as slaves and freedmen (*ʿabīd wa-mawālī*) in the Muslim sources, and as prisoners-of-war in the contemporary Christian work of Bar Penkaye (Mingana, *Sources syriaques*, *156ff. = *183ff.). They were thus captives trying to escape their Arab masters, not converts seeking equality with them (indeed, the extent to which they were Muslims is disputable); and though Mukhtār was of course forced to extend Arab privileges to them in order to gain their co-operation, neither he nor they would seem to have had any views on the position of non-Arab Muslims in general. The second is that of the Berbers, recruited into Khāridjism [see KHĀRIDJITES] by Baṣran missionaries; and Berber Khāridjism did not of course express a desire for social equality, but rather for political independence in Islam. Once more, the conventional picture rests on a failure to distinguish between *dhimmīs* denied recognition as Muslims on the one hand and *mawālī* within Muslim society on the other. The former did indeed clamour for Arab privileges, such privileges being denied them altogether; but the latter clamoured for such privileges (social, cultural or political) as were appropriate to the social group in which they happened to find themselves. The fact that all non-Arabs were exposed to insult and prejudice does not mean that they responded by forming a trade-union. A non-Arab peasant in search of a patron such as Yūnus b. ʿAbd Rabbih had little in common with non-Arabs who had long been members of Muslim society; and of these, a general such as Ibrāhīm b. Bassām had little in common with *mawālī* working as secretaries, scholars or businessmen, let alone as domestic servants. To attribute the fall of the Umayyads to "*mawlā* discontent" is accordingly meaningless; what grievances did Ḥammād al-Rāwiya, an ʿIrāḳī collector of Arabic poetry at home at the Umayyad court, share with an uncouth Berber general such as Ṭāriḳ b. Ziyād, and what sympathy did either feel for the miserable peasants rounded up by Umayyad governors (Arab *and* non-Arab) throughout the caliphate? Non-Arab Muslims simply did not form a single social group. The fact that numerous *mawālī* participated in the ʿAbbāsid revolution is accordingly also meaningless unless it is specified what kind of *mawālī* they were. In fact, they were of three quite different kinds: long-standing members of Muslim society such as the family of the above-mentioned Ibrāhīm b. Bassām (al-Ṭabarī, ii, 1996-7, iii, 17f., 21, 37, 48, 75ff.; for their origin, see al-Balādhurī, *Futūḥ*, 393); freedmen and other clients who automatically followed their (Arab or non-Arab) patrons (e.g. al-Ṭabarī, ii, 1954); and *dhimmī* villagers for whom joining the rebel armies constituted both conversion and admission to Muslim society, as it did for Sunbādh [*q.v.*] and other recruits of Abū Muslim's who were later to opt out of this society as followers of prophets of their own. The causes of the revolution are clearly to be sought in the first type of *mawlā* and his Arab counterpart (from whom he is frequently indistinguishable), the long-standing member of Khurāsānī society. Such men were subject neither to fiscal disabilities nor to exclusion from the army, the cavalry, high office or general respect. The identification of their aims depends on whether one regards them as coming from inside or outside the local army, the evidence suggesting the former (on this question see Shaban, *ʿAbbāsid revolution*; M. Sharon, *Black banners from the East*, Jerusalem 1983; cf. also E. L. Daniel, *The political and social history of Khurasan under Abbasid rule*, Minneapolis and Chicago 1979).

3. The ʿAbbāsids.

The ʿAbbāsid revolution deprived the Arabs of such social and political privileges as they retained. Access to political office, influence and wealth now rested overwhelmingly on membership of an army recruited mainly in Khurāsān and a bureaucracy recruited mainly in ʿIrāḳ, as well as of the ruler's household. Non-Arab Muslims reached top positions through all three institutions (Crone, *Slaves*, appendix 5; cf. BARĀMIKA), while at the same time the majority of Arabs and *mawālī* found equality as ordinary subjects. Since Muslim society was no longer constituted by Arab privilege, non-Arab Muslims ceased to require a patron for membership of it. Freedmen continued to become clients of their manumitters, but most of the classical schools rejected the patronate over converts as offensive (below, section V), and the careers of free converts and the descendants of freedman ceased to be shaped by *walāʾ*. Yet Arab superiority on the one hand and the institution of *walāʾ* on the other were still to be of major importance in other ways.

(a) The Shuʿūbiyya. In cultural and religious terms, the Arabs continued to be regarded as a superior people, a fact which underlay the so-called Shuʿūbī movement, the "movement of the gentiles". Shuʿūbī sentiments had undoubtedly been common already in the Umayyad period, but it was only in the early ʿAbbāsid period that they came into the open, clearly because the *mawālī* were now in a position to get a hearing for their case: the exponents of Shuʿūbism were drawn primarily from among members of the caliphal bureaucracy and court. Purely literary in manifestation (cf. Goldziher, *Muh. Stud.*, i, chs. 4-5), the movement campaigned for cultural rather than social or political objectives, its ultimate aim being to break the nexus between Islam and Arabism, partly because this nexus stood in the way of non-Arab self-esteem and more particularly because it obstructed the reception of non-Arab culture. Ultimately, the issue behind the controversy was the cultural orientation of Islam (cf. H. A. R. Gibb, *Studies on the civilization of Islam*, Princeton 1962, ch. 4). The controversy only petered out in the 6th/12th century (cf. R. P. Mottahedeh, *The Shuʿūbīyah controversy and the social history of early Islamic Iran*, in *IJMES*, vii [1976]), and the issue was never properly resolved, though in practice the Shuʿūbīs lost (cf. P. Crone and M. Cook, *Hagarism*, Cambridge 1977, 102 f.). For further details, see SHUʿŪBIYYA.

(b) *Walāʾ*. Having lost its social importance, the institution of *walāʾ* acquired a new political significance. Unlike the Umayyads, the ʿAbbasids trusted their freedmen and other private servants better than the public servants of the state. Thus al-Manṣūr [*q.v.*] is said to have esteemed *mawālī* (in the sense of clients, not non-Arab Muslims) for their loyalty and to have accumulated more of them than any caliph before him, recommending them to his son (al-Ṭabarī, iii, 414, 444, 448). Clients of the caliphal household appear as a separate group at court soon after the revolution, and both al-Manṣūr and al-Mahdī [*q.v.*] selected a fair number of governors from their ranks (al-Ṭabarī, iii, 429, 545, 1027; Crone, *Slaves*, appendix Vb). Al-Mahdī, who similarly expressed a preference for *mawālī* (al-Ṭabarī, iii, 531), turned them into an army of their own (*ibid.*, 459). *Mawālī* of domestic origin continued to form troops of their own side by side with Turks and others far into the ʿAbbāsid period, as well as in Ṭūlūnid Egypt

(*ibid.*, 1400, 1501; al-Yaʿḳūbī, ii, 606, 624; cf. *Aghānī*, xii, 52). Already al-Manṣūr, however, recruited non-Muslims for military use, attaching them to the ʿAbbāsid house by contractual *walāʾ*, and this example was followed by Hārūn [*q.v.*] (Crone, *Slaves*, 74). And from the time of al-Muʿtaṣim [*q.v.*] onwards, the core of the caliph's armies typically consisted of men who were both slaves and non-Muslims by origin [(cf. DJAYSH and GHULĀM]; D. Ayalon, *Preliminary remarks on the Mamluk military institution in Islam*, in V. J. Parry and M. E. Yapp, eds., *War, technology and society in the Middle East*, Oxford 1975; D. Pipes, *Slave soldiers and Islam*, New Haven 1981; Crone, *Slaves*, ch. 10).

As political power came to rest on private ties with the caliph, the title *mawlā amīr al-muʾminīn* became a common honorific. First attested under al-Manṣūr, it was bestowed on governors and other dignitaries of non-Arab origin regardless of whether they were clients of the caliph in a legal sense. From the time of al-Muʿtaṣim onwards, it was regularly granted to Turkish generals and other favourites. It was also the title usually held by non-Arab rulers of successor states (Crone, *Slaves*, 75, appendix Vb, note 610; al-Balādhurī, *Futūḥ*, 134, 330; al-Yaʿḳūbī, ii, 597; Hilāl al-Ṣābiʾ, *Rusūm dār al-khilāfa*, ed. M. ʿAwwād, Baghdād 1964, 122 f.).

4. Muslim Spain.

The relationship between Arab and non-Arab Muslims in Spain differed from that of the east in three major respects. First, *walāʾ* played virtually no role in it. On the one hand, many of the conquerors were Berbers, and such ties of *walāʾ* as they had with Arab patrons lost all significance when they acquired the status of conquerors themselves. On the other hand, the conquerors settled all over the land, not merely in garrison cities. Muslim Spain thus lacked not only the purely Arab conquest élite characteristic of the east, but also the privileged *amṣār* which elsewhere attracted *dhimmī* immigrants and caused the Muslims to exclude from their ranks all converts without a patron. Conversion in Spain did not normally involve either *hidjra* or *walāʾ*, the converts adopting Islam wherever they happened to be. Indeed, they were not normally known as *mawālī* at all, but rather, in the first generation, as *musālima* and thereafter as *muwalladūn* (originally meaning home-born slaves; Lévi-Provençal, *Hist. Esp. mus.*, i, 75). Having adopted Islam in their own homes, the non-Arab Muslims of Spain failed to penetrate Arab society. Naturally Spain had its freedmen who, here as elsewhere, entered Arab society as clients. But whereas freedmen of the most diverse origin were exceedingly numerous in the cosmopolitan East, they were relatively few in Spain. Spanish society thus came to be characterised by the coexistence of three quite distinct ethnic groups, Arabs, Berbers and *muwallads*, rather than by relationship of dependence between Arabs and ethnically heterogeneous clients. Furthermore, since Spain escaped Khurāsānī conquest, these groups were able to retain political importance right down to ʿAbd al-Raḥmān III [*q.v.*].

Secondly, Spain saw armed conflicts between Arabs and indigenous Muslims. Throughout most of the Umayyad period, the *mawālī* of the East were ethnically too diverse and socially too dispersed in Arab society to rebel as *mawālī* against Arabs, while at the same time non-Arabs who had stayed together had also failed to adopt Islam. Only shortly before and after the ʿAbbāsid revolution, when on the one hand whole localities adopted Islam together, while on the other hand government was still identified as Arab, did non-Arab Muslims rebel against Arab rule. They did not, however, rebel as *mawālī*, but rather as heretics (as in North Africa) or even non-Muslims, rejecting the Arabs and Islam together (as in both North Africa and Iran). In Spain, where Arabs and *muwallads* coexisted as distinct groups, such revolts could in principle have erupted any time. In practice, they only came in the 3rd/9th century, perhaps provoked by the growth of the Umayyad state (Arab and Berber leaders also rebelled, and the upshot was the centralised state of ʿAbd al-Raḥmān III); and here for once the rebels took action as *mawālī*, explicitly invoking the cause of the non-Arab Muslims (*daʿwat al-muwalladīn wa 'l-ʿadjam*, Ibn Ḥayyān, *al-Muktabis*, ed. M. M. Antuña, Paris 1937, 24) under the leadership of men such as ʿUmar b. Ḥafṣūn [*q.v.*]. Being short of traditions of their own, partly because they were natives of provincial Spain and partly because they were Muslims of long standing, they had no alternative to Cordovan Islam. Accordingly, they did not deny the legitimacy of the Cordovan state as heretics; and though Ibn Ḥafṣūn did in the end reject Islam for Christianity, few *muwallads* followed suit (cf. Lévi-Provençal, *Hist. Esp. mus.*, i, 295 ff.).

Thirdly, there were practically no Shuʿūbīs in Spain. The fact that the *muwallads* did not have much of a cultural legacy to vindicate would hardly in itself have prevented them from adopting Shuʿūbī arguments in response to Arab prejudice: the one Shuʿūbī author attested for Spain, a Slav secretary equally lacking in cultural traditions of his own, simply adopted the arguments of eastern writers (cf. J. T. Monroe, *The Shuʿūbiyya in al-Andalus*, Berkeley and Los Angeles 1970). But having avoided enslavement and migration, the *muwallads* had also failed to acquire culture and positions of influence in the society of their conquerors. Where eastern *mawālī* had spokesmen among bureaucrats and courtiers, the leaders of the *muwallads* were country squires more noted for their *virtù* than for their polish; indeed, the smarts and insults suffered by such rural lords at the court of Cordova played a role in the outbreak of several *muwallad* revolts. The *muwallads* thus lacked both the education and the influence required for a literary onslaught on Arab superiority. Instead, however, they were in a position to take up arms in their castles, as they did until ʿAbd al-Raḥmān III reduced both them and their opponents to docile subjects.

In political terms, however, the institution of *walāʾ* played much the same role in Spain as it did in the ʿAbbāsid East. Thus ʿAbd al-Raḥmān I [*q.v.*], who relied considerably on freedmen and clients of the Umayyads for the conquest of Spain, is said by some to have recruited an army among non-Arab Muslims; al-Ḥakam I [*q.v.*] expanded this army and created the palatial guard of *khurs* ("mute ones"), i.e. foreign slaves and freedmen as well as local Christians (Lévi-Provençal, *Hist. Esp. mus.*, i, 129 f., iii, 71 ff.). The *djund* [*q.v.*], however, survived much longer in Spain than it did elsewhere, being abolished only by Ibn Abī ʿĀmir [see AL-MANṢŪR]; and thanks to the geopolitical position of Spain, it was Berber mercenaries rather than Turkish slaves and freedmen who replaced it.

5. *Walāʾ* in classical law.

(a) Sources of *walāʾ*. All schools accept manumission as a source of *walāʾ*. Only the Ḥanafīs, Imāmīs and Ḳāsimī Zaydīs, however, accept contractual agreement as such, and then in different ways. According to the Ḥanafīs and Imāmīs, contractual clientage (*walāʾ al-muwālāt* or, in the terminology of the Imāmīs, *al-taḍammun bi 'l-djarīra*) arises from a

contractual agreement distinct from the act of conversion at the hands of another; conversion does not in itself give rise to the tie. But according to the Ḳāsimīs, it arises from conversion at the hands of another; mere agreements cannot create *walāʾ*.

(b) *Walāʾ al-ʿitḳ*. All the schools are agreed that *walāʾ* arises automatically on manumission, but they disagree about the invariability with which it does so. According to the Imāmīs, it only arises when the manumission is gratuitous, i.e. not expiatory, not made in fulfilment of a vow or other legal requirement, and not made by *kitāba* [see ʿABD]; and both the Imāmīs and other schools enable the manumitter to exempt himself from *walāʾ* by declaring the freedmen *sāʾiba*, though the Sunnīs disapprove of the practice. In Ḥanafī and S̲h̲āfiʿī law, however, manumission invariably gives rise to *walāʾ*, whatever the circumstances or the inclinations of the manumitter. If the freedman is a non-Muslim, the tie is deprived of most of its legal effects.

The manumitter acquires responsibility for the payment of *diya* on behalf of the freedman and qualifies for the role of marriage guardian to his freedwoman or freedman's daughter. In return, he is granted a title to the freedman's estate in all schools except that of the Ibāḍīs (not that of the Ẓāhirīs, as stated in ʿABD). In Sunnī and Ḳāsimī Zaydī law, he inherits as the remotest agnate of the freedman; he is thus excluded by the freedman's own agnates (e.g. a son), but inherits together with Ḳurʾānic heirs (e.g. a daughter) and himself excludes remoter relatives (*d̲h̲awu 'l-arḥām*, e.g. a sister's son). In Imāmī, Ismāʿīlī and Nāṣirī Zaydī law he is excluded by any blood relation of the freedman, though he inherits together with the spouse.

The freedman does not, on the whole, acquire any corresponding rights and duties. Only the Ismāʿīlīs call him to succession, and only in default of all other heirs. The Mālikīs do hold him responsible for the payment of *diya* on behalf of the manumitter if the latter has no agnates, *ahl al-dīwān* or patrons of his own; but a similar opinion transmitted from al-S̲h̲āfiʿī failed to become school doctrine, and all other schools exempt him. The possibility that he might act as marriage guardian is not considered.

The relationship survives the death of both parties, passing to their heirs in perpetuity, though it loses practical importance as the client acquires agnates of his own. It also extends to the freedmen of the freedman and their freedmen in perpetuity, again with decreasing practical significance.

(c) *Walāʾ al-muwālāt*. The prospective patron must be a free, male and adult Muslim. The prospective client, according to the Ḥanafīs and Imāmīs, must be a free and adult non-Muslim of either sex who has no agnates or patrons in Islam, that is a *d̲h̲immī*, convert, foundling or (in Imāmī law) a freedman without *walāʾ*; the Ḳāsimīs, however, require him to be a *ḥarbī* convert: conversion of a *d̲h̲immī* does not give rise to *walāʾ*. The patron agrees to pay blood-money on behalf of the client in return for a title to the latter's estate; the parties may stipulate mutual succession. Either way, the heir by contractual *walāʾ* is excluded by any blood-relation of the deceased. Whether the contractual patron may act as marriage guardian is disputed. Unlike *walāʾ al-ʿitḳ*, the contractual relationship may be terminated as long as the patron has not had occasion to pay, but it becomes permanent thereafter.

(d) The nature of *walāʾ*. Practically every lawbook states that *walāʾ* should be regarded as a fictitious kinship tie (*al-walāʾ luḥma ka-luḥmat al-nasab*, as a famous maxim has it), and this view underlies a number of subsidiary rules generally accepted by Sunnīs and non-Sunnīs alike. Thus *walāʾ* cannot be alienated by sale, gift or bequest in classical law, though such transactions were permitted in pre-classical law; one cannot sell or give away *nasab*, as various authorities point out in *ḥadīt̲h̲*. Equally, *walāʾ* cannot be inherited in the strict sense of the word; the devolution of the rights and duties vested in the tie follows special rules ensuring that the relationship functions like an agnatic tie (cf. R. Brunschvig, *Un système peu connu de succession agnatique dans le droit musulman*, in his *Etudes d'Islamologie*, Paris 1976). *Pace* Brunschvig, however, this view of *walāʾ* is not an archaic survival, but on the contrary a juristic interpretation of the late Umayyad and early ʿAbbāsid periods. It was adopted with particular forcefulness and consistency by the Sunnīs, to whom the essence of *walāʾ* lies in *taʿṣīb*, "agnatisation".

In fact, however, the legal nature of *walāʾ* is quite different from that of an agnatic tie even in classical law. For one thing, it is only in Sunnī law that the patron inherits as an agnate, and then only if he is a manumitter, not a contractual patron. For another thing, the relationship lacks reciprocity. The client is a purely passive member of the patron's agnatic kin. Indeed, for some purposes he is not a member of it at all. Thus Sunnī lawyers do not usually consider clients of Ḳurays̲h̲ [*q.v.*] eligible for the caliphate; and the question whether clients of the Hās̲h̲imites were excluded from receipt of *zakāt* [*q.v.*] on a par with their patrons remained controversial; as Ibn al-At̲h̲īr pointed out, the maxim *mawlā 'l-ḳawm minhum* (which originated in this very context) could be interpreted in a purely metaphorical vein (al-*Nihāya*, Cairo 1963, v, 228). In legal terms, *walāʾ* is a tie of dependence which derives its efficacy from the fact that the client is detached from his natal group without acquiring full membership of another. The tie undoubtedly owes its existence primarily to administrative convenience, though the administrators may well have been influenced by the legal institutions of the pre-conquest Near East (see further Crone, *Roman provincial and Islamic law*, with full references).

(e) *Mawālī* and *kafāʾa* [*q.v.*]. Classical law does not in general attach any legal significance to servile and/or non-Arab origin outside the private relationship between patron and client, but there is one major exception. Non-Arabs and freedmen cannot marry Arab women, according to the Ḥanafīs and the S̲h̲āfiʿīs. The same view prevails among the Ḥanbalīs, while contradictory views are found in the Zaydī schools. The Mālikīs, who see no harm in such unions, nonetheless allow an Arab woman to have her marriage dissolved if she marries a freedman in the belief that he is an Arab (as opposed to merely freeborn (K̲h̲alīl b. Isḥāḳ, *Muk̲h̲taṣar*, tr. I. Guidi and D. Santillana, Milan 1919, ii, 37). Only the Ibāḍīs, the Imāmīs and, following them, the Ismāʿīlīs, consistently refuse to distinguish between Arab and non-Arab, freeborn and freed for purposes of marriage [cf. NIKĀḤ]. The complete assimilation of Arab and non-Arab Muslims allegedly brought about by the ʿAbbāsids cannot be said ever to have been achieved.

(P. CRONE)

MAWLĀNĀ K̲H̲ŪNKĀR, a title of the head of the Mawlawī order of dervishes [see MAWLAWIYYA]. The second word is the Turkish form of the Persian *k̲h̲udāwandigār*, the equivalent of *mawlā*, which according to Aflākī (*Saints des derviches tourneurs*, i, 59) was bestowed on D̲j̲alāl al-Dīn by his father (the

derivation from *Khūn-kār*, Persian "blood-shedder", must depend on popular etymology). Sāmī in his *Ḳāmūs al-aʿlām* states that the word, besides used for "Sultan", "King", is applied to certain saintly personages, in such combinations as *pīr khūnkār* or *mullā khūnkār*. The underlying idea of such a title is probably that the saint has had committed to him the government of the world, if he choose to undertake it, an idea elaborated by Ibn ʿArabī (*Futūḥāt Makkiyya*, i, 262, ii, 407), who regards such a saint as the true *khalīfa*. The title *čelebi* is more generally recognised as that belonging to the head of the Mawlawī order (Sāmī, *op.cit.*, 510a).

(ED.)

MAWLAWIYYA, a Ṣūfī order or *ṭarīḳa*, in Turkish Mewlewiyye, modern Mevlevî, which takes its name from the Mawlānā ("Our Master"), the sobriquet of Djalal al-Dīn Rūmī [*q.v.*]. Although not called by this name, it appears that such a *ṭarīḳa* was formed already in the Mawlānā's time, and this view is reinforced by the existence of a group of disciples around the Mawlānā, by his concern for their education and by his appointment of deputies to carry out this task during his absences. However, like many *ṭuruḳ* (e.g. the Khalwatiyya [*q.v.*]), this *ṭarīḳa* acquired its name at a later stage. There is no definite information that the Mawlānā's followers were called Mawlawiyya in his own time, but it is known that already at that time, the epithet Mawlānā had replaced the name Djalāl al-Dīn (see Aflākī, *Manāḳib al-ʿārifīn*, ed. T. Yazıcı, Ankara 1959-61, ii, 597), and it is therefore probable that his followers were even then called Mawlawiyya.

1. Origins and ritual of the order. An attempt will be made here to demonstrate to what extent the subsequent and relatively developed form of the order is connected with that of the Mawlānā's era. Such a demonstration shows that a great part of the contemporary customs and rules of the order also existed in the time of the Mawlānā (see Yazıcı, *Mevlânâ devrinde semâʿ*, in *Şarkiyat Mecmuası*, v [1964], 135-59). In particular, it appears that certain elements of the *samāʿ* [*q.v.*] or musical ceremony, which occupies an important place in the customs and rules of the *ṭarīḳa*, were found in the *samāʿ* gatherings of the Mawlānā's era (Yazıcı, *loc. cit.*). It is known that there was found a special meeting-room which formed the nucleus of the *samāʿ-khāna* of later Mawlawī *tekkes*. It is also known that there was a *djamāʿat-khāna* among the rooms constructed alongside the Mawlānā's *madrasa* by the Saldjūḳ statesman Tādj al-Dīn Muʿtazz, and that the Mawlānā there listened to conversation, men of letters and the playing of the *rabāb*, and in all probability also conducted *samāʿ* (see Aflākī, i, 97, 125, 138, 252, 255). In the same fashion, the *madrasa* at which the Mawlānā taught served at that time as the *ṭarīḳa*'s *tekke*, or as subsequently named, *dargāh*. It is highly probable that the *djamāʿat-khāna* adjacent to the *madrasa* was used during the Mawlānā's lifetime and after his death as a place to train novices or *murīds*, and that a *shaykh* was found there. The first of these *shaykhs* was Ṣalāḥ al-Dīn Zarkūb, who was followed by Ḥusām al-Dīn Čelebi, Karīm al-Dīn Bektemur and Sulṭān Walad. Aflākī (i, 232) records that while the Mawlānā was alive he had two *khalīfas* outside Konya, one at Luʾluwe Maʿdeni, the other called Madjd al-Dīn Walad-ī Čagha in the lands of Rūm, and that he gave to them the spiritual genealogy or *shadjara* of the *ṭarīḳa* which he had written. However, the fact that, until Sulṭān Walad, none of these appointees came from the Mawlānā's family suggests that the Mawlānā may not have intended to found an order. For, as frequently occurs in many orders, the successor of the founder of a *ṭarīḳa* is generally a member of his family. Had he had such an intention, there was no reason why he should not have appointed as his successor his son Sulṭān Walad, who possessed all the requisite qualities of a *shaykh* of a *ṭarīḳa*.

There is a great probability that the chief principles of the Mawlawiyya, such as *samāʿ*, were already established in the Mawlānā's era, and that after some further development they took the form they bear today.

After Sulṭān Walad's succession, a new centre for the *ṭarīḳa* was formed with the building of the *türbe*, which survives today, by ʿAlam al-Dīn Ḳayṣar. At this centre—as in a *tekke*—the Ḳurʾān and *Mathnawī* of the Mawlānā were read, prayers were recited and the *samāʿ* was conducted. At this period, as in the Mawlānā's time, *samāʿ* was performed individually and collectively (Aflākī, i, 356, 104, ii, 759 ff.). Such gestures as that of salutation, which occur in today's *samāʿ* ceremony, were also encountered in the Mawlānā's *samāʿ* (*ibid.*, i, 412). This type of element continued under Sulṭān Walad and Ulu ʿĀrif Čelebi (*ibid.*, ii, 613, 795, 892, 966).

However, none of the Mawlawī sources prior to 754/1353 refers to the *naʿt*, *dawr-i waladī*, *pust duʿāsī* and the organised salutation which feature in the *samāʿ* ceremonies of later eras. In sum, at that period there was no *samāʿ* taught in advance. Rather, music or some event bringing a person to ecstasy was the occasion for *samāʿ*. As is apparent from its name, the *dawr-i waladī* was linked to Sulṭān Walad. However, it appears that the reading of the Ḳurʾān and of *ghazals* [*q.v.*] before the *samāʿ* was established in the time of Ulu ʿĀrif Čelebi (Aflākī, ii, 846 ff.). It is most likely that the *samāʿ* took its final form, known as *muḳābala*, in the time of Pīr ʿĀdil Čelebi (d. 864/1460).

In the hope of showing all the characteristics of the Mawlawiyya, an account will be given of its customs and rules, beginning with entry or initiation to the *ṭarīḳa*.

Entry to the Mawlawiyya. Initial entry is as a *muḥibb*, and for this, application is made to a Mawlawī *shaykh*. Having indicated to the candidate that he will be admitted to the *ṭarīḳa*, the *shaykh* instructs him to bathe and appear on an appointed day. The *muḥibb*, that is, the candidate *murīd*, appears on the appointed day with a *sikke* (a type of conical cap). He kisses the *shaykh*'s hand and then sits on his left. With the faces of both turned towards the *ḳibla*, the *shaykh* informs him that they will read together a prayer of repentance (see A. Gölpınarlı, *Mevlevî âdâb ve erkânı*, 133). After the prayer is read, the *shaykh* takes in both hands the *sikke* brought by the candidate *murīd*, and three times—to the right, left and front of the *sikke*—reads the sūra *Ikhlāṣ* (CXII) and blows upon the *sikke*. Then he settles the candidate *murīd*, with his face to the *ḳibla*, down upon his left knee and holds the *sikke* towards the *ḳibla*, and having stated that he is acting on behalf of the Mawlānā, he kisses the *sikke* from the right, left

and front and places it upon the candidate. With his hands upon the *sikke* he pronounces the *takbīr*, and the *sikke* is thus said to be *tekbirlenmish*. The *shaykh* then caresses the back of the candidate, whose head is resting upon his knee, raises him to his feet, and with their right hands held together they kiss. Thus the person whose *sikke* has received the *takbīr* acquires the name of *muḥibb*. The *shaykh* takes the *muḥibb* to the *dede* in the *maṭbakh* or kitchen, who will educate him. The *dede* is a person resident in one of the cells (*hüdjre*) of the *dargāh* or *zāwiya*, who has fulfilled his *čile* (period of trial) and been elevated to the rank of *derwīsh*.

The *muḥibb*, who is also known as *naw-niyāz*, is informed of the difficulty of the path. The *muḥibb* undertakes to devote himself completely to this path, and is then set for three days in the *maṭbakh* upon a skin known as the *saḳḳā pustu* which is believed to remove the thirst of those who thirst for the *ṭarīḳa*. The *muḥibb*, seated upon this skin upon his knees with his head bent, observes the services performed by other *murīds* who are named *djān* (literally "soul"), does not speak without need and when required to urinate, he takes over his shoulders the *khirḳa* or gown with sleeves of one of the *djāns* and goes to the latrine. When the three days are up, he is taken to the *ḳazandjī dede* (the person responsible for the *murīds*' discipline) and if he declares himself resolved to remain in the *ṭarīḳa*, he runs errands for eighteen days in the clothes in which he has come, that is to say, he carries and fetches at the double for the persons of the *tekke*. When this period ends, the position is explained to the *ashčī dede*. Upon his request, the clothes of the *muḥibb* are removed and he is dressed in the *maṭmaᶜ tennüresi*, and over this *tennūre* (or long, sleeveless gown) there is bound a belt called the *elif-i nemed*. Thus the *muḥibb* intending to enter the Mawlawiyya order (*soyunan*, "changing his garments for work") is delivered to the *ḳazandjī*, who explains to him the services which he will perform (errands, floor-sweeping etc.). While these services continue, the *muḥibb* is also taught to perform the *samāᶜ*. The *muḥibb* may not wear the *sikke* until successful in *samāᶜ*. Once his success in this matter has been demonstrated, he is given a temporary *sikke* and only after participating in the *mübtedī muḳābelesi* (a *samāᶜ* ceremony for beginners) does he join in the true ceremony. While participating in the real ceremony, he removes the *tennūre* worn for service (*hizmet tennūresi*) and wears instead the *samāᶜ tennūresi*, with a narrow shirt (*deste-gül*) over it and a *khirḳa* upon his back.

Upon completing the service of errand-runner, the *muḥibb* leaves his service and undertakes the functions of *pazardjīlīḳ*, that is to say, he does the *tekke*'s daily shopping. While performing this service he wears a towel on his back, a chain upon his waist and tongs upon his belt (*elif-i nemed*). At prayer times, he goes to the *masdjid* of the *dargāh* or *zāwiya*, and in the mornings joins the circle where the *ism-i djalāl* ("glorious name [of God]") is repeated. He carries out the shopping, sets and clears the table, does internal housework and other services. Thus the *muḥibb* completes 1,001 days of service. The *meydāndjī dede* informs him when he has completed his trial (*čile*), and explains that one week later a *samāᶜ* will be performed for this occasion, that *sharbat* will be drunk at this ceremony and gives the name of the *murīd* (*djān*) who will distribute the *sharbat*.

One week later, having completed his trial (*čile*), the *derwīsh* goes to the *ḥammām* and bathes, and coming to the kitchen, he removes his *tennūre* and puts on the *shalwār* or trousers, while on his upper part he puts on the *derwīsh* costume of *mintan* and *khirḳa* and again sits upon the *saḳḳā pustu* in the kitchen. That night a candlestick of 35 or 70 branches is lit. After all but the *derwīsh* performing the trial (*čile*) have eaten, the *sharbatči* serves the prepared *sharbat* to those present. The *čilekesh* (performer of *čile*) converses with the *ṭarīḳatči*, the *ashčī dede* or the *dedes*, and proceeds to the middle and performs a salutation (*niyāz*). The *ṭarīḳatči* or the *ashčī dede* recites the *gülbang* (a prepared prayer) for him (for the text of the *gülbang*, see Gölpınarlı, *Mevlânâ'dan sonra mevlevîlik*, Istanbul 1953, 393). After all have departed from this ceremony, the *meydāndjī* takes him first to the *türbedār* and then to the kitchen and gives him *sharbat* to drink and food to eat. Then a white skin called *Sulṭān Walad pustu* is spread. The *meydāndjī* seats the *ashčī dede* upon the skin, and brings the *derwīsh* who has completed his trial to him. After praying that he may continue upon the path (reading the *gülbang*), the *ashčī dede* goes to his cell. The new *derwīsh* too is taken to the cell set aside for him. The *dedes* come there to congratulate him, each bringing with him a different present. He does not leave his cell for three days, and his meals are brought to his cell. After this period he is taken by the *meydāndjī dede* to the *shaykh* of the *tekke* and the ceremony of *bayᶜat* is performed (for details, see *ibid.*, 394). The *shaykh* cuts some hairs from the middle of the eyebrow and from the moustache of the *derwīsh* and pronouncing the *takbīr*, he dresses him in the *khirḳa* of the *derwīsh*. He then tells him to perform the trial of the cell (*hüdjre čilesi*). This trial consists of not leaving the cell for 18 days. When this period, too, has ended he is dressed by the *shaykh* in the *sikke*. With this, he acquires the title of *derwīsh* or simply of *dede* (Gölpınarlı, *Mevlevî âdâb ve erkânı*, 135). Thereafter, he begins to teach the knowledge and arts (music, etc.) which he has acquired to date to the *muḥibbs* who come after him. A *dede*, depending upon his ability, may become a *shaykh* and *khalīfa* [see KHALIFA. 3. In Islamic mysticism]. The *shaykhs* represent the Mawlawiyya order. If *shaykhs* are not *sayyids*, they wear white turbans; if they are *sayyids*, they wear turbans of a smoky colour close to purple.

Shaykhs dwell in places called *āstāna*, *dargāh* or *zāwıya*. A Mawlawī *dargāh* is composed of a *ḥaram*, *salāmlīḳ*, *samāᶜ-khāna*, *türbe*, *masdjid*, *maydān*, *maṭbakh* and *derwīsh* cells. In addition, a room called *maydān-i sharīf* is located close to the *maṭbakh*. *Muḥibbs* may not enter here; the others enter one by one after the morning prayer, the last to do so in Konya being the *ṭarīḳatči* and elsewhere the *ashčī dede*, and having kissed the ground they sit. The *dede* called the *ṭīsharī meydāndjī* gives to each of those seated a small piece of bread from a tray. After these have been eaten, coffee is drunk and then the *murāḳaba* ("vigil") is begun. Later, the *ṭarīḳatči* or the *ashčī bashī dede* reads sura CX of the Ḳurʾān and recites the *fātiḥa*. After the *fātiḥa* has been read together, all withdraw.

The Mawlawiyya are distinguished from all other orders by the importance which they give to *samāᶜ*. *Samāᶜ* is performed in a circular room called *samāᶜ-khāna*. Its furnishings are covered with unnailed walnut planks, and these planks appear as if polished as a result of the periodic *samāᶜ*. The room is entered through the external main door. The *samāᶜ-khāna* comprises the following sections: the space in which *samāᶜ* is conducted, the side sections reserved for male and female visitors, the *muṭrib-khāna* for the musicians, above the door opposite the *shaykh* and approached by steps, or else the section where the musicians and the tombs of the former *shaykhs* are located. This last section is separated from the *samāᶜ-khāna* by a grille which reaches to the roof. At times when the *samāᶜ* is to be performed, the *shaykh*'s skin (sc. hide or rug) is spread

opposite the *miḥrāb* [*q.v.*]; it is assumed that a line stretches from the edge of this skin to the middle of the *khaṭṭ-i istiwāʾ*. This line must in no way be stepped upon.

The *samāʿ* ceremony—also known as *muḳābele* (see Anḳarāwī, *Minhādj al-fuḳarāʾ*, 68)—is performed after prayers. Beforehand, the *meydāndjī* who supervises the affairs of the *dargāh* or *meydān* goes to the *samāʿ-khāna* on the day or night when *samāʿ* will be performed, and takes the *shaykh*'s skin which is there to his apartment. With the approval of the *shaykh*, the *meydāndjī dede* stands facing the *ḳibla* opposite the location of the cells, and summons the *derwīshs* to perform their ablutions and don the *tennūre*. Afterwards he goes to the *samāʿ-khāna* and spreads the skin of the *shaykh*. He emerges to tell the *muʾadhdhin* to call the *adhān* [*q.v.*]. After this person has called the *adhān*, the *dedes* and the *muḥibbs* perform their ablutions, don their *tennūre* and with their *khirḳa* on their backs they proceed to the *samāʿ-khāna*. After the performance of prayer, the *shaykh* sits upon his skin, and those who are to perform the *samāʿ* also sit together with him. After all have taken their places, the band of musicians takes its place. The *Mathnawīkhʷān* reads an extract from the *Mathnawī*, while the *shaykh* reads his *pust duʿāsī*. They then listen to the *naʿt* performed by the musicians, and afterwards the *shaykh* and the *samāʿ-zans* or participants all rise, striking their hands to the ground. The *shaykh*, in harmony with the music of the musicians, walks very slowly to the right, and once he has taken three steps from the skin, the person behind him takes up a position near the skin and, bowing his head in salutation, passes in front of the skin to the other side without stepping upon the *khaṭṭ-i istiwāʾ* and stands with his face towards the skin. The one who follows him also passes before the skin. These two participants, standing opposite one another, look at one another face to face. They then salute one another, drawing the right hand from above the left from within the *khirḳa* to the heart, and the left hand to the right side. Next, one turns and follows the other who goes in front. All the *djāns* act in this way before the skin. Then they walk in harmony with the tempo. When the *shaykh* comes before the skin, he stops and finds the most senior *naw-niyāz* before him. They exchange mutual salutations. Thus the first *dawra* or sequence is completed. Second and third *dawras* follow in the same fashion. When the third *dawra* is finished, the *shaykh* goes towards his skin and at this moment a *nay* or flute improvisation begins and continues until the *shaykh* sits upon his skin: once he has done, so the ceremony begins. The *shaykh* and the *samāʿ-zans* salute. The *samāʿ-zans* remove their *khirḳas* and place them on the ground. Then, passing the right arm over the left they link arms in a diagonal fashion, with the right hand holding the left shoulder and the left hand holding the right shoulder. The *shaykh* walks in front of the skin, salutes, and the others perform the same movement. Next the *samāʿ-zans*, setting off on the right foot, approach the *shaykh* one by one, salute him and kiss his hand. They then open their arms, the left hand being a little higher, take three short steps and begin to turn. The *samāʿ-zan bashī* or leader of the participants has charge of the *samāʿ*. The first to turn is followed in identical fashion by the others. When the *salām* is to be given, the *shaykh*, who is beside the skin, advances and makes salutation. The *samāʿ-zans* come together in twos and threes, touching each other's shoulders diagonally, and form groups. The second *dawra* is then begun; this resembles the first. This time, the *samāʿ-zans* perform a salutation before the *shaykh* and kiss his hand. The third and fourth *dawras* follow in the same fashion.

According to a tradition among the Mawlawiyya, until the reign of Selīm III (1789-1807 [*q.v.*]) the custom of the Mawlānā's era was maintained and *samāʿ* was performed only at moments of ecstasy; nonetheless, it appears that before this date *samāʿ* was performed on specific days. D'Ohsson (*Tableau général de l'empire Othoman*, Paris 1789, ii, 304) records that Tuesdays and Fridays were chosen for *samāʿ* ceremonies. There is a strong probability that Selīm III's frequent visits to *mawlawī-khānas* and the need to perform *samāʿ* in his honour led to the ending of this custom, and *samāʿ* began to be performed every day. However, the difficulty of performing *samāʿ* daily in any single *samāʿ-khāna* was recognised, and it became the practice to perform it in a different *mawlawī-khāna* on each day of the week. Yet in cities outside Istanbul, the *samāʿ* ceremony was performed only on Fridays, after Friday prayers. Nowadays, for reasons which are touristic rather than religious, the *samāʿ* ceremony is performed for one week annually in Konya between 11 and 17 December (see H. Ritter, *Die Mevlanafeier in Konya vom 11-17 Dezember 1960*, in *Oriens*, xv, 249-70; cf. Gölpınarlı, *Mevlânâ'dan sonra mevlevîlik*, 371-80, and *Mevlevî âdâb ve erkânı*, 77-89).

The Mawlawiyya have a further *samāʿ* ceremony, called *ʿayn-ī djemʿ* (*ʿayn al-djamʿ*). It is used in the sense of uniting or gathering. This was often performed at night, when the Mawlawī brothers gathered in ecstasy and love in the consciousness of unity with God. This ceremony was performed either to fulfil a condition set by a donator of a *waḳf* [*q.v.*] to the *tekke*, or for the sake of someone who had made a vow, or upon the personal request of an *ʿāshiḳ* or devotee of the Mawlānā. This *samāʿ* was not performed in the *samāʿ-khāna* but in a rectangular room. If the *samāʿ* took place at night, it was performed after the eating of a meal and the performance of the evening prayer (details in Gölpınarlı, *op. cit.*, 101). This ceremony was also performed on the anniversary of the Mawlānā's death (6 Djumādā II 672/17 December 1273). For according to the Mawlawiyya, this day marks the Mawlānā's birth into eternity. As this date changes annually in accordance with the *hidjrī* calendar, when the anniversary occurred in summer or spring rush mats and rugs would be spread on the *türbe*-facing side of the pond which lies outside the *maydān odasī* of the *dargāh* in Konya, and the *ʿayn-ī djemʿ* would be performed in the open air.

The Mawlawiyya have striven to give meanings to the *samāʿ-khāna* and to the gestures made by the *samāʿ-zans* during *samāʿ*. Thus the right-hand arc of the circular *samāʿ-khāna* represents the apparent world, while the left-hand arc represents the unseen world of meaning within the apparent world. Similarly, the right arc represents the descent from absolute being to humanity, the left, spiritual ascent, maturity and the path to God (*sulūk*). The starting-point of the *khaṭṭ-ī istiwāʾ* (i.e. the place of the *shaykh*) is a sign of the world of absolute being, while the point directly opposite is a sign of the rank of humanity.

The *derwīsh* who performs the *samāʿ* is called *samāʿ-zan*. During the *samāʿ*, the *samāʿ-zan*'s hand raised to heaven is a sign of taking from God, while his downward-pointing left hand is a sign that what is taken from God with the right hand is given to the people. The *samāʿ-zan* believes that what has thus been taken from God is given to the people, that he himself exists only in appearance and in reality does not exist, and that he is nothing but an intermediary between God and the people. In this position, his arms resemble a *lām-alif* (لا), while the body between the two arms is like an *alif*, thus giving the form of *Lā ilāha illā 'llāh*.

The first *dawra* of the *samāʿ* ceremony shows the manifestation of God, in whom all names and qualities are found. At the end of this *dawra*, God is manifested with the name "*salām*". Thus the *sālik*'s knowledge of God's unity reaches the degree of *ʿilm al-yaḳīn*, i.e. his knowledge of God's unity has the degree of certain knowledge. In the second *dawra*, this knowledge reaches the degree of vision (*ʿayn al-yaḳīn*). In the third *dawra* he becomes what he sees, i.e. his knowledge becomes *ḥaḳḳ al-yaḳīn*. The fourth *dawra* represents God's existence and being (Gölpınarlı, *ibid.*, 107 ff.).

Another characteristic which distinguishes the Mawlawiyya from other orders is *čile* (trial). The Mawlawī *čile* does not, as in other orders, consist of the endurance of such hardships as eating and drinking little, remaining without sleep and the performance of an extreme degree of *dhikr*, all generally in a closed place; instead, it consists of 1,001 days of service, the equivalent in *abdjad* enumeration of the word *riḍā*, particularly in the kitchen of the *tekke*. The *muḥibb* or *naw-niyāz* fulfils his *čile* by assisting those who direct the "eighteen service" and accomplishing the tasks they order (for the services, see Gölpınarlı, *Mevlânâ'dan sonra mevlevîlik*, 397 ff., and *Mevlevî âdâb ve erkanı*, 45 ff.). Those who principally accomplish this "eighteen service" are the *ḳazandjī dede*, who takes care of the discipline of the *naw-niyāz*, the *khalīfa dede* who instructs them in the customs of the *ṭarīḳa*, the *čamashīrdjī dede* who washes or has washed the linen of the *dedes* and the *naw-niyāz*, the *ābrīzdjī dede* who cleans the latrines, the *bulashiḳčī* (washer-up), the *süpürüdjü* (sweeper), the *pazardjī dede* who does the shopping in the mornings, the *somatčī dede* who lays and clears the table, etc.

The Mawlawiyya have developed in two forms: the Shems ḳolu or branch which takes love and ecstasy as its basis and acts like the Ḳalenderiyya, and the Sulṭān Walad ḳolu which strives to remain attached to the *Sharīʿa*. The Shems ḳolu has accepted as a principle the Malāmatiyya [*q.v.*]; there is thus a close resemblance between this branch and the Bektashīs [*q.v.*]. This resemblance derives from the fact that both spring from a Ḳalender source. The 10th/16th century Ottoman author Wāḥidī ranks the Shemsī, Bektashī and the Ḳalenderiyya together both on account of their attire and on account of their beliefs (*Manāḳib-i Khʷādja-yi djihān ve natīdja-yi djān*, fols. 65b-75b; cf. Khaṭīb-i Fārsī, *Manāḳib-i Djamāl al-Dīn-i Sāwī*, preface, p. xxi).

The Sulṭān Walad ḳolu has been more influential upon orders which conform to the *Sharīʿa*. Amongst these the Gülshaniyya, a branch of the Khalwatiyya, have been considerably influenced by this branch of the Mawlawiyya. The customs of the Gülshaniyya openly reveal this influence (cf., Shemelī-zāde Aḥmed Efendi, *Shīve-yi ṭarīḳat-i Gülshaniyye* (with the *Manāḳib-i Ibrāhīm-i Gülshanī*), 509-44).

In general, the Mawlawiyya show extreme respect and love for all that may be of use to man, whether animate or inanimate, and in this connection they have created a new language. For example, in place of *öpmek* ("to kiss") they use *görüshmek* ("to converse"), in place of *ḳapamaḳ* ("to close") they use *ṣırlamaḳ*, in place of "to eat or drink something" they use *djünbüshlenmek*, in place of *murīd* they use *djān* or *naw-niyāz*; these aside, they employ as technical terms *ayaḳ mühürlemek* for "to place the big toe of the right foot on top of the big toe of the left foot", *direk* for "the *samāʿ-zan* not to turn with the left foot revolving on its axis", *čivi tutmaḳ* for "to put one's foot down on the spot and turn to make *samāʿ*", etc. (see Gölpınarlı, *Mevlevî âdâb ve erkânı*, 5-47).

As a result of the efforts of the members of this order, which has enjoyed close links with literature from its inception, a Mawlawī literature has been formed. This has not been confined simply to themselves, but has also left its imprint upon a number of famous poets of the Ottoman *Dīwān* literature. Amongst the poets of this literature, Nefʿī, Nabī and Shaykh Ghālib [*q.vv.*] were Mawlawīs.

From the Mawlānā's era to most recent times, music has always occupied an important place among the members of this *ṭarīḳa*. To the musical instruments which initially consisted solely of the *nay* and the *rabāb*, there were subsequently added the *ʿūd*, *kaman*, *ḳānūn*, *santūr*, *ṭanbūr*, *kemenče* and *girift*, and most recently the piano and the violincello. The first piano brought to Istanbul was played in the *mawlawīkhāna* at Ḳumḳapîsî. However, the piano and violincello have not won much favour. It is most probable that the musical compositions recited in the Mawlānā's time were anonymous, but later, especially during *samāʿ*, the recitations were selected from the poems of the Mawlānā, Sulṭān Walad and Ulu ʿĀrif Čelebi. The Mawlawis produced a number of composers (see Gölpınarlı, *Mevlana'dan sonra mevlevilik*, 456 ff.).

In conclusion, this order took its basic principles from the Mawlānā. These principles, which rest upon a limitless love of humanity and a moderate permissiveness, secured the *ṭarīḳa*'s popularity within a short period. To these principles should be added the importance given to music and dance, which were not well-viewed in religious circles, but which human beings cannot do without. The considerable interest which was shown by outsiders (*čevre*) for these reasons further developed the order. Just as the customs and rules of the *ṭarīḳa* were from time to time re-ordered on this pretext, so also new ones were added to them. Further, the Mawlawī *tekkes* partook of the nature of schools, in order first to understand the thoughts of the Mawlānā, which are the basis of the order, and also to be of service to society. This ensured that the *ṭarīḳa*'s members were in general literate, and were qualified in one of the fine arts like literature, music and calligraphy. For this reason, this order was popular in intellectual circles.

Huart, *Konia, la ville des derviches tourneurs*, Paris 1897 (who also translated Aflākī's *Manāḳib al-ʿārifīn* into French as *Les saints des derviches tourneurs*, Paris 1918-22); V. Cuinet, *La Turquie d'Asie*, Paris 1890, 832; M. Hartmann, *Der islamische Orient*, 1910, iii, 12; Lucy M. Garnett, *Mysticism and magic in modern Turkey*, London 1912; H. C. Lukach, *The city of dancing dervishes*, London 1914; S. Anderson, *The whirling and howling dervishes*, in *MW*, xiii (1923), 181-92. (T. Yazıcı)

2. Relations with other orders.

Although the earlier mystics, such as al-D̲j̲unayd, Bisṭāmī and al-Ḥallād̲j̲ are mentioned in Aflākīs' *Manāḳib* with profound reverence, the treatment of founders of orders who came near D̲j̲alāl al-Dīn's time is very different. ʿAbd al-Ḳādir al-D̲j̲īlānī is ignored, Ibn ʿArabī mentioned with contempt, and al-Rifāʿī with severe condemnation. Ḥād̲j̲d̲j̲ī Bekṭās̲h̲ is represented as having sent a messenger to inquire into the proceedings of D̲j̲alāl al-Dīn and to have acknowledged the supremacy of the latter. At a later period, the rivalry of the Mawlawī with the Bekṭās̲h̲ī order became acute.

It has been shown by F. W. Hasluck (*Christianity and Islam under the Sultans*, Oxford 1929, ii, 370 ff.) that the environment wherein the Mawlawī order originated was favourable to Christians, and that throughout its history it showed itself tolerant and inclined to regard all religions as reconcilable on a philosophic basis. He suggests that the veneration of the Muslims of Konya for the supposed burial-place of Plato (in a mosque which was once the church of St. Amphilochius) may have been intentionally favoured by the Mawlawī dervishes, or possibly their founder, as providing a cult which Muslim and Christian might share on equal terms. In three other sanctuaries of Konya, one of them the mausoleum of D̲j̲alāl al-Dīn himself, he found evidence of a desire to provide an object of veneration to the adherents of both systems. It is not, however, easy to accept his inference that some sort of religious compromise on a philosophic basis was devised between the Sald̲j̲ūḳ Sultan ʿAlāʾ al-Dīn, D̲j̲alāl al-Dīn, and the local Christian clergy. It appears from Aflākī that the order was frequently exposed to persecution from the *fuḳahāʾ* in consequence of the music and dancing; and they found an analogy in Christian services to the employment of the former. They were credited in recent times with having restrained the massacres of Armenians.

3. Spread of the order.

Aflākī attributes its propagation outside Konya to D̲j̲alāl al-Dīn's son and second successor, Sulṭān Bahāʾ al-Dīn Walad who "filled Asia Minor with his lieutenants" (tr. Huart, ii, 262). It would appear, however, from Ibn Baṭṭūṭa's narrative (*Riḥla*, ii, 282-4, Eng. tr. Gibb, ii, 430-1) that the order's following was not at that time extensive outside Konya and was largely confined to Anatolia, although it does seem that in the time of Ulu ʿĀrif Čelebī (d. 720/1320) a Mawlawī *dargāh* existed in the Il-K̲h̲ānid centre of Sulṭāniyya in Ād̲h̲arbāyd̲j̲ān (see Aflākī, ii, 896). At this period, *zāwiya*s or *tekke*s were set up in such Anatolian towns as Toḳat, Lāranda and Küṭahya, and thanks to the efforts of Dīwāna Maḥmūd Čelebi (d. in the first half of the 10th/16th century), others were founded in Istanbul, Rumelia and other Anatolian towns, and in the Arab lands, at Lād̲h̲aḳiyya and Aleppo and in Egypt and Algiers.

The story told after Saʿd al-Dīn by Von Hammer (*GOR*, i, 147) and others, that as early as 759/1357, Sulaymān son of Ork̲h̲ān received a cap from a Mawlawī dervish at Bulayr, has been shown by Hasluck (ii, 613) to be a fiction. The historians make no allusion to any importance attaching to the Mawlawī chief when Murād I took Konya in 788/1386; but when the city was taken by Murād II in 838/1435, peace was negotiated, according to Saʿd al-Dīn (i, 358) by Mawlānā Ḥamza, but according to Nes̲h̲rī (quoted in *ibid.*) by the descendant of Mawlānā D̲j̲alāl al-Dīn al-Rūmī, ʿĀrif Čelebi, "who united all the glories of worth and pedigree, and possessed mystic attainments"; the rebellious vassal supposed that a holy man of the family of the Mawlānā would inspire more confidence. The same person performed a similar service in 846/1442 (Saʿd al-Dīn, i, 371). According to V. Cuinet (*La Turquie d'Asie*, i, 829) Selīm I when passing through Konya in 922/1516 in pursuit of the Persians (?) ordered the destruction of the *Mawlawī-k̲h̲āna*, at the instance of the *S̲h̲ayk̲h̲ al-Islām*; and though this command was repealed, the moral and religious authority of the head of the order was gravely compromised. That the saints of Konya were highly reverenced in the Ottoman Empire later in the 10th/16th century appears from the list of graves visited by Sayyid ʿAlī Ḳapūdān in 961/1554, which commences with those of D̲j̲alāl al-Dīn, his father and his son (Pečewī, *Taʾrīk̲h̲*, Istanbul 1283/1866-7, i, 371). In 1043/1634 Murād IV assigned the *k̲h̲arād̲j̲* of Konya to the Čelebi. Yet the first reference to "dancing dervishes" in Istanbul which Hasluck produces is from the time of Sultan Ibrāhīm (1049-58/1640-8).

Mawlawī *tekke*s were divided into two classes, the *āstāna* and the *zāwiya*, the former being considered as more prestigious, with the *čile* (see section 1. above) being performed there. During the high Ottoman period, there were *āstāna*s, apart from the *āstāna-yi ʿaliyya* called Ḥuḍūr-i Pīr at Konya itself, at Bursa, Kütahya, Ḳaraḥiṣār, Manisa, Eskis̲h̲ehir, Ḳasṭamonu and Gelibolu in Anatolia, at Yeñis̲h̲ehir in Rumelia, and at Aleppo and in Egypt, plus the *āstāna* which served as the fourth of the Mawlawī *tekke*s in Istanbul. During this period, there were 76 Mawlawī *zāwiya*s in towns alone (details in A. Gölpınarlı, *Mevlânâ'dan sonra mevlevîlik*, 335). Of European authors writing towards the end or just after the Ottoman era, Cuinet mentions three *Mawlawī-k̲h̲āna*s of the first rank and one *tekke* of the second in Istanbul and the neighbourhood; he gives the names of the

saints whose tombs they contain, without dates. He mentions seven other *Mawlawī-khānas* of the first rank, at Konya, Manisa, Ḳaraḥiṣār, Baḥariyya, Egypt (Cairo?) Gallipoli and Bursa; and as the more celebrated of the second rank, that of Shams-i Tabrīzī at Konya, and those in Medina, Damascus and Jerusalem. To these, Hasluck adds *tekkes* at Canea (Crete), founded about 1880, Ḳaramān, Ramla, Tatar (in Thessaly), and possibly Tempe (for one in Izmir, see Anderson, in *MW*, xiii [1922], 161; for one in Salonica, see the work of Garnett, and for one in Cyprus, that of Lukach cited in the *Bibl.* to section 1. above).

In the aftermath of the Kurdish revolt in eastern Anatolia against the new Republican Turkish government in February-April 1925, which had been led by the Naḳshbandī Shaykh Saʿīd of Palu, Kemāl Atatürk decided upon the suppression of all the dervish orders in Turkey. Hence by the decree of 4 September 1925, all the dervish *tekkes* were closed, and the library of the *Mawlawī-khāna* of Konya was transferred to the Museum of that town (see *OM* [1925], 455, [1926], 584).

4. Political importance of the order.

Reference may be made to Hasluck's *Christianity and Islam under the Sultans*, ii, 604-5, for refutation of the stories uncritically reproduced by Cuinet and some less authoritative writers. In these "the Shaykh of the Mawlawī becomes first the legitimate successor by blood of the Saldjūḳ dynasty, and finally the real caliph!" Hasluck supposes these tales to be based on the supposed "traditional right" of the Mawlawī Shaykh to gird the new sultan with a sword. This right cannot be traced earlier than 1058/1648, and appears to have obtained recognition in the 19th century. It would seem that reforming sultans used the Mawlawī order as a makeweight against the Bekṭāshīs, who supported the Janissaries, and then against the *ʿulamāʾ*, who supported the treatment of the Muslim community as a privileged community against the *dhimmīs*. In later Ottoman times, Sultans ʿAbd al-ʿAzīz and Meḥemmed Reshād were members of the order. (D. S. Margoliouth*)

5. The last vestiges of the order in the Arab world and the Balkans.

Following the suppression of the Ṣūfī orders in Turkey, the last Čelebi (Muḥammad Bākir) took up residence in the *āsitāna* of the Mawlawiyya in Aleppo (L. Massignon, *Annuaire du monde musulman 1954*, Paris 1955, 201). Ritual gatherings were held regularly till the early 1950s, when the last active *shaykh* of this *āsitāna* (Muḥammad Shāhū) died. In the *takiyya* of the Mawlawiyya in Ḥimṣ (last *shaykh*, Nūr ʿUthmān), ritual gatherings were held into the 1940s, and in the *takiyya* in Latakia (last *shaykh*, Bākir Efendi) gatherings continued into the 1950s.

The small but active Mawlawiyya community in Damascus, where the *āsitāna* dates back to the late 10th/16th century (Muḥammad Kurd ʿAlī, *Khiṭaṭ al-Shām*, Beirut 1972, vi, 139), disappeared in the 1960s. The last *shaykh* of the order in Damascus, *shaykh* Fāʾiḳ b. Muḥammad Saʿīd al-Mawlawī, died in 1965 (F. de Jong, *Les confréries mystiques musulmanes au Machreq arabe: centres de gravité, signes de déclin et de renaissance*, in A. Popovic and G. Veinstein, *Les ordres mystiques dans l'Islam. Cheminements et situation actuelle*, Paris 1986, 214). His son, Muḥammad Djalāl, published a new edition of the *awrād* (*Awrād al-sāda al-Mawlawiyya*, Damascus 1395/1975) and tried to revive the order without much success. In Damascus, the Mawlawiyya played a prominent role in the religious celebrations in which the Ṣūfī orders used to participate (cf. Muḥammad Djawād Mashkūr and Ḥasan Ghurawī Iṣfahānī, *Ṣufiyān-i Mawlawī dar Dimashk*, in *Honar va Mardom*, Tehran [April 1976], 2-6, and Munīr Kayyāl, *Ramaḍān wa taḳālīduhu al-Dimashkiyya*, Damascus n.d., 108, 117). The gathering in the Mawlawiyya *āsitāna* on the night of 27 Ramaḍān used to draw large crowds (Kayyāl, 116).

In Lebanon, the Mawlawiyya had *takiyyas* in Tripoli and in Beirut. The *takiyya* in Tripoli still functioned in the 1960s. It fell into a state of dilapidation after the death of its last *shaykh*, Anwar al-Ṭarābulusī. In the early 1970s, the *takiyya* was restored (ʿAbd al-Salām Tadmurī, *Taʾrīkh wa-āthār masādjid wa-madāris madīnat Ṭarābulus fī ʿaṣr al-Mamālīk*, Tripoli 1974, 52-4). In Beirut in the 1960s and 1970s, members of the order gathered in the *takiyya* twice weekly to recite the *awrād* and to study mystical texts; the *samāʿ* was not performed any more. The last *shaykh* of the Mawlawiyya in Beirut, *shaykh* Aḥmad ʿUshshāḳ, lost his life in the Israeli bombardment of the city in May 1982. The *takiyya* in Jerusalem ceased to function at the end of the 19th century (De Jong, *The Sufi orders in nineteenth- and twentieth-century Palestine*, in *SI*, lviii [1983], 171).

In Cairo, the *samāʿ* performed in the *takiyya* (*āsitāna*) of the Mawlawiyya after the Friday worship was a tourist attraction at the end of the 19th and in the early 20th century (cf. De Jong, *Ṭuruq and Ṭuruq-linked institutions in nineteenth-century Egypt*, Leiden 1978, 170). In 1903, the *takiyya* was placed under the jurisdiction of the *Dīwān al-Awḳāf*, which had the right to appoint the *shaykh* of the *takiyya* and administered its *awḳāf* (De Jong, 137). The *takiyya* was closed in December 1954, as were all the *takāyā* in Egypt which fell under the jurisdiction of the Ministry of *Awḳāf* (*al-Ahrām*, 13 Dec. 1954). Subsequently, the Ministry also suspended the regular payments from the revenues of the *awḳāf* established in favour of the Mawlawiyya to the resident dervishes, who then left the *takiyya* and dispersed. Thereafter, the *takiyya* was used as a primary school.

In the Balkans, the Mawlawiyya survived into the post-Ottoman era in Greece and in Yugoslavia only. In Greece, the *tekke* in Thessaloniki seems to have functioned till the exchange of the Orthodox and Muslim populations between Greece and Turkey in 1923-4 (Cf. B. Δημητριάδη, *Τοπογραφία της Θεσσαλονίκης κατὰ τὴν ἐποχὴν τῆς Τουρκοκρατίας*, Thessaloniki 1983, 386 f.). In Yugoslavia, the *tekke* of Sarajevo, known as Tekija na Bendbaši, still functioned in the early 1920s. It was demolished in 1959 (cf. Dž. Ćehajić, *Dželaludin Rumi i Mevlevizam u Bosni i Hercegovini*, in *Prilozi za orijentalnu filologiju*, xxiv [1974], 100 ff.). In 1925, *tekkes* still existed in the towns of Štip, Bitola, Veles, Peć and Skopje. Cf. D. Gadžanov, *Mohamedani pravoslavni i mohamedani sektanti v Makedonija*, in *Makedonski pregled*, i/4 (sofia 1925), 63; and N. Hafiz, *Yugoslavya'da Mevlevi tekkeleri*, in Fevzi Halici (ed.), *Mevlâna ve yaşama sevinci*, Ankara 1978, 175 ff. (also published in *Çevren*, vi [Priştine 1978], no. 20, 37-43). The *tekke* in Peć ceased to function in 1941, and the *tekke* in Skopje in 1945 (Hafiz, 40).

Bibliography: Given in the article.

(F. de Jong)

MAWLĀY (a.), "my lord", an honorific title borne by the Moroccan sultans of the Sharīfian dynasties (Saʿdids and ʿAlawids) who were descended from al-Ḥasan b. ʿAlī [see ḥasanī], with the exception of those who were called Muḥammad and whose title was therefore Sayyidī/Sīdī (but the form Maḥammad freely altered does not exclude the usage of Mawlāy in

front of the monarch's name). The articles devoted to the two dynasties considered [see ʿALAWĪS and SAʿDIDS] contain or will contain in general sufficient information on the constituent sultans, but some of these have been or will be the subjects of articles in the alphabetical place of their name (i.e. without Mawlāy or Sayyidī). These include among the Saʿdids: ʿAbd Allāh al-Ghālib bi-llāh and Aḥmad al-Manṣūr; and among the ʿAlawids: al-Rashīd, ʿAbd Allah b. Ismāʿīl, Muḥammad b. ʿAbd Allāh, Sulaymān, ʿAbd al-Raḥmān b. Hishām, Muḥammad b. ʿAbd al-Raḥmān, ʿAbd al-ʿAzīz, ʿAbd al-Ḥafīẓ [s.v. AL-ḤAFĪẒ], Yūsuf and Muḥammad V. As the result of an error of classification, the biographies of four other sultans will have to appear later. (ED.)

MAWLĀY IDRĪS, ZĀWIYAT MAWLĀY IDRĪS, town in Morocco, an urban settlement of some 10,000 inhabitants situated on the west bank of Djabal Zarhūn and attached to the slopes of the Farṭ al-Bīr. It is a mountain city, in contrast to the ancient Roman city of Volubilis (Walīlā/Walīlī) which stands nearby, in the plain on the north-western side. In spite of this contrast between the two towns, their histories are linked and neither can be studied in isolation.

First of all, it is necessary to dismiss the belief according to which Mawlāy Idrīs was founded by Idrīs I when he came to take refuge in the area accompanied by his freedman Rāshid, fleeing from the Orient where he had drawn upon himself the wrath of the great ʿAbbāsid caliph Hārūn al-Rashīd. This is, indeed, the version which is given by local guides to visiting tourists, but it is of no relevance for the historian.

For a proper concept of the origin of the Zāwiya, it is to Volubilis that the researchers must turn. In the view of many people, the latter is an essentially and solely Roman town which apparently fell into ruins with the departure of its first inhabitants. The truth is quite otherwise: in fact, Volubilis survived not only the departure of the Romans (early 4th century A.D.) but also the advent of Islam, and was still in existence at the time when Fās was founded jointly by Idrīs I and Idrīs II (cf. Lévi-Provençal, *La fondation de Fès*, in *AIEO Alger*, iv (1938), 23-52; art. repr. in *Islam d'Occident*, Paris 1948, 3-41). The evidence for the survival of Volubilis beyond the Roman period is, in fact, substantial and may appropriately be considered here.

The first indications of the survival of this town are of an archaeological nature. In his work *Essai sur l'histoire du massif de Mawlāy Idrīs* (Rabat 1938), P. Berthier has published 12 photographs which illustrate very clearly, above the Roman stratum, strata of an early period where Roman materials have been re-used for construction purposes; these materials include shafts of columns, counter-weights of oil-presses and even ornamental cornices which have obviously been detached from their original location. Furthermore, it is possible to observe between the Roman stratum and the later strata a considerable difference in base level, amounting in places to 1 m or 1.20 m.

These indications of a prolonged existence after the Roman period are confirmed by more precise evidence: for the first period, between the Imperial reforms of Diocletian and the advent of Islam (early 4th century A.D. to end of 7th century, approximately four centuries), we possess three Christian funeral inscriptions dating from the years 595, 649 and 655 A.D. (see J. Carcopino and R. Thouvenot, in *Hespéris*, 1928/2, 135-45, 1935/3-4, 131-9). It is to be noted that one of these inscriptions has been used for a second time in a later context.

Walīlī, no longer known as Volubilis, continued throughout this long lapse of time to lead an independent existence. This period, corresponding in the general history of Africa to the ascendancy of the Vandals and Byzantium, is one of almost total obscurity with regard to Morocco. All that can be stated with certainty is that this land had facing it, in the Iberian peninsula, the kingdom of the Visigoths, and was inhabited by Christians, Jews (N. Slousch, *Hébréo-Phéniciens et Judéo-Berbères*, in *AM*, xiv [1908], 1-473), and no doubt also by animists and idolators.

This strange gap in our knowledge is one of the most perplexing features of the history of Morocco, in view of the fact that we are relatively well informed as to the history of other North African countries and, in particular, of Tunisia and eastern Numidia.

With the arrival of Islam, according to the Arabic texts, ʿUḳba b. Nāfiʿ presented himself before Walīlī and there routed a Berber army (cf. Ibn ʿIdhārī, tr. Lévi-Provençal, in *Arabica*, i/1 [1954], 38), but he does not seem to have entered the town, which from this time onward began to serve as a magnet for numerous Muslim arrivals.

It seems that the two Idrīs [*q.vv.*] were not the first Muslims to establish themselves on the site of the former Roman settlement, since Muslim coinage of a time prior to the arrival of the former has been discovered. The tribe of the Awraba, also fugitives from the East, apparently preceded him there. In his *Rawḍ al-ḳirṭās* (tr. Beaumier, 24, 29), Ibn Abī Zarʿ indicates also that a mosque, of which no trace has been discovered, existed at Walīlī, and it was there, he says, that Rāshid presented Idrīs, son of Idrīs, to the people in order to have him recognised as sovereign of the Maghrib.

Evidence that all these events did indeed take place on the former site of the Roman town exists in the form of the many coins of the Muslim period which have been discovered there: these discoveries in fact include not only Muslim coins originating in the East, sometimes in the form of treasure, but also products of other Moroccan mints such as Ṭudgha as well as Walīlī itself, which possessed a mint of its own (see P. Berthier, *Essai*, 59; G. S. Colin, *Monnaies de la période idrisside trouvées à Volubilis*, in *Hespéris*, 1936/2, 113-25; D. Eustache, *Monnaies musulmanes trouvées à Volubilis*, in *ibid.*, 1956/1-2, 133-97; idem, *Monnaies musulmanes trouvées dans la maison au compas*, in *Bulletin d'Archéologie marocaine*, vi [1966], 349-64; on the entire question of coinages, idem, *Corpus des dirhams idrissites et contemporains*, Rabat 1970-1, is extremely informative, in particular with regard to Walīlī, 162-9).

Volubilis was still in existence at the time of the foundation of Fās by the two Idrīs since it is known, thanks to the famous article of Lévi-Provençal quoted above, that the two Idrīs participated in the foundation of this capital. To find the demise of the old Roman town, it is apparently necessary to look to the Almohads who, throughout North Africa, brought extinction to towns which had, hitherto, sheltered Christians. According to some historians, this behaviour of the Almohads was a consequence of the tension between Islam and Christianity caused by the Crusades (on the massacres perpetrated by the Almohads, see D. Jacques-Meunié, *Le Maroc saharien des origines à 1670*, Paris 1982, i, 260-1).

There is thus no doubt that the Roman town of Volubilis was the scene upon which the first stage of the Idrīsid drama was performed. It is now necessary to attempt to discover how the events of history have been transferred, no doubt gradually, towards the site of the mountain known today by the name of Mawlāy

Idrīs. First, it should be noted that all the Arabic texts prior to the 9th/15th century declare that both Idrīs died at Walīlī and were buried there, not however within the town but *extra muros:* Ibn Abī Zar^c, in the *Rawḍ al-ķirṭās*, says simply "near Walīlī"; al-Djaznā'ī specifies "outside the gate of Walīlī"; Ibn al-Ķāḍī, "in a guard-tower opposite Walīlī"; and al-Ḥalābī, "in the courtyard of the guard-tower situated at the gate of Walīlī" (see M. Ben Talha, *Mawlāy-Idrīs du Zarhūn, passim*).

It would be inappropriate to give an exhaustive account of the detailed information provided by these authors. The only fact which needs to be stressed is that the burial of the two Idrīs did not take place at Walīlī but in the immediate proximity. It is therefore logical to suppose that it took place, specifically, on the site where the Zāwiya is currently located, i.e. in that fold of land (*al-ḥufra*) between the two heights of Khaybar and Tazgha, upon which the two main quarters of the new town were to be erected. All those who have visited Volubilis know, in fact, that Mawlāy Idrīs is very clearly visible beyond the ruins of the Roman town. This is, furthermore, the conclusion offered by D. Eustache in his *Corpus* (165 n. 5). The names of Khaybar and Tazgha appear for the first time in the writings of Ibn Ghāzī, author in the 9th-10th/15th-16th century of *al-Rawḍ al-hatūn*, though it is impossible to tell whether these are simple place names or the quarters of a town in the process of construction.

The 16th century texts of Leo Africanus and of Marmol are confusing. These two authors describe, in fact, two different sites: Gualili and the Palace of Pharaoh in one case, Tiulit and Caçar Faraon in the other. But none of these descriptions corresponds exactly either to Volubilis or to Mawlāy Idrīs. It is hard to understand, in fact, how these authors were able to speak of towns situated on the "summit of the mountain", a description applying neither to Volubilis nor Mawlāy Idrīs. A further complication is introduced by the existence of the Ķaṣbat al-Naṣrānī which seems to have been known to these authors and which is also situated "on the summit of the mountain." Possibly the Ķaṣbat al-Naṣrānī should be located across the Pietra Rossa or Dār al-Ḥamrā', terms employed by Leo Africanus and Marmol.

Amid all this confusion, which seems to prove that these authors had a very poor knowledge of the region or described it on the basis of hearsay, there nevertheless emerges from a comparison of the two texts a glimmer of light which could provide the key to the mystery that surrounds the origin of the new city. It may be observed that the former, the work of Leo Africanus, mentions only two or three houses around the tomb of the two Idrīs, while the latter, the work of Marmol, who wrote a half-century after him, mentions fifteen to twenty. Circumstantial evidence points to this as the origin of Mawlāy Idrīs, a town which must have begun to develop around a venerated tomb during the 10th/16th century, the period of the great maraboutic movement in Morocco.

This, then, is the time at which the town under discussion began to develop. Obviously, there is a long gap between the 10th/16th century and the end of the 2nd/8th or the beginning of the 3rd/9th. The factor which enables us to fill the space framed between these two dates would be the cult of Idrīs, since Leo Africanus tells us that his grave, at that time separate from any urban settlement, "is venerated and visited by almost all the tribes of Mauritania" (tr. Épaulard, 245).

It is thus from the 10th/16th century onward that the Zāwiya developed. There is nothing surprising in this, since it may be observed that Bū-Dja^cd was founded at the end of the same century, Wazzān at the beginning and Mogador or al-Sawīra towards the end of the 18th century.

However, the accelerating impulse seems to have been given during the 12th/18th century by Mawlāy Ismā^cīl, who ordered the destruction of an ancient mausoleum and replaced it with the one that still exists today; this, according to the *Kitāb al-Istiķṣā'*, in 1132-4/1720-2. There is nothing surprising in this initiative on the part of the great ^cAlawid sultan. In fact, it conforms perfectly with his repugnance for the independent and irreverent town of Fās and his preference for Miknās, which he was to make his capital and where he was to erect sumptuous palaces. The Zarhūn, to some extent, must have benefited from the prosperity of Miknās.

It was with Mawlāy Ismā^cīl that the Zāwiya of Zarhūn attained its full dimensions and made, so to speak, its début in history. The best evidence attesting to this relatively recent appearance of the urban settlement which bears this name today, consists in the complete silence of Arab or European historians and geographers prior to the 17th century. Here may be added the text of Mouëtte (beginning of the 17th century) declaring that at this time there were, in the Zarhūn, only small villages forming a dispersed habitat "here and there", but "no town" (Mouëtte, *Histoire des conquestes de Mouley Archy*, in *Sources inédites de l'histoire du Maroc*, 2nd series, *France*, ii, 1924, 182-3). On the other hand, with the start of the ^cAlawid dynasty, the town entered a phase of lively prosperity.

A curious text contained in the *Kitāb al-Istiķṣā'* places it, at this early stage, alongside the most eminent Muslim sanctuaries: the Ka^cba, Jerusalem, the Mausoleum of Sīdī ^cAlī Sharīf at Tafilalt and that of Mawlāy Idrīs II at Fās. Its sanctified nature led to the following consequences: (1) all non-Muslims, whether Jews or Christians, were excluded from its territory; (2) this territory, and especially the Zāwiya, became an inviolable place of sanctuary for any political criminal or fugitive from common law; and (3) its prestige, or what might be termed its *baraka*, extended over the entire range of the Zarhūn.

Currently, the exclusion of Jews and Christians is still sanctioned by the law which prohibits them from acquiring property there. The protection of criminals has never been other than relative, even in the most prestigious times of the sanctuary. Some have found there an effective refuge, for others it has proved less advantageous. As for access to the locality for Europeans, although it was rigorously controlled before the Protectorate, as certain travellers discovered to their cost, all restrictions have now ceased to exist, and a visit to Mawlāy Idrīs is recommended to tourists visiting Morocco.

In history, the piety of the sultans is attested not only through pious visits but also through the care shown for the maintenance and embellishment of the sanctuary and the mosques (details may be found in Berthier's *Essai*). These visits sometimes take on a political nature, as to a place of symbolic meetings, where alliances are sealed and treaties or truces concluded. A visit to Mawlāy Idrīs is obligatory for every newly-installed sovereign. In the course of his campaign against Muḥammad V, in 1953, El-Glāwī did not fail to comply with this tradition, and Muḥammad V did likewise on his return from Madagascar. Such evidence shows that the cult of Mawlāy Idrīs has today lost none of its prestige, and it may legitimately be supposed that it could play a similar role in the future.

In the cultural sphere, it is known that distinguished scholars have taught at the Zāwiya. A *madrasa* of some repute exists in the locality, and this has been endowed, quite recently, with a cylindrical minaret, a form most unusual in the Muslim architecture of Morocco. Its decorative frieze, made of green pottery, is inscribed with verses from the Ḳurʾān in a very stylised Kufic script (cf. *Guide bleu, Maroc*, 1975, 206; A. Paccard, *Le Maroc et l'artisanat traditionnel*, i, 315).

Although Idrīs al-Akbar has numerous saintly rivals in the massif of the Zarhūn, such as Sīdī ʿAlī Ibn Ḥamdūsh, Sīdī Aḥmad Dg͟hūg͟hī and Sīdī ʿAbd Allāh al-K͟hayyāṭ of Talag͟hza, in the urban settlement itself his cult is challenged only by that of his barber, Sīdī ʿAbd Allāh al-Ḥad͟jd͟jām, to whom a mosque is dedicated.

The population of the small town consists of a teeming mass of Idrīsid S͟hurfā and ʿAlawids subdivided into a multitude of branches which the author of this article will not attempt to enumerate.

It is necessary, however, to stress the importance not of the moussem (*mawsim* [*q.v.*]) of Mawlāy Idrīs but of the moussems which are conducted there almost daily at certain times of the year. The present writer was able, in 1934, to witness a moussem of the Sūs people, a crowd of two or three thousand, climbing towards the sanctuary and chanting a curious recitative which has been described by A. Chottin (see his *Tableau de la musique marocaine*, Paris 1938).

Naturally enough, there is a vast number of brotherhoods, ranging from the most aristocratic to the most coarse and primitive. The disciples of Sīdī ʿAlī Ibn Ḥamdūs͟h and of Sīdī Aḥmad Dg͟hūg͟hī honour their founders not only on the southern slope of the mountain where their sanctuaries are located, but also in the town of Mawlāy Idrīs itself, and this seven days after the mouloud (*mawlid* [*q.v.*]). In his *Essai* (134-5), the present writer has hesitated to assess the influence from the Roman period which could have stimulated the appearance in Morocco of extravagant rites on the part of certain religious brotherhoods. In his recent article *Le Temple B. de Volubilis*, H. Morestin has prompted the present writer to revive this hypothesis. At the conclusion of his excellent archaeological study, Morestin indicates, in fact, that the sanctity and the mysticisms of the Zarhūn could have preceded Islam. Was Temple B. a temple of Saturn or was it not? Prudently, Morestin refrains from making this identification, which does not prevent him from declaring, in the last sentence of his book, that "indirectly the spiritual heritage of Temple B. could have played a role, at the dawn of the history of Muslim Morocco".

Bibliography: All questions concerning the Zarhūn, the Muslim phase of the history of Volubilis, the mystery surrounding the name of Walīlī (from a Berber word signifying rose-laurel), the history of the Zāwiya, etc., have been examined by the author of this article in his *Essai sur l'histoire du massif de Mawlāy Idrīs*, Rabat 1938; the remarkable preface contributed by H. Terrasse would be sufficient, in its own right, to convey an impression of all these issues. It concentrates, however, on the Zarhūn as a whole rather than on the town of Mawlāy Idrīs in particular. For Terrasse, the Zarhūn represents irrefutable evidence of pre-Hilālian Morocco; in this, he is in agreement with X. de Planhol in his *Fondements géographiques de l'histoire de l'Islam*, 148. More recently, a work by N. Ben Talha, former director of the Museum of Dār D͟jāmaʿ at Miknās, *Mawlāy Idrīs du Zarhūn*, 1965, has provided a very thorough study of daily life in the Holy City; it is to be noted that the closed and unique nature of the milieu examined contributes considerably to the interest of this work. Some useful material is to be found in the works of L. Chatelain and R. Thouvenot on *Le Maroc des Romains*, *Volubilis* and *Banassa*, also in the publications of the Service des Antiquités Marocaines (P.S.A.M.) in the time of the Protectorate, superseded since independence by the *Bulletin d'Archéologie Marocaine*. On the Zarhūn in general, recourse may be had to the doctoral thesis of M. Belarabi, *Etude de géographie rurale*, Bordeaux 1980, which merits only too well the title which the author has given to it.

(P. Berthier)

MAWLĀY ISMĀʿĪL b. al-S͟harīf, Abu 'l-Naṣr, the second ruler of the Moroccan dynasty of the ʿAlawids [see ʿalawīs and ḥasanī].

On the death of sultan Mawlāy al-Ras͟hīd, the empire of Morocco was divided. Mawlāy Ismāʿīl, governor of Meknès [see miknās] and brother of the deceased sultan, was proclaimed sultan in this town. He advanced at once on the capital Fās, which had declared against him and seized it. He was proclaimed there on 11 D͟hu 'l-Ḥid͟jd͟ja 1082/14 April 1672), being then 26 years of age.

But three rivals, his brother Mawlāy al-Ḥarrānī in Tāfīlālt, his nephew Aḥmad b. Muḥriz, proclaimed in Marrakesh and in Sūs, and thirdly the guerilla chief al-K͟hiḍr G͟haylān in the north-west, took the field against him. They were supported by the Turks of the Regency of Algiers, who feared the establishment of a solid power in the west of the Mag͟hrib and endeavoured to make trouble there. Muḥriz Ismāʿīl at first drove his nephew Aḥmad b. Muḥriz out of the town of Marrakesh, defeated G͟haylān to the north of Fās and had him put to death. But Aḥmad b. Muḥriz once more raised the lands of the south and the Atlas. To obtain peace, Ismāʿīl had to recognise his nephew as *amīr* of the lands south of the Atlas and his brother al-Ḥarrānī as *amīr* of Tāfīlālt.

These civil wars, which had lasted five years, had hardly terminated when a descendant of the Marabouts of Dilāʾ [*q.v.* in Suppl.], Aḥmad b. ʿAbd Allāh (d. 1091/1680), also supported by the Turks of Algiers, fomented a terrible rebellion in the country of Tādla and the provinces of western Morocco. But his Berber troops could not withstand Māwlay Ismāʿīl's disciplined troops, especially his artillery. Marrakesh fell in Rabīʿ II 1088/June 1677. The victorious Ismāʿīl terrorised the people to keep them quiet; more than 10,000 were beheaded; thousands of prisoners of war along with Christian slaves had to help to build the palace of Meknès, which the sultan made his military capital. At the same time, the plague carried off thousands of victims (1090/1679) in the regions of the G͟harb and the Rīf.

The vigorous repression of the Berber revolts and the epidemic afforded Mawlāy Ismāʿīl a certain respite. He took advantage of it to raise a professional army. He enlisted former negro slaves, gave them wives, allotted estates to them, trained them in the use of arms, and made of them the famous Black Guard of the ʿAbīd al-Buk͟hārī (so-called because they took their oath on a copy of the *Ṣaḥīḥ*) which was to assure him supremacy over all Morocco.

At the same time, allegedly to favour the intransigent religious party, but in reality to watch the dealings of the Turks and Europeans in the seaports, and to counteract the influence of the corsairs, he organised the corps of the *Mud͟jtahidūn* or "volunteers of the faith". The latter corps, the cadre of which was formed by several hundred carefully selected ʿAbīd,

waged an unceasing irregular warfare against the European possessions. They took La Mamora (al-Maʿmūra), the modern al-Mahdiyya, by surprise from the Spaniards, and Mawlāy Ismāʿīl collected over 100 pieces of artillery there (15 Rabīʿ II 1092/4 May 1681). They harassed the English at Tangiers and the latter evacuated the town after blowing up the mole and the fortifications (1 Djumādā I 1095/15 April 1684) (cf. Davis, *The history of the Second Queen's Royal Regiment*, i, London 1883, 118 ff.). Larache (al-ʿArāʾish) also was forced to succumb to the blows of the "volunteers of the faith" in 1689, and Aṣīla in 1691. But all attempts against Melilla and Ceuta failed. It was in vain that Mawlāy Ismāʿīl endeavoured to get Louis XIV to aid him against Spain. French commerce had to suffer for some time as a result.

But the Peace of Ryswick in 1697 raised Louis XIV's prestige considerably above his enemies. Mawlāy Ismāʿīl then sought his alliance against the Turks of Algiers, who were mixed up in all the plots hatched in the Atlas against the *sharīfs* of Fās. An entente between France, the Bey of Tunis and the sultan of Fās was then concluded. The latter even tried to cement it by a matrimonial alliance and demanded the hand of the Princess de Conti (cf. Plantet, *Mouley Ismaïl et la Princesse de Conti*, Paris 1893). In spite of the failure of the latter plan, the entente secured to France great commercial benefits at Salé, Tetouan and Safi. Frenchmen superintended the building of the palaces, roads, and forts of the sultan and sometimes (like Pillet) accompanied his artillery. On his part, Mawlāy Ismāʿīl organised several expeditions against the Turks with the help of France, whose merchants supplied him with arms and munitions. But the slowness of the Moroccan armies did not enable Ismāʿīl to reap the advantages expected. He even allowed his ally, the Bey of Tunis, to be defeated near Constantine, which enabled the Turks of Algiers to come to fight the Moroccans in the west in full strength in 1701 and to drive them back.

The expeditions of Mawlāy Ismāʿīl against the Turks, in spite of their relative lack of success, enabled him to pacify his frontiers where he built or renovated the fortifications. He built the fort of Reggāda in the mountain of the Banū Yaʿlā commanding the high valley of the Wēd Shāref and the lands of the Arab tribes of the High Plateaux. He built the fort of ʿUyūn Sīdī Mallūk in the plain of Angād and that of Salwān in the land of the Ṭrīfa. He thus closed the exits on his north-east frontier. Forts built in the lands of each tribe kept the country quiet, especially the marabouts, the natural allies of the Turks, whose privileges were tending to pass into the hands of the *sharīfs*. The latter gradually took over the direction of the religious elements, which were organised into brotherhoods. Ismāʿīl completed his system of domination by the creation of military zones. Tāza, notably, had its walls rebuilt. This town became the headquarters of the eastern march. A garrison of 2,500 ʿAbīd secured the passage from western to eastern Morocco by the pass of Tāza. It also had to keep in control the Berbers of the Rīf in the north of this ravine and the Berbers of the middle Atlas in the south.

Apart from his constructions of a military nature, Mawlāy Ismāʿīl was very active as a builder in the various towns of Morocco, and especially at Meknès, where thousands or European slaves worked on the erection of palaces, mosques and *madrasas*. In order to raise the resources for all the expenses of the army's upkeep and his building enterprises, he derived money from taxes raised brutally and regardlessly by his agents, from continual raids on the tribes, from custom duties, from the sixth levied on the spoils of the corsairs, from the ransoms of captives and from the presents, often sumptuous, given by foreign ambassadors. The monopoly of trade, by supplying the treasury, prevented moreover the illicit sale of horses and arms.

Mawlāy Ismāʿīl was a man of vigorous character, of adroitness and of an uncommon agility and bravery, but these positive qualities were accompanied by an unparalleled cruelty and sadism, many examples of which are given by the chroniclers and writers of memoirs. On the other hand, he gave the appearance of being interested in the intellectual activities of his subjects and showed himself respectful of the external aspects of the Islamic cult; he even went as far as engaging in proselytisation and tried to convert Louis XIV.

In regard to foreign policy, he enjoyed fairly good relations with Britain and France, shown by the despatch of embassies which were more or less successful. The French were thus left with a free hand in the Mediterranean, but he did not utilise profitably this diversion of their energies in order to combat victoriously the Turks of Algiers, the aim of his North African policy. Nevertheless, he was able to reduce considerably the foreign occupation of Moroccan ports. In regard to internal policy, much of his reign was filled with the suppression of tribal revolts, which the army was not always able to contain within bounds, whilst his main effort was involved in consolidating the *makhzan* [*q.v.*], upholding it against the turbulent Berbers through the use of Arab and Negro troops.

He had thus succeeded, as much by the reign of terror which he evoked as by his own skilfulness, in imposing peace on the internal regions of his possessions, when he died, after a reign of 55 years, on 27 Radjab 1139/20 March 1727 at the age of 80. Amongst the several hundred children which his innumerable wives had given him, it was Mawlāy Aḥmad al-Dhahabī who succeeded him.

MAWLĀY MAḤAMMAD AL-SHAYKH, name of three Moroccan sultans belonging to the dynasty of the Saʿdids [*q.v.*].

I. The first, Abū ʿAbd Allāh, who also bore the title of al-Mahdī and is sometimes known as al-Imām, is generally counted second or third in the list of members of the dynasty, but he may to a certain extent be considered its true founder, since it was he who put an end to that of the Marīnids [*q.v.*]. Born probably at Tagmaddart (a district of the Darʿa) in 896/1490-1, he was the younger son of Muḥammad b. ʿAbd al-Raḥmān al-Ḳāʾim bi-amr Allāh, who was proclaimed sultan in 916/1510 and died in 923/1517. According to legend, the great destiny to which he was called was predicted to him in his infancy when, at the Ḳurʾānic school which he attended, a cock came and perched on his head, as well as on that of his elder brother, Aḥmad al-Aʿradj. The two young boys received a quite extensive religious and literary education and were sent on the Pilgrimage to Mecca in *ca.* 911/1506. The lack of precision and the contradictions in the chronology of events found in the sources make any attempt at biography particularly difficult, but it seems clear that al-Aʿradj was appointed by his father governor of the Sus, where he too received the *bayʿa* [*q.v.*] in the same year (916/1510). With his younger brother as his subordinate, he waged without much success a holy war against the Christians established in the region, especially at Santa Cruz, the coastal outlet of the Sus which was to become Agadir [*q.v.*]. The two *sharīfs* also profited at this time from the aid of the Waṭṭāsid ruler [*q.v.*] of Marrakesh, who supplied them with arms. Maḥammad al-Shaykh was not slow, however, to free himself from the tutelage of this elder brother and to take into his own hands the administration of the plain and of the southern flank of the High Atlas, over which his authority extended at the time that Leo Africanus [*q.v.*] visited the region (919/1513). Moreover, the entire province came under his control on the death of al-Ḳāʾim. Aḥmad was then in power to the north of the Atlas.

Making his capital at Tarudant [*q.v.*] which he fortified and renamed Maḥammadiyya and where he built the citadel, the great mosque, the *madrasa* and sugar refineries, he was obliged to solve problems of an economic and political, even religious nature, since he needed to trade with the Christians in order to obtain arms and munitions, but resented the fact that Santa Cruz was occupied by the Portuguese, who in addition exercised a monopoly over the export of sugar. As a result of treaties concluded with the Portuguese rulers of Safi and Azemmour in 930/1524, and then renewed in the two following years, and after ill-fated expeditions against Santa Cruz, relative peace reigned in the south of Morocco. On the one hand, Mawlāy Maḥammad remained on good terms with the influential marabout of the locality where his family had resided, Tidsī, and even married his daughter; on the other, he attracted Christian merchants to the Sus in order to develop trade in the leather, wax and sugar produced in the region.

In Dhu 'l-Ḥidjdja 930/October 1524, Aḥmad al-Aʿradj had taken Marrakesh from the Waṭṭāsids, and the two brothers had made further attacks on the last sovereigns of this dynasty who ruled at Fās; they had also taken a large quantity of artillery with which they were able once more to undertake an expedition against the port of Funti [see AGADIR], which was besieged and captured on 13 Dhu 'l-Ḳaʿda 947/11 March 1541. The Christian captives were taken to Tarudant, while the arms and munitions seized from the enemy enabled Mawlāy Maḥammad to subdue the Berbers of the region, always an unruly element.

Until this point the two brothers had, apparently, made common cause, but a quarrel broke out between them, the specific grounds of the rift being a dispute over the sharing of the booty. A few months after the capture of Funti, al-Aʿradj attacked and defeated Maḥammad, who was determined to avenge himself and succeeded, in 951/1544, in taking possession of Marrakesh, capturing his elder brother and exiling him to Tafilalt with all his followers. Although theoretically a vassal of his brother for a few months more, Mawlāy Maḥammad al-Shaykh, henceforward sole master of the territory controlled by the Saʿdids, was able to contemplate putting an end to the power of the Waṭṭāsids and unifying Morocco to his own advantage. The outcome of the first encounter, which took place on the Umm al-Rabīʿ, was favourable to him. The treaty concluded on that occasion was, however, soon to be broken, and the Saʿdid called upon his adversary to submit; when the latter refused, Fās was attacked in 952/1545, and the ruler of the town, Aḥmad al-Waṭṭāsī, captured and then released. While his son took possession of numerous towns of the Atlantic coast, Mawlāy Maḥammad, who had lost Fās in the meantime, was obliged to put the place under a prolonged siege, capturing it on 2 Muḥarram 956/31 January 1549. It may be reckoned that this considerable event marks the beginning of the dynasty.

The following year, around the month of Djumādā I 957/June 1550, al-Shaykh sent two of his sons, al-Ḥarrān, governor of the Sus, and ʿAbd al-Ḳādir, to conquer Tlemcen; but this enterprise was unsuccessful and al-Ḥarrān fell sick and was forced to return to Fās where he died a few months later.

Meanwhile, an uncle of the defeated Waṭṭāsid, Abū Ḥassān, attempted to revive hostilities; he even went so far as to appeal for aid to the Emperor Charles V (20 Shaʿbān 957/3 September 1550) and, after various vicissitudes, finally obtained from the Janissaries of Algiers an army with which he returned to attack Mawlāy Maḥammad al-Shaykh and to defeat him on a tributary of the Sebou, the Innawen, in Ṣafar 961/January 1554. Forced to leave Fās and to abandon all his property, al-Shaykh rapidly returned to the fray, recaptured the capital which had been pillaged by the Turks and, on 24 Shawwāl 961/22 September 1554, executed Abū Ḥassān, whose head was sent to Marrakesh. He stayed until the end of Ramaḍān 962/beginning of August 1555 at Fās, where he left his heir presumptive, ʿAbd Allāh al-Ghālib bi 'llāh [*q.v.*] and entrusted the administration of Meknès to another of his numerous sons, ʿAbd al-Muʾmin, before setting out once more for the Sus.

In 959/1552, the Ottoman sultan Sulaymān Ḳānūnī [*q.v.*] (926-74/1520-66) had written to Mawlāy Maḥammad al-Shaykh on the subject of the eastern frontiers of Morocco, but the messenger had been very badly received by the new sultan, who thus

condemned himself to death. Resolved to settle definitively at Marrakesh, he left Fās, but a dozen hired assassins, sent from Algiers to execute him, mingled easily with his entourage which consisted almost wholly of Turks; they performed the deed on 29 Dhu 'l-Ḥidjdja 964/23 October 1557 and bore his head, so it is said, to Istanbul. His body lies in Marrakesh, among the members of his dynasty, in the hall known as Lālla Masʿūda which contains the famous "Saʿdian tombs", where his epitaph may be seen as well as a long commemorative plaque dedicated to him (see G. Deverdun, *Inscriptions*, nos. 123 and 85, pp. 125, and 82-6); another marble plaque bearing a fairly long inscription (*ibid.*, nos. 127-8, pp. 131-4) extols the merits of the sultan's Berber wife, Masʿūda, who gave birth to Aḥmad al-Manṣūr [*q.v.*] and her name to the hall.

Diego de Torres has left a portrait of Mawlāy Maḥammad al-Shaykh from which it emerges that he had a round and pale face, large and vivid eyes, a long grey beard, curly hair and two teeth of great size; of modest stature, but robust, he was unscrupulous by nature, but a bold and valiant fighter (*Histoire des Cherifs*, *apud* Marmol, iii, 212). He was also, according to the least sympathetic Arab sources, a man of piety. He was furthermore a scholar, knowing by heart the *Dīwān* of al-Mutanabbī, and it was he who founded the library of the great mosque of Tarudant and expanded the faculties of *ḥadīth* and of *fiḳh* (teaching the *Ṣaḥīḥ* of al-Bukhārī, the *Risāla* of al-Ḳayrawānī and the *Mukhtaṣar* of Khalīl b. Isḥāḳ).

When he was in Fās, he attended certain courses himself, but he did not refrain from inflicting cruel punishment on those *fuḳahāʾ* whose only crime was to have served the preceding dynasty, such as al-Wansharīsī [*q.v.*], put to death in Dhu 'l-Ḥidjdja 955/January 1549, al-Zaḳḳāḳ and Sīdī ʿAlī Ḥarzūz.

From his life in the south, he had retained simple manners, and many sources recall, not without irony, that a former vizier of the Marīnids, Ḳāsim al-Zarhūnī, and the matron of the harem (*ʿarīfa*) of Fās, were engaged in educating the numerous members of the court in refinement and instructing them on such topics as etiquette, dress, cuisine and even administration.

From an economic and financial point of view, Mawlāy Maḥammad al-Shaykh caused some problems as a result of the weight of taxation that he levied, but he was at pains to increase the wealth of the country and to develop both the cultivation of cane and the manufacture of sugar, constructing seven refineries at Tarudant in 951/1544. In addition, he had ambitions to take possession of the salt mine of Taghāzā situated approximately midway between the estuary of the Niger and the bend of the Drāʿ (Darʿa); he called upon the ruler of Gao to surrender it to him, but the latter sent 2,000 Touaregs to seize the possessions of the Saʿdid as a gesture of defiance. In the year of the sultan's death, his troops killed the governor of Taghāzā and pillaged a caravan of salt, and he himself undertook an expedition to the Sudan, but he was forced to turn back and it fell to his grandson, Aḥmad al-Manṣūr al-Dhahabī [*q.v.*], to conquer the land of gold.

Bibliography: The earliest sources are Diego de Torres, *Histoire des Chérifs*, vol. iii of *L'Afrique* by Luis de Marmol Carvajal, and vols. i and ii of this latter work (the whole, composed in Spanish, was first published in French translation by N. Perrot d'Ablancourt, Paris 1667). As regards the Arabic sources, see Fishtālī, *Manāhil al-ṣafā fī akhbār al-mulūk al-shurafāʾ*, ed. ʿA. Hajji, *L'activité intellectuelle au Maroc a l'époque saʿdide*, Rabat 1976-7; D. Jacques-Meunié, *Le Maroc saharien des origines à 1670*, Paris 1982 (detailed study, extensive bibliography).

II. The second, who bore the regal title of al-Maʾmūn, was the grandson of the preceding and the son of Aḥmad al-Manṣūr [*q.v.*] and a negro woman named Khayzurān. After the battle of Wādī 'l-Makhāzin (or Battle of the Three Kings) which took place on 30 Djumādā I 986/4 August 1578, and the proclamation of Aḥmad al-Manṣūr as sultan, Maḥammad al-Shaykh II was declared heir presumptive by his father who appointed him governor of Fas. But he abandoned himself to debauchery, neglected his religious duties and antagonised the population, to such an extent that the sultan sent him to Sidjilmāsa, whence he was impatient to return. After the death of his father (1012/1603), he was obliged to compete with his brothers who disputed his claim to the throne, raised an army which, under the command of his son ʿAbd Allāh, marched on Marrakesh and captured the town, and he was finally proclaimed sultan at Fās in 1015/1606. The concession of Larache (al-ʿArāʾish [*q.v.*]) to the Spanish on 4 Ramaḍān 1019/20 November 1610 incited the rebel Abū Maḥallī [*q.v.* in Suppl.] to launch an appeal to holy war, and three years later (1022/1613), Maḥammad al-Shaykh II was assassinated near Tetouan.

Bibliography: To the Arab historians of the 11th/17th century and to the comprehensive works cited in the preceding article, the following should be added: R. Le Tourneau, *La décadence saʿdienne et l'anarchie marocaine au XVII^e siècle*, in *Annales de la Faculté des Lettres d'Aix*, xxxii (1960), 187-225. J. M. Gandin, in *Hommes et destins* (Publ. of Acad. des Sciences d'Outre-Mer), Paris-Aix-en-Provence, vii (1986), 369-71, with Bibl. See also the *Bibl.* of the article ABŪ MAḤALLĪ.

III. The third was the nephew of the preceding and the son of Mawlāy Zaydān and of a Spanish woman. He had been imprisoned by his brother al-Walīd, sultan of Marrakesh, who was assassinated on 14 Ramaḍān 1045/21 February 1636; immediately released, he was proclaimed sultan with the title of al-Ṣaghīr or al-Aṣghar = the Young. Shortly after this, the holy man of Tazerwalt named Sīdī ʿAlī, who already occupied the Sus, Tafilalt and Taghāzā, took possession of Agadir, with the result that the territory of the Saʿdid barely extended beyond the suburbs of Marrakesh. In 1048/1638, Mawlāy Maḥammad al-Shaykh III concluded a treaty with King Charles I of England, by which the king's subjects were forbidden to trade with the sultan's enemies, but he does not seem to have derived any great profit from it.

Meanwhile, the *zāwiya* of al-Dilāʾ [*q.v.* in Suppl.],

which had not recognised the sultan of Marrakesh, had become a temporal power to be reckoned with, at a time when, in addition, the emergence of the sharifs of Tafilalt began to be a troublesome influence. An important event in the reign of this sultan was the defeat inflicted on him by the army of al-Dilāʾ on the Wādī ʾl-ʿAbīd, on 17 Djumādā II 1048/26 October 1638. In spite of this reverse, he succeeded in reigning for some twenty years and died on 22 Rabīʿ I 1065/30 January 1655 (date indicated, according to an official document, by the *Taʾrīkh al-Sūdān*, which contains effusive eulogies on the conduct of this sultan).

Bibliography: See that of the preceding article. (CH. PELLAT)

MAWLID (A.), or **MAWLŪD** (pl. *mawālid*), is the term for (1) the time, place or celebration of the birth of a person, especially that of the Prophet Muḥammad or of a saint [see WALĪ], and (2) a panegyric poem in honour of the Prophet.

1. Typology of the *mawlid* and its diffusion through the Islamic world.

From the moment when Islam began to bring the personality of Muḥammad within the sphere of the supernatural, the scenes among which his earthly life had been passed naturally began to assume a higher sanctity in the eyes of his followers. Among these, the house in which he was born, the *Mawlid al-Nabī*, in the modern Sūḳ al-Layl in Mecca, the history of which is preserved principally in the chronicles of the town (*Chroniken der Stadt Mekka*, ed. Wüstenfeld, i, 422), does not seem at first to have played a part of any note. It was al-Khayzurān (d. 173/789 [*q.v.*]), the mother of Hārūn al-Rashīd, who first transformed it from a humble dwelling-house to a place of prayer. Just as the pious made pilgrimages to the tomb of the Prophet in Medina, so they now visited the site of his birth to show their reverence for it and to receive a share of its blessings (*li ʾl-tabarruk*). In time, the reverence in which the house was held also found expresssion in its development in a fitting architectural fashion (Ibn Djubayr, *Riḥla*, 114, 163; and see for a description of the house in the late 19th century, Snouck Hurgronje, *Mekka*, i, 106, ii, 27).

Records of the observation of the birthday of the Prophet as a holy day only begin at a late date; according to the generally accepted view, the day was Monday, 12 Rabīʿ I. The earliest mention of a special public celebration on the occasion of the Prophet's birthday is found in Ibn Djubayr, 113. In his time (late 6th/12th century), a special celebration, as distinct from private observance, was arranged in Mecca. The essential feature of the celebration was however only an increase in the number of visitors to the *mawlid* house, which was open the whole day, as an exception, for this purpose. This visit and the ceremonies associated with it (*masḥ*, etc.) were carried through entirely in forms which are characteristic of the older Muslim cult of saints. But just as the later cult of the Prophet had to be raised above the reverence shown to other holy men, so new and special forms developed for his birthday celebrations, which in spite of minor differences in time and place show the same general features everywhere and are comprised under the name *laylat al-mawlid, mawlid al-nabī*, or *mawlid al-nabawī*.

In Fāṭimid Cairo, the *mawlid* of the Prophet was celebrated by the court, as were the *mawlids* of ʿAlī, Fāṭima and the reigning *khalīfa* [*q.v.*]. Essential elements of these celebrations were the procession of the dignitaries to the palace of the *khalīfa* followed by three sermons, each by one of the three *khuṭabāʾ* [see KHAṬĪB] of Cairo (al-Maḳrīzī, *Khiṭaṭ*, i, 433 ff.; cf. i, 466, for the temporary suspension of the *mawlid* celebrations). These occasions were not festivals of the common people, however, but mainly of the Shīʿī ruling class. This no doubt explains why—except in al-Maḳrīzī and al-Ḳalḳashandī, the great historians of Fāṭimid Cairo—there is hardly any reference to these celebrations in the literature emanating from Sunnī circles.

The memory of these Fāṭimid *mawālid* seems to have almost completely disappeared before the festivals in which Muslim authors unanimously find the origin of the *mawlid*: the *mawlid* which we find first celebrated in Irbil in 604/1207-8 by al-Mālik Muẓaffar al-Dīn Gökburi, a brother-in-law of Ṣalāḥ al-Dīn [see BEGTEGINIDS]. The fullest account is given by the great historian Ibn Khallikān (d. 681/1282), himself a native of Irbil. Later writers base their statements upon his description of the *mawlid* (Ibn Khallikān, Būlāḳ 1299, ii, 550 ff.; see G. E. von Grunebaum, *Muhammadan festivals*, New York 1951, 73-6, for an English translation of the account).

In Cairo, the large-scale participation of the common people and the Ṣūfī orders dates from at least the 7th/13th century. In a comparatively short time thereafter, the observance of the festival spread all through the Muslim World. We have many descriptions of the festival from various parts of the Muslim World in different periods (see *Bibl.*).

In 996/1588 the Ottoman Sultan Murād III introduced the *mawlid* (Tk. *mevlid, mevlūd*) celebration at his court (cf. M. D'Ohsson, *Tableau général*, Paris 1787, i, 255 ff.; Von Hammer, *GOR*, viii, 441). From 1910, it was celebrated as a national festival in the Ottoman Empire. Today, the festival comprises one or more official holidays in the Arab states and in most of the countries where Islam predominates. In many of these countries, an official celebration attended by the head of government or his representatives is held in one of the main mosques in their capitals.

In West Africa, the anniversary of the Prophet's birthday is sometimes associated with pre- or non-Islamic festivals, e.g. among the Nupe in Nigeria, where it is identified with the *gani* age-grade ceremonies (F. Nadel, *Nupe religion*, London 1954, 217), and among the Kotocoli in Northern Togo, where it is associated with "the festival of the knives" (R. Delval, *Les musulmans au Togo*, Paris 1980, 151-3). For some Ṣūfī orders in this area, notably for the Tīdjānī branches in Senegal (in Tivaouane, Dakar and Kaolack), the occasion has become the principal yearly gathering for the members of these orders. Poems exist in Hausa, classed technically as *madīḥ* and *sīra*, which are used as *mawlids* (see M. Hiskett, *A history of Hausa Islamic verse*, London 1975, ch. 5), and in Fulani (Fulfulde), are to be found several panegyrics of the Prophet with phraseology very similar to that of the *mawlids* (see J. Haafkens, *Chants musulmans en Peul*, Leiden 1983, 173-216). In Chad, the Sudan, North-East and East Africa (see below), the feast is regularly celebrated, and indications exist that the occasion is becoming more widely observed throughout West Africa. The celebrations staged on this occasion are more or less identical to the ones known in the Arab lands.

Central to these celebrations is the recitation of a *mawlid*, i.e. of a panegyrical poem of a legendary character. These poems normally follow a standard sequence of introductory praises to God, an invocation, a description of the creation of *al-nūr al-muḥammadī* [*q.v.*], then proceed through various stages and digressions (e.g. on the Prophet's ancestry) to the actual physical birth, which is preceded by an account

of a miraculous announcement to his mother Amina [*q.v.*] that she is bearing the Prophet. In the Arab world, *mawlid* recitation became a common feature of the celebrations in the course of the 9th/15th century and had become universal at the end of the 12th/18th.

The origins of these recitals may be found in the religious addresses in Fāṭimid Cairo and in Irbil. The *K. al-Tanwīr fī mawlid al-sirādj*, which Ibn Diḥya composed during his stay in Irbil at the suggestion of Gökburi, was already famous as a *mawlid* at this period (Brockelmann, *GAL*[1], II, 310). It was not till later times, however, that *mawlids* became a predominant element in the celebration, along with torchlight processions, feasting and the fairs in the street, ever increasing in size. The number of the poems used at *mawlids* is quite considerable. Beside the famous *Bānat Suʿād* of Kaʿb b. Zuhayr of the older period, the *Burda* and the *Hamziyya* of al-Būṣīrī and their numerous imitations, there is a whole series of poems regularly employed here, some of which are intended to instruct like that of Ibn Ḥadjar al-Haytamī, while others are merely eulogistic.

One of the most widely recited *mawlids* in Arabic at present is one composed by Djaʿfar b. Ḥasan al-Barzandjī (d. 1179/1765). It is also known under the title *ʿIḳd al-djawāhir* and has been published many times (cf. *GAL*[1], II, 384 and see J. Knappert, *Swahili Islamic poetry*, Leiden 1971, 48-60, for a slightly abridged English tr.). The most popular of the *mawlids* in Turkish was composed by Süleymān Čelebi (d. 825/1421). It is still recited in mosques throughout Turkey and in mosques of the Turkish-speaking Sunnī community in West and South-Eastern Europe as part of the celebrations for the birthday of the Prophet. This *mawlid* was recited during the official Ottoman court celebrations (for a full translation, see F. Lyman MacCallum, *The Mevlidi Sherif*, London 1943; and E. J. W. Gibb, *A history of Ottoman poetry*, London 1900, i, 232-48, for a translation of extracts and data on the author). Similar *mawlids* have been composed in Persian, Bengali, Sindhi and other languages of the Indo-Pakistani subcontinent (cf. A. Schimmel, *Die Verehrung des Propheten in der islamischen Frömmigkeit*, Düsseldorf-Cologne 1981, 136), and also in Serbian (cf. S. M. Zwemer, *Islam in South Eastern Europe*, in *MW* xvii [1927], 353), Albanian (Hafëz Ali, *Mevludi*, Grosvenor Dale, Conn. 1332/1916, 2nd edition. Waterbury, Conn. 1370/1950) and Swahili (cf. Knappert, *op.cit.*, 276-341).

A *mawlid* of the Imām ʿAlī by Sulaymān Djalāl al-Dīn, *Mawlūd-i Djanāb-i ʿAlī*, Istanbul 1308/1890-1, seems to have had some popularity in ʿAlevī circles in the Ottoman Empire in the last decades of the 19th century.

Apart from the occasion of the Prophet's birthday, a *mawlid* recital is sometimes held as part of the ceremonial of the rites of passage. Occasionally, the recitation of a *mawlid* takes place in fulfilment of a religious vow (T. Canaan, in *Jnal. Pal. Or. Soc.*, vi [1926], 55). When a *mawlid* is recited on any of these occasions, it is normally followed by a *dhikr* [*q.v.*] session. In some Ṣūfī orders (e.g. in the Mīrghaniyya and some branches of the Ḳādiriyya) a *mawlid* is recited as part of the standard liturgical ritual [see ḤAḌRA].

The *mawlid* celebration as an expression of reverence for Muḥammad has found almost general recognition in Islam, partly in consequence of the strength of the Ṣūfī movement. At all times, however, there has also been vigorous opposition to it by those who considered it to be a *bidʿa* [*q.v.*].

It is significant of the character of the opposition that its opponents object to those very forms which show the influence of Islamic mysticism (dancing, *samāʿ*, ecstatic phenomena, etc.) or of Christianity (processions with lamps, etc.). An interesting document concerning this feud is a kind of *fatwā* by al-Suyūṭī (d. 911/1505, Brockelmann, II[1], 157, *Ḥusn al-maḳṣid fī ʿamal al-mawlid*) which gives a brief survey of the history of the festival, then discusses the pros and cons very fully and concludes that the festival deserves approval as *bidʿa ḥasana*, provided that all abuses are avoided. Ibn Ḥadjar al-Haytamī in his *Mawlid*, and Ḳuṭb al-Dīn (*Chroniken der Stadt Mekka*, iii, 439 ff.), take the same view, while Ibn al-Ḥādjdj (d. 737/1336-7), as a more strict Mālikī, condemns it most vehemently (*K. al-Madkhal*, i, 153 ff.).

Although the height of this struggle was apparently reached in the 8th-9th/14th-15th centuries, it did not really die down in later years. Indeed, it received new life with the coming of Wahhābism [see WAHHĀBIYYA]. This movement, while deriving its arguments for their opposition to the *mawlid* celebrations mainly from Ibn Taymiyya, inspired the growth of non- or anti-mystical Islam throughout the Islamic world and of the opposition to reference to the Prophet, including the celebration of his birthday, in consequence. Wahhābī teaching is equally directed against the veneration of saints (*awliyāʾ* [see WALĪ]) and against the *mawlids* held in many parts of the Islamic world in their honour. These *mawlids* normally follow the Islamic calendar, but there are exceptions. Accounts of such *mawlid* celebrations exist from many parts of the Islamic world.

The term *mawlid* (colloquial, *mūlid*) to denote a feast held in honour of a saint is used in Egypt and the Sudan in particular. Elsewhere, different terms are used, e.g. *mawsim* [*q.v.*] (coll. *mūsem*) in the Maghrib and parts of the Middle East, *ḥawliyya* (coll. *ḥōliyya*) in the Sudan and the horn of Africa, *ʿurs* in the Indo-Pakistan sub-continent and *ḥol* in Malaysia. Everywhere, the characteristics of such celebrations are more or less the same: crowds gather for one or more days, a fair of varying size and importance accompanies the religious celebrations, *dhikr* and/or Ḳurʾān reading sessions take place inside and/or outside the sanctuary of the saint concerned, one or more processions are held in which the keeper of the sanctuary (often the saint's descendant) and (frequently) Ṣūfī orders participate, and the cloth (*kiswa*) covering the saint's shrine is replaced by a new one in the course of the celebrations. Frequently, communal meals are staged and a centrally organised distribution of alms takes place.

In some parts of the Sunnī world, like Afghānistān, no *mawlids* are celebrated, notwithstanding the widespread cult of saints in these areas; in the Shīʿī world no *mawlids* of the type described here seem to be known.

In Egypt, the celebration of the numerous *mawlids* (about 300 *mawlids* of varying size were celebrated yearly with official permission in the 1970s) is centrally co-ordinated and supervised (by the *mashyakhat al-ṭuruḳ al-ṣūfiyya*, in consultation with the Ministry of Awḳāf), so as to prevent these celebrations from overlapping and to guarantee public order. Some of these *mawlids* were or still are known for special rituals or customs observed as part of the celebrations [see DAWSA]. During most of the *mawlids*, special sugar dolls (*ʿarāʾis*, sing. *ʿarūsa*) are sold (cf. ʿAbd al-Ghanī al-Nabawī al-Shāl, *ʿArūsat al-mawlid*, Cairo 1977). In Egypt, the celebration of *mawlids* is not limited to Islamic saints but extends to Coptic Christian ones as well.

The predominance of *mawlid* celebrations in Egypt

would seem to explain why it is in this country above all that the most abundant polemical literature concerning the religious status of *mawlid* celebrations was produced. Those critical of such celebrations range in their demands from minor reforms of ritual, such as the prohibition of musical instruments in processions and the staging of profane forms of amusement in the *mawlid* grounds, to total abolition. Most of those who have declared against the celebration of *mawlids* in their traditional form seem to have been of Wahhābī inspiration. Some of the most vocal and well-known 20th century critics who deserve mention were Muḥammad Rashīd Riḍā, Maḥmūd Khaṭṭāb al-Subkī and Muḥammad Ḥāmid al-Fiḳī. Elsewhere in the Islamic world, similarly inspired groups and individuals have opposed or are still actively opposing veneration of saints.

Bibliography: In addition to the works mentioned in the article, see Ḥasan al-Sandūbī, *Taʾrīkh al-Iḥtifāl bi 'l-mawlid al-nabawī*, Cairo 1948 (mainly on the history of the *mawlid* in Cairo, with short excursions on the celebrations in Istanbul, Morocco and Tunisia in different eras; based upon published sources). For descriptions of *mawlid al-nabī* celebrations in different parts of the Islamic world and in various periods, see e.g. Wüstenfeld (ed.), *Chroniken*, iii, 438 ff.; Ibn Ḥadjar al-Haytamī, *Mawlid* (see Brockelmann, *GAL*[1], II, 389); Snouck Hurgronje, *Mekka*, ii, 57 ff., 147 (for Mecca); idem, *The Achenese*, i, 210, 212; idem, *Verspreide Geschriften*, iii, 8 ff., 83-5; and R. A. Kern, *De Islam in Indonesië*, The Hague 1947 (for Indonesia); J. S. Trimingham, *Islam in the Sudan*, Oxford 1949, 146 f. (for Omdurman), and also von Grunebaum, *Muhammadan festivals*, (a general discussion mainly derived from the article *Mawlid* in *EI*[1]).

Works containing descriptions and/or other information concerning the *mawlid al-nabī* and other *mawlids* are e.g. T. Canaan, *Mohammedan saints and sanctuaries in Palestine*, London 1927, 193 ff.; Muṣṭafā Yūsuf Salām al-Shādhilī, *Djawāhir al-iṭlāʿ*, Cairo 1350/1931-2, 241; J. Hornel, *Boat-processions in Egypt*, in *Man*, xxxviii (Sept. 1938), 145-6; J. W. McPherson, *The Moulids of Egypt*, Cairo 1941; Aḥmad Amīn, *Ḳāmūs al-ʿādāt wa 'l-taḳālīd wa 'l-taʿābīr al-miṣriyya*, Cairo 1953, 387-8; R. Kriss and H. Gilsenan, *Saint and Sufi in Modern Egypt. An essay in the sociology of religion*, Oxford 1973, 48-64; P. Rabinow, *Symbolic domination. Cultural form and historical change in Morocco*, Chicago 1975, 89-94; D. F. Eickelman, *Moroccan Islam. Tradition and society in a pilgrimage center*, Austin-London 1976, 171-8; P. Shinar, *Traditional and reformist maulid celebrations in the Maghrib*, in M. Rosen-Ayalon (ed.), *Studies in memory of Gaston Wiet*, Jerusalem 1977, 371-413; F. de Jong, *Ṭuruq and Ṭuruq-linked institutions in nineteenth century Egypt. A historical study in organizational dimensions of Islamic mysticism*, Leiden 1978, 61-4 and *passim*; Fārūḳ Aḥmad Muṣṭafā, *al-Mawālid*, Alexandria 1981[2]; de Jong, *The Ṣūfī orders in post-Ottoman Egypt, 1911-1981* (forthcoming), chs. 3, 7, for a discussion of the conservative versus the reformist orientations and objections concerning the *mawlids* with references to the relevant polemical literature. In addition, see ʿAlī Mubārak, *al-Khiṭaṭ al-Tawfīḳiyya*, i, 90-2 (an enumeration of *mawlids* in Cairo at the end of the 19th century), I. Goldziher, *Le culte des saints chez les Musulmans*, in *Revue de l'Histoire des Religions*, ii (1891), 257-351 (for a still valuable general discussion); and E. Sidaway, *Les manifestations religieuses de l'Egypte moderne*, in *Anthropos*, xviii-xix (1923-4), 278-96 (on Coptic *mawlids*). There is no study devoted to the *mawlid* as a literary genre. (H. FUCHS - [F. DE JONG])

2. In East Africa.

In a region of the Islamic periphery, such as East Africa, the desire to preserve the communal rituals and devotional ceremonies—of which the *mawlid* is the most popular celebration—is often stronger than in the heartlands of Islam (see Annemarie Schimmel, *Mystical dimensions of Islam*, Chapel Hill, N. C. 1975, 216-17; J. Knappert, *Traditional Swahili poetry*, Leiden 1967, ch. 5). For the masses of people in the fringes, Muḥammad is the personage behind whose banner the faithful will enter Paradise. Numerous popular tales and poems about him raise him almost to a superhuman level of deification, and these form the basis for much *mawlid* material; also, the Prophet's life forms the closing section of the voluminous popular cycle on the lives of the 24 prophets who preceded him (see idem, *Swahili Islamic poetry*, Leiden 1971, i, ch. 3; idem, *Islamic legends*, Leiden 1985, i, 56-184; and cf. Th. G. Pigeaud, *The literature of Java*, The Hague 1967, 132).

In East Africa, proper *mawlid* poems contain at least some of the successive episodes of Muḥammad's life, culminating in his death—the date of this being popularly regarded as the same date as his birth—and the *wafāt al-nabī* may comprise an entire book, in prose or verse (see Hemedi bin Abdallah bin Saidi el Buhriy, *Utenzi wa kutawafu nabii*, tr. R. Allen, ed. J. W. T. Allen, Kampala 1956; similar examples can be quoted in Malaysia and Indonesia). Of these *mawlid* texts proper, by far the most popular in Kenya, Tanzania and Somalia (as also in Malaysia and Indonesia) is al-Barzandjī's one (see section 1. above), contained in a book—first printed *ca.* 1885 and noted as a red-bound book by Snouck Hurgronje in Atjèh [*q.v.*] and by Becker in Dar es Salaam—called the *Madjmaʿ mawlid sharaf al-anām*, the best-known single prayer book in the Islamic world. It comprises prose and poetic versions (*nathr* and *naẓm*) of al-Barzandjī's *mawlid* (both also translated into Swahili), the *Burda* of al-Būṣīrī and several other prayers. In Somalia, al-Barzandjī's *mawlid* composition is widely recited during the *mawlid* celebrations in Arabic form, although a Somali poetic version exists. In *The library of Muḥammad b. ʿAlī b. ʿAbd al-Shakūr, Sulṭān of Harar, 1272-92/1856-75*, in *Arabian and Islamic studies ... presented to R. B. Serjeant*, ed. R. L. Bidwell and G. R. Smith, London 1983, 68-79, A. J. Drewes has mentioned three *mawlids*, including apparently Abu 'l-Ḥasan Nūr al-Dīn's *ʿUnwān al-sharīf*. After al-Barzandjī's, the most popular *mawlid* in Kenya and Somalia is the *Mawlid al-sharīf* of Shaykh ʿAbd al-Raḥmān b. ʿAlī al-Dībaʿī al-Zabīdī; the printed editions of this, from Cairo and Aden-Singapore respectively, contain at the end a *fatwā* by the *muftī* of Mecca permitting the use of drums at the *mawlid* festival. But the *mawlid* is often performed at other times too, e.g. 14 days after the birth of a child in Tanzania (see C. Velten, *Sitten und Gebräuche der Suaheli*, Göttingen 1903, ch. 2).

(J. KNAPPERT)

MAWLIDIYYA (A.) (or *mīlādiyya*; dial. *mūlūdiyya*), pl. *-āt*, a poem composed in honour of the Prophet on the occasion of the anniversary of his birth [see MAWLID] and recited as a rule before the sovereign

and court after ceremonies marking the *laylat al-mawlid.*

A relatively large number of *mawlidiyyāt* are extant, drawing their inspiration from the famous *Bānat Suʿād* of Kaʿb b. Zuhayr [*q.v.*] so often imitated by versifiers, of whom the best known is certainly al-Būṣīrī (608-94/1212-97) [*q.v.* in Suppl.], whose poems enjoy a renown which has never diminished, especially the *Burda* [*q.v.*] and, to a lesser extent, the *Hamziyya*, which is recited in mosques and *zāwiyas* during the month of Rabīʿ I, between the *maghrib* and *ʿishāʾ* prayers. Among the mediaeval authors who have left poems classifiable within the category of *mawlidiyyāt* may be cited al-Barʿī (5th/11th century), al-Ṣarṣarī (d. 556/1160), Ibn al-Djawzī (510-97/1116-1200 [*q.v.*]), Ibn Ḥadjar al-Haytamī (909-74/1504-67 [*q.v.*]) and al-Barzandjī (1040-1103/1530-91). Furthermore, it is possible to gain an overall idea of this production thanks to the four-volume collection made at the beginning of the century by Yūsuf b. Ismāʿīl al-Nabhānī and published in Beirut in 1320/1902.

In the Islamic West, *mawlidiyyāt* were mainly the work of court poets, but also of administrative officials and viziers for whom the composition of poems of this type constituted a part of their professional education; some well-known personalities figure among them, such as Ibn Marzūḳ (710-81/1310-79 [*q.v.*]), Ibn al-Khaṭīb (713-76/1313-75 [*q.v.*]), and above all, Ibn Zamrak (733-95/1333-93 [*q.v.*]). Due to the occasional nature of this poetry, it is understandable that a large number of poems have not been preserved; the majority of those that survive, thanks, in particular, to al-Maḳḳarī (d. 1041/1632 [*q.v.*]) and to al-Ifrānī (d. 1157/1745 [*q.v.*]), belong to a relatively short period from 761 to 768/1360-7, corresponding to the reigns of the Marīnid Abū Sālim Ibrāhīm (d. 762/1361) in Fās and of the Naṣrid Muḥammad V (d. 793/1391) in Granada; to be sure, al-Fishtālī (956-1031/1549-1633), himself the author of at least one *mawlidiyya*, reproduced in his *Nuzha* (ed. and Fr. tr. Houdas, 149-57), these poems being composed in the reign of Aḥmad al-Manṣūr in 999/1590.

Generally, the framework of the *ḳaṣīda* is respected, but adapted to suit the fundamental purpose of the poet in the sense that, while the apology of the Prophet is preceded by a *nasīb* and a *raḥīl*, it is followed in the West by a eulogy of the sovereign which is explicable by the circumstances in which these poems were recited.

The *nasīb* contains the traditional recollection of the remains of an encampment, but the author must avoid any allusion to a woman and show the decency appropriate to the situation. He expresses on the contrary the violent passion which he feels for the Prophet, leaving some doubt as to this love, whose true mystical nature is not at all clear. The abandoned encampment is situated on the route that the poet must follow to visit the Holy Places, but, as he is very far distant from them, he calls upon a caravan guide or some pilgrims in order to ask them to bear his greetings to the Prophet and describe to him the ardour of his passion.

This sentimental and moving prologue is followed by a brief lyrical expansion on the theme, or, more frequently, a narrative full of details borrowed from the traditional *raḥīl*, of an imaginary journey across deserts as far as Medina. It goes without saying that this general theme undergoes numerous variants ranging from an account of the pilgrimage to Mecca to the insertion of paranetic verses or commonplaces on the flight of time, white hair, etc. The Spanish *mawlidiyyāt* are always distinguished by a large number of descriptions.

The recollection of the Holy Places introduces the eulogy of the Prophet, which must theoretically be based on reality and never drift into hyperbole. The principal themes concern the birth, foretold by earlier prophets, the signs of prophecy visible from infancy, his mission, etc.; next, the epithets of Muḥammad are enumerated; then come his physical and moral portraits; and finally, the description of the miracles that he performed. In this central part of the *mawlidiyya*, the elements of the panegyric, expressed by means of a profusion of superlatives, are drawn from the Ḳurʾān and *ḥadīth* as well as popular beliefs which have embellished the life of the Prophet with legendary details. It may be remarked further that the poets, idealising his image, adopt some characteristics taken from the Gospels so as to invest the founder of Islam with an aura of sanctity which makes him vie with Jesus.

After the account of the miracles, the versifiers generally express a wish to be able to visit the Holy Places, offer supplications to their "saviour" and invoke God's blessing on him and his Companions.

This invocation, followed by a similar invocation on behalf of the sovereign and mention of the *laylat al-mawlid*, marks the transition to the third part of the *mawlidiyya* which is often as developed as the second and consists of the panegyric of the reigning prince. This part offers nothing really new corresponding to the classical *madīḥ* [*q.v.*]. The author attributes all the virtues to the *mamdūḥ*, who is the restorer of the kingdom and whose arms are always victorious; but his cardinal virtue is naturally generosity, which is appealed to more or less discreetly. After the sovereign come the turns of the heir presumptive and the royal family. To conclude, the poet wishes that the prince's prosperity may endure.

One can hardly expect to find much originality in these compositions crammed with rhetorical flourishes and adorned with clichés which savour of affectation and artificiality. However, the choice of images, the variety of stylistic devices, the subtle play on vocabulary and the constant appeal to the religious or literary culture of the listener, retain a certain attraction.

As well as some poems in classical Arabic, there are many *mūlūdiyyāt* in dialect which generally contain only the eulogy of the Prophet; among those which have been preserved—or those which are still composed today—some follow the classical tradition and contain moreover the *nasīb* and the *raḥīl*, but the eulogy of the sovereign does not figure at all in them [see MALḤŪN].

(A. SALMI)

MAWRŪR, name given to the *kūra* of Morón, currently Morón de la Frontera, in the province of Seville, to the south-east of the latter and of Carmona and to the south-west of Cordova. The Arabo-Islamic conquest of the territory occupied today by Morón and its dependencies must have taken place in 92/714 shortly after that of Shadūna [*q.v.*] by Ṭāriḳ b. Ziyād [*q.v.*].

Mawrūr is also the name of a *ḥiṣn* of the province of Málaga (see J. Valvé, *De nuevo sobre Bobastro*, in *al-And.*, xxx [1965], 142, no. 11) and of one (known by the name of el-Mauror) of the hills at the foot of which Granada is situated [see GHARNĀṬA].

The population of the *kūra* was constituted of Butr Berbers, or Arabs of the tribe of Djudhām, of neo-Muslims and, to a lesser degree, of Mozarabs, The region combined all the advantages of plain and

mountain. Cereals, olives and fruit-trees were cultivated there, according to al-Rāzī and other writers, who add that the area possessed good wells and substantial fortresses, in particular that of Carpio, which is not easily located today but which some have identified with the Ḳalb which, according to Ibn G̲h̲ālib, al-Ḥimyarī and perhaps other writers, was the regional capital (*ḳāʿida*) of the *kūra* and the seat of the *wālī* and which possessed a Great Mosque and a very busy market.

Under the amīrate, Mawrūr seems to have been nothing more than an agricultural region of which the neighbouring territories were subjected to a raid on the part of the Mad̲j̲ūs [*q.v.*], if reliance is to be placed on the *Ak̲h̲bār mad̲j̲mūʿa* (text, 64; tr. 51). Mawrūr is also mentioned in connection with events occurring at Seville in the period of Ibrahīm b. al-Ḥad̲j̲d̲j̲ād̲j̲ (al-ʿUd̲h̲rī, 103), and with an invasion mounted by Muṭarrif, son of the *amīr* ʿAbd Allāh (*ibid.*, 104). In the time of the *amīr* al-Ḥakam [*q.v.*], the total sum of taxation contributed by the *kūra* of Mawrūr rose to 21,000 *dīnārs* (al-Ḥimyarī, *Rawḍ*, text, 186, tr. 227) and the number of horsemen that it supplied for the summer campaigns against the Christians commanded by ʿAbd al-Raḥmān b. Muḥammad, stood at 1403 (Ibn Ḥayyān, *Muḳtabis*, ed. Makkī, text 272). The fortress of Mawrūr was also affected by the consequences of the rebellion of ʿUmar b. Ḥafṣūn [*q.v.*], to such an extent that it became necessary to send several expeditions against these territories, which were ultimately subjected to the authority of Cordova in 311/923-4 (Ibn Ḥayyān, *op.cit.*, text 115, 167; tr. 139, 192). During the *fitna*, Mawrūr became the seat of the Berber *ṭāʾifa* of the Banū Dammar or Banū Nūḥ, until the time when, under the third king of the dynasty, Manād b. Muḥammad b. Nūḥ (449-58/1057-66), it was incorporated into the ʿAbbādid kingdom of Seville [see ʿABBĀDIDS and IS̲H̲BĪLIYYA] and experienced the same fate as the latter when it was conquered by the Almoravids.

Judging by the silence of the sources, it may be stated with confidence that no event of note took place at Mawrūr and on its territory under the Almoravids and the Almohads. Cordova fell in 1236, and in 1240 in the reign of Fernando III, king of Castile, the *kūra* passed under the domination of the Christians, at the same time as Luque, Aguilar, Ecija, Estepa, Lucena, Marchena and Osuna, and became part of the territory known as Banda Morisca, to the south of the Campiña and to the west of the Nasrid kingdom of Granada. For a period of 529 years, Mawrūr had belonged to the *dār al-Islām*.

AL-**MAWṢIL,** in European sources usually rendered as Mosul, a city of northern Mesopotamia or ʿIrāḳ, on the west bank of the Tigris and opposite to the ancient Nineveh. In early Islamic times it was the capital of Diyār Rabīʿa [*q.v.*], forming the eastern part of the province of al-D̲j̲azīra [*q.v.*]. At the present time, it is the third largest city of the Republic of ʿIrāḳ.

1. History up to 1900.

Al-Mawṣil takes its name from the fact that a number of arms of the river there combine (Arabic, *waṣala*) to form a single stream. The town lies close beside the Tigris on a spur of the western steppe-plateau which juts out into the alluvial plain of the river. Close beside its walls are quarries in which the plaster for the buildings and for the mortar is obtained. The site of the town, almost 3 km² in area and enclosed by the already-mentioned wall and the Tigris, slopes from the old fortress gradually to the south. To the south-east there stretch, as in the Middle Ages, the suburbs surrounded by fertile plants. A little above the spot where the wall joins the river on the south-east is the bridge of boats. All the old buildings and even the court of the Great Mosque lie, according to E. Herzfeld's investigations, below the level of the streets in which the accumulation of mounds of débris from houses is a result of a thousand years of continuous occupation.

Whether the town already existed in antiquity is unknown. E. Herzfeld (*Archäol. Reise*, ii, 207, 259) has suggested that Xenophon's Μέσπιλα, reproduces its old name and that we should read *Μέπσιλα (= *Mawṣil*); but against this view we have the simple fact that this town lay on the east bank of the Tigris (F. H. Weissbach, in Pauly-Wissowa, xv, col. 1164).

The Muslims placed the foundations of the town in mythical antiquity and ascribed it to Rēwand b. Bēwarāsp Ad̲j̲dahāk. According to another tradition, its earlier name was K̲h̲awlān. The Persian satrap of al-Mawṣil bore the title Būd̲h̲-Ardas̲h̲īrāns̲h̲āh, so that the official name of the town was Būd̲h̲-Ardas̲h̲īr (Le Strange, *Lands*, 87; Herzfeld, *op.cit.*, 208). Lastly, Bar Bahlūl says that an old Persian king gave it the name Bih-Hormiz-Ḳawād̲h̲ (G. Hoffmann, *Auszüge aus syr. Akten pers. Märtyren*, 178).

As the metropolis of the diocese of Āt̲h̲ūr, al-Mawṣil took the place of Nineveh, whither Christianity had penetrated by the beginning of the 2nd century A.D. Rabban Īs̲h̲ōʿ-yahb̲h̲, called Bar Ḳūsrā, about 570 A.D. founded on the west bank of the Tigris opposite Niniveh a monastery (still called Mār Īs̲h̲aʿyā) around which K̲h̲usraw II built many buildings. This settlement is probably the fortress mentioned in the Syriac chronicle edited by Guidi as Ḥesnā ʿEb̲h̲rāyā (according to Herzfeld, "citadel on the opposite bank") (Nöldeke, in *SB. Ak. Wien*, cxxviii, fasc. 9 [1893], 20; Sachau, *Chronik von Arbela*, ch. iv, 48,1; Herzfeld, *op.cit.*, 208) which later was developed into a town by the Arabs (*Chronicle of Seʿert*, at the end).

Nineveh is attested as a separate Nestorian bishopric from 554 till the early 3rd/9th century, when it was merged with the see of al-Mawṣil, and for roughly the same period, Monophysite bishops are recorded for the monastery of Mar Mattā and Nineveh (later al-Mawṣil) (see J.-M. Fiey, *Assyrie chrétienne*, Beirut 1968, ii, 344 ff.). The area just to the north of al-Mawṣil was known at this time as Bēt̲h̲ Nūhād̲h̲rā, and that to the south-west as Adiabene, in early Islamic parlance, Arḍ Ḥazza (from the village, Syriac Ḥʿzā, which seems to have been the main centre, towards the end of the Sāsānid period, for the administrative division of Nōd̲h̲-Ardas̲h̲īrakan (see M. G. Morony, *Continuity and change in the administrative geography of late Sasanian and early Islamic al-ʿIrāq*, in *Iran*, *JBIPS*, xx [1982], 10 ff.).

After the taking of Nineveh by ʿUtba b. Farḳad (20/641) in the reign of ʿUmar b. al-K̲h̲aṭṭāb, the Arabs crossed the Tigris, whereupon the garrison of the fortress on the west bank surrendered on promising to pay the poll-tax and obtained permission to go where they pleased. Under the same caliph, ʿUtba was dismissed from his post as commander of al-Mawṣil, and Hart̲h̲ama b. ʿArfad̲j̲a al-Bāriḳī succeeded him. The latter settled Arabs in houses of their own, then allotted them lands and made al-Mawṣil a

camp city (*miṣr*) in which he also built a Friday Mosque (al-Balādhurī, 332). According to al-Wāḳidī, ʿAbd al-Malik (65-86/685-705) appointed his son Saʿīd as governor of al-Mawṣil, while he put his brother Muḥammad over Armīniya and al-Djazīra. According to al-Muʿāfā b. Ṭāwūs on the other hand, Muḥammad was also governor of ʿĀdharbāydjān and al-Mawṣil, and his chief of police Ibn Talīd paved the town and built a wall round it (al-Balādhurī, *op.cit.*). His son Marwān II is also described as a builder and extender of the town; he is said to have organised its administration and built roads, walls and a bridge of boats over the Tigris (Ibn Faḳīh, 128; Yāḳūt, *Muʿdjam*, iv, 682-4). The foundation of a Friday Mosque was also ascribed to him. Al-Mawṣil became under him the capital of the province of al-Djazīra.

After al-Mutawakkil's death, the Khāridjī Musāwir seized a part of the territory of al-Mawṣil and made al-Ḥadītha [*q.v.*] his headquarters. The then governor of al-Mawṣil, the Khuzāʿī ʿAḳaba b. Muḥammad, was deposed by the Taghlibī Ayyūb b. Aḥmad, who put his own son Ḥasan in his place. Soon afterwards, in 254/868, the ʿAzdī Allāh b. Sulaymān became the governor of al-Mawṣil. The Kharidjīs took the town from him and Musāwir entered into possession of it. Al-Muʿtamid appointed the Turkish general Asātigin governor of the town, but in Djumādā I 259/March 873 the latter sent his son Azkūtigīn there as his deputy. The latter was soon driven out by the citizens of the town, who chose Yaḥyā b. Sulaymān as their ruler.

Haytham b. ʿAbd Allāh, whom Asātigīn then sent to al-Mawṣil, had to return after achieving nothing. The Taghlibī Isḥāḳ b. Ayyūb, whom Asātigīn sent with 20,000 men against the city, among whom was Ḥamdān b. Ḥamdūn, entered it after winning a battle, but was soon driven out again.

In 261/874-5 the Taghlibī Khiḍr b. Aḥmad and in 267/880-1 Isḥāḳ b. Kundādj were appointed governors of al-Mawṣil by al-Muʿtamid. A year after Isḥāḳ's death, his son Muḥammad sent Hārūn b. Sulaymān to al-Mawṣil (279/892); when he was driven out by the inhabitants, he asked the Banū Shaybān for assistance, and they besieged the town with him. The inhabitants, led by Hārūn b. ʿAbd Allāh and Ḥamdān b. Ḥamdūn, after an initial victory were surprised and defeated by the Shaybānīs; shortly afterward, Muḥammad b. Isḥāḳ was deposed by the Kurd ʿAlī b. Dāwūd.

When al-Muʿtaḍid became caliph in 279/892, Ḥamdān (the grandfather of Sayf al-Dawla) managed to make himself very popular with him at first, but in 282/895 he rebelled in al-Mawṣil. When an army was sent by the caliph against him under Waṣīf and Naṣr, he escaped while his son Ḥusayn surrendered. The citadel was stormed and destroyed, and Ḥamdān soon afterwards was captured and thrown into prison. Naṣr was then ordered to collect tribute in the city and thus came into conflict with the followers of the Khāridjī Hārūn; Hārūn was defeated and fled into the desert. In place of Tuktamīr, who was imprisoned, the caliph appointed Ḥasan b. ʿAlī as governor of al-Mawṣil and sent against Hārūn, the main cause of the strife, the Ḥamdānid Ḥusayn, who took him prisoner in 283/896. The family thus regained the caliph's favour.

When after the subjection of the Khāridjīs, raiding Kurds began to disturb the country round al-Mawṣil, al-Muktafī again gave a Ḥamdānid, namely Ḥusayn's brother Abu 'l-Haydjāʾ ʿAbd Allāh, the task of bringing them to book, as the latter could rely on the assistance of the Taghlibīs settled around the city to whom the Ḥamdānids belonged. Abu 'l-Haydjāʾ came to al-Mawṣil in the beginning of Muḥarram 293/October 906 and in the following year subdued the Kurds, whose leader Muḥammad b. Bilāl submitted and came to live in the city.

From this time, the Ḥamdānids [*q.v.*] ruled there, first as governors for the caliph, then from 317/929 (Nāṣir al-Dawla Ḥasan) as sovereign rulers.

The ʿUḳaylids who followed them (386-498/996-1096) belonged to the tribe of the Banū Kaʿb. Their kingdom, founded by Ḥusām al-Dawla al-Muḳallad, whose independence was recognised by the Būyids, extended as far as Tāʾūḳ (Daḳūḳā), al-Madāʾin and Kūfa. In 489/1095-6, al-Mawṣil passed to the Saldjūḳs.

The town developed considerably under the Atābeg ʿImād al-Dīn Zangī, who put an end to Saldjūḳ rule in 521/1127-8. The city which was for the most part in ruins, was given splendid buildings by him; the fortifications were restored and flourishing gardens surrounded the town. Under one of his successors, ʿIzz al-Dīn Masʿūd I, it was twice unsuccessfully besieged by the Ayyūbid Ṣalāḥ al-Dīn (1182 and 1185 A.D.); after the conclusion of peace, ʿIzz al-Dīn, however, found himself forced to recognise Ṣalāḥ al-Dīn as his suzerain.

The town was at this time defended by a strong citadel and a double wall, the towers of which were washed on the east side by the Tigris. To the south lay a great suburb, laid out by the vizier Mudjāhid al-Dīn Ḳāʾimāz (d. 595/1199). From 607/1210-11 his son Badr al-Dīn Luʾluʾ [*q.v.*] ruled over al-Mawṣil first as vizier of the last Zangids and from 631/1234 as an independent ruler. In 642/1244-5 he submitted to Hūlāgū and accompanied him on his campaigns, so that al-Mawṣil was spared the usual sacking. When however his son al-Malik al-Ṣāliḥ Ismāʿīl joined Baybars against the Mongols, the town was plundered in 660/1261-2; the ruler himself fell in battle (van Berchem, in *Festschrift für Th. Nöldeke*, Giessen 1906, 197 ff.).

The Arab geographers compare its plan to a headcloth (*taylasān*), i.e. to an elongated rectangle. Ibn Ḥawḳal, who visited al-Mawṣil in 358/968-9, describes it as a beautiful town with fertile surroundings. The population in his time consisted mainly of Kurds. According to al-Muḳaddasī (*ca.* 375/985-6, the town was very beautifully built. Its plan was in the form of a semi-circle. The citadel was called *al-Murabbaʿa* and stood where the Nahr Zubayda canal joined the Tigris (now Ič-ḳalʿa or Bāsh Ṭābiya?; cf. Herzfeld, *op.cit.*, 209). Within its walls were a Wednesday market (*Sūḳ al-Arbaʿāʾ*), after which it was sometimes called. The Friday Mosque built by Marwān stood on an eminence not far from the Tigris to which steps led up. The streets in the market were for the most part roofed over. The same geographer (136) gives the eight main streets of the town (discussed in Herzfeld, *op.cit.*, 209). The castle of the caliph (*Ḳaṣr al-Khalīfa*) stood on the east bank, half a mile from the town, and commanded Nineveh; in the time of al-Muḳaddasī it was already in ruins, through which the Nahr al-Khawṣar flowed.

Ibn Djubayr visited al-Mawṣil on 22-6 Ṣafar 580/4-8 June 1184. Shortly before, Nūr al-Dīn had built a new Friday Mosque on the market place. At the highest point in the town was the citadel (now Bāsh Ṭābiya); it was known as *al-Ḥadbāʾ* "the hunch-backed", and perhaps as the synonymous *al-Dafaʾā* (G. Hoffmann, *Auszüge aus syr. Akten pers. Märtyren*, 178-9; Herzfeld, *op.cit.*, 210), and according to al-Ḳazwīnī was surrounded by a deep ditch and high

walls. The city walls, which had strong towers, ran down to the river and along its bank. A broad highway (*s͟hāriʿ*) connected the upper and lower towns (the north-south road called *Darb Dayr al-Aʿlā*). In front of the walls suburbs stretched into the distance with many smaller mosques, inns and baths. The hospital (*māristān*) and the great covered market (*ḳaysariyya*) were celebrated.

Most houses in al-Mawṣil were built of tufa or marble (from the D̲j̲abal Maḳlūb east of the town) and had domed roofs (Yāḳūt, *op.cit.*). Later, it was given a third Friday Mosque which commanded the Tigris and was perhaps the building admired by Ḥamd Allāh al-Mustawfī (*ca.* 740/1339-40).

The site of the ancient Nineveh (Arabic *Nīnaway*) was in al-Muḳadasī's time called Tall al-Tawba and was said to be the place where the prophet Yūnus stayed when he wished to convert the people of Nineveh. There was a mosque there around which the Ḥamdānid Nāṣir al-Dawla built hostels for pilgrims. Half a mile away was the healing spring of ʿAyn Yūnus with a mosque beside it, perhaps also the S̲h̲ad̲j̲arat al-Yaḳṭīn, said to have been planted by the Prophet himself. The tomb of Nabī D̲j̲irdjīs [*q.v.*], who according to Muslim legend had suffered martyrdom in al-Mawṣil, was in the east town, as was also that of Nabī S̲h̲īt̲h̲ (Seth; cf. Herzfeld, *op.cit.*, 206-7).

The textiles of al-Mawṣil were especially famed, and from the city's name came Eng. *muslin* and Fr. *mousseline*, although it appears from Marco Polo's mention of *mosolino* cloth as made with gold and silver threads that these luxury cloths differed from the present-day thin and delicate cottons (see Sir Henry Yule, *The book of Ser Marco Polo the Venetian*, London 1871, i, 57-9; R. B. Serjeant, *Islamic textiles, material for a history up to the Mongol conquest*, Beirut 1972, 38-9).

The Mongol dynasty of the D̲j̲alāʾirids succeeded the Īlk̲h̲āns in Bag̲h̲dād, and Sultan S̲h̲ayk̲h̲ Uways in 766/1364-5 incorporated al-Mawṣil in his kingdom. The world-conqueror Tīmūr not only spared the city but gave rich endowments to the tombs of Nabī Yūnus and Nabī D̲j̲irdjīs, to which he made a pilgrimage, and restored the bridge of boats between al-Mawṣil and these holy places.

The Turkoman dynasty of the Aḳ Ḳoyūnlū, whose founder Bahāʾ al-Dīn Ḳarā ʿUt̲h̲mān had been appointed governor of Diyārbakr by Tīmūr, was followed by the Ṣafawids, who took over al-Mawṣil after their conquest of Bag̲h̲dād in 914/late 1508, but lost it again to Sulaymān the Magnificent in 941/1535, who appointed Sayyid Aḥmad of D̲j̲azīrat Ibn ʿUmar as its governor. From the year 1000/1592 onwards, we have lists of the Ottoman *pas̲h̲as* of the *sand̲j̲aḳ* of al-Mawṣil (for long attached to the *eyālet* of Diyārbakr), whose tenure of power was usually short-lived; thus from 1048/1638 to 1111/1699-1700 there were 48 *pas̲h̲as*. Nādir S̲h̲āh besieged it in 1156/1743, but the governor Ḥusayn D̲j̲alīlī refortified the city and heroically defended it. It was at this time and thereafter that the *pas̲h̲alïḳ* of al-Mawṣil was fairly continuously in the hands of the local family, originally Christians, of ʿAbd al-D̲j̲alīl; Ḥusayn b. Ismāʿīl held this office on eight separate occasions, and the hold of the D̲j̲alīlīs was only broken in 1834, when Sultan Maḥmūd II extended his centralising power over the *derebeys* and other previously largely autonomous local potentates and removed Yaḥyā b. Nuʿmān al-D̲j̲alīlī.

European travellers frequently passed through al-Mawṣil and mention it in their travel narratives; they often comment unfavourably on the unclean streets and on the sectarian strife there amongst both Muslims and the rival Christian churches. After 1879, the *sand̲j̲aḳ* of al-Mawṣil, after being attached to Vān, Hakkārī and then Bag̲h̲dād, became a separate *wilāyet*. There was a long tradition of French missionary and educational work in the city, by e.g. Carmelites and Dominicans, largely among the indigenous Eastern Christian churches. In the later 19th century, travellers describe al-Mawṣil's mud brick walls, with their seven gates, as largely ruinous, and record the dominant form of domestic architecture as stone-built houses with *sardābs*; the population then was around 40,000, including 7,000 Christians and 1,500 Jews.

(E. Honigmann -[C. E. Bosworth])

2. Since 1900.

By the beginning of the 20th century, the prosperity and political importance of al-Mawṣil were evidently waning, largely because the opening of the Suez Canal in 1869 had occasioned an immediate reduction in the overland trade between the city and its traditional commercial partners, Aleppo and Damascus. Furthermore, the development of the port of Baṣra and of steam navigation on the Tigris gradually had the effect of subordinating the economy of al-Mawṣil to that of Bag̲h̲dād, which became the entrepot for all the former city's imports and exports.

The effects of the *Tanẓīmāt* were even more lightly felt in the province of al-Mawṣil than in the rest of ʿIrāḳ, and there is no sign that the various administrative changes had any particular effect in curbing the powers of the local notables and tribal leaders. As noted above, in 1879 the city itself became the headquarters of a *wilāyet* of the same name, comprising the *ḳaḍāʾ*s of al-Mawṣil, Kirkūk, Arbīl and Sulaymāniyya, but for the rest of the period of Ottoman rule, the state's control over most of what is now ʿIrāḳī Kurdistān was purely nominal, and between 1895 and 1911, one man, Muṣṭafā Čalabi Ṣābūnd̲j̲ī, was virtual dictator of al-Mawṣil town, far more powerful than any of the numerous *wālīs* sent from Istanbul (see Hanna Batatu, *The old social classes and the revolutionary movements of Iraq: a study of Iraq's old landed and commercial classes, and of its Communists, Ba'thists and Free Officers*, Princeton 1978, 289-92). Using Ottoman sources, J. McCarthy (*The population of Ottoman Syria and Iraq, 1878-1914*, in *AAS*, xv [1981], 3-44) has calculated that the population of al-Mawṣil *wilāyet* in 1330/1911-12 was about 828,000, which is considerably higher than earlier estimates (e.g., see S. H. Longrigg, *Iraq 1900 to 1950*, London

1953, 7). It is even more difficult to establish an accurate figure for al-Mawṣil town alone; McCarthy (*op.cit.*, 41) suggests 36,500 adult males, which accords with the estimated total of 70,000 inhabitants given in *al-ʿIrāq Yearbook* for 1922 (Batatu, *op.cit.*, 35).

For most of the First World War, the fighting on the ʿIrāḳī front took place in the Baṣra and Bag͟hdād *wilāyets*, with the result that al-Mawṣil town itself was relatively little affected, and was in fact only occupied by British troops some days after the Armistice of Mudros (30 October 1918; see A. T. Wilson, *Mesopotamia 1917-1920: a clash of loyalties*, London 1931, 11). The area had been assigned to France in the Sykes-Picot Agreement of 1916, but Clemenceau immediately acquiesced in Lloyd George's request in December 1918 that it should be attached to ʿIrāḳ, and thus to the British sphere of influence, provided that France would be assured of equality in the exploitation of Mesopotamian oil (see J. Nevakivi, *Britain, France and the Arab Middle East 1914-1920*, London 1969, 91-2). Although the mandate for ʿIrāḳ was assigned to Britain under the Treaty of San Remo (April 1920 [see MANDATES]), the Turkish Republican government continued to contest the new ʿIrāḳī state's right to al-Mawṣil and the *wilāyet* was only finally awarded to ʿIrāḳ in 1925 after an enquiry carried out by the League of Nations (for details, see C. J. Edmonds, *Kurds, Turks and Arabs: politics, travel and research in North-eastern Iraq 1919-1925*, London 1957). Oil was struck in commercial quantities near Kirkūk in 1927, and these northern oilfields, exploited until nationalisation in 1973 by the Iraq Petroleum Company, an Anglo-French-Dutch-American consortium, form one of the country's most valuable economic assets.

Under the mandate and monarchy (1920-32; 1932-58) the status of al-Mawṣil continued to decline, partly because the inauguration of the new state and the establishment of Bag͟hdād as its capital inevitably deprived it of its importance as an independent provincial centre, and partly because al-Mawṣil *wilāyet* itself was further sub-divided into four provinces (al-Mawṣil, Sulaymāniyya, Kirkūk and Arbīl). The city maintained its somewhat conservative reputation throughout the period, and in comparison with Bag͟hdād and Baṣra seems to have been relatively little affected by the independence struggles of the 1940s and 1950s. During this period, members of the city's prominent families, notably the S͟hammar *s͟hayk͟hs* and members of the Kas͟hmūla, K͟hudayr and S͟hallāl families, gradually came to acquire legal ownership of much of the land in the surrounding countryside. Such individuals naturally felt threatened by the avowedly revolutionary aims of the government of ʿAbd al-Karīm Ḳāsim [*q.v.*], which came to power on 14 July 1958, and in particular by its immediate introduction of an agrarian reform law.

In March 1959, some of the landowners and their followers joined together with local Arab nationalists and a number of Ḳāsim's former supporters in the armed forces in an attempt to overthrow his régime, with assistance promised (but not ultimately forthcoming) from Cairo and Damascus. Four days of fighting broke out in the city between the supporters and opponents of Ḳāsim, in which some 200 people were killed. The attempted coup was unsuccessful, but the incident was to be used many times in the future as a rallying cry for revenge on the part of Baʿthists and nationalists against Ḳāsim and his left-wing supporters (see Batatu, *op.cit.*, 58-61, 866-89).

Al-Mawṣil was finally connected with the rest of the ʿIrāḳī railway system in 1939, and served by Iraqi Airways after 1946; the existing tertiary colleges in the city were amalgamated into a university in 1967, which has since been expanded considerably. In the course of a provincial reorganisation in 1969, al-Mawṣil province was divided into two new units, Nineveh (Nīnawā) and Duhūk. In the 1977 census, al-Mawṣil emerged as the third largest city in ʿIrāḳ with a population of 430,000, preceded by Baṣra (450,000) and Bag͟hdād (2.86 million). In spite of attempts on the part of the central government to promote regional economic development, al-Mawṣil is inevitably at a disadvantage through being some distance from the country's main industrial concentrations, 75% of which are located around Bag͟hdād and Baṣra. Its principal industries are agriculturally-based, including food-processing, and leather working, but textiles and cement are also produced, and an oil refinery was opened in 1976. The city retains much of its traditional ethnic and religious heterogeneity, and its mediaeval core still remains clearly distinct, despite the intrusion of various unattractive manifestations of modern town planning.

AL-**MAWṢILĪ** [see IBRĀHĪM and ISḤĀḲ B. IBRĀHĪM AL-MAWṢILĪ].

AL-**MAWṢILĪ**, BAKR B. AL-ḲĀSIM B. ABĪ T͟HAWR, philosophical writer, is known only as the author of an epistolary philosophical work entitled *Fi 'l-nafs* ("Concerning the soul"). It was written between 278/900 and 328/950 and sent to the distinguished translator and doctor Abū ʿUt͟hmān Saʿīd b. Yaʿḳūb al-Dimas͟hḳī. The author seems to have lived in the Mawṣil region, and is not to be confused with another philosopher from that area, Ibn Abī Saʿīd al-Mawṣilī. The text deals not with the soul as such, but only with a part of it, the rational soul (*nafs nāṭiḳa*) or intellect (*ʿaḳl*). His technique is explicitly that of T͟hābit b. Ḳurra and Plato in analysing the characteristics of the definition of the intellect in order to draw out its essence. The intellect impresses a form upon our sense-data, and what we know can either be acquired (*mustafād*) from outside of ourselves or not. As Aristotle put it, it is a question of whether the intellect which forms all things is part of the soul or rather something outside the soul—the latter being the normal Islamic religious interpretation. Al-Mawṣilī argues that the intellect does not acquire knowledge by means of contact with a transcendent being, but rather by reflection of the intellect upon itself. We can indeed make mistakes (e.g. be misled

by imagination), but not if we reflect rationally upon the first principles (*al-awāʾil*) of logical thought, since they are the grounds upon which the truth or falsity of everything else depends. These universals (*al-umūr al-kulliyya*) are true, real in themselves and their own objects, and are not equivalent to the body, but constitute a substance not susceptible to decay. Thereby al-Mawṣilī elegantly tackles an Aristotelian problem (without mentioning Aristotle) in a Platonic manner, actually referring to the *Phaedo* and its doctrine of reminiscence as the route to genuine knowledge.

(O. N. H. Leaman)

MAWSIM (A., from the root *w-s-m* "to mark, imprint"), market, festival. In this sense the term is used in *ḥadīth*, especially in connection with the markets of early Arabia, such as those which were held in ʿUkāẓ, Madjanna, Dhu 'l-Madjāz, ʿArafa, etc. (al-Bukhārī, *Ḥadjdj*, *bāb* 150; *Tafsīr*, sūra II, *bāb* 34). At these markets, the worst elements of Arabia gathered (*al-mawsim yadjmaʿ raʿāʿ al-nās*, al-Bukhārī, *Ḥudūd*, *bāb* 31). Advantage was also taken of these assemblies to make public proclamations and inquiries, e.g. in order to regulate the affairs of deceased persons (al-Bukhārī, *Khums*, *bāb* 13; *Manāḳib al-Anṣār*, *bāb* 27). As the pilgrimage was at the same time one of the chief markets of early Arabia, the term *mawāsim* is often combined with it (*mawāsim al-ḥadjdj*, al-Bukhārī, *Ḥadjdj*, *bāb* 150; *Buyūʿ*, *bāb* 1; Abū Dāwūd, *Manāsik*, *bāb* 6). Upon this basis, the term *mawsim* has developed chiefly in two directions.

First, it has acquired the meaning of a festival, generally with a religious basis. When such a festival signifies the birthday of a prophet or local saint, the term more generally used is *mawlid* (dialectically, *mūlid*, etc.) [*q.v.*], but often some other event in a holy man's life, or even his death, may be celebrated, often at a date which shows continuity with some ancient nature festival or other rite. Cf. the *mawsim* of Nabī Mūsā, held between the centres of Jerusalem and the shrine near Jericho from the Friday preceding Good Friday till Maundy Thursday; see G. E. Von Grunebaum, *Muhammadan festivals*, repr. London 1976, 80 ff. A *mawsim* might, however, be a secular occasion, at least in its developed form, such as the festival traditionally held in Cairo during August to celebrate the rising of the Nile waters, the *mawsim al-khalīdj* or *yawm wafāʾ al-Nīl*/*yawm djabr al-baḥr*; see Lane, *The Manners and customs of the modern Egyptians*, ch. xxvi "Periodical public festivals".

Second, it has come to mean season. Thus in Lebanon, *mawsim* denotes the season of the preparation of silk (al-Bustānī, *Muḥīṭ*, s.v.), whilst in India and in European terminology referring to these parts of the world, it has acquired the meaning of "season" in connection with the weatherconditions special to those regions, such as the regularly returning winds and rain periods. *Monsoon*, *mousson*, *moesson* and other corruptions of the term are found in this literature.

Bibliography: In addition to the works mentioned in the art. cf. *LA*, xvi, 123 ff.; Wellhausen, *Reste arabischen Heidentums*,[2] Berlin 1897, 84 ff., 246; Yule and Burnell, *Hobson-Jobson*, ed. W. Crooke, London 1903, s.v. *monsoon*.

(A. J. Wensinck -[C. E. Bosworth])

MAWSŪʿA (A.), "encyclopaedia".

1. In Arabic.

In the sense of "a work dealing with all the sciences and arts", the idea of an encyclopaedia was not expressed in Classical Arabic, and it was not until the 19th century that the expression *dāʾirat al-maʿārif* "circle of items of knowledge" was coined, corresponding approximately to the etymological meaning of the word current in Western languages, and not until the 20th that a neologism, *mawsūʿa*, emerged, which contains an idea of breadth, of wide coverage, etc. Nevertheless, the absence of a perfectly adequate descriptive term—although we may cite for example *ādāb* or *maʿārif*—does not necessarily imply the non-existence of a tendency to encyclopaedic writing, translated into practice by the composition of general works due to some scholars applying themselves to the acquisition and diffusion of knowledge belonging to a wide range of intellectual and technical disciplines. Indeed, secular *maʿārif* [*q.v.*], as opposed to *ʿulūm* [see ʿILM] of a religious nature, nourished the literary genre designated *adab* [*q.v.*] (pl. *ādāb*), which branched out and became conducive to the moral, cultural and professional formation of the Muslims and consequently presupposed the bringing together of a mass of different notions. The definition of *adab*, which consists of "taking a little of everything" (*al-akhdh min kulli shayʾin bi-ṭaraf*), may mean that, in the traditional and speculative sciences (*ʿulūm naḳliyya wa-ʿaḳliyya*) developed since the beginnings of Islam, one proceeded to a choice which assumed, by force of circumstances, an encyclopaedic aspect and was given shape in works which bear witness to the level of the average culture and the tastes of the public to whom they were addressed. The latter consisted of those who were particularly desirous of being well-informed, but also of the bureaucracy, the *kuttāb* [see KĀTIB], who needed to possess extensive and varied knowledge, within the limits which precisely by their nature were to define the variable content of encyclopaedic works.

In the 3rd/9th and the 4th/10th centuries, "the Arabo-Islamic world, under the thrust of the cultural primacy of ʿIrāḳ, showed its capacity to combine the creation of humanism with that of encyclopaedic activity" (R. Blachère, *Réflexions*, 521) and began to be exposed to beneficial foreign influences which led the most open spirits to inquire into the universe, while respecting as far as possible Ḳurʾānic teachings. At the beginning of the 3rd/9th century, a similar attitude found expression in al-Djāḥiẓ (d. 255/868-9 [*q.v.*]), who dominated *adab* in the broad sense. He restrains himself from adopting a static viewpoint while abstaining from explaining the point of the information, but displays an astonishing dynamism in indicating some directions for investigation and proposing a method of acquisition and enrichment of knowledge by observation, experimentation, reflection, in a huge output covering *de omni re scribili*; this collection, in which the *Kitāb al-Ḥayawān* stands out, finally assumed an encyclopaedic character clearly illustrated furthermore by the *Kitāb al-Tarbīʿ wa 'l-tadwīr* and evidenced in our own times not only by the indices of the works concerned, but further, notably, by such works as *al-Mawrūth al-shaʿbī fī āthār al-Djāḥiẓ* (anonymous, Baghdād 1396/1976) with regard to folklore, and the *Muʿdjam al-Djāḥiẓ* of Ibrāhīm al-Sāmarrāʾī (Baghdād 1982).

Given that the temperament of this author hardly enables him to follow a methodical order, the *Kitāb al-Ḥayawān* is far from being a zoological dictionary, and one must refer to the excellent index which accom-

panies it in order to locate the details relating to the various animals presented in the body of the text. It is quite different in the *ʿAdjāʾib al-makhlūḳāt* of al-Ḳazwīnī (600-82/1203-83 [*q.v.*]), which contains an alphabetical series of notices concerning animals in its section on the description of the universe dealing with terrestrial matters. But the efforts deployed in this field reach their culmination in the *Ḥayāt al-ḥayawān al-kubrā* of al-Damīrī (742-808/1341-1405 [*q.v.*]), a true zoological encyclopaedia whose great merit is the alphabetical classification adopted by the author and the division of the entries into philological remarks, description of the animal concerned, mentions which are made of it in the Ḳurʾān and Sunna, whether the consumption of its flesh is allowed or forbidden, proverbs concerning it, medicinal qualities and interpretation of dreams in which it appears. The above details show the spirit in which this compilation was conceived: a useful one, but deprived of originality due to a writer of traditional training who had been able to draw on works already founded on the mass of texts written initially in Arabic or translated into that language that the public did not always have the leisure or the taste to procure. In any case, al-Damīrī lived in an age when intellectual curiosity had waned considerably and had largely lost the openness which had marked the century of al-Djāḥiẓ and the Muʿtazila. All the same, shortly after the death of this latter author, the religious policy of the caliphate brought to the forefront Muslims disturbed by the turn taken by the rather anarchic quest for knowledge and by the danger to the integrity of Islam that they perceived to be posed by a curiosity which appeared reprehensible. This resulted in according primacy to the Islamic and Arab sciences, to the detriment of foreign ideas already partly acclimatised. Among those who are noted for their conservative attitude, the most characteristic is certainly Ibn Ḳutayba (d. 276/889 [*q.v.*]), who opposed the liberalism and eclecticism of al-Djāḥiẓ with a programme limited to the needs of various social categories. To the secretaries of the administration, who began to be the real preservers of culture, he proposed a vade-mecum, the *Adab al-kātib*, in which he adopts the following classification of necessary knowledge: philological disciplines, applied sciences, techniques of public works, principles of jurisprudence, history and ethics. When he is concerned with the training of religious scholars, he adds to philology and ethics the Ḳurʾān and Sunna, plus some rudiments of *falsafa* [*q.v.*] by way of documentation and in order to be in a position to refute it. So much for the *kātib* and the *faḳīh*. There remains the *adīb*, for whom are intended the *Kitāb al-Maʿārif*, an encyclopaedia of historical knowledge useful to the cultured Muslim, and, especially, the *ʿUyūn al-akhbār*, in which most of the ideas which should be mastered are grouped under ten headings: the ruler, war, greatness in this world, qualities and faults, rhetoric, oratorical art, piety, how to choose one's friends, how to achieve one's ends, table manners and women (see G. Lecomte, *Ibn Qutayba*, Damascus 1965, 145). The programme recommended by Ibn Ḳutayba appeared not to allow any improvement or amplification.

On this point, some progress was nevertheless achieved by his successor, the Cordovan Ibn ʿAbd Rabbih (246-328/860-940 [*q.v.*]), who remarks that each generation leaves its gift of new knowledge and that consequently, one should summarise and complete periodically the elements of the common patrimony that have been accumulated. In his practical encyclopaedia, the *ʿIḳd*, which is richer and more subtle than the *ʿUyūn al-akhbār*, the subject matter is divided into 25 chapters, each bearing the name of one of the precious stones of which the "necklace" (*ʿiḳd*) is made up. The list is as follows: the ruler, war, generosity, delegations (to the Prophet), addressing kings, *ʿilm* and *adab*, proverbs, moral exhortations, elegies, virtues of the Arabs, language of the Arabs, retorts, speeches, epistles, the caliphs, Ziyād b. Abīhi, the pre-Islamic battles, poetry, metrics, song, false prophets, madmen, misers, human temperaments, food and drink and pleasantries. The coverage of this encyclopaedia, whose popular character is evident, hardly allows us to glimpse the country where it was compiled, Spain, for everything, or almost everything, is borrowed from the Eastern tradition.

After the *ʿIḳd*, the encyclopaedic tendency appears in a more diffuse manner, in the sense that the same writer, when he possesses wide erudition, multiplies the specialised treatises and abstains from proceeding to a synthesis. It is only in the 9th/15th century that the series represented by the *ʿUyūn al-akhbār* and the *ʿIḳd* is resumed by a new popular encyclopaedia, the *Mustaṭraf* of the Egyptian al-Ibshīhī (d. after 850/1446 [*q.v.*]), who, claiming to be inspired by Ibn ʿAbd Rabbih, nevertheless shows a concern for edification and manages to combine, in a manual written on a relatively limited scale, all that a good Muslim ought to know. It is of some value to enumerate the 84 chapters of this work: the edifice of Islam; reason; the Ḳurʾān; religious and secular knowledge; good manners; proverbs; rhetoric; retorts; oratorical art and poetry; trust in God; advice; moral exhortations; modesty, the sovereign; courtiers; ministers; escaping observation; magistrature; justice; injustice; the way of treating the people; the happiness of the people; qualities and faults; social life; concord; simplicity; pride; boastfulness; nobility; saints; miracles; rogues; generosity; avarice; table manners; magnanimity; promises kept; discretion; perfidy; courage; heroes; praises and gratitude; satires; sincerity and falsehood; filial piety; physical beauty; ornaments and care for the body; youth and health; names; journeys; wealth; kinship, the manner of begging; presents; work; acceptance of one's lot; changes of fortune; slavery; early Arabs; soothsaying; tricks; animals; wonders of creation; the djinn; wonders of the waters; wonders of the earth; mines and precious stones; music and song; singers and musicians; singing girls; love; specimens of songs; women; wine; pleasantries; anecdotes; invocations; fate; return to God; illnesses; death; patience; the lower world; prayers upon Muḥammad. It would not be impossible to discover in this sequence of chapters an ordering concept, an effort at logical classification which the apparent disorder of the arrangement belies. Besides, the *adab* which underpins al-Ibshīhī's work is less secular and more ethical. For this author, the best answer for those minds who are profoundly disturbed by the situation of the Arabo-Islamic world is a return to the sources, a recollection of the records of the classical period, which represents a perfect ideal for the average Muslim.

The authors that we are about to cite are not at all concerned with what is happening beyond the frontiers of *dār al-Islām*, and the *Kitāb al-Maʿārif* of Ibn Ḳutayba is, in this respect, characteristic, for it limits the historical ideas that a good Sunnī ought to have: a sacred history from Adam to Jesus followed up by means of traditions relating to the personalities of the "Interval" [see FATRA], genealogies of the Arabs, a somewhat anecdotal history of the caliphs and some celebrities, the religion of the ancient Arabs, sects of

Islam, and finally the kings of Yemen, Syria, al-Ḥīra and Persia. To put it another way, this historian is exclusively concerned—but only in a partial manner—with the Islamised countries.

On the other hand, after the eclipse of Muʿtazilism, openness was the feature of Shīʿīs. If one excludes the work of al-Barḳī [q.v. in Suppl.] whose *Kitāb al-Maḥāsin* is too mutilated to be assessed, the first author to cite is al-Yaʿḳūbī (d. 284/897 [q.v.]), who, in his *Taʾrīkh*, does not fail to devote some chapters not only to the same subjects as Ibn Ḳutayba, but also to the ancient rulers of India, Greece, Rome, Byzantium, Persia and even China. After this attempt at a historical encyclopaedia comes the *Taʾrīkh* of al-Ṭabarī (225-310/839-934 [q.v.]), which has some of the same character as a universal history, much more developed, but the real successor of al-Yaʿḳūbī is the polygraph al-Masʿūdī (d. 345/956 [q.v.]) who was led by an extraordinary intellectual curiosity to acquire a truly encyclopaedic knowledge which was able to nourish a series of general works in a historico-geographical framework, of which only some résumés have survived, such as the *Tanbīh* and especially the *Murūdj*. Here, before embarking on his discussion of the history of Muslim rulers also in an anecdotal fashion (this being one of the features of *adab*), al-Masʿūdī presents essential information on the outstanding characters of the world and reproduces lists of kings of peoples foreign to Islam, and notably those of France since Clovis. The encyclopaedic nature of the *Murūdj* is evident from the index in two volumes which the present author has added to his edition of the Arabic text; it is also illustrated by the citations to be found mainly in later encyclopaedists.

The summaries which we have reproduced above reveal a concern for exhaustiveness which is not, however, accompanied by a logical classification, and it is only among the *falāsifa* [q.v.], heirs of Greek thought, that one can discover the first attempts if not to establish a hierarchy of the sciences, at least to classify them. Among them, al-Farābī (d. 339/950 [q.v.]) covers human knowledge in a rich and diverse work which lies outside Islam and suggests a classification of the sciences well-known in the Western Middle Ages, thanks to the translation made by Gerard of Cremona (*De scientiis*): (i) Linguistic sciences (morphology; lexicography; syntax; art of writing; art of reading well; poetry and metre). (ii) Logic. (iii) Mathematics (arithmetic; geometry; optics; astronomy; music; metrology; mechanics). (iv) Physics and metaphysics. (v) Political science, jurisprudence and theology.

Whereas the concessions of al-Farābī to Arabism and Islam consist merely of expressing in Arabic terms the linguistic sciences and in Islamic terms jurisprudence (*fiḳh*) and theology (*kalām*), al-Khʷārazmī (wrote *ca.* 366/976 [q.v.]) divides the branches of knowledge into two main categories in his *Mafātīḥ al-ʿulūm*: sciences of the Islamic law (*sharīʿa*) and subjects connected with it (*fiḳh*; *kalām*; grammar; artistic composition; poetry and prosody; history), and foreign sciences (philosophy; logic; medicine; arithmetic; geometry; astronomy and astrology; music; mechanics; alchemy).

Later, the respective parts of the "Arab" sciences and the "foreign" sciences were to distinguish various classifications, which could be illustrated by more developed encyclopaedias than that of al-Farabī (on the classifications of the sciences, see L. Gardet and M.-M. Anawati, *Introduction à la théologie musulmane*, Paris 1948, 101 ff.; also Abū Ḥayyān al-Tawḥīdī, *Risāla fi 'l-ʿulūm*, by M. Bergé, in *BEO Damas*, xviii [1963-4], 240-98; Ibn Ḥazm, *Marātib al-ʿulūm*. For his part, Ibn Khaldūn (732-808/1332-1406 [q.v.]) distinguishes two main categories of sciences, the religious and the philosophical, but confines himself to a theoretical discussion without encyclopaedic elaboration).

It is only right that we should regard as an encyclopaedia the collective work of the Ikhwān al-Ṣafāʾ [q.v.] who discuss in 52 treatises or epistles (*risāla* [q.v.], pl. *rasāʾil*) all the accessible knowledge of their time (second half of the 4th/10th century). Rationalists and heirs of the Greek philosophers, the Muʿtazilīs and al-Djāḥiẓ, they accept all that can contribute to enrich the cultural patrimony. Their treatises (arranged as follows: 1 to 14: mathematics, logic and ethics; 15 to 30: natural sciences (including philosophy), 31 to 42: metaphysics; and 43 to 52: religion, mysticism, astrology, magic, do not correspond to their own classification which figures in the seventh *risāla*: I. Sciences of *ādāb* (writing and reading; lexicography and grammar; arithmetic and commercial transactions; poetry and prosody; divination, magic; alchemy and mechanics; arts and crafts; commerce, agriculture; animal husbandry; biography and history). II. Positive sciences of the *Sharīʿa* (revelation; interpretation of scriptures; Tradition of the Prophet; jurisprudence; judgments; moral exhortations; preaching; asceticism; Ṣūfism; interpretation of dreams). III. Truly philosophical sciences: mathematics (arithmetic; geometry; astronomy; music); logical sciences (poetics; rhetoric; *topoi*; apodeictic demonstration; sophistry); natural sciences (basic principles, heaven and earth; generation and decay; meteorology; mineralogy; botany; zoology; medicine; veterinary skill; dressage; agriculture; animal husbandry; crafts); divine sciences (knowledge of the Creator; angelology; psychology; politics; eschatology).

This encyclopaedia, written by Shīʿīs, is far from having a disinterested goal, for its authors uphold some kind of a thesis; they advocate indeed a radical reform of Islam in order to establish an extremist Shīʿism combining the *Sharīʿa* and Greek philosophy as well as the wisdom of the Indians and Persians and ancient paganisms. It corresponds to the modern definition of the encyclopaedia in the breadth of its coverage and the collaboration of a number of authors, mainly anonymous.

All the same, it was only favourably received in limited circles of philosophers and Shīʿīs, and provoked in the following century a remarkable reaction from al-Ghazālī (450-505/1058-1111 [q.v.]) who, in his *Iḥyāʾ ʿulūm al-dīn* seeks to defend orthodoxy. For him, there are two kinds of sciences: religious, which are obligatory, and non-religious, which are optional, when they are not harmful. The first comprise the *uṣūl al-dīn* (Ḳurʾān; Tradition; *consensus omnium*; traditions of the Companions) and the *furūʿ* (jurisprudence; sciences of the soul), the propaedeutic sciences (language; grammar; writing) and advanced ones (on the Ḳurʾān, Tradition, etc.); theology and philosophy (geometry and arithmetic; logic; natural theology; sciences of nature) are set in order. The second are sometimes commendable (medicine and calculation for example), sometimes blameworthy (notably magic and talismans; conjuring; spells), sometimes simply allowed (poetry and history for example). This classification appears in the first quarter of the *Iḥyāʾ* on practices of the Islamic cult; it is followed by social customs, causes of perdition and how to ensure one's salvation. It is in respecting an Islamic ethic developed in this large work that the Muslim

can prepare his salvation in the Hereafter. The collections that we have cited are distinguished by a subjectivity which is opposed to the relative objectivity of the bibliographical catalogues, which are in effect encyclopaedic guides. The earliest, the *Fihrist*, was composed in 377/987-8, hence in the period of the Ikhwān al-Ṣafāʾ, by the Baghdādī librarian Ibn al-Nadīm [*q.v.*], according to a logical plan corresponding to a personal classification of knowledge; generalities on known languages and scripts, materials for writing; revealed books; the Ḳurʾān and Ḳurʾānic sciences; grammar; lexicography; history; poetry and poets; theology according to the various schools and sects, Ṣūfism, Ismāʿīlism; jurisconsults of different schools; ancient and modern philosophers; mathematics; music; medicine; folklore; various anecdotes; conjuring; magic; equitation; engines of war; games; moral exhortations, maxims; interpretation of dreams; cookery; enchantments; religions other than Islam (notably Manichaeism, on which the *Fihrist* is one of the principal sources, and the religions of India and China); and alchemy. After Ibn al-Nadīm, a number of specialised bibliographies were produced, notably the *Fihrist* of Muḥammad b. al-Ḥasan al-Ṭūsī (385-460/995-1067 [*q.v.*]) who reviewed the works written by Shīʿīs, up to the compiling of the famous *Kashf al-ẓunūn* of Ḥādjdjī Khalīfa (1017-67/1608-57 [*q.v.*]), which marks the last stage before the modern catalogues of libraries.

Previously, the biographical genre had undergone considerable development, at first in order to meet the need for knowing the life of the transmitters of traditions in order to know whether the chains of guarantors had any gaps in continuity. The logical division of biographies by generation had finally given way to an alphabetical classification and resulted in dictionaries such as the *Muʿdjam al-udabāʾ* (to which the *Muʿdjam al-buldān* was added) of Yāḳūt (d. 626/1229 [*q.v.*]), the *Wafayāt al-aʿyān* of Ibn Khallikān (608-81/1211-82 [*q.v.*], the works of Ibn al-Ḳifṭī (568-646/1172-1248 [*q.v.*]), and many histories of towns and countries presented in the form of biographies of personalities who were famous in them.

All these works and many others besides, even if it is difficult to regard them as encyclopaedias since they only contain one specific section of information, were to become the instruments of a new form of encyclopaedia born of the vicissitudes of history, particularly of the fear of seeing the disappearance of the vast mass of knowledge accumulated over the centuries and of the concern to salvage at least a part from the irreparable catastrophe represented by the Mongol invasions and the fall of Baghdād in 656/1258. The latter events certainly provoked serious disquiet which was translated into the composition of enormous encyclopaedias intended to some extent to preserve the acquisitions of preceding generations at the moment when the Arabo-Islamic world could be seen as despairing of achieving new progress and felt itself threatened by the worst calamities. In the following centuries, the Black Death (749/1348) was further to aggravate this feeling of insecurity.

Ibn Manẓūr (630-711/1232-1311 [*q.v.*]), who left the most highly-developed dictionary of the Arabic language, already clearly expresses this disquiet and the wish to salvage whatever could be rescued from total destruction, when he writes in the preface of the *Lisān al-ʿArab:* "My sole purpose is to preserve the elements of this language of the Prophet... . I assert indeed that, in our days, the use of the Arabic language is regarded as a vice. The letter writers are better in foreign languages and rival one another in the eloquence in idioms other than Arabic. I have composed the present work in an age in which men boast of [using] a language different from that which I have recorded and *I have built it like Noah built the ark*, enduring the sarcasm of his own people".

What applies to the language also applies to the other cultural elements and, setting aside the stylistic clause about sarcasm, Ibn Manẓūr's enterprise has parallels in other fields. During the "Alexandrine" period (F. Gabrieli, *Storia della litteratura araba*, Milan 1951, 259), the decline of Arabic culture, under the blows of the events which seriously affected ʿIrāḳ, at that point incited the Egyptians, who benefited from the transfer of the caliphate to Cairo, to launch a new encyclopaedic movement whose principal actors were the high-ranking *kuttāb*.

The earliest is al-Nuwayrī (677-732/1279-1332 [*q.v.*]), whose *Nihāyat al-arab fī funūn al-adab* contains all the knowledge that would be necessary for a *kātib* assuming important responsibilities: cosmography, zoology, botany, ethics, history. The materials gathered were summarised and methodically arranged according to an Islamic conception of the world, but in a form that was both literary and practical. Then comes Ibn Faḍl Allāh al-ʿUmarī (700-49/1301-49 [*q.v.*], author of the *Masālik al-abṣār*, which seems to be intended on the whole for men of culture and constitutes a geographico-historical encyclopaedia containing a cosmography and information of a religious, juridical, political and administrative character. In spite of evident differences, it is tempting to liken the *Masālik* to the *ʿAdjāʾib al-makhlūḳāt* of al-Ḳazwīnī (see above), who describes the celestial and earthly worlds by borrowing extensively, like al-ʿUmarī, from his predecessors. The last encyclopaedist to be mentioned is al-Ḳalḳashandī (d. 821/1418 [*q.v.*]), whose huge *Ṣubḥ al-aʿshā* really places at the disposal of its users all that a good secretary could need to know in order to be able to acquit himself perfectly in his profession as writer in the chancellery (*ṣināʿat al-inshāʾ*). In his highly suggestive article on *Les classiques du scribe égyptien* (in *SI*, xviii [1963], 41-80), G. Wiet reproduces the classification of the sciences adopted by al-Ḳalḳashandī: I. Belles lettres (lexicography; morphology; grammar; style; rhetoric; the science of tropes; metrics; rhyme; calligraphy; Ḳurʾān reading). II. Sciences of the law (Ḳurʾān; Sunna; law, etc.). III. Physical sciences (medicine; veterinary skill; falconry; physiognomy; oneiromancy; astrology; magic; talismans; conjuring; alchemy; agriculture; geomancy). IV. Geometry (construction methods; optics; mirrors; centre of gravity; surveying; water-catchment; mechanisms for hoisting objects; water-clocks; engines of war; pneumatic machines). V. Astronomy (astronomical tables; projection of the sphere on a flat surface; sundials). IV. Arithmetic (arithmetic properly so-called; algebra, abacuses, etc.). VII. Practical sciences (politics; ethics; domestic economy). Although these notions did not all undergo considerable development, al-Ḳalḳashandī's encyclopaedia proves that in spite of the reversals experienced by the Islamic world, Arabic culture had lost nothing of its richness in books, but it had exhausted itself since the already distant age of its great prosperity and it was scarcely able to make any more obvious progress. The information gathered scarcely bears, in relation to the preceding centuries, any new features, owing much more to the march of history than to a calculated concern for enrichment.

Thus we have to pass over those authors whose total

work has an encyclopaedic aspect, as for example, al-Suyūṭī (849-911/1445-1505 [*q.v.*]), in order to arrive at the Turk Ṭāshköprüzāde (901-68/1495-1561 [*q.v.*]) who, through his encyclopaedia of arts and letters written in Arabic and then translated into Turkish, aimed to put at the disposal of his compatriots a summary of the knowledge possessed by the Arabic-speakers.

Then we have to wait until the second half of the 19th century in order to encounter the first attempt made in the Near East to offer the educated public a working instrument and reference work meeting modern scientific criteria, the *Dāʾirat al-maʿārif* published in Beirut from 1876 by Buṭrus al-Bustānī and continued by other members of his family [see AL-BUSTĀNĪ in Suppl.]. This encyclopaedia was resumed on a larger scale, from 1956, by F. E. al-Bustānī, who enlisted the collaboration of specialists from all disciplines; the new *Dāʾirat al-maʿārif* is only distinguishable from Western encyclopaedias by language and the place legitimately occupied by the Arabs.

Finally, we should remark that the word *mawsūʿa* has been used correctly to describe dictionaries of a technical nature, such as *al-Mawsūʿa fī ʿulūm al-ṭabīʿa* of E. Ghaleb (Beirut 1965), and also some collections in which each fascicule is devoted to a particular subject, such as *al-Mawsūʿa al-ṣaghīra* published in Baghdād, which is a "cultural, bi-monthly series dealing with sciences, arts and letters". For example, it contains some studies on "philosophical thought among the Arabs", as well as on "the petrochemical industries and the future of Arab oil".

Bibliography: Apart from the *EI* notices relating to the authors cited, see A. Zaki, *Études bibliographiques sur les encyclopédies arabes*, Būlāḳ 1308 (not seen); Ch. Pellat, *Les encyclopédies dans le monde arabe*, in *Cahiers d'histoire mondiale/Journal of World History/Cuadernos de historia mundial*, UNESCO, ix/3 (1966), 631-58; R. Blachère, *Quelques réflexions sur les formes de l'encyclopédisme en Égypte et en Syrie du VIIIe/XIVe siècle à la fin du IXe/XVe siècle*, in *BEO Damas*, xxiii (1970), 7-19, repr. in R. Blachère, *Analecta*, Damascus 1975, 521-40. For a comparison with the composition of encyclopaedias in Antiquity and the Middle Ages as well as in India and China, see the issue of *Cahiers d'histoire mondiale* cited above.

(CH. PELLAT)

2. In Persian.

Persian writings of an encyclopaedic character begin to appear about a century after the constituting of Persian as a language of culture. From then onwards they were to enjoy an important florescence until a late date, as much in India as in Persia. According to their contents, they can be divided into different groups. Here, only the major works will be mentioned; for an exhaustive examination of this genre, including the old translations into Persian, see the Persian manuscript catalogues (A. Munzawī, *Fihrist-i nuskha-hā-yi khaṭṭī-yi fārsī*, i, Tehran 1348/1969, ch. 9; idem, *Fihrist-i nuskha-hā-yi khaṭṭī-yi kitābkhāna-yi Gandjbakhsh*, i, Islāmābād 1979, ch. 10; Storey, ii, section F; etc.). One should also consult Ž. Vesel, *Les encyclopédies persanes. Essai de typologie et de classification des sciences*, Paris 1986.

The first Persian encyclopaedia of philosophy is Ibn Sīnā's *Dānish-nāma-yi ʿAlāʾī*, composed between 414-28/1023-37 for the Kākūyid ruler of Iṣfahān ʿAlāʾ al-Dawla Muḥammad b. Dushmanziyār. This is a compendium of the Aristotelian speculative sciences laid out here in an order different from that of the *Shifāʾ* and the *Nadjāt*: logic, metaphysics, physics and mathematics. The final section, which includes geometry, astronomy, arithmetic and music, was put together on the basis of the Arabic works of Ibn Sīnā and after his death, by his disciple and biographer al-Djuzdjānī. The *Dānish-nāma*, in which Ibn Sīnā sets forth the hierarchy of the Aristotelian sciences and for the first time elaborates in Persian a vocabulary of philosophical concepts, exercised a great influence on Persian authors (partial edn., *Abū ʿAlī Sīnā, Dānish-nāma-yi ʿAlāʾī (manṭiḳ, ilāhiyyāt, ṭabīʿiyyāt)*, ed. M. Mishkat and M. Muʿīn, 3 vols.[2], Tehran 1353/1974; a tr. of the whole text by M. Achena and H. Massé, *Avicenne, Le livre de science,* Paris 1986, 2nd. edn. revised and corrected by M. Achena). Another encyclopaedia of philosophy of great importance is the *Durrat al-tādj li-ghurrat al-Dībādj* of Ḳuṭb al-Dīn Shīrāzī [*q.v.*], written between 693-705/1294-1306 for the prince of Gīlān Dībādj b. Filshāh (ed. Mishkat, 2 vols., Tehran 1317-209/1938-41). In this, the author deals successively with logic, with the first philosophy (*al-falsafa al-ūlā*), with physics, with mathematics (the *quadrivium*) and with metaphysics. In an epilogue, he starts on Islamic theology, practical philosophy (*ḥikmat-i ʿamalī*) and Ṣūfism. The author was a philosopher, mathematician and astronomer who had worked, between 658-63/1259-64, at the Marāgha observatory under the direction of Naṣīr al-Dīn Ṭūsī [*q.v.*], and he devoted a large part of his encyclopaedia to the mathematical sciences. Both these encyclopaedias represent a compilation of the Arabic sources for the use of Persian, non-Arabic speaking rulers (for the relationship of the *Dānish-nāma* and Ibn Sīnā's Arabic works, see *EIr* art. *Avicenna.* xi, by Achena; and for a survey of the Arabic sources of the *Durra*, see Mishkat's introd., i, pp. xl-xliii).

The Persian encyclopaedias of the religious sciences are relatively numerous. In these, the Islamic religious sciences, including Ṣūfism, have the outstanding role. Following the répertoire of the traditional sciences, the Arabic literary and linguistic sciences and history might be joined with them, and occasionally, the philosophical and such strictly speaking scientific topics like medicine and calculation, as well as the occult sciences, might also figure there. There is frequent allusion to the works of al-Ghazālī and Fakhr al-Dīn al-Rāzī. Some authors tackle on a wider scale all the subjects capable of guiding the believer. As a result of this, one often finds chapters on moral and ethical topics drawn from the Persian cultural heritage. Two anonymous works of the 6th/12th century, the *Yawāḳīt al-ʿulūm wa-darārī 'l-nudjūm* (ed. M. T. Dānish-Pazhūh, Tehran 1345/1956) and the *Baḥr al-fawāʾid* (ed. idem, Tehran 1345/1956), give a conspectus of the varied contents of this type of encyclopaedia in the Persia of the pre-Mongol period.

The encyclopaedias of the natural sciences are extremely varied. In general, it is a question of popular compositions put together with a didactic aim, for amusement or to provide a "book of recipes". The authors may treat of Aristotelian physics in the wide sense, beginning with a description of the heavens and ending with the three kingdoms of nature. According to the classification of the sciences in use in the mediaeval Persian world, physics subsumes moreover a great number of subordinate sciences (*furūʿ*). Ḥamd Allāh Mustawfī Ḳazwīnī's *Nuzhat al-ḳulūb* (cf. Munzawī, *Fihrist ... fārsī*, 689-91; Storey, ii, section D, 129-31) and Ghiyāth al-Dīn Iṣfahānī (cf. *ibid.*, 357-8) fall into this category. The "books of marvels", such as Muḥammad Ṭūsī's

ʿAdjāʾib al-makhlūkāt (see B. Radtke, in Isl., lxiv [1987], 278-88), written in the second half of the 6th/12th century (ed. M. Sutūda, Tehran 1345/1956), similarly adopted this structure broadly speaking. However, sometimes only the three realms of nature are treated, especially when it is a question of the "special properties of things" (khawāṣṣ al-ashyāʾ) used in popular medicine and in occult practices. One example is the Farrukh-nāma-yi Djamālī of Abū Bakr Djamālī Yazdī (ed. I. Afshār, Tehran 1346/1957), put together in 580/1185 with the aim of "completing" the Nuzhat-nāma (see below). On the other hand, one may have encyclopaedias concerned with divers scientific subjects with a high proportion of subject-matter belonging to physics in the widest sense. A typical example is the Nuzhat-nāma-yi ʿAlāʾī of Shahmardān b. Abi 'l-Khayr al-Rāzī (ed. F. Djahānpur, Tehran 1362/1973), written between 506-13/1113-20 for the Kākūyid ruler of Yazd ʿAlāʾ al-Dawla Bā Kālīdjār Garshāsp with the aim of amusing. Another work of this type is the Nawādir al-tabādur li-tuḥfat al-Bahādur of Shams al-Dīn Dunaysirī (ed. Afshār and Dānish-Pazhūh, Tehran 1350/1971), composed in 699/1299-1300 for an unknown dedicatee. The encyclopaedias of the natural sciences are very revelatory of the spread of scientific knowledge in mediaeval Persia and are an important source for our knowledge of occult practices and technological questions.

The first Persian encyclopaedia in the narrow sense of the term was that of the Ashʿarī theologian Fakhr al-Dīn Rāzī (d. 606/1210 [q.v.]). His Djāmiʿ al-ʿulūm, also known as the Ḥadāʾiḳ al-anwār or Kitāb-i Sittīnī and containing sixty sciences (for the different versions, see Munzawī, op. cit., 656-7; Storey, ii, 351-2), was written in 574-5/1179 for the ruler of Khwārazm ʿAlāʾ al-Dīn Tekesh (facs. edn. of 1906 Bombay lith. by M. Tasbīḥī, Tehran 1346/1967). Rāzī says explicitly in his introduction that he has gathered together there all the sciences of his age in order to establish a répertoire for scholars at the court to use. He begins his work by an exposition of the traditional sciences (ʿulūm-i naḳlī) in the following order: Islamic religious sciences, Arabic literary and linguistic sciences, and history. He links this up with an exposition of the Aristotelian rational sciences (ʿulūm-i ʿaḳlī); logic, physics, mathematics and metaphysics. A large number of subordinate sciences figure in the framework of physics and mathematics: the medical sciences, the occult ones, technological questions, etc. Then comes an exposition of practical philosophy (ethics, politics, domestic economy). The work's conclusion is devoted to the religious practices, the conduct of rulers (ādāb al-mulūk) and to a description of the game of chess.

Comparable to the Djāmiʿ al-ʿulūm, but more important in its greater size, is the Nafāʾis al-funūn fī ʿarāʾis al-ʿuyūn of Shams al-Dīn Āmulī (ed. A. Ḥ. Shaʿrānī, Tehran 1377 AH, 3 vols.). The author was a mudarris in Sulṭāniyya under Öldjeytü. His encyclopaedia covers 160 sciences and was put together for the Indjūʾid prince of Shīrāz Abū Isḥāḳ, representing a real climax to the genre by the elegance of its form and the exhaustiveness of its content. Āmulī adopts the same principle for his exposition as Rāzī, dealing first of all with the traditional sciences "originating in Islam" (ʿulūm-i awākhir) and then with the philosophical sciences "coming into existence before Islam" (ʿulūm-i awāʾil; cf. Nafāʾis, i, 16). It does, however, contain some innovations in regard to Rāzī. The internal order of the two main sections is put together differently; a chapter on Ṣūfism appears among the traditional sciences; and the range of the subordinate sciences of physics and mathematics is richer than that of the Djāmiʿ al-ʿulūm. Both these encyclopaedias enjoyed wide popularity, and two Persian encyclopaedists tried later to imitate them: Ḥusayn ʿAḳīlī Rustamdārī in his Riyāḍ al-abrār, written in 979/1571 (cf. Munzawī, op. cit., 669; Storey, ii, 359), and Muḥammad Fāḍil Samarḳandī in his Djawāhir al-ʿulūm-i humāyūnī written in ca. 962/1555 (cf. Storey, ii, 358-9). An interesting example of the evolution of the Persian encyclopaedia is provided by Wādjid ʿAlī Khān's Maṭlaʿ al-ʿulūm wa-madjmaʿ al-funūn, written in 1261-2/1845-6 (cf. Storey, ii, 366-7).

For other types of encyclopaedic writing in Persian, whether of a specialised nature or from the sphere of adab works, see the catalogues of Munzawī, Storey, etc. But regarding the question of the originality of this literature in relation to the Arabic models by which it was largely inspired, this work of evaluation still remains to be done for the majority of the texts.

Bibliography: Given in the text.

(Ž. VESEL)

3. In Turkish. (see Supplement].

4. The Encyclopaedia of Islam, First edition.

The Encyclopaedia of Islam owes its existence to the renewed interest in Islam and the Islamic peoples which manifested itself in Europe at the turn of the twentieth century. The idea of such an enterprise, however, dates from a much earlier period. Already in 1697 the French Orientalist Barthélemi d'Herbelot had published in Paris the Bibliothèque Orientale ou dictionnaire universel contenant généralement tout ce qui regarde la connoissance des Peuples de l'Orient (see H. Laurens, Aux sources de l'Orientalisme, la Bibliothèque Orientale de Barthélemi d'Herbelot. Publications du Département d'Islamologie de l'Université de Paris-Sorbonne (Paris IV), vi, Paris 1978). It was to be followed by other classics like the Dāʾirat al-maʿārif (1876-98) of the Bustānī family [q.v. in Suppl.], T. P. Hughes, Dictionary of Islam (London 1885, 2nd ed. 1896), and W. Beale, An oriental biographical dictionary (Calcutta 1881, 2nd ed. by H. G. Keene, 1894). But these publications, notwithstanding their merits, could no longer satisfy the European general public interested in things Islamic, let alone the European scholars.

Around 1890, Messrs. Trübner in Strassburg envisaged a series of monographs on Semitic philology, in the same way as they had done for Iranian and Indian philology. However, the plan could not be carried out because of the untimely death in 1892 of A. Müller, to whom the work had been confided (see ZDMG, xlvi [1892], 778).

In the same year 1892, at the International Congress of Orientalists in London (see Transactions of the IXth International Congress of Orientalists, i, p. xxxviii), W. Robertson Smith proposed the idea of an Encyclopaedia of Islam. The initiative of the man who may be considered as the auctor intellectualis of the enterprise was accepted by the members attending the Congress, and an international committee of twelve members was established.

At the International Congress of Orientalists held in Geneva in 1894, it was clear that no progress had been made, the more so because Robertson Smith had meanwhile died. I. Goldziher then proposed to put the direction of the enterprise in the hands of M. J. de Goeje. When the latter declined, the Hungarian orientalist found himself charged with the organisation of the Encyclopaedia of Islam (see Transactions of the IXth International Congress of Orientalists, 1st part, 105, 1305). However, to the dismay of all those who con-

sidered him as the man able to realise the idea, Goldziher handed in his resignation at the International Congress of Orientalists held in Paris in 1897 (see *Transactions*, 1897, Bulletin no. 11; *ZDMG*, li [1897], 766).

One of the reasons brought forward by Goldziher for his resignation was the decision, taken meanwhile, to have the work printed in Leiden. Consequently, he opined, the editor should reside in Holland. The scientific advisor of Messrs. Brill, Dr. P. Herzsohn, had already started assembling a certain number of entries. A specimen was published in 1897 under the title *Erste Sammlung von Stichwoertern für eine Encyclopaedia des Islâms. Mit orientierenden Bemerkungen. Gedruckt als Manuscript, mit Vorbehalt einer hier und da noch auszuführenden genaueren Verification*, pp. 63, 8°.

At De Goeje's request, Professor Houtsma, notwithstanding a certain scepticism, accepted to replace Goldziher "because I knew to what trouble De Goeje was going to realise the *Encyclopaedia of Islam*".

In 1897 a new international committee had been appointed in Paris, consisting of A. C. Barbier de Meynard (Paris), E. G. Browne (Cambridge), I. Goldziher (Budapest), M. J. de Goeje (Leiden), I. Guidi (Rome), J. Karabacek (Vienna), C. Landberg (Tübzing), V. von Rosen (St. Petersburg), A. Socin (Leipzig) and F. de Stoppelaar (Leiden).

In order to get some idea of the readiness of his colleagues to collaborate, Houtsma asked several of them what kind of articles they were ready to write, and invited them to send one or more articles in order to have them printed at Brill's and to submit them to the opinion of the experts. The answers were positive, and in 1899 Houtsma was able to publish a *Specimen of a Muslim Encyclopaedia by a number of Orientalists*. It consisted of several monographs, arranged alphabetically and written in English, French and German by sixteen future collaborators. In the Preface, Houtsma remarks that no agreement had as yet been reached about the language in which the *Encyclopaedia* was to be published. In the same year 1899, Goldziher presented this *Specimen* to the members of the Committee present at the xiii[th] International Congress of Orientalists in Rome (see *Acta*, i, pp. clxxix ff.), who accepted it favourably. While waiting for the resolution of the financial problems, Houtsma and Herzsohn were correcting and completing the list of entries.

At the first session of the recently-founded International Association of Academies (Paris 1901), a proposition of the Academies of Leipzig, Munich and Vienna for the publication of an *Encyclopaedia of Islam* was admitted into the working plan, after approval by the literary section. Under the presidency of De Goeje, a Committee was appointed in order to study the project of the enterprise, and Houtsma was charged with the editorship. The Committee consisted of Goldziher, Browne, Barbier de Meynard, Von Rosen, Guidi, Karabacek (all already appointed at the Paris Congress of 1897), and Chauvin (Brussels Academy), Buhl (Copenhagen Academy) and Fischer (Leipzig Academy, Socin having died in 1899).

A smaller Committee, consisting of De Goeje, Goldziher and Karabacek, was charged with drafting by-laws, which were completed in 1902. The costs were calculated at 140,000-150,000 marks for ten years. Financial support was promised by the Academies of Amsterdam, Budapest, Christiania, Copenhagen, Lisbon, Madrid, Munich, St. Petersburg, Vienna, the Academy of Saxony, the Académie des Inscriptions et Belles Lettres, the Reale Accademia dei Lincei, the Gouvernement Général de l'Algérie, the British Academy, the Dutch Colonial Government, the Italian Government, the Dutch Company of Commerce in Amsterdam, the Deutsche Morgenländische Gesellschaft, the Deutsche Kolonialgesellschaft, the Senate and municipal council of Hamburg, the Egyptian Government, the Johns Hopkins University of Baltimore, the Theological Seminary of Hartford, Mr. C. R. Crane in Chicago, the Ministère Français de l'Éducation, the American Oriental Society, the American Committee for Lectures on the History of Religions, and the Résidence Générale de France au Maroc. In general, subventions were promised for several years, but in some cases a single gift was granted. The amount of the subventions and gifts was very unequal, and not all subventions were granted immediately; some were only allowed for 1906, 1908 or 1909, others for 1910, 1911 or 1912.

Before the actual printing could start, two other questions had to be solved, that of orthography and that of the language. As for the orthography of Arabic, Persian, Turkish and other Oriental terms, it was decided to follow broadly the one which the Geneva Congress had deemed admissible. The question in which language the articles should be published was more difficult to solve. In the *Specimen*, the articles had appeared in English, French and German, but it seemed undesirable to let the *Encyclopaedia* have such a polyglot appearance. On the other hand, certain subventions had been granted under the express condition that the *EI* should be published in the language of the giver. One of the direct consequences of the decision to publish the *Encyclopaedia of Islam* in English, French and German was that the articles had to appear under headings in oriental languages, generally in Arabic. Furthermore, three separate editions would very probably triple the costs, because the project thus was going to take much more time than the foreseen ten years. Finally, it was necessary to assign an English, French and German editor to assist Houtsma, the editor-in-chief.

In 1906, M. Seligsohn and A. Schaade, who had been meanwhile appointed, arrived in Leiden. The first fascicule, published in 1908, was severely criticised in England, France and also in Leiden because of the rather low standard of Seligsohn's translations of German articles. Nor was the American orthography acceptable on the other side of the North Sea. After the death of De Goeje in 1909, Seligsohn resigned, followed by Schaade a year later. For the latter, R. Hartmann was appointed, but the post of Seligsohn remained vacant: it was practically impossible to find a qualified Orientalist who was able to deal satisfactorily with the three languages. Only after T. W. Arnold of London and R. Basset of Algiers had assumed the editorship of the English and French editions (without remuneration), did the enterprise make good progress. In 1913 the first volume, comprising the letters A-D, was completed. Hartmann, who resigned in the same year, was replaced by H. Bauer. As president of the Executive Committee, De Goeje had been succeeded by Chr. Snouck Hurgronje, who had been able to redress the financial position.

As for the editorial work, Houtsma may be quoted. "Apart from a few exceptions, my collaborators are all Christians, and belong to quite different peoples. It is the Editor's task to maintain the scientific and neutral character of the work on a high and impartial level, and to be very careful not to entrust articles to incompetent hands. On the other hand, a scholar whose scientific qualities are above all suspicion, can-

not be refused the right to publish in all liberty the results of his research, even if occasionally they are provocative. That is "why", remarks Houtsma in a note, "the articles of H. Lammens have been accepted, although personally I can in no way agree with their spirit and tendency. Therefore, from the very beginning, every article of a certain importance has been signed by the author, in order not to extend the responsibility of the Editors beyond what can be reasonably expected".

Houtsma also remarks that he took upon himself the editing of articles which he considered less important but which, on the other hand, could not be left out. He published them without signature, considering that the *Encyclopaedia of Islam* is not primarily a collection of basic monographs on a particular subject, but should be a mirror of the progress of research, in such a way that the Orientalist scholar finds rather an impulse there to further research.

In 1922, Bauer handed in his resignation, and Schaade resumed his activities for the *EI*. At the death of R. Basset in 1924, his son H. Basset was found ready to continue temporarily the work of his father. In 1924, following a decision of the Royal Academy of the Netherlands, Professor A. J. Wensinck became editor-in-chief. The publication of the last volume S-Z was started, while work on the letter K was continued. At the death of H. Basset in 1926, his task was taken over by E. Lévi-Provençal and when, in the same year, Schaade handed in his resignation, he was replaced by W. Heffening.

After the death of Arnold in 1929, the editing of the English edition was ensured by Professor H. A. R. Gibb, and afterwards the Editorial Committee remained unchanged until the completion of the *EI* and its Supplements in 1939. As has been said above, from 1924 onwards two volumes were being prepared at the same time. Volume II (E-K) was published in 1927, volume IV (S-Z) in 1934, and volume III (L-R) in 1936.

After 1934, the Editors also envisaged an Index which should contain all names of persons, tribes, clans, the geographical names, etc., which appear in one way or another in the articles. With the help of a few collaborators, Heffening compiled a card index, based on the first three volumes. Unfortunately, the 1939 War put an end to his work.

A final point of the history of the first edition of the *Encyclopaedia of Islam* is the *Handwörterbuch des Islam*, begun by Wensinck in 1937. This compendium of articles from the *Encyclopaedia* was to consist of one volume only, containing articles which treat Islam as a religion. However, in many cases it was necessary to complete the bibliography. Besides, some new articles were added while others, considered obsolete, were replaced. After the death of Wensinck in 1939, Professor J. H. Kramers was charged with the work of editing. Because of the financial position, it was decided to finish the German text first, and to shorten some articles, without however reducing their value. Thus in 1941, the *Handwörterbuch des Islam* was published. The change of the title was justified by the fact that quotation from two editions whose titles would practically be identical, might lead to confusion. A German index was added, and the differences with the complete Encyclopaedia indicated.

Bibliography: A. J. Wensinck, *De Encyclopedie van den Islam*, in Oostersch Instituut—Leiden, *Jaarverslag 1927-1928*, Leiden 1929, 15-7; M. Th. Houtsma—J. H. Kramers, *De wordingsgeschiedenis van de Encyclopaedie van den Islam*, in *ibid.*, *Jaarverslag 1941*, Leiden 1942, 9-20. What are sometimes quite personal details are to be found in P. Sj. van Koningsveld, *Orientalism and Islam. The letters of C. Snouck Hurgronje to Th. Nöldeke from the Tübingen University Library. Abdoel-Ghaffaar. Sources for the history of Islamic studies in the Western world*, i, Leiden 1985, esp. 143-5, 163-4, 212-6; idem, *Scholarship and friendship in early Islamwissenschaft. The letters of C. Snouck Hurgronje to I. Goldziher. From the Oriental Collection of the Library of the Hungarian Academy of Sciences, Budapest. Abdoel-Ghaffaar. Sources, etc.* ii, Leiden 1985, esp. 149-51, 180-1, 280-339, 387-92, 403-4, 407-9.

(E. van Donzel)

MAWT (A.) is the term employed in Arabic to express the actual notion of death, while synonyms such as *maniyya* and its variant *manūn*, *radā*, *halāk*, *ḥimām*, *ḥayn* and *bilā* convey particular connotations and are less frequently used and regarded as more literary. The term for death *wafāt*, more exactly "accomplishment, fulfilment", i.e. of a man's term of life, is in origin Ḳurʾānic, and stems from the use in the early Medinan period of the verb *tawaffā* for describing how God brings to its close a man's foreordained period of life and gathers the man to Himself; hence the use of the passive form of this verb *tuwuffiya* "his term was brought to an end [by God]" = "he died". The idea behind the use of this verb is closely connected with the use in the Ḳurʾān of other verbs like *ḳaddara* and *ḳaḍā* which carry the sense of God's predetermining a man's lifespan or executing His decree concerning a man's term of life (see T. O'Shaughnessy, *Muhammad's thoughts on death*, Leiden 1969, 37 ff.). In modern Arabic, *wafāt* has a more delicate and euphemistic sense than the stark word *mawt*, something like Eng. "demise, decease" and Fr. "décès", with *al-mutawaffā* therefore meaning "the deceased". The same distinction is made in Turkish between the bald *ölüm* "death" and *wafāt*, modern Turkish *vefat*, and in Persian between *marg* and *wafāt* and such terms as *fawt* (A., literally "passing away, disappearing").

The conception of death held by the Arabs prior to the advent of Islam was deeply rooted in the animist beliefs inherited from their distant past. Taken to be a manifestation of disruptive action on the part of *dahr* [*q.v.*] "time-destiny", death was considered the specific destiny of the animate world, a concept uniting humans and animals as opposed to the physical world, inanimate and therefore imperishable. It was defined, in these terms, as the extinction of the vital spirit which animates beings endowed with life, as the separation of the body and the organic soul. As it is known that the residences most frequently attributed to a man's "double" are the blood and the breath, it may be understood how the Arabs could believe that in the case of violent death, the double (*ḳarīna*) is released through the flowing of the blood and that, in the case of "natural" death, it escapes through the nose; hence the expression *māta ḥatfa anfihi*.

Furthermore, while it is accepted, as stressed by the Ḳurʾān, that the ancient Arabs had no conception either of the resurrection of the dead or of life in the Beyond, they seem nevertheless to have believed in the survival of the dead. Two terms which evoke wandering and thirst, *hāma* and *ṣadā*, denote these spirits of the dead. But, unlike other Semitic peoples, such as the Hebrews for example (cf. A. Lods, *La croyance à la vie future et le culte des morts dans l'antiquité israélite*, Paris 1906), the ancient Arabs did not entertain the idea of a special world of the dead, a world of shadows and of gloom. In addition, for them it was inconceivable that their dead might be disgraced.

Only the spirits of the dead deprived of burial and those whose blood had not been avenged were left to wander, thirsting, in desert lands. To abandon its dead to such a destiny was considered the worst ignominy that could befall a tribe. By vengeance in cases of murder and by the scrupulous observance of funeral rites and of burial in particular, the Arabs preserved their dead from such a fate and their society from such a disgrace. Their essential preoccupation was to re-affirm with respect to their dead the validity and permanence of tribal solidarity. But, while doing this, did they not also seek to assure themselves of the protection of these dead?

The existence of a cult of the dead among the ancient Arabs is a much debated question (see in particular: I. Goldziher, *Le culte des ancêtres et le culte des morts chez les Arabes*, Fr. tr., Paris 1885; Lods, *op.cit.*; H. Lammens, *L'Arabie occidentale avant l'hégire*, Beirut 1928, 151 f.). In spite of differing opinions and the scarcity of reference documents, it seems probable that the Arabs did, at one point in their history, practise the cult of the dead. But this cult, which belongs, as Lods emphasises, to "an inferior stage of religion", seems, in the period immediately before Islam, to have completely disappeared under the combined impact of the sedentarisation of the tribes and the emergence of polytheism. Only the rites rendered to the deceased immediately after death (washing of corpses, mourning and interment) were perpetuated. The other rites, such as sacrifice or offering, were reserved for the gods. (On the funeral rites and their significance, see M. Abdesselem, *Le thème de la mort dans la poésie arabe, des origines à la fin du III/IX siècle*, Tunis 1977, ch. ii).

But this ancient cult of the dead has, by extending beyond death the fulfilment of the duty of tribal solidarity, contributed to the sanctification of blood lineage, thus giving solid foundations to the social system of the Arabs and perpetuating, over the generations, the same moral ideal (cf. B. Farès, *L'honneur chez les Arabes avant l'Islam*, Paris, and ʿIRḌ). This ideal enables the Arab to contemplate death without fear and to place the preservation of his honour and the honour of his group above the preservation of his life. This is clearly shown in the themes developed in pre-Islamic poetry and especially in the eulogistic nature of the dirges [see MARTHIYA. 1].

Islam was to appeal to the Arabs to adopt a radically different conception of death. This conception results from a new definition of the soul and of life. According to the Ḳurʾān, man is moved by two distinct principles, one thinking and the other vital: *nafs* and *rūḥ* (see R. Blachère, *Note sur le substantif "nafs"*, in *Semitica*, i [1948], 71). *Nafs* has the sense of "self" in its most conscious and permanent state. *Rūḥ* is the principle of life which proceeds from God and is enlivened and given substance by Him.

Birth and death are divine decrees. Parents do not give life. Events are not the cause of death. These are only the intermediaries through which the will of God is realised.

This new definition of life revolutionised the metaphysical and moral conceptions of the Arabs. Life being no longer immanent, the opposition between the animate and inanimate world loses all foundation and gives way to a new conception whereby God, the creator, source of life, is opposed to everything that is not Him and which, therefore, is the creation, including the physical world whose permanence is only an illusory appearance.

On the other hand, by affirming that life proceeds from God and not from the group and that "the loins of fathers and the womb of mothers are [only] receptacles" (Ḳurʾān, VI, 98), Islam confers on the life of the individual a new significance and on his action a new perspective. First, the life of the individual becomes sacred. "Except with justice, do not kill your fellow-man whom God has declared sacred" (Ḳurʾān, XVII, 33). This is a new precept for the Arabs. Hitherto, only the blood of the group could not be spilled. Henceforward, only those who refuse to recognise the authority of God or seriously contravene His commandments may legitimately be killed. By substituting the notion of the community of faith for that of the community of blood, Islam led the Arabs to liberate themselves from the ascendancy of the clan and to take cognisance of their existence as free and responsible persons. Even though the believers are declared brothers, they are individually responsible for their actions before their judges in this world as well as before God on the final day of judgment.

The echoes of the debates which have brought into prominence these notions and the place occupied by the evocation of the afterlife and the final day of judgement in the Ḳurʾān, show to what an extent such a message would overturn the beliefs of the Arabs. Death is no longer the end of life. It is only the appointed time (*adjal*), decreed by God to conclude the period of man's testing in this world. The *post-mortem* fate of man is no longer dependent on the solidarity of the group, but on the action of the individual and the mercy of God. Eternal happiness or damnation is now the question that each person is required to ask himself and to which none can reply with certainty. This lack of certainty led the Arabs to experience a sentiment which had until then been unknown to them, anguish. This was quite clearly reflected in a new poetic genre, the *zuhdiyyāt* [*q.v.*].

Thus it was not only the beliefs of the Arabs which were revolutionised by the Ḳurʾānic message, but also their attitudes and their behaviour. It may be noted, in this context, that the funeral ceremony, the *djanāza* [*q.v.*], also underwent profound modifications. Certainly, Islam has retained some ancient practices such as the washing of the dead, the shroud and interment; but is has forbidden certain pagan rites such as lamentations or offerings and, above all, it has introduced a new obligation, the prayer for the dead which confers upon the entire funeral ceremony a radically different significance. This is no longer a glorification of the dead but an appeal for divine mercy. For an ethic of exaltation Islam has substituted a morality of humility.

Bibliography: Given in the article.

(M. ABDESSELEM)

MAWWĀL [see MAWĀLIYĀ].

AL-**MAWZAʿĪ**, SHAMS AL-DĪN ʿABD AL-ṢAMAD B. ISMĀʿĪL B. ʿABD AL-ṢAMAD (d. after 1031/1621), the author of an important independent chronicle of early Ottoman Yemen to 1031/1621-2, particularly of the south and of the city of Taʿizz. As his *nisba*, al-Mawzaʿī (mistakenly given as al-Manzilī in Brockelmann, S II, 550), indicates, the family originated in the Tihāma town of Mawzaʿ, south of Zabīd; but his residence was at Taʿizz, where, like his father before him, he served as a Shāfiʿī magistrate and teacher. Being a prominent member of the town's Sunnī *ʿulamāʾ*, and closely connected with the region's Ottoman officials, it is not surprising that his chronicle, *al-Iḥsān fī dukhūl mamlakat al-Yaman taḥt ẓill ʿadālat āl ʿUthmān*, which for the later period is rich in precise details, is sympathetic in tone to the Turks and hostile to the Zaydī *imāms*. It is difficult to determine how much, if any, of the work's

content was contributed by the author's father who, it is disclosed, planned a similar chronicle before his death.

Bibliography : As al-Mawzaʿī's name appears in none of the known biographical and other source books for the area and era, we have to rely on what he reveals about himself in his chronicle, and this has been summarised by Muṣṭafā Sālim, *al-Muʾarrikhūn al-Yamaniyyūn*, Cairo 1971, 55-63. For the mss. of *al-Iḥsān* (in particular Paris 5973), consult A. F. Sayyid, *Maṣādir taʾrīkh al-Yaman*, Cairo 1974, 225-6. See also F. Babinger, *GOW*, 150-1.

(J. R. Blackburn)

MAWZŪNA [see SIKKA].

MAYBUD, a small town in the *shahrastān* of Ardakān [*q.v.*] in the modern Persian *ustān* or province of Yazd, situated 32 miles/48 km. to the north-west of Yazd. The mediaeval geographers (e.g. Ibn Ḥawḳal[2], 263, 287, tr. Kramers and Wiet, 260, 281; *Ḥudūd al-ʿālam*, tr. Minorsky, 29, § 29.45; Le Strange, *Lands*, 285) describe it as being on the Iṣfahān-Yazd road, 10 *farsakh*s from Yazd. Lying as it does on the southern fringe of the Great Desert, its irrigation comes from *ḳanāt*s [*q.v.*] (see Lambton, *Landlord and peasant in Persia*[1], 219). Its population in *ca.* 1950 was 3,798.

Bibliography : In addition to references given in the article, see *Farhang-i djughrāfiyā-yi Īrān*, x, 190.

(C. E. Bosworth)

AL-**MAYBUDĪ,** the *nisba* of two scholars from the small town of Maybud [*q.v.*] near Yazd in Persia and also of a vizier of the Great Saldjūḳs.

1. RASHĪD AL-DĪN ABU 'L-FAḌL AḤMAD B. MUḤAMMAD, author of an extensive Ḳurʾān commentary in Persian, begun in 520/1126, the *Kashf al-asrār wa-ʿuddat al-abrār*, extant in several mss.

Bibliography : Storey, i, 1190-1; Storey-Bregel, i, 110-11; and on the *nisba* in general, al-Samʿānī, *Ansāb*, f. 547b.

2. MĪR ḤUSAYN B. MUʿĪN AL-DĪN AL-MANṬIḲĪ, pupil of Djalāl al-Dīn al-Dawānī [*q.v.*], *ḳāḍī* and philosopher, author of several works on philosophy and logic, including a *Mukhtaṣar maḳāṣid ḥikmat falāsifat al-ʿArab* and a popular textbook on philosophy, the *Hidāya*, executed by the militant Shīʿī Shāh Ismāʿīl I [*q.v.*] for his strongly-held Sunnī views in 909/1503-4 (Ḥasan-i Rūmlū, *Aḥsan al-tawārikh*, ed. C. N. Seddon, i, Baroda 1931, 82), *pace* the date of *ca.* 904/1498 in Brockelmann, S II, 294.

Bibliography : Browne, *Lit. hist. of Persia*, iv, 57; Brockelmann, II[2], 272, S II, 294.

3. KHAṬĪR AL-MULK ABŪ MANṢŪR MUḤAMMAD B. ḤUSAYN, first mentioned as vizier to the Saldjūḳ sultan Berk-yaruḳ in 495/1101; then as *mustawfī* to Muḥammad b. Malik-Shāh in 500/1106-7 and as vizier in 504/1110-1; and finally as *ṭughrāʾī* to Maḥmūd b. Muḥammad b. Malik-Shāh in 512/1118-19, till he was demoted to the post of a provincial vizier in Fārs to the prince Saldjūḳ-Shāh b. Muḥammad b. Malik-Shāh. Khaṭīr al-Mulk seems to have been a mediocre public servant. Anūshīrwān b. Khālid [*q.v.*] was deputy vizier under him during Muḥammad's reign; his relations with him became bad, and he comments unfavourably on Khaṭīr al-Mulk's woeful ignorance of the Ḳurʾān and of the Arabic language, he being a Persian (Bundārī, 104).

Bibliography : Bundārī, *Zubdat al-nuṣra*; Zambauer, *Manuel*, 224; ʿAbbās Iḳbāl, *Wizārat dar ʿahd-i salāṭīn-i buzurg-i saldjūḳī*, Tehran 1338/1959, 150-4; C. L. Klausner, *The Seljuk vezirate, a study of civil administration 1055-1194*, Cambridge, Mass. 1973, index.

(C. E. Bosworth)

MAYDĀN (A., pl. *mayādīn*), masculine noun denoting a large, open, demarcated area, flat and generally rectangular, designed for all kinds of equestrian activity. Arab philologists and lexicographers have differing opinions regarding the root to which *maydān* should be attributed. For al-Zamakhsharī, this term is derived from the root *w-d-n* since, as he explains (*Asās al-balāgha*), the horses "are flogged there severely" (*tūdan bi-hi*). For others, this is the paradigm *faʿlān* from the root *m-y-d* with the sense of urging and manoeuvring of horses. For others, finally, the same paradigm *faʿlān* is allegedly drawn from the root *m-d-y* with metathesis of the last two consonants, *maydān* taking the place of *madyān* with the sense of "pushing to the limit", since the horses perform there to the limits of their strength. Of these three propositions, it seems the attribution of *maydān* to the root *m-y-d* is the most plausible.

According to the sporting activities which took place there, the *maydān* represented the hippodrome or race course (*ḥalba*) when used for horse races (*sibāḳ*), the ring or display ground for equestrian manoeuvres and exercises, the arena or lists for mock-battles, jousts and symbolic armed tournaments between the mounted groups, and the pitch for the ancient and traditional games of polo and "lacrosse", *ṣawladjān*, *čawgān* [*q.v.*] and *djerīd* [*q.v.*] or *burdjās*/*birdjās*. In his *Khiṭaṭ*, al-Maḳrīzī relates, with regard to the ancient site of Santaria in the Oasis district of Egypt, that its founder, the Coptic king Minaḳiyūsh, also founder of the town of Akhmīm [*q.v.*], was the first to construct *maydāns* for the equestrian training of his courtiers; in its use as a drill-ground, the *maydān* soon became indispensable for the training of cavalry, a military element which grew considerably in importance with the rise of Islam.

When not engaged in military campaigns, the Muslim trooper (*djundī*) spent much of his time on the *maydān*, perfecting his skills in mounted archery, shooting either at a target (*burdjās*) placed at the top of a lance or at "gourd-shooting" (*ḳabaḳ*) suspended from the end of a long spar; this latter exercise, introduced by the Turks, became the object of keen competitions. Shooting of the style known as *ulkī* (Turkish *ülkü*) at a large target (*hadaf tamām*) placed at long distance (*maydān ṭawīl*), and with arrows of a specified pattern called *maydānī*, required archers capable of a range of 200 metres and more. Short-range precision shooting (*ulkī ḳaṣīr*) was aimed at a small target at a distance of no more than 70 metres. Pure long-distance shooting without a target (*niḍāl*) was practised only at a fairly late stage by the sultans. To the north of Istanbul there still exists the Ok Meydanı "field of the arrow" founded by sultan Meḥemmed II (855-86/1451-81), at the end of which stand some twenty commemorative plaques marking the record distances achieved since this period; thus it is known that in 1213/1798 sultan Selīm III shot an arrow to a distance of almost 900 metres. It was also at a late stage that there was practised, on the *maydān*, shooting with the crossbow, at a target, with bolts and quarrels.

All these sporting activities had, in fact, no object other than military training, and every town with a Muslim garrison of any importance had one or more *maydāns*; al-Fīrūzābādī mentions in this context (*al-Ḳāmūs al-muḥīṭ*, s.v.) those of Nīshāpūr, Iṣfahān, Khwārazm and Baghdād. In the last-named, the first *maydān*, according to al-Yaʿḳūbī, *Buldān*, tr. Wiet, 37, 41), extended along the left bank of the Tigris, near the palace of the vizier al-Faḍl b. al-Rabīʿ [*q.v.*].

Under the Mamlūk sultans, the construction of a *maydān* constituted a large-scale project and mobilised

a considerable labour-force; it was necessary, in effect, to level a surface of sufficient size to accommodate the manoeuvring of several hundred horsemen. Enclosures, water-conduits, shelters, stables, studs, personnel quarters, pavilions, baths and other amenities represented enormous expense, and every sultan was eager to establish his own *maydān*, neglecting those already in existence, which rapidly fell into ruin. Thus, in Cairo, during the period of the Baḥrī Mamlūks [*q.v.*], the apotheosis of "chivalry" (*furūsiyya* [*q.v.*]), there were as many as seven *maydāns*, all built between the 7th and 8th/13th-14th centuries. An eighth and last was inaugurated there by the Circassian Ḳānṣawh al-Ghawrī in 909/1503, but it was quickly abandoned, *furūsiyya* then being in decline as a result of the development of firearms. Sometimes, former *maydāns* were transformed into public squares or fair-grounds.

By metonymy, the term *maydān* (sometimes with the plural *mayādīn*) was applied to the exercises of mounted formations, and works devoted to *furūsiyya* present diagrams of these exercises which were performed by numerous groups of horsemen according to a well-established pattern (*tartīb al-mayādīn*). The major western riding schools, even today, give an accurate impression in public performances of the likely nature of these complex and interwoven movements of squads of troopers with their colourful banners.

In figurative usage, *maydān* evokes the confrontation of two parties, in the expressions *maydān al-ḥarb* ("field of battle"), *ṭalaba li 'l-maydān* ("challenge to combat"), *nahār al-maydān* (the day of battle). Among the Marazig of southern Tunisia, *mādān* (pl. *mwādīn*) denotes "battle", "fray" (see G. Boris, *Lexique*..., Paris 1958, s.v.).

Alongside this limited sense, *maydān* is, like the French "champ", the English "field" and the German "Feld", extended to the broad sense of "domain of activity", physical, intellectual or spiritual.

Finally, al-Maydān is the name of a locality of Fārs [*q.v.*] in the *kūra* of Sābūr, mentioned by Ibn al-Faḳīh al-Hamadhānī (*Abrégé du Livre des Pays*, tr. H. Massé, Damascus 1973, 246).

AL-**MAYDĀNĪ**, Abu 'l-Faḍl Aḥmad b. Muḥammad b. Aḥmad b. Ibrāhīm al-Naysābūrī, Arab philologist, domiciled in Naysābūr in the upper part of the Maydān (square) of Ziyād b. ʿAbd al-Raḥmān. In the cemetery of this quarter (al-Maydān) he was buried after his death on Wednesday, 25 Ramaḍān 518/5 November 1124. In his home town, his teachers were the philologists and Ḳurʾān scholars Abu 'l-Ḥasan al-Wāḥidī (d. 468/1076), Yaʿḳūb b. Aḥmad al-Kurdī (d. 470/1078), and ʿAlī al-Mudjāshiʿī al-Farazdaḳī (d. 479/1086), who had seen much of the world. Like them, al-Maydānī was less of an original and perspicacious scholar—comparable to his famous contemporary Abu 'l-Ḳāsim al-Zamakhsharī [see MATHAL. 1. In Arabic, iii, 13]—than a knowledgeable *adīb* who knew how to condense traditional lore and to arrange it in a practical and pleasing way.

Among the works of his which have been preserved or are known by their titles, his great collection of proverbs, (1) *Madjmaʿ al-amthāl*, is outstanding. It was created subsequent to a *madjlis* of the *kātib* Muntadjab al-Mulk Abū ʿAlī Muḥammad b. Arslān (d. 534/1139), one of the most influential men at the court of Sultan Sandjar [*q.v.*] in Marw, at about the same time as the collection of al-Zamakhsharī (499/1106). The *Madjmaʿ* has remained the most comprehensive and most popular collection of classical Arabic proverbs up to our days (Ibn Khallikān, tr. de Slane, i, 131; Ziriklī, *Aʿlām*, i, 208). This is proved by the great number of mss. and the numerous prints; the *Madjmaʿ* is also the only collection that has been translated into a European language, to wit, into Latin by G. W. Freytag (Bonn 1838-43; see MATHAL. 1. In Arabic, iii, 12; R. Sellheim, *Die klassisch-arabischen Sprichwörtersammlungen*, The Hague 1954, 145-51, Arabic enlarged edition Beirut 1391/1971, 209-18; further ancient mss.: Paris [de Slane] no. 3958 [533/1138!]; Chester Beatty [Arberry], no. 3017 [586/1190]; Paris [Blochet], no. 6511 [587/1191], cf. no. 6702; Istanbul, Türk İslam Eserleri Müzesi, no. 2005 [6th/12th century]; Damat İbrahim, no. 957 [601/1204]; Munich [Aumer], no. 643 [603/1206]; Tashkent, no. 1781 [628/1230]; Brit. Mus., Suppl. [Rieu], no. 997 and Berlin [Ahlwardt], no. 8671, 2 [631/1234]; in addition, see N. M. Çetin, in *İA*, viii, 178; R. Şeşen, *Nawādir al-makhṭūṭāt al-ʿarabiyya*, Beirut 1400/1980, ii, 458; etc.). In 532/1137, his pupil Yūsuf b. Ṭāhir al-Khuwayyī (Khūwī) arranged an abridged edition under the title of *Farāʾid al-kharāʾid fī 'l-amthāl wa 'l-ḥikam* (Sellheim, *op. cit.*, 145, [2]209), and in 1037/1627, from this an anonymous scholar published an extract with annotations in Turkish, entitled *ʿUḳūd al-ʿuḳūl* (Vienna [Flügel], no. 343; cf. Cairo[1] [Turk. mss.], 136); a third abridgement, entitled *Muntakhab Madjmaʿ al-amthāl* (Cairo[2], iii, 389), originates from a certain al-Mawlā Āḳ Shams al-Dīn (10th/16th century?), and a fourth from Ḳāsim b. Muḥammad b. ʿAlī al-Ḥalabī al-Bakradjī (d. 1169/1756), entitled *al-Durr al-muntakhab min amthāl al-ʿArab* (Berlin [Ahlwardt], no. 8672; Cairo[2], iii, 97; cf. Cairo[1] [Turk. mss.], 136). In 1079/1668, an anonymous Ottoman writer turned the *Madjmaʿ* into verse under the title *Naẓm al-amthāl* (Laleli, no. 1953; a fragment at Gotha [Pertsch], in no. 1250), and two hundred years later, the Lebanese Ibrāhīm al-Aḥdab (d. 1308/1891), did this also, under the title *Farāʾid al-laʾāl fī Madjmaʿ al-amthāl* (Beirut 1312/1894). A Turkish translation by al-Sayyid al-Ḥāfiẓ Muḥammad Shākir b. al-Ḥādjdj Ibrāhīm Ḥilmī al-ʿAyntābī of 1294/1877 has survived in the autograph (Istanbul, Üniversite Kütüphanesi, TY, no. 167-70). Al-Maydānī's pupil Abu 'l-Ḥasan al-Bayhaḳī (d. 565/1169) is the author of an original collection of proverbs which in its explanations and comments is independent of that of his teacher (see MATHAL. 1. In Arabic, iii, 14).

(2) *Sharḥ al-Mufaḍḍaliyyāt* (mentioned, e.g., by Yāḳūt, *Udabāʾ*, ii, 108). (3) *Sharḥ Ḳaṣīdat al-Nābigha* (Paris [Blochet], no. 6022). (4) *Sharḥ Ḳāfiyyat Ruʾba* (Sezgin, ii, 369). (5) *Munyat al-rāḍī bi-rasāʾil al-ḳāḍī*, a collection of *rasāʾil* by the *ḳāḍī* of Harāt, Manṣūr b. Muḥammad al-Azdī al-Harawī (d. 440/1048; Brockelmann, S I, 154 f.). (6) *Maʾwa 'l-gharīb wa-marʿā 'l-adīb* (mentioned by Ḥādjdjī Khalīfa, s.t.).

(7) *al-Sāmī fī 'l-asāmī*, an Arabic-Persian dictionary of common terms and words, finished in 497/1104, classified in four categories: (a) *sharʿiyyāt* (technical terms of *fiḳh*), (b) *ḥayawānāt* (animate things), (c) *ʿulwiyyāt* (celestial) and (d) *sufliyyāt* (terrestrial things). They are divided up into numerous chapters, and these, in their turn, into further not expressly

characterised sub-chapters, arranged, as a rule, according to the subjects that are treated, and not alphabetically; said to have been lithographed at Tehran 1265/1849, 1267/1851, 1272/1856, 1273 and 1274/1857, 1275/1859, 1294/1877, n.d.; Tabriz n.d.; India 1284/1867; numerous mss. (e.g. Bursa, Haraççizade/oğlu, lugat, no. 15 [565/1169; cf. H. Ritter, in *Oriens*, ii (1949), 239]; Berlin [Ahlwardt], no. 7040 [*ca.* 600/1203]; Chester Beatty [Arberry], no. 3028 [631/1233]; Topkapı Sarayı [Karatay], no. 7556 [633/1235]; Çetin, in *İA*, viii, 178 f.; Şeşen, *op. cit.*, ii, 458; Tehran, Dāni<u>sh</u>gāh [Dāni<u>sh</u> Pa<u>zh</u>ūh], no. 1338,3 [682/1283]; Storey, iii, 81f.). For this, the author composed a commentary, entitled *al-Ibāna fī <u>sh</u>arḥ al-Sāmī fi 'l-asāmī* (mss.: Tehran, *op. cit.*, no. 1338,2 [12th/18th century]; Leiden [de Goeje-Houtsma], no. 107 [692/1293]), another one was written by Asʿad b. Masʿūd b. <u>Kh</u>alaf al-ʿId<u>j</u>lī (d. 600/1203), entitled *<u>Sh</u>arḥ al-kalimāt al-mu<u>sh</u>kila fī kitāb al-S.* (mss.: Topkapı Sarayı[Karatay], no. 7557 [7th/13th century]; Leiden [de Goeje-Houtsma], no. 106 [692/1293]). A synopsis prepared by the author's son, Abū Saʿd Saʿīd (d. 539/1145; al-Samʿānī, *al-Taḥbīr*, Ba<u>gh</u>dād 1395/1975, i, 302-3; al-Ṣafadī, *Wāfī*, vii, 327; al-Suyūṭī, *Bu<u>gh</u>ya*, 254, ²i, 582; cf. al-Samʿānī, fol. 548a), in the order of al-<u>D</u>jawharī's (d. 398/1008) *al-Ṣiḥāḥ*, entitled *al-Asmāʾ fi 'l-asmāʾ* is preserved perhaps in Leiden (de Goeje-Houtsma), no. 108 (725/1325).

(8) *Ḳayd al-awābid min al-fawāʾid*, a criticism of al-<u>D</u>jawharī's well-known dictionary *al-Ṣiḥāḥ*, mainly based on al-Azharī's (d. 370/980) *Tah<u>dh</u>īb al-lu<u>gh</u>a* (ms.: Berlin [Ahlwardt], no. 6942). (9) *Kitāb al-Maṣādir*, a treatise on infinitives (mentioned, e.g., by Ibn al-Ḳifṭī, *Inbāh*, i, 124); on this work, his pupil, Abū <u>D</u>jaʿfar al-Bayhaḳī (d. 544/1167) has, perhaps, based his *Kitāb Tā<u>dj</u> al-maṣādir* (Brockelmann, I, 350, S I, 513; Topkapı Sarayı [Karatay], no. 7565; *RIMA*, xvii [1971], 191). The *Kitāb <u>Gh</u>arīb*, or *<u>Gh</u>arāʾib al-lu<u>gh</u>a*, ascribed to him by the author of the *Hadiyya*, i, 82, is likely to be a work of his son Saʿīd of the same title (cf. al-Ṣafadī, *Wāfī*, xv, 199).

(10) *al-Hādī li 'l-<u>sh</u>ādī*, a syntax with Persian notes in three parts (nouns, verbs, particles), compiled after his *Kitāb al-Sāmī* (see above, no. 7); printed at Tehran 1374/1954; mss.: see e.g. Çetin, in *İA*, viii, 179; Şeşen, *op. cit.*, ii, 459 with commentary on the verses by the author (= Leiden [de Goeje-Houtsma], no. 162 [692/1293]); Storey, iii, 148. (11) *Nuzhat al-ṭarf fi 'l-ʿilm al-ṣarf*, a treatise on grammatical forms; prints: Constantinople 1299/1882; Tehran 1322/1904; Cairo 1402/1982; mss.: see e.g. Şeşen, *op. cit.*, ii, 458 f. (12) *al-Unmū<u>dh</u>a<u>dj</u> fi 'l-naḥw*, and (13) *al-Naḥw al-maydānī*, two grammatical books (mentioned, e.g., by Ibn al-Ḳifṭī, *Inbāh*, i, 124). A minor grammatical treatise on (14) *ṣarf* (Paris [de Slane], no. 4000 [cf. Vajda, 599]), and another on (15) *<u>dj</u>umūʿ* and *ḥurūf* (Leiden [de Goeje-Houtsma], no. 163; cf. Berlin [Ahlwardt], no. 7040, fol. 3a; Ibn al-Ḳifṭī, *op. cit.*, i, 122: *al-Hādī fi 'l-ḥurūf wa 'l-adawāt*; above, nos. 7 and 10).

Bibliography : In addition to the works mentioned in the text, see Brockelmann, I, 344 f., S I, 506 f., 964 (the reference to a *Kitāb Tafṣīl al-na<u>sh</u>ʾatayn*, Carullah, no. 2078, 42v-77v, should be applied to al-Rā<u>gh</u>ib al-Iṣfahānī, cf. Brockelmann, S I, 505-6, 9, no. 5; H. Ritter, in *Isl.*, xxv [1939], 61); Kaḥḥāla, *Muʿ<u>dj</u>am al-muʾallifīn*, ii, 63 f.; E. Quatremère, *Mémoires sur la vie et les ouvrages de Meïdani*, in *JA*, 2. série, i (1828), 177-233; idem, *Proverbes arabes de Meïdani*, in *JA*, 3. série, iv (1837), 497-543, v (1838), 5-44, 209-58; see MA<u>TH</u>AL. 1. In Arabic, iii, 12; his poor biography according to ʿAbd al-<u>Gh</u>āfir al-Fārisī's (d. 529/1134) lost *Kitāb al-Siyāḳ li-taʾrī<u>kh</u> Naysābūr* is preserved in Istanbul, Üniversite Kütüphanesi, FY, no. 695, fol. 128b.

(R. SELLHEIM)

MAYHANA, MĪHANA, a small town of mediaeval <u>Kh</u>urāsān, now in the USSR, situated to the east of the Kūh-i Hazār Mas<u>dj</u>id range and on the edge of the "Marw desert", the later Ḳara Ḳum [*q.v.*], 40 miles/62 km. to the east-north-east of Ḳalʿat-i Nādirī and 60 miles/93 km. south-east of Ma<u>sh</u>had [*q.vv.*]. In mediaeval times, it was the chief settlement of the district of <u>Kh</u>āwarān or <u>Kh</u>ābarān which lay between Abīward and Sara<u>kh</u>s [*q.vv.*]; by Yāḳūt's time, Mayhana itself had largely decayed, though Mustawfī describes <u>Kh</u>āwarān as a whole as flourishing, with good crops and cereals and fruit (*Ḥudūd al-ʿālam*, tr. Minorsky, 103, § 23.12; Mustawfī, *Nuzha*, 157-8, tr. 155; Le Strange, *Lands*, 394).

Its main historical fame is as the birthplace in 357/967 of the Ṣūfī saint and thaumaturge Abū Sāʿid Faḍl Allāh b. Abi 'l-<u>Kh</u>ayr, who alternated between residence there and in Nī<u>sh</u>āpūr for most of his life till his death at Mayhana in 440/1049 [see ABŪ SĀʿID B. ABI 'L-<u>KH</u>AYR; to the references there add F. Meier, *Abū Sāʿid-i Abū l-Ḫayr (357-440/967-1049), Wirklichkeit und Legende*, Tehran-Liège 1976]. Mustawfī quotes verses praising the *<u>Shaykh</u>* and other great men from <u>Kh</u>āwarān, including the minister of the Sal<u>dj</u>ūḳ Ṭo<u>gh</u>rīl Beg, Abū ʿAlī <u>Sh</u>ā<u>dh</u>ān, and the poet Anwarī [*q.v.*].

Mayhana is now a town situated some 14 miles/20 km. within the Turkmenistan SSR and appears on modern maps as Meana.

(C. E. BOSWORTH)

AL-**MAYL** (A.), declination, an important notion in spherical astronomy.

Declination is a measure of the distance of a celestial body from the celestial equator. Muslim astronomers tabulated either the declination and right ascensions of stars or their ecliptic coordinates [see MAṬĀLIʿ]. Also of concern to them was the solar declination, *mayl al-<u>sh</u>ams.* They distinguished two kinds of solar declination, *al-mayl al-awwal*, the distance δ_1 of the sun from the ecliptic measured perpendicular to the celestial equator, and *al-mayl al-<u>th</u>ānī*, the distance δ_2 of the sun from the ecliptic measured perpendicular to the ecliptic; see Fig. 1.

Fig. 1.
Both functions were tabulated in *zī<u>dj</u>s* [see ZĪ<u>DJ</u>], usually for each degree of ecliptic longitude λ. The underlying formulae in modern notation are

$$\delta_1(\lambda) = \text{arc sin } (\sin \lambda \sin \varepsilon)$$

and

$$\delta_2(\lambda) = \text{arc tan } (\sin \lambda \tan \varepsilon),$$

were ε is the obliquity of the ecliptic, called in Arabic *al-mayl al-aʿẓam* or *al-mayl al-kullī.*

The obliquity of the ecliptic is the basic parameter of spherical astronomy. Since it varies with time,

Muslim astronomers over the centuries conducted observations to derive the current value. Most of them did this by means of meridian observations of the sun at the solstices. If h_{min} and h_{max} are the solar meridian altitudes at the winter and summer solstices at a locality with latitude φ, then

$h_{min} = 90° - \varphi - \varepsilon$ and $h_{max} = 90° - \varphi + \varepsilon$

see Fig. 2. Clearly, from such observations ε may be found using

$$\varepsilon = \tfrac{1}{2}(h_{max} - h_{min}).$$

summer solstice
equinoxes
pole
winter solstice
horizon
Fig. 2.

Likewise, the local latitude φ can be determined from the same observational data. The most complete discussions of the subject were by Ibn Yūnus and, more especially, al-Bīrūnī [*q.v.*].

(D. A. KING)

MAYMANA, a town of northwestern Afghānistān (lat. 35° 55' N., long. 64° 67' E.), lying at an altitude of 2,854 feet/870 m. on the upper reaches of the Āb-i Maymana, one of the constituent streams of the Āb-i Ḳayṣar which peters out in the desert beyond Andkhūy [*q.v.*] and the sands of the Ḳîzîl Ḳum [*q.v.*].

The site of the settlement seems to be ancient. The *Vendidad* speaks of Nisāya, and the ?8th century Armenian geography of Iran records Nsai-mianak = MP * Nisāk-i Miyānak "the Middle Nisā", possibly identical with Ptolemy's Νισαία in Margiana (Marquart, *Ērānšahr*, 78-9). This seems to have been where lay the town known in early Islamic times as al-Yahūdiyya (*Ḥudūd al-ʿalām*, tr. Minorsky, 107, § 23.53, cf. comm. 335: Djahūdhān), indicating a sizeable community of Jews there. Al-Yaʿḳūbī, *Buldān*, 287, tr. Wiet, 99, al-Iṣṭakhrī, 270, Ibn Ḥawḳal, ed. Kramers, 442-3, tr. idem and Wiet, 427-9, al-Muḳaddasī, 427-9, describe the town as a flourishing one, with a Friday mosque, and as the seat of the ruler of Faryāb of the principality of Gūzgān, which remained independent till incorporated into the Ghaznawid empire by Sulṭān Maḥmūd [see DJŪZDJĀN and FARĪGHŪNIDS]. Yāḳūt, *Buldān*, ed. Beirut, ii, 194, calls it Djahūdhān al-Kubrā, presumably to distinguish it from the Yahūdiyya of Iṣfahān.

The actual name Maymana "the auspicious, fortunate town" does not occur in the 3rd-4th/9th-10th century texts. It is possible that a form Maymand existed by the 7th/13th century, since it apparently occurs in some manuscripts of Djūzdjānī's *Ṭabaḳāt-i Nāṣirī* (though the latest editor, ʿAbd al-Ḥayy Ḥabībī, adopts the reading Maymana for his text, 2nd ed. Kābul 1342-3/1963-4, i, 358, 374, whereas the manuscript(s) which Raverty used for his translation, London 1881-99, ostensibly had Maymand, cf. i, 378, 391, 399); but the Maymand which was the family origin of the great Ghaznawid vizier Aḥmad b. Ḥasan Maymandī [*q.v.*] was almost certainly one in Zābulistān, the region around Ghazna. It is certainly the form Maymana which is henceforth used for the town in Afghān Turkistān.

Towards modern times, Maymana was under Uzbek control, being one of the petty, semi-independent khānates (together with Sar-i Pul, Shibarghān and Andkhūy) known as the Čahār Wilāyat, and oriented essentially towards the Bukhārā Khānate. The Hungarian traveller Vambéry visited it in 1863 and describes the town as possessing 1,500 mud-brick houses and a dilapidated bazaar. The Afghān *amīr* of Kābul Dūst Muḥammad [*q.v.*] disputed possession of Maymana with Bukhārā in 1855, and only with the Anglo-Russian agreement of 1873 did the four khānates come definitely within the orbit of Kābul; not till 1844 did the *amīr* ʿAbd al-Raḥmān Khān [*q.v.*] secure the submission of the *wālī* of Maymana.

At present, Maymana, lying as it does within a fertile agricultural area, and being on the Harāt to Mazār-i Sharīf road, is a flourishing town, the administrative centre of a *wilāyat* or province (since 1964, called that of Faryāb), and with a population (mainly Uzbek, but with some Tādjīks and Pushtūns) estimated by Humlum at 30,000. It has an airfield and is important for the weaving of fine carpets and for wool and camels'-hair textiles.

(C. E. BOSWORTH)

MAYMANDĪ, ABU 'L-ḲĀSIM AḤMAD B. ḤASAN, called Shams al-Kufāt "sun of the capable ones", vizier of sultans Maḥmūd and Masʿūd of Ghazna [*q.vv.*]. He was a foster-brother of Maḥmūd, and had been brought up and educated with him. His father had been *ʿāmil* of Bust under Sebüktigin, and apparently stemmed from Maymand in Zābulistān; but on a charge of misappropriation of the revenue, he was put to death. In 384/994, when the Amīr Nūḥ b. Manṣūr the Sāmānid conferred on Maḥmūd the command of the troops of Khurāsān, Maḥmūd put Aḥmad at the head of his correspondence department. After this, Aḥmad rapidly rose in the service of his master, and occupied in succession, the posts of *Mustawfī-i Mamlakat* (Accountant General), *Ṣāḥib-i Dīwān-i ʿArḍ* (Head of the War Department), and *ʿāmil* of the provinces of Bust and Rukhkhadj. In 404/1013, Sultan Maḥmūd appointed him *wazīr* in place of Abu 'l-ʿAbbās al-Faḍl b. Aḥmad Isfarāʾinī. For twelve years, Aḥmad managed the affairs of the growing empire of Sultan Maḥmūd with great tact and diplomacy. Aḥmad was very strict and exacting, and did not tolerate any evasion of duty or departure from the usual official procedure, with the

result that many of the dignitaries of the Empire became his enemies and worked to bring about his ruin. He was disgraced and dismissed in 415/1024, and sent as a prisoner to the fort of Kālindjar, in the southern Kashmīr hills.

After his accession to the throne in 421/1030, the new sultan Mas^cūd b. Maḥmūd, whose cause Aḥmad had always favoured, wished to re-appoint him vizier in 422/1031 in place of the disgraced Ḥasanak [*q.v.*]; ostensibly on account of his age, Aḥmad was reluctant to accept, and before doing so, insisted on a *muwāḍa^ca* [*q.v.*] or contract defining his own duties and rights *vis-à-vis* the sultan and other ministers. He died in Muḥarram 424/December 1032, much mourned, according to Bayhaḳī, by other members of the bureaucracy.

From both his competence and learning, Aḥmad subsequently enjoyed a great reputation as a vizier and stylist; ^cUtbī expressly praises him for his restoration of Arabic as the official language of the *dīwāns*, whereas Isfarā^cinī had—no doubt, more realistically—introduced the use of Persian, so that "the bazaar of eloquence had suffered loss, the traffic in fine expressions and beautiful language had perished, and there was no differentiation between incapacity and capability".

(M. NĀẒIM-[C. E. BOSWORTH])

AL-**MAYMANĪ** AL-**RĀDJ(A)KŪTĪ**, ^cABD AL-^cAZĪZ, Indo-Muslim Arabic scholar, known by the name MEMON. His family probably came originally from Maymana [*q.v.*], but he was born at Rādj(a)kūt (Kāṭhiyāwāṛ) in 1888 and died at Karachi on 27 October 1978.

The major part of his teaching career was undertaken at the Muslim University of ^cAlīgaṛh, where he was Reader from 1924 to 1942, then Professor until his retirement in 1950; previously, having graduated in Arabic and Persian in 1909, he was Lecturer in Arabic, from 1913 onward, at the Edward College of Peshāwar, before transferring to the Oriental College of Lāhawr. A few years after the creation of Pakistan, he made his way to Karachi where, from 1955 to 1958, he resumed teaching duties at the newly-inaugurated University, and also directed, until 1960, the Central Institute of Islamic Research. At various times he resided in different Arabic-speaking countries and, a pious Muslim, he made the Pilgrimage to Mecca on several occasions.

Primarily a philologist, al-Maymanī possessed a perfect mastery of classical Arabic which enabled him to edit preserved or partially reconstructed *dīwāns* (Ibn ^cUnayn, Ḥumayd b. Thawr al-Hilālī, Suḥaym ^cAbd Bani 'l-Ḥasḥās), works of philology such as the *Thalāth rasā^cil* (by Ibn Fāris, al-Kisā^cī and Ibn ^cArabī), *al-Manḳūṣ wa 'l-mamdūd* by al-Farrā^c or *Kitāb mā ttafaḳa lafẓuh* by al-Mubarrad, historical texts (*Nasab Ḳaḥṭān wa-^cAdnān* by al-Mubarrad) or literary texts (*Risālat al-malā^cika* by al-Ma^carrī; *al-Fāḍil* by al-Mubarrad). It should be noted that he took an interest in the literature of the Muslim West and that, in addition to *al-Nutaf min shi^cray Ibn Rashīḳ wa-zamīlih Ibn Sharaf* (Cairo 1343/1925), he wrote a work entitled *Ibn Rashīḳ... wa-tardjamat Ibn Sharaf* (likewise Cairo 1343/1925) and left a highly-esteemed commentary on al-Ḳālī [*q.v.*], *Simṭ al-la^cālī fī sharḥ Amālī 'l-Ḳālī*, Cairo 1354/1936, 3 vols.

A member of the Arabic Academy of Damascus, al-Maymanī contributed actively to the *MMIA*, and it is typical of him that in his capacity as a corresponding member (being of Pakistani nationality) of the recently-created Indian Academy of the Arabic Language, he contributed the first article to the first issue of the *Madjallat al-Madjma^c al-^cIlmī al-Hindī* (i, 1386/1976, 1-19), on the subject of Abū ^cUmar al-Zāhid, better known as Ghulām Tha^clab [*q.v.*], whose *Kitāb al-Mudākhalāt* he had published.

Bibliography: Obituary notice, by A. S. Bazmee Ansari, in *Hamdard Islamicus*, ii/2 (1979), 113-15.

(CH. PELLAT)

MAYMŪN B. **MIHRĀN**, ABŪ AYYŪB, early Islamic *faḳīh* and Umayyad administrator. According to traditional sources he was born in 40/660-1, the son of *mawālī* who were captives from Iṣṭakhr. Maymūn himself evidently grew up in Kūfa where, some say, he was a *mawlā* of the Arab tribe of Hawāzin or Azd; others say that he was the slave of a woman of the Azd, who later manumitted him. After winning his freedom, he remained in Kūfa until the turbulence of the Dayr al-Djamādjim [*q.v.*] episode (82/701), which pitted the ^cIrāḳīs against the Umayyad authorities; presumably because of his neutral or pro-Umayyad sympathies, Maymūn moved at this time to the Djazīra, where he became the leading figure among the local men of religion at Raḳḳa. A few accounts describe him as having made the pilgrimage to Mecca and as having visited Baṣra, where he had an interview with the famous saint al-Ḥasan al-Baṣrī; but travelling does not seem to have been his main activity, and most sources describe him simply as the sage of Raḳḳa.

Maymūn is remembered in numerous accounts for his religious and ethical maxims. Most of these emphasise such themes as the dangers of wealth and gluttony or the importance of God-fearing piety and of good works, but they also include some which can be considered as at least mildly anti-Shī^cī, while others suggest an effort to strike a politically non-committal pose: "Do not speak about four things: ^cAlī, ^cUthmān, *ḳadar*, and the stars". Although he served as a source of religious and ethical guidance, however, he does not seem to have been much concerned with the transmission of *ḥadīths*, which were just beginning to be circulated widely in his day. As a transmitter of *ḥadīths* he is generally adjudged reliable (*thiḳa*); but among his maxims is one that stresses the primacy of the Ḳur^cān over the "*ḥadīths* of men" as a source of guidance, and only about two dozen *ḥadīths* on his authority (mostly via Ibn ^cAbbās or ^cAbd Allāh b. ^cUmar) are extant. A good number of these *ḥadīths* deal with ritual law; a few deal with sectarian or political issues, some of which are clearly *mawḍū^c* (e.g. Abū Nu^caym, *Ḥilya*, iv, 95 on the Rāfiḍīs), and which generally are slightly anti-^cAlid in tone. Some of these "*ḥadīths*" are doubtless sayings of Maymūn himself or of his informants, which his pupils "raised" to the status of prophetic utterances. Accounts going back to Maymūn also convey considerable information about several central figures among the Companions of the Prophet and their successors, e.g. ^cUthmān, ^cAlī, Mu^cāwiya, Ibn ^cAbbās, ^cAbd Allāh b. ^cUmar, Ibn Sīrīn, al-Ḥasan al-Baṣrī and Sa^cīd b. al-Musayyab—including several significant *awā^cil* (e.g. Mu^cāwiya was the first who sat between the two *khuṭbas*; ^c*Iḳd al-farīd*, v, 105).

Maymūn's close ties to the Umayyads are reflected both by the fact that he held office for some of them and by his many accounts of the activities of ᶜUmar b. ᶜAbd al-ᶜAzīz (ruled 99-101/717-20) and some other members of the dynasty. He is first said to have administered the treasury in Ḥarrān for ᶜAbd al-Malik's brother, Muḥammad b. Marwān, who served that caliph and his successor al-Walīd as governor of the Djazīra. Maymūn was then appointed by ᶜUmar b. ᶜAbd al-ᶜAzīz over the *ḳaḍāʾ* and *kharādj* (judgeship and tax-collection) of the Djazīra—offices he apparently held only with some moral reservations—while his son ᶜAmr ran ᶜUmar's *dīwān* (Ibn Saᶜd, vii/1, 178). After ᶜUmar's death he was retained in his post for a time by Yazīd b. ᶜAbd al-Malik. He was still evidently part of the official establishment in Ḥarrān under Hishām (al-Balādhurī, *Ansāb*, Beirut iii, 100), and is also said to have commanded the army of Syria that went to Cyprus in 106/724-5 for Hishām (al-Ṭabarī, ii, 1487). Maymūn appears to have been one of ᶜUmar b. ᶜAbd al-ᶜAzīz's close confidants, and the two were evidently bound by mutual admiration, to judge from the many extant accounts in which one relates anecdotes emphasising the piety and wisdom of the other.

Maymūn died, according to most authorities, in the Djazīra in 117/735-6. He does not seem to have left behind any written works—further evidence, perhaps, that he was primarily a *faḳīh* known for his piety and good judgement in religious matters rather than a *muḥaddith*—but he did bring to Raḳḳa a tradition of religiosity that lived on in his pupils bearing the *nisba* "al-Maymūnī", among them Djaᶜfar b. Burḳān, Abu 'l-Malīḥ, and his own son ᶜAmr b. Maymūn. The esteem in which he was held by later authorities is aptly summed up in a statement ascribed to Sulaymān b. Mūsā (d. 115/733-4 or 119/737): "If knowledge (*ᶜilm*) came to us from the Ḥidjāz on the authority of al-Zuhrī, or from Syria on the authority of Makḥūl, or from ᶜIrāḳ on the authority of al-Ḥasan [al-Baṣrī], or from the Djazīra on the authority of Maymūn [b. Mihrān], we accepted it" (Abū Zurᶜa, *Taʾrīkh*, 315 [no. 588]).

(F. M. DONNER)

MAYMŪN B. AL-ASWAD AL-**ḲADDĀḤ**, obscure Meccan transmitter from the *Imāms* Muḥammad al-Bāḳir and Djaᶜfar al-Ṣādiḳ who, two centuries after his death, gained notoriety as the father of the alleged founder of Ismāᶜīlism and ancestor of the Fāṭimid caliphs, ᶜAbd Allāh b. Maymūn [*q.v.*]. According to the Imāmī sources, he was a client of Makhzūm and a shaper of arrow shafts (*yabrī al-ḳidāḥ*). He became a personal servant of al-Bāḳir and al-Ṣādiḳ in Mecca. A few traditions of the two *Imāms* related on his authority are contained in the canonical collections of Imāmī *ḥadīth*. Al-Ṭūsī counts him also among the companions of *Imām* ᶜAlī Zayn al-ᶜĀbidin (d. 95/713-14) (*Ridjāl al-Ṭūsī*, ed. Muḥammad Ṣādiḳ Āl Baḥr al-ᶜUlūm, Nadjaf 1381/1961, 101, 135, 317). He died probably during the imāmate of al-Ṣādiḳ (d. 148/765). W. Ivanow's suggestion that he had, besides ᶜAbd Allāh, another son called Abān (*The alleged founder of Ismailism*, 68) rests on a faulty *isnād* in some copies of al-Kulaynī's *K. al-Kāfī* (see Muḥammad b. ᶜAlī al-Ardabīlī al-Ḥāʾirī, *Djāmiᶜ al-ruwāt*, Ḳumm 1403, ii, 287).

Neither Imāmī nor Sunnī biographical dictionaries and heresiographies of the 3rd/9th century suggest that Maymūn al-Ḳaddāḥ or his son inclined to Shīᶜī extremism or was involved in the sect backing Ismāᶜīl b. Djaᶜfar. The earliest mention of him as a heresiarch is by the Sunnī polemicist Ibn Rizām (writing *ca.* 340/951) who describes him as a Dayṣānī dualist and founder of a sect called the Maymūniyya which backed the heretic Abu 'l-Khaṭṭāb [*q.v.*], teaching the divinity of ᶜAlī. Later anti-Ismāᶜīlī authors greatly elaborated Ibn Rizām's story and added to the catalogue of his heresies. Akhū Muḥsin (writing *ca.* 373/985) calls him Maymūn b. Dayṣān, making him a son of Bardesanes. Ibn Shaddād (d. *ca.* 509/1115) gives him the *kunya* Abū Shākir, evidently identifying him with a Dayṣānī of the time of al-Ṣādiḳ notorious in Imāmī tradition. Muḥammad b. al-Ḥasan al-Daylamī (writing in 707/1307) calls him Maymūn b. Dayṣān al-Ḳaddāḥ al-Ahwāzī al-Fārisī and asserts that he appeared in Kūfa in 176/792 after having been nominally converted to Islam by al-Ṣādiḳ. All these accounts are obviously pure fiction.

Ibn Rizām's story is based, however, on information from Ḳarmaṭī Ismāᶜīlī sources. There is clear evidence of a wide-spread belief among Ismāᶜīlīs in the pre-Fāṭimid and early Fāṭimid age that the leadership after the disappearance of Muḥammad b. Ismāᶜīl b. Djaᶜfar had been transferred to one ᶜAbd Allāh b. Maymūn al-Ḳaddāḥ, who was not of ᶜAlid descent. He and his successors were not *Imāms*, but lieutenants (*khulafāʾ*) of the absent *Imām* pending his return as the Mahdī. Against this, Fāṭimid Ismāᶜīlī tradition maintained that the name Maymūn had been used in the missionary activity for the *Imām* to conceal his identity and that the ancestors of the Fāṭimids, though claiming merely the rank of *ḥudjdjas*, were in fact the *Imāms*.

(W. MADELUNG)

MAYMŪN-DIZ, a castle of the Ismāᶜīlīs [see ISMĀᶜĪLIYYA] in the Alburz Mountains in northwestern Iran, the mediaeval region of Daylam [*q.v.*].

Ras̲h̲īd al-Dīn states that it was built in 490/1097 by the Grand Master of the Assassins Ḥasan-i Sabbāḥ or by his successor Kiyā Buzurg-Ummīd in the early 6th/12th century. D̲j̲uwaynī, tr. Boyle, II, 621-36, cf. M. G. S. Hodgson, *The order of the Assassins*, The Hague 1955, 265 ff., has a detailed account of the fortress's reduction by the Il-K̲h̲ān Hülegü in S̲h̲awwāl 654/November 1256. The Mongols besieged it briefly till it was surrendered by the last Grand Master Rukn al-Dīn K̲h̲ūr-S̲h̲āh, who had latterly resided there with his treasury instead of at Alamūt [*q.v.*]; they then went on to capture the latter fortress.

In expeditions of 1959-61, Willey identified the site as an easily-defensible plateau some 1,500 ft./480 m. by 300 ft./95 m., with extensive caverns and standing buildings, just north of the village of S̲h̲ams-Kilāya in the valley of a right-bank affluent of the Alamūt-Rūd, itself running into the S̲h̲āh-Rūd/Safīd-Rūd river system (*contra* Ivanow's tentative identification of Maymūn-Diz with the modern place Nawīzār-S̲h̲āh).

Willey, *The castles of the Assassins*, London 1963, 158-92 (with plan and photographs); B. Lewis, *The Assassins, a radical sect in Islam*, London 1967, index. See also LANBASAR. (C. E. BOSWORTH)

MAYMŪNA BINT AL-ḤĀRIT̲H̲, the last wife that Muḥammad married. She stemmed from the Hawāzin tribe of ʿĀmir b. Ṣaʿṣaʿa and was a sister-in-law of al-ʿAbbās. After she had divorced her first husband, a T̲h̲aḳafī, and her second, the Kuras̲h̲ī Abū Rukm, had died, she lived as a widow in Mecca where the Prophet wooed her, primarily no doubt for political reasons, on the *ʿumra* allowed to him in the year 7/629. His wish to marry her in Mecca was refused by the Meccans, in order not to prolong his stay there; the marriage therefore took place in Sarif, a village north of Mecca. Her brother-in-law al-ʿAbbās acted as her *walī* or guardian at the ceremony. The question whether the Prophet on this occasion was still in the *iḥrām* or not is a much-disputed and variously-answered question. The bridal gift is said to have been 500 *dirhams*. Married at the age of 27, Maymūna survived the other wives of the Prophet and died in 61/681 in Sarif, where she is said to have been buried on the spot where she was married.

MAYSALŪN, a pass in the Anti-Lebanon Mountains where, on 24 July 1920, the French forces under the command of General Henri Gouraud, recently appointed High Commissioner in Beirut, defeated the forces of King Fayṣal of Syria and proceeded to occupy Damascus and establish the French mandatory authority there.

A son of S̲h̲arīf Ḥusayn of Mecca who, prompted by Britain, had revolted against the Turks and proclaimed himself king of the Arab countries in the Ḥid̲j̲az in 1916, Fayṣal had been allowed by the British to occupy Damascus on 1 October 1918 and establish an Arab régime there as a representative of his father. On 8 March 1920, Fayṣal was proclaimed King of Syria, shortly before the San Remo conference convened in April to assign the territory of Syria and Lebanon as a mandate to France. The French mandatory authority was forthwith established in the Lebanese territory, which had been under French occupation since 1918, and Fayṣal was anxious to negotiate an agreement with Gouraud which would save his Arab régime in Damascus. The French, however, were of a different mind, and as the negotiations between the two sides faltered, Gouraud sent an ultimatum to Damascus, while his forces advanced against the city. Fayṣal's small army, led by his War Minister Yūsuf al-ʿAẓm, a Damascene notable, tried to stop the advance at the Maysalūn pass, but was easily defeated, and al-ʿAẓm was killed in the battle. Thereupon Fayṣal and his government fled Damascus, which was occupied by the French. The British later made him king of ʿIrāḳ.

Modern Arabs regard the battle of Maysalūn as the event that first awakened them to the harsh realities of imperial power politics. The event forms the central theme of a book by Sāṭiʿ al-Ḥuṣarī, a man who served as a minister under Fayṣal in Damascus, called *Yawm Maysalūn* ("The Day of Maysalūn", first published in Beirut in 1947). The village of Maysalūn stands today on the border between Lebanon and Syria, and a monument marks the grave of Yūsuf al-ʿAẓma there. Apart from its modern fame as a battlefield, Maysalūn was known in earlier Islamic times as a horse-post relay station along the Beirut-Damascus highway.

Antonius, *The Arab awakening*, London 1938; see also FAYṢAL I. (KAMAL S. SALIBI)

MAYSĀN, the region along the lower Tigris River in southeastern al-ʿIrāḳ. This region is called Μεσήνη by Strabo, Mēs̲h̲an in the Babylonian Talmud, Mays̲h̲an in Syriac. Mēs̲h̲ān in Middle Persian, Mēs̲h̲un in Armenian, Maysān in Arabic, and T'iao-tche (Chaldaea) in the Han sources. The earliest references from the first century A.D. indicate that Μεσήνη was an ethnic toponym, the land of the people called Μεσηνός who lived along the Arabian side of the coast at the head of the Persian Gulf (Μαισανιτης κολπος in Ptolemy). Whether or not these people were Arabian themselves, some of them lived at Gerrha, and their land was regarded as lying along the ethnic border with Arabs. Arabic has the *nisbas* Maysānī and Maysanānī, the latter from the Persian plural for people.

Ancient Mesene lay between two branches of the lower Tigris, but its exact extent was subject to change and is therefore difficult to determine. Pliny explicitly states that Mesene extended 125 miles up the Tigris above Babylonian Seleucia to the town of Apamea where overflow water from the Euphrates reached the Tigris, that it adjoined Chalonitis (Ḥulwān), and that the branch of the Tigris along its northeastern border traversed the plains of Cauchae (D̲j̲uk̲h̲ā, the Diyāla plains). Whether or not this description was meant to reflect a brief extension of the Characene kingdom, which was known to include Apamea, Pliny seems to indicate that Mesene could be defined hydrographically as the territory irrigated by the combined waters of the Tigris and Euphrates. The Apamea in question, however, tends to be identified with Fam al-Ṣilḥ where the Tigris and Sillas divided. Ammianus Marcellinus, in the 4th century A.D., says that Apamea had been called Mesene formerly, but traces

of a more extensive Maysān survive in the Arabic-writing geographers. Ibn Rustah calls Djabbul, at the Tigris end of two large canals coming from Sūrā, one of the cities of Maysān. Yāḳūt describes the district of Kaskar [*q.v.*] as overlapping Maysān and extending from the lower end of the Nahrawān canal to the sea. To the extent that ancient Mesene was identified with Chaldaea, it bordered on Babylonia in the west and the Chaldaean Lakes in the southwest. To the north it overlapped Djukhū [*q.v.*], which normally lay along the left bank of the Tigris, probably as a result of changes in the course of the river. It extended to Elymais (Khūzistān [*q.v.*]) in the east, but this border was also subject to change. The town of Ḥuwayza (modern Ḥawīza [*q.v.*]) was once part of Maysān, but by the 8th/14th century belonged to Khūzistān.

Politically, ancient Mesene was identical with the Hellenistic kingdom of Characene (*ca.* 129 B.C.—*ca.* 224 A.D.). The region between Babylonia and the Gulf coast had formed an administrative division (but not an eparchy) of the Seleucid state in the 3rd century B.C. called the territory of the Erythraean Sea. Alexander the Great had settled Macedonian veterans at a city called Alexandria which he founded above the confluence of a former course of the lower Karkeh River with the Tigris, 1¼ miles from the coast. After this city was destroyed by floods, Antiochus IV (175-164 B.C.) restored it by 166-165 B.C., called it Antiochia, and put Hyspaosines son of Sagdodonacus, king of the neighbouring Arabs, in charge of it and its territory. The latter became independent between 141 and 139 B.C., and in 129 B.C. built new embankments to protect the flood-damaged city, renaming it Charax Spasinou ("the palisade of Hyspaosines") as the capital of Characene. In 127 B.C. he defeated the Arsacid governor of Babylon and occupied Babylon and Seleucia briefly, but was defeated by Mithradates II in 121 B.C., after which he and his successors continued as rulers of Characene subject to the Parthians.

Charax is transcribed as Karak Āspasinā (KRK ʾSPSNʾ) and identified as Karkā dē Mēshan (KRKʾ DY MYŠN) in Palmyrene inscriptions of the 1st and 2nd centuries. It was called Karkhā dhᵉ Mayshan in Syriac and Karkh Maysān in Arabic. Its site, formerly sought in the vicinity of Muḥammara, has been convincingly identified by Hansman with modern Djabal Khayābir near the left bank of the Shaṭṭ al-ʿArab. By Pliny's time, Charax was 193 km. from the coast although the tide went upstream far beyond it. The left bank of the lower Tigris was inhabited by Chaldaeans, the right bank by Arabian brigands called Attali beyond whom were nomadic Scenitae. T'iao-Tche is described in Han sources as a hot, low, densly populated, rice-growing region with lions, rhinoceroses, zebu, peacocks, ostriches, and clever jugglers. Strabo adds the production of barley, sesame oil, and dates. By the 1st century B.C., Charax was a major commercial centre where Indian ships met caravans from Petra and Palmyra. In the 1st century A.D., caravans from Petra arrived at the town of Forat 11 or 12 miles downstream from Charax. Its site was either near the modern town of al-Tanūma on the left bank of the Shaṭṭ al-ʿArab, or, according to Hansman, at Maghlūb, 17.4 km. (10.8 miles) southeast of Djabal Khayābir. Apologos (al-Ubulla) also appears as an emporium on the right bank of the Shaṭṭ al-ʿArab opposite Forat at ʿAshshār, the modern port of al-Baṣra, in the 1st century. Copper, sandalwood, teak, ebony, spices and gems were imported from Barygaza in Gudjarāt through Apologos, while Characene merchants exported pearls, clothing, wine, purple, dates, gold and slaves. In the winter of 115-16, Trajan occupied Characene briefly, collecting tribute from Attembelos V, after which it returned to Arsacid rule.

In *ca.* 224 Characene fell to Ardashīr I (*ca.* 226-41), the founder of the Sāsānid dynasty, who killed the king of Characene and made his own son, Mihrshāh, ruler of Maysān. Although it is claimed in Arabic literature that Ardashīr refounded Karkh Maysān as Astarābādh Ardashīr, this name has not been found in Sāsānid inscriptions. Under Shāpūr I (*ca.* 241-73), his eldest son, Shāpūr, and the latter's wife, Dēnak, were king and queen of Māshān. A certain Ātrofarnabag is called Mēshān Shāh in Narseh's inscription at Paikuli, and the Babylonian Talmud mentions a governor (*ōstāndār*) of Meshān. However, Shāpūr I is said to have formed a separate district called Shādh Sābūr in northwestern Maysān around the city of Kaskar which had its own *ōstāndār*.

By the 3rd century, the formerly pagan population of Maysān was mixed with Jews, Magians, gnostics and possibly Christians. The priest Kartīr claimed to have established Magians and sacred fires there, and the title of *magōpat* of Mēshān inscribed on a gem indicates the establishment of the priestly hierarchy. Jews of mixed descent were scattered throughout Maysān, and the gnostic, baptist sect called al-Mughtasila located there was joined by Mānī's father. Mānī [see MĀNĪ B. FĀTTIK] grew up in this sect, and Mihrshāh, the governor, was one of his earliest converts and supporters. Whether or not Christianity was carried to Maysān in the 1st century by the apostle Mārī, as legend claims, by the year 310 Pᵉrāth dᵉ Mayshan (al-Furāt) was the see of the metropolitan bishop of Mayshan. By 410 there were suffragan bishoprics at Karkhā dhᵉ Mayshan, Rīmā and Nahrgūr.

Ammianus Marcellinus describes huge groves of date palms extending from Babylon to Mesene and the sea in the 4th century, and reports that Mesene was included in the province of "Assyria" that embraced all of lower Mesopotamia in the middle Sāsānid period. In the 3rd and 4th centuries, Mēshān remained a centre for the import of spices, drugs and gems from India as well as silk and cotton cloth and steel. Kushān coins found in Mēshān also testify to trade with northern India.

Conditions in Maysān were transformed when the lower Tigris began to shift from its former course below Fam al-Ṣilḥ, which had gone via Bādhibīn and ʿAbdasī to al-Madhār. During floods in the reigns of Bahrām V Gūr (420-38), Ḳubādh b. Fīrūz (488-96, 498/9-531), and under Khusraw II in 7/628, the lower Tigris burst its banks and changed its main course to the Dudjayla/Shaṭṭ al-Akhādhar channel (not the Nahr Gharrāf/Shaṭṭ al-Hayy as formerly thought) which went via Kaskar into the swamps (*al-Baṭāʾiḥ* [*q.v.*]). Western Maysān was turned into swamps, northern Maysān and south-eastern Djukhā into desert, and Maysān was reduced to the territory along the former course of the Tigris below al-Madhār called the Blind or One-Eyed Tigris (Didjlat al-ʿAwrāʾ). What remained of Maysān formed the district of Shādh Bahman and was put in the Quarter of the South when the Sāsānid empire was reorganised in the 6th century. Al-Furāt, said to have been refounded as Bahman Ardashīr I, may have become the capital. By extension, Yāḳūt identifies Bahman Ardashīr, Arabicised as Bahmanshīr, also called Furāt al-Baṣra, as the entire district (*kūra*). The Tigris estuary from al-Maftaḥ and al-Ubulla to ʿAbbādān was also called Bahmanshīr by the Persians, accord-

ing to al-Masʿūdī, similar to Bamis̲h̲īr for a branch of the lower Kārūn [q.v.]. Vahman Ardas̲h̲īr is first attested in 544 as the see of the Nestorian metropolitan bishop of Mays̲h̲an. The bishoprics of Rīmā and Kark̲h̲ā d̲h̲ᵉ Mays̲h̲an are last attested in 605, Nᵉhargūr (as Nᵉhargūl) in *ca.* 23-5/644-6, although Fiey has argued for the survival of the latter two under other names. None of the late Sāsānid mint-marks ascribed to al-Furat, Kark̲h̲ Maysān or Maysān is conclusive. The subdivisions of this district at the time of the Muslim conquest were Bahman Ardas̲h̲īr around al-Furāt, Maysān, Dast-i Maysān and Abarḳubād̲h̲.

In Ṣafar 12/633, K̲h̲ālid b. al-Walīd took al-Ubulla, invaded Maysān and defeated Persian forces at al-Mad̲h̲ār. After his victory at Buwayb about two years later, al-Mut̲h̲annā b. Ḥārit̲h̲a also sent forces to Maysān and Dast-i Maysān. The actual conquest was undertaken by ʿUtba b. G̲h̲azwān in 14/635 and the spring of 15/636. ʿUtba defeated and captured the ruler (*ṣāḥib*) of al-Furāt, took al-Ubulla and al-Furāt, conquered Maysān, defeating and killing the *marzubān* [q.v.] at al-Mad̲h̲ār; Abarḳubād̲h̲; and Dast-i Maysān, defeating its *marzubān*. After ʿUtba withdrew to al-Baṣra, al-Mug̲h̲īra b. S̲h̲uʿba [q.v.] pacified Maysān and Abarḳubād̲h̲ again, killing the *marzubān* or *dihḳān*. The captives taken in Maysān included Yasār, the father of al-Ḥasan al-Baṣrī [q.v.], who was taken to the Ḥid̲j̲āz, and Arṭabān, the grandfather of ʿAbd Allāh b. ʿAwn b. Arṭabān, who lived at al-Baṣra. Some captives from Maysān were released at ʿUmar's order. In 18/639 al-Hurmuzān raided Dast-i Maysān and Maysān from K̲h̲ūzistān, taking captive Abraham, Nestorian bishop of Pᵉrāt̲h̲, but was driven out by Abū Mūsā al-As̲h̲ʿarī, the governor of al-Baṣra.

Abū Mūsā is also credited with establishing the Tigris districts (*Kuwar* or *Kūra* Did̲j̲la) along the Did̲j̲lat al-ʿAwrāʾ in S̲h̲ād̲h̲ Bahman/*arḍ* Maysān in 16/637-8, ordering a cadastral survey there and levying taxes according to the degree of productivity. Al-Nuʿman b. ʿAdi collected taxes in the *Kuwar* Did̲j̲la for ʿUmar I, who refused to let him take his wife there. Ḥuṣayn b. Abi 'l-Ḥurr is also said to have been ʿUmar's *ʿāmil* over Maysān until the time of al-Ḥad̲j̲d̲j̲ād̲j̲ [q.v.]. The *k̲h̲arād̲j̲* of the *Kuwar* Did̲j̲la is given as ten million *dirhams* under Muʿāwiya, and as 900 *kurr* of wheat, 4,000 *kurr* of barley and 430,000 *dirhams* by Ḳudāma in 260/874. All four subdistricts (*ṭasāsīd̲j̲*) of Bahman Ardas̲h̲īr, Maysan, Dast-i Maysān and Abarḳubād̲h̲ lay east of the Tigris, although the entire district is said to have extended to al-Marūmat towards Wāsiṭ and to Dayr Mābanat towards K̲h̲ūzistān. Under ʿUmar I, al-Ḥad̲j̲d̲j̲ād̲j̲ b. ʿAtīk al-T̲h̲aḳafī collected the taxes of al-Furāt/Bahman Ardas̲h̲īr, and, in 75/695, Kurāz b. Mālik al-Sulamī held combined authority over al-Ubulla and al-Furāt for al-Ḥad̲j̲d̲j̲ād̲j̲ b. Yūsuf. Although there was clearly a subdistrict (*nāḥiya*) called Maysān in *arḍ* Maysān, the city of Kark̲h̲ Maysān appears to have been replaced by al-Mad̲h̲ār as the most important place by the time of the conquest, and it is often difficult to tell whether unspecified references to Maysān in Islamic times are to this subdistrict, to geographical Maysān, to Kark̲h̲ Maysān or even to Furāt Maysān. In 38/658-9, the Nād̲j̲ī K̲h̲awārid̲j̲ halted at al-Mad̲h̲ār; the K̲h̲awārid̲j̲ under al-Mustawrid b. ʿUllafa fought Kūfan forces there in 43/663-4; and Muṣʿab b. al-Zubayr defeated al-Muk̲h̲tār's army under Aḥmad b. Sumayt al-Nak̲h̲lī there in 67/686. Abarḳubād̲h̲ (also Abazḳubād̲h̲, Īzad̲h̲ḳubād̲h̲, Bazḳubād̲h̲ and Azḳubād̲h̲) with the town of Fasā lay near al-Mad̲h̲ār, although it is easily confused with Barḳubād̲h̲/Arrad̲j̲ān. Dast-i Maysān was the plain (Persian *das̲h̲t*) north and northeast of Maysān. Its capital was Basāmatā (possibly also Basāmī and Bāsāmiyya); it included ʿAbdasī on the old course of the Tigris, eight stages (*sikkas*, 51.5 to 64.4 km.) above al-Mad̲h̲ār and it stretched eastwards to K̲h̲uzistān. In 20/641 ʿUmar I instructed D̲j̲azʾ b. Muʿāwiya, governor of Dast-i Maysān and Manād̲h̲ir (on the border with K̲h̲ūzistān) combined, to kill every magician (*sāḥir*) and sorceress, to separate Magians who were married to close relatives (*d̲h̲ū muḥram*), and to forbid Magians to practice ritual murmuring (*zamzama*). Three sorcerers were killed and D̲j̲azʾ had begun to break up families of Magians and to force them to eat without *zamzama* when ʿUmar wrote telling him to collect *d̲j̲izya* [q.v.] from them instead. ʿĀṣim b. Ḳays al-Sulamī also collected taxes in Manād̲h̲ir under ʿUmar I. The *DS̲h̲T* mint-mark on Arab-Sāsānid coins from 52/672 until 67/686 may stand for Das̲h̲t-i Maysān. Post-reform *dirhams* were struck at al-Furāt from 81/700-1 to 97/715-6, in Maysān from 79/698-9 to 97/715-6, Abarḳubād̲h̲ in 83/702 and 96/714-5 and in Das̲h̲t-i Maysān in 80/699-700, followed by Manād̲h̲ir from 81/700 until 96/714-15. By the 3rd/9th century, al-Ubulla was the administrative centre for the *Kūra* Did̲j̲lat, which may be why Ibn K̲h̲urradād̲h̲bih and Yāḳūt identify Dast-i Maysān with al-Ubulla. The Nestorian metropolitanate of Pᵉrāt̲h̲ dᵉ Mays̲h̲an survived well into the Islamic period, and is first identified as the metropolitanate of al-Baṣra in 174/790. The bishopric of ʿAbdasī, attested in 174/790 and *ca.* 215/830, however, was in the patriarchal see of Bag̲h̲dād.

Some natives of Maysān, such as ʿAnbasa b. Maʿdān, settled in al-Baṣra shortly after its foundation. They were generally called Banu 'l-ʿAmm and settled with the Banū Tamīm. Maysānī origin (accurate only in the broadest sense) was attributed to the family of Ziyād b. Abīhi [q.v.] in a derogatory way by the poets al-Farazdaḳ and Ibn Mufarrig̲h̲. Al-Ak̲h̲ṭal used attribution to Azḳubād̲h̲ as an insult. However, Sahl b. Hārūn [q.v.], a native of Maysān who settled at al-Baṣra and was a secretary for al-Maʾmūn (197-218/813-33), praised the people of Maysān in a kind of feeling of regional *s̲h̲uʿūbiyya* [q.v.]. The Muslim belief that God exiled Iblīs to Maysān after the temptation of Ādam and Ḥawwāʾ (Eve) may have been related to these attitudes.

Early Islamic land reclamation and development around al-Baṣra extended into Maysān. Ziyād granted an estate on the Gulf coast north of the estuary to Ḥumrān b. Abān, who subsequently gave the western part of it to ʿAbbād b. Ḥusayn al-Ḥibatī, after whom the entire estate and the town that grew there came to be called ʿAbbādān, considered as the southeastern limit of Maysān. Under Sulaymān (96-8/715-17), Yazīd b. al-Muhallab reclaimed land from the *Baṭāʾiḥ* in Kaskar and the *Kūra* Did̲j̲lat with imported Indian labour (Zuṭṭ [q.v.]) and at least 4,000 water buffaloes (*d̲j̲awāmīs*). Under al-Ras̲h̲īd (170-93/786-809), the villagers of al-S̲h̲uʿaybiyya in the subdistrict of al-Furāt turned their property, which then became tithe land, over to the caliph's son ʿAlī, and became sharecroppers paying a lower rate than before. A slave of al-Ras̲h̲īd called G̲h̲asīb is also said to have built a fort (*ḥiṣn*) just west of ʿAbbādān at Brīm (modern Brēm ʿAbbādān or ʿAbbādān al-Ḥadīt̲h̲a). East African slaves (Zand̲j̲ [q.v.]) were also imported as labour by the late 1st/7th century. In 70/689-90 and 75/695 they gathered at al-Furāt, and, joined by people from the river harbour, devastated

the countryside. During the great Zandj revolt in the 3rd/9th century, they were again supported or joined by the people of al-Furāt and the villages of Djubbā and Djaʿfariyya. In 254/868 the Zandj invaded Maysān from Khūzistān, took Djaʿfariyya and Ḳaryat al-Yahūd, and attacked al-Madhār unsuccessfully before turning south-east to ʿAbbādān. In 267/880-1 al-Muwaffaḳ, the brother of the caliph al-Muʿtamid (256-79/870-92), established the city of al-Muwaffaḳiyya on the north bank of the Shaṭṭ al-ʿArab facing the Zandj stronghold of al-Mukhtāra, as a military base to pursue the war with them. Al-Muwaffaḳiyya had a treasury, a *masdjid al-djāmiʿ*, and markets, and *dirhams* and *dīnārs* were struck there. A *dīnār* of 270/883 is attested, but al-Muwaffaḳiyya appears to have been abandoned after the fall of al-Mukhtāra in that year. In 287/900 the Ḳarāmiṭa [*q.v.*] ravaged the subdistricts of Maysān.

In spite of such conflicts, in the 4th/10th century ʿAbbādān and al-Madhār were small cities and palm groves extended continuously for over 20 *farāsikh* (241 km.) from ʿAbbādān to ʿAbdasī. A low-grade silk brocade was produced in Maysān; dyed cloth and cushions were exported, and Maysānī clothing was produced at Djabbul. After flowing into the *Baṭāʾiḥ*, Tigris water emptied into the Didjlat al-ʿAwrāʾ via branching channels such as the Nahr Abi ʾl-Asad, the Nahr al-Marʾa (possibly the Bathḳ Shīrīn) in the vicinity of al-Madhār, and the Nahr al-Yahūd. The tide came upstream as far as al-Madhār. Nahr Djūr lay on the old course of the Tigris between ʿAbdasī and Darmakān and may have extended eastwards towards Khūzistān. The Mughtasila (now called Ṣābat al-Baṭāʾiḥ) were still numerous in the swamps and may be the same as the Ṣābian sect [*q.v.*] called al-Kīmāriyyūn that al-Masʿūdī says lived in or near the swamps between Wāsiṭ and al-Baṣra. The Mandaean sect, reputedly formed in Maysān in late Sāsānid or early Islamic times, grew out of this milieu.

Al-Madhār remained locally important. In 329/941 the *amīr* Badjkam [*q.v.*] sent Tūzūn there with an army, where he defeated the forces of Abū ʿAbd Allāh al-Barīdī, while Badjkam himself drove the Kurds from Nahr Djūr. In 331/943 Sayf al-Dawla [*q.v.*] sent Khadjkhadj against the Barīdiyya there. In 409/1018 the Būyid Sulṭān al-Dawla set out from there in pursuit of al-Ḥasan b. Dubays al-Asadī, and when Djalāl al-Dawla's army defeated his rival, Abū Kālīdjār [*q.v.*], there in 421/1030, his partisans took over the town. In about 443/1051, Nāṣir-i Khusraw [*q.v.*] noted that ʿAḳr Maysān (possibly Karkh Maysān) and Mashān were subdistricts of al-Baṣra. Mashān was just above al-Baṣra and was also known as the birthplace, in 446/1054, of the author of the *Maḳāmāt*, al-Ḥarīrī [*q.v.*], who is said to have died at al-Madhār. A noted family of *ḥadīth* transmitters, Abu ʾl-Ḥasan ʿAlī b. Muḥammad b. Aḥmad b. al-Ḥusayn b. ʿUthmān al-Madhārī (516-85/1122-89), a native of Baghdād, and his two brothers, was identified with al-Madhār in the 6th/12th century. In 591/1195 Maysān is called a subdistrict of Khūzistān ruled by Ḳutlugh Īnāndj b. al-Bahlawān.

According to Yāḳūt in the 7th/13th century, the Tigris divided into five main channels below Wāsiṭ: the Nahr Sāsī (possibly an orthographic error for Basāmī), Nahr Gharrāf, Nahr Djaʿfar, Nahr Daḳla and Nahr Maysān (possibly the Nahr Ṭuhyathā according to El-ʿAlī). They reunited near the village of Maṭāra, one day's journey from al-Baṣra, where the Euphrates joined them. Yāḳūt defined the Didjlat al-ʿAwrāʾ as the combined stream from Maṭāra to the Gulf. He describes Maysān as "an extensive district with numerous villages and palm groves between al-Baṣra and Wāsiṭ." Its main town (*madīna*) was Maysān, and its capital (*ḳaṣaba*) was al-Madhār, four days' journey from al-Baṣra. Al-Haṭra, across the river from al-Madhār, was a well-watered village on solid ground with many date palms, fruit trees, and chickens. Below al-Madhār, on the Nahr Maysān, was the small town (*bulayda*) of al-Bazzāz; al-Furāt lay in ruins. The people of al-Madhār were all *ghulāt* Shīʿīs, and a splendid shrine (*mashhad*) there, where ʿAbd Allāh b. ʿAlī b. Abī Ṭālib was buried, was the object of endowments (*wuḳūf*) and votive gifts (*nudhūr*). This shrine is located on a slight rise east of the Tigris, within a river bend, just below modern Ḳalʿat Ṣāliḥ near the ruins of al-Madhār about 48 km. directly north of modern Ḳurna. In March 1927 Streck found a domed tomb there, visible at a great distance, standing in the southern end of an oblong courtyard that was entered through a door in the north wall. A descendant of the *Imām* Mūsā al-Kāẓim [*q.v.*] is also said to be buried at ʿAlī al-Gharbī, on the west bank of the Tigris 100 km. above al-ʿAmāra, and a descendant of al-Ḥusayn b. ʿAlī at ʿAlī al-Sharḳī, about 38 km. away on the east bank. At an undetermined time, most of the people of ʿAbbādān, having been Shāfiʿī, became Shīʿī. According to al-Ḳazwīnī, the people of Maysān district were fanatical (*tughāt*) Shīʿīs. Yāḳūt also describes the tomb of Ezra (al-ʿUzayr) which he visited at the village of Nahr Samura (popularly called Simmara) in *arḍ* Maysān as tended by Jews and as the object of endowments and votive gifts. Modern al-ʿUzayr is a large village on the west bank of the Tigris about 33 km. south of Ḳalʿat Ṣāliḥ.

Abu ʾl-Fidāʾ calls Maysān a small town (*bulayda*) in the lower part of *arḍ* al-Baṣra, but after the 8th/14th century this name passed out of use. Al-ʿAmāra [*q.v.*] was founded in 1277/1860 at a place called al-Awradī from the 10th/16th century onwards. *Ḳanūn* no. 48, in 1969, changed the name of the ʿAmāra Liwāʾ to Maysān.

(M. Streck-[M. Morony])

MAYSARA, a Berber chief of the Maghrib, who rebelled against Arab authority in 122/739-40. He belonged to the tribe of the Maṭghāra/Madghāra and the historians give him the surname of al-Ḥaḳīr "the low-born" because he was of humble origin and had been before his rebellion a water-seller in the market of al-Ḳayrawān.

After the recall of Mūsā b. Nuṣayr [*q.v.*] at the end of the 1st/opening of the 8th century in North Africa, under the influence of Khāridjite propaganda, incited by the Arabs' financial exactions, ʿUmar b. ʿAbd Allāh al-Murādī, governor of Tangier, and a grandson of ʿUḳba b. Nāfiʿ [*q.v.*], Ḥabīb b. Abī ʿUbayda, governor of Sūs, had received orders from the caliphal representative in Egypt and Ifrīḳiya, ʿUbayd Allāh b. al-Ḥabḥāb [*q.v.*], and were inflicting grievous wrongs on the Berbers by treating them, as regards taxation, as a conquered people not converted to Islam, and by taking the fairest of their women to send as slaves to Damascus. The general Ḥabīb having been sent from Sūs with his troops to the conquest of Sicily, his departure was the signal for insurrection. For the first time in Morocco, a movement on a large scale broke out; at its head the Berbers put Maysara al-Maṭgharī, who assumed the title of caliph. With the related tribes of the Miknāsa and Barghawāṭa [*q.v.*], Maysara advanced on Tangier and seized it, killing the governor ʿUmar b. ʿAbd Allāh. The Arabs tried in vain to withstand him; the governor of Spain, ʿUkba b. al-Ḥadjdjādj, received the order to go and relieve the town, and after the defeat of the contingent which he sent, crossed the straits himself; he massacred the Berbers of the region, but was unable to retake Tangier, where Maysara left ʿAbd al-Aʿlā b. Ḥudaydj al-Ifrīḳī and went on to seize the Sūs, whose governor Ismāʿīl b. ʿUbayd Allāh he killed.

However, it was not long before Maysara was deposed from the leadership and killed by his followers. His successor, Khālid b. Ḥamīd/Ḥumayd al-Zanātī, inflicted on the Arabs a bloody defeat on the banks of the Wādī Shalīf (Oued Chélif), a battle which took place at the beginning of 123/740 and was known as "the battle of the noble ones" (*ghazwat al-ashrāf*). It required a great expeditionary force to be prepared in the East to put an end, not however without considerable losses, to this general revolt [see BALDJ and KULTHŪM B. ʿIYĀḌ], which had grave repercussions in Spain, where the Berbers in turn rebelled, and in North Africa, where it provoked an intense movement towards Islamisation.

(E. Lévi-Provençal)

AL-**MAYSIR** (A.), a noun derived from *y-s-r* "to be easy, simple", a root from which derives, by antiphrasis, a qualificative of the left hand, *al-yusrā*, with which the *ḥurḍa* (cf. Hebrew *ḥ-r-ṣ* and Akkadian *ḥarāṣu* "decide, fix, determine"), the equivalent of the *sādin* of the *istiḳsām* [*q.v.*], shot arrows one by one. Hence the term *maysir* could be rendered by "the game of the left-handed", although its present morphological state is inexplicable.

The game consisted of dividing a slaughtered beast into ten parts, for which the game was played: these being the thighs and shins of both fore and rear legs, plus two shoulders. The head and the feet were given back to the butcher and the remaining inferior pieces were added proportionally to the ten parts. The best pieces were called *abdāʾ* or *budūʾ* and the least esteemed were the thighs of the two fore legs, on account of the large number of veins which they contain. The process of the game often required the slaughtering of numerous beasts, generally camels (*djuzur*). In view of the sum total of parts represented by the seven arrows (28), every time that the arrows were drawn, the ten parts were soon exhausted.

Two kinds of arrows were used in this game of chance:

(1) Seven winning arrows (*anṣibāʾ*), each bearing a name and with notches (*farḍ* or *ḥazz*), by which they were identified; and

(2) Three or four white arrows (*ghufl*, *aghfāl*), neither winning nor losing.

The winning arrows were named:

(1) *al-Fadhdh*, "the single (arrow)", bearing one notch and winning or losing a single part (= 1/28).

(2) *al-Tawʾam*, "the twin (arrow)", bearing two notches and winning or losing two parts (= 2/28).

(3) *al-Raķīb*, also called *al-Ḍarīb*, "the (arrow of the) supervisor" of the game or of the "thrower" of the lots, bearing three notches and winning or losing three parts (= 3/28).
(4) *al-Ḥils* or *al-Ḥalis*, "the dressed" or "equipped" or even "strong (arrow)" (cf. Hebrew *ḥ-l-ṣ* and *ḥemeṣ*), bearing four notches and winning or losing four parts (= 4/28).
(5) *al-Nāfis*, "the precious" or "coveted (arrow)" (name sometimes given to the fourth arrow), bearing five notches and winning or losing five parts (= 5/28).
(6) *al-Mufsaḥ*, "the long and flat (arrow)", also called *al-Musbil*, "the elongated (arrow)", bearing six notches and winning or losing six parts (= 6/28).
(7) *al-Muᶜallā*, "the superior (arrow)", also called *al-Mighlaķ*, "the (arrow) that closes", a name also given to every winning arrow, bearing seven notches and winning or losing seven parts.

The white arrows bore no notches and their purpose consisted in slowing (*yuthaķķil*) the game and making it more difficult. They are, in fact, "rivets"; every time that one of them was drawn, it was immediately replaced in the quiver; thus chances for the successive drawing of notched arrows steadily diminished. These were three in number, called:
(1) *al-Safīḥ*, "the profitless (arrow)" (name given to the fourth by al-Liḥyānī, who puts *al-Muṣaddar* in the first place). Considering the root, it seems that the shooter would receive the blood of the victim.
(2) *al-Manīḥ*, "the generous (arrow)", considered to be of good omen; its repeated return to the quiver was a portent of success. The shooter could receive the hide of the victim (cf. *TA*, ii, 234, ll. 21 f.).
(3) *al-Waghd*, "the scoundrel" or "(arrow of) the miser", particularly he who does not take part in the game, afraid of losing; it has the synonym *al-baram*.
(4) Some place a fourth arrow after the first (*TA*) or after the second (al-Liḥyānī, al-Nuwayrī), called *al-Muḍaᶜᶜaf* "the double (arrow)."

The players could not be more than seven in number; when they were fewer than seven, they needed to buy the remaining parts in order for the game to take place. The player who bought these parts was called *al-Tamīm* "he who completes". When he won twice in succession he was called *mutammim*, generously donating his winnings to his entourage, whence the laudatory title of *muthannā 'l-ayādī* applied to him, as well as to the one who purchased the parts which had not been won to give them to the poor. It is to this charitable act that certain commentators attribute the term *manāfiᶜ* "advantages", which the Ķurʾān uses in speaking of *maysir* and of wine (II, 219).

The players of *maysir* were called *al-aysār* (sing. *yasar*), and those who presided over the division of the parts *al-yāsirūn*. The archer, called *al-ḥurḍa*, had his right hand wrapped in a piece of leather or fabric in order to prevent him identifying the arrows by touch. A piece of white fabric, called *al-midjwāl*, was held above his hands and a *raķīb* or "supervisor" stood close beside him, passing him the quiver containing the arrows when the face of the *ḥurḍa* was averted. Having taken it, the latter inserted his left hand (*al-yusrā*) under the *midjwāl*, shook (*yunakkir*) the arrows, revealed them to view (*nahada*) one after the other and handed them to the *raķīb* (for references, see *Bibl.*).

This is the essence of what is known concerning the practice of *maysir*, the details of which had been forgotten by the Bedouins questioned in the first half of the 3rd/9th century by Abū ᶜUbayd al-Ķāsim b. Sallām al-Harawī (d. 223/837) (cf. T. Fahd, *Divination*, 208, n. 2). The reason for this forgetting lies in its prohibition by the Ķurʾān, which, in two instances (II, 219 and V, 90) forbids it together with wine, while acknowledging in both certain "advantages" (*manāfiᶜ*). They are seen, primarily, as a diversion from prayer and, subsequently, a factor of divisiveness and a cause of hostility among the faithful (v, 91). But, being condemned along with *anṣāb* (idols) and *azlām* (divining arrows), they are considered "impure" practices (*ridjs*) belonging to pagan cults (v, 90), and thus it may be supposed that the victims divided up for drawing by lot were originally blood-sacrifices offered to deities.

Bibliography: The present article is an abbreviated form of the analysis of *maysir* presented in T. Fahd, *La divination arabe. Études religieuses, sociologiques et folkloriques sur le milieu natif de l'Islam*, Leiden 1966, 204-13, where the reader will find complete references to the numerous sources and studies used, among which the following are especially worthy of mention: Ibn Ķutayba, *K. al-maysir wa 'l-ķidāḥ*, ed. Muḥibb al-Dīn al-Khaṭīb, Cairo 1342/1923; Nuwayrī, *Nihāyat al-arab*, iii, 114-15 (German tr. and comm. by A. Huber, *Über das "Meisir" genannte Spiel der heidnischen Araber*; Arabic text with Latin translation by Rasmussen, *Additamentum*, 67/61); Zabīdī (author of *TA*), *Nashwat al-irtiyāḥ fī bayān ḥaķīķat al-maysir wa 'l-ķidāḥ*, ed. Landberg, in *Primeurs arabes*, i, 29-38; see also *Divination*, 212, n. 6; Freitag, *Einleitung in das Studium der arabischen Sprache*, Bonn 1861, 170-83; G. Jacob, *Ramaḍān*, Greifswald 1895, 110-13.

(T. Fahd)

MAYSŪN, daughter of the Kalbī chief Baḥdal b. Unayf [*q.v.*], mother of the caliph Yazīd I. We do not know if after her marriage with Muᶜāwiya she retained the Christian religion which had been that of her family and of her tribe. A few verses are attributed to her in which she sighs for the desert and shows very slight attachment for her husband (see Nöldeke, *Delectus*, 25). But the attribution to Maysūn of this fragment of poetry, which is in any case old, has been rightly disputed. She took a great interest in the education of her son Yazīd and accompanied him to the desert of the Kalb where the prince passed a part of his youth; this temporary separation from her husband gave rise to the legend of her repudiation by Muᶜāwiya. She must have died before Yazīd became caliph.

Bibliography: Given in Lammens. *Études sur le règne du calife omaiyade Moᶜâwia I*, in *MFOB*, iii (1906-8), 286-7, 305, 312-14. (H. Lammens)

MAYSŪR [see MAHISUR].

MAYTA (A.), feminine of *mayt*, dead (used of irrational beings); as a substantive it means an animal that has died in any way other than by slaughter. In later terminology, the word means firstly an animal that has not been slain in the ritually prescribed fashion, the flesh of which therefore cannot be eaten, and secondly all parts of animals whose flesh cannot be eaten, whether because not properly slaughtered or as a result of a general prohibition against eating them.

In addition to sūra XXXVI, 33, where *mayta* appears as an adjective, the word occurs in the following passages in the Ķurʾān in the first of these meanings: XXI, 116: "He has forbidden you *mayta*, blood, pork and that over which another than Allāh has been invoked; if however anyone is forced [to eat these] without wishing to transgress or sin, Allāh is merciful and indulgent" (from the third Meccan period, since VI, 119 may refer to this context and the appearance of the same exception for cases of coercion in VI, 146

(cf. below) is then only easily explained in view of the whole trend of the passage, if there were an earlier passage, namely XVI, 116, in which it was given full justification; cf. Nöldeke-Schwally, *Geschichte des Qorāns*, i, 146-7; Grimme, *Mohammed*, ii, 26, transfers the whole sūra to the later Meccan period); VI,140, 146: "They have said: 'What is in the womb of this cattle belongs to the males, and is forbidden to our females'; but if it is *mayta* (stillborn), all have a share in it ... Say: I find in what is revealed to me nothing forbidden, which must not be eaten, except it be *mayta* or congealed blood or pork—for this is filth—or a slaughter at which another than Allāh is invoked, but if anyone is forced [to eat it] without wishing to commit a transgression or sin, thy heart is merciful and indulgent" (of the third Meccan period; cf. Nöldeke-Schwally, i, 161; Grimme, ii, 26); II, 168: "He has forbidden you *mayta*, blood, pork and that over which another than Allāh is invoked but if anyone is forced [to eat it] without wishing to commit a sin or transgression, it is not reckoned as a sin against him; Allāh is merciful and indulgent" (from the year 2 of the *hidjra*, before the battle of Badr; cf. Nöldeke-Schwally, i, 178; Grimme, ii, 27): vv. 4-5: "Forbidden to you is *mayta*, blood, pork, that over which another than Allāh is invoked, and that which has been strangled, killed by a blow or a fall, or by the horns [of another beast], that which has been eaten by wild beasts—with the exception of what is made pure—and that which has been sacrified to idols ... But if anyone in [his] hunger is forced to eat of them without wishing to commit a sin, Allāh is merciful and indulgent" (in all probability revealed after the valedictory pilgrimage of the year 10; cf. Nöldeke-Schwally, i, 227-8; Grimme, ii, 28, dates the sūra to the year 7).

It is quite evident from sūra, XI, 140, that the *mayta* was of some significance for the Meccans in the many laws about food with which Arab paganism was acquainted (cf. Wellhausen, *Reste arabischen Heidentums*², 168 ff.). Although it is no longer possible to define exactly the part it played (even the statements recorded by al-Ṭabarī from the earliest interpreters of this passage, which moreover only refers to a detail, reveal the complete disappearance of any reliable tradition), it may be assumed without misgiving that the Ḳurʾānic prohibition contained a corresponding pre-Islamic prohibition, although it perhaps modified it. Both go back to the religious reluctance to consume the blood of animals, and indeed in all the Ḳurʾān passages quoted, blood is mentioned alongside of *mayta*. It is unnecessary to assume that Muḥammad was influenced by Judaism on this point, and the suggestion may be rejected especially as the prohibition in its stereotyped form occurs again in sūra II, 168, just at the time of vigorous reaction against Judaism, and in sūra VI, 147 (Medinan, a late insertion) which contrasts the prohibition of *mayta*, etc., with the Jewish laws relating to food. The meaning of *mayta* is explained in the latest passage dealing with it, v. 4: in the second half of the verse the principal kinds of *mayta* are given (with the exception of the animal that dies of disease), which had already been mentioned in general terms; the commentators were thus able to interpret the single cases given as examples wrongly as being different from the *mayta* proper. The purification (in the Ḳurʾān only mentioned in this passage) must mean ritual slaughter, by which, even if done at the last moment, the animal does not become *mayta* but can be eaten.

These prescriptions of the Ḳurʾān are further developed in the traditions. According to the latter, it is forbidden to trade in *mayta* or, more accurately, its edible parts; some traditions (mainly on the authority of Aḥmad b. Ḥanbal) even forbid any use being made of all that comes from *mayta*; others again expressly permit the use of hides of *mayta*. An exception from the prohibition of *mayta* is made in the cases of fish and locusts; these are in general considered as the two kinds of *mayta* that are permitted, i.e. no ritual slaughter is demanded in their case (because they have no "blood", cf. above). While some traditions, extending this permission by the earliest *ḳiyās*, say that all creatures of the sea, not only fishes, can be eaten without ritual slaughter, including even seafowl (in this case it is said that "the sea has performed the ritual slaughter"), others limit the permission to those animals and fishes which the sea casts up on the land or the tide leaves behind, in contrast to those which swim about on the water. But there is also quoted a saying of Abū Bakr expressly declaring what swims on the surface to be permitted. In this connection, we have the story of a monster cast up by the sea (sometimes described as a fish) which fed a Muslim army under the leadership of Abū ʿUbayda when they were in dire straits; but in this tradition and in the interpretation that has been given it (that they only ate of it out of hunger i.e. took advantage of the Ḳurʾānic permission for cases of need) is clearly reflected the uncertainty that prevailed about such questions which were on the border line. In the traditions, we find it first laid down that portions cut out of living animals are also considered *mayta*. The way is at least paved for the declaration that all forbidden animal-dishes are *mayta*. The regulations found in the Ḳurʾān appear again here, e.g. the permission to eat *mayta* in case of need and to slay properly dying animals at the moment to prevent them becoming *mayta*.

Some traditions handed down through Ḥammād from Ibrāhīm al-Na<u>kh</u>aʿī bring us to a somewhat late period (in the *Kitāb al-Ā<u>th</u>ār*): one says that of the creatures of the sea, only fishes can be eaten; another, which is found in two versions, limits the permission to what is thrown up by the sea or left behind by the tide; ritual slaughter is not demanded in this case. The question whether the embryo of a slaughtered dam requires a special purification, i.e. ritual slaughter, is raised in one tradition and decided in the affirmative.

The most important regulations of Muslim law about *mayta*, which express the last stage of development, are as follows. It is unanimously agreed that *mayta* in the legal sense is impure and "forbidden" (*ḥarām*), i.e. cannot be eaten, and also that fish are exceptions to this; the Mālikīs and Ḥanbalīs also except the majority of creatures of the sea, and according to the more correct <u>Sh</u>āfiʿī view, this applies to all marine creatures (the Ḥanbalīs here hold the opinion of Ibrāhīm al-Na<u>kh</u>aʿī, except that the two ideas of "thrown up" and "swimming on the surface" are later overlaid and destroyed by the to some extent synonymous phrase "slain by another cause", "died of itself"). The edible parts of *mayta* are also *mayta*, as are the bones, hair etc. among the <u>Sh</u>āfiʿīs, but not the Ḥanafīs, and among the Mālikīs only the bones; the hide, when tanned, is considered pure and may be used. Emergency slaughter (*<u>dh</u>akāt* or *ta<u>dh</u>kiya*; ritual slaughter in general is *<u>dh</u>abḥ* or *naḥr*) is, according to the Ḥanafīs and the better-known view of the <u>Sh</u>āfiʿīs (also according to al-Zuhrī), permitted, even if the animal will certainly die, provided it still shows signs of life at the moment of slaughter. According to the view predominant among the Mālikīs, such slaughter is not valid and the animal becomes *mayta* (in contrast to Mālik's own view). The question of the

embryo (cf. above) is answered in the affirmative by the Ḥanafīs, following Ibrāhīm al-Nakhaʿī and Abū Ḥanīfa (al-Shaybānī himself held the Mālikī view, to be mentioned immediately below) but in the negative by the Mālikīs and Shāfiʿīs (in this case, it is said that "the ritual slaughter of the dam is also the ritual slaughter of the embryo"), except that the Mālikīs made it a condition that the embryo should be fully developed (Mālik himself also demanded its slaughter "to draw the blood from it" in the case where the embryo had been dropped). That anyone who is forced to eat *mayta* may do so, is the unanimous opinion; only on the questions whether one is bound to eat *mayta* to save his life, whether he should satisfy his hunger completely, or only eat the minimum to keep life alive, etc., is there a difference of opinion. The Shāfiʿīs and Ḥanbalīs further demand that one should not have been brought to these straits through illegal action (a different interpretation of the Ḳurʾānic regulations).

A clear definition of *mayta* and its distinction from other kinds of forbidden animal foods was never reached. Sometimes it is separated on the authority of the Ḳurʾānic passage itself from its own four subdivions given in sūra V. Sometimes its validity is extended over extensive allied fields. As is evident from the *fiḳh* books, this terminological uncertainty has not infrequently caused still further confusion in the discussion of differences of opinion.

MAYŪRḲA, Majorca or Mallorca, name of the largest (*umm*) of the Balearic islands (or eastern islands of al-Andalus: *al-djazāʾir al-sharḳiyya*), the others being Minūrḳa (Minorca or Menorca) and Yābisa (Ibiza). Its name figures as early as the *Crónica del Moro Rasis*, ed. D. Catalán, 13. At approximately the same distance from Ibiza to the west and from Minorca to the east, it is situated four days' sailing time from Sardinia (Sardāniya) according to al-Idrīsī (*Maghrib*, text 214, tr. 266) and lies opposite Bougie (al-Ḥimyarī, *al-Rawḍ al-miʿṭār*, text 188-91, tr. 228-31). Al-Ḥimyarī, Ibn Saʿīd (*Mughrib*, ii, 466) and al-Zuhrī (*K. al-Djaʿrāfiya*, 177-9) differ as to the terrain of the island. According to the testimony of this last-named author in particular, and according to the data supplied by Christian sources following the Catalan-Aragonese conquest of the 13th century, the island, which enjoyed a fine climate, was fertile and possessed abundant resources, especially cereals, fruits, trees, pack-animals, sheep and cattle, horses and mules, a few goats, and also, for hunting, hares, rabbits and foxes. Cotton and flax were cultivated there, but silk was an imported commodity (Ibn Saʿīd, in E. Fagnan, *Extraits inédits*, 23, 24). Curiously there is no mention of the olive and the raisin, but their existence cannot be doubted, nor that of the fig; cultivation of these products, of little significance during the Islamic occupation, was developed subsequently. A Flemish document of the 13th century mentions rice as one of the principal commodities exported from Majorca to Flanders, but there is no evidence for the cultivation of this product in the Islamic period. From the work of al-Zuhrī (178) and from other sources, it appears that the town and the island were endowed with a good defensive system and substantial buildings.

Nothing is known of the situation of Majorca and its dependencies at the time of the first Arab incursions into the western Mediterranean. It may reasonably be assumed that it comprised a population which was at first Romanised, later Christianised, of Hispano-Roman descent, and possibly some Jews. In the *K. al-Imāma wa 'l-siyāsa* (ed. Ṭ.M. al-Zaynī, n. p., n.d., i, 73), in the *Annales* of Ibn al-Athīr (33), the *Mughrib* of Ibn Saʿīd (ii, 466) and the *Analectes* of al-Maḳḳarī (i, 177), there is mention of a first incursion carried out in 89/707-8, from the direction of Ifrīḳiya, by the son of Mūsā b. Nuṣayr, ʿAbd Allāh, who—according to one of these sources—was the *fātiḥ Mayūrḳa*, who captured its king (*malik*) and who took possession of a rich store of booty. Other sources, including Ibn ʿIdhārī (*Bayān*, ii, text 89, tr. 145), who speaks of a state of revolt and of a refusal to pay the levies due for the years 234 and 235/846-50, give the impression that, subjected to a treaty and required to pay the *djizya* and possibly other contributions, the Majorcans refused on more than one occasion and lived for a considerable period of time in a state of more or less nominal independence until the conquest of the island in the time of the *amīr* Muḥammad I (al-Zuhrī, 178) or until the arrival, in 290/902-3, of ʿIṣām al-Khawlānī who contributed to the Islamisation of the island by constructing hostelries, baths and mosques (Ibn Khaldūn, *ʿIbar*, iv, 164), all this after the island had suffered, in 255/869, the devastating effects of a Norman invasion. Majorca was a constant source of difficulties for the Cordovan administration, to such an extent that in 336/947-8 al-Nāṣir was obliged to send his *kātib* Djaʿfar b. ʿUthmān al-Muṣḥafī to restore order there (*Bayān*, ii, text 215, tr. 356). In the 5th/11th century, there begins a new period in the history of Majorca. Annexed to the kingdom of Mudjāhid [*q.v.*] of Denia (see Clelia Sarnelli Cerqua, *Mudjāhid al-ʿĀmirī ḳāʾid al-usṭūl al-ʿarabī fī gharbī al-baḥr al-mutawassiṭ*, Cairo 1961), the islands became the centre of intense piratical activity. After the disappearance of ʿAlī b. Mudjāhid and the incorporation of Denia, in 468/1076, into the kingdom of the Banū Hūd [*q.v.*] of Saragossa (Afif Turk, *El reino de Zaragoza en el siglo XI de Cristo* (*V de la Hégira*), Madrid 1978, 109-14), there followed, from 480 to 508/1087-1115, some obscure years of independence during which the islands, having undergone a devastating attack on the part of the Pisans and the Catalans, were occupied by the Almoravids. The rule of the latter, continued, after their collapse and their disappearance from the Iberian peninsula and North Africa, with the dynasty of the Banū Ghāniya [*q.v.*] until the occupation of the island by the Almohads in 599/1202-3 (see especially al-Ḥimyarī, *al-Rawḍ al-miʿṭār*, text 189-91, tr. 228-31). The reign of the Almohads represents a period of obscurity which lasted until the year 627/1229 when James I of Aragon put an end to Islamic domination; the last centre of resistance were crushed in Rabīʿ I 628/January-February 1231.

Majorca was Islamised and Arabised from the 4th to the 6th century/10th to the 12th, and under the Almoravids and the Almohads its ethnic composition became increasingly Berberised, a factor which has left visible traces in the toponomy of the Baleares (M. Barcelo, *De toponimia tribal i clànica berber a les illes orientals d'al-Andalus*, Societat Onomàstica, Buttletí interior, vii Colloqui Mallorca, April 1982, 426; A. Poveda Sánchez, *Introductión al estudio de la toponimia árabe-musulmana de Mayūrqa, según la documentación de los archivos de la ciutat de Mallorca (1232-1276)*, in *Awrāq*, iii [1980], 76-100). Majorca displayed, especially from the 5th to the 7th/11th-13th centuries, an intensive cultural activity (D. Urvoy, *La vie intellectuelle et*

spirituelle dans les Baléares musulmanes, in *And.*, xxxvii [1972], 87-132). The other islands were also conquered by the Catalan-Aragonese: Ibiza in 632/1235 and Minorca in 686/1287.

Bibliography: Besides the works mentioned, see Guillem Roselló Bordoy, *L'Islam a les Illes Balears*, Palma, Majorca 1968, which contains fuller references to the Arabic sources and puts into context the information supplied by the classic work of Alvaro Campaner y Fuertes, *Bosquejo histórico de la dominación islamita en las Islas Baleares*, Palma 1888. Also see the works of Miquel Barcelo (extensive bibliography), A. Poveda Sánchez and Richard Soto, author *inter alia* of *Quan Mallorca era Mayúrqa*, in *L'Avenç*, xvi (May 1979), 25-33 and of *Mesquites urbanes i mesquites rurales a Mayūrqa*, in *Butlletí de la Soc. arqueològica Luliana*, any xcv (1979), no. xxxvii, 114-35. (J. Bosch Vilá)

al-**MAYURḲĪ**, the *nisba* of several persons originally from Majorca (Mayurḳa [*q.v.*]) or residents of the island. In his *Muʿdjam al-buldān*, iv, 720-3, s.v. Mayurḳa, Yāḳūt mentions a certain number.

In addition to al-Ḥumaydī [*q.v.*], the best-known person with this last *nisba*, one should mention the name of Abu 'l-Ḥasan ʿAlī b. Aḥmad b. ʿAbd al-ʿAzīz b. Ṭunayz, who seems to have led quite a lively existence. According to Yāḳūt, iv, 722-3, he was a good grammarian (cf. al-Suyūṭī, *Bughya*, 327) who was also concerned with the Ḳurʾān readings; he naturally collected *ḥadīth*s at Damascus, Baṣra and elsewhere. He is said to have gone to ʿUmān and the land of the Zandj, where he stayed for some time before returning to die at Kāẓimayn, near Baghdād (rather than at Baṣra, in Yāḳut's second version) in *ca.* 475/1082. Two verses by him are cited by Yāḳūt and al-Suyūṭī, but others are preserved in the Escurial ms. 467/2 (Derenbourg). See Brockelmann, S I, 479.

Another Mayurḳī worthy of notice is a Christian convert to Islam, Fray Anselmo Turmeda, better known under the name of ʿAbd Allāh al-Tardjumān [see al-tardjumān].

(Ed.)

MAYY ZIYĀDA, pen name of Mārī Ilyās Ziyāda, pioneer writer of poetry in prose, essayist, orator and journalist in Arabic, French and English; translator from several European languages; and a zealous feminist who defended the case of Arab women's education and freedom.

Born in Nazareth on 11 February 1886 to a Lebanese Christian father who worked as a teacher and journalist, and a Galilee mother from a village near Nazareth, Mayy received a French education at St. Joseph's School in Nazareth (1892-9), in ʿAyntūra in Lebanon (1900-4), and at the Lazarist Nuns in Beirut (1904-8). In 1908 her parents emigrated to Cairo, where her father was appointed as the editor of the journal *al-Maḥrūsa*. Her first literary work was a booklet of a collection of romantic poems and poems in prose in French, influenced by Lamartine and dedicated to him, entitled *Fleurs de rêve* (Cairo 1911). It was published under the pseudonym of Isis Copia. Djamīl Djabr translated it into Arabic as *Azāhir ḥulm* (Beirut 1952).

In Egypt she studied various European languages and European romantic poets and writers, and became interested in European feminist activities. She also came under the influence of Arabic Islamic culture, especially through Luṭfī al-Sayyid [*q.v.*]. She published in *al-Maḥrūsa* novels by European writers which she translated into Arabic, and later these were published in book form. Some of these were from the French: Brada's novel *Le retour du flot*, which she entitled *Rudjūʿ al-mawdja* (1925); a novel by Sir Arthur Conan Doyle, *The Refugees*, which she entitled *al-Ḥubb fi 'l-ʿadhāb* (1925) and from German the novel *Deutsche Liebe* by F. Max Müller under the title *Ibtisāmāt wa-dumūʿ* (Cairo 1911).

In 1916 she joined the Egyptian University (*al-Djāmiʿa al-Miṣriyya*), where she studied literature and philosophy. She also collected her social essays which were published in *al-Mahrūsa* and other Arabic journals under the title *Sawāniḥ fatāt* (Cairo 1922). She took an active part in the social and cultural life in Lebanon and Egypt by lecturing at mixed meetings of men and women in various clubs and societies such as Fatāt Miṣr, where she lectured on *Ghāyat al-ḥayāt* (Cairo 1921). She published articles in various journals—in Arabic, *al-Maḥrūsa*, *al-Muḳtaṭaf*, *al-Hilāl*, *al-Ahrām*, and *al-Siyāsa al-Usbūʿiyya*; in French, *Sphynx*, *Le Progrès Égyptien*; and in English, *The Egyptian Mail*—on various cultural subjects such as Arabic language and literature, Arab and Eastern women and the awakening of the Eastern nations such as the Turkish and the Japanese. She defended the "spiritualism of the East" as opposed to the materialism of the West, but condemned the poverty, illiteracy and illness which prevailed in the East. Her lectures were collected in her book *Kalimāt wa-ishārāt*, (Cairo 1922). Her articles on French and Arab personalities she collected in her book *al-Ṣaḥāʾif* (Cairo 1924), and on Arabic language and literature in *Bayn al-djazr wa 'l-madd* (Cairo 1924). Her collection of romantic and lyrical poetry-in-prose (*shiʿr manthūr*) influenced by Khalīl Djabrān [*q.v.*] she published in her book *Ẓulumāt wa-ashiʿʿa* (Cairo 1923) in which she expressed her pantheism.

In her essays she called for brotherhood, justice, mercy and secular humanism. Yet Mayy did not believe in equality in society. She expressed her ideas on aristocracy, slavery, passive and revolutionary socialism, democracy, anarchism and nihilism in her book *al-Musāwāt* (Cairo 1922), where she ended her discussion with a play emphasising that equality in society is impossible.

In various works, Mayy extolled the literary achievements of her contemporary Arab pioneer poetesses and writers such as in *Bāḥithat al-Bādiya* (pseudonym of Malak Ḥifnī Nāṣif [*q.v.*]) (Cairo 1920), *Warda al-Yāzidjī* (Cairo 1924), and *ʿĀʾisha al-Taymūriyya*, published in serial form in *al-Muḳtaṭaf* (1923-5) and in book form in 1956.

French literary and cultural life made a great impression on Mayy. She styled her weekly salon according to Mme de Rambouillet. Her circle, which exercised deep influence on Egyptian literary and cultural life, included eminent Egyptian and Syro-Lebanese men and women of the pen such as Malak Ḥifnī Nāṣif and Hudā Shaʿrāwī, the poets Ismāʿīl Ṣabrī, Aḥmad Shawḳī, Ḥāfiẓ Ibrāhīm, Muṣṭafā Ṣādiḳ al-Rāfiʿī, Walī al-Dīn Yagan and Khalīl Muṭrān, and writers such as Luṭfī al-Sayyid, Shiblī Shumayyil, Muṣṭafā ʿAbd al-Rāziḳ, Salīm Sarkīs, Salāma Mūsā, Yaʿḳūb Ṣarrūf, Ṭāhā Ḥusayn and ʿAbbās Maḥmūd al-ʿAḳḳād. In her salon, literary and cultural questions, and philosophical and scientific trends, were

discussed and poems were read. Many writers said that some of these personalities were in love with Mayy; yet it is agreed that her great love was D̲j̲abrān whom, though she corresponded with him, she never met in person.

Mme de Sévigné was her example for literary correspondence. Beside D̲j̲abrān and the attendants of her salon, she corresponded also with Salmā Ṣāyig̲h̲ and Amīn al-Rīḥānī. Some of these letters were collected and published by the Lebanese D̲j̲amīl D̲j̲abr in his book *Mayy wa-D̲j̲abrān* (Beirut 1950), *Rasāʾil Mayy* (2nd ed. Beirut 1954) and by Ṭāhir al-Ṭunnāḥī in *Aṭyāf min ḥayāt Mayy* (Cairo 1974). A common fault among Arab writers is that they have looked at *Rasāʾil Mayy* (1948) by Madeleine Arḳas̲h̲ as a collection of Mayy Ziyāda's genuine letters while, in fact, these are imaginary letters giving advice to women on problems of life.

Mayy's style is influenced by Christian Arabic liturgical literature and the French Romantics. She treats her subjects emotionally and metaphorically, loading them with allusions to French and Arabic history and culture.

The deaths of her father in 1930, of D̲j̲abrān in 1931 and of her mother in 1932 made her feel lonely and deserted. Her journeys to France and England in 1932 and then to Rome did not release her from her melancholy. In 1935 her relatives suspected her of neurasthenia and hysteria; they lured her back to Lebanon and she was put into a mental hospital for nine months. The Lebanese journal *al-Maks̲h̲ūf* defended her case with the help of her friends Amīn al-Rīḥānī, Charles Mālik and Ḳusṭanṭīn Zurayḳ and Prince ʿAbd al-Ḳādir al-D̲j̲azāʾirī, and she was released from hospital. Two years later she returned to Cairo, where she died on 19 October 1941. In 1975 Muʾassasat Nawfal in Beirut published all Mayy's works and translations, twelve in number.

(S. Moreh)

MAYYĀFĀRIĶĪN, a town in the northeast of Diyār Bakr [*q.v.*]. The other Islamic forms of the name are Māfārḳīn, Mafārḳīn, Fārḳīn (whence the name of origin al-Fāriḳī), etc. The town is called in Greek Martyropolis, in Syriac Mīpherḳēt, in Armenian Nphkert (later Muharkin, Muphargin). According to Yāḳūt, iv, 702, the old name of the town was Madūr-ṣālā (read *ḳāla* < **matur-khalakh* in Armenian, "town of the martyrs"). On the identification of Tigranocerta with Mayyāfāriḳīn, see below.

1. *Topography and early history.*

Geography. The town lies to the south of the little range of the Ḥazrō which rises like the first tier of the amphitheatre of the mountains, the higher parts of which consist of the summits (Darkōs̲h̲, Antok) rising to the south of Mūs̲h̲ and separating the course of the eastern Euphrates (Murād čay) from those of the Tigris and its left-bank tributaries.

Mayyāfāriḳīn lies 25 miles north of the Tigris and 12 west of the Baṭmān-Ṣū. It is watered by a little river (now called the Fārḳīn-Ṣū) which flows into the Baṭmān-Ṣū 12 miles to the southeast, an important left-bank tributary of the Tigris which drains the wild and mountainous country south of Mūs̲h̲ (the cantons of Ḳulp and Sāṣūn). The old names of the Baṭmān-Ṣū are Nicephorius (Roman period), Nymphios (Byzantine period), Syriac Kallat̲h̲, Arabic Sātīdamā (a word of Aramaic origin transcribed S̲h̲ithithma in Armenian and explained as "drinker of blood"; Armenian *Geography* of the 7th century = Marquart, *Ērānšahr*, 161), Armenian Khalirt and perhaps Mamus̲h̲el (Faustus of Byzantium). Some of these identifications, as we shall see, are still uncertain.

Mayyāfāriḳīn is the meeting-place of a number of roads from the north following the different streams which go to form the Baṭmān-Ṣū: 1. Čabak̲h̲d̲j̲ūr (on the Murād čay) — D̲h̲u 'l-Ḳarnayn — Līd̲j̲e — Bos̲h̲āt — Mayyāfāriḳīn; 2. Mūs̲h̲ — Ḳulp — Pāsūr — Mayyāfāriḳīn; 3. Mūs̲h̲ — K̲h̲oyt — Tingirt (= Ṣāsūn) — Mayyāfāriḳīn. Routes 3 and 4 passing Ṣāṣūn are still little known. The distance between Diyārbakr and Mayyāfāriḳīn is about 45 miles. The old road Diyārbakr — Bitlīs, which used to run through Mayyāfāriḳīn, now runs farther south and crosses the Baṭmān-Ṣū south of Almadīn (Diyārbakr — Sinān — Zok — Weisiḳaranī — Bitlīs).

Mayyāfāriḳīn has thus lost the advantage of being a stage on the road between Armenia and upper Mesopotamia. Since 1260 it has no longer been a political centre around which gravitated the interests of the surrounding country. It retains only its importance as a market for the produce of the mountainous and pastoral country drained by the Baṭmān-Ṣū.

Ancient history. The mountains to the north of Mayyāfāriḳīn have long sheltered the remnants of ancient aboriginal peoples. About 600 A.D., Georgius Cyprius (ed. Gelzer, 48), mentions the Χοθαῖται and Σανασουνῖται there who gave their names to the districts of K̲h̲oyt and Ṣāṣūn. Marquart (1916) supposes there are elements of the aboriginal language in names like *M-īpher-ḳēt and *Ma-mus̲h̲el(i) which are, he says, formed with Caucasian ("südkaukasisch"?) prefixes. According to tradition (Yāḳūt, iv, 703), the founder of Martyropolis, Marūt̲h̲ā b. Layūṭā, was the son of a woman on the mountains, and Marquart sees in Layūṭā a mutilated form of the name of the people Urṭā(n) < Urarṭu (*Handes Amsorya* [1915], 96; [1916], 126). The Marwānid Abū Naṣr (see section 2. below) was married to the daughter of Sank̲h̲arīb, lord of the Sanāsuna; cf. Amedroz, in *JRAS* (1903).

Lehmann-Haupt thought that he could recognise at Mayyāfāriḳīn traces of an ancient Assyrian settlement, "eine von Haus aus assyrische Anlage" (*Armenien*, i, 396, 398).

Tigranocerta = Mayyāfāriḳīn (?). As early as 1838, von Moltke had suggested that Mayyāfāriḳīn was the ancient Tigranocerta, i.e. the new capital founded by Tigranes II about 80 B.C., which was taken by Lucullus after the victory won on the banks of the Nicephorius (6 Oct. 69 B.C.) and again in the reign of Nero by the legate Corbulo (*ca.* 63 A.D.); it is regularly mentioned down to the middle of the 4th century A.D. Other scholars had sought Tigranocerta at Siʿirt (d'Anville), Arzan (H. Kiepert, 1873), near Kefr-D̲j̲ōz (Kiepert 1875), at Tell-Armen west of

Niṣībīn (E. Sachau; cf. DUNAYSĪR), etc. Late Armenian tradition gives the name Tigranocerta to Diyārbakr. Moltke's idea was taken up vigorously by Lehmann-Haupt and W. Belck after their expedition to Armenia in 1898-9.

On the north wall of Mayyāfāriķīn is a multilated Greek inscription. It was deciphered and published by Lehmann-Haupt, who attributes it to the Armenian King Pap (369-74), which is quite in keeping with the known facts of the reign of this monarch. In spite of his criticism of the details of Lehmann-Haupt's hypothesis, Marquart (1916) has rather corroborated him by bringing forward new considerations.

In view of the many contradictions found in the classical sources regarding Tigranocerta, the question comes to be, if Mayyāfāriķīn is not Tigranocerta, what other unknown town existed here in the time of Pap, unless the stones on which the inscription is engraved and which are now hopelessly dissarranged ("in heilloser Verwirrung") were brought from another place when Martyropolis was being built?

The main objection to the identification of Tigranocerta with Mayyāfāriķīn is that, according to Eutropius, vi, 9, 1 and Faustus, v, 24, Tigranocerta was in Arzanene (Ałdznikh); on the other hand, the river Mamus̲h̲eł seems to have formed in the 4th century the western frontier of this latter province. From this fact (Hübschmann, *Die altarmen. Ortsnamen*, *Indogerm. Forsch.*, Leipzig 1904, 473-5), it seems that Tigranocerta ought to be placed east of the Baṭmān-Ṣū if this river is identical with the Mamus̲h̲eł. This last name was connected by Marquart with the name al-Musūliyāt, which al-Muķaddasī, 144, gives to one of the tributaries of the Tigris (on the left bank) and apparently corresponding to the Baṭmān-Ṣū. (A district of Musūliya (?) still exists farther east on the upper course of the Bidlīs čay, in the area of the ancient possessions of the Baṭrīķ Mus̲h̲ālīķ; cf. Kisrawī, in Yāķūt, ii, 551-2.)

To reconcile the statements of Faustus, iv, 24, 27, with the position of Mayyāfāriķīn (12 miles west of the Baṭmān-Ṣū), Marquart proposes to identify the Mamus̲h̲eł = Nicephorius with the Fārķīn-Ṣū, while the Musūliyāt would be applied to the whole system of the Baṭmān-Ṣū (Nymphios, Sātīdamā, etc.). The insignificance of the Fārķīn-Ṣū, which rises in the hills about 3 miles north of Mayyāfāriķīn (Ibn al-Azraķ calls its source Raʾs al-ʿAyn; the *D̲j̲ihān-numā*, 437, ʿAyn al-Ḥawḍ) and does not suit the description of the hermitage of Mambrē, which, according to Faustus, must have been on the right bank, makes Marquart's hypothesis less attractive. If finally we consider the position of Mayyāfāriķīn from the point of view of the interests of Tigranes, one is forced to admit that against an enemy coming from the west (Lucullus!) Tigranocerta = Mayyāfāriķīn was devoid of natural defences, while in the event of an enemy coming from the east it ran the risk of being easily cut off from Armenia on the main road from Bitlīs (the ancient Κλεισοῦρα Βαλαλείσων, cf. Tomaschek, *Sasun* in *SBAW Wien* [Vienna 1895], 8). On the other hand, Mayyāfāriķīn from its position later played an important part in the defensive system of the Byzantine empire.

In these circumstances and before a more detailed study has been made on the spot, it is a mistake to think that all the difficulties in the identification of Tigranocerta have been cleared up.

Mayyāfāriķīn = Martyropolis. The identity of these two towns is quite certain. The Christian sources (Syriac, Armenian and Greek) referring to the foundation of Martyropolis are numerous. A Syriac "history" (*tas̲h̲ʿīt̲h̲ā*) kept in the Jacobite church of Mayyāfāriķīn was translated for the historian of the town Ibn al-Azraķ and is given in a synopsis in Yāķūt, iv, 703-7 and al-Ķazwīnī, ii, 379-80 (tr. with notes by Marquart, in *Handes Amsorya* [1916], 125-35).

The town is said to have been founded on the site of a "large village" (*ķarya ʿaẓīma*) by the bishop Marūt̲h̲ā) (Mār Marūt̲h̲ā) who had obtained the authority of Yazdigird I of Persia to do so. This ecclesiastic flourished between *ca.* 383 and 420 (on the sources for his biography, cf. Marquart, *op. cit.*, 91-2, 125). The town of Martyropolis to which Marūt̲h̲ā brought the remains of the Christian martyrs of Persia is mentioned for the first time in 410. The etymology of the Syriac name Mīpherķēṭ is uncertain (cf. above). In Amenian, the town is mentioned for the first time in the *Geography* of the 7th century as Nphrkert (once Nphṛet).

By the peace of 297 with Diocletian, the province of Sophanene, within which Martyropolis lay, had become part of the Roman empire. Even after the disastrous peace made by Jovian in 363, Sophanene remained to the Emperor. Under Theodosius II (401-50), the new town, situated quite near the frontier, acquired considerable importance and became the capital of Sophanene (= Great Tsopkh). The town was still insufficiently fortified, and in 502 the Sāsānian Kawād̲h̲ b. Pērōz seized it and carried the inhabitants off to K̲h̲ūzistān, where he founded for them the town of Abaz-Ķubād̲h̲ (Yāķūt, iv, 707) Weh-Āmid̲h̲-Kawād̲h̲ = Arrad̲j̲ān; cf. Marquart, *Ērānšahr*, 41, 307). Anastasius began the fortification of Martyropolis but Justinian, after his accession in 527, was the first to reorganise completely the eastern frontier between Dārā and Trebizond. Martyropolis, the headquarters of a commander under the *strategos* of Theodosiopolis (Erzerūm), became one of the most important military centres. Procopius, *De aedificiis*, iii, gives a complete description of the walls of the town, the height and thickness of which were doubled and a full account of the system of defences (outer walls, advanced forts etc.); cf. Adontz, *op.cit.*, 10-12, 140-2. In 589 the town fell into the hands of the Sāsānids, but in 591 came back to the Byzantines in return for the support given by the Emperor Maurice to K̲h̲usraw II. Heraclius held it still the year 18/639 (Yāķūt, *loc. cit.*). (The date is not given in Muralt, *Chronogr. byz.*, i).

The vicissitudes of Martyropolis probably explain the fact that in the Armenian *Geography* of the 7th century (ed. Patkanov, tr. 45; Marquart, *Ērānšahr*, 18, 161) the Persian province of Ałdznikh (Arzanene) is separated from Tsophkh (Sophanene) by the line of the Khałirt (= Baṭmān-Ṣū) while in the description of parts of Armenia Nphret (= Nphrjert) figures as one of the 10 cantons of Arzanene.

Christian legend as preserved by Ibn al-Azraķ and Yāķūt gives very full details of the building of the town in the time of Mār Mārūt̲h̲ā: the arches (*ṭīķān*) of the walls in which the remains of the martyrs were placed, the eight gates of the town, the names of which are carefully recorded, the convent of SS. Peter and Paul, the buildings erected by the three ministers of the Byzantine emperor, each of whom built a tower and a church. There is still to be seen in Mayyāfāriķīn the ruins of a magnificent basilica and of the Church of the Virgin (al-ʿAd̲h̲rā). Gertrude Bell dated the basilica "not much later than the beginning of the fifth century", and suggested that the Church of the Virgin was one of the two built by K̲h̲usraw II in recognition of the assistance lent by Maurice; cf. Abu 'l-Farad̲j̲, *Muk̲h̲taṣar*, ed. Pococke, 98.

(V. MINORSKY)

2. *The Islamic period.*

The conquest and caliphal rule. In the wake of the conquest of the Djazīra by ʿIyāḍ b. Ghanm, Mayyāfāriķīn fell to him peacefully. The caliph ʿUmar b. al-Khaṭṭāb had made him governor of the Djazīra in 18/639 (al-Balādhurī, *Futūḥ*, 179). From that time until the early ʿAbbāsid period, the city was ruled as part of the Djazīra, sometimes jointly with al-Shām and on other occasions with Armenia and Ādharbāydjān. The names of individual governors of Mayyāfāriķīn for this period are listed by the town chronicler Ibn al-Azraķ al-Fāriķī and copied by ʿIzz al-Dīn Ibn Shaddād, the 7th/13th century geographer of the Djazīra.

During the reign of the ʿAbbāsid caliph al-Muhtadī (255-6/869-70), Mayyāfāriķīn and Āmid [*q.v.*] were seized by the Shaybānid ʿĪsā b. al-Shaykh [*q.v.*] (Ibn Shaddād, ms. Oxford, Marsh 333, fol. 10a). The Shaybānids continued to govern the area until its reconquest by the caliph al-Muʿtaḍid in 286/899. The grandson of ʿĪsā b. al-Shaykh, Muḥammad, built the minaret of the Friday mosque in Mayyāfāriķīn in 270/883-4 or 273/886-7. His name was inscribed on it (*ibid.*, fol. 69a).

Ḥamdānid and Būyid involvement in Mayyāfāriķīn. Mayyāfāriķīn fell under the sway of the Taghlibī Arab family, the Ḥamdānids [*q.v.*], after the appointment of Nāṣir al-Dawla al-Ḥasan as governor of Mawṣil in 324/935. His brother, Sayf al-Dawla ʿAlī (d. 356/967), ruled Aleppo and Diyār Bakr and showed a particular liking for Mayyāfāriķīn. Sayf al-Dawla repaired its walls and rebuilt the old citadel, where he stayed when visiting the city. He also provided Mayyāfāriķīn with a proper water supply. The entourage of Sayf al-Dawla at Mayyāfāriķīn included the famous preacher Ibn Nubāta [*q.v.*], and al-Mutanabbī. The latter recited an elegy over ʿAbd Allāh b. Sayf al-Dawla, who died in the town in 338/949 (Ibn al-Azraķ, B.L. Or. 5803, fol. 113b; Ibn Shaddād, fols. 77a-78a).

During the rule of Sayf al-Dawla, the Djazīra was under frequent attack from the Byzantines, whose territorial possessions extended at times almost as far as Āmid. The future Byzantine emperor John Tzimisces besieged Mayyāfāriķīn in 348/959, and it was on this occasion that Ibn Nubāta began to deliver sermons exhorting the citizens to engage in *djihād* (al-Anṭākī, 774-7; Ibn al-Azraķ, Or. 5803, fol. 114b). Thereafter Sayf al-Dawla began to strengthen the fortifications of the city (Ibn Shaddād, fol. 78b).

When Sayf al-Dawla died in 367/967, he was buried in the Ḥamdānid family *turba* at Mayyāfāriķīn (Ibn al-Azraķ, Or. 5803, fol. 117a; Ibn Shaddād, fol. 78a), a detail which reveals the high esteem in which the city was held by his line. Moreover, Mayyāfāriķīn was the residence of his wife and children (al-Anṭākī, 807). After the death of Sayf al-Dawla, Mayyāfāriķīn—along with the rest of Diyār Bakr—fell to the Ḥamdānid ruler of Mawṣil, Abū Taghlib al-Ghaḍanfar. The sister of Sayf al-Dawla stayed on in Mayyāfāriķīn and in 362/972-3 completed the task of improving the defences of the city. This was probably occasioned by another siege of Mayyāfāriķīn conducted by John Tzimisces, now elevated to the purple, in 361/972 (Ibn al-Azraķ, Or. 5803, fol. 118b).

In 368/978-9 Abu 'l-Wafāʾ, the general of the Būyid ruler ʿAḍud al-Dawla, took Mayyāfāriķīn on his behalf (Ibn Miskawayh, ii, 388-90). The name of ʿAḍud al-Dawla was recorded on the city walls (Ibn Shaddād, fol. 69b).

The Marwānid dynasty, 372-478/983-1085. After the death of ʿAḍud al-Dawla in 372/983, Bādh, the founder of the Kurdish dynasty of the Marwānids [*q.v.*], seized Mayyāfāriķīn (Ibn al-Athīr, ix, 25; Ibn al-Azraķ, ed. ʿAwaḍ, 49-52). Bādh's successors were able to hold on to the city, making it their capital for over a century. The Marwānid period witnessed another cultural flowering in Islamic Mayyāfāriķīn. The second Marwānid ruler, Mumahhid al-Dawla, repaired the city walls and inscribed his name on them in many places (*ibid.*, 86, 163; Ibn Shaddād, fol. 70a). An inscription of his is illustrated by Lehmann-Haupt (*Armenien*, 424).

The greatest of the Marwānid rulers, Naṣr al-Dawla (ruled 401-53/1011-61), was responsible for much building activity in the city, including a new citadel with gilded walls and ceilings which was completed in Dhu 'l-Ḥidjdja 403/June-July 1013 and which stood on a hill, the site of the Church of the Virgin. The Christian relics were transferred to the Melkite church (Ibn al-Azraķ, ed. ʿAwaḍ, 107-8). Naṣr al-Dawla also restored the old observatory (*manẓara*), put a clock (*bankām*) in the Friday mosque, constructed and endowed a hospital (*bīmāristān*), planted the citadel garden and built bridges, public baths and a mosque in the suburb of al-Muḥaddatha (*ibid.*, 123, 138, 141, 143, 145, 163-4, 168). The Marwānid capital attracted prominent religious and literary figures (*ibid.*, 82, 144, 166); from it, for example, ʿAbd Allāh al-Kāzarūnī spread the Shāfiʿī *madhhab* in Diyār Bakr (Ibn al-Athīr, ix, 52). Shaykh Abū Naṣr al-Manāzī, a high official at the time of Naṣr al-Dawla, collected books and established *wakfs* for libraries in the mosques of Mayyāfāriķīn and Āmid (Ibn al-Azraķ, ed. ʿAwaḍ, 131). Naṣr al-Dawla died in 453/1061 and was buried in the *turba* of the Banū Marwān at Mayyāfāriķīn (*ibid.*, 177).

After this, the Marwānids held on to Mayyāfāriķīn until the town and the rest of Diyār Bakr were taken by the Saldjūķs in 478/1085 during the campaign conducted by Ibn Djahīr [*q.v.*], the erstwhile vizier of the Marwānids. Ibn Djahīr had persuaded the Saldjūķ sultan Malik-Shāh [*q.v.*] to authorise him to besiege Mayyāfāriķīn, and the vizier was able to carry off vast treasures belonging to the Marwānids (Ibn al-Athīr, x, 86-8, 93-4; Ibn al-Azraķ, ed. ʿAwaḍ, 208-12).

In the brief quarter-century following the death of Malik-Shāh in 485/1092, Mayyāfāriķīn changed hands many times and was ruled by a succession of Saldjūķ princes and other local rulers, including Tutush, Duķāķ, Ķilīdj Arslān and Sukmān al-Ķuṭbī of Akhlāṭ.

The Artuķids. After the death of the Saldjūķ sultan Muḥammad b. Malik-Shāh [*q.v.*] in 512/1118, Mayyāfāriķīn fell under the sway of the Turcoman Artuķids [*q.v.*]. According to its chronicler Ibn al-Azraķ, the town was seized in 512/1118-19 by the Artuķid Nadjm al-Dīn Il-Ghāzī, who had already taken Mārdīn around 502/1108-9 (ms. B.L., Or. 5803, fol. 161a). Ibn al-Athīr puts the Artuķid capture of Mayyāfāriķīn three years later, in 515/1121-2 (x, 418), but this is one instance where the dating of the local historian is more likely to be accurate.

After Il-Ghāzī's death in 516/1122, his son Temürtash was able to hold on to Mārdīn and Mayyāfāriķīn for thirty years and to withstand Zangī's attempts to extend his sphere of influence in Diyār Bakr (Ibn al-Azraķ, Or. 5803, fols. 169a, 171a; Ibn al-ʿAdīm, 271; Ibn al-Athīr, *Atabegs*, 79). Temürtash's most ambitious project was the building of the Ķaramān bridge over the Satidāmā river (the Baṭmān-Ṣū) five miles east of Mayyāfāriķīn. The work was begun in 541/1146-7 and was completed by his son Nadjm al-Dīn Alpī in 548/1153-4. The stone arch of the bridge

measured more than sixty spans and was "one of the marvels of the age" (Ibn al-Azraķ, Or. 5803, fols. 171b, 179b). The bridge is described fully by Gabriel (*Voyages*, 236), who notes that Sauvaget read the name Temürtas̲h̲ and the year 542/1147-8 on the bridge (*ibid.*, 345). A copper mine was discovered in the time of Temürtas̲h̲ in the area north of Mayyāfāriķīn (Ibn al-At̲h̲īr, x, 215) and it is noteworthy that Temürtas̲h̲ is known to have minted copper coins (Ibn al-Azraķ, Or. 5803, fol. 172b).

The Artuķids held on to Mayyāfāriķīn after the death of Temürtas̲h̲ in 548/1152; but, unlike the Ḥamdānids and Marwānids, they preferred generally to live at Mārdīn. Continuity in the administration of Mayyāfāriķīn was provided by the Nubāta family, who are often mentioned as holding the office of *ķāḍī* (*ibid.*, fols. 161a, 162b, 169b). The third Artuķid ruler of Mayyāfāriķīn, Nad̲j̲m al-Dīn Alpī, was responsible for a major reconstruction of the Friday mosque. The *minbar* and arcades of the mosque had collapsed in 547/1152-3, the last year of the reign of his father, Temürtas̲h̲ (*ibid.*, fol. 175a). According to Ibn S̲h̲addād, Nad̲j̲m al-Dīn Alpī pulled down the rest of the building (fol. 104b) and it was rebuilt with substantial changes by the year 552/1157-8 (Ibn al-Azraķ, Or. 5803, fol. 175b). There is an inscription in the name of Nad̲j̲m al-Dīn Alpī at the base of the dome (Gabriel, *Voyages*, 227).

The Ayyūbids. After its conquest by Ṣalāḥ al-Dīn in 581/1185, the city walls were decorated with a fine commemorative inscription. This was discovered by Gertrude Bell and analysed by Van Berchem (in Diez, *Baudenkmäler*, 108) and by Flury (*Schriftbänder*, 44-8). It is apparently the only Kūfic inscription in the name of Ṣalāḥ al-Dīn. Minorsky (*EI*[1], art. *Mayyāfāriķīn*) stated on the authority of Gertrude Bell that this ruler built a mosque at Mayyāfāriķīn for which the columns of the Byzantine basilica were used. There would appear to be no evidence in the sources for this. Possibly the mosque in question was the one outside the walls, of which only the Ayyūbid minaret remains (Gabriel, *Voyages*, 210, 228).

Ṣalāḥ al-Dīn entrusted Mayyāfāriķīn to his brother Sayf al-Dīn in 591/1195 and the city was ruled by this branch of the Ayyūbid family until the Mongols conquered the city in 658/1260. In addition to the literary record, there is architectural, epigraphic and numismatic evidence of this short-lived Ayyūbid dynasty at Mayyāfāriķīn. Awḥad Nad̲j̲m al-Dīn Ayyūb (596-607/1200-10) left an inscription dated Ramaḍān 599/May-June 1203 on a tower of the eastern inner wall (illustrated and described by Lehmann-Haupt, *Armenien*, 425-6) and the name of his successor, As̲h̲raf Mūsā (607-12/1210-20), is inscribed on a tower to the north (*ibid*). Mūsā's brother, Muẓaffar S̲h̲ihāb al-Dīn G̲h̲āzī (617-42/1220-44) built a fine mosque of red baked brick with an inscription dated 624/1227 which was seen and analysed by Taylor (*ibid.*, 428). The inscription on the *miḥrāb* is given by Gabriel (*Voyages*, inscription no. 124). The coins struck by the Ayyūbids of Mayyāfāriķīn have aroused a certain interest amongst scholars (Grabar, 167-78; Lane-Poole, iv, 122-30; Lowick, 164-5). A series of them minted between 582/1186-7 and 612/1215-6 represent crowned human figures. Some have long locks of hair; others are wearing caps with tassels; sometimes these figures are enthroned (*ibid.*).

The Mongols devastated the area around Mayyāfāriķīn as early as 628-9/1231. In 638/1240-1 a Mongol embassy reached the town and demanded that it should surrender and that its fortifications be destroyed. On this occasion, Muẓaffar S̲h̲ihāb al-Dīn G̲h̲āzī succeeded in deflecting the attentions of the embassy elsewhere. His son, Kāmil Muḥammad (642-58/1244-60), defied the Mongols in a brave stand at Mayyāfāriķīn, but the city fell in 658/1260 to the Mongol army of Hülegü under the command of Yas̲h̲mūṭ and it was then that this last Ayyūbid ruler was killed (Ras̲h̲īd al-Dīn, 77-81; Ibn S̲h̲addād, fol. 120a).

Descriptions of Mayyāfāriķīn in the Muslim geographers. There is some disagreement in the classical Muslim geographical works on the placing of Mayyāfāriķīn. Al-Muķaddasī (137) puts it in Diyār Bakr, al-Iṣṭak̲h̲rī (188) considers it to be part of Armīniyya, whilst Ibn al-Faķīh (133) places it in Diyār Rabīʿa. Ibn S̲h̲addād lists Mayyāfāriķīn as one of the four *amṣār* of Diyār Bakr, the other three being Āmid, Arzan and Mārdīn (fol. 65a).

Al-Iṣṭak̲h̲rī (76, n. *k*) describes Mayyāfāriķīn as having an encircling wall and an abundant water supply, but he comments on the town's unhealthy climate. Al-Muķaddasī (140) mentions the fortifications, including battlements, an encircling wall and ditch; he also notes that the water there is muddy in winter. According to Ķudāma (246), the combined revenue of Arzan and Mayyāfāriķīn in ʿAbbāsid times was 4,100,000 *dirhams*. Nāṣir-i K̲h̲usraw visited the town in 438/1046-7. He was impressed by the excellent condition of its walls, which seemed as if they had only just been completed (tr. Schefer, 24-5).

Yāķūt (d. 626/1229) praised the city, especially its surrounding wall of white stone and its prosperous suburb (*rabaḍ*) (*Muʿd̲j̲am*, iv, 703-7). When Ibn S̲h̲addād visited Mayyāfāriķīn in the 7th/13th century, he found thriving *k̲h̲āns* and markets, as well as two *madrasas*, one Ḥanbalī, the other S̲h̲āfiʿī (fol. 71a). Both Ibn S̲h̲addād and Yāķūt mention eight city gates at Mayyāfāriķīn, seven of which probably corresponded to those of Byzantine Martyropolis (Gabriel, *Voyages*, 218).

The 8th-9th/14th-15th centuries. In the Ilk̲h̲ānid period (654-754/1256-1353), Mayyāfāriķīn shared the fate of the rest of Diyār Bakr and was ruled by Mongol *amīrs*. After the collapse of the Ilk̲h̲ānid state, after 736/1336, Diyār Bakr fell into disarray and became the arena for power struggles between rival Turcoman (the Aķ Ķoyunlu and Ķara Ķoyunlu confederations), Kurdish and Arab groups, before falling victim to the depredations of Tīmūr who attacked the area (but not, apparently, Mayyāfāriķīn) in 796/1394 and 803/1400-1 (Ibn ʿArabs̲h̲āh, 65-6, 164-5). Thereafter, Mayyāfāriķīn was in the hands of one branch of the mostly nomadic Sulaymānī Kurds [see KURDS] until it was taken in 827/1427 by the Aķ Ķoyunlu leader Ķara ʿUt̲h̲mān (d. 839/1435), who appointed his son Bāyazīd governor of the town and other citadels in the area (Tihrānī, 95).

The Ṣafawid and Ottoman periods. The Ṣafawid S̲h̲āh Ismāʿīl I occupied the whole of Diyār Bakr in his campaign against the last Aķ Ķoyunlu ruler Murād in 913/1507-8. He then allotted Diyār Bakr to K̲h̲ān Muḥammad Ustād̲j̲lū (Iskandar Beg Muns̲h̲ī, *ʿĀlam-ārā*, i, 32-3). After Ismāʿīl's defeat at Čāldirān [*q.v.*] in 920/1514, Mayyāfāriķīn was seized by the Kurdish chief Sayyid Aḥmad Beg Rūzakī. The city fell under Ottoman control in 921/1515 after the battle of Kos̲h̲ Ḥiṣār, when the Ṣafawids were forced to cede Diyār Bakr to the Ottomans. In his history of the Kurds, the 10th/16th century writer S̲h̲araf al-Dīn K̲h̲ān Bidlīsī lists the governors of Mayyāfāriķīn in his own time (*S̲h̲araf-nāma*, 270-2).

Information on Mayyāfāriķīn in the Ottoman

period is scanty. The Portuguese traveller Tenreyro went there in 936-7/1529 and found it "almost deserted" (*Itinerario*, 406). Ewliyā Čelebī (d. *ca.* 1095/1684) visited the town (*Seyāḥat-nāma*, iv, 76-8) and gave a long laudatory description of the Satidāmā bridge. Von Moltke, who passed through the city in the 19th century, while noting the well-preserved state of its walls and towers, commented on the ruined condition of the rest of the city which he said had been caused by Ottoman-Kurdish struggles in the area (Lehmann-Haupt, 394, 419). Indeed, the city was to remain *de facto* in Kurdish hands until the beginning of this century.

Christianity in Mayyāfāriḳīn during the Islamic period. The Arabic sources record little of the transition from Christianity to Islam within Mayyāfāriḳīn, a major centre of Oriental Christianity. Isolated references indicate, however, that Christianity continued to prosper after the Muslim conquest until recent times. This evidence is of course corroborated and expanded by surviving Christian architecture in the area. Al-Muḳaddasī (146) records without comment that in the monastery of Thomas (*dayr Tūmā*) one *farsakh* from Mayyāfāriḳīn there was a mummified corpse; it was allegedly that of one of the disciples [of Jesus]. Ibn al-Azraḳ mentions the existence of a Melkite church in the Marwānid period and that Christians held office in the Marwānid government (ed. ʿAwaḍ, 149, 164). The Jacobites had a bishopric in Mayyāfāriḳīn by the 5th/11th century (Vryonis, 53), although this is not mentioned in the detailed chronicle of Ibn al-Azraḳ. Ibn Shaddād does, however, mention an incident in which a Saldjūḳ governor, Ḳiwām or Ḳawām al-Mulk Abū ʿAlī al-Balkhī, became exasperated by the *nāḳūs* from a monastery in Mayyāfāriḳīn and, refusing a large sum of money offered him by the Christians if he would leave the building intact, destroyed it (fol. 70b). The same author records that in his own time (the 7th/13th century) there were monasteries on a hill to the north of Mayyāfāriḳīn (*ibid.*). In 936-7/1529 Tenreyro describes "beautiful monasteries and churches without roofs, containing sumptuous monuments with inscriptions in Greek letters. On the walls were pictures of apostles and other saints, painted in very fine colours and gold". He remarks that the town had only a small number of inhabitants who were Jacobite Christians and spoke Arabic (*Itinerario*, 376).

Mayyāfāriḳīn in recent times. In 1891 the population of the town was 7,000, divided about equally between Muslims and Christians (Cuinet, ii, 470-2). During its occupation by the Sulaymānī Kurds, the name Mayyāfāriḳīn had been eclipsed by Silvan (cf. *EI*[1], art. *Maiyāfāriḳīn*, and Minorsky's etymology there of Silwān). According to the 1945 census, the population was 2,155. The most recent information indicates that according to the 1980 census, the population of the administrative unit (*idari birim*) of Silvan was 43,624 (*Türkiye istatistik yıllığı*, 39).

(Carole Hillenbrand)

MAYYĀRA, Abū ʿAbd Allāh Maḥammad b. Aḥmad, Moroccan scholar and teacher, born 15 Ramaḍān 999/7 July 1591 at Fās, where he studied and taught law and *ḥadīth* until his death in the same town on 3 Djumādā II 1071/24 January 1662.

He was the author of several commentaries,

notably on the *Tuḥfa* of Ibn ʿĀṣim [*q.v.*], of which a manuscript exists in the Bibl. Générale, Rabat (D 873), and on the theological poem called *al-Murs̲h̲id al-muʿīn* of his master Ibn ʿĀs̲h̲ir (d. 1040/1631) completed in 1044/1634-5 and called *al-Durr al-t̲h̲amīn wa 'l-mawrid al-maʿīn fī s̲h̲arḥ al-Murs̲h̲id al-muʿīn ʿalā 'l-ḍarūrī min ʿulūm al-dīn* (lith. Fās, printed Tunis 1293, Cairo 1305, 1306). In 1048, he made an abridgement of it, *Ik̲h̲tiṣār al-Durr al-t̲h̲amīn*, which was lithographed at Fās in 1292 and printed at Cairo in 1301, 1303, 1305 and 1348; it should be noted that in his commentary, he took account of criticisms raised concerning his lack of objectivity and its lacunae (ii, 339-41; cf. Hajji, *Activité intellectuelle*, 202-3). Amongst other works of his extant, as well as the *Naẓm al-laʾālī wa 'l-durar* (mss. Rabat 855 and 3702 Z) which contains a *fahrasa* [*q.v.*] and consequently, autobiographical details, one might mention the *Tuḥfat al-aṣḥāb wa 'l-rufḳa bi-baʿd masāʾil al-ṣafḳa* (ms. Rabat 989 D; cf. O. Pesle, *Le contrat de safqa au Maroc*, Rabat 1932, *passim*), and particularly, the *Naṣīḥat al-mug̲h̲tarrīn wa-kifāyat al-muḍtarrīn fī 'l-tafrīḳ bayn al-Muslimīn* (ms. Bibl. Royale, Rabat 7248), composed in 1051/1641 in defence of those Muslims of Jewish ancestry who were once more, after the death of sultan al-Manṣūr al-D̲h̲ahabī (1603) the victims of a certain ostracism by traders and scholars in Fās. After the publication of this book, a cabal was formed against Mayyāra, who was the object of violent attacks, but who nevertheless benefited from the protection of Muḥammad al-Ṭayyib al-Dilāʾī, who wrote a *Taḳrīẓ Naṣīḥat al-mug̲h̲tarrīn* (mss. Bibl. Gén., Rabat 923 K, 125-8), and from a defence by al-ʿAwfī, also the author of a *Taḳrīẓ* (in the text of the *Naṣīḥa*, 126-7). Like Mayyāra's other works, the *Naṣīḥa* contains interesting pieces of historical information which would justify its publication. On account of his Jewish ancestry, this scholar, like al-Mand̲j̲ūr [*q.v.*], was not allowed to fill any official post of a religious nature, although often described as *imām*, and it is said that he had to make a living by hiring out dresses and ornaments for ladies on the occasion of marriage (see al-Ifrānī, *Ṣafwat man intas̲h̲ar*, lith. Fās n.d., 140; Hajji, *op.cit.*, 147).

The epithet of "the Elder" (*al-Akbar*) is sometimes appended to his name in order to distinguish him from his grandson, Maḥammad b. Muḥammad (or Aḥmad) al-Ḥafīd or al-Aṣg̲h̲ar, also considered as *imām* of Fās (d. 15 Muḥarram 1144/20 July 1731; see al-Ḳādirī, *Nas̲h̲r al-mat̲h̲ānī*, ii, 235; al-Kattānī, *Ṣalwat al-anfās*, i, 167; Lévi-Provençal, *Chorfa*, 318-19; M. Lakhdar, *Vie littéraire*, index).

Bibliography: Ḳādirī, *Nas̲h̲r al-mat̲h̲ānī*, i, 235; Kattānī, *Ṣalwat al-anfās*, i, 165; Ḥuday̲d̲j̲ī, *Ṭabaḳāt*, Casablanca 1357/1938, ii, 64-5; Muḥammad Mak̲h̲lūf, *S̲h̲ad̲j̲arat al-nūr*, Cairo 1349/1930, 309; E. Lévi-Provençal, *Chorfa*, 258-9; Brockelmann, II, 461, S II, 299; M. Hajji, *L'activité intellectuelle à l'époque saʿdide*, Rabat 1976-7, index; Ibn Sūda, *Dalīl*, i, 111. MAYYŪN, volcanic island of *ca.* 14 km² and 400 inhabitants in the Straits of the Bāb al-Mandab [*q.v.*], off the coast of the People's Democratic Republic of Yemen (the former Aden Protectorate). Known in classical times as Διοδαρος it became known in the West as Perim, probably from the other Arabic term used for the island *barīm* "rope", possibly connected with the story of the chain at al-S̲h̲ayk̲h̲ Saʿīd [see BĀB AL-MANDAB]. Perhaps visited by the French Crusader Reynaud de Chatillon, whose vessels were destroyed by Ṣalāḥ al-Dīn, the island was explored by Albuquerque in 1513, who called it Meyo (after Mayyūn), but found it waterless and unsuitable for a fortress. Occupied for a short time by the French in 1738, the British landed there in 1799, but left because of the lack of water. They returned in 1857 from Bombay and established a coaling station, called Brown Bay, which was abandoned however in 1936. In 1915, Turkish troops made an unsuccessful attempt to land on the island. Incorporated into the British Crown Colony of Aden in 1937, Mayyūn became part of the People's Democratic Republic of Yemen in 1967. With the coastal strip, running up the Red Sea as far as the frontier with Yemen (Ṣanʿāʾ), the islands of Kamarān and Socotra (Suḳuṭrā) [*q.vv.*], Mayyūn forms the so-called first governorate.

MAʿZ [see G̲H̲ANAM].

MAZAGAN [see AL-D̲J̲ADĪDA].

MAẒĀLIM (A.), a word whose sing. *maẓlima* denotes an unjust or oppressive action. Closely related to *ẓulm*, it is an antonym to *ʿadl* [*q.v.*] and thus signifies basically something "not in its right place" (*LA*). At an early stage in the development of Islamic institutions of government, *maẓālim* came to denote the structure through which the temporal authorities took direct responsibility for dispensing justice.

Precedents for the institution of *maẓālim* can be found in Byzantium and, more particularly, in the Sāsānid bureaucratic office which functioned as a jurisdiction parallel to the ordinary judiciary headed by the *mōbed̲h̲-mōbed̲h̲ān* [*q.v.*] (A. Christensen, *L'Iran sous les Sassanides*², Copenhagen 1944, 301 f.). It is also suggested that the ideal of open access to tribal leaders in pre-Islamic Arabia was carried over into the early Islamic experience.

The establishment in Medina of the rudiments of an Islamic polity did little to change the situation. Muḥammad combined in himself the rôles both of the traditional tribal chief and of the *ḥakam* [*q.v.*]. The early caliphs and provincial governors inherited this position, where judicial functions were not distinguished from other functions of government. Only in relation to the *d̲h̲immīs* [*q.v.*] did caliph or governor function as an alternative judicial authority (E. Tyan, *Histoire*, 87-98).

The growth in size and complexity of the Muslim community soon obliged caliphs and governors to appoint *ḳāḍīs* [*q.v.*] to whom their judicial functions were delegated. The development of the *s̲h̲arīʿa* [*q.v.*] as a distinct system of law during the 2nd/8th and 3rd/9th centuries, its identification with the office of *ḳāḍī*, and its increasing importance as a test of Islamic legitimacy, combined to form a context in which it becomes possible to identify a discrete *maẓālim* system. Al-Māwardī's suggestion (*Aḥkām*, 65) that the Umayyad caliph ʿAbd al-Malik b. Marwān [*q.v.*] was the first to arrange for the regular hearing of *maẓālim* petititions seems to be premature.

The ʿAbbāsid period. More certainty surrounds reports that the caliphs al-Mahdī and al-Hādī [*q.vv.*] ensured the regular holding of *maẓālim* sessions. The practice for the first several decades was usually for the *wazīr* [*q.v.*] to take charge (Sourdel, *Vizirat*, 640-8), and there are indications that the *maẓālim* jurisdiction was regarded both by them and by the *ḳāḍīs* and *ʿulamāʾ* as a rival to the *s͟harīʿa* jurisdiction. Although Abū Yūsuf [*q.v.*] suggested to Hārūn al-Ras͟hīd [*q.v.*] that the caliph should personally take charge (*K. al-K͟harād͟j*, Cairo 1352, 111 f.), this seldom happened. In the longer term, *maẓālim* remained a disputed institution. Following the fall of the Barmakids [see BARĀMIKA], more influence was given to the *ḳāḍīs*, culminating when a series of Muʿtazilī chief *ḳāḍīs* also held responsibility for *maẓālim*.

The end of Muʿtazilī influence under al-Mutawakkil [*q.v.*] returned *maẓālim* to the control of the *wazīrs*, where it remained, until the Būyid *amīr al-umarāʾ* [*q.v.*] downgraded the *wazīr* and handed control of *maẓālim* to the It͟hnā ʿAs͟harī S͟hīʿī *naḳīb al-as͟hrāf* [*q.v.*] (H. Busse, *Chalif und Grosskönig*, Wiesbaden 1969, 286-9).

From a comparatively early date, it became usual for the *wazīr* or *ḳāḍī* in charge to appoint a deputy to take responsibility for the routine management of the institution. On occasions, this official, variously known as *ṣāḥib* or *nāẓir al-maẓālim*, might also be appointed directly by the caliph.

The jurisdiction of *maẓālim* tended to be very wide. Receiving and processing petitions against official and unofficial abuse of power was an important part of its activity, but it also on occasion functioned as a court of appeal against the decisions of *ḳāḍīs*. Additionally, it is evident that, for an early stage, *maẓālim* was often the office through which military and civilian officials and dignitaries applied for the allocation of *iḳṭāʿ*s and through which such grants might also be confiscated and their holders fined.

Theory. Before the work of al-Māwardī [*q.v.*], little theoretical consideration of *maẓālim* is to be found. Statements in general terms of principle were not developed in detail. Al-Fārābī's view that the head of the just city should "favour justice and the just, hate tyranny and injustice, and give them both their just deserts" (*al-Madīna al-fāḍila*, ed. Dieterici, repr. Leiden 1964, 60), is typical.

Working in the service of the caliphs al-Ḳādir and al-Ḳāʾim, al-Māwardī's object was to restore the authority of the caliphate in preparation for the approaching Sald͟jūḳs. His work *al-Aḥkām al-sulṭāniyya* therefore included an extensive chapter on the structure, procedure and jurisdiction of *maẓālim*, which is paralleled with minor differences in Abū Yaʿlā b. al-Farrāʾ's work of the same title (cf. *Bibl.*).

Supervision of *maẓālim* is the responsibility of the caliph, his viziers and governors, or their appointed deputies, who must have personal qualities combining honesty, power and judiciousness. The *maẓālim* session is duly constituted when the official in charge is assisted by guards, *ḳāḍīs*, *faḳīhs*, secretaries and notaries (*s͟huhūd*). Ten classes of cases are detailed as coming within the jurisdiction of *maẓālim*, falling into two main categories, namely abuse of official powers and enforcement of *ḳāḍīs*' decisions.

The major difference from the *ḳaḍāʾ*, according to al-Māwardī, lies in the area of procedure. The *ṣāḥib al-maẓālim* has a wide scope for active direction and participation in the proceedings, including powers of coercion, admitting evidence below the standards required by *ḳāḍīs*' courts, subpoena of witnesses and postponement of hearings to allow judicial investigation. Al-Māwardī presents his discussion in terms of a relaxation of the rules of the *s͟harīʿa*, with the purpose of controlling powerful officials who otherwise might subvert the normal judicial process. Later writers link *maẓālim* with the concept of *siyāsa s͟harʿiyya*. In fact, the theory of *maẓālim*—as also later Ḥanbalī theory of *siyāsa s͟harʿiyya*—actually represents an attempt to bring the current practice closer into line with the requirement of the *s͟harīʿa*.

Later theory reverts to the common pattern of more general statements of principle, in terms of "helping the weak against the strong", a phrase often appearing in the obituaries of sultans and governors. Expositions in detail are rare and, when they do occur, as in al-Maḳrīzī (*K͟hiṭaṭ*, Cairo 1270, ii, 207 f.) and al-Nuwayrī (*Nihāyat al-arab*, Cairo 1923-55, vi, 265-90), are based on al-Māwardī.

The mediaeval period. In the event, the hopes of al-Māwardī and his patrons did not materialise, and *maẓālim* continued to develop with little reference to theory. The main feature during this later period is an increased bureaucratisation, a process which took place simultaneously under the Sald͟jūḳs, under the K͟hʷārazm-S͟hāhs in Persia and Central Asia, and under the Fāṭimids in Egypt. The various parts of this development came together under the Ayyūbids and continued with little change through much of the Mamlūk period.

The first step in opening a case was to present a petition (*ruḳʿa* or *ḳiṣṣa*) drawn up according to detailed formulae (described in al-Ḳalḳas͟handī, *Ṣubḥ al-aʿs͟hā*, Cairo 1913-19, vi, 202 f.). While the ideal remained the personal presentation of the *ḳiṣṣa* in public session, the vast majority were dealt with administratively. Al-Ḳalḳas͟handī (vi, 206-10) describes six different channels through which the *ḳiṣṣa* could be dealt with, and these procedures are confirmed by other sources. Several different officials are to be found taking decisions, including the sultan, his deputies and provincial governors (*nuwwāb*), and high-ranking military officials (most commonly the *atābak*, *dawādār* and *ḥād͟jib*). Common to all channels of petition was the central role of the chancery (*dīwān al-ins͟hāʾ*), headed by the *wazīr* or *ṣāḥib dīwān al-ins͟hāʾ*, and from the late 7th/13th century by the *kātib al-sirr*. Oversight of the routine clerical work was handled by a secretary explicitly appointed to deal with *maẓālim* work, called *ṣāḥib* (or *muwaḳḳiʿ*) *al-ḳalam al-daḳīḳ* under the Fāṭimids and *kātib* (or *muwaḳḳiʿ*) *al-dast* under the Mamlūks. From the early Fāṭimid period, elaborate rules also determined the form of the decree (*tawḳīʿ* or *marsūm*) containing the final decision in a case (*Ṣubḥ*, xi, 127-33). Such decrees would normally be signed by the sultan or a high officer of state, regardless of where in the administrative process the decision had been taken.

The site of the public session (*mad͟jlis*) was normally the place where the presiding official conducted his general duties. A departure from this took place when Nūr al-Dīn Zankī established a house of justice (*dār al-ʿadl*) in Damascus soon after 549/1154, with the specific purpose of providing a setting for *maẓālim*. Situated outside the citadel by the Bāb al-Naṣr [see DIMAS͟HḲ], it became more commonly known as *dār al-saʿāda* when it was turned into the seat of provincial government in 634/1236. By this time, other provincial capitals in the Ayyūbid state had also acquired a *dār al-ʿadl*. In Cairo, *maẓālim* sessions were usually held in a S͟hāfiʿī *madrasa*. Held twice a week on Mondays and Thursdays, these sessions were associated with an increasing amoung of official ceremonial, as the sultan and his officials went to the *dār al-ʿadl* in

public procession (*mawkib*) [see MAWĀKIB]. To the *mawkib* and *madjlis* was soon added an official banquet (*simāṭ*), and the whole ceremony was known as *khidma*.

The *khidma* reached its most elaborate form under the early Mamlūks. Baybars I [*q.v.*] transferred the hearing of *maẓālim* petitions to a new *dār al-ʿadl* in Cairo in 662/1264, just below the Citadel, and this also became the site for the *khidma*. The *mawkib* now included a growing number of military officers of state, and the *madjlis* widened its functions to include most official public ceremonial, such as the reception of foreign emissaries, the publication of government decisions, the granting of royal favours, etc. Hearing *maẓālim* cases soon became a minor formality, symbolised by the continuing presence of *ḳāḍīs* and *kātib al-sirr* and the new office of *muftī dār al-ʿadl* in the official seating order (cf. *Ṣubḥ*, iv, 44 f.). Sultan Ḳalāwūn's move of the *khidma* to his new *īwān kabīr* and the demolition of Baybars's *dār al-ʿadl* a few decades later confirmed the position of *maẓālim* as a function of the bureaucracy.

Throughout the early Mamlūk period, the identity of *maẓālim* as a bureaucratic process meant that there was little definition of its jurisdiction. Al-Maḳrīzī's claim (*Khiṭaṭ*, ii, 220 f.) that it was the forum for the implementation of the Mongol Yāsa can be discounted (cf. D. Ayalon, in *SI*, xxxiii [1971], 97-140). The sources report petitions dealing with every conceivable aspect of government activity, including requests for offices or *iḳṭāʿ*s, the suppression of particular *ʿulamāʾ* and their teachings, the implementation of law and order, as well as appeals for justice and the application of *ḳāḍīs*' decisions. This situation prevailed in all the provinces of the Mamlūk state.

The confusion of *maẓālim* and the general apparatus of government was common in other parts of the pre-Ottoman Arab world, but there were exceptions, such as Ḥafṣid Tunisia (R. Brunschvig, in *SI*, xxiii [1965], 27 ff.), where *maẓālim* remained a more distinct jurisdiction. Towards the end of the 8th/14th century, measures were also taken by the Mamlūks to clarify the situation. In 789/1387, Sultan Barḳūḳ detached *maẓālim* from the *khidma* and moved it to the Royal Equerry (*iṣṭabl al-sulṭān*) [see AL-ḲĀHIRA]. The term *dār al-ʿadl*, however, remained synonymous with the *khidma* in the *īwān*. The jurisdiction of *maẓālim* was likewise clarified, and in the 9th/15th century a distinction is made between petitions for justice in the face of injustice and oppression and petitions requesting *iḳṭāʿ*s or official posts (*al-Ṣāliḥī*, Copenhagen Royal Library ms. 147, fols. 32b-33a).

Bibliography (additional to references given above): Māwardī, *al-Aḥkām al-sulṭāniyya*, Cairo 1298, 64-82, and Abū Yaʿlā b. al-Farrāʾ, *al-Aḥkām al-sulṭāniyya*, Cairo 1966, 58-74. H. F. Amedroz, in *JRAS* (1911), 635-74, provides an extensive paraphrase and commentary to al-Māwardī's text. E. Tyan, *Histoire de l'organisation judiciaire en pays d'Islam*², Leiden 1960, 433-520, surveys the history of *maẓālim* with an emphasis on juridical theory. S. M. Stern deals in great detail with the bureaucratic processes in *Oriens*, xv (1962), 172-209, and in *BSOAS*, xxvii (1964), 1-32, xxix (1966), 233-76. The Mamlūk period and the role of *dār al-ʿadl* are discussed by J. S. Nielsen, *Secular justice in an Islamic state: Maẓālim under the Baḥrī Mamlūks*, Istanbul 1985. H. Ernst, *Die mamlukischen Sultansurkunden*, Wiesbaden 1960, has published some of the petitions and drecrees preserved at St. Catherine's, Mount Sinai, and a basic source for Mamlūk bureaucratic procedure is Aḥmad b. Faḍl Allāh al-ʿUmarī, *Masālik al-abṣār*, Ayasofya ms. 3416, fols. 138a-142a. On *maẓālim* in Persia, see MAḤKAMA. 3.

(J. S. NIELSEN)

MĀZANDARĀN, a province to the south of the Caspian Sea bounded on the west by Gīlān [*q.v.*] and on the east by what was in Ḳādjār times the province of Astarābād [*q.v.*, formerly Gurgān]; Māzandarān and Gurgān now form the modern *ustān* or province of Māzandarān.

1. The name. If Gurgān to the Iranians was the "land of the wolves" (*vəhrkāna*, the region to its west was peopled by "Māzaynian dēws" (Bartholomae, *Altir. Wörterbuch*, col. 1169, under *māzainya daēva*). Darmesteter, *Le Zend-Avesta*, ii, 373, n. 32, thought that Māzandarān was a "comparative of direction" (**Mazana-tara*; cf. Shūsh and Shushtar) but Nöldeke's hypothesis is the more probable (*Grundr. d. iran. Phil.*, ii, 178), who thought that Māzan-dar = "the gate of Māzan" was a particular place, distinct from the part of the country known as Tapuristān. (A village of Mesderan (?) is marked on Stahl's map 12 km. south of Fīrūzkūh!). In any case, the name Māzandarān seems to have no connection with Τοῦ Μασωράνου ὄρος which, according to Ptolemy, vi, ch. v., was situated between Parthia and Areia (Hārī-rūd) and was connected by Olshausen (*Mazdoran und Mazandaran*, in *Monatsberichte Ak. Berlin* [1877], 777-83) with Mazdūrān, a station 12 *farsakh*s west of Sarakhs; cf. Ibn Khurradādhbih, 24; al-Muḳaddasī, 351 (cf. however the late source of 881/1476 quoted by Dorn, in *Mélanges asiat.*, vii, 42).

The Avestan and Pahlavi quotations given by Darmesteter, *loc. cit.*, show to what degree the people of Mazandarān were regarded by the Persians as a foreign group and little assimilated. According to the *Bundahishn*, xv, 28, tr. West, 58, the "Māzandarān" were descended from a different pair of ancestors to those of the Iranians and Arabs. The *Shāh-nāma* reflects similar ideas (cf. the episode of Kay Kāwūs's war in Māzandarān, and esp. Vullers ed., i, 332, v, 290: the war is waged against Ahriman; 364, vv. 792-3: Mazandarān is contrasted with Iran; 574, v. 925: the bestial appearance of the king of Māzandarān).

Among historical peoples in Māzandarān are the Tapyres (Τάπυροι), who must have occupied the mountains (north of Simnān), and the Amardes (Ἄμαρδοι), who according to Andreas and Marquart, have given their name to the town of Āmul (although the change of *rd* to *l* is rather strange in the north of Persia). These two peoples were defeated by Alexander the Great. The Parthian king Phraates I (in 176 B.C.) transplanted the Mardes (Amardes) to the region of χάραξ (Khʷār to the east of Warāmin) and their place was taken by the Tapyres, whose name came to be applied to the whole province.

The Arabs only knew the region as Ṭabaristān (<Tapurstān, on the Pahlavi coins). The name Māzandarān only reappears in the Saldjūḳ period. Ibn al-Athīr, x, 34, in speaking of the distribution of fiefs by Alp Arslān in 458/1065, says that Māzandarān was given to the *amīr* Inandj Bīghū. Ibn Isfandiyār, 14, and Yāḳūt, iii, 502, 9, think that Māzandarān as a name for Ṭabaristān is only of fairly modern origin (in Arabic?), but according to Zakariyyāʾ Ḳazwīnī, 270, "the Persians call Ṭabaristān Māzandarān". Ḥamd Allāh Mustawfī distinguishes between Māzandarān and Ṭabaristān. In his time (1340), the 7 *tūmān*s of the "*wilāyat* of Māzandarān" were Djurdjān, Mūrūstāḳ (?), Astarābād, Āmul and Rustamdār, Dihistān, Rūghad and Siyāh-rustaḳ (?); on the other hand, the *diyār-i Ḳūmis wa-Ṭabaristān* included Simnān, Dāmghān, Fīrūzkūh, a town of

Damāwand, Firrīm, etc. We find a similar distinction in Kh^w^āndamīr, ed. Dorn, 83.

2. Geography: The actual extent of Māzandarān (Rabino) is 300 miles from east to west and 46 to 70 miles from north to south. Except for the strip along the coast—broader in the east than the west—Māzandarān is a very mountainous country. The main range of the Elburz forms barriers parallel to the south of the Caspian, while the ridges running down to the sea cut the country up into a multitude of valleys open on the north only. The principal of the latter ridges is the Mazārčūb, which separates Ṭabaristān from Tunakābun. The latter is bordered on the south by the chain of the Elburz in the strict sense, which separates it from the valley of the Shāhrūd (formed by the waters of the Alamūt and Talakān and flowing westward into the Safīd-rūd).

To the east of Mazār-čub, a number of ranges run out of the central massif of the Elburz: 1. to the east, the chain of Nūr, which cuts through the Hārāz-pay; and 2. to the south-east, the southern barrier which forms the watershed between the Caspian and the central plateau. Between the two rises in isolation the great volcanic cone of Damāwand [*q.v.*] (5,604 m./18,386 ft.).

To the east of Damāwand, the southern barrier rejoins the continuation of the Nūr and the new line of the watershed of eastern Māzandarān is marked by the ranges of Bānd-i-pay, Sawād-kūh, Shāh-mīrzād (to the south of Simnān), of Hazārdjarīb (to the south of Dāmghān), of Shāh-kūh (to the south of Shāhrūd), etc.

The rivers of Māzandarān are of two kinds. A hundred short streams run straight down into the sea from the outer mountains of Māzandarān. Much more important are the rivers which rise in the interior and after draining many valleys form a single great river when they break through the last barrier. Such are (from west to east); the Sard-ābrūd; the Čālūs; the Harāz-pay, which drains the region of mount Damāwand and then runs past Āmul; the Bābul (the river of Bārfurūsh); the Tālār (river of ʿAlīābād); the Tīdjin (river of Sārī) and the Nīkā (or Äspayzä) which flows from east to west; its valley forms a corner between the southern chain (cf. above) and the mountains which surround the Gulf of Astarābād on the north.

3. Ethnology. N. Khanykov, *Mémoire sur l'ethnographie de la Perse*, Paris 1866, 116-17; C. Inostrantsev, *The customs of the inhabitants of the Caspian provinces in the tenth century* [in Russian], in *Živaya Starina* (1909), part ii-iii, 125-52.

4. Language. Cf. Geiger, *Die Kaspischen Dialecte*, in *Grundriss d. iran. Phil.*, i/2, 344-80, where the literature of the subject is given (esp. Dorn's works).

5. Historical geography. This is still full of difficulties, although Vasmer's very full study has considerably reduced their number. The matter is complicated by the fact that certain well-known names are used in different periods for more or less identical districts.

The eastern frontier of Māzandarān (Ṭabaristān) in the strict sense, with Astarābād (Djurdjān) seems to have always run near Kulbād (on the river Kirrind; cf. Ptolemy's Χρίνδοι), where there used to be a wall (*djar-i Kulbād*) which barred the narrow strip of lowland between the Gulf of Astarābād and the mountains; cf. Ibn Rusta, 149, who speaks of the brick wall (*ādjurr*) and of the Gate of Ṭamīs through which travellers had to pass (cf. Ibn al-Faḳīh, 303). To the west, the town of Shālūs (Čālūs) was situated on the frontier of Daylam (Ibn Rusta, 150: *fī naḥw al-ʿaduww*) but later the valley of the Sard-āb-rūd (Kalārdasht) seems to have been annexed to Ṭabaristān. Farther west, the coast of Tunakābun was governed sometimes with Māzandarān and sometimes with Gīlān.

The Arab geographers distinguished between the plain (*al-sahliyya*) and the mountains (*al-djabaliyya*) of Ṭabaristān (al-Iṣṭakhrī, 211, 271). The important towns of Ṭabaristān were in the lowlands: Āmul, Nātil, Shālūs (Čālūs), Kalā (Kalār), Mīla, Tardjī (Tūdjī, Bardjī?), ʿAyn al-Humm, Māmṭīr (= Bārfurūsh), Sārī, Ṭamīsha (cf. al-Iṣṭakhrī. 207; cf. al-Muḳaddasī, 353). The principal town (*madīna*) of Ṭabaristān in the time of al-Yaʿḳūbī, 276, was still Sāriyya [*q.v.*], but in the time of al-Masʿūdī, *Tanbīh*, 179, Al-Iṣṭakhrī, 211, and Ibn Ḥawḳal, 271, the principal town (*ḳaṣaba*) and the most flourishing one in Ṭabaristān was Āmul (larger than Ḳazwīn).

The mountain area was quite distinct, and its connection with the plain is not very clear in the Arabic texts; cf. the confused summary in al-Iṣṭakhrī, 204. Al-Ṭabarī, iii, 1295, under the year 224/838, distinguishes three mountains in Ṭabaristān: 1. the mountain of Wandā-Hurmuz in the centre (*wasaṭ*); 2. that of his brother Wandāsandjān (*sic*) b. Alandād b. Ḳārin; and 3. that of Sharwīn b. Surkhāb b. Bāb. Now according to Ibn Rusta, 151, [the Ḳārinid] Wandā-Hurmuz lived near Dunbāwand. On the other hand, the same writer, 149, says that during the rule of Ṭabaristān by Djarīr b. Yazīd, Wandā-Hurmuz had bought 1,000 *djarībs* of domain lands (*ṣawāfī*) outside the town of Sārī. These *alf djarīb* seem to correspond to the region round the sources of the rivers Tīdjin and Nīkā, which in Persian is called Hazār-djarīb. Later, the lands of Wandā-Hurmuz included the greater part of eastern Māzandarān. *Wandāspdjān seems to have ruled over the greater part of Māzandarān, for his capital Muzn was the rallying point from which expeditions set out against Daylam. Finally, the mountain of Sharwīn comprised the south-eastern part of Māzandarān, for according to Ibn al-Faḳīh, 305, it was close to Ḳūmis.

In the time of al-Iṣṭakhrī, the three divisions of the mountains specified are: the mountains of Rūbandj, of Fādūsbān and of Ḳārin. "They are high mountains (*djibāl*) and each of them (*djabal*) has a chief".

Rūbandj, according to Ibn Ḥawḳal, lay between Rayy and Ṭabaristān. Barthold, *Očerk*, 155, emends the name to *Rūyandj and identifies it with Rūyān. Ibn Rusta, 149, says that Rūyān, near the lands of Rayy, did not form part of Ṭabaristān but formed a special *kūra* with the capital Kadjdja, which was the headquarters of the *wālī* (cf. Kačarustāḳ in the *bulūk* of Kudjūr). According to this, *Rūyand = Rūyān is to be located in the south-western part of Māzandarān (north of Tehrān). In the Mongol period, Ḥamd Allāh Ḳazwīnī, 160, is the first to mention Rustamdār (on the Shāh-rūd). As Vasmer, *op.cit.*, 122-5, has shown, Rustamdār later included all western Māzandarān between Sakhtasar (Gīlān) and Āmul. Rustamdar therefore included Rūyān, without the two terms being completely synonymous.

Djibāl Ḳarīn had only one town, Shahmār, a day's journey from Sāriyya. The local chiefs of the

dynasty of Ḳārin lived in the stronghold of Firrīm [*q.v.* in Suppl.] which must have stood on the western branch of the river Tīdjin, which later flows past Sārī. The modern *bulūk* of Firrīm is in the Hazār-Djarīb (more accurately in its western half which is called Dudānga). According to Ibn Isfandiyār, 95, the possessions of the Ḳārinids included the mountains of Wandā-ummīd (*ibid.*, 25; the water supply of the mosque of Āmul came from this mountain), Āmul, Lafūr (on the eastern source of the river Bābul which runs to Bārfurūsh) and Firrīm, "which is called Kūh-i Ḳārin". According to Yāḳūt, iii, 283, the lands of the Ḳārinids included Djibāl Sharwīn (cf. above) which Iʿtimād al-Salṭana, *Kitāb al-Tadwīn*, 42, identifies with Sawād-kūh i.e. the sources of the Tālār (river of ʿAlīābād between Āmul and Bārfurūsh); the pass leading to Sawādkūh is still called Shalfīn <Sharwīn.

The Djibāl Pādūspān lay a day's journey from Sārī. The district had no Friday mosque; the chief lived in the village of Uram (Ibn Ḥawḳal, 268, 17: Uram-khāst, Ārum). As Vasmer has shown, 127-30, this must be sought on the middle course of the rivers of Bārfurūsh and ʿAlīābād (to the north of Lafūr and near Shīrgāh).

Bibliography: *BGA*, s.v. Daylam, Ṭabaristān, Āmul, Sāriyya, etc. Ibn al-Faḳīh, 301-14, in particular, gives very detailed information about Ṭabaristān. Masʿūdī, *Murūdj al-dhahab*, index; Idrīsī, tr. Jaubert, ii, 169, 179-80, 333, 337-8 (of little originality); Zakariyyāʾ Ḳazwīnī, *Athār al-buldān* (clime iv.): Āmul, 190; Bilād al-Daylam, 221; Rūyān, 260; Ṭabaristān; Yāḳūt, cf. Dorn, *Auszüge*, 1858, 2-45, where are collected all the articles relating to Ṭabaristān (but the text of Wüstenfeld's edition is preferable); Ḥamd Allāh Ḳazwīnī, *Nuzhat al-ḳulūb*, GMS, 159, 161; Dorn, *Auszüge aus 14 morgenl. Schriftstellern betreffend d. Kaspische Meer*, in *Mélanges Asiatiques*, vi, 658, vii, 19-44, 52-92; cf. also the *Bibl.* to section on History below. European works: Spiegel, *Eran. Altertumskunde*, 1871, i, 64-74; Dorn, *Caspia*, 1875 (a mass of rather undigested information); Geiger, *Ostiranische Kultur*, 1882, index; Brunnhofer, *Von Pontus bis zum Indus*, Leipzig 1890, 73-93: Alburs and Mazanderan (the author seeks to explain Iranian geography from Sanskrit texts); Barthold, *Istor.-geogr. obzor Irana*, St. Petersburg 1903, 158-161, Pers. tr., Tehrān 1930, 289-95, Eng. tr. Princeton 1984, 115-20; Le Strange, *The Lands of the eastern caliphate*, 368-76; Vasmer, *Die Eroberung, etc.*

6. History. The local dynasties of Māzandarān fall into three classes: 1. local families of pre-Islamic origin, 2. the ʿAlid *sayyids*, and 3. local families of secondary importance.

I. At the coming of the Sāsānid dynasty, the king of Ṭabaristān and of Padashwārgar (Marquart, *Ērānšahr*, 130: "the district opposite the region of Khwār"; Farshuwādgar is a misreading of the name, which is also found in the *Bundahishn*, xii, 17) was Gushnasp, whose ancestors had reigned since the time of Alexander. In 529-36 Ṭabaristān was ruled by the Sāsānid prince Kāwūs son of Kawādh. Anūshirwān put in his place Zarmihr, who traced his descent from the famous smith Kāwa [see KĀWAH]. His dynasty ruled till 645 when Gīl Gawbara (a descendant of the Sāsānid Djamāsp, son of Pērōz) annexed Ṭabaristān to Gīlān. These families, on whom their coins might throw some light (cf. below), had descendants ruling in the Muslim period.

The Bāwandids [see BĀWAND] who claimed descent from Kāwūs) provided three lines: the first 45-397/665-1007 was overthrown on the conquest of Ṭabaristān by the Ziyārid Ḳābūs b. Wushmagīr [*q.v.*]; the second reigned from 466/1073 to 606/1210 when Māzandarān was conquered by ʿAlāʾ al-Dīn Muḥammad Khwārazmshāh; the third ruled from 635/1237 to 750/1349 as vassals of the Mongols. The last representative of the Bāwandids was slain by Afrāsiyāb Čulāwī.

The Ḳārinids [*q.v.*] (in the Kūh-i Ḳārin) claimed descent from Ḳārin, brother of Zarmihr (cf. above). Their last representative Māzyār [see ḲĀRINIDS] was put to death in 224/839.

The Pādūspānids or Bādusbānids [*q.v.*] (Rūyān and Rustamdār) claimed descent from the Dābūyids of Gīlān (their eponym was the son of Gīl Gawbāra; cf. above). They came to the front about 40/660 and during the rule of the ʿAlids were their vassals. Later, they were vassals of the Būyids and Bāwandids, who deposed them in 586/1190. The dynasty, restored in 606/1209-10, survived till the time of Tīmūr; one of its branches (that of Kāwūs b. Kayūmarth) reigned till 975/1567 and the other (that of Iskandar b. Kayūmarth) till 984/1574.

II. Alongside of these native dynasties, the ʿAlids were able to establish themselves, principally in Ṭabaristān. In 250/864 the people of Rūyān, rebelling against the governor, sent to Rayy for the Zaydī Sayyid Ḥasan b. Zayd, a descendant of the caliph ʿAlī in the sixth generation. This (Ḥasanid) branch ruled in Ṭabaristān till 316/928. The Ḥusaynid branch ruled from 304/916-17 to 337/948-9 (?). Another dynasty of Marʿashī Sayyids [*q.v.*] ruled in Māzandarān between 760/1358 and 880/1475. The founder of this dynasty was Ḳiwām al-Dīn, a descendant of ʿAlī in the twelfth generation. A third family of Murtaḍāʾī Sayyids is known in Hazār-Djarīb between 760/1359 and 1005/1596-7.

III. The noble families who enjoyed considerable influence, mainly in their fiefs, are very numerous. Rabino mentions the Kiyā of Čulāw (at Āmul, Ṭalaḳān and Rustamdār) between 795/1393 and 909/1503-4; the Kiyā Djalālī of Sārī in 750-63/1349-61; the house of Rūzafzūn of Sawādkūh, 897-923/1492-1517; the Dīw in the period of Shāh Tahmāsp in certain parts of Māzandarān; the Banū Kāwūs 857-957/1453-1550; the Banū Iskandār 857-1006/1453-1598 and the different princes of Tamīsha, of Miyāndūrūd, of Lāridjān, of Māmṭīr, of Lafūr, etc.

Besides this confusion of feudal dynasties, a series of conquerors from outside has ruled in Māzandarān: the Arabs beginning in 22/644, the Ṭāhirids, the Ṣaffārids, the Sāmānids, the Ziyārids, the Ghaznawids, the Saldjūḳs the Khwārazmshāhs, the Mongols, the Sarbadārs, Tīmūr and the Ṣafawids. For the detailed consideration of the period of domination by outside powers from the Arab conquest to the suzerainty of the Saldjūḳs, during which Māzandarān appears in the historical sources as Ṭabaristān, see ṬABARISTĀN.

It is in the Saldjūḳ period, as already noted, that the name Māzandarān reappears in historical literature. Towards the end of the period of Great Saldjūḳ rule in eastern Persia, Māzandarān was ruled by the ambitious and expansionist Bāwandid prince Shāh Ghāzī Rustam I (534-58/1140-63) (see Bosworth, in *Camb. hist. of Iran*, v, 28-9, 156, 185-6). It then passed briefly, after the murder in 606/1209-10 of Shāh Ghāzī Rustam II, into the control of the Khwārazmshāhs, but in 617/1220 was devastated by Mongol incursions under either Djebe or Ṣübetey (both commanders being mentioned by Djuwaynī as leading the Mongol forces). It was, of course, on an island off the

coast of Māzandarān that the fugitive Khwārazmian ruler ʿAlāʾ al-Dawla Muḥammad died in this same year [see KHWĀRAZM-SHĀHS]. Māzandarān in the Mongol and Il-Khānid periods was frequently a corridor through which Mongol armies passed, but it and Gīlān do not seem ever to have been directly governed by the Mongols, presumably because of their relative inaccessibility and their uncongenial climate. Māzandarān, however, often played a rôle as the winter camping-ground [see ḲĪSHLAḲ] of such Khāns as Abaḳa, Ghazan and Öldjeytü, in conjunction with Khurāsān, which was favoured as a summer pasture ground for the Mongol hordes and their flocks. In the later 8th/14th and the 9th/15th centuries we hear of governors appointed over Māzandarān by the Sarbadārids and then the Tīmūrids, but in practice, the local princes seem largely to have been undisturbed. Also in the period of the Mongols and their successors, we know that trade was carried on across the Caspian Sea to South Russia and the lands of the Golden Horde from the port of Nīm Murdān off the coast from Astarābād (Mustawfī, *Nuzha*, 160, tr. 156).

Shāh Ismāʿīl Ṣafawī had failed to take over Māzandarān in 909/1503-4 from the local Shīʿī prince Ḥusayn Kiyā Čulawī, who had sheltered fugitive troops of Ismāʿīl's Aḳ Ḳoyunlu opponents. He also sent an expedition into Māzandarān in 923/1517, but it remained substantially independent under its native princes (a Ṣafawid governor ruled part of it 977-84/1569-76) until Shāh ʿAbbās I's definitive annexation in 1005-6/1596-7; he claimed hereditary rights in Māzandarān through his family's connections with the Marʿashī Sayyid Ḳiwām al-Dīn (see Iskandar Beg Munshī, *Taʾrīkh-i ʿĀlam-ārā-yi ʿAbbāsī*, Tehran 1350/1971, i, 518-22, 534-7, 542-3, 579-86, tr. R. M. Savory, Boulder, Colorado 1978, ii, 693-8, 713-17, 722-3, 765-73). ʿAbbās's mother Mahd-i ʿUlyā was the daughter of a local Māzandarān chief who claimed descent from the Fourth Shīʿī Imām Zayn al-ʿĀbidīn, and the Shāh showed a particular liking for the province, constructing there two winter palaces, which formed a kind of northern Iṣfahān for him. Faraḥābād was founded in 1020/1611 or 1021/1612, and Ashraf in 1021/1612; they were visited and described by European travellers like Pietro della Valle (1618) and Sir Thomas Herbert (1627), and it was at Faraḥābād that the Shāh died in 1038/1629 (cf. Savory, *Iran under the Safavids*, Cambridge 1980, 96-100). It was Shāh ʿAbbās who implanted in Māzandarān 30,000 Georgian and Armenian Christian families, many of whom proved unable to survive the unhealthy climate there.

Māzandarān was originally one of the *mamālik*, i.e. *dīwānī* or state land provinces, but under Shāh ʿAbbās II (1052-77/1642-66), Māzandarān and Gīlān became *khāṣṣa* or royal domains. It suffered in 1668 from the attack of Stenka Razin and his Cossacks, and in the early decades of the 18th century Māzandarān and Gīlān were coveted by Peter the Great; this was of course the period when the Ṣafawid state was falling into dissension and anarchy under pressure from the Afghāns in the east. Hence the two provinces were in 1723 in principle ceded to the Tsar by the fainéant Ṭahmāsp II (1135-45/1722-32) in return for the promise of help against his rival Ashraf. The plan was cut short by Peter's death in 1725, and the Empress Catherine I offered to abandon the Russian claim on the south Caspian provinces in return for recognition of Russian annexations in Dāghistān and Shirwān. Ṣafawid control over Māzandarān was however established by Ṭahmāsp with the aid of the chief of the Ḳizilbāsh [*q.v.*] Turkmen chief of the Ḳādjār tribe there, Fatḥ ʿAlī Khān. The Ḳādjārs now began to consolidate their power in the region, despite Ṭahmāsp's enforced grant of Māzandarān, Khurāsān, Sīstān and Kirmān to Nādir Shāh Afshār after the latter's expulsion of the Afghāns from Persia, and in 1744 the Ḳādjārs of Māzandarān in fact rebelled against Nādir.

Under the Ḳādjār Shahs, Māzandarān and Gurgān continued to be of strategic importance against Turkmen incursions, and were royal governorates. The local economy seems to have flourished, with its staples of rice, cotton, sugar, timber and the fisheries of the Caspian, the latter however leased in the latter part of the 19th century to Russia in return for an annual rent. Curzon noted that the revenue of Māzandarān in 1888-9 was 139,350 *tūmāns* in cash, with government expenditure on public buildings, expenses of collection, etc., amounting to a mere 4,590 *tūmāns* (*Persia and the Persian question*, i, 354 ff.). The ancient town of Sārī declined in the 19th century, whilst Āmul and above all Bārfurūsh [*q.v.*] expanded commercially; much of the trade with Russia went from the port of Bārfurūsh at Mashad-i Sar (later Bābul-i Sar) at the mouth of the Bābul river, and there was a Russian consul for trade in the town. In the middle years of the century, this district was a centre of Bābism, one of whose leaders was Mullā Muḥammad ʿAlī Bārfurūshī [*q.v.*]. The convention of Badasht took place in Mazandarān, and a fortified site near Bārfurūsh called Shaykh Ṭabarsī was the centre of the Bābī rising of 1848-9, barbarously suppressed by government forces [see BĀBĪS]. The father of Mīrzā Ḥusayn ʿAlī, the later Bahāʾ Allāh [*q.v.*], was a native of Nūr in Māzandarān. In 1889-90 there was a pioneer attempt at railway-building in Persia when a short line was built by Belgian engineers from Āmul to the Caspian coast; a road over the Elburz Mountains from Āmul to Tehran, 120 miles/190 km. long, had already been constructed by Nāṣir al-Dīn Shāh in 1877-8.

In the present century, with the confusion after the First World War, Māzandarān was, with Gīlān, involved in the Bolshevik rising of 1920-1 in the Caspian provinces under Kūčak Khān [*q.v.*] and Amīr Muʾayyad, in the ending of which the commander of the Cossack Brigade Riḍā Khān, later Shāh, achieved prominence; he was himself a native of Māzandarān, having been born at Elasht in the Elburz mountains (see L. P. Elwell-Sutton, in *Iran under the Pahlavis*, ed. G. Lenczkowski, Stanford 1978, 4-6). After he was made Shāh (December 1925), much of Māzandarān became crown land (*khāliṣa* [*q.v.*]), actually in the form of personal estates (*amlāk-i shāhī*) of the Shāh himself; but these were returned to their original owners in 1941 and subsequently distributed to small proprietors under the land reform policy of Riḍā Shāh's son Muḥammad Riḍā Shāh (see A. K. S. Lambton, *The Persian land reform 1962-1966*, Oxford 1979, 11-12, 120-2, 218-21).

Bibliography: On the campaigns of Alexander the Great and Antiochus III (in 209 B.C.; cf. Polybius, x, 28-31), cf. Dorn, *Caspia*, s.v. Alexander; idem, *Reise*, 156-61; Marquart, *Alexander's Marsch von Persepolis nach Herāt*, in *Untersuch. z. Gesch. von Eran*, ii, 1905, 45-63; Stahl, *Notes on the march of Alexander the Great from Ecbatana to Hyrcania*, in *JRGS* (Oct. 1924), 312-19. Wandarīn Bāwand of 407/1016, see Pope, *Survey of Persian art*, ii, 1022-3, 1721-3. See also MARʿASHĪ SAYYIDS. (V. MINORSKY - [C. E. BOSWORTH])

7. The coins of Māzandarān. The question whether the Sāsānids struck coins in Māzandarān is still an open one and can only be settled when the groups of letters that mark the mints on Sāsānid coins have been properly explained. According to the so far insufficient attempts to explain them, the letters *AM*

found from the time of Fīrūz onwards are an abbreviation for Āmul, but this explanation is quite without proof.

The Dābwayhids and the earlier Arab governors of Ṭabaristān struck in the 2nd/8th century coins of the type of the Sāsānid *dirhams* of Khusraw II; on the obverse, with the bust of the ruler, his name is given in Pahlavi characters and on the reverse is the fire-altar with its two guardians and on the right the mint *Tpurstan* and on the left the year in the Ṭabaristān era (began on 11 June 652). These silver coins average in weight 1.90 gr. = 29.3 grains and are hemidrachms. Of the Dābwayhid rulers, Ferkhwān, Dātbūrdjmatūn and Khūrshīd are mentioned upon them. The coins of the first bear the years 60-77 (711-28), of the second 86-7 (737-8) and of the third 89-115 (740-66); these dates enable us to correct the chronology given by the historians. On some coins with the name Khūrshīd, earlier students read the dates 60-3, but this is to be explained by the similarity of *shast* and *dehsat* in the Pahlavi script and these coins are really of the years 110 and following. The assumption of a Khūrshīd I, who reigned in the sixties of the Ṭabaristān era (Mordtmann), is thus quite unfounded. As Khūrshīd died in 144 A.H. = 110 Ṭabaristān era, and there are coins with the names of Arab governors earlier than the year 116 Ṭab. era, it must be assumed that the Arabs continued to strike coins in the name of the earlier ruler of the land for a period after the conquest of Māzandarān, just as they did after the conquest of Persia under the caliph ʿUmar.

It was not till after Khūrshīd's death in 144/761 that ʿAbbāsid control was established over Ṭabaristān, and after a series of posthumous coins in Khūrshīd's name 110-14 Ṭab. era = 144-8 A.H./761-5 A.D., we get the first coins of the Arab governors, Khālid b. Barmak (coins from 150/767, Pahlavi legend *Halit*), and then ʿUmar b. al-ʿAlāʾ (coins from 155/772, Pahlavi legend *Aumr*). Kūfic legends appear in 122 Ṭab. era = 157/774 under ʿUmar b. al-ʿAlāʾ, and thereafter, governors' names are exclusively in this script (for Saʿīd b. Daʿladj, Yaḥyā b. Mikhnāḳ, etc.). See J. Walker, *A catalogue of the Muhammadan coins in the British Museum, i. Arab-Sassanian coins*, London 1941, pp. lxix-lxxx (list of ʿAbbasid governors and their coins at pp. lxxiv-lxxv), 130-61. The issue of these coins with Sāsānid types ended in the year 143 Ṭabaristān era (794, anonymous) but we have a coin of 161/812 on the obverse of which in place of the king's head—as earlier on the coins of the governor Sulaymān (136-7)—there is a rhombus with the puzzling Arabic letters *bḥ* and on the margin al-Faḍl b. Sahl Dhu 'l-Riyāsatayn (in Arabic) is named; on the reverse, instead of the altar with its guardians are three parallel designs like fir branches, between them an inscription in four lines giving the Muslim creed in Kūfic and the date and mint in Pahlavi (Tiesenhausen, in *ZVOAO*, ix, 224).

The mint name of these Arab-Sāsānid coins of the Arab governors of Ṭabaristān appears in Pahlavi script as *Tpurstan*, and the name of the actual town is not given. Presumably, it was mostly Āmul, but may have been at times other places, e.g. Sārī/Sāriyya, which was on occasion the capital of the province; only on one coin of the period, a *fals* of 168/784-5, is Āmul mentioned specifically. It should be noted, however, that odd Umayyad and ʿAbbāsid *dirhams* of conventional type are known from 102/720-1 onwards with the Arabicised name of the mint *Ṭabaristān*.

In the 3rd/9th century, in addition to the coins of the caliphal governors, we begin to find coins of the ʿAlid *dāʿīs*, beginning with al-Ḥasan b. Zayd b. Muḥammad, al-Dāʿī al-Kabīr [*q.v.*], from 253/867 onwards, and al-Ḥasan b. ʿAlī al-Uṭrūsh al-Nāṣir li 'l-Ḥaḳḳ [*q.v.*] and his successor al-Ḥasan b. Ḳāsim al-Dāʿī ilā 'l-Ḥaḳḳ [*q.v.* in Suppl.], who controlled Āmul at times. From 395/966 onwards, we possess coins of the Zaydī *imām* Abu 'l-Faḍl Djaʿfar b. Muḥammad, al-Thāʾir fi 'llāh [*q.v.*] and his son al-Mahdī, minted at Hawsam or Rūd-i Sar on the borders of Gīlān and Daylam (see S. M. Stern, *The coins of Āmul*, in *Num. Chron.*, 7th ser., vii [1967], 210 ff., 269-77, and HAWSAM in Suppl.). Interspersed with these coins bearing Shīʿī-type legends are found those of Sunnī type acknowledging the ʿAbbāsid caliphs, e.g. those minted by the Sāmānids, who held Āmul from 289/902, and then by the Ziyārid Wushmagīr b. Ziyār, who held it from 323/935, generally as a Sāmānid vassal. With the capture of Rayy in 334/945-6 by the Būyid Rukn al-Dawla, there began a long period of rivalry between the Būyids, the Sāmānids and the Ziyārids over possession of Gurgān and Ṭabaristān, reflected in coin issues of all three powers, sometimes with coins with more than one of them from the same year, e.g. 341/952-3 (Sāmānids, and unknown ? ʿAlid prince and Būyids) and 356/967 and 357/968 (Sāmānids and Ziyārids). Also in this period begins the series of coins (353-mid-6th century/964-mid-12th century) of the Bāwandid *ispahbadhs* or local rulers of Firrīm in the highlands of Ṭabaristān [see BĀWAND, and FIRRĪM in Suppl.], minted at first in Firrīm but latterly at Sārī, which bear Shīʿī-type legends which nevertheless acknowledge other suzerains like the Būyids, the ʿAbbāsid caliphs and the Saldjūḳs, see G. C. Miles, *The coinage of the Bāwandids of Ṭabaristān*, in *Iran and Islam, a volume in memory of Vladimir Minorsky*, ed. C. E. Bosworth, Edinburgh 1971, 443-60. No coins are extant of the Ziyārid *amīr* Ḳābūs b. Wushmagīr [*q.v.*] and his descendants (cf. Bosworth, in *Isl.*, xl [1964], 25-6), and coins of the Saldjūḳ sultans who replaced them only appear under Berk-yaruḳ from 481/1095 onwards.

After the Mongol invasions, we find issues of Māzandarān by the Il-Khānids, Sarbardārids, Tīmūrids, Ṣafawids, Afshārids and Ḳādjārs. In Āmul, anonymous copper coins were struck from the 10th/16th century onwards. On several pieces of this period the mint Ṭabaristān occurs. As these are all very rare, the issue must have been an occasional one. The dates are not preserved on any specimens. More common are copper pieces of the value of 4 *ḳāzbekī* (18-22 grammes = 280-340 grains) with the lion and sun and mint Māzandarān, which belong to the 12th/18th century. During the Russian occupation of Gīlān in 1723-32, to meet the shortage of currency provoked by the financial crisis in Russia at this time, Persian copper coins were overstruck with a Russian die (double-eagle) and circulated in the occupied provinces in place of Russian money. These coins are often called Māzandarān pieces, but this is not correct, as only Gīlān and not Māzandarān was occupied.

(R. VASMER - [C. E. BOSWORTH])

MĀZAR [see ṢIḲILIYYA].

MAZĀR [see MAḲBARA, ZIYĀRA].

MAZĀR-I SHARĪF, a town in northern Afghānistān, situated in lat. 36° 42' N. and long. 67° 06' E., at an altitude of 1,235 feet/380 m. in the foothills of the northern outliers of the Hindū-Kush [*q.v.*].

The great classical and mediaeval Islamic town of Balkh [*q.v.*], modern Wazīrābād, lay some 14 miles/20 km. to the west of Mazār-i Sharīf, and until the Tīmūrid period was the most important urban centre of the region. Previously to that time, the later Mazār-i Sharīf was marked by the village of Khayr, later called Khōdja Khayrān. On two different occasions, in the 6th/12th century after 530/1135-6 in the time of Sultan Sandjar [*q.v.*], and in 885/1480-1, in the reign of the Tīmūrid Sultan Ḥusayn, the tomb of the caliph ʿAlī was "discovered" here and its genuineness declared to have been proved. A place of pilgrimage (*mazār*) at once arose around the tomb with a considerable market; the second tomb which is still standing (the first is said to have been destroyed by Čingiz-Khān), was built in 886/1481-2. The *mazār* does not seem to have been of any particular importance during the time of the Özbegs and is hardly mentioned, although several Özbeg sultans were buried there. In the first half of the 19th century, the place is usually simply called *mazār* by travellers, the name *Mazār-i Sharīf* seems only to have arisen within the last hundred years. ʿAbd al-Karīm Bukhārī (ed. Schefer, 4) does not mention Mazār at all among the towns of Afghānistān; in 1832 when Alexander Burnes passed through it, it was a little town with about 800 houses. In 1866, the Afghān governor Naʾib ʿĀlim Khān, a Shīʿī, chose Mazār-i Sharīf as his residence; since then Mazār-i Sharīf has been the capital of Afghān Turkistān. In 1878 it was described by the Russian general Marveyev as one of the best towns in Northern Afghānistān with about 30,000 inhabitants (L. F. Kostenko, *Turkestanskiy kray*, St. Petersburg 1880, ii, 157).

It was the selection of Mazār-i Sharīf as the administrative capital of northern Afghānistān which caused the town's fortunes to rise, so that in recent times, it has become a centre for local government as well as continuing to fulfill its old commercial role arising from its position on a route from Kābul to the ferry-point of Pata Kesar on the Oxus [see ĀMŪ-DARYĀ], by means of which goods have for long been exported to Russian Central Asia. In particular, it is a centre for the trade in karakol fur [see ḲARĀ-KÖL]. The visits of pilgrims seeking healing and blessing at the shrine are still important, as are the religious festivals there of the Nawrūz "raising of the standard" and that of its lowering 40 days or so later. Mazār-i Sharīf now has civil and military airfields, a power station and a fertiliser plant. It is the chef-lieu of the province (*wilāyat*) of Balkh; in *ca.* 1959, Humlum estimated its population at 75,000.

Bibliography: On the first discovery of the tomb of ʿAlī, see Abū Ḥāmid al-Andalusī al-Gharnāṭī, *Tuḥfat al-albāb*, ed. G. Ferrand, in *JA*, ccvii (1925), 145-8, and on the second discovery, Khʷāndamīr, *Ḥabīb al-siyar*, lith. Tehran 1271/1855, iii, 260-1. For the town in recent times, see C. E. (W. BARTHOLD - [C. E. BOSWORTH])

AL-MĀZARĪ, ABŪ ʿABD ALLĀH MUḤAMMAD b. ʿAlī b. ʿUmar, jurist of Ifrīḳiya who was surnamed "al-Imām" on account of his learning and his renown. His *nisba* refers to the Sicilian town of Mazzara (*Māzar* in Arabic), the native place of his family, but it is not known whether the latter had emigrated to Ifrīḳiya before his birth, which may be dated at 453/1061 since he died in Rabīʿ I 536/October 1141, at al-Mahdiyya [*q.v.*], at the age of 83 lunar years. It was in this last-named town that he settled after completing his traditional studies at Sfax as a pupil of al-Lakhmī (d. 478/1085), and at Sousse, under the guidance of Ibn al-Ṣāʾigh. These two masters, who had left Kairouan (al-Ḳayrawān) after the Hilālian invasion, transferred to the Mediterranean coast the Ifrīḳiyan Mālikī tradition, which was linked to the founder of the *madhhab* by a continuous chain; notable figures belonging to this chain include Saḥnūn, Ibn Abī Zayd, Abū ʿImrān al-Fāsī, etc. (see the table in M. M. Ould Bah, *La littérature juridique et l'évolution du Mālikisme en Mauritanie*, Tunis 1981, 25). Al-Māzarī perpetuated this tradition by establishing it at al-Mahdiyya, where he became head of the local judicial school, while representing a link in the chain which came to its end with Khalīl b. Isḥāḳ [*q.v.*], the supreme authority of Maghribī Mālikism.

Although sympathetic to the doctrine of the Shāfiʿīs, as well as to the opinions of the Ashʿarīs in *kalām*, since he is said to have passed on to posterity the *Tamhīd* of al-Bāḳillānī (d. 403/1013 [*q.v.*]), he founded his numerous and henceforward renowned *fatwās* on strictly Mālikī doctrine, without feeling himself completely bound by the interpretations of his predecessors; in general, he opted for what was *mashhūr*, applied the principle according to which "of two evils, the lesser must be chosen", and, in a sense, tended towards a moderate practice of *idjtihād*. Al-Māzarī attracted a considerable number of disciples and had dealings with other individuals who were to become famous, including Ibn Tūmart (d. 534/1130 [*q.v.*]), whose life he saved when the latter was being chased by the governor of al-Mahdiyya after having broken jars of wine at a market in the town. Ibn al-Abbār (in the *Takmilat al-Ṣila*, ed. Codera, Madrid 1887-9) mentions prominent Andalusians who attended his lectures or corresponded with him, in particular, Ibn al-ʿArabī (Abū Bakr, d. 543/1148 [*q.v.*]); the *ḳāḍī* ʿIyāḍ (d. 544/1149 [*q.v.*]), who nevertheless gives no biography of him in the *Madārik*; Ibn Khayr al-Ishbīlī (d. 575/1179 [*q.v.*]; and Ibn Rushd (d. 595/1198 [*q.v.*]).

This jurist seems to have cultivated the humanities and poetry, and to have studied mathematics and medicine, but he does not appear to have excelled in these disciplines, even if the *Kitāb fi 'l-ṭibb* which is attributed to him is indeed his own work. In fact, his name remains linked specifically to the *fatwās* which

may be found in the various mss. of the *Djāmiʿ masāʾil al-aḥkām* by al-Burzulī (d. *ca.* 841/1438 [*q.v.*]), as well as in the *Miʿyār* of al-Wansharīshī (d. 914/1508 [*q.v.*]), lith. Fās 1314-15 (e.g. ii, 192-4, 206-7, 321, iii, 230-1, 234-6, 241-2, 244-7, 249-51, 280, vi, 212, 214, 217, 219, 226-7, vii, 154, viii, 114-5, 130-1, 205, 220, 271, 285, ix, 52-3, 417, 421, 454, x, 245, 291, xii, 233, 243-7). His works numbered about a dozen, but only three of them have survived and not one has been published; they consist after all of commentaries which nevertheless may be regarded as holding a certain interest, since they contain a wealth of documentation and tackle various important questions; this is especially so in the case of *al-Muʿlim bi-fawāʾid Kitāb Muslim*, which appears to be the earliest commentary on the *Ṣaḥīḥ* of Muslim (see the judgment of Ibn Khaldūn in the *Muḳadimma*, ii, 403; tr. de Slane, ii, 475-6; tr. Rosenthal, ii, 459; on the mss. and the sequel attributed to the *ḳāḍī* ʿIyāḍ, the *Ikmāl al-Muʿlim*, see Brockelmann, S I, 265): the other works preserved are the *Kitāb Īḍāḥ al-maḥṣūl min Burhān al-uṣūl*, on the *Burhān* of al-Djuwaynī (d. 478/1085 [*q.v.*]) and the *Sharḥ ʿalā Talḳīn ʿAbd al-Wahhāb* [*al-Thaʿlabī*] (d. 422/1031; see Brockelmann, S I, 660).

Bibliography: Two monographs have been devoted to this jurist, one in Arabic, by Ḥ. Ḥ. ʿAbd al-Wahhāb, *al-Imām al-Māzarī*, Tunis 1955, and the other, in French, by H. R. Idris, *L'école mālikite de Mahdia: l'imām al-Māzarī (m. 536/1141)*, in *Etudes d'orientalisme ... Lévi-Provençal*, i, Paris 1962, 153-63; see also idem, *Essai sur la diffusion de l'asʿarisme en Ifrîqiya*, in *CT*, ii (1953), 12-13; *idem*, *La Berbérie orientale sous les Zīrīdes*, Paris 1959, index; see also M. Amari, *Bibliotheca arabo-sicula*, Leipzig 1857, i, 125, 133, 522, 629, ii, 65-8; idem, *Storia dei Musulmani di Sicilia*, 2nd ed., revised by C. A. Nallino, Catania 1937-9, ii, 544-9; *Centenario della nascita di Michele Amari*, Palermo 1910, i, 384-9, 390-402, ii, 92-4, 217-23, 224-44, 492-3; A. M. Turki, *Consultation juridique d'al-Imām al-Māzarī...*, in *MUSJ* 1/2 (1984), 691-704. Arabic sources: Ibn Farḥūn, *Dībādj*, 279-81; Ibn Ḳunfudh, *K. al-Wafayāt*, Algiers 1939, 42; Ibn ʿIdhārī, *Bayān*, tr. Fagnan, i, 469; Ibn al-ʿImād, *Shadharāt*, iv, 114; Makhlūf, *Shadharāt al-nūr al-zakiyya fī ṭabaḳāt al-Mālikiyya*, Cairo 1350, i, 127-8.

Two colleagues of this jurist, bearing the same *kunya*, the same *ism* and the same *nisba* are often confused with him, especially since they are practically contemporaries:

The first, ABŪ ʿABD ALLĀH MUḤAMMAD B. ABĪ 'L-FARADJ AL-MĀZARĪ, surnamed al-Zakī (d. 512/1118), who was also a native of Mazzara and an Ashʿarī, resided at the Ḳalʿa of the Banū Ḥammād [*q.v.*], then was taught by numerous masters of Kairouan before going to settle in the East. He is the author of a work on Ḳurʾānic readings, of a treatise on physical contacts effected through error, the *Kashf al-ghiṭāʾ ʿan lams al-khaṭāʾ*, and of an appraisal of certain *ḥadīths* quoted by al-Ghazālī (d. 505/1111 [*q.v.*]), in the *Iḥyaʾ*, *al-Kashf wa 'l-inbāʾ ʿalā 'l-mutardjam bi 'l-Iḥyāʾ*.

Bibliography: Ibn Nādjī, *Maʿālim al-īmān*, iii, 250-2; Amari, *Storia*[2], ii, 561-2; M. Asín Palacios, *Un faqīh siciliano contradictor de al-Gazzālī*, in *Centenario ... Amari*, i, 380-2, 548, n. 3, ii, 216; H. R. Idris, *Essai sur la diffusion de l'asʿarisme en Ifrîqiya*, in *CT*, ii (1953), 12; idem, *Le crépuscule de l'école mālikite kairouanaise*, in *ibid.*, iv (1956), 505-7; idem, *Quelques juristes ifrîqiyens de la fin du X^e siècle*, in *RAfr.*, c (1956), 361; idem, *Zīrīdes*, ii, 731-2.

The second, ABŪ ʿABD ALLĀH MUḤAMMAD B. MUSLIM B. MUḤAMMAD AL-MĀZARĪ AL-ḲURASHĪ AL-ISKANDARĀNĪ (d. 530/1135), who lived in Alexandria, was also an Ashʿarī, but more of a theologian (*mutakallim*) than a jurist as such, judging from the *Kitāb al-Mihād*, a commentary on the *K. al-Irshād ilā tabyīn ḳawāʿid al-iʿtiḳād* of al-Djuwaynī (d. 478/1085 [*q.v.*]).

Bibliography: Ibn Farḥūn, *Dībādj*, 280; M. Asín Palacios, *op.cit.*, ii, 216; Amari, *Storia*[2], ii, 546, 548; H. R. Idris, *A propos d'un extrait du "Kitâb al-Mihâd" d'al-Mâzarî al-Iskandarânî*, in *CT*, ii (1953), 155.

(CH. PELLAT)

MAZĀTA, the name of an ancient and powerful Berber people which belonged to the great tribal family of the Lawāta [*q.v.*]. According to Ibn Khaldūn, who makes brief mention of the Mazāta in his *Histoire des Berbères*, they constituted an important branch descended from Zayr, son of Lawā, ancestor of the Lawāta. According to Ibn Ḥawḳal (4th/10th century), the Mazāta and the Lawāta belonged to the major Berber tribal group of the Zanāta. Yet another historian of the Berbers, Ibn Ḥazm (d. 456/1064), considers the Mazāta and the Lawāta as belonging to the Coptic, i.e. the Egyptian, race. This conception is to be understood as meaning that the ancestors of the Mazāta (who were, in the opinion of the present writer, the people known to the ancient Egyptians as the Mashawasha) as well as those of the other Libyan tribes (called Lebū or Libū in the hieroglyphic sources) became intermingled, in antiquity, with the true Egyptians. This process of fusion probably took place predominantly in the western part of the Delta.

In considering the name of the tribe of the Mashawasha and its identification with that of the Mazāta, it must be stated that the form of this nomenclature as found in the ancient hieroglyphic sources is a collective noun composed of the singular noun *Masha(wa)*—which is the name of the eponymous founder of the tribe—and the suffix *-sha*, the designation of a collective in Libyan and Old Berber. It appears furthermore that the Libyco-Berber suffix *-sha* (or *-sa*) derives from another language which the linguists call Aegean and which was spoken by certain small tribes belonging, in the 13th and 12th centuries B.C., to the "Peoples of the Sea". It is read, for example, in the Egyptian inscriptions dating from this period that one of the tribes in question, the Achaeans, bore the name of *Akaywasha* and that the tribe of the Siculi which was later to inhabit Sicily was called *Shakalasha* (or *Sakalasa*). The same ethnic suffix was also used in Old Berber. Thus, e.g. it is discovered from the writings of Ibn Khaldūn that the descendants of a certain Ḍarī formed the tribe which bore the name of Ḍarīsa, a collective nomenclature with the collective suffix *-sa*. Returning to the question of the Mashawasha (or Masawasa, i.e. Mazāta), it is to be believed that these two tribes were identical, or rather that the Mazāta were distant descendants of the ancient Mashawasha. In fact, the termination *-āta*, which concludes certain Berber ethnic names (e.g. that of the Law-āta) is composed of two suffixes, of which the first, *-āt-*, which is Berber, added to the eponymous name, makes it a collective noun, and the second, the final *-a* (as in the names of the Lawāt-a and the Mazāt-a) has been added by mediaeval Arab authors to give this noun an Arabic plural (Lawāta, Mazāta). In this manner, the Berber suffix *-āt-* has the same function as the Libyco-Berber suffix *-sha* or *-sa*.

Initially, the Mashawasha inhabited western Libya, in other words Tripolitania and what is now Tunisia. At about the time of the end of the New

Empire, they took the decision to conquer Cyrenaica and Marmarica, lands which had been occupied by other Libyan tribes. The population of these lands offered fierce resistance, but the Ma<u>sh</u>awa<u>sh</u>a massacred them and subjugated them by force. Since the conquerors brought with them their families and their livestock, this constituted a veritable *Völkerwanderung*. After the conquest of Cyrenaica and Marmarica, the Ma<u>sh</u>awa<u>sh</u>a resolved to attack Egypt. Their first attempts at conquest took place during the reigns of the Pharaohs Sethi I and Rameses II in the 13th century B.C., and ended in failure. It was only during the reign of the Pharaoh Mineptah that the chieftain of the Ma<u>sh</u>awa<u>sh</u>a named Meriaï, son of Didi, achieved a degree of success. This chieftain was assured of the support of the "Peoples of the Sea", a federation of tribes originating from southern Europe and western Asia who sowed terror throughout the Near East. With the aid of these peoples the Ma<u>sh</u>awa<u>sh</u>a succeded, in 1227 B.C., in seizing the oases situated on the Egypt-Libya frontier, as well as part of the western Delta. Later however, the Egyptians struck a terrible blow against the Ma<u>sh</u>awa<u>sh</u>a and their allies in a major battle which took place at Per-Ir, to the north-west of Memphis. The soldiers of the Pharaoh, riding in chariots, pursued and massacred the fugitives. Among those slain on the battlefield were thousands of Ma<u>sh</u>awa<u>sh</u>a, of eastern Libyans and of Aḳaywa<u>sh</u>a, and hundreds of *Tursa* (*Tur<u>sh</u>a*), of *Sakalasa*, of *Sardana* (<u>Sh</u>ardana) and of Lycians. In spite of this defeat the Ma<u>sh</u>awa<u>sh</u>a, aided by the eastern Libyans, mounted a fresh invasion in 1194 B.C. during the reign of Rameses III. The war was keenly contested, but the Ma<u>sh</u>awa<u>sh</u>a were eventually defeated and forced to evacuate the western Delta. In the year 1188 B.C., during the reign of the same Pharaoh Rameses III, there was yet a third attempt at the conquest of Egypt on the part of the Ma<u>sh</u>awa<u>sh</u>a, aided by their Libyan allies, and this too ended with victory going to the Egyptians. But on this occasion the Pharaoh understood that it would be impossible to subdue the Ma<u>sh</u>awa<u>sh</u>a and the eastern Libyans, who had been driven to despair by the catastrophic state of their country which was becoming an arid wilderness. He therefore permitted the Ma<u>sh</u>awa<u>sh</u>a and the eastern Libyans to settle in the Delta, in exchange for an undertaking on their part to supply mercenaries to the Egyptian army. In this manner, the military conflict between the Ma<u>sh</u>awa<u>sh</u>a and the eastern Libyans on the one hand and the Egyptians on the other was concluded in a kind of amicable arrangement. There thus began in the Delta a vigorous process of intermingling between the native Egyptians and the Ma<u>sh</u>awa<u>sh</u>a and Libyan settlers, facilitated by mixed marriages which became commonplace not only among the lower strata of society, but also among the upper classes, where the Ma<u>sh</u>awa<u>sh</u>a achieved posts of seniority in the sacerdotal and military hierarchy. In the 11th century B.C. one of these dignitaries, named Sheshonq, married an Egyptian princess of the royal family, and his great-grandson, also named Sheshonq, who was commander of the Egyptian army and bore the title of "Grand Chieftain of the Ma<u>sh</u>awa<u>sh</u>a", took over supreme power in the country in the year 950 B.C. and, after the death of the Pharaoh Psousennes II, founded the XXII Egyptian dynasty. The Ma<u>sh</u>awa<u>sh</u>a and the Libyans of the Delta and of Libya recognised the authority of Sheshonq. It should be added that until this moment, these two ethnic groups had lived in complete autonomy.

Towards the end of the XXII dynasty, a prince of this dynasty named Pedoubastis founded the XXIII dynasty. It is interesting to note that for a period of time the Libyan Pharaohs of these two dynasties reigned simultaneously, and also maintained the best of mutual relations. Thus there began the partition of the Delta, where in 747-30 B.C. three princes claimed the title of Pharaoh. Ultimately, a Libyan prince of Sais, probably himself a descendant of Sheshonq I, displaced the last Pharaohs of the two rival dynasties and founded the XXIV dynasty, known as the Saite. The Libyan period lasted two centuries, during which Egypt remained under the domination of the minority composed of Ma<u>sh</u>awa<u>sh</u>a and of other Libyan tribes.

The Ma<u>sh</u>awa<u>sh</u>a and the Egyptianised Libyans were still in evidence in the 2nd century A.D. These are without doubt the Libu-Aegyptii who, according to Ptolemy, constitute the population of Mareotis, territory situated in the western Delta around Lake Mariout.

With regard to the non-Egyptianised Ma<u>sh</u>awa<u>sh</u>a, outside Egypt, they may be identified, in all probability, with the nomads of Libya known as Mazues and mentioned by Stephanus of Byzantium following Hecateus (6th century B.C.), and are to be distinguished from the Maxues who were established, according to Herodotus (5th century B.C.) in the coastal region of the lesser Syrte. It should be added that the Mazues were nomads while the Maxues were cultivators. Hecateus does not specify which part of Libya they inhabited. It is very likely that they are the ancestors of the Mazāta of Cyrenaica and eastern Tripolitania. As for the name of this tribe, it is composed of the root *Maz-* (singular noun, of which Mazāta is the Berber collective form) with the Greek termination *-ues* (*-yes*).

It also seems necessary to identify with the ancient Ma<u>sh</u>awa<u>sh</u>a (*Ma<u>sh</u>a(wa)-<u>sh</u>a*) known from the hieroglyphic inscriptions and the mediaeval Mazāta of the Arab authors, the Libyan tribe of the Mastites (*Mas-t-itae*) located by Ptolemy in the province of Mareotis, in the region of Lake Mariout, on the western frontiers of the Delta. In this ethnonym, the termination *-itae* may probably be of Greek origin, and the suffix *-t-* (in place of *-āt*) the sign of the collective in Libyan.

The Arab historians and geographers knew of the Mazāta at a very early date. In fact, when the renowned general ʿUḳba b. Nāfiʿ set out for the Ma<u>gh</u>rib in 46/666-7, passing through Ma<u>gh</u>madā<u>sh</u> (formerly Macomades Selorum, currently Marsa Zafran or Medinet es-Soltan), through Waddan (currently the oasis of Djofra) and through the Fazzān as far as the territory of Kawār, he made his return journey through the town of Zawīla, one of the capitals of the Fazzān, whence he made his way towards the territory of the tribe of the Mazāta in eastern Tripolitania. This tribe was, in the 7th century A.D., quite powerful and it possessed a number of fortresses (Ar. *ḳuṣūr*) which ʿUḳba b. Nāfiʿ captured. This account, which is known to us through the intermediary of Ibn ʿAbd al-Ḥakam (d. 257/871), is the earliest information available concerning the Mazāta emanating from Arabic sources, being based on the accounts of numerous early informants, the earliest of whom, Yazīd b. Abī Ḥabīb, died in 128/746, only eighty years after the expedition of ʿUkba b. Nafiʿ. The other Arabic references to the Mazāta are of much later date and derive from the period of the 3rd-8th/9th-14th centuries.

According to mediaeval Arab authors, the Mazāta were a very numerous and prosperous people, simultaneously nomadic (or semi-nomadic) stockbreeders

and cultivators, whose centres of population and pastures were dispersed throughout North Africa, from the province of al-Buḥayra (between Alexandria and Old Cairo) to the east as far as the neighbourhood of Tāhart (Tiaret) to the west. They adopted orthodox Islam at a very early stage, but at the time of the Khāridjī revolution which affected all the Berbers of North Africa at about the middle of the 8th century A.D., they went over to Khāridjism. It is not impossible that they initially adopted Ṣufrī doctrines, as did the majority of the Berber tribes. However, some twenty or thirty years later, they were already professing Ibāḍism, sometimes following the very moderate doctrines of the Wahbī branch, sometimes the very extremist doctrines of the Nukkarī branch, which became very popular among the Berbers from the period of Abū Yazīd [*q.v.*], the "Man on the Donkey", who rebelled in the first half of the 4th/10th century against the Fāṭimid caliphate. It was only at a fairly late date, probably about the 7th/13th century, that the Mazāta began, little by little, to reject Ibāḍī beliefs, turning to Sunnism. The written sources supply little information on this subject. It may be added, furthermore, that according to Ibn Ḥawḳal (4th/10th century), a section of the Mazāta of Ifrīḳiya professed Muʿtazilī doctrines.

The Mazāta were divided into numerous more or less powerful sub-tribes (Ar. *ḳabīla*, *fakhdh*) and many of their names are indicated by Ibn Ḥawḳal, Ibn Khaldūn, an anonymous list from the 7th/13th century of eminent Ibāḍī personalities classified by tribe, and finally the *Kitāb al-Siyar* of Abu 'l-ʿAbbās al-Shammākhī, an Ibāḍī historian of the 10th/16th century. Among these texts, that of Ibn Ḥawḳal gives a list of the sub-tribes of the Mazāta mingled with those of the Lawāta, in such a way that it is impossible to separate these peoples. The list of the Mazāta sub-tribes presented by Ibn Khaldūn is very incomplete (it includes the names of only six of these segments). As for al-Shammākhī, he supplies the names of the sub-tribes of the Mazāta and the *nisba*s on these names, and they are found dispersed among the biographies of renowned personalities mentioned in his *Kitāb al-Siyar*. It should be added that some sub-tribes of Mazāta are also mentioned in other Ibāḍī works, including the *Kitāb al-Sīra* of Abū Zakariyyāʾ al-Wardjalānī (6th/12th century) or the *Kitāb Ṭabaḳāt al-mashāyikh* of Abu 'l-ʿAbbās al-Dardjīnī (7th/13th century).

The names of these Mazāta sub-tribes are as follows: — 1. Banū Maṭkūd; 2. Banū Wīslū; 3. Banū Madūna; 4. Zamrata (this name is known only from the *nisba* al-Zamratī; the Berber form of it is Izəmratən and the reading given by Ibn Ḥawḳal is to be thus corrected); 5. Banū Zimmarīn; 6. Banū Ardjān; 7. Banū Dadjma or Dadjama (read Dagma, Dagama); 8. Banū Masāra; 9. Banū Īlayan (in Ibn Khaldūn's work, the incorrect orthography of this name is found: B. Layān); 10. Banū Faṭnāsa; 11. Banū Kazīna; 12. Banū Ḳarna; 13. Banū Madjīdja; 14. Banū Ḥamza (thus according to Ibn Ḥawḳal; Ibn Khaldūn incorrectly writes it as Ḥamra); 15. Awmāsht (also Ūmāsht); this last ethnonym seems to be composed of the prefix *Aw-* (*Ū-*) which signifies "son" in Berber, and of the eponymous name *-mash-*, to which has been added the Berber sign of the collective *-t*; it closely resembles one of the ancient names of the Mazāta, this being *Mas-t-itae*, which has been considered above.

1. *Egypt.* The most easterly settlements of the Mazāta embraced, in the Middle Ages, the Egyptian province called al-Buḥayra [*q.v.*] situated on the western borders of the Delta, between Alexandria and Old Cairo, i.e. the same region previously inhabited by the ancestors of the Mazāta, the Mashawasha of the hieroglyphic sources and the Mastitae of the ancient sources. According to Ibn Khaldūn, there were to be found in the Buḥayra numerous nomadic (or rather semi-nomadic) peoples who belonged to the Berber tribes of the Mazāta, Hawwāra and Zanāta. According to him, these tribes tarried in the Buḥayra to sow their crops but, at the approach of winter, moved to the neighbourhood of al-ʿAḳaba and Barḳa. He adds that the above-mentioned tribes paid a tax (Ar. *kharādj*) to the sultan of Egypt. It is not known which al-ʿAḳaba is in question here, since there are two places with this toponym, al-Aḳaba al-Ṣaghīra ("the small slope, pass", Catabathmus parvus of the ancient sources), forty leagues from Alexandria to the west, and al-ʿAḳaba al-Kabīra ("the great slope, pass", Catabathmus magnus of the ancient sources), forty leagues to the west of the former. Al-Bakrī (5th/11th century) mentions the settlements (or rather the winter habitat) of these Mazāta "at the foot of the slope of al-ʿAḳaba", without specifying whether this is Catabathmus magnus or parvus. It is on this side of Egypt, to the east of al-ʿAḳaba al-Ṣaghīra, that the place known as Rammāda is to be located, a site which according to al-Yaʿḳūbī was inhabited by the Mazāta and other Berber tribes.

2. *Cyrenaica* (Barḳa). If Ibn Khaldūn is to be believed, the regular haunts of these Mazāta who possessed agricultural land in Egypt, in the province of al-Buḥayra, on the Western borders of the Delta, were located in part in Cyrenaica (Barḳa), where this people invariably spent the winter. Arabic sources of information regarding the Mazāta of Cyrenaica are few in number and relatively late. The earliest reference to the Mazāta of Cyrenaica is owed to Ibn Khaldūn. According to this historian, they participated in the Umayyad revolt which took place in Cyrenaica *ca.* 395/1004-5. Al-Idrīsī (6th/12th century) claims that in his time the Mazāta of Barḳa were already Arabised. These courageous horsemen inhabited the regions of Cyrenaica situated between the town of Ṭulmaytha (the ancient Ptolemais) and Laḳḳa (Cape Locco or Luca on modern maps, not far from Tobruk). Two centuries later, Muḥammad b. Ibrāhīm al-Kutubī (Waṭwāṭ, d. 718/1318) locates the settlements of the Mazāta of Barḳa on a mountain (Djabal al-Akhḍar) situated to the west of the town of Barḳa. An analogous reference is also found in the *Cosmography* of al-Dimashḳī (d. 727/1327).

3. *Tripolitania.* A very significant portion of the Mazāta inhabited the eastern part of what is now Tripolitania, as neighbours of the Lawāta of Barḳa to the east and the Hawwāra of central Tripolitania to the west. The eastern limit of their domain was constituted, at about the end of the 3rd/9th century, by a point situated at one day's journey to the west of Adjdābiya. The western limit of the territory of the Tripolitanian Mazāta passed near Tawargha (Taouordga or Taourga), to the south of Misurata. In the south, the habitat of this tribe extended beyond the Djebel es-Soda, towards the frontier of the Fazzān, the population of which remained, in the 3rd/9th century, in a state of war with the Tripolitanian Mazāta. The Mazāta formerly constituted the majority of the inhabitants of Waddān, ancient provincial capital of the oasis of Djofra, where nevertheless there are also to be noted, in this period, the presence of two Arab tribal groups. The desert town of Tādjrift, situated between Waddān and the town of Surt (currently Medinet es-Soltan) on the coast, three

days' journey from the first-named place, which may be identified with what is now Tagrift (Tagrefet), was populated in the 4th/10th century by inhabitants of Waddān, in other words by Mazāta mingled with Arabs. The oasis of Zalhā (Sella or Zella on modern maps) also formed, in the 4th-5th/10th-11th centuries, part of the territory of the Mazāta, as is revealed by a passage from the writings of al-Bakrī (Muḥammad b. Yūsuf, Ibn al-Warrāḳ). Finally, in this period there belonged to the people of Waddān an unnamed *manzil* ("station") situated midway between Tamassā (Tmassa on modern maps, to the northeast of Mourzouk) and Zalhā, and apparently to be identified with what is now el-Fugha or Fogha, a pleasant oasis and a village with ruins probably of Garamantian origin.

In the early Middle Ages, the land of the Mazāta embraced two different districts, these being Surt and Waddān. The district of Surt corresponded to the coastal zone of what is now eastern Tripolitania, and that of Waddān occupied the whole interior of this land. The former of these districts was known, from the year 46/666-7, by the name of Surt or *arḍ Surt* ("land of Surt"). Later, the localities belonging to this territory received the name of Ḳuṣūr Surt ("Castles of Surt"). As for Waddān, which appears for the first time in the same year of 46/666-7 as a country having its own king, it was still considered in the 6th/12th century as an administrative district (A. *ʿamal*, also *arḍ*, "country") apart. It was, furthermore, closely linked to the land of Surt. The district of Waddān embraced, no doubt, all the places in the interior of eastern Tripolitania which were inhabited by Mazāta and by people of Waddān, these being Zalhā (Sella), Tadjrift (Tagrift) and el-Fugha.

The Mazāta of eastern Tripolitania who had probably inhabited this land since earliest times (it is likely that this land was the cradle of the ancient Mashawasha, distant ancestors of the Mazāta) rallied at an early stage to the cause of Ibāḍism. The district of Surt constituted a province of the ephemeral Ibāḍī state of the *imām* Abu 'l-Khaṭṭāb ʿAbd al-Aʿlā b. al-Samḥ al-Maʿāfirī (140-4/757-61). Numerous individuals, probably members of the branch of the Mazāta which inhabited eastern Tripolitania, played a significant role in the army of this *imām*. It was also in the territory of Surt, at Maghmadās (in ancient times Macomades Syrtis or Macomades Selorum), that there took place in 141/759 a battle between the army of Abu 'l-Khaṭṭāb and that of the ʿAbbāsid general Abu 'l-Aḥwaṣ ʿUmar b. al-Aḥwaṣ al-ʿIdjlī. After the defeat and death of Abu 'l-Khaṭṭāb in 144/761, the victorious Arab general Ibn al-Ashʿath took control of the district of Surt and sent troops, in 145/762-3, to conquer the land of Waddān. The capital of this region was taken and its Ibāḍī population put to the sword.

In spite of the defeat of Abu 'l-Khaṭṭāb, Ibāḍism survived for a long period of time in eastern Tripolitania. In fact, the land of Surt appears in the time of the Ibāḍī *imām* ʿAbd al-Wahhāb b. ʿAbd al-Raḥmān b. Rustum (168-208/784-823) to be a province of the Rustumid state of Tāhart. The Mazāta of eastern Tripolitania continued to profess Ibāḍī doctrines. In fact, at about the end of the 3rd/9th century, the Mazāta were still independent and governed by an indigenous chieftain, apparently an Ibāḍī. At a later date, al-Dardjīnī (7th/13th century) notes the presence of encampments of Mazāta in the neighbourhood of Tripoli, in the first half of the 5th/11th century, but he considers that the people in question are not the Mazāta of eastern Tripolitania, but the branch of this tribe occupying the region of Ḳābis (Gabès) in south-eastern Tunisia, which will be considered below. Similarly, nothing definite is known regarding the origin of Dūnās b. al-Khayr al-Mazātī who was the chieftain (Ar. *raʾīs*) of the Ibāḍīs of Tripolitania under the dynasty of the Banū Khazrūn (493-540/1100-45). The sources of the 8th/14th and 9th/15th century are almost entirely silent regarding the inhabitants, evidently Mazāta and Ibāḍīs, of eastern Tripolitania. It is known however that the people of Sokna, in the oasis of el-Djofra, recall having formerly been Ibāḍīs, which proves that Ibāḍism has survived in these regions until a relatively recent period.

Remnants of the Mazāta also lived in the Djabal Nafūsa, in the hinterland of western Tripolitania. Thus it is known, from Ibāḍī chronicles, that people originally of the Mazāta tribe of Dadjma (Dagma, Dagama) lived at Didjī (currently Deggui) in the western part of the Djabal Nafūsa. It is also interesting to note that the name of the important village of Ardjān or Arkān (currently Kherbet Ardjan, not far from Mezzou, to the north of Djādū in the eastern part of the Djabal Nafūsa) recalls that of the Banū Ardjān, a sub-tribe of the Mazāta which has been mentioned above.

4. *Tunisia*. A segment of the Mazāta also lived in the mountains of south-eastern Tunisia, alongside tribes of the Lawāta, the Lamāya and the Zanzafa, and not far from the major Berber population of Banū Dammar (Demmer). The Mazāta, the Lawāta, the Lamāya and the Zanzafa lived in the vicinity of a place called Tāmūlast, of which the exact location is not known. It was this place which produced the great Ibāḍī historian, theologian and lawyer Abu 'l-Rabīʿ Sulaymān b. Yakhlaf al-Mazātī (d. 471/1078-9 [*q.v.*], and see below). It was the regional centre of a district called Djabal Tāmūlast, situated "below" the Djabal Dammar.

Another branch of the tribe of the Mazāta resided in the vicinity of the town of Ḳābis (Gabès), alongside other Berber peoples, such as the Lawāta, the Lamāya, the Nafūsa, the Zawāgha and the Zawāra. This is known from a passage of the *Kitāb al-Masālik wa 'l-mamālik* of al-Bakrī (5th/11th century). It is interesting to recall that Ibn Ḥawḳal (4th/10th century) mentions the Berber populations living in the neighbourhood of Gabès as tillers of the soil. According to this author, they were heretics, i.e. Ibāḍīs. The chroniclers call this people Mazātat Ḳābis. There were also Ibāḍī Mazāta at Zarīḳ (Zerig el-Barraniya on modern maps), a locality situated close to Kettana, to the south-east of Gabès. Among the residents of this place was the Ibāḍī *shaykh* ʿAbbūd b. Manār al-Mazātī, the maternal uncle of Abu 'l-Rabīʿ Sulaymān b. Yakhlaf al-Mazātī.

Ibn Ḥawḳal also speaks of the large tribe of the Mazāta living in the region of Ḳasṭīliya (Tozeur?), of Ḳafṣa (Gafsa), of Nafzāwa, of al-Ḥammā, of Sumāṭa and of Bishrī (Bechri on modern maps). It is probably among this segment of the Mazāta that there were recruited the *fityān* and the *talāmidha* of Mazāta origin who lived, at about the 5th/11th century, if al-Shammākhī (10th/16th century) is to believed, in the Ḳasṭīliya (here = Bilād al-Djarīd). In the canton of Nafzāwa (Nefzaoua on modern maps) there lived a segment of the Mazātian sub-tribe of the Banū Izəmratən (or Izmərtən) which professed the Ibāḍī-Wahbī faith; according to Ibn Khaldūn this group belonged not to the Mazāta, as stated by Ibāḍī sources, but to the great Berber family of the Zanāta. The town of Faṭnāsa (Fetnassa on modern maps) also owes its name to the homonymous Berber sub-tribe,

a branch of the Mazāta. Between Tawzar (Tozeur) and al-Ḥāmma lived the Mazāta sub-tribe of the Kazīna.

Further to the north-east of the Bilād al-Djarīd and of Ḳafṣa (Gafsa), there were numerous Ibāḍī-Wahbī Mazāta on the plain of Kayrawān (called Faḥṣ al-Ḳayrawān in the Ibāḍī chronicles). It is curious to note that, in spite of their Khāridjī faith, these Mazāta were loyal servants of the Zīrid kings of Ifrīḳiya. A renowned Zīrid general had his origin in this segment of the Mazāta which bore, in the chronicles of this seat, the name of Mazātat al-Ḳayrawān.

In all probability, there were formerly also Ibāḍī Mazāta in the Djebel Ousselet, the Djabal Wasalāt of the Arab geographers, a canton situated to the west of the town of Ḳayrawān. It is no doubt with this name that there should be associated the ethnic al-Wasalātī, applied to numerous Ibāḍī individuals of the 4th/10th and 5th/11th centuries, members of the tribe of the Mazāta, including for example of the *shaykh* ʿAbd al-Ghanī al-Wasalātī al-Mazātī, and the *shaykh* Fatūḥ b. Abī Ḥādjdjī al-Wasalātī al-Mazātī. According to the anonymous list of Ibāḍī *shaykhs* of the 7th/13th century, ʿAbd al-Ghanī belonged to the Mazāta branch of Awmāsht.

According to the Ibāḍī historian Abu 'l-ʿAbbās al-Dardjīnī, the Mazāta of Ifrīḳiya were very rich (in particular, they possessed a large number of horses) and very warlike.

5. *Algeria.* An important branch of the Mazāta lived in what is now Algeria, in particular in the Zāb and the Hodna, as well as in the region north of Aurès, the Djabal Awrās of the Arabic sources. The mediaeval Arab authors mention there, among others, a segment of the Mazāta in the vicinity of Baghāya (Baghaï on modern maps), in a plain intersected by streams. In speaking of the Berber inhabitants of this region, al-Bakrī (5th/11th century) says that they belonged to the Berber tribes of the Mazāta and the Ḍarīsa and that they professed the doctrines of the Ibāḍī sect. According to this geographer, they were semi-nomads; they spent the winter in desert regions where they bred camels. When the Ibāḍī-Wahbī *shaykh* Abū Khazar al-Wisyānī rebelled, in the middle of the 4th/10th century, against the Fāṭimid government, the Mazāta of Baghāya, of the Zāb and of the Hodna, who were very numerous and then numbered "12,000 horsemen and an incalculable multitude of foot-soldiers", were among the most fervent supporters of this chieftain. Furthermore, the same Mazāta also supported, some years earlier, the Ibāḍī-Nukkārī *imām* Abū Yazīd ("the Man on the Donkey"). These two items of information are owed to the Ibāḍī historian Abū Zakariyyāʾ al-Wardjalānī (beginning of the 6th/12 century). When Buluggīn b. Zīrī, chief of the Ṣanhādja and loyal supporter of the Fāṭimid caliphs, took the field to conquer the central Maghrib (in 360/971), according to the Arab historians he exterminated the Mazāta and other Berbers living in the district of Baghāya.

Another group of Mazāta lived further towards the west, in the vicinity of what is now the town of Batna, in a stronghold which al-Bakrī calls Billizma li-Mazāta ("Billizma of the Mazāta"), on territory known today by the name of Djebel Bellezma. Nothing else is known with any certainty concerning this segment of the Mazāta, who were apparently tillers of the soil.

A sizeable Berber population composed of Mazāta, of Zanāta and of Hawwāra, lived, in the mediaeval period, in the town of al-Masīla [*q.v.*] (Msila on modern maps), formerly capital of the canton of the Hodna, as well as in brushwood shacks situated in the suburbs of this town. These Berbers were also massacred by the warriors of Buluggīn b. Zīrī in 360/971. However, the Mazāta of these regions later regained their strength, since the Arab geographer of the 6th/12th century, al-Idrīsī, refers to this tribe as still inhabiting the territory of al-Masīla, which it shared with the Banū Birzāl, the Zandādj, the Hawwāra and the Ṣadrāta. The Berber tribes in question, according to Ibn Ḥawḳal and al-Idrīsī, were engaged in the raising of livestock and in agriculture. Undoubtedly, it is the same segment of the Mazāta of which Ibn Ḥawḳal speaks, locating it between Tifāsh (the ancient Tipasa) and al-Masīla, alongside a branch of the tribe of the Kutāma. Ibn Ḥawḳal also mentions a village named Dakma (Dagma), situated close to al-Masīla, which in the time of this geographer was inhabited by the Kutāma, but the name of which is associated with that of one of the sub-tribes of the Mazāta, this being Dadjma (read Dagma). The same facts were repeated at a later date by al-Idrīsī.

As for the Zāb, the Mazāta of this land lived, being semi-nomadic, in brushwood shacks in the vicinity of the towns of Ṭubna (the ancient Tubunae) and of Biskra. In 360/971, they were massacred by Buluggīn b. Zīrī, but subsequently they regained their strength. Al-Shammākhī (10th/16th century) refers to the Mazāta in question, describing various features of their history during the 5th/11th and 6th/12th centuries. They lived in encampments (Ar. *aḥyāʾ*) and professed the Ibāḍī-Wahbī faith, with a certain tendency towards Nukkārī Ibāḍism. They were, among others, military supporters of the renowned Nukkārī chief Abū Yazīd, mentioned above.

The names of the Mazāta sub-tribes which inhabited the Zāb are not known. It is very likely that it is to these groups that the Madūna belonged, and perhaps also the Awmāsht (Ūmāsht). In fact, the name of this latter people is found in that of the locality, Oumach on modern maps, which is situated midway between Tehouda (the ancient Thabudeos) and Mlili (the ancient Gemellae).

The Mazāta of the Zāb and of the Hodna belonged to very rich tribes which did not use their wealth to support the Rustamid imāmate of Tāhart. The Ibāḍī historians state in this context, quoting the words of one of the Rustamid *imāms*, that the Ibāḍī-Wahbī religion "exists through the swords of the Nafūsa and the possessions of the Mazāta", also alluding to the religious zeal of the former of these tribes. Ibn Ṣaghīr, author of a chronicle of Tāhart composed at the beginning of the 4th/10th century, says of the Mazāta, the Sadrāta and other tribes inhabiting the Zāb and the Hodna, that they "were in the habit, in the season of spring, of leaving the temporary lands that they occupied in the Maghrib or other regions to come to Tāhart or its surrounding areas on account of the pastures that they found there and other advantages which the land offered them... When the nomads arrived to install their encampments, their dignitaries and leaders of groups presented themselves in the town where they were received with kindness and respect (by the *imāms*). Then they returned to their encampments where they remained until the time of their departure".

(T. Lewicki)

AL-MAZĀTĪ, Abu 'l-Rabīʿ Sulaymān b. Yak̲h̲laf, famous Ibāḍī historian, theologian and jurisconsult. He was a member, as his *nisba* indicates, of the Berber tribe of Mazāta [*q.v.*], probably from the branch who lived in the mountains of south-east Tunisia beside the tribes of the Lawāta and Zanzafa. All these tribes were living around a district which was called Tāmūlast but whose exact location eludes us and which was, in all probability, the place from which Abu 'l-Rabīʿ originated. It is, indeed, in this locality that there lived his paternal uncle Iṣlītan (Yaṣlītan) and it is not far from this place, at a point in the neighbouring desert, called Asarkīm, that his family and herds lived for some time. His maternal uncle, ʿAbbūd b. Manār al-Mazātī, lived not far from there, in Zarīḳ, to the south-east of the town of Gabès. One should add that Abu 'l-Rabīʿ had a brother called ʿAlī.

The date of his birth is uncertain. We know, however, that, as a young man, in the first decade of the 5th/11th century, he studied under the famous Ibāḍī *s̲h̲ayk̲h̲* Abū ʿAbd Allāh Muḥammad b. Bakr in Tīn Yaṣlī (Tīn Īṣlī) in the Oued Righ. He learned from him the fundamental principles of the law. Then, he went to study the law in Djarba [*q.v.*] with several famous *s̲h̲ayk̲h̲*s of that island, which was in this period one of the cultural centres of the Ibāḍīs of North Africa.

After having finished his studies in Djarba, Abu 'l-Rabīʿ returned to Tāmūlast, where he was soon surrounded by a wide circle of students whom he taught, among other subjects, *al-āt̲h̲ār*, i.e. the history of the Ibāḍī sect and the biographies of distinguished Ibāḍīs. He was already there at the time of the death of his old master Abū ʿAbd Allāh Muḥammad b. Bakr in 440/1048-9. From Tāmūlast, Abu 'l-Rabīʿ set out, before 449/1057-8, for Ḳalʿat ʿAlī (also Ḳalʿat Banī ʿAlī), a place situated in the Djabal Zanzafa, near Tāmūlast; he lived there with his students until 462/1069-70. He felt safer in this place than in Tāmūlast, through which passed the route of some Arab tribes (notably the Banū Hilāl) going from Tripolitania to Ifrīḳiya and returning to Tripolitania. In the same year, Abu 'l-Rabīʿ returned to Tāmūlast, where he stayed for some time, always surrounded by his students. Towards the end of his life, he went to settle in Tūnīn, a desert place situated in the mountains near Tāmūlast, where a *ḥalḳa* or circle of students soon gathered around him. His students were recruited from among the peoples of the Sūf (Oued Souf), Arīg̲h̲ (Oued Righ), Wārdjlān (Ouargla), Zāb and Ḳaṣṭīliya. Among those who were specially interested in Ibāḍī history and *siyar*, one should mention principally the famous future historian Abū Zakariyyāʾ Yaḥyā b. Abī Bakr al-Wardjalānī.

According to the old Ibāḍī chronicles, Abu 'l-Rabīʿ died in 471/1070-9 in Tūnīn. However, the Ibāḍī tradition of Ouargla places the tomb and mosque of S̲h̲ayk̲h̲ Abu 'l-Rabīʿ Sulaymān al-Mazātī, who is doubtless none other than Abu 'l-Rabīʿ Sulaymān b. Yak̲h̲laf al-Mazātī, in this latter town.

Abu 'l-Rabīʿ travelled extensively. We have already seen that he had passed his youth in the Oued Righ and on the island of Djarba in order to study there. From the Oued Righ, he went at least twice to Ouargla, once in the company of his master Abū ʿAbd Allāh Muḥammad b. Bakr. In 459-60/1057-60 he visited, accompanied by his students, most of the Wahbī Ibāḍī groups of Tunisia and Algeria, passing by Ḳasṭāliya (Ḳaṣṭīliya), Nafzāwa (Nefzaoua), Asūf (Oued Souf), Wag̲h̲lāna (Ourlana), Tamāsīn (Temacin) and Ouargla, from where he returned to the Djabal Zanzafa and Tāmūlast.

Abu 'l-Rabīʿ Sulaymān b. Yak̲h̲laf al-Mazātī is the author of three works, of which one is of particular interest for the history of the Ibāḍīs of North Africa; this is the *Kitāb al-Siyar*, a collection of biographies of distinguished Ibāḍīs of the Mag̲h̲rib. We do not know the date of composition of this work, which appears to have been written after the year 450/1078-9. We know of the existence of two manuscript copies of the *Kitāb al-Siyar*, of which one, apparently complete, is in Mzāb in Beni Isguène, in a library known as *al-Maktaba al-g̲h̲annāʾ*, while the other, incomplete, was formerly part of the collection of Ibāḍī manuscripts gathered by Z. Smogorzewski at Lwów (Poland). This work was lithographed in Tunis in 1321/1903-4 in a collection beginning with the *al-Radd ʿalā 'l-ʿUḳbī* of S̲h̲ayk̲h̲ Aṭfiyyas̲h̲. It seems that numerous citations of Abu 'l-Rabīʿ which appear in some later Ibāḍī historical and biographical works in the 5th/11th century come from the *Kitāb al-Siyar*, while it is not impossible that a part of these citations come directly from the mouth of this historian and were noted by his students. This applies especially to the citations of Abu 'l-Rabīʿ inserted in the historical work of Abū Zakariyyāʾ Yaḥyā b. Abī Bakr al-Wardjalānī (6th/12th century) who, as we know, was one, of the students of Abu 'l-Rabīʿ. One also finds several citations of Abu 'l-Rabīʿ in al-S̲h̲ammāk̲h̲ī's work.

It is curious that the *Kitāb al-Siyar* of Abu 'l-Rabīʿ should not have been cited in the catalogue of Ibāḍī books composed in the 8th/14th century by al-Barrādī, an Ibāḍī scholar who was moreover originally from the same region of Tunisia as Abu 'l-Rabīʿ. Al-Barrādī knows only two other works of this historian which dealt with theology and law.

MAZDAK (also Mazdaḳ, Mazhdak), the leader of a revolutionary religious movement in Sāsānid Iran, during the reign of Ḳubādh, son of Fīrūz (Kavād, son of Pērōz) 488-96, 498-9 to 531). Klima regarded the name of Mazdak as a conflation of an Iranian name, Mazdak, Mizdak, or Muzhdak ("the justifier"), with a Semitic name, Mazdeḳ, from the root *zdḳ* ("righteous"). Klima also suggested that *mazdak* may have been what the leaders of this movement were called rather than a proper name, or even what its members were called (al-Mazdaḳān, al-Mazādiḳa in Arabic sources as well as al-Mazdaḳiyya).

Almost everything known about this movement comes from hostile sources. The earliest and only contemporary account is in the Syriac *Chronicle* of Pseudo-Joshua the Stylite (ed. and tr. W. Wright, Cambridge 1882, paras. ix, xx, xxi-xxiv). Subsequent, sixth-century, Greek accounts are given by Procopius (*Persian Wars*, i. v-xi, ii. ix), Agathias (*Histories*, tr. J. D. Frendo, Berlin-New York 1975, iv, chaps. 27-30, pp. 130-4), and Malalas of Antioch (*Chronographia*, in J. P. Migne (ed.), *Patrologia Cursus Completus*, Series Graeca, xcviii, Paris 1860, cols. 465, 633, 653). Theophanes (Migne, *op. cit.*, cviii, Paris 1863, col. 396) merely repeats Malalas. There are scattered allusions to Mazdak in Mazdaean Middle Persian literature. Klima suggested that references to Mazdak were deliberately omitted from the original Middle Persian text of the Sāsānid royal chronicle, the *Khwadāy-nāmag*, and credited Ibn al-Muḳaffaʿ (d. 143/760 [*q.v.*]) with inserting an account about Mazdak into his Arabic translation of the *Khwadāy-nāmag*. References to the main Arabic and Persian accounts of Mazdak based on this and other translations are given by Yarshater. Ibn al-Muḳaffaʿ also translated a Middle Persian work of fiction called the *Mazdak-nāmag* into Arabic. This work was also translated into Arabic poetry by Abān b. al-Ḥamīd al-Lāḥiḳī (d. 200/815-16 [*q.v.*]). According to Yarshater, who identifies the main fictional themes, this work was the basis for the Niẓām al-Mulk's account in the *Siyāsat-nāma* and of the poetic version in Dārāb Hormazdyār's *Rivāyāt*. It was also used by al-Bīrūnī (*Āthār*), Ibn al-Balkhī (*Fārs-nāma*), the *Mudjmal al-tawārīkh*, and Ibn al-Athīr (*Kāmil*). The most important source for Mazdakī doctrine is Abū ʿĪsā Muḥammad b. Hārūn al-Warrāḳ (d. 247/861), a Manichaean or Mazdaean convert to Islam who seems to have used some authentic Mazdakī work for his religious history (*Kitāb al-Maḳālāt*). His account is al-Shahrastānī's (468-548/1076-1153) source for Mazdakī doctrine in his *Kitāb al-milal wa 'l-niḥal*. The Mazdakī book called the *Dēsnād* cited in Mūbadh Shāh's 11th/17th-century *Dabistān-i madhāhib* [*q.v.*] is generally considered to be a fabrication because everything cited from it can also be found in al-Shahrastānī or other works, although it could be argued on the same basis that this might have been the name of the work used by al-Warrāḳ. Some of the information in the *Fihrist* of Ibn al-Nadīm [*q.v.*] appears to be independent and rather neutral.

The Mazdakī movement is said to have been founded by a certain Zarādusht (or Zardusht), son of Khurragān, *mōbadh* or chief *mōbadh* of Fasā in Fārs, after whom its members were called Zarādushtaḳān. Christensen identified this Zarādusht with a Manichaean called Bundos who, according to Malalas, appeared at Rome in the time of Diocletian (245-313), held doctrines opposed to the majority of Manichaeans, and left for Persia where he spread his doctrine. His sect was called "those of the right religion" (τῶν Δαρισθενῶν) from MP *darist-dēnān*), and Malalas says that Ḳubādh himself was a *Dərist-dēn* (ὁ Δαράσθενος for ὁ Δαρίσθενος). Christensen took Bundos to be an honorific title of Zarādusht, from MP *bwyndk* ("the venerable"), and regarded Mazdakism as a reforming Manichaean sect. However, Klima regarded Zarādusht and Bundos as separate persons, and Yarshater puts Zarādusht in the 5th century A.D. According to Arrigoni, Bundos is a mistake for Budos, therefore a fictive re-personalisation of Buddha. Yarshater suggests that the founding of Zarādusht's movement may have coincided with the end of the millennium of Zoroaster, which some calculations would put at the end of the 4th or the beginning of the 5th century A.D. It might also have been the doctrine combatted by Adurbād Māraspandān, who underwent an ordeal by fire to refute it in the time of Shāpūr II. The movement seems to have been Zoroastrian rather than Manichaean in origin, although it acquired gnostic features that gave it an affinity to Manichaeism. It may have begun as an attempt to popularise Mazdaism and to spread it in a non-élitist form that would transcend class barriers and appeal to the general population. Textual support for the egalitarian sharing of wealth, women, and wisdom exists in the extant Avesta, such as *Vendidād* iv. 44: "If fellow-believers (*hāmōdaēna*), brothers or friends, come to ask for money, wife, or wisdom, he who asks for money should be given money; he who asks for a wife should be given a wife to marry; he who asks for wisdom should be taught the holy word." Ibn al-Nadīm describes the early Khurramiyya (Mazdakīs) as a Zoroastrian sect founded by a certain Mazdak the Older (*al-Ḳadīm*), who enjoined his followers to enjoy life's pleasures, to satisfy their desire to eat and drink in a spirit of equality, to avoid dominating each other, to share women and family, to try to do good deeds, to avoid shedding blood and harming others and to be hospitable.

In the time of Ḳubādh, the movement of Zarādusht was revived under Mazdak, son of Bāmdādh ("the Sunrise"), called Mazdak the Younger by Ibn al-Nadīm. According to al-Ṭabarī, he was a native of مذرية which tends to be identified with al-Madharayya, near modern Kūt al-ʿAmāra [*q.v.*], although von Wesendonk located it in Khuzistān. Iṣṭakhr and Tabrīz are also given as Mazdak's birthplace. He is said to have been a *mōbadh* and is identified by Christensen with the Manichaean bishop Indarazar, whom Malalas says was killed by the Persian king *ca.* 527. Indarazar (Indazaros in Theophanes) is explained as *andarzgar* ("teacher") by Nöldeke; Klima suggested that the proper name Vindārāzār lies behind it and speculated that if *mazdak* were an epithet, then that might have been his real name.

A series of disasters in the late 5th century increased distress and raised apocalyptic expectations. Iran suffered a seven-year long drought and famine during the reign of Fīrūz. Defeat by the Hephthalites in 484 put the Sāsānids under the burden of paying tribute to them. The Hephthalite and dynastic civil wars also

decimated the military nobility, undermining their ability to preserve their privileged position. The common interest of the monarch and the people in curbing the power of the great nobles may haved led Ḳubādh to identify himself with the Zarādushtaḳān. He may have seen this movement as a potential base of mass support against the nobles, and its programme as a means of restoring by transforming his kingdom. Nöldeke represented Ḳubādh as a forceful, capable ruler, who, for purely secular motives, favoured Mazdakism as an expedient to reduce the power of the nobles and priests. Christensen argued that Ḳubādh was a sincere convert and humanitarian ruler, motivated by religious belief and a desire for the welfare of his subjects. Pigulevskaya saw Ḳubādh as a sincere Mazdakī rather than a shrewd and subtle politician. Klima rejected Christensen's "humanitarian" characterisation of Ḳubādh based on his behaviour in his wars, although an Arabic source with a hostile bias says that, as a *zandīḳ*, Ḳubādh feared to shed blood. Although there is no way to be certain, Ḳubādh is most likely to have been motivated by a combination of political interests and religious belief.

To the extent that doctrines ascribed to Mazdak himself can be reconstructed from later sources, he seems to have advocated the enjoyment of material things in moderation and a peaceful, egalitarian and non-competitive social and economic order. Miskawayh says that the Mazdakiyya were called "the adherents of justice" (*al-ʿAdliyya*), and they are sometimes compared to the egalitarian, gnostic sect of Carpocratians that also stood for social justice. According to al-Thaʿālibī, Mazdak taught that God had put provisions for livelihood (*arzāḳ*) on earth for people to divide equally among themselves, with no one having more than his share. But people had wronged each other and sought to dominate; the strong had defeated the weak and monopolised the means of livelihood and property. It was necessary to take from the rich and give to the poor for everyone to become equal in wealth. Whoever had a surplus of property, women, or goods had no more right to it than anyone else. In Firdawsī, Mazdak is said to have taught that wealth and women must be shared in order to overcome the five demons of envy, wrath, vengeance, need and greed that turn men from righteousness. This appears to be reflected in the refutation of a sectarian who represents sharing women and property as a remedy for passions in *Dēnkart*, iii. 5.

If authentic, such a positive, anti-élitist attitude toward material possessions could hardly have been Manichaean in origin. Christensen accepted the Manichaean origin of the Mazdakiyya because they are called Manichaeans in the Greek sources. They may have been accused of Manichaeism by their enemies in Iran, and Malalas may simply have repeated the slander or have used the only name for an Iranian sect that he knew. Klima's argument that Mazdak had to use Mazdaean terminology as a vehicle for the mass communication of his propaganda because he was in Iran is based on the assumption that Mazdaism was spread uniformly, socially and geographically, in 5th-century Iran. But it is questionable that the lower classes were already Mazdaean in the 5th century; Mazdakism seems rather to have been a vehicle to spread Mazdaean doctrine among them. Puech regards Mazdakism as an optimistic reform of Manichaeism, but, as Yarshater points out, most sources describe Mazdakism as a reform of Zoroastrianism. What is known about Mazdak's doctrine is dualist and generally gnostic in character rather than specifically Manichaean. The gnostic elements that are claimed as the basis for affinity between Mazdakism and Manichaeism include pacifism, asceticism, fatalism, esoteric interpretation and the antinomian rejection of ritual. The prohibition of bloodshed appears in the context of social concord and is not necessarily either pacifist or vegetarian. The only other basis for claiming an ascetic element in Mazdakism is a hostile gloss to *Vendīdad*, iv. 49 saying that Mazdak, son of Bāmdād, ate fully himself but subjected others to hunger and death. This is just as likely to refer to the consequence for the rich of redistributing property as to refer to Mazdak's regulations for his own followers without additional corroboration. The alleged contrast between ascetic and hedonistic tendencies in Mazdakism is explained by Yarshater, by comparison with gnostic movements, in terms of a self-denying élite and wordly lay members. But this is the reverse of what the gloss suggests, and there is no other evidence for such élitism among the Mazdakiyya. According to al-Shahrastānī, Mazdak's doctrine resembled Mani's except that Darkness did not act of its own will and out of choice (*bi 'l-ḳaṣd wa 'l-ikhtiyār*), but blindly and by chance (*bi 'l-khabṭ wa 'l-ittifāḳ*), and that the mixture of Light with Darkness was produced in this way as will be their separation. Al-Shahrastānī also reports that some Manichaeans believed that mixture was produced *bi 'l-khabṭ wa 'l-ittifāḳ*, in opposition to the others. According to al-Muṭahhar b. Ṭāhir al-Maḳdisī, the Ṣābians [*q.v.*] also believed in mixture *bi 'l-khabṭ wa 'l-ittifāḳ*. Although Ṣābians are sometimes mistaken for Manichaeans, belief in a blind fate is central to Zurvanism and thus available in a Zoroastrian context. Regarding esoteric interpretation, al-Masʿūdī says that Mazdak was the first to interpret the Avesta according to its hidden meanings (*bāṭin*). Although this may have been a matter of adjusting Mazdaean doctrine for the masses, it made the Mazdakiyya into *Zindīḳs* [*q.v.*] along with the Manichaeans. According to the 3rd/9th century al-Mutawakkilī, Mazdak is also said to have persuaded Ḳubādh to have all but the three original fires extinguished. Rather than being an attack on cult observance as such, Yarshater interprets this to mean that Mazdak sought to reduce the power of the Mazdaean priesthood and deprive them of property held by fire-temples. There may have been an attempt to found alternative institutions, since the Nestorian *Chronicle of Siʿirt* reports that Ḳubādh ordered temples (*hayākil*) and hospices (*fanādiḳ*) to be built throughout his kingdom where men and women would congregate for adultery.

Beginning with the earliest sources, the Mazdakī ideal of sharing women has been represented in terms of sexual promiscuity with the resulting confusion of paternity. According to Pseudo-Joshua, the Zarādushtaḳān believed that women should be shared and that every man should have intercourse with whom he pleased. This text also reports that Ḳubādh allowed the wives of the nobles to commit adultery, while Procopius relates that Ḳubādh issued a law that Persians should have intercourse with women in common νόμον ἔγραφεν ἐπὶ κοινὰ ταῖς γυναιξὶ μίγνυσθαι Πέρσας). Although such reports received lurid embellishments in later literature, it is more likely, according to Klima and Yarshater, that the Mazdakiyya advocated the right of each man to have a wife and the abolition of social barriers to marriage between nobles and commoners. They may also have encouraged the marriage of women outside of their immediate families. Klima suggests that famine and

the decimation of the nobility in recent warfare had caused a demographic crisis in Iran, and that Ḳubādh released the wives of nobles and allowed them to marry commoners in order to repopulate the country. How this may have been related to changes in the legal status of women in 5th and 6th century Iran remains unresolved, but the Mazdakiyya apparently regarded women as a form of possession to be shared.

Land was also redistributed to new individual owners, perhaps to help restore agriculture after the famine. Modern Soviet scholars interpret the sharing of property as the restoration of ancient village communes, but there is no direct evidence for this. Whether the sharing of women and property was intended to undermine the position of noble families or whether matters simply got out of control, disorders broke out and granaries were plundered at unspecified places in 494-5. In 496 the Persian nobles deposed and imprisoned Ḳubādh because of his policy toward women and enthroned his brother Djāmāsp. Christensen put the worst of the Mazdakī risings during the reign of Djāmāsp and described them imaginatively as veritable *jacqueries*. Ḳubādh escaped to the Hephthalites, who helped restore him to the throne *ca.* 498-9.

The situation seems to have been stabilised with the Mazdakiyya in control after Ḳubādh's return. The Mazdakī period is generally understood in terms of class conflict and the overturning of the social order. Soviet scholars see the movement as one of peasant protest and identify Mazdak's followers as poor farmers, although Pigulevskaya notes that the sources are not specific in this respect. Al-Ṭabarī calls his followers commoners (*ʿāmma*, while al-Thaʿālibī simply calls them the poor (*fuḳarāʾ*, *masākīn*) or the rabble (*al-ghawghāʾ*). However, some nobles were Mazdakī, such as Siyāvush, who commanded Ḳubādh's army after his restoration, and Ḳubādh's eldest son, Kāwūs, who governed Ṭabaristān as the Padhashkhwār Shāh. Ḳubādh seems to have favoured the conversion of non-Zoroastrians in order to increase religious conformity. He tried to force the Armenians to convert before he was deposed, and after he was restored, he required the Arab ruler of al-Ḥīra, al-Mundhir III (*ca.* 505-54 [see LAKHMIDS]) to adopt Mazdakī doctrines. When al-Mundhīr refused, Ḳubādh got the ruler of the Kinda, al-Ḥārith b. ʿAmr, to agree to impose Mazdakism on the Arabs of the Nadjd and the Ḥidjāz. Some Arabs in Mecca are said to have adopted Mazdakism (*tazandaḳa*) at that time, and some *zanādiḳa* are said to have still been there in the time of Muḥammad. Efforts to spread some form of Zoroastrianism lie behind the forced conversion of Jewish children that began under Fīrūz in 474, according to Sherīra, or in 477 according to Ibn Dāwūd. Graetz and others have seen the revolt of the exilarch, Mar Zuṭrā, who is said to have made himself briefly independent at Maḥoza near Ctesiphon in the early 6th century, as a reaction to the Mazdakiyya, although Neusner considers the entire episode implausible.

Since the Mazdakiyya supported the succession of Kāwūs, his younger brother, Khusraw, allied himself with the Mazdaean priests, challenged Mazdak's influence over Ḳubādh, arranged for the Mazdakiyya to assemble at the capital for a religious disputation or for the proclamation of Kāwūs as successor, convinced his father that Mazdak's doctrines were false, and had him executed with thousands of his followers in 528 or early 529. When Khusraw succeeded his father in 531, there may have been a second persecution of Mazdakites; the sect was suppressed and its books destroyed. In reaction to thirty years of Mazdakī ascendancy, the distinction between nobles and commoners was restored. Some indication of what had happened can be seen in the reforms of Khusraw I, who confiscated the property of Mazdakī leaders and gave it to the poor. He executed those who had taken property by force and returned it to its former owners. Those who had damaged property were ordered to pay for it. A child of disputed descent was to belong to the family with which it lived. A man who had seized a woman was to give her a marriage portion that satisfied her family; she could then decide to stay with him or marry someone else, but should return to her former husband if she had one. Khusraw took personal charge of children from noble families without anyone to care for them; he gave the girls dowries and found noble husbands for them, and found noble wives for the youths.

Any Mazdakiyya who survived did so in secret or escaped beyond the Sāsānid borders to Central Asia. There may have been an early centre near Rayy. By the early Islamic period, Neo-Mazdakī groups were scattered throughout Iran; they were called Mazdakiyya around Rayy and Hamadān, "wearers of red" (*Muḥammira*) in Djurdjān, and "wearers of white" (*Sapīd-djāmagān/Asbīdh-djāmakiyya* or *Mubayyiḍa*) in Central Asia. During the 2nd/8th and 3rd/9th centuries, they broke up into numerous subsects named after some leader. According to al-Warrāḳ, as cited by al-Shāhrastānī, in the 3rd/9th century, Mazdakī doctrine was based on a dualism of Light and Darkness; Light, having knowledge and sensation, acted intentionally, while Darkness, being ignorant and blind, acted randomly. Both their mixtures and separation were accidental. The mingling of the three elements of Water, Fire, and Earth produced two demiurge-like Managers of Good and of Evil. Their object of worship (*maʿbaduhu*) was enthroned in the upper world as the supreme monarch (*khusraw*) was in the lower world. Four spiritual powers (*ḳuwā*) called Discernment (*tamyīz*), Understanding (*fahm*), Preservation (*ḥifẓ*), and Joy (*surūr*) stand before His throne corresponding to the chief judge (*mōbadhān mōbadh*), religious teacher (*hērbadhān hērbadh*), army commander (*sipāhbad*), and entertainment master (*rāmishgar*) who stood before the earthly king. The world was directed by the four powers with the aid of seven *wazīrs* and twelve spiritual forces. Anyone in whom the four, the seven, and the twelve were combined became godly (*rabbānī*) and freed from religious duties. Those who knew the sum of the letters that amounted to the most supreme Name (*al-ism al-aʿẓam*) also knew the greatest secret (*al-sirr al-akbar*). Those who did not know it remained blind and ignorant. The doctrine of correspondence seems to reflect late Sāsānid conditions, but it is difficult to tell whether the rest went back to Mazdak himself or whether it was the result of continuing doctrinal development. The Mazdakiyya tend to be credited with introducing number and letter mysticism, and may have contributed it to the Kaysāniyya [*q.v.*] Shīʿī groups with which they associated in the 2nd/8th century. The Neo-Mazdakī groups that emerged from this association such as the Abū Muslimiyya, Sunbādhiyya, Muḳannaʿiyya and, above all, the Khurramiyya [*q.v.*] or Khurramdīniyya and its subsect of Kūdhakiyya, seem to have acquired additional gnostic content from *ghulāt* Shīʿī groups as a semi-Islamic disguise. However, both al-Shāfiʿī and al-Maḳdisī regarded the Khurramiyya as a category of Madjūs [*q.v.*]. Mazdakiyya survived in Central Asia as late as the early 6th/12th century living at Kish,

Nakhshab and villages near Bukhārā according to Narshakhī. According to Yāḳūt, they inhabited the village of Dargazīn between Hamadān and Zandjān. The last references to Mazdakiyya occur in the Ilkhānid period, although the Mazdakiyān are listed as the fourteenth Zoroastrian sect in the *Dabistān*, and a Mazdakī community called Marāghiyya reported by Mustawfī as living in the Rūdbar of Ḳazwīn in the 8th/14th century still survived in seven villages there in the 20th century.

(M. Guidi - [M. Morony])

MAẒHAR (a.), pl. *maẓāhir*, literally "place of outward appearance", hence "manifestation, theophany", a technical term used in a wide variety of contexts in Shīʿism, Ṣūfism, Bābism, and, in particular, Bahāʾism, where it is of central theological importance. At its broadest, the term may be applied to any visible appearance or expression of an invisible reality, reflecting the popular contrast between *ẓāhir* and *bāṭin*. In its more limited application, however, it refers to a type of theophany in which the divinity or its attributes are made visible in human form. The term is, therefore, of particular value in those forms of Islam in which the tension between a wholly transcendent and an incarnate God is most keenly felt.

In esoteric Shīʿism, the term is applied to the Prophet and the *imāms* in a variety of applications. Thus, prophets in general and the *imāms* in particular are the *maẓāhir* in which the pre-existent Reality of Muḥammad (*al-ḥaḳīḳa al-Muḥammadiyya*) appears; the human soul is the *maẓhar* of the universal Forms in the next world; the Perfect Man (*al-insān al-kāmil*) or the *ḥaḳīḳa Muḥammadiyya* is the *maẓhar* of the divine names and attributes; and the individual *imāms* are the *maẓāhir* of the "eternal *imām*" and of the divine attributes. (For these and other uses, see Corbin, *En Islam iranien*, index, s.vv. "*maẓhar*", "théophanie", "théophanies", "théophanique", and "théophanismes".)

It is the *imāms* in particular who function as loci for the visible appearance of the divinity. In a tradition attributed to the fourth *imām*, ʿAlī b. al-Ḥusayn, it is claimed that the *imāms* are God's "meanings" and his external presence within creation (*naḥnu maʿānīhi wa ẓāhiruhu fīkum*, quoted in al-Aḥsāʾī, *Sharḥ al-ziyāra*, iv, 269). Similarly, ʿAlī is reported to have said: "My external appearance is that of the imāmate (*al-wilāya*), but inwardly I am that which is unseen and incomprehensible" (quoted in *ibid.*, ii, 135).

In the work of Ibn al-ʿArabī [*q.v.*] the term is closely linked to that of *tadjallī* or divine self-revelation; the *maẓāhir* provide the external loci for the appearance of the *tadjalliyāt* emanating from the Absolute. In this context, the word *maẓhar* is a synonym for *madjlā*, used of an external attribute manifesting a divine name. In his theory of the Perfect Man who acts as a mirror in which the Absolute may see itself manifested, Ibn al-ʿArabī parallels the Shīʿī notion of the *imām*: man is the place of manifestation of the divinity, *huwa madjlā al-ḥaḳḳ*. In this sense, the Perfect Man is the Isthmus or *barzakh* joining the worlds of the Absolute and Creation (See Ibn al-ʿArabī, *Fuṣūṣ al-ḥikam.*)

The Bāb [*q.v.*] developed a complex theory of theophanies in his later works, notably the *Bayān-i Fārsī* and the *Kitāb-i pandj shaʾn*. The term *ẓuhūr* applies to the self-revelation of God to his creation and to the period in which he is thus manifest, as contrasted with *buṭūn*, the state and period of his concealment. This revelation takes place in the *maẓhar*, a created being in whom the Divinity manifests himself to other created beings: "the hidden reality of the divine unity (*ghayb al-tawḥīd*) is only affirmed through that which is revealed in the outward aspect (*ẓāhir*) of the messenger" (the Bāb, *Pandj shaʾn*. 40); and "God... makes Himself known to his creation in the place of manifestation (*maẓhar*) of his own self, for whenever men have recognised God, their Lord, their recognition of him has only been attained through what their prophet has caused them to know" (*ibid.*, 125).

It is not, strictly speaking, the divine essence but the Primal Will that is manifested to men: "That command (i.e. the *maẓhar*) is not the eternal and hidden essence, but is a Will that was created through and for himself out of nothing" (*ibid.*, 31); and "From the beginning that has no beginning to the end that has no end, there has ever been but a single Will which has shone forth in every age in a manifestation (*ẓuhūr*) (idem, *Bayān-i Fārsī*. 4:6, 120-1).

This *maẓhar* (referred to variously as a "throne" (*ʿarsh*), "seat (*kursī*), "temple" (*haykal*), or "mirror" (*mirʾāt*), or as the "tree of reality" (*shadjarat al-ḥaḳīḳa*) and "primal point" (*nuḳṭa-yi ūlā*) is an ambivalent creature. He is outwardly mortal ("what your eyes behold of the outward form of the thrones is but a handful of clay", *Pandj shaʾn*, 242), but inwardly divine: "Look within them, for God has manifested Himself (*tadjallā*) to them and through them" (*ibid.*). The historical *maẓāhir* are ontologically a single being, often compared to a single sun appearing in different mirrors; their number is incalculable. They are particularly identified with the chief prophetic figures of the past and with the Shīʿī *imāms*.

In the final phase of his career (*ca.* 1848-50), the Bāb himself claimed to be the latest *maẓhar* of the Primal Will, initiating a new religious dispensation and *sharīʿa*. Beyond this, he attributed to many of his followers the status of partial or general manifesta-

tions of the divinity (see MacEoin, *Hierarchy*, 109 ff.). His chief follower, Mīrzā Muḥammad ʿAlī Ḳuddūs, is referred to in one source quite simply as *maẓhar-i khudā* (*ibid.*, 110). In theological terms, this is explained by the concept of an infinite progression of mirrors reflecting the Divine Will and forming a complex descending hierarchy of *maẓāhir*. These secondary, tertiary, and subsequent mirrors appear, not only during the lifetime of the primary mirror, but throughout the period of *buṭūn*, when he is in a state of concealment (*ibid.*, 117-19).

Bahāʾī doctrine follows that of Bābism very closely, but tends to be more restrictive in its attribution of the status of *maẓhariyya*, which is generally limited to the founders of the major religions. The full technical term for such figures is *maẓhar ilāhī* (in English Bahāʾī usage, "Manifestation of God"). At the same time, a broader definition of religious truth allows Bahāʾīs to include among the *maẓāhir* figures such as Buddha and Krishna (whom they regard as the "founder" of Hinduism). Bahāʾ Allāh [*q.v.*] is the latest *maẓhar* and will not be followed by another for at least one thousand years. Not only is he accorded a high status with regard to previous and future *maẓāhir* (who have either prepared the way for him or will function under his shadow), but he himself often speaks in terms that are close to those of incarnationism. Thus he is "the creator of all things", in whom "the essence of the pre-existent has appeared"; in one place, he claims that "he has been born who begets not nor is begotten" (see MacEoin, *Charismatic authority*, 168). Modern Bahāʾī doctrine, however, explicitly rejects an incarnationist interpretation of the status of the *maẓāhir*.

(D. MacEoin)

MAẒHAR, Mīrzā Djāndjānān (1111-95/1700-81), an Urdu poet and eminent Ṣūfī, was born in Tālābāgh, Mālwā. He was received into the Naḳshabandī order by Sayyid Mīr Muḥammad Badāʾūnī, and into the Ḳādirī order by Muḥammad ʿĀbid Sumāmī. He was shot in Dihlī by a Shīʿī fanatic in revenge for his critical remarks about the Muḥarram celebrations, but though he survived three days, he refused to identify his assailant to the Emperor. He was—and remains—a famous religious leader. He had many disciples and was even credited with miracles. As a writer, however, his position is not so clear-cut. His letters, in Persian, have been published together with letters addressed to him: but they shed little, if any, light on his poetry, being mostly concerned with religious and social affairs. In Persian poetry, his *dīwān* is his own selection of 1,000 from 20,000 verses. The same fastidious self-criticism may perhaps explain why so little of his Urdu poetry is extant: what remains is found scattered in *tadhkiras*, anthologies and other books. Yet he has been recognised as one of the four pillars of 18th century Urdu poetry, alongside Sawdāʾ [*q.v.*], Mīr Taḳī Mīr [*q.v.*] and Dard. Sawlā complained that Maẓhar's poetic language was neither Persian nor Rēkhta (Urdu), likening it to the proverbial "*dhobi*'s dog, neither of the house nor the river-side". This remark is unjust, to judge by such of his poetry as remains, which makes us wish there were more.

Bibliography: For short accounts of Maẓhar, see Muhammad Sadiq, *A history of Urdu literature*, London-Karachi, etc. 1964, 81-2 (Sawdāʾ's remarks will be found in Urdu verse and English translation at pp. 74-5); Ram Babu Saksena, *A history of Urdu literature*, Allahabad 1927, 49-51; Muḥammad Ḥusayn Āzād, *Āb-i-ḥayāt*, 7th ed. Lahore 1917, 137-41, contains interesting anecdotes but gave offence by its account of the poet's relationship with a handsome young poet, Tābān. Published collections of his correspondence include *Maḳāmāt Maẓharī or Laṭāʾif khamsa*, ed. Muḥammad Bēg b. Raḥīm Bēg, Dihlī 1309/1892; *Lawāyiḥ khānḳāh-i Maẓhariyya*, ed. Ghulām Muṣṭafā Khān, Hyderabad-Sind 1392/1972. Most of the *tadhkiras* include short examples of his poetry, including Shēfta, *Gulshan bēkhār* and Ḳudrat ʿAlī Shawḳ, *Ṭabaḳāt al-shuʿarāʾ*, Lahore 1968, 61-4. See also Karīm al-Dīn, *Taʾrīkh-i shuʿarāʾ-i Urdū*, Dihlī 1848, 105-7; Sprenger, *Oude catalogue*, 488; Rieu, *Cat. Persian mss. British Museum*, i, 363a.

(J. A. Haywood)

MĀZIN, the name of several Arab tribes who are represented in all the great ethnic groupings of the Peninsula; this finds typical expression in the anecdote recorded in *Aghānī*, viii, 141 (= Yāḳūt, *Irshād*, ii, 382-3), according to which the caliph al-Wāthiḳ asked the grammarian Abū ʿUthmān al-Māzinī [*q.v.*], who had come to his court, to which Māzin he belonged: whether to the Māzin of the Tamīm, to those of the Ḳays, to those of the Rabīʿa or to those of the Yemen?

The first are the Māzin b. Mālik b. ʿAmr b. Tamīm (Wüstenfeld, *Geneal. Tabellen*, L. 12; Ibn al-Kalbi, Tab. 82); the second, the Māzin b. Manṣūr (D. 10; Ibn al-Kalbī, Tab. 92) or the Māzin b. Fazāra (H. 13; Ibn Ḳutayba, *Maʿārif*, ed. Okasha, 83); the third, the Māzin b. Shaybān b. Dhuhl (C. 19; Ibn al-Kalbī, Tab. 192); the last, the Māzin b. al-Nadjdjār a clan of the Khazradj Anṣār (19, 24). But alongside of these, many other tribes and clans bore this name. The *Djamharat al-nasab* of Ibn al-Kalbī gives no less than seventy, of whom the best known are the: Māzin b. ʿAbd Manāt b. Bakr b. Saʿd b. Ḍabba (Tab. 89); Māzin b. Ṣaʿṣaʿa b. Muʿāwiya b. Bakr b. Hawāzin (Tab. 92); Māzin b. Rayth b. Ghaṭafān (Tab. 92); Māzin b. Rabīʿa b. Zubayd or Māzin Madhḥidj (Tab. 270); Māzin b. al-Azd (Tab. 1761-9). The large number of tribes named Māzin and their distribution over the whole of Arabia makes the hypothesis that we have here a single tribe that had been broken up into small sections impossible and we are led to suppose that the name Māzin is a descriptive rather than a proper name; since the verb *mazana* means to "go away", one might suppose that

Māzin originally meant "the emigrants" and was used in a general way of any ethnic group which became separated from its own tribe and was incorporated in a strange tribe. This etymology, like almost all those of the names of Arab tribes, is of course only a hypothesis.

The sources give a certain number of geographical and historical references to different tribes called Māzin; but they are generally very scanty, none of these tribes having attained sufficient importance to make it independent of the larger body to which it was attached. We have a few details about the Māzin b. al-Nadjdjār (not cited by Ibn al-Kalbī), a fairly important group of Medinan Khazradj (on the part played by them at the beginning of Islam, see Caetani, *Annali*, index to vols. i-ii), as well as about the Māzin b. Fazāra who took part as members of the tribe of Dhubyān, in the war of Dāḥis and al-Ghabrā᾿ [*q.v.* in Suppl., and see *Aghānī*, xvi, 27]. Ibn Mayyāda, himself a Dhubyānī, directed a violent satire against them at the end of the 1st century A.H. (*Aghānī*, ii, 90, 102). As to the Māzin b. Shaybān b. Dhuhl, to whom the grammarian Abū ʿUthmān belonged, we know from the anecdote above quoted that in their dialect, *m* (initial?) was pronounced like *b* (*ba᾿smuka* for *ma᾿smuka*, what is your name?), a peculiarity which does not seem to be recorded of the dialect of other Rabīʿa. Lastly the Māzin b. al-Azd, whom tradition makes migrate to the north, changed their name to Ghassān [*q.v.*], under which they became celebrated.

It is only of the Māzin b. Mālik b. ʿAmr b. Tamīm (Ibn al-Kalbī, Tab. 82) that we have fairly full information. Legend, which has developed with unusual detail around the sons of Tamīm [*q.v.*], gives Māzin a part in the story of his uncle ʿAbd Shams b. Saʿd b. Zayd Manāt b. Tamīm's fight against al-ʿAnbar b. ʿAmr b. Tamīm (cf. al-Mufaḍḍal b. Salama, *al-Fākhir*, ed. Storey, 233, and the references given in the note), This tribe of Māzin never left the great group of the ʿAmr b. Tamīm to which it belonged and dwelled with them in the lands in the extreme north-west of Nadjd; their headquarters were around the well of Safāri near Dhū Ḳār (*Naḳā᾿iḍ*, ed. Bevan, 48, n. to 1. 17; Yāḳūt, iii, 95; Bakrī, 724, 1. 1; 787-8); their principal subdivisions were the Banū Ḥurḳūṣ, Khuzāʿī, Rizām, Anmār, Zabīna, Uthātha and Ra᾿lān. In the Djāhiliyya, the Māzin followed their parent tribe and we find them sharing in the wars of the latter; in rotation with the other Tamīmī tribes, they held the office of *ḥākim* at the fair of ʿUkāẓ (*Naḳā᾿iḍ*, 438). At the coming of Islam, their chief was Mukhāriḳ b. Shihāb, also known as a poet (cf. especially al-Djāḥiẓ, *Bayān*, ed. Hārūn, IV, 41-3; al-Ḳālī, *Amālī*, iii, 50; Ibn Ḥadjar, *Iṣāba*, Cairo 1325, vi, 156). Without being particularly zealous partisans of the new religion, they did not take part in the *Ridda* with the other Tamīmī tribes (11 A.H.) and they even drove away the messengers sent them by the prophetess Sadjāḥ [*q.v.*] and made one of them prisoner, the Taghlibī al-Hudhayl b. ʿImrān; the latter waited for his revenge till the troubled period that followed the murder of the Caliph ʿUthmān (35/656), of which he took advantage to ravage the district of Safāri; but the Māzin met him and slew him and threw him into the well (al-Ṭabarī, i, 1911, 1915; cf. *Aghānī*, xix, 145-6, tr. in Caetani, *Annali*, x, 552-3; in the last passage, the expedition against the people of Safāri appears to be independent of the events of the *Ridda*).

At a later date, the Māzin settled in large numbers, like the rest of the Tamīm, in Khurāsān and took part in the conquest of Central Asia; among the Māzinīs who distinguished themselves there were Shihāb b. Mukhāriḳ, son of the chief already mentioned (al-Ṭabarī, i, 2569, 2707); Hilāl b. al-Aḥwaz, who in 102/720 slew the members of the family of Yazīd b. al-Muhallab after the defeat of the latter (al-Ṭabarī, ii, 1912-13); ʿUmayr b. Sinān, who killed the Persian chief Rutbīl (Ibn al-Kalbī, *Nasab al-khayl*, 30, n. to 11. 3-4). We also find many of the Banū Māzin among the *ḳuwwād* of the ʿAbbāsid army in the time of the rising against the Umayyads. But a no less number went to swell the ranks of the Khāridjīs; the celebrated chief of the Azraḳīs, Ḳaṭarī b. al-Fudjā᾿a [*q.v.*], belonged to the Māzinī clan of Kābiya b. Ḥurḳūs.

Very few of the remarkable number of poets produced by the Tamīm belonged to the Māzin. We may note however Hilāl b. Asʿar of the Umayyad period (*Aghānī*, ii, 186); Mālik b. al-Rayb, poet and brigand, contemporary of al-Ḥadjdjādj (*Aghānī*, xix, 162-9; Ibn Ḳutayba, *al-Shiʿr wa 'l-shuʿarā᾿*, ed. de Goeje, 205-7, etc.); Zuhayr b. ʿUrwa al-Sakb (*Aghānī*, xix, 156; the few verses that we have by him, often quoted, are also attributed to his father, ʿUrwa b. Djalham, and even to ʿAbd al-Raḥmān b. Ḥassān b. Thābit: cf. *Mufaḍḍaliyyat*, ed. Lyall, 249, n. *y*). Lastly, it may be mentioned that the Māzin have given to Arab philology two of its most illustrious masters: Abū ʿAmr b. al-ʿAlā᾿ [*q.v.*], d. 154/771, and al-Naḍr b. Shumayl, whose genealogies are given in Wüstenfeld, *Tabellen* (L).

Bibliography: Wüstenfeld, *Register z.d. geneal. Tabellen*, 291; Ibn Ḳutayba, *K. al-Maʿārif*, ed. Wüstenfeld, 36-42, ed. Okasha, 87-115, *et passim*; Ibn Durayd, *K. al-Ishtiḳāḳ*, ed. Wüstenfeld, 124-6, 171, 211, 258; Ibn al-Kalbī-Caskel, *Djamharat al-nasab*, Register, ii, 405a-406b.

(G. Levi Della Vida)

AL-MĀZINĪ, Abū ʿUthmān Bakr b. Muḥammad. Arab philologist and Ḳur᾿ān reader from al-Baṣra.

Information about his life and works is scarce and partly contradictory. Already discutable is the name of his grandfather and his supposed lineal descent from the Banū Māzin [*q.v.*]; the tradition that he was only a *mawlā* of the Banū Māzin is more likely to be correct. Al-Māzinī uses materials taken from Abū Zayd al-Anṣārī, Abu 'l-Ḥasan al-Akhfash al-Awsaṭ, al-Aṣmaʿī and Abū ʿUbayda [*q.vv.*]. Among his disciples, al-Mubarrad (d. 286/900 [*q.v.*]) is to be mentioned in the first place. The stories—some of which refer to his arrival in Baghdād during the caliphate of al-Muʿtaṣim (218-27/833-42) and connect him with the court of his successors al-Wāthiḳ and al-Mutawakkil in Sāmarrā—are not to be distinguished by their anecdotal character and pointed narration from the numerous comparable *akhbār* of the *adab* and *ṭabaḳāt* literature. Within these traditions, judgements and opinions about al-Māzinī's learning and *madhhab* are interspersed. Al-Mubarrad considered him, next to Sībawayh, as one of the most learned of grammarians; others suggested that he was an adherent of the Imāmiyya or Murdji᾿a, or else of the Ḳadariyya or Muʿtazila. Even the information about the date of his death in his home town is varying. The dates differ by up to 19 years. Preference is to be given to the note that he died in the same year as the caliph al-Mutawakkil (232-47/847-61) or—as often quoted—a little later in the year 249/863.

Nothing is preserved of al-Māzinī's supposed works on grammar, lexicography and metrics, of his explanations concerning Sībawayh's *Kitāb* and the Ḳur᾿ān, books which have been enumerated, e.g. by Yāḳūt, *Udabā᾿*, ii, 388. Only one text, the *Kitāb al-*

Taṣrīf, a very significant treatise on morphology, has been transmitted in a *riwāya*, that is to say, lecture notes. The teacher is addressing the student directly; he starts with the question which letters can enlarge an *aṣl*—the basic radicals of a word—and finishes his essay treating the form *iftaʿala* and some of its derivations. Repeatedly he interposes *fa-ʿrifhā*, *wa-ʿlam*, *sa-ukhbiruka*, *sa-ubayyinu*, *katabtu*, *fassartu*, *dhakartu* or *bayyantu laka* (cf. Ibn Djinnī's *Sirr ṣināʿat al-i ʿrāb*). Occasionally he quotes his own teachers (see above) or else he refers to the authority of al-Khalīl [*q.v.*]. This treatise, which is subdivided into 18 chapters, was studied and worked on by Ibn Djinnī under the guidance of his teacher al-Fārisī (d. 377/987 [*q.v.*]) in Aleppo. Moreover, he wrote a comprehensive commentary on it called *al-Munṣif* and enlarged it with two appendices (see his preface, i, 1; ii, 208, 261). The first appendix comprises additional lexicographical explanations, including verses of reference to the previous chapters. It is entitled *Tafsīr al-lugha min kitāb Abī ʿUthmān bi-shawāhidihi wa-hudjadjihi wa-innamā dhālika fī 'l-gharīb minhā*. The second appendix, is called *Masāʾil min ʿawīṣ al-Taṣrīf*, deals with 15 specific questions. Ibn Djinnī derives his entire material from the *madjlis* traditions, referring mainly to his teacher al-Fārisī. Besides speculative topics, he inserts numerous observations concerning the use of language, not infrequently embedded in *akhbār* of learned men. These works have been edited under the title *al-Munṣif, sharḥ Abī 'l-Fatḥ ʿUthmān b. Djinnī li-Kitāb al-Taṣrīf li-Abī ʿUthmān al-Māzinī*, by Ibrāhīm Muṣṭafā and ʿAbd Allāh Amīn, 3 vols., Cairo 1373-9/1954-60.

(R. SELLHEIM)

AL-MĀZINĪ, IBRĀHĪM ʿABD AL-ḲĀDIR, Egyptian writer, translator, poet and journalist (1890-1949). He was the son of an *ʿālim* of al-Azhar who became a judge at the *sharʿī* tribunal of Cairo; his maternal grandmother came originally from Mecca.

On the completion of his secondary studies, he entered the Teachers' Training College, since his family was not sufficiently wealthy to enable him to pursue any other career. Licensed as a secondary school teacher in 1909, he was appointed teacher of English at the Madrasa Saʿīdiyya where he remained for some ten years. His appointment to the same post at Dār al-ʿUlūm could be considered a promotion, but he himself well knew that he was suffering a penalty. In fact, the Minister of Education had decided to transfer al-Māzinī as a way of punishing him for having published in the press an article severely critical of the poet Ḥāfiẓ Ibrāhīm, who was a friend of the Minister. Al-Māzinī resigned his post and abandoned public education in order to teach in private schools. In 1918, his friend, the eminent writer al-ʿAḳḳād [*q.v.* in Suppl.], who was then an editor at *al-Ahālī* of Alexandria, helped him to obtain work as a translator and editor with the review *Wādī 'l-Nīl*.

This was not in fact al-Māzinī's first contact with the press. Since 1907, he had published some poems in *al-Sufūr*, a review then edited by Farīd Wadjdī; subsequently—from 1911 to 1914—also some articles in *al-Djarīda* of Aḥmad Luṭfī al-Sayyid and in the *Bayān* of ʿAbd al-Raḥmān al-Barḳūḳī. It was in the latter monthly that he published in 1913 a series of articles on the ʿAbbāsid poet Ibn al-Rūmī. The library of the review was one of the meeting places for Egyptian intellectuals; al-Māzinī there renewed his acquaintance with al-ʿAḳḳād, whom he had known then for three years, and it was there that he introduced to him the poet Shukrī, who had been his fellow-student at the Teachers' Training College.

But from 1918 onwards, al-Māzinī became a full-time journalist. He collaborated, successively, in the editing of various daily papers (*al-Akhbār*, *al-Balāgh* and *al-Ittiḥād*, which lasted for only a few issues) or weekly publications. In 1926, he even founded a new review, *al-Usbūʿ*. The most recent and most serious study of al-Māzinī reveals that he is credited with more than two thousand titles "of articles, meditations and studies", some of which have never been assembled in book form (Ḥ. al-Sakkūt and J. M. Jones, *Ibrāhīm ʿAbd al-Ḳādir al-Māzinī*, Cairo-Beirut 1979). Since he did not confine himself to literary questions but was also concerned with politics, and since, on the other hand, he was a man of frank speech and caustic wit, as a result, he became the object of criticism and even lost his job.

Translation constituted his other major activity. By the end of his life he had translated, from English, eight books as well as five literary texts published in reviews. It is appropriate to mention here that he also worked as an interpreter, both as a press correspondent at the Military Tribunal where the proceedings were conducted in English, and on behalf of various societies.

It is no doubt the press article (*maḳāl* or *maḳāla* [*q.v.*]) which represents the literary genre in which al-Māzinī particularly excelled. But his activity extended over various domains, in all of which he made an impression with his strong personality.

Poetry. He has a place, with al-ʿAḳḳād, at the head of the Egyptian poetic revival, of which the true initiator was however ʿAbd al-Raḥmān Shukrī, who acquainted them with English literature and in particular its romantic poets and its literary critics. At the

Teachers' Training College, al-Māzinī had benefited from his readings in English which enabled him to discover Byron, Shelley, the "Lake Poets" Wordsworth and Coleridge, and Browning. Since that time al-Māzinī, captivated by romantic sensibility, felt the need to express melancholy, sadness and the pain of living, the result of which was his *Dīwān* (first section 1913; second 1917; third, posthumously, 1960; published in entirety in 1961).

However, this convinced modernist hardly sanctioned a revolution in poetical forms; his greatest audacity consisted in abandoning the single rhyme in favour of the alternate rhyme. This is no doubt explained by the fact that his discovery of foreign poetry was accompanied by a deepening of his Arabic culture. At this time, the publication of the Arabic classics was in progress, and al-Māzinī thus read the poets al-Sharīf al-Raḍī, Ibn al-Rūmī and al-Maᶜarrī, being also drawn to the prose-writer al-Djāḥiẓ, whose spirit and style left their mark on him. Not all of these published editions were perfect, and it is said that he often went to Dār al-Kutub to consult the manuscript of *al-Aghānī*; it also seems that Shukrī and he spent hours there recopying the manuscript of the *Dīwān* of Ibn al-Rūmī. He was 55 years old when, in an article appearing in *al-Mashriḳ* of December 1944, he announced that he had undertaken a reasoned and systematic study of Arab literature, applying the method which he had acquired from the school of the English writers.

But he quite soon gave up composing poetry. In explaining this decision, he said that he had never been entirely satisfied with his production in this field, even regretting that he had not had the courage to destroy his compositions. On the other hand, his role as a literary critic continued to command respect.

Criticism. In an article appearing in *al-Mustamiᶜ al-ᶜarabī* of 1949, Ṭaha Ḥusayn expressed the opinion that for some twenty years, the Egyptian writer had ceased to limit his horizon to his own country and had begun to take an interest in the outside World. There were in fact two schools of modernists: a French school where, following Aḥmad Luṭfī al-Sayyid, the most distinguished figures were Ṭāhā Ḥusayn and Muḥammad Ḥusayn Haykal; and an English school where, following ᶜAbd al-Raḥmān Shukrī, the two leaders were al-ᶜAḳḳad and al-Māzinī. This "school" published its manifesto, *al-Dīwān*, in 1921. To be more exact, this was the beginning of an uncompleted critical work. The two writers al-ᶜAḳḳad and al-Māzinī declared their intention to write ten fascicles in which they would show, successively, in what ways the literary celebrations of the time were overrated and what should be the new characteristics of Arabic poetry. Only the first two fascicles appeared, and what is known as the *Dīwān* is thus limited to violent criticism of the contemporary idols, the poet Aḥmad Shawḳī and the prose-writer al-Manfalūṭī. To these two targets, the two iconoclasts added a completely unexpected third, ᶜAbd al-Raḥmān Shukrī! It is even in reference to him that al-Māzinī—to whom it fell to analyse him—uses the term "idol". It is impossible not to be astonished at this sudden reversal when it is known what close friends the two men were, a friendship which rested in particular on perfect similarity of views in questions of poetry.

Some years before the publication of the *Dīwān*, al-Māzinī had, for the first time, propounded entirely new principles for the criticism of Arabic poetry, principles which he had drawn from his reading of Hazlitt, Arnold and Macaulay. In a small monograph which appeared in 1915 (*al-Shiᶜr, ghāyātuhu wa-wasāʾiṭuh*), he demands of the poet that he should be sincere and that he should not produce work in a mechanical fashion but compose a personal poetry. The same year, under the title *Shiᶜr Ḥāfiẓ*, he reprinted articles which he had devoted to the eminent Egyptian poet and had published in the review *ᶜUkāẓ* in 1913. According to him, Ḥāfiẓ is a charlatan who is capable of composing poetry on subjects which do not genuinely affect him, which are supplied to him by the circumstances of actuality; he is a criminal who perverts the taste of readers, accustoms them to lie and damns them! In order the better to pursue this vulgar versifier (*nāẓim bi 'l-ṣanᶜa*) he compares him with a true poet, a poet of innate talent (*maṭbūᶜ*) ... Shukrī in fact. His method consists in comparing, theme by theme, the verses of each of the two men in order to demonstrate the accuracy of his judgment. But since certain partisans of Ḥāfiẓ reproach him for concentrating on only the worst verses of the poet, he adduces proof to show that his best compositions, for their part, are only plagiarism of the ancients. It may be noted in passing that the modernist al-Māzinī falls into step with the most traditional of Arabic criticism, since he practises parallelism (*muwāzana*) and is concerned to uncover plagiarisms (*sariḳāt*). However, the harmonious relationship between al-Māzinī and Shukrī did not survive an article by the latter published in the *Muḳtaṭaf*, in which he revealed that his colleague had borrowed many of the themes of his *Dīwān*—if not entire verses—from Palgrave's *Golden treasury*, an anthology of English lyric poetry after Shakespeare. Nothing more is needed to explain the sudden antipathy of al-Māzinī with regard to Shukrī in his two fascicles of the *Dīwān*, even though, subsequently, he felt obliged to retract his strictures and to acknowledge, in an article in *al-Siyāsa* of 5 April 1930, that it was to him that he owed his discovery of the essence of poetry.

With regard to ancient Arabic poetry, he is interested particularly in al-Mutanabbī and Ibn al-Rūmī, whom he studies as a priority, as does his companion and model al-ᶜAḳḳād. He seeks to reconsider the question of the scale of traditionally fixed values. Ibn al-Rūmī seems to him to have been unfairly treated, no doubt because he was of Byzantine ancestry (*rūmī*). He considers that this should be in itself a sufficient reason for placing him above other poets. He states: "We do not try to mock the Arabs or to discredit their poetry. We mean only to say that the Arabs are not the most poetic people". According to him, all the human qualities are to be found in Western poetry, and he concludes by declaring himself a fanatical partisan of the West, eulogising the "Aryan peoples". Western theoreticians assist him to make progress in the evaluation of the resources of poetry: the German Lessing enables him to verify, in the work of Ibn al-Rūmī, again, that descriptive poetry, unlike painting on canvas, creates the illusion of movement; the Englishman Locke uncovers for him the possibilities offered by figurative sense (*madjāz*) and symbol (*ramz*). Through contact with European works, he poses in new terms the problem of the imagination. He tends to see here only the faculty of establishing a new combination of given elements from which innovation emerges. If he seems to ignore creative imagination, this is because of his rejection of the implausibilities which sometimes mar classical Arabic poetry. Like al-ᶜAḳḳād, he does not accept gratuitous extravagance, the senseless hyperbole which Arabic poetry shamelessly displays, under the guise of poetic genius.

Al-Māzinī is renowned as being a man of hard judgment, but while he has a grasp of concise for-

mulae, he also possesses an immoderate taste for digression, and it is the middle course, commonplace assessment of the subject under discussion, which is lacking in him, with the result that tangible elements in his critical works are somewhat limited. It is unusual to see him take a precise example, as in the *Dīwān* where he shows that a story of al-Manfalūṭī (*al-Yatīm*) displays well the characteristics which he denounces: hollow and oratorical style, peevish and effeminate writing, coincidences and implausibilities. Most often, he speaks of everything except the book which he is supposed to be examining. His "criticisms" of works by Ṭaha Ḥusayn, Mayy Ziyāda [*q.v.*] and even al-ʿAkkād are astonishing examples of this. Ironical posturing suits him better than demonstration based on analytical argument.

Narrative fiction. When the attempt is made to assess the contribution of al-Māzinī as a novelist, it is appropriate to consider him in the perspective of the time. After the first edition of *Zaynab* by Haykal—which dates from 1914—few works of note appared in the succeeding years: *Thurayyā* (1922) by ʿĪsā ʿUbayd is rather a long short story, and *Ibnat al-mamlūk* (1926) by Ibn Abī Ḥadīd is a historical novel. This being so, chronologically al-Māzinī produced the second novel which had ever appeared in Egypt when he published *Ibrāhīm al-kātib* (1931), the second edition of *Zaynab*, in 1929, having refreshed the already distant memories of the first. It is also appropriate to mention that al-Māzinī had published a version of the first five chapters from the end of 1925 in several issues of the review *Rūz al-Yūsuf*. The author was already known, was even eminent, as an innovating poet counted among the proponents of the modern school of literary criticism, and the role that he played in crossing swords with Ḥāfiẓ, Shawkī and others was not to be forgotten on account of the fact that he renewed his attacks in the columns of the press, also making a name for himself in the discussion of social and political questions in *al-Akhbār*, *al-Ittiḥād* and *al-Siyāsa*, in which his vivid style and caustic tone were widely recognised. On account of all these factors, his novel was eagerly awaited, and it did indeed, in a general sense, achieve real success, for three essential reasons. The leading character who bears the same name as the author is, in fact, his double, and nobody can doubt that they both think, act and feel in the same way; he is charming and impulsive, a sceptic if not a pessimist, considering others and himself with humour. The story related, on the other hand, does not fail to engage curiosity, since the three women with whom Ibrāhīm is romantically involved pose such fundamental questions as the importance of tradition, the role of women and the meaning of marriage. Finally, as to the tone of the novel, its unity is maintained on account of the fact that the narration is in the first person, facilitating the transfer from abstract meditation to lively and satirical description or to vivid dialogue. Al-Māzinī's first contribution to fiction would thus appear to be entirely creditable, leading one to suppose that he would not be slow to repeat this success. However, it was not until 1943 that he added to his corpus, publishing four novels in the same year: *Ibrāhīm al-thānī*, *Thalāthat ridjāl wa-mraʾa*, *ʿAwd ʿalā badʾ*, *Mīdū wa-shurakāhu*. Some have tended to attribute special significance to the first two, linking them with the novel already discussed to constitute a "trilogy" (cf. Ṭāhā Wādī, *Ṣūrat al-marʾa fī 'l-riwāya al-muʿāṣira*, Cairo 1973). This cannot be substantiated except in reference to *Ibrāhīm al-thānī*, which could indeed be taken to represent that which befalls the hero of the earlier novel some years after his marriage, when conjugal monotony begins to weigh upon him and he finds himself dangerously tempted by the young women who surround him. It is true, however, that a certain evolution is perceptible running through the three books in question as regards the role of the wife. Time has passed since *Ibrāhīm al-kātib*, but some ten years more and the equality in principle of the two spouses are not sufficient to make the life of the couple in *Ibrāhīm al-thānī* euphoric. On the other hand, the acquisition by the wife of responsibility in *Thalāthat ridjāl* makes of her a character quite unique, capable of initiatives, and the form accords with the content—it is no longer an account written in the first person.

During the five remaining years of his life, al-Māzinī was not to publish a new novel. It may be mentioned here that he published a single theatrical piece, *Ghazīrat al-marʾa aw ḥukm al-ṭāʿa* (1930), not only to indicate that, on the stage also, the question of feminine rights seems to him to require treatment—like many other intellectuals, he supported the movement for the reform of ideas initiated by Ḳāsim Amīn at the beginning of the century—but also to tackle a question which has taken on a particular importance in the eyes of Egyptian critics studying the works of al-Māzinī. The point at issue is the "borrowings" of this writer. In itself, the subject seems predominantly to concern Egypt, since it sets out to show that the kind of "compulsion to remain at home" (*ḥukm al-ṭāʿa*) which every Egyptian husband has the right to impose on his reputedly disobedient wife is a scandalous sexual privilege, a denial of justice which should not long be tolerated by the legislators. The literary critic of *al-Balāgh* revealed that, in essence, the plot and some of the scenes of the play had been taken from a novel by Galsworthy. It was in 1932 that there took place the polemic between al-Māzinī and his accuser, this being the year that Galsworthy, the famous author of *The Forsyte Saga*, received the Nobel Prize. Although he did not admit his plagiarism, our writer's protestations were far from convincing. The opinion of scholars has been quite united in this regard, just as nobody doubts that al-Māzinī padded out his novel *Ibrāhīm al-kātib* (1931) by incorporating in it five pages from a Russian novel (*Sanine* by Artzybachev) which he himself had translated in 1920 for the *Musāmarāt al-shaʿb*. When challenged on this point, the author did not deny it, contenting himself with a declaration of his good faith (he read a great deal, retained material easily and was ultimately unable to tell what genuinely was his own creation!). Such disarming naïvety is perplexing, all the more so since it is hard to understand what real benefit he could have gained from the practice. One may also ask why—again in his first novel—he is observed to repeat several pages already published some years before in a collection of his articles, *Ḳabḍ al-rīḥ* (1927). In this instance he is plagiarising himself. The answer to this question supplied by a enquirer very favourably disposed towards him is that he is consistent in his ideas which he puts into the mouth of his fictional hero (on this question, cf. Mme Niʿmāt Aḥmad Fuʾād, *Adab al-Māzinī*, Cairo 1961).

If his theatre is almost non-existent and his work as a novelist less significant than might have been hoped, al-Māzinī remains a remarkable storyteller. He is seen fulminating in the *Dīwān* against the morbid, grandiloquent and ultimately dishonest literature of al-Manfalūṭī. The first fruits of Arabic narrative writing, more credible because more in tune with society and people as they are, appear in the short stories of the Taymūr brothers, but are also to be

found among the many texts published by al-Māzinī himself. In fact, alongside his analysis and assessment of works, and his literary studies, alongside his political writings, he published a quantity of stories which may be found today in eight collections, of which the most notable are *Ṣundūḳ al-dunyā* (1929) and *Khuyūṭ al-ʿankabūt* (1935). The bibliography of the work by Sakkut and Jones mentioned above refers to a further 114 "narrative works" which appeared in periodicals, of which 76 have never been reprinted. All these narratives, of variable length, approximate more or less to the living tableau or short story as such, tending rather to resemble what Anglo-Saxons call the "essay" or "sketch". Most often, the fiction is minimal, the author embroidering with humour and fantasy upon a reflection, a memory or an observation. He also enjoys making himself a central figure in the scene that is sketched out or making himself a target for his own jesting, since his small stature and the limp from which he suffered are easily evoked in a few words. Some suppose that this constant jesting is a means of exorcising a sense of shame which could have become a complex. In any event, this quasi-systematic procedure facilitates the establishment of a complicity with his reader which al-Māzinī manifestly seeks. He does not take himself seriously, and treats other writers, whoever they may be, with equal levity. Much affected by reading the Bible and in particular the Book of Job, he has a tendency to agree with the famous line "Vanity of vanities, all is vanity". It is noticeable that each chapter of his *Ibrāhīm al-kātib* bears as a heading a phrase drawn from a verse of the Old Testament and the titles of almost all his collections indicate the illusory nature of human existence and of its works; already there has been observed the illusion of writing symbolised by "the kaleidoscope" (*Ṣundūḳ al-dunyā*) and the incongruity of the "threads of the spider" (*Khuyūṭ al-ʿankabūt*), but to these may be added the mirage of a "harvest of grass" (*Ḥaṣād al-hashīm*, 1924) and the nothingness of a "handful of wind" (*Ḳabḍ al-rīḥ*, 1927). Our writer expresses himself on a very flexible canvas, since all that he hears is his fantasy. Malicious sketches, incidental remarks, paradoxes, aphorisms, follow one another for the enjoyment of the reader. To be sure, not everything is said in a jocular tone, for he has written moving pages describing his mother, whom he adored, or his daughter, who died at an early age. Nor is everything bizarre, and there are times when reality prevails over the "nonsense", in particular when he evokes his childhood, giving the reader the opportunity to imagine a Cairo home at the end of the last century and the life that was lived there. But this is a retrospective view conducted with a sense of the humorous and the unusual. Humour is always in evidence with him, even when he travels to Mecca; his *Riḥla ḥidjāziyya* (1930) contains some excellent jokes. In the attempt to decide with whom to compare this virtuoso of comic prose, this independent spirit hostile to protocol and to the conventional, the names of al-Djāḥiẓ and Mark Twain spring to mind. But al-Māzinī was most certainly both typically Egyptian and tremendously modern. Towards the end of his life, he became a member the Cairo Academy and the speech that he gave on this occasion was striking for its anti-conformism—as might indeed be expected from the man who nicknamed this venerable institution "the cemetery of the immortals".

Counillon, *A propos d'une nouvelle d'al-Mâzinî* in *Bull. Et. arabes*, v (January-February 1942), 3-6.

(CH. VIAL)

MAẒLŪM (A.) a technical term of Shīʿī, especially Twelver, Islam, which nevertheless retains its current *ism mafʿūl* meaning from the root *ẓalama*: someone or something "treated or used wrongfully, unjustly, injuriously, or tyrannically" (Lane, 1923). In Persian, a language in which a large part of the literature referred to here mentions it, the word means also *sitam rasīda* (*Farhang-i Ānandarādj*, vi, 4042) or "injured, oppressed, seized forcibly ..." and, consequently, "mild, gentle, modest" (Steingass, 1263).

Maẓlūm is one of the attributes which characterise the *Imāms*, and it is coupled with *shahīd* and sometimes substituted for it. This fits in with the theological and hagiographical vision in the time of the *Imāms*, a vision which claims them as martyrs, pure (*maʿṣūm*) victims because they are pure by definition, their role being to bear a witness which is expressed by means of the conscious sacrifice of their life. Thus they are *maẓlūm* because they have for their opposites those who are *ẓālim*: ... *man aẓlamu mimman katama shahādatan ʿindahu min Allāh*... (Ḳurʾān, II, 140/134, "Who then is more unjust than he who conceals testimony which he possesses from God?"). The testimony in the case of the *Imāms* becomes their *shahāda*, their martyrdom. The full meaning of this testimony depends, moreover, on the fact that they are, vis-à-vis humanity, the *ḥudjdjat Allāh*, the proof of God par excellence, i.e. the proof that man should recognise in order to obtain his eternal salvation.

Until now the discussion has been general, and may perhaps be further generalised, in the sense that all the *ahl al-bayt* are defined as *maẓlūm* according to a famous *ḥadīth*, for which we give here a typical reference, Kāshifī, 170: *naḥnu ḳawm maẓlūmūn, naḥnu ḳawm maṭrūdūn, naḥnu ḳawm makhūrūn*, which indicates in the genealogy of Abū Ṭālib, the "we" in question.

To belong to the "family" means to be ready for martyrdom, to undergo the violence of the *ẓālim* and be destined for exile, as the word *maṭrūd* explains; but the root *ẓalama* also indicates in its primary meaning "to put something in a place which is not its own" (*LA, s.v.*) and Shīʿī Persian literature appears moreover to refer to it when it adds to the attributes *maẓlūm* and *shahīd* that of *gharīb*.

Maẓlūm has a particular significance in the case of two *Imāms* who are the symbol of the perfect martyr, being *maʿṣūm* and *maẓlūm*, sc. al-Ḥusayn b. ʿAlī and ʿAlī al-Riḍā. The former is often defined as the *maẓlūm-i Karbalāʾ* (Djawharī, 138 ff.), but another important meaning of the word is, in some way, present. *Maẓlūm* (or rather *maẓlūma*) is the adjective for land where rain does not fall, or where it is difficult to sink a well to find water (cf. the Arabic dictionaries s.v. *ẓ-l-m*). Al-Ḥusayn is *maẓlūm* due also to the particular manner of his martyrdom, due to thirst, since his enemies here denied him water. However, in the case of ʿAlī al-Riḍā, *maẓlūm* becomes synonymous rather with *gharīb*, the victim who chooses to die far off, "in the East" and who makes of his "Eastern" exile the testimony of his mission, which, emblematically, contains all the ideas peculiar to the *Imāms*, whether in religious terms or in mythological terms (B. Scarcia Amoretti, *Un interpretazione iranistica di Cor. XXV, 38 e L, 12*, in *RSO*, xliii/ [1968], 46-52).

In present-day Shīʿī thought, the word *maẓlūm* is still in frequent use. When the martyrdom of al-Ḥusayn is put forward as the example to follow in

order to be liberated in this world and to find salvation in the next, the matter is clear enough. The history of mankind finds in the life of al-Ḥusayn and in Karbalāʾ its paradigm and a daily proof (*ḥudjdja yawmiyya*). And, in this sense, *maẓlūm* is a word which also defines, in opposition to all that is *ẓālim* (law, existing order, etc.) the man who is *maʿzūl*, oppressed (Shams al-Dīn, 11 ff.), who alone can become what al-Ḥusayn is for the Shīʿī religious conscience.

Bibliography: There is no specific bibliography on the subject. The texts drawn upon for the definition of *maẓlūm* (the parts concerning the *Imām* al-Ḥusayn b. ʿAlī and the *Imām* ʿAlī al-Riḍā) are the following: Ibn Babūya al-Ḳummī, *ʿUyūn akhbār al-Riḍā*, lith. Tehran 1275/1858-9; Wāʿiẓ Kāshifī, *Rawḍat al-shuhadāʾ*, Tehran 1334/1962-3; Mīrzā Muḥammad Ibrāhīm al-Djawharī, *Ṭūfān al-bukāʾ*, lith. Tehran n.d. As far as contemporary literature is concerned, much has been written on the concept of martyrdom. One may mention in translation: ʿAlī Sharīʿatī, *Martyrdom: arise and bear witness*, Tehran 1981; Murtaḍā Muṭahharī, *The martyr*, Tehran 1980; Muḥammad Taḳī Sharīʿatī, *Why Husain took stand*, Tehran n.d. In Persian: ʿAlī Sharīʿatī, *Ḥusayn wārith Ādam*, Tehran n.d.; Maḥmūd Ṭāliḳānī, *Djihād wa shahāda*, Tehran n.d. In Arabic: Shaykh Muḥammad Mahdī Shams al-Dīn, *ʿĀshūrāʾ mawkib al-shahāda* (on the occasion of 10 Muḥarram 1403/1982 in Beirut).

(B. Scarcia Amoretti)

MAZRAʿA (A.), *mazraʿa*, *mezra* or *ekinlik* in Turkish, means in general arable land, a field; as used in the Ottoman survey registers, it designates a periodic settlement or a deserted village and its fields. According to a regulation, to register a piece of land as *mazraʿa* it was required that it be checked whether the place had a village site in ruins, its own water supply and a cemetery (Barkan, 53, 133, 190). Such a piece of land is occasionally called *matrūk yer*, abandoned land. In the *daftars* [*q.v.*] we often find the following note on *mazraʿas*: "previously it was a village, now its population is scattered and the fields abandoned (*khālī*)". Usually a *mazraʿa* has fixed boundaries. A *mazraʿa* might have gained over time a few families of settlers, but would still be registered as a *mazraʿa*.

Every *mazraʿa* is referred to by a specific name which often reveals its origin or first possessor. In the province of Ḳaramān, for example, many *mazraʿa* names are coupled with *ḥiṣār*, referring probably to abandoned Byzantine castles, or with *aghîl* "sheepfold", or having reference to a nomadic group which used the site as pastureland. A great number of village names in Anatolia bearing the name *vīrān* or *ören* must originally have been *mazraʿas* which over the course of time were transformed into full villages. But when we speak of *mazraʿa* as an abandoned village we mean basically not just the site of the village itself, but rather its fields.

In western Anatolia and the Balkans, the Ottomans inherited the Byzantine rural landscape with its sub-villages and periodic settlements. The earliest reference to a *mazraʿa* appears in Sultan Orkhan's *waḳf* for the bridge he built at Alma-Pînarî. Under the Byzantines, the *mazraʿa*-type lands as dependencies of a village were known as *agridia* and *proasteia*, the former designating partly settled and the latter unsettled satellite land (Ostrogorsky, 1962, 149). As was the case under the Ottomans, when the village rented such land collectively it paid the rent collectively (*ibid.*, 114), but this special case cannot be used as an argument for the theory that in general village land was subject to collective ownership under the Byzantines.

In the survey registers, abandoned villages or *čiftliks* are shown also as *khālī*, uninhabited, or *kharāb*, in ruins, or *khirbat* (in Syria). In these registers, the deserted or periodically settled and used lands were of different sizes and were shown under different names. Theoretically, the largest one was a *mazraʿa*, sometimes with water and a cemetery, and was always considered capable of being converted into a village, so that all *mazraʿas* were carefully recorded. Other such lands of smaller size are, in order, *čiftlik* [*q.v.*], *zamīn* (in Turkish *zemīn*), *ḳiṭʿa* and *tarla* "individual field". In practice, the word *mazraʿa* was occasionally used for a *čiftlik* or a *zamīn* of a few *dönüm* (1 *dönüm* equals about 920 m^2) or any piece of land not possessed under the *tapu* system.

The abandoned land might be turned into a pasture or a vineyard and still retain the name *mazraʿa*. From the standpoint of land use, a *mazraʿa* is a field for grain production as opposed to pasture, vineyard, orchard, etc.

The hypothesis that in Anatolia the settled population chose to have their settlement sites on the hillsides in order to escape malaria and all kinds of marauders, soldiers, brigands, and passers-by, and maintained as a satellite exploitation a *mazraʿa* down on the flat land (*düzlük, ova*) (Tanoğlu, 1954, 27-8), holds true for many areas. Hütteroth (1968, 36-53) demonstrated it for central Anatolia, and Tanoğlu gives some examples for eastern Anatolia. While on the hillsides viticulture, horticulture, olive growing, and livestock breeding were preponderant, fields for grain production were located in the *mazraʿa* down on the flat land. The Syrian and Palestinian villages with vineyards, orchards and olive groves on the hillsides and *mazraʿa* down on the lowland or in the valleys also provide instances of this pattern (Hütteroth and Abdulfattah, 1977; B. Lewis and A. Cohen, 1978). This village-*mazraʿa* pattern develops into an upper village and a lower village when the satellite *mazraʿa* on the lowland is settled. Village names preceded with *zīr-* and *bālā-*, *yuḳarî-* and *ashaghî-*, or in the Balkans *dolni-/dolne-/dolnje-* and *gorni-/gorne-/gornje-* reflect the same process.

The fact that most of the *mazraʿas* were registered as dependent (*tābiʿ*) on a village as its *ekinlik*, reserved fields, can be taken as proof that the Ottoman administration generally recognised the *mazraʿa* as an indivisible part of village economy. Such *mazraʿas* secured an extra source of income for the villagers and provided land for the surplus population. Often villagers cultivated such land without the government's knowledge, arguing that it had always belonged to them. As a result, the rule was made that no abandoned land could be exploited without the Sultan's prior approval (Meḥemmed the Conqueror's *Ḳānūn-nāme*, Barkan 390, art. 16). Because the benefits of such exploitation were vital for the village economy, villagers vigorously contended against *tīmār*-holders or government agents who chose to rent such *mazraʿas* to outsiders. In opposition to such outsiders, including members of the military élite, who were particularly interested in renting *mazraʿas* in order to turn them into big *čiftliks*, villagers often rented them collectively.

Whether a *mazraʿa* was registered in the *daftar* or not determined its status. It could be registered as part of a village or of a *tīmār* or of a *waḳf* or independently in the register. A *mazraʿa*, being abandoned land, quite often escaped the surveyor. When discovered it was called "unregistered *mazraʿa* with no fixed taxes"

(*khāridj az daftar bilā rüsūm olan mazraʿa*). Such *mazraʿas* were rented out and their revenue collected by government agents called *khāridj emīni*. Such lands could also be assigned to a *tīmār*-holder (*Arvanid defteri*, no. 178). This was because the government was concerned that no arable land, however small, be left uncultivated and without bringing in some sort of revenue. Under the *muḳāṭaʿa* [*q.v.*] system, such abandoned or unregistered lands as *mazraʿa, čiftlik*, or *zamīn* were offered to any bidder, military or townsfolk, Muslim or Christian, or even to a foreigner, anyone who would guarantee to the treasury a steady revenue from it. In 1545 in Bosnia, Venetians were able to rent *mazraʿas* (Gökbilgin, 1964, 208). Otherwise, in principle, the government's policy was ultimately to convert all such lands into villages or *raʿiyyet čiftliks* [see ČIFTLIK] under the *tapu* [*q.v.*] system. In other words, arable lands were basically reserved for the exploitation of the registered peasants, *raʿāyā* [*q.v.*], excluding the townsfolk and the military, and such lands, comprising the great majority of arable land in the empire, were categorised as *tapulu arāḍī*. Under the *tapu* system, the peasants were responsible for paying regular *raʿiyyet* taxes, including *čiftresmi* [*q.v.*]. In contrast, those lands not in the possession of the registered *raʿāyā* were treated fiscally as a separate category under the *muḳāṭaʿa* system, and such lands were called *muḳāṭaʿalu arāḍī* as opposed to the *tapulu arāḍī*.

Newly-conquered and abandoned land, since no previous record was available for its taxation, was also treated as a *mazraʿa* and was submitted to auction in order to achieve the highest possible revenue derivable under the circumstances (*Kanun i Kanunname*, i, 64). It was through an auction that the *muḳāṭaʿa* amount of a *mazraʿa* was determined.

The usual reference, "it is cultivated by those who come from outside" (*khāridjden ekilür*) on *mazraʿas* and *muḳāṭaʿalu čiftliks* indicates a situation in which the land was not possessed and cultivated by *yerlü*, the local *raʿāyā*, under the *tapu* system, but by those *raʿāyā* who were not registered with the land and were consequently considered "outsiders". The latter were normally *khaymānegān*, literally "people living in tents", but in practice meaning any wandering *raʿāyā* who might come and exploit the land on a temporary basis, paying rent or tithes to the "owner", *ṣāhib*, of the *muḳāṭaʿa*, the "owner" being the renter of the land. If the "outsider" settled on a *tīmār*-holder's or on *waḳf* land for three consecutive years he automatically became a *yerlü* and then the land was given to him under the *tapu*.

Thus in principle, *mazraʿas* were fiscally exploited under the *muḳāṭaʿa* system, which consisted simply of renting under a contract, *temessük* or *ḥüdjdjet*. The record of the rental in the register, which specified the possessor and the obligation, had binding force for both the state and the individual. The possessor's payment for the *mazraʿa* consisted either of tithes or of a fixed amount in cash.

When a *mazraʿa* was given in the way of *yurdluk* (*ber vedjh-i yurdluk*), it was possessed as a hereditary freehold property, usually on condition of sending a cavalryman [see ESHKINDJI] to the sultan's campaigns. In some cases, this obligation was forgiven (Konya TT40, 17).

The next question is to determine how *mazraʿas* emerged and under what conditions their number increased or decreased. The peasant populations would abandon their villages, temporarily or permanently, for various reasons. Natural and economic conditions conducive to mass flight included exhaustion of the land, desertification, and epidemics. Social and political conditions were no less important. First and foremost, peasants left their villages en masse to avoid being despoiled by passing troops, brigand bands, or caravans. A particularly important cause of flight was to avoid registration for taxes [see TAḤRĪR] and tax collection. The peasant's most effective means of getting a tax reduced or abolished was the threat of being scattered abroad (*perākende ve perīshān olmaḳ*). Assuming the character of a mass protest, scattering became in effect a peasant strike and was frequently resorted to. What made it more frequent was that peasants did not own the land they cultivated under the *tapu* system, and there were always other lands available. The growing number of villages in the forests is largely due to this situation. On the other hand, the big landowners, and particularly *waḳf* lands, promised better conditions in order to attract the registered *raʿāyā* of the *tapu* lands. Thus the rural population in the Ottoman Empire, especially in Anatolia and the Balkans, became quite a mobile population, which accounts for the unusually large number of deserted villages in the Empire.

The increase or decrease in the number of *mazraʿas* can be taken as an indication of demographic and economic decline or development in a particular region; and the relative number of villages and *mazraʿa* can be determined for most of the provinces through the survey books (see TAḤRĪR, and maps in Tanoğlu, 1954; Hütteroth and Abdülfattah, 1977). In 1597 in some districts in Palestine (Hütteroth and Abdülfattah, 23, 24, and maps nos. 3, 10, and 13) the number of *mazraʿas* was two or three times greater than the number of villages (in the *sandjaḳ* of Ṣafad there were 610 *mazraʿas* as against 282 villages), whereas in the *sandjaḳ* of Aleppo both the villages and the *mazraʿas* numbered about one thousand (Venzke). Hütteroth (1986, 25) estimates that at the turn of the 18th century, about half of the Anatolian population depended on the various types of periodic settlements, and he finds it one of the most important features of the Middle Eastern cultural area.

In the formation of *mazraʿas* conditions other than peasant flight have also to be considered. Sometimes the peasants used nearby marginal land for cultivation, or reclamations were made on wasteland (*mawāt* [*q.v.*]) in the forests or swamps, or pasturelands in the *yayla* were used for cultivation; *mazraʿas* formed in these ways are frequently referred to in the survey registers. Also, conversion of the *tapulu* lands into livestock ranches gave rise to *mazraʿa*-type formations. When the central bureaucracy's control weakened during protracted wars, struggles for succession to the throne, uprisings, etc., the military's acquisition of abandoned lands became widespread. Those who acquired such lands under *muḳāṭaʿa* were called *aṣḥāb-i muḳāṭaʿa*, owners of the *muḳāṭaʿalu* land.

Since the abandoned *mazraʿas* could be given to anybody paying the rent, *muḳāṭaʿa*, including the military, the latter used this loophole in the Ottoman land system to enter into possession of the *mīrī* [*q.v.*] or state-owned lands, and to run the land as an estate. As such *mazraʿas* needed a labour force for their cultivation, the military offered favourable conditions to attract registered *raʿāyā* and thus caused disruption in the *mīrī*-based settlements. At other times, because of the labour shortage, they converted their *mazraʿas* into livestock ranches.

When *mazraʿa* owners were able to attract *raʿāyā* to their lands, they usually had recourse to the method of sharecropping (*ortaḳdjīlīḳ*). They furnished land and often seed, oxen, and domiciles to the sharecroppers.

In Anatolia, large areas of arable land abandoned by villagers were converted into ranches, partly because of the high price of meat in general and partly because of the military's difficulty in finding sufficient labour for cultivation. In any case, the Ottoman military class, unlike western landlords, was not capable, for various reasons, of owning land and organising it as big estates. In the period 1596-1610, the Djelālī [see DJALĀLĪ in Suppl.] depredations and insecurity in the countryside caused a tremendous increase of *mazraʿas* and *mazraʿa*-type land use throughout Asia Minor, resulting in a great diminution of agricultural land and grain production. A similar usurpation of the small plots of peasant families by "the powerful" in the provinces occurred in Byzantine Asia during the 10th century, and the emperors were forced to take radical measures against this development.

The second method used by the military to provide agricultural labour was the settlement of war prisoners on the land. As early survey registers demonstrate, the first Ottoman sultans as well as the members of the military class, the frontier begs in particular, employed this practice quite extensively.

The sub-village periodic settlements and exploitations could increase or decrease, and thus a pasture (*čayïr, yayla, ḳïshla*, or *oba*) could become a *mazraʿa* over the course of time by being converted into fields, or vice-versa. The state took the initiative in promoting settlement and cultivation and in restoring abandoned villages. The grant of land as freehold, *tamlīk* [see MILK] is one method.

In Serbia, abandoned villages were brought back to cultivation by the settlement of the Vlachs in the same way that nomads or wandering peasants (*khaymānegān*) were encouraged to settle *mazraʿas* in Anatolia. The state also encouraged *tīmār*-holders to assemble dispersed peasants to restore a village, promising them promotion.

Ottoman survey registers show that, besides belonging to villages, a great number of "vacant", *khālī, čiftliks* and *mazraʿas* were registered as "dependent", *tābiʿ*, on towns within the boundaries of the central district, *nāḥiye(t)* (Faroqhi, 1984, 191-266). This situation reflects the economic dependence of the towns on such agricultural reserve land, without which the towns could not survive. Given the exhorbitant transportation costs of the time, towns had to rely on this hinterland for an important part of the foodstuffs, fuel for their populations and raw materials such as cotton, wood, and hides for their handicrafts. The social and economic dynamics of such villages and sub-village settlements appear to be vivid and complex compared to that of "independent" rural settlements. The villages near towns were transformed into *mazraʿas* or *čiftliks* probably because the village population, attracted by better opportunities in town, migrated there, and once deserted, the village land was acquired under *muḳāṭaʿa* by well-to-do town residents and turned into a kind of estate-*čiftlik* (Faroqhi, 1980, 87-99).

As far as present-day Anatolia is concerned, human geographers (A. Tanoğlu, 1954; Hütteroth, 1968, 24-52; Tunçdelik, 1971, 17-55; Hütteroth and Abdülfattah, 1977, 29-32) study *mazraʿas* among the periodic settlements or small rural settlements on the way to becoming villages—rural *maḥalle, yayla(ḳ), ḳïshla(ḳ), ḳom, oba,* and *dīwān*. Throughout eastern Anatolia today, a great number of villages with a small settlement and having no formal village institutions such as *mukhtārlïḳ* come under the name *mezra, mezre,* or *mezri*. Settlement of marginal lands as a result of rural overpopulation is considered to be the underlying reason for such settlements. In the survey books, no mention is made of *ḳom* or rural *maḥalle*, which may be local names for *mazraʿa* (cf. Tunçdelik, 1971, 43).

Ḳom is to be found in eastern Anatolia; it differs from a *mazraʿa* by being a kind of ranch for animal breeding and is usually owned by an absentee landlord. It surrounds sheepfolds and shepherd huts. *Oba* is the grazing area of a nomadic household and should be studied rather within the *yayla* structure (Tunçdelik, 1971, 44). When settled by the nomad households which shift to agriculture as their main occupation, the *oba* assumes rather the character of a *mazraʿa*. The process is attested from early Ottoman history. At the present time, all *obas* are of this developed type. *Dīvān* was apparently a tribal superstructure over the *obas* (Tunçdelik, 47-8; Barkan, *Kanunlar*, 28-32), which disappeared as settlement progressed. Some isolated *čiftliks*, settled by one or a few families devoted to agriculture and livestock breeding, are considered, like the *mazraʿa*, as a kind of settlement liable to develop into a village (Tunçdilek, 43). In Palestine, Transjordan, and Syria (Hütteroth and Abdülfattah, 1977, 29-32), *mazraʿas* were "small agricultural areas, dispersed amongst the hills, lying within the village area but apart from the main fields belonging to the village, as is still the case today". According to the regulations and survey registers (*ibid.*, 31), the size of a *mazraʿa* varies widely. It may consist of only one or two *čiftliks* or have the size of a village, judging from its estimated revenue. However, as was made explicit in some *ḳānūn-nāmes* [*q.v.*], the typical *mazraʿa* is a deserted village which always has a large area of arable land, a water source and a cemetery.

(H. İNALCIK)

MAZRŪʿĪ (Ar. pl. Mazāriʿ, Swa. Wamazrui), an Arab tribe found in the Gulf States and in East Africa, where for two centuries they have intermarried with the local population. In the Gulf States they are found in Abu Dhabi, where they are regarded as a section of the Banī Yās. Outside Abu Dhabi, it is uncertain whether they are regarded as a section of the Banī Yās. Some are found in Dubai, in Sharjah, and in various districts and villages of ʿUmān, their centre being the walled town of al-Alāya, where the

shaykh recognised as head of the family resides. In East Africa, in Kenya and on the island of Pemba (in the present Republic of Tanzania), fourteen lineages are recorded, descended from three lineages which migrated from ʿUmān between *ca.* 1698 and *ca.* 1800. Of these, the most celebrated provided an almost uninterrupted succession of rulers of Mombasa from 1698 until 1837, when twenty-five of the principal males were banished to Bandar ʿAbbās by Sayyid Saʿīd of ʿUmān and Zanzibar, many of them dying unaccountably on the voyage and the remainder in prison. Other Mazrūʿī lineages and the main one also provided subordinate rulers at Takaungu and Gazi, and of Pemba Island, generally with the Swahili title *liwali*, corrupted from Ar. *al-wālī*. In addition, the family produced a remarkable number of men of high ability and personal distinction, ḳāḍīs and junior magistrates, lawyers, administrators, historians, genealogists, scholars, poets, merchants and landowners, military commanders, a steamship captain and a harbourmaster, as well as men of religion. The history of the family from 1698 to 1835 is recounted in Shaykh al-Amīn b. ʿAlī al-Mazrūʿī, *History of the Mazrūʿī dynasty of Mombasa*, a unique Arabic manuscript written in lead pencil on foolscap. The author was Chief Ḳāḍī of Kenya 1937-47, a distinguished Islamic scholar, jurist and journalist. Very much other material exists bearing upon the history of the family, in official archives in London, Paris and Zanzibar, in printed primary sources and also in secondary sources, of which the most useful summary is in C. S. Nicholls, *The Swahili coast: politics, diplomacy and trade on the East African littoral, 1798-1856*, London 1971, 390-400. Shaykh al-Amīn's work is notably impartial, and based upon documents in family possession and some European printed works. Nevertheless, it is restricted by his lack of access to much other material, by an understandable leniency in judging his forebears, and also by chronological errors that sometimes lead to confusion. Two of these arise from misreadings of epitaphs in the Mazrūʿī cemetery beside Fort Jesus, Mombasa, in which he appears to have perpetuated the errors of European writers who were using interpreters.

The following table shows the *Liwalis* of Mombasa in order of their succession, with their regnal years.

MAZRŪʿĪ LIWALIS

* date of death given on an epitaph

- Kahlān
  - ʿAbd Allāh
    - Muḥammad
      - ʿAbd Allāh
        - 1. Nāṣur *ca.* 1698-1727, m. Karīma bt. Shaykh b. Aḥmad al-Malindī
          - 7. Masʿūd 1754-79
            - Eight sons, incl. Aḥmad, Ḳāḍī of Mombasa **ca.* 1830-40
        - ʿUthmān
          - 4. Muḥammad 1734-46*
            - 8. ʿAbd Allāh* 1779-82
              - Two sons
            - 9. Aḥmad* 1782-1812
              - 10. ʿAbd Allāh* 1812-23

OTHERS

2. Muḥammad b. Saʿīd al-Maʿāmirī 1729-30

3. Ṣāliḥ b. Muḥammad al-Ḥaḍramī 1730-33

5. Sayf b. Khalaf 1746-7

According to Shaykh al-Amīn, the first of the family to come to East Africa, Nāṣur b. ʿAbd Allāh, was appointed *Liwali* of Mombasa at the same time that Mbārak b. Gharīb was appointed commander of the ʿUmānī forces at the siege of Fort Jesus, Mombasa [see MOMBASA], in 1696-8. The actual date of appointment is not known. His remit was as "overseer of all the ʿUmānī possessions in East Africa", an area defined by Shaykh al-Amīn as from Ras Ngomeni, north of Malindi, to the town of Pangani, on the River Ruvu, and including several subordinate rulers of towns and settlements. At the successful conclusion of the siege in December 1696, Nāṣur's appointment was by no means uncontested. The Swahili had, as they saw it, called the ʿUmānīs in as allies; and an important faction, lead by an individual with the strange name of Sese Rumbe, rebelled against the ʿUmānī determination to stay as conquerors. After some fighting, a composition was reached by which Nāṣur was recognised in office and married either a sister or a daughter of a certain Shaykh b. Aḥmad al-Malindī, a member of the former royal family of Malindi [*q.v.*], which the Portuguese had installed as sultans of Mombasa in 1592, when the Shīrāzī dynasty of Mombasa failed for want of heirs. (The word Shaykh is used as a given name quite commonly in East Africa.) This was a political move of profound local significance, with precedents at Kilwa and at Pate [*q.vv.*] at the foundation of both dynasties. Thereafter, apart from Portuguese raids, Nāṣur's

term of office appears to have been peaceable. He died on a visit to ʿUmān.

No concept of a hereditary succession of governors is apparent at this point. Nāṣur had recommended the succession of his nephew Muḥammad b. ʿUthmān, but two other *Liwalis* followed in rapid succession who were not members of the family. It is not known why Muḥammad b. Saʿīd al-Maʿāmīrī was relieved after only a year, but Ṣāliḥ b. Muḥammad al-Ḥaḍramī was so harsh in his dealings with the people that he was removed from office when civil war broke out. Muḥammad b. ʿUthmān was now proclaimed *Liwali*, and his succession welcomed in Mombasa. He had ruled for ten years when the Yaʿrubī dynasty was deposed in ʿUmān by Aḥmad b. Saʿīd al-Bū Saʿīdī. This was no clear-cut transition [see ʿUMĀN], for chaos ensued for several years, and ʿUthmān ceased to remit taxes to Maskaṭ. That he said "The Imām has usurped ʿUmān, and I have usurped Mombasa" is a most unlikely use of language that several writers have placed in his mouth. Nevertheless, it reflects local sentiment, in the same way that the Swahili *History of Pate* speaks of Aḥmad b. Saʿīd al-Bū Saʿīdī as a shopkeeper, with every assumption of an air of aristocratic disdain. Shopkeeper or not, Aḥmad knew how to consolidate power, and he had Muḥammad b. ʿUthmān assassinated, by assassins sent from ʿUmān, but with the support of the faction that had earlier opposed Nāṣur. One of the assassins, Sayf b. Khalaf, was now appointed *Liwali*. Shaykh al-Amīn's account at this point is by no means clear, and by mischance there is no reliable account in any European source. Muḥammad b. ʿUthmān's brother ʿAlī was imprisoned by Sayf b. Khalaf, and several accounts exist of his exciting escape from the fort with the connivance of Balūčī soldiers of Aḥmad b. Saʿīd's that, nevertheless, were loyal to the Mazrūʿī. Then, at the critical moment, a European arrived with an armed vessel, which by agreement with ʿAlī, bombarded the fort. Sayf b. Khalaf was taken prisoner and killed, and ʿAlī acclaimed as *Liwali* by those who had supported his brother and uncle. An attempt by Aḥmad b. Saʿīd to install one ʿAbd Allāh b. Djaʿīd al-Bū Saʿīdī as *Liwali* was frustrated, and ʿAlī now ruled with confidence.

It is a mark of that confidence that was now felt in Mombasa that in 1754 ʿAlī assembled a fleet and an army to take Zanzibar from the Bū Saʿīdī. It is claimed that he went with 80 ships, but we do not know their size or complements. Certainly, they were enough for success to be immediate. At this juncture, however, ʿAlī's nephew Khalaf ran amok and stabbed him in the back. Various reasons have been suggested, that he was mad, that he was possessed by magical powers, or that he had a genuine ambition to seize power from his uncle. Occurrences such as this are paralleled in plenty in the annals of the Gulf States. A son of Nāṣur, Masʿūd, now took power, and led a demoralised army back to Mombasa. There is some argument whether or not a second attack on Zanzibar was to take place, but nothing happened.

By all accounts, Masʿūd was an astute politician, adroit in seeking conciliation. It is in his reign that Mombasa's involvement in the affairs of the sultanate of Pate begins, with a garrison sent to Pate to assist the sultan in keeping out the Bū Saʿīdī. In 1776 the Kilifi faction that had opposed the preceding Mazrūʿī *Liwalis* encouraged certain persons in Pate to attack Mombasa. It was not countenanced by the Sultan of Pate, and amounted to no more than a raid that was easily scotched. A rebellion now took place in Pate against Sultan Bwana Mkuu b. Shehe, and in the mêlée of his assassination the Khalaf who had murdered ʿAlī b. ʿUthmān was himself murdered while attempting to defend the sultan. Then in 1779 Masʿūd died. Shaykh al-Amīn praises him for his cunning—should we not say diplomacy? His days, he says, were days of prosperity, ease and peace, in which he was much engaged in trade. This, perhaps, was the halcyon period of Mazrūʿī rule.

On his death, eleven sons of previous *Liwalis* contested the succession "violently", but within the day they settled upon ʿAbd Allāh b. Muḥammad. Shaykh al-Amīn is silent about his short reign of two years only: "like his predecessor, he was of good character, and far from making war". His next brother, Aḥmad, succeeded him and now ruled for twenty years. Shortly after his accession he had to deal with a rebellion in Tanga. At the end of his reign, war arose between Mombasa and Pate on the one hand, and Lamu on the other [see PATE], with the result that the Mombasa forces were severely defeated at Shela. Very shortly after, Aḥmad died: his epitaph in the Mazrūʿī cemetery describes him as *malik*, the only *liwali* so to describe himself or be so described on an epitaph. It is a reflection, perhaps, of the weakness in East Africa of the earlier part of the reign of Sayyid Saʿīd that a *liwali* should be able to use so uncompromising a title of royalty with impunity.

Aḥmad's son ʿAbd Allāh, the former commander of the Lamu garrison, now succeeded him, without any opposition, as the man with the most experience and competence. His first action was to reorganise the army and the administration, appointing several new subordinate *liwalis*. One of these, Saʿīd b. ʿAbd Allāh al-Buhrī, was murdered by the Digo tribe on his way to take up his post as *Liwali* at Mtang'ata. (His great-grandson, ʿAlī b. Ḥumayd b. ʿAbd Allāh, of Tanga, was said by the late J. Schacht to be the most learned authority on Islamic law that he had ever encountered.) The murderer was none other than the chief and spiritual head of the Digo, but he was forgiven on payment of the blood price. ʿAbd Allāh now turned his attention to Lamu, and to Sayyid Saʿīd, to whom he sent, as a gesture to show his independence, a coat of mail, a horn for measuring powder, a small quantity of powder and some musket balls, intimating that Saʿīd could come and fight. Here indeed was provocation, and on the monsoon of 1238/1822 Saʿīd's uncle Ḥamad b. Aḥmad al-Bū Saʿīdī came with 4,000 men and thirty ships. At Lamu, he defeated ʿAbd Allāh's son Mbārak, and got possession of Pate as well. He then proceeded to Pemba, which he took after several days' battle. The loss broke ʿAbd Allāh's heart, and he died.

His uncle Sulaymān b. ʿAlī was now elected as a compromise candidate. Shaykh al-Amīn describes him as "an intelligent man, decisive and a lover of peace"; a British official document describes him as "aged and feeble", while Captain W. F. W. Owen, who met him personally, described him as "an old dotard who had outlived every passion except avarice". Fearing to lose Mombasa to Sayyid Saʿīd, a delegation was sent to Bombay to ask for the protection of the British Government. Before a reply could arrive, a letter came to request that the British be permitted to survey Mombasa Island and to purchase cattle. No one could read it. The Mazrūʿī and the people took it as an affirmative answer, and hoisted the Union Flag. On 3 December 1823, H. M. S. *Barracouta*, under the command of Lieutenant Boteler, arrived at Mombasa, as part of Captain Vidal's command engaged in surveying the Indian Ocean. Boteler, joined shortly by Vidal, knew of no reason to

acquire for Britain an unimportant city on the African coast that had no commercial or strategic advantages. They fended the Mazrūʿī off as best they could. But on 7 February, Captain W. F. W. Owen arrived on H. M. S. *Leven*, at the very moment that a fleet sent by Sayyid Saʿīd was bombarding the Mazrūʿī into submission. Owen was a passionate crusader against the slave trade, and believing that Mombasa could be used as a centre from which to destroy it, he acceded to the request for a Protectorate. A treaty was drawn up, of which Shaykh al-Amīn's version differs somewhat, but only in detail, from British sources. It was that:

(1) Great Britain would cause to return to the *Liwali* all the territories he had ruled formerly;
(2) The Chief of the Mazrūʿī should administer the sultanate which would be hereditary in his descendants;
(3) A Commissioner of the Protecting Power would reside with the *Liwali*;
(4) Customs duties would be divided between the contracting powers;
(5) British subjects would have permission to trade in the interior;
(6) An end would be put to the slave trade in Mombasa.

Shaykh al-Amīn claims that ʿAbd Allah b. Sulaym, the commander of Sayyid Saʿīd's forces, was delighted with the treaty, a view wholly contrary to that evidenced in British official documents. Saʿīd, indeed, awaited the reaction of Bombay, which, with Whitehall, took the view that neither Mombasa nor its use, as yet unexplored, to end the slave trade could counterbalance the advantages of good relations with Sayyid Saʿīd in the Gulf. Accordingly, in October 1826, the British were instructed to withdraw. Before this had been done, *Liwali* Sulaymān had been deposed by the sons of *Liwali* Aḥmad b. Muḥammad, chosing instead one of their number, Sālim. Shaykh al-Amīn quotes in full a laudatory *ḳaṣīda* written by Shaykh Muḥyī al-Dīn b. al-Shaykh al-Ḳaḥṭānī al-Barāwī, later Shāfiʿī *ḳāḍī* of Zanzibar, whose knowledge and learning in Arabic letters was later to be praised by Sir Richard Burton.

Saʿīd himself lost no time. A fleet was assembled immediately in Masḳaṭ, with a substantial army, and he advanced on Mombasa. Nevertheless, he preferred diplomacy, and a judicious bribe led to a treaty of conciliation. It was agreed that:

(1) Fort Jesus was to be surrendered to Sayyid Saʿīd; he would install a garrison limited to fifty, and of a tribe agreeable to the Mazrūʿī;
(2) the *Liwali* would live in the fort with his family as heretofore;
(3) sovereignty should belong to Sayyid Saʿīd, but Sālim would be *Liwali* for life, and his descendants after his death;
(4) customs duties would be divided equally between the contracting powers, and the *Liwali* would have the right to appoint customs officials.

The fort was now garrisoned with Arabs and Balūčīs, and Nāṣur b. Sulaymān al-Ismāʿīlī, formerly *Liwali* of Pemba, put in command. His harshness and insulting behaviour alienated the Mazrūʿī, and led to friction. Sālim determined to refer the matter to ʿUmān, whereon Nāṣur demanded the surrender of the town to him, under pain of war. Sālim then besieged him in the fort, and starved him out, an occasion for yet another lengthy *ḳaṣīda* from the pen of Shaykh Muḥyī al-Dīn. Sālim returned to the fort. Nevertheless Saʿīd was not satisfied with the Mazrūʿī account of the affair, and came in force on the monsoon of 1245/1829. A six-day battle ensued, in which Saʿīd's forces were soundly defeated. Sālim then fortified Mombasa with a wall, and by 1248/1832 felt strong enough to attempt to regain Pemba. His force was insufficient, and returned defeated. Next year, civil war broke out between Siyu and Pate following a succession dispute in Pate, in the course of which Salim angered Saʿīd by allying with the side opposed to him. On his way to Zanzibar, Saʿīd bombarded Mombasa, but without doing any more than set some houses on fire. For the rest of his reign, Sālim was left in peace. Sālim is the only *Liwali* known to have minted coins, which, Guillain reports, were struck from a bronze cannon on account of a shortage of small currency during his struggle with Sayyid Saʿīd. They bear no date, and only the Arabic words for *O.* "struck" / *R.* "in Mombasa". They were known in Swahili as *buruzuku*, which apparently derives from Portuguese *bazaruco*, small change, a word already currently used in Goa in a different form when the Portuguese occupied it in the 16th century. An almost identical issue was made in Lamu, Lamu being substituted for Mombasa, but so far nothing has been discovered about either of these issues.

In 1835 Sālim was succeeded on his death by his son Rāshid, but he had gained the fort with the support of the townsfolk while the family were still quarrelling about the succession. Returning to Zanzibar in 1837 from ʿUmān, Saʿīd first won over the opponents within the Mazrūʿī family by bribery, and then, changing sides, supported Rāshid on condition that the fort should be surrendered to Zanzibar. Rāshid was left with no choice. Saʿīd then arrested twenty-five of the family by inviting them to Zanzibar, but instead the ship sailed to Bandar ʿAbbās, at this time an ʿUmānī possession; and there those who had not died unaccountably on the voyage died in prison. It was the end of the independence of Mombasa, and the completion of Sayyid Saʿīd's assertion of his suzerainty over the East African coast.

Saʿīd did not, however, destroy the whole family. Mbārak, who had led the siege of the fort, is not to be confused with a younger son of Rāshid b. Sālim, also Mbārak. From Gazi, where he resided, in 1850 he attacked Takaungu, and expelled Rāshid b. Khāmis al-Mazrūʿī, a member of another branch of the family who had just been appointed *Liwali* of Takaungu, a position held by many other members of his lineage. Saʿīd sent troops to aid his nominee, and Mbārak returned to Gazi. Later he was forgiven, and in 1860 appointed *Liwali* of Gazi.

Fort Jesus, where so many of the events described here took place, is now a Museum. From 1895 to 1958 the British Colonial administration used it as a prison, choking the interior with cells and other buildings. These had superseded its use between 1837 and 1895 as the barracks of the ʿUmānī garrison, when it was filled with "mean huts" seen by Guillain, Owen and others. All this was cleared and restored by J. S. Kirkman, F. S. A., with a subvention from the Calouste Gulbenkian Foundation, between 1958 and 1970. The Portuguese Captain's House, which had been occupied later by the Mazrūʿī *Liwalis*, was now rid of later excrescences. Of their period there survived what is known as the Audience Hall of the Mazrūʿī, in fact a *madjlis* (or *selāmlik*) normal in Arab houses. It is decorated with inscriptions, Ḳurʾān verses and poems, and painted decorations surrounding them on the wooden beams. The Pilgrimage to Mecca of the fifth *Liwali*, Aḥmad b. Muḥammad, in 1208/1793, is commemorated by an inscription that states that none of the *Liwalis* before him had made

the Pilgrimage. The ornamental decorated roof is mentioned by Owen, together with the stone benches that still remain, and it was here that the negotiations for the British Protectorate Treaty of 1824 took place. Sadly, when the fort was in use as a prison, the madjlis was used as a gaol for women, and the nearby gun platform for lunatics.

Biographical details are lacking for members of the family other than Shaykh al-Amīn b. ʿAlī al-Mazrūʿī, author of the *History* already cited. Born in 1891, he was brought up in the house of Shaykh Sulaymān b. ʿAlī b. Khāmis al-Mazrūʿī, Chief *Ḳāḍī* of Kenya. He studied under him and with *ʿulamāʾ* in Zanzibar, and then himself acquired a reputation as a teacher of Islamic law. Among others, he taught *ʿulamāʾ* from Lamu, Tanga and Zanzibar, among them the famous Shaykh ʿAlī b. Ḥumayd al-Buhrī, the former *ḳāḍī* of Tanga already mentioned. Shaykh al-Amīn was active in starting libraries and Ḳurʾānic schools, and writing religious textbooks, including textbooks for the instruction of children. He was the first to write religious textbooks in Swahili. In 1930 he instituted a Swahili newspaper, dealing with political, social and religious questions; and in 1932 an Arabic and Swahili weekly *al-Iṣlāḥ* ("Reform"). Although he never visited Egypt, he was immersed in the writings of Djamāl al-Dīn al-Afghānī, Shaykh Muḥammad ʿAbduh and Rashīd Riḍā, and gave instruction in the Mazrūʿī Mosque in Arabic and other subjects. More conservative persons in Mombasa were highly critical of his attitude, especially towards women, finding his ideas "revolutionary". He was appointed *ḳāḍī* of Mombasa in 1932, and Chief *Ḳāḍī* of Kenya in 1937, dying in office in 1947.

(G. S. P. Freeman-Grenville)

MAZYAD, Banū, or Mazyadids, an Arab dynasty of central ʿIrāḳ, which stemmed originally from the clan of Nāshira of the Banū Asad [*q.v.*] established in the area between al-Kūfa and Hīt, and which flourished in the 4th-6th/10th-12th centuries.

The origins of the Mazyadids, as established by G. Makdisi (see *Bibl.*) *pace* the older view (expressed e.g. in *EI*[1] mazyadīds) that the family did not appear in history till the early years of the 5th/11th century, go back to the period soon after the establishment of Būyid domination in ʿIrāḳ. Ibn al-Djawzī relates that the Būyid *amīr* Muʿizz al-Dawla's vizier Abū Muḥammad al-Ḥasan al-Muhallabī (in office 345-52/956-63) entrusted to Mazyad (read rather, Ibn Mazyad or ʿAlī b. Mazyad) the protectorate (*ḥimāya* [*q.v.*]) over Sūrā and its vicinity. Sanāʾ al-Dawla Abu 'l-Ḥasan ʿAlī's amīrate must have been a lengthy one. The same source mentions that he led a punitive expedition on the Būyids' behalf against the Banū Khafādja [*q.v.*]; that in 393/1003 his jurisdiction over unspecified territories was confirmed by the Buyid governor in ʿIrāḳ, the ʿAmīd al-Djuyūsh al-Ḥasan b. Ustādh Hurmuz; but also that he established a pattern of subsequent Mazyadid attitudes towards their suzerains of alternate submissiveness and defiance according to the degree of control exercised by the squabbling Būyid princes. Indeed, the continuance of the Mazyadids' authority in central ʿIrāḳ was always to depend on a readiness to shift alliances with various contending powers in ʿIrāḳ, aiming at the preservation of a balance of power there between the ʿAbbāsid caliphs and the latter's would-be protectors, whether Būyid or Saldjūḳ, and thereby ensuring that one element did not achieve total political domination, an attitude complicated at times by the fact that the Mazyadids, like so many of the Arab tribes of the Syrian desert fringes, were Shīʿīs, with their rule from al-Ḥilla extending over what became the heartland of ʿIrāḳī Shīʿism and what already contained the two great shrines of al-Nadjaf and Karbalāʾ [*q.vv.*].

The dynasty comes more clearly into the light of history with the accession, apparently, at the age of 14 years and with the prospect before him of a long reign like his father's, of Nūr al-Dawla Abu 'l-Aʿazz Dubays (I) b. ʿAlī in 408/1017-8. Shortly before then, in 397/1006-7, ʿAlī had acquired by grant from the Būyid *amīr* Bahāʾ al-Dawla [*q.v.* in Suppl.], after its previous tenure by the ʿUḳaylids [*q.v.*] of al-Mawṣil, the town of al-Djāmiʿayn on the Euphrates. During ʿAlī's amirate, mention of al-Djāmiʿayn gradually drops out of the sources by the mid-5th/11th century, and what had apparently been only a temporary encampment (*ḥilla*), either within or adjacent to al-Djāmiʿayn, became more permanent and evolved into an enduring town, increasing in prosperity as the political influence of the Mazyadids grew, and being fortified by a wall and embellished by the greatest ruler of the dynasty, Ṣadaḳa (I) b. Manṣūr (see G. Makdisi, *Notes on Ḥilla and the Mazyadids in medieval Islam*, which should be added to the *Bibl.* for al-ḥilla).

Dubays did not continue the policy of strife with the related tribe of the Banū Dubays on the borders of ʿIrāḳ and al-Ahwāz which had occupied his father's later years. But through his brother al-Muḳallad's designs on the headship of the Mazyadid family, Dubays became embroiled with the ʿUkaylid Ḳirwāsh b. al-Muḳallad, to whom at al-Mawṣil b. ʿAlī had fled after the failure of his last bid for power, and likewise was caught up in the rivalry of the Būyid contenders for power in ʿIrāḳ, Djalāl al-Dawla b. Bahāʾ al-Dawla and his nephew Abū Kālīdjār al-Marzubān b. Sulṭān al-Dawla [*q.vv.*] in the years after 416/1025. Dubays supported Abū Kālīdjār and al-Muḳallad Djalāl al-Dawla, and in 421/1030 Dubays's lands were overrun by his enemies, compelling him to submit and to pay a substantial tribute to Djalāl al-Dawla. He faced fur-

ther trouble from a third brother Thābit, who allied with the Turkish commander Arslān Basāsīrī [*q.v.*], and from the rival Khafādja Bedouins. During the fighting in central ʿIrāḳ which finally led to the establishment of the Saldjūḳ protectorate over Baghdād, Dubays now supported Basāsīrī in proclaiming the cause of the Shīʿī Fāṭimids at Baghdād, espousing what was in the end to prove the losing side, whilst his enemy the ʿUḳaylid Ḳuraysh b. Badrān at first supported Ṭoghrīl Beg. Nevertheless, after the pacification by Ṭoghrīl of ʿIrāḳ, Dubays managed to retain his position, dying in 474/1082 at the age of 80.

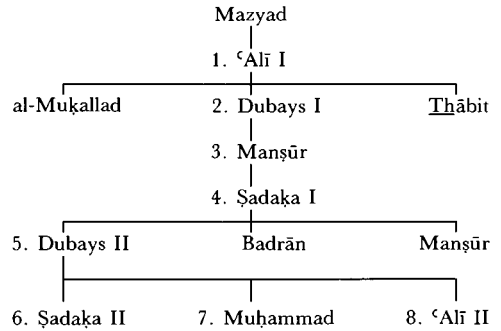
After the brief reign of his son Bahāʾ al-Dawla Abū Kāmil Manṣūr, the latter was succeeded in 479/1086-7 by Sayf al-Dawla Abu 'l-Ḥasan Ṣadaḳa (I) b. Manṣūr, who was recognised by the Saldjūḳ sultan Malik Shāh as lord of the central ʿIrāḳ lands to the west of the Tigris. In the subsequent struggle for power between Malik Shāh's two sons Berk-Yaruḳ and Muḥammad, Ṣadaḳa at first supported the former, but after a dispute with Berk-Yaruḳ's vizier, in 494/1100-1 switched his allegiance to Muḥammad, at first making the *khuṭba* in al-Ḥilla for Muḥammad but soon afterwards dropping the name of both Saldjūḳs from it and acknowledging only the ʿAbbāsid caliph al-Mustaẓhir. It was Ṣadaḳa who, as noted above, launched extensive building operations in his capital. The confused situated in ʿIrāḳ further allowed him to expand Mazyadid influence over a wide sector of the country, including Hīt, Wāsiṭ (in 497/1104), al-Baṣra (499/1106) and Takrīt (500/1106). Muḥammad, by now the sole Saldjūḳ sultan in the west, became alarmed at the rising power of his subject; he set out in 501/1108 with an army from Baghdād, defeated and killed Ṣadaḳa at al-Nuʿmāniyya and captured his son Dubays. Like others of his family, Sadaka had been commonly accorded the title of *Malik al-ʿArab* "Lord of the Arabs" (i.e. of the Bedouins along the ʿIrāḳ desert fringes), *Rex Arabum* in Latin Crusader sources, and contemporaries mourned his passing as a brave and noble figure, uniting the ideals of Bedouin chivalry and Islamic fervour, and as a generous patron of Arabic learning.

The same sort of praise is accorded to his son and successor Nūr al-Dawla Abu 'l-Aʿazz Dubays (II), whom al-Ḥarīrī [*q.v.*] refers to in his 39th *maḳāma*, that of ʿUmān, as an ideal figure for nobility and piety. He was only able to regain his seat in al-Ḥilla after Muḥammad's death in 511/1118, but soon enjoyed a new authority as a consequence of the rivalry between the two Saldjūḳ contenders for the sultanate, Muḥammad's sons Maḥmūd and Masʿūd, harassing both Maḥmūd and the ʿAbbāsid caliph al-Mustarshid, against whom the Shīʿī Dubays uttered threats of razing Baghdād to the ground. During these years, various reverses at the hands of these rulers nevertheless sent him in temporary flight to the Frankish Crusaders in northern Syria, where in 518/1124 he allied with the King of Jerusalem Baldwin II in a fruitless attack on Aleppo; to his father-in-law the Artuḳid Il-Ghāzī in Mārdīn; and, in alliance with the Saldjūḳ prince Ṭoghrīl b. Muḥammad, to the Saldjūḳ sultan in the east, Sandjar. The reviving power of the ʿAbbāsid caliphate blocked his plans for expansion in ʿIrāḳ, and he had finally to take refuge at Marāgha [*q.v.*] in Ādharbāydjān with the Saldjūḳ Masʿūd, who in 529/1135 treacherously killed both al-Mustarshid and Dubays.

Dubays's son Sayf al-Dawla Ṣadaḳa (II) supported Masʿūd's cause against his nephew Dāwūd b. Maḥmūd, but lost his life in the course of this warfare (532/1137-8). His brother Muḥammad was then recognised as lord of al-Ḥilla, but soon afterwards lost the town to his brother ʿAlī (II), and when the latter died in 545/1150-1, control of the town oscillated between the ʿAbbāsid caliph al-Muḳtafī and Turkish commanders of the Saldjūḳ sultan Muḥammad b. Arslān Shāh. The caliphal troops withdrew from al-Ḥilla in 551/1156-7, but in 558/1163 the caliph al-Mustandjid, whose power in ʿIrāḳ was increasing with the decline of Saldjūḳ authority, sent an army against al-Ḥilla. His troops and their allies of the Banu 'l-Muntafiḳ wrought slaughter amongst the remaining Mazyadids and their Asadī supporters, and expelled those left alive. The hold of the Asad on the town was thus permanently broken.

That the Mazyadids, coming as they did from an untutored Bedouin background, were able to survive for two centuries as a significant force in the intricate politics and changing patterns of alliances in ʿIrāḳ is a tribute to the skill and sagacity of their leaders; and it is probable that their leadership as fervent Shīʿīs furthered the expansion of Shīʿism in central and southern ʿIrāḳ.

Genealogical table of the Mazyadids

Mazyad
1. ʿAlī I
al-Muḳallad — 2. Dubays I — Thābit
3. Manṣūr
4. Ṣadaḳa I
5. Dubays II — Badrān — Manṣūr
6. Ṣadaḳa II — 7. Muḥammad — 8. ʿAlī II


Bibliography: The main primary sources are those for the history of ʿIrāḳ in the Būyid and Saldjūḳ periods, including Rūdhrāwarī, Ibn al-Djawzī, Bundārī and Ibn al-Athīr (follows Ibn al-Djawzī). Ibn Khallikān has biographies of Ṣadaḳa I (ed. ʿAbbās, ii, 490-1, no. 302, tr. de Slane, i, 634-5) and of Dubays II (ii, 263-5, no. 226, tr. i, 504-7). MĀZYĀR [see ḲĀRINIDS].

MBWENI, a settlement on the East African coast. It lies on the Tanzanian coast north of Dar es Salaam, and has a ruined Friday mosque of 14th or

15th century date divided into two aisles by three central pillars. There is an extensive cemetery, with tombs, some highly decorated with elaborate carvings, of the past five centuries. It includes a pillar tomb [see MANĀRA. 3. In East Africa] decorated with green celadon plates, of date *ante* 1350. A small tomb has an inscription commemorating Masʿūd b. Sulṭān Shafīʿ ʿAlī b. Sulṭān Muḥammad al-Barāwī, who died in 1306/1888. It is the object of a cult, and numerous pottery vessels ranging over most of the past century are to be seen beside the tomb, having held offerings of food and incense. The deceased was a member of a family celebrated for its energy in disseminating the teachings of the Uwaysī branch of the Ḳādiriyya.

Bibliography: G. S. P. Freeman-Grenville, *Medieval history of the coast of Tanganyika*, London 1962, 168; B. G. Martin, *Muslim brotherhoods in nineteenth-century Africa*, Cambridge 1976, 152, 160 ff. (G. S. P. FREEMAN-GRENVILLE)

MEʾĀLĪ, minor Ottoman poet of the first half of the 10th/16th century, known under this *makhlaṣ* and also as Yarḥiṣār-oghlī Köse Meʾālī (whilst his given name was Meḥmed). He is one of a considerable number of modestly gifted, as yet imperfectly known poets who share the popular Turkish taste in choice and handling of subject matter. (It is true, perhaps, that Meʾālī led a rather more libertine life than most of his peers.) He is very fond of puns and lavish in his use of idiomatic expressions. At times he has a candid tongue. His sense of humour, though never subtle (and sometimes more than crude), can show an endearing playfulness.

Meʾālī's father was Muṣṭafā b. Ewḥad al-Dīn Yarḥiṣārī, a *müderris* and later *ḳāḍī* of Istanbul; his mother Fāṭima bint Meḥmed Beg was a Fenārī. The date and place of his birth are unknown. He became a *mülāzim* [*q.v.*] of Tādjī-zāde Djaʿfer Čelebi and of Zeyrek-zāde Rükn al-Dīn Efendi and subsequently *ḳāḍī* of Mīkhālīdj-Kebsūd-Firt, of Filibe, and lastly of Gelibolu, where he died in 942/1535-6.

Meʾālī's poems are to be found in the one known (incomplete) copy of his *Dīwān* and in various *medjmūʿas*. The bulk of his *Dīwān* consists of 270 *ghazels*; of special interest is a *destān* in *hedje* metre and a charming *murabbaʿ* on the death of his cat.

Bibliography: Cf. the *tedhkires* of Sehī, Laṭīfī, ʿĀshiḳ Čelebi, Ḳinalī-zāde, Ḥasan Čelebi, ʿĀlī, and Riyāḍī: Hammer-Purgstall, *GOD*. ii, 214-6: Tarlan, *Şiir mecmualarında XVI ve XVII. asır divan şiri*, Istanbul 1948, 33-44; Kocatürk, *Türk edebiyatı tarihi*, Ankara 1964, 323-4; Ambros, *Candid penstrokes: the lyrics of Meʾālī, an Ottoman poet of the 16th century*, Berlin 1982 (edition of the *Dīwān* with full specification of the relevant *tedhkires*).

MĒD, a people who lived in Sind at the time of the early Arab invasions. Arab historians mention the Mēd in their brief descriptions of the battles which the Arabs waged in Sind but fail to furnish us with any substantial information concerning them. Even the form of the name is not certain: the manuscripts read either *m-y-d* or *m-n-d* (cf. al-Balādhurī, 435 n. *f*; al-Iṣṭakhrī, 176 n. *c*), and the article on this people appeared in *EI*[1] under MAND. However, some modern ethnographers report that the name is Mēd (H. Risley, *The people of India*, London 1915, 145, 328); this is valuable evidence in support of this version.

Several encounters with the Mēd are reported by al-Balādhurī. Rāshid b. ʿAmr al-Djudaydī, appointed by Ziyād b. Abīhi to rule the area of Makrān [*q.v.*] on the Indian frontier, was killed by them during an incursion into Sind (al-Balādhurī, 433). An attack perpetrated by the "Mēd of Daybul" [*q.v.*] on a ship bringing Muslim women from "the island of rubies" (*djazīrāt al-yāḳūt*; this has been frequently identified with Ceylon, but see S. Q. Fatimi, *The identification of Jazirat al-Yaqut*, in *Jnal. of the Asiatic Soc. of Pakistan*, ix [1964], 19-35, who suggested identifying it with Sumatra) is given as the reason for which al-Ḥadjdjādj decided to launch around 90-2/708-11 a major expedition to Sind (al-Balādhurī, 435-6; Gabrieli, in *East ad West*, xv [1964-5], 282-3; Friedmann, in M. Rosen-Ayalon, ed., *Studies in memory of Gaston Wiet*, Jerusalem 1977, 312 n. 19). Muḥammad b. al-Ḳāsim, who commanded this expedition, concluded an armistice with the people of Surast (?), who were "Mēd, pirates of the sea" (*yaḳṭaʿūna fī ʾl-baḥr*) (al-Balādhurī, 440); the name of this place recalls Surāshtra, i.e., Kāthiāwāṛ (B.C. Law, *Historical geography of ancient India*, Paris 1954, 297-9). In the reign of al-Muʿtaṣim, ʿImrān b. Mūsā attacked the Mēd, killed 3,000 of them and built a dam known as "the dam of the Mēd" (*sakr al-Mēd*), probably to disturb their irrigation (*ibid.*, 445). Then he resumed the campaign against the Mēd with the support of the Zuṭṭ [*q.v.*], whom he had subjugated; a canal (*nahr*) was dug from the sea and the lagoon (*baṭīḥa*) of the Mēd was inundated with salt water. Later on, a certain Muḥammad b. al-Faḍl b. Māhān launched a naval expedition against "the Mēd of Hind" and conquered a city of theirs (*ibid.*, 446).

Of the geographers, Ibn Khurradādhbih mentions al-Mēd both as a geographical region (56) and as a people who lived about four days' journey to the east of the Indus and were robbers (62). Al-Masʿūdī, who went to India in 304/916-17 (Brockelmann, I, 44) says that the city of al-Manṣūra [*q.v.*] is continually at war with the Mēd (*Murūdj*, i, 378; cf. also *Tanbīh*, 55). Al-Iṣṭakhrī (176 = Ibn Ḥawḳal, 323-4) says that the infidel peoples of Sind are the Budha and the Mēd. The Mēd lived on the banks of the Indus (*shuṭūṭ Mihrān* [see MIHRAN], from Multān [*q.v.*] to the sea, and occupied pasturages in the desert which stretched between the Indus and the city of Ḳāmuhul. According to al-Idrīsī (*Opus geographicum*, Naples-Rome 1970-8, 170; tr. Jaubert, i, 163), the Mēd dwelt on the borders of the desert of Sind. They were nomads (*raḥḥāla*; Jaubert, *loc. cit.*, seems to have read *radjdjāla* and translated "un peuplade très brave"; cf. S. Maqbul Ahmad, *India and the neighbouring territories as described by ... al-Idrīsī*, Aligarh 1954, 33) and pastured their flocks up to the border of Māmahal (Ḳāmuhul?). They were numerous and owned many horses and camels; their raids extended as far as al-Rūr (cf. Elliot and Dowson, *The history of India as told by its own historians*, London 1867, i, 363) and sometimes even to Makrān.

The town of Ḳāmuhul, which marks the south-eastern limit of the area inhabited by the Mēd, was identified by Elliot and Dowson (*op. cit.*, i, 363; S. Hodīvālā, *Studies in Indo-Muslim history*, Bombay 1939, 38) with Anhalwāra, which is modern Patan in northern Baroda (cf. *EI*[2], III, 407; *Imperial gazetteer of India*[2], Oxford 1908, xx); Cunningham (*Report 1863-1864*, 290) places "Māmhal" at ʿUmarkōt; this would place the Mēd much more firmly in Sind.

Of special interest among the Muslim sources is the anonymous *Mudjmal al-tawārīkh* (Storey, i, 67). A part of this work seems to be a résumé of the *Mahābhārata*. It begins with a chapter on the Mēd and the Zuṭṭ who

lived in Sind and are said to be descendants of Ḥām, the son of Noah. The two peoples were hostile to each other and fought a number of wars. Having become tired of fighting, they resolved to approach king Daḥūs͟han b. Dahrān (Duryodhana son of Dhṛtarāṣṭra) and asked him to appoint a ruler over them. Daḥūs͟han gave the country to his sister Dusal (Duḥśalā), who married the powerful king D̲j̲andrat (Jayadratha). The country was then divided between the Zuṭṭ and the Mēd (J. Reinaud, *Fragments arabes et persans inédits*, Paris 1845, repr. 1974, 2-3, 25-7). The story reflects an attempt to forge a link between the history of the Mēd and the Zuṭṭ and the Indian tradition. It must be noted, however, that the Sanskrit original of the *Mahābhārata* makes no mention of peoples bearing these names in the passage dealing with Duḥśalā's marriage to Jayadratha, king of Sindhu (*Mahābhārata*, i. 108. 18). Moreover, the Indian tradition does not seem to contain anything definite about the Mēd, with the possible exception of occasional remarks in the *dharmaśāstra* literature about a low caste or, according to some, untouchable people called Meda, of unspecified geographical location or provenance (*Manusmṛti* 10.36, with Medhātithis's remarks; cf. Rai Bahadur B.A. Gupte, *The Meds of Makran*, in *Indian Antiquary*, xl [1941], 147-9).

It seems that the Mēd are not mentioned in later Muslim sources. It is noteworthy that the *Čač-nāma* [*q.v.* in Suppl.], which was written in the 7th/13th century, does not mention the Mēd in the context in which they appear in al-Balād̲h̲urī. In its description of the act of piracy which is said to have caused Muḥammad b. al-Ḳāsim's invasion of Sind, the *Čač-nāma* (ed. Daudpota, New Delhi 1939, 89) mentions a people called *N-k-a-m-r-a* instead of the Mēd. Neither are they mentioned in the *Čač-nāma* version of Rās͟hid b. ʿAmr al-D̲j̲udaydī's death (*ibid.*, 81-2). Despite their apparent disappearance from later Muslim sources, the Mēd are reported in existence by some modern ethnographers (Risley, *loc. cit.*, Elliot and Dowson, *op. cit.*, i, 519-31; H.T. Lambrick, *Sind. A general introduction*, Ḥaydarābād (Sind) 1964, 209-10, esp. at n. 17).

Bibliography: Given in the article; see also S. Razia Jafri, *Description of India (Hind and Sind) in the works of al-Iṣṭak͟hrī, Ibn Ḥauqal and al-Maqdisī*, in *Bull. of the Inst. of Islamic Studies* (Aligarh), v (1961), 60-1; al-Bīrūnī, *al-D̲j̲amāhir fī ma-ʿrifat al-d̲j̲awāhir*, Ḥaydarābād (Deccan) 1355/1936-7, 47-8.

MEDAL [see nis͟hān, wisām].

MEDDĀḤ [see maddāḥ].

MEDEA [see al-madiyya].

MEDENIYYET (t.), "civilisation". As a term referring to a political system, *medeniyyet* seems to have been introduced into Ottoman Turkish towards the middle of the 19th century. Before it was coined on the basis of the old Arabic word *madīna*, the French term *civilisation* was used for a short while, and in its French pronunciation written in Arabic letters. In both senses, what was meant was the secular political system believed to be common in Europe. As a polity, *civilisation* or *medeniyyet* was contrasted with the traditional oriental dynastic despotism.

Muṣṭafā Res͟hīd Pas͟ha used the French word in his official writings in Ottoman Turkish in 1834. Ṣādiḳ Rifʿat Pas͟ha did likewise in 1837. Another writer, Muṣṭafā Sāmī, used the same French word written in Arabic letters and according to French pronunciation in his account of his observations in European capitals.

In spite of minor variations in their accounts of the civilisation, the main emphasis of such writers was on pointing out the superiority of the European polities which they named *civilisation* or *mediniyyet*. They were also in a great deal of agreement on identifying the distinguishing features of *medeniyyet*, e.g. enlightenment, rationalism, freedom of conscience, the dissemination of education and the prevalence of literacy, the accumulation of scientific knowledge and its rôle in the advancement of inventions, equality of subjects before the law and orderly application of it by government officials, and economic policies pursued to promote the interests of the people. Ṣādiḳ Rifʿat attempted to go even deeper and to discern that at the basis of these features lay a mode of thinking sharply different from the traditional views held in the East. He spoke of the natural rights of men as the sole basis of legitimacy of government in civilisation, adding that "there the governments are for the people, and not the people for governments".

In truth, similar ideas which may be taken as the sign of a degree of awareness of "the emergence of a new political phenomenon in Europe", as B. Lewis has pointed out, were not unknown to the Turkish reformers even before the outbreak of the French Revolution. Ironically, the very same revolution, with its Napoleonic aftermath, had been responsible, at least partly, for a violent reactionary uprising in 1807 which not only swept away all such new ideas but brought a period of anarchy and indecisiveness lasting until 1839, when a new era of the *Tanẓīmāt* [*q.v.*] reforms was opened. The reformers mentioned above were describing the model to be emulated and were pointing out decisively the desirability of the appropriation of the superior (*merg͟hūb*) methods of civilisation.

The shortcomings of the *Tanẓīmāt* efforts of appropriating the fundamentals of *Medeniyyet* were due to a great extent to the vagueness, devoid of historical and sociological dimensions, and the naïveté displayed in the mechanistic views of these men. A small group of intellectuals (the "New Ottomans" or Yeñi ʿOt͟hmānlar), who lived abroad in exile, saw shortcomings in the *medeniyyet* current in Europe. In their criticisms of the *Tanẓīmāt* reforms they made implicit, and sometimes explicit, distinctions between the "material" and the "moral" parts in all civilisations. They too lavished praises on the advancements of material civilisation achieved in Europe, but they were less enthusiastic about the second part.

Thus from the late 1860s onward the word *medeniyyet* ceased to imply a political régime and one peculiar only to Europe. Later years saw the rise of much wider connotations of the term and of controversies, particularly when it was challenged by another term, *ḥart͟h*, coined by Ziyā (Ḍiyāʾ) Gökalp to correspond to the much older Western concept of culture.

Though the term *medeniyyet* had lost its early political meaning, it still carried a political tinge in 1920s during the War of Independence. A poem written and intended as the national anthem contained a verse cursing *medeniyyet* as "the monster with one remaining tooth"—an obvious reference to European imperialism. When Muṣṭafā Kemāl (Atatürk) glorified what he called "contemporary civilisation", he appears to have taken side with those who identified *medeniyyet* only with enlightenment and progress, but not with a political régime.

(Niyazi Berkes)

MEDḤĪ, the pen name (*makhlaṣ*) used by a number of Ottoman poets whose poetry is known to date mainly through the samples found in *medjmūʿas* and *tedhkires*. Judging by these, they are all poets of secondary importance at best. Two should be singled out.

1. Maḥmūd Efendi of Gelibolu (Gallipoli), known as Ḳara Maḥmūd (or Ḳara Ḳāḍī-zāde according to Beyānī). A *mülāzim* of *Shaykh al-Islām* Abu 'l-Suʿūd Efendi [*q.v.*], he first became a *müderris*. After being dismissed from a position with a daily salary of forty *aḳčes*, he was appointed in 984/1576 to the Shāh Khūbān *medrese* in Istanbul (cf. Câhid Baltacı, *XV-XVI. asırlarda Osmanlı medreseleri*, Istanbul 1976, 435). In 987/1579 he became *müftī* of Kefe, in 992/1584 *ḳāḍī* of Marʿash, from 994/1585-6 until 995/1586 he was *ḳāḍī* of Kütahya, from 996/1588 until 998/1590 again *ḳāḍī* of Marʿash, from 1000/1592 until 1002/1594 and from 1003/1595 until 1004/1596 *ḳāḍī* of Gelibolu, and from 1005/1597 until 1006/1597 *ḳāḍī* of Tripoli in Syria. He died in 1006/1597-8 in Gelibolu, and is buried there in the vicinity of the Ghāzī Süleymān Pasha mosque. The *tārīkh* or chronogram *Fātiḥa Maḥmūd Efendi rūḥīna* inscribed on his tombstone (as described by Bursalī Meḥmed Ṭāhir), which is by Naʿtī or according to others by Niʿmetī, confirms this. A very short passage of his *Ḳalemiyye*, a treatise in Arabic, is quoted by ʿAṭāʾī. Two mss. of his *Dīwān* are known to exist (Millet Ktp., Emirî, *manzum eserler* 399, and Hüsrev Paşa Ktp., *Mihrişah Sultan* 370).

Bibliography: Cf. the *tedhkires* of ʿAhdī, Millet Ktp., Emirî, *tarih*, 774, fol. 177a; Ḳinalī-zāde Ḥasan Čelebi, ed. İ. Kutluk, ii, Ankara 1981, 885-6; Beyānī, Millet Ktp., *Emirî*, *tarih*, 757, fols. 94b-95a; Riyāḍī, Nuruosmaniye Ktp., 3724, fol. 133b; Ḳāf-zāde Fāʾiḍī, Millet Ktp., *Emirî*, *manzum*, 1325, fol. 99a; also ʿAṭāʾī, *Dheyl-i Shaḳāyiḳ*, Istanbul 1268, 415-6; M. Thüreyyā, *Sidjill-i ʿOthmānī*, iv, Istanbul 1315, 353; Bursalī Meḥmed Ṭāhir, *ʿOthmānlı müʾellifleri*, ii, Istanbul 1333, 384-5.

2. Nūḥ-zāde Seyyid Muṣṭafā Čelebi of Bursa stands out because his name has come down to us also as a *meddāḥ* [*q.v.*]. Actually, he started a career as a *müderris* after being a *mülāzim* of *Shaykh al-Islām* Abū Saʿīd Efendi. Upon his dismissal from a position with a daily salary of forty *aḳčes*, he aspired to a career as *ḳāḍī*. When, however, he was promised the *ḳaḍāʾ* of Čorlu but the realisation of this promise was delayed, he became a *meddāḥ*. He died on 18 Redjeb 1091/14 August 1680, and was buried in Bursa in the vicinity of the tomb of Emīr Sulṭān.

Bibliography: *Ṣafāyī tedhkiresi*, Österr. Nationalbibl., H.O. 139, fol. 250a, Süleymaniye Ktp., *Es'ad Ef.* 2549, fol. 319a (255a); Belīgh, *Güldeste-i riyāḍ-i ʿirfān*, Bursa 1302, 531; Sheykhī, *Waḳāyiʿ al-fuḍalāʾ*. Österr. Nationalbibl., H.O. 126, fol. 355a-b, Süleymaniye Ktp., *Hamidiye* 941, fol. 361a: *Süleymān Fāʾiḳ Efendi medjmūʿasī*, İstanbul Üniv. Ktp. Ty., 3472, fol. 61b.

(E.G. Ambros)

3. Medḥī is the *makhlaṣ* also of a certain Dervīsh Ḥasan, a prolific but obscure prose-writer, who described himself as the panegyrist (*meddāḥ*) of Murād II (982-1003/1574-95). To that sultan he dedicated a Turkish translation, entitled *Ḳiṣṣa-yi newbāwe*, of Abū Sharaf Nāṣiḥ's Persian version of al-ʿUtbī's *Taʾrīkh al-Yamīnī* (Rieu, *Cat. of Tkish. mss.*, 42-3; cf. Browne, ii, 471), and also a (completely fictional) *Ḥikāyet-i Ebū ʿAlī-yi Sīnā*, i.e. Ibn Sīnā [*q.v.*] (Rieu, 231). He served also Murād's successors, up to ʿOthmān II (1027-31/1618-22), at whose command he made a prose translation of the *Shāh-nāma* of Firdawsī [*q.v.*] (see Blochet, i, 314, with the names of other works he claimed to have written or translated; W.D. Smirnow, *Manuscrits turcs...*, St. Petersburg 1897, 82-7).

(Ed.)

MEDĪḤĪ, the pen name (*makhlaṣ*) of two Ottoman poets whose poetry is known to date only as far as the samples found in *medjmūʿas* and *tedhkires* allow. On the strength of these, neither appears to be of more than minor importance.

1. Muṣṭafā (according to Ḳinalī-zāde Ḥasan Čelebi and Beyānī, whereas ʿĀshiḳ Čelebi gives his name as Muṣlī—or Muṣlu, the Turkish abbreviation of Muṣliḥ al-Dīn) Čelebi of Sīrōz (Serres), who lived during the reigns of Süleymān I (926-74/1520-66), Selīm II (974-82/1566-74) and up to the middle of that of Murād III (982-1003/1574-95). A *dānishmend* of Ḳāḍī-zāde Aḥmed Efendi (who became *ḳāḍī-ʿasker* under Selīm II), then a *mülāzim* of ʿAṭāʾ Allāh Efendi, he served as *ḳāḍī* of a number of *ḳaṣabas*, the last being Sīrōz. He came to be known in the circle of his peers for his numerous servants and attendants and his love of display.

2. Meḥmed of Istanbul was a *mülāzim*, then a *müderris* until he attained a position with a daily salary of forty *aḳčes*. Upon dismissal from this position, he agreed to a career as *ḳāḍī* and went to Egypt (according to the ms. Österr. Nationalbibl., H.O. 139, of Ṣafāyī's *tedhkire*, he was appointed as *ḳāḍī* to the *ḳaḍāʾ* of Burullus), where he became renowned for his ability for story-telling and his indulgence in the pleasures of life. He died in 1083/1672-3.

MEDICINE [see ṬIBB].

MEDINA, from Arabic *madīna* "town", is used in French (*médina*) to designate, above all in the Maghrib, the ancient part of the great Islamic cities, beyond which have been constructed the modern quarters of the city. Moreover, Medina has survived in Spain in a certain number of toponyms. The main ones of these are: Medina de las Torres, in the province of Badajoz; Medina del Campo and Medina de Rioseco, in that of Valladolid; Medina de Pomar, in that of Burgos; and also, Medinaceli [see MADĪNAT SALĪM] and Medina-Sidonia [see SHADHŪNA].

(E. Lévi-Provençal)

MEDINA, town in Saudi Arabia [see AL-MADĪNA].

MEDINACELI [see MADĪNAT SĀLIM].

MĒDINĪ RĀʾĪ, a leader, as Rāʾī Čand Pūrbīya, of the Pūrbīya (= "eastern") Rād̲j̲pūts, with tribal possessions in the Čāndērī [*q.v.*] district and hence feudatories of the sultans of Mālwā [*q.v.*], who became prominent in Mālwā-Gud̲j̲arāt-Mēwār-Dihlī politics early in the 10th/16th century.

The Mālwā succession had been fiercely contested after the death of Nāṣir al-Dīn S̲h̲āh K̲h̲ald̲j̲ī in 916/1510, who had designated his third son, Aʿẓam Humāyūn, as his heir. He duly succeeded, as Maḥmūd S̲h̲āh K̲h̲ald̲j̲ī II [*q.v.*], with his elder brothers S̲h̲ihāb al-Dīn and Ṣāḥib K̲h̲ān as active contenders for the throne in a situation exacerbated by rival factions of Muslim nobles at court; one faction had already compassed the assassination of the strong and competent (Hindū) *wazīr* and the banishment of a second Hindū minister. The perpetrators remained unpunished by Maḥmūd, and their power increased until the leader of the second faction, Muḥāfiẓ K̲h̲ān, turned the sultan against them. They escaped to K̲h̲āndēs̲h̲ [*q.v.*] to join S̲h̲ihāb al-Dīn, but the latter died suddenly before any action could be taken. In the meantime, Muḥāfiẓ K̲h̲ān, now appointed *wazīr*, had become too powerful, and confined Maḥmūd to his palace, proclaiming Ṣāḥib K̲h̲an sultan as Muḥammad S̲h̲āh in the capital Māndū [*q.v.*]. Maḥmūd managed to escape, chased by his brother, to Čāndērī, where he received no support from the governor Bahd̲j̲at K̲h̲an, on the pretence that he obeyed only the ruler of Māndū. At this point, Rāʾī Čand Pūrbīya brought his Rād̲j̲pūt troops to Maḥmūd's assistance, and, becoming Maḥmūd's adviser, was given the title of Mēdinī Rāʾī. He pursued Ṣāḥib K̲h̲ān and expelled him from Māndū (917/1512); Ṣāḥib K̲h̲ān fled to Gud̲j̲arāt, accompanied by Muḥāfiẓ K̲h̲ān.

Mēdinī Rāʾī, appointed *wazīr* at Māndū, strengthened the administration and appointed his own Rād̲j̲pūts to some important posts; but there was some opposition from Muslim nobles, increased when Ṣāḥib K̲h̲ān returned from Gud̲j̲arāt without, however, having secured any assistance from its sultan. In 918/1512 the governors of both Satwās (Nēmāwar) and Čāndērī rebelled; Mēdinī Rāʾī quelled the disturbances at Satwās and then, with Maḥmūd, marched on Čāndērī, where Bahd̲j̲at K̲h̲ān (*not* obeying the ruler of Māndū!) had not only proclaimed Ṣāḥib K̲h̲ān as sultan but also sought help from the Dihlī sultan Sikandar Lōdī, promising to read the *k̲h̲uṭba* in his name. Sikandar did temporarily annex Čāndērī, but finally Mēdinī Rāʾī and his Rād̲j̲pūts recaptured the place in 920/1514. After this, Maḥmūd relied increasingly on Mēdinī, who gradually built up his own position until all administrative power was in his hands, and the sultan virtually a puppet. Maḥmūd tried unsuccessfully to have Mēdinī assassinated, provoking a Pūrbīya Rād̲j̲pūt revolt; eventually, Maḥmūd left Māndū secretly in 923/1517 to obtain the assistance of Muẓaffar S̲h̲āh II of Gud̲j̲arāt. The latter led an attack on, and later a siege of, Māndū, whereupon Mēdinī left the defence of the fort to his troops and sought help from Rānā Sanga of Mēwār at Čitawṙ. Māndū fell to Muẓaffar (924/1518), who expelled the Rād̲j̲pūt troops, reinstated Maḥmūd on the Mālwā throne, and left a Gud̲j̲arātī body of troops for his protection. Maḥmūd then marched on Mēdinī Rāʾī, then holding Gagrāʾūn, but Rānā Sanga came to Mēdinī's assistance, defeated Maḥmūd's army, and took him prisoner, wounded, to Čitawṙ; Rānā Sanga released him and restored him to his throne after his wounds were healed (926/1520). Maḥmūd, resenting the Gud̲j̲arātī bodyguard and the continuing Gud̲j̲arātī influence, requested Muẓaffar to recall it; but after this was done, Malwā lost much of its territories to Rānā Sanga or those under his protection, including Mēdinī Rāʾī, who was established in the now independent Čāndērī. He fought with Rānā Sanga against Bābur in the battle of Khānuʾā in 933/1527, and shortly afterwards was killed in Bābur's assault on Čānderī. He was the most able of the minor Rād̲j̲pūt chieftains, as skilful in warfare as in administration; he never abandoned his respect for or courtesy to Maḥmūd S̲h̲āh, treating him and his family with consideration and generosity.

(J. BURTON-PAGE)

MED̲J̲DĪ, MEḤMED ČELEBI, an Ottoman littérateur and biographer of the 10th/16th century known by the pen-name of Med̲j̲dī, d. 999/1591. He was born the son of a merchant in Edirne (ʿĀlī, *Künh al-ak̲h̲bār*, Ist. Univ. Lib. TY 5959, fol. 493b). He completed his education at the Bāyezīdiyye *medrese* in Edirne and became the *dānis̲h̲mend* ("advanced student") of the Bāyezīdiyye *müderris* Ḳāf Aḥmed Čelebi (Med̲j̲dī, *Ḥadāʾiḳ al-S̲h̲aḳāʾiḳ*, Istanbul 1269. 503). He served as repetiteur (*muʿīd*) to Ḳaramānī Ak̲h̲aweyn Meḥmed Čelebi and thereafter entered the judicial career; according to ʿĀs̲h̲iḳ Čelebi (*Mes̲h̲āʿir ül-s̲h̲uʿarāʾ*, ed. G.M. Meredith-Owens, London 1971, fol. 117b) and Ḳïnalï-zāde Ḥasan Čelebi (*Tezkiret uṣ-ṣuarâ*, ed. İ. Kutluk, Ankara 1981, ii, 854), Med̲j̲dī was Ak̲h̲aweyn's *muʿīd* during the latter's tenure at the Bāyezīdiyye, while Newʿī-zāde ʿAṭāʾī (*Ḥadāʾiḳ al-ḥaḳāʾiḳ fī takmilat al-S̲h̲aḳāʾiḳ*, Istanbul 1268, 334) states that he became a candidate for office (*mulāzim*) under the quota of nominees allowed Ak̲h̲aweyn as a *müderris* at the Ṣaḥn, where he taught before being appointed to the Bāyezīdiyye. Med̲j̲dī held a number of *ḳāḍīlïḳ*s in Rumeli and reached the rank of 150 aspers' daily salary; he died in Istanbul in 999/1591 while awaiting a new appointment and was buried at the *zāwiye* of Emīr Buk̲h̲ārī outside the Edirne gate.

As a poet, Med̲j̲dī was particularly influenced by Emrī (also a native of Edirne) and by his teacher Ak̲h̲aweyn, and his contemporaries ʿAhdī (*Güls̲h̲en-i s̲h̲uʿarāʾ*, Ist. Univ. Lib. TY 2604, fols. 110 ff.), and ʿĀs̲h̲iḳ Čelebi, *loc. cit.*, acknowledged him as an accomplished scholar and littérateur known for the perfection of his poetic forms, his mastery of the *ḳaṣīde* and *g̲h̲azel*, and his skill in the use of fresh imagery. Selections from his poetry are found in the *ted̲h̲kire*s of poets (ʿAhdī, ʿĀs̲h̲iḳ Čelebi, Ḳïnalï-zāde, *locc. cit.*; Riyāḍī Meḥmed, *Ted̲h̲kire*, Ist. Univ. Lib. TY 761, fol. 119a; Beyānī Muṣṭafā, *Ted̲h̲kire*, Ist. Univ. Lib. TY 2568, fol. 79a; Ḳāfzāde Fāʾiḍī, *Zubdat al-as̲h̲ʿār*, Ist. Univ. Lib. TY 1646, fols. 97a-98a; ʿAṭāʾī, 335-6) and in the histories of Edirne (Ḥibrī, *Enīs al-musāmirīn*, Millet Lib., Emirî, *tarih* no. 68, fol. 80b; Bādī, *Riyāḍ-i belde-yi Edirne*, Bayezid Devlet Lib. no. 10392, ii, 545-6; O.N. Peremeci, *Edirne tarihi*, Istan-

bul 1940, 216), and his *ghazels* were collected in his *Dīwānče* (Millet Lib., Emîrî, *manzum* no. 398; for a description, see *İstanbul kitaplıkları türkçe yazma divanlar kataloğu*, Istanbul 1947, i, 175). Medjdī demonstrated his ability to compose good Arabic prose with two treatises, the *Sayfiyya* (Süleymaniye Lib., Esad Ef. no. 3416, fols. 28b-30b) and the *Shamʿiyya* (quoted in part by ʿAlī, Ḳînalî-zāde, Beyānī and ʿAṭāʾī, *locc. cit.*).

Medjdī displayed his scholarly and literary ability in the work for which he is justly renowned, his translation of the *Shaḳāʾiḳ al-Nuʿmāniyya fī ʿulamāʾ al-dawla al-ʿOthmāniyya*. As previous translations and continuations of Tashköprü-zāde's famous biographical work (see Kātib Čelebi, *Kashf al-ẓunūn*, Istanbul 1941, ii, 1057-8; B. Gönül (Necatigil), *İstanbul kütüphânelerinde al-Şaḳâʾiḳ al-Nuʿmânîya tercüme ve zeyilleri*, in *Türkiyat Mecmuası*, vii-viii [1945], 136 ff.) had been made, some scholars had added explanatory and supplementary notes (*ḥāshiyas* and *taʿlīḳāt*) to the margins of the Arabic text. Medjdī, in order to make the work more widely available, undertook its translation into Turkish, which he completed and dedicated to Murād III in 995/1587. Medjdī compensated for the dry simplicity of the original with a courtly style and ornate language, adorning his translation with poetry, aphorisms, word plays and chronograms. He also used the sources at his disposal to expand and correct the work. These sources included marginal additions to the original *Shaḳāʾiḳ*, such as the notes made by ʿArab-zāde (see Medjdī, 331, 373-4, 385, 486) and Seyrek-zāde (*ibid.*, 494); documents such as *waḳf-nāmes*, *hudjdjets* and *temessüks* found in the judicial (*ḳāḍīlīḳ*) archives; authors such as al-Suyūṭī, Ibn ʿArabshāh and Ḥanbalī-zāde; early Ottoman chronicles, particularly the *Hesht bihisht*; *tedhkire* authors such as Sehī, Laṭīfī and ʿĀshiḳ Čelebi; and such works written by the subjects of his biographies as he was able to see plus accounts transmitted by their relatives and students (for an indication of the extent of these additions, which Medjdī labels *tedhyīl*, see A. Subhi Furat's notes to his edition of the original, *eş-Şeḳāʾiḳu n-Nuʿmānīye fī ʿulemāi 'd-devleti l-Osmānīye*, Istanbul 1985). Thus it can be said that Medjdī's work, which he entitled *Ḥadāʾiḳ al-Shaḳāʾiḳ*, rather than being a translation represents an attempt to produce a new work based on the *Shaḳāʾiḳ*. Medjdī's *Ḥadāʾiḳ*, as a complement to the *Shaḳāʾiḳ* which was of high literary quality, became the formal and stylistic model for later continuations, and the edition published in 1269/1852 is a primary reference work for researchers.

Bibliography: Given in the article.

(Bekir Kütükoğlu)

MEDJELLE (A. madjalla). Originally meaning a book or other writing containing wisdom, or even any book or writing, the term refers in its best-known application to the civil code in force in the Ottoman Empire, and briefly in the Turkish republic, from 1285/1869 to 1926.

Known in full as the *Medjelle-yi Aḥkām-i ʿAdliyye*, this covers contracts, torts and some principles of civil procedure. It reflects Western influence mainly in its division into numbered books, sections and articles, as in European codes. Critics have found a number of flaws in the work, such as the dispersion at times of related subjects in different parts of the code. Nevertheless, the *Medjelle* was extremely important for several reasons. It represents the first attempt by an Islamic state to codify, and to enact as law of the state, part of the *sharīʿa* (Schacht, 92). Further, the code, while derived from the Ḥanafī school of law, which enjoyed official status in the Ottoman Empire, did not always incorporate the dominant opinions of that school. Rather, of all the opinions ever advanced by Ḥanafī jurists, the code incorporated those deemed most suited to the conditions of the times, in accordance with the principle of *takhayyur*. While the justificatory memorandum (*esbāb-i müdjibe maḍbaṭasi*) submitted to the Council of Ministers, said that the authors of the code "never went outside the Ḥanafī rite" (Liebesny, 69; Berki, 12; *Düstūr*[1], i, 27; Aristarchi, vi, 15), some of these opinions had in fact originated with non-Ḥanafī jurists (Anderson, 17, 47-8). Such eclecticism became a major feature of later efforts at reform of *sharīʿa* law and, by nature, provided added impetus for codification (Liebesny, 137-8). Finally, since the *Medjelle* was applied in the secular *niẓāmiyya* courts set up in the period [see maḥkama, 2, ii] as well as in the *sharīʿa* courts, it applied to non-Muslim subjects of the empire as state law (*ḳānūn*), as well as to Muslims, on whom the code's *sharʿī* content would have been binding in any case (Aḥmed Djevdet, *Tezâkir 1-12*, 64; idem, *Maʿrûzât*, 200; Heidborn, i, 387; cf. Schacht, 92-3).

The decision to draft the *Medjelle* grew out of a controversy over whether the Ottomans should simply translate and adopt the French civil code. The Ottoman Council of Ministers decided instead to commission a work based on *fiḳh* and entrusted this task to a commission under the chairmanship of Aḥmed Djewdet Pasha [*q.v.*], who had been the leading advocate of this course of action. The commission completed the sixteen books (*kitāb*) of the *Medjelle* over the period from 1285/1869 to 1293/1876 (*Düstūr*[1], i, 20-164; ii, 38-425; iv, 93-125; Berki, *passim*; Aristarchi, vi-vii; Young, vi). The various books were placed in force by decrees (*irāde*) of the sultan, dating from 6 Dhu 'l-Ḳaʿda 1286/1870 (Berki, 113) to 26 Shaʿbān 1293/1877 (*ibid.*, 422). In *sharʿī* terms, the *Medjelle* thus acquired legal force from the power of the sultan as *imām al-muslimīn* to order which of several legal opinions should be followed in a given matter (*Düstūr*[1], i, 29; Heidborn, i, 286; Anderson, 48).

The *Medjelle* opens with two sections which define *fiḳh* and its divisions and which state its basic principles largely according to the *Ashbāh wa 'l-naẓāʾir* of Ibn Nudjaym (d. 970/1562-3). Following these sections, the sixteen books deal with sales (*buyūʿ*); hire and lease (*idjāra*); guaranty (*kafāla*); transfer of debts (*ḥawāla*); pledge (*rahn*); deposit (*amānāt*); gift (*hiba*); usurpation and property damage (*ghaṣb wa-itlāf*); interdiction, duress, and pre-emption (*ḥadjr, ikrāh, shufʿa*); joint ownership and partnership (*shirka*); agency (*wakāla*); amicable settlement and remission of debt (*ṣulḥ wa-ibrāʾ*); acknowledgment (*iḳrār*); lawsuits (*daʿwā*); evidence and oaths (*bayyināt wa-taḥlīf*); courts and judgeship (*ḳaḍāʾ*) (Velidedeoğlu, 190-6). The drafting commission evidently intended to continue its work by codifying the law on the family and inheritance, but soon found itself paralysed by the suspicions of the new sultan. ʿAbd ül-Ḥamīd II (1876-1909 [*q.v.*]) (Heidborn, i, 285; Mardin, art. *Mecelle*, 435).

Despite its bases in *fiḳh*, the *Medjelle* differs from traditional *sharīʿa* law in several respects, including its codification and official promulgation and its implicit admission—necessary, given its intended scope of application—of non-Muslims as witnesses (Schacht, 93). The *Medjelle* also differs from European civil codes in omitting non-contractual obligations, types of real property other than freehold (*milk*), family law, and inheritance, as well as in including some *sharʿī* procedural provisions (Liebesny, 65).

The significance of the *Medjelle* can be measured not

only from the respect that it continues to command as evidence of the possibility of achieving its original purpose, that of systematising the *sharīʿa* so as to obviate the adoption of purely secular law codes (Fazlur Rahman, 29), but in a more tangible way, the code's significance also appears from its remarkable afterlife. In the *niẓāmiyya*, though not the *sharīʿa* courts, the Ottoman government did replace the procedural provisions of the *Medjelle* with a Code of Civil Procedure, based on French law, in 1879 (Liebesny, 66; Heidborn, i, 386-7; *Düstūr*[1], iv, 257-317; Young, vii, 171-225). The Turkish republic then abrogated the *Medjelle* in 1926. Yet it remained in force in Bosnia-Herzegovina after the Austrian occupation of 1878, in Albania until 1928, and in Cyprus at least into the 1960s. In the Middle East, the *Medjelle*, though never in force in Egypt, was not replaced by new civil codes until 1932 in Lebanon, 1949 in Syria, and 1953 in ʿIrāḳ, where many elements of it survived in the new civil code of that year. The *Medjelle* has remained basic to the civil law of Israel and Jordan. It has also continued to serve as the civil law of Kuwayt (Schacht, 93; Liebesny, 93, 100, 109).

In terms of the approach to legal reform which it represented, another aspect of the *Medjelle*'s continuing influence appears in the Ottoman Law of Family Rights (*Ḥuḳūḳ-i ʿĀʾile Ḳarārnāmesi*) of 8 Muḥarram 1336/1917 (*Düstūr*[2], ix, 762-81; x, 52-57; Anderson, 39-40, 48-50; Schacht, 103). Enactment of this law completed what appears to have been the original programme of the drafters of the *Medjelle*. In addition, the new law resembled the *Medjelle* in combining codification with an eclectic approach to *sharʿī* sources, as well as in applying to both Muslim and non-Muslim subjects, a breadth achieved in this case by incorporating provisions drawn from the religious law of the various communities (Shaw and Shaw, 307). The 1917 family law further resembled the *Medjelle* in that it remained in force in various of the successor states much longer than in Ottoman territory, where it was repealed in 1337/1919 (Shaw and Shaw, 333; *Düstūr*[2], xi, 299-300). For the 1917 law "remained valid in Syria, Lebanon, Palestine, and Transjordan (as they then were), and is still part of the family law of the Muslims in Lebanon and in Israel" (Schacht, 1964, 103).

(C.V. FINDLEY)

MEDJĪDIYYE (Romanian, Medgidia), a small town in eastern Romania, situated in the central Dobrudja [*q.v.*], midway between the Danube and Constanta (Kustendje), and on the site of the earlier Ottoman settlement of Ḳaraşu, which had served as a relay-station on the old *ṣagh ḳol*, the military road from Istanbul to the lower Danube and the Crimea. The importance of Medjīdiyye stems from its being, in its inception, a mid-19th century Ottoman planned town, founded by the local *wālī*, Saʿīd Pasha, in the course of the Crimean war, to house Ḳrïm Tatar refugees, and named in honour of the reigning sultan ʿAbd al-Medjīd. Within a few months of its foundation in 1854 it contained over one thousand completed houses, a *khān* and a bazaar. The large mosque, which still stands, and serves a population still 30% Muslim, is dated 1277/1860-1. In the reorganisation of the provincial administration of Rumeli in 1284/1864, Medjīdiyye, as a *ḳaḍāʾ* in the *sandjaḳ* of Tuldja (not Varna, as in *EI*[2], art. *Dobrudja*), formed part of the new Ṭuna *wilāyet* (*Sālnāme 1294*, 432), and its prosperity was subsequently increased by the building of the railway from Bucharest to Constanṭa. By the terms of the Treaty of Berlin (art. xlvi), Medjīdiyye passed from Ottoman into Romanian possession, along with all that part of the Dobrudja north of a line drawn from Silistre to the Black Sea. At the time of the outbreak of the Russo-Turkish war of 1877-8, the population of Medjīdiyye and its surrounding *ḳaḍāʾ* was estimated at approximately 2,200 Muslim and 1,300 non-Muslim households.

MEDJĪDIYYE [see SIKKA].

MEDJLIS-I WĀLĀ, in full, the Ottoman Medjlis-i Wālā-yï Aḥkām-ï ʿAdliyye, or Supreme Council of Judicial Ordinances.

This was created in 1838 by the reformer Muṣṭafā Reshīd Pasha for the purpose of taking over the legislative duties of the old *Dīwān-ï Hümāyūn* in order to originate or review proposed legislation and thereby create an "ordered and established" state by means of "beneficent reorderings" (*tanẓīmāt-ï khayriyye*) of state and society, with all other legislation being turned over to a second legislative body, the *Dār-ï Shūrā-yï Bāb-ï ʿĀlī* (Deliberative Council of the Sublime Porte). The *Medjlis-i wālā* hardly had a chance to begin its deliberations when, following the accession of Sultan ʿAbd al-Medjīd I [*q.v.*] and promulgation of the *Khaṭṭ-ï Hümāyūn* of Gülkhāne which proclaimed the *Tanẓīmāt* reform movement as the

major goal of the new régime, it was expanded into the principal legislative body of state with the abolition of its sister body. Beginning its work on 8 March 1840 in a new building constructed especially for it near the office of the Grand Vizier at the Sublime Porte, it originated most of the *Tanẓīmāt* legislation, though its powers were severely limited by regulations which allowed it only to consider legislation proposed to it by the ministries or the executive. It was supplanted for reform legislation by the *Medjlis-i ʿĀlī-yi Tanẓīmāt* in 1854, but it continued to originate lesser laws and regulations and also to act as supreme court of judicial appeals. Conflicts of jurisdiction between the two bodies, however, and a substantially increasing workload created such a backlog of legislation that in 1861 the two were brought back together into a new *Medjlis-i Wālā-yi Aḥkām-i ʿAdliyye*, which was divided into departments for Laws and Regulations, which assumed the legislative functions of both councils, Administration and Finance, which investigated complaints against the administrative misconduct, and Judicial Cases, which assumed the old council's judicial functions, acting as a court of appeals for cases decided by the provincial councils of justice and as a court of first instance in cases involving misconduct on the part of higher officials in the central government. Regulations allowing it to originate as well as to review proposed legislation, and to question members of the executive and to try such officials for misdeeds, greatly increased its ability to act decisively in order to meet the problems of the time, with the sultans interfering only rarely to veto or change the results of its work. In 1867, however, in response to complaints about the autocratic nature of the *Tanẓīmāt* system, the *Medjlis-i Wālā* was replaced by separate legislative and judicial bodies, the *Shūrā-yi Dewlet*, or Council of State, whose members were at least partially elected and representative, and the *Dīwān-i Aḥkām-i ʿAdliyye*, chaired respectively by the famous *Tanẓīmāt* leaders Midḥat Pasha and Aḥmed Djewdet Pasha.

MEERUT [see MĪRATH].

MEHEDAK [see AL-MAHDIYYA].

MEḤEMMED is one of the Turkish forms of the name Muḥammad which, having been borne by the Prophet of Islam, is by far the commonest used name in the Islamic world.

Independent of the modifications which it may undergo from the influence of the speech habits of allophonic groups and the phonetic structure of languages other than Arabic, this name has undergone, in spite of—and perhaps because of—the veneration which it inspires, various deliberate modifications on the part of sincere Muslims who hold fast to what exactly respects the Prophet's memory. If the Turkish form "Meḥemmed" may be explained by the vocalic structure of that language, the form "Maḥammad", widespread in North Africa and distinguished from "Muḥammad" by a *fatḥa* on the first *mīm* or the prefixing of a purely orthographical *alif* (which also serves to indicate the dialectical pronunciation "Mḥammed"), is certainly in fact due to a desire to let the persons thus named share in the *baraka* [*q.v.*] attached to the Prophet's name without risking letting it become profaned, above all by insults and abuse addressed specifically by name to these persons. On the problems posed by alterations of this kind in the sphere of Islam and those which the name of Muḥammad has undergone in the European languages, see G.S. Colin, *Muḥammad-Mahomet*, in *BSLP*, xxvi (1925), 109; J. Mouradian, *Notes sur les altérations du nom de Mohammad chez les Noirs islamisés de l'Afrique Occidentale*, in *Bull. du Comité d'études historiques et scientifiques de l'Afrique Occidentale Française*, xxi (1938), 459-62; A. Fischer, *Vergöttlichung und Tabuisierung des Namen Muḥammad's bei den Muslimen* in *Beiträge zur Arabistik, Semitistik und Islamwissenschaft*, Leipzig 1944, 307-39; F. de la Granja, *A propósito del nombre Muḥammad y sus variantes en Occidente*, in *al-And.*, xxxiii (1968), 231-40 (where Colin's note, mentioned above, is also given); see also, for an example of deliberate alteration (*Mamad*), L.P. Harvey, *Crypto-Islam in sixteenth century Spain*, in *Actas del primer congreso de estudios árabes e islámicos*, Madrid 1964, 169, no. 15, 177, l. 9.

Contemporary Byzantine and European texts indicate that in the 9th/15th century the predominant pronunciation of the name was "Mehemet": F. Babinger, commenting on the form "Memmet" in *Die Aufzeichnungen des Genuesen Iacopo de Promontorio ... um 1475*, Munich 1957, 29, n. 1 (and there, with further bibliography, proposing "Mehemmed" as the current pronunciation), adduces Angiolello's "Mehemet", and the Μεχεμέτ and similar forms which is regular in Ducas, Sphrantzes and Critoboulos (for these and the other Byzantine texts see G. Moravcsik, *Byzantinotourcica*, ii, s.v. Μουχαμέτης).

In modern Turkey, the name finally appears as "Mehmet", as a consequence of the general phonological principles (J. Deny, *Principes de grammaire turque*, Paris 1955) of the devoicing of a final voiced consonant, the predilection for front vowels in loanwords, the assimilation (progressive and regressive) of vowels, and the fall of an unstressed middle vowel in a tri-syllable.

The Editors, taking the view that to employ the spelling "Muḥammad" in the Ottoman context would be hypercorrect (and "Meḥmed", for the earlier centuries, anachronistic) have adopted the convention that all the relevant Ottoman rulers figuring in the *Encyclopaedia* shall be referred to consistently as "Meḥemmed", whilst lesser personages shall be referred to as "Meḥmed". (Ed.)

MEḤEMMED I, Ottoman sultan, reigned 816-24/1413-21, also known as *Čelebi* (Turkish "of high descent", "prince") or as *Kirishdji* (from *Krytzes*, meaning in Greek "young lord"). During the period of interregnum, 804-16/1402-13, he ruled over Anatolia from Tokat, Amasya, and Bursa while his brothers Süleymān (804-13/1402-11) and Mūsā (813-16/1411-13) had control of Rūmili from Edirne. Meḥemmed brought under his rule Bursa and western Anatolia in the years 805-6/1403-4 and 813-16/1410-13, and finally achieved the unification of the two parts of the Ottoman state under his sole sovereignty in 816/1413. He was the fourth son of Bāyezīd I [*q.v.*] by a slave girl Dewlet Khātūn (Uzunçarşılı, in *İA*, viii, 496).

1. *Birth and early years.*

Born in 788/1386 or 789/1387, Meḥemmed was sent when he reached the *Sharʿī* age of adolescence in

Shawwāl 801/June 1399 as governor over the province of Rūm, which included Amasya, Tokat, Sivas and Ankara, formerly the territory of the Eretna [*q.v.*] dynasty. Meḥemmed's six brothers were Ertoghrul (died 802/1400, Zachariadou, *Ertogrul*, 157), Muṣṭafā (captured by Tīmūr and taken to Samarḳand in 804/1402; *Dustūr-nāme*, 90), Süleymān (in contemporary sources also known at Muslumān or Amuslumān), ʿĪsā, Mūsā and Ḳāsim. In 804/1402, Ḳāsim, aged under 12, was in Bursa in the palace while Mūsā was captured together with his father by Tīmūr. Süleymān, ʿĪsā, Meḥemmed and Mūsā fought to get control of Bursa, still considered as the *Dār al-Salṭana*, and of Edirne, capital city of Rūmili.

2. *The status quo established by Tīmūr in Anatolia.*

During Tīmūr's siege of Izmir (from 6 Djumādā I 805/2 December 1402 until 10 Djumādā II/6 January 1403), Süleymān was given a *yarlīgh* granting him the rule "over all the territories beyond the Bosphorus" (*asra-yaḳa*, Yazdī, fol. 424b). Meḥemmed, whom Tīmūr called to come in person to Kütayha, could not or would not obey the order (for details in the *Manāḳib-nāme*, see *Bibl.*).

Meḥemmed's first deeds against the Turcoman begs in the Tokat-Amasya region, rendered in an epic style in the *Manāḳib-nāme*, appear actually to have been local clashes which evidently resulted in compromises giving recognition of Meḥemmed's overlordship in return for his confirmation of the begs' freehold possession of their lands (cf. Neshrī, ii, 480). In the future, these hereditary *mülk tīmārs* would create problems when Ottoman centralist control was re-established. These local dynasts in control of Turcoman and "Tatar" forces would provide the bulk of Meḥemmed's army (cf. divisions of Tatars and Türkmens in the battle against Mūsā in 816/1413; Neshrī, ii, 512-13).

Ḳara Dewletshāh, Ḳubād-oghlu, Mezīd Beg and the family of Tashan (on the family's origin, see *Bazm u razm*, 397) were all local dynasts who after the battle of Ankara accepted Tīmūr's overlordship and challenged Ottoman domination, showing his diplomas (Neshrī, i, 372). Meḥemmed, too, was wise enough to accept Tīmūr's suzerainty and thus legitimise his lordship in the region of Tokat-Amasya (for Meḥemmed's silver coin bearing Tīmūr's name, see *Table*, no. 3). In his fight to assert his authority against his rivals there, he appears to have been supported by ʿ*ulemā*ʾ and urban notables (see Hüsameddin, iii, 157-98), while local begs, with their Tatar and Türkmen followers, had neither the prestige nor the legitimacy of an Ottoman prince.

In the well-established Turkish tradition, every son of a ruler had the right to succeed his father, and his legitimacy could not be contested since there was no law which regulated succession (see Inalcik, *Verâset*). As the *Menāḳib-nāme* (see Neshrī, ii, 432, 434, 446, 456, 462, 504, 508) makes clear, people at large often told the rival princes struggling for recognition that they had first to win the fight, which was interpreted as a sign of God's favour. The principle of seniority was not decisive, although Meḥemmed at the beginning recognised his elder brother Süleymān as representing supreme authority (Anonymous chron. Paris, Bibl. Nat. 1047, fol. 29b; ed. Giese, 47).

On the struggle among the Ottoman princes, Čelebis, the account of the *Menāḳib-nāme*, which is actually a contemporary account of the events for the period 1402-13, should be followed. According to this source, in various encounters Meḥemmed defeated ʿĪsā and took Bursa, although the latter secured the alliance of the western Anatolian begs and Isfendiyār of Kastamuni (*Menāḳib-nāme*, in Neshrī, ii, 422-50; Idrīs, 263-7). Meḥemmed finally captured and killed him at Eskishehir (apparently in 806/403-4; Zachariadou, *Süleymān*, 283-91, believes that ʿĪsā was killed by Süleymān in 1403). Then, in 806 (begins 21 July 1403), Meḥemmed lost Bursa and Ankara to Süleymān (Meḥemmed minted an *aḳče* in Bursa in the same Hidjra year, see *Table*, nos. 3, 4). Meḥemmed had to retreat to his Tokat-Amasya base, and later encouraged Mūsā to go to Rūmeli (*Menāḳib-nāme*, in Neshrī, ii, 474; Idrīs, 275-6). Accepting the Wallachian Voyvode Mircea's invitation, Mūsā arrived by sea in Wallachia in 809/1406 (A. Dersca

TABLE

Ottoman coins minted during the period 805-822

Ruler and title	*Year*	*Minting place*	*Metal*
1. Amīr Sulaymān b. Bāyazīd	805	—	silver
2. Amīr Sulaymān Bāyazīd	806	—	silver
3. Muḥammad b. Bāyazīd Khān/Demür Khān Kurḳān	806	Bursa	silver
4. Ghiyāth al-Dunyā wa 'l-Dīn Muḥammad b. Bāyazīd	806	Bursa	silver
5. Ghiyāth al-Dunyā wa 'l-Dīn Muḥammad b. Bāyazīd	806	Engüriyye	silver
6. al-Sulṭān al-Aʿẓam Muḥammad b. Bāyazīd Khān	808	Amasya	silver

Bulgaru, *Les relations*, 116-17, citing Guboglu, gives the year 1406; the date is confirmed by the details in *Manāḳib-nāme*, in Neshrī, ii, 478: ʿAlī Pasha's death which occurred in 17 Radjab 809/28 December 1406; Idrīs, 278). His success in the eastern Balkans finally forced Süleymān to leave Bursa for Rūmili. At first victorious at the battle of Yanbolu (13 February 1410), Mūsā was later twice defeated (June and July 1410, A. Dersca Bulgaru, 122, 123). Finally, by a surprise attack, Mūsā captured Edirne and killed Süleymān (17 February 1411). Upon Süleymān's departure from Anatolia, Meḥemmed re-occupied Bursa (*Menāḳib-nāme*, in Neshrī, ii, 480). Not honouring his agreement with Meḥemmed, Mūsā acted independently, and espousing the frontier begs' aggressive policy, he alienated the vassal states from himself, who now sided with Meḥemmed (*Menāḳib-nāme*, in Neshrī, ii, 486-516; Idrīs, 281-8). After two unsuccessful attempts against Mūsā (*Menāḳib-nāme*, in Neshrī, ii, 490-500; Idrīs, 281-4) in 814 (begins 25 May 1411); these two clashes are confirmed by Ducas, 109-110) Meḥemmed finally overcame his rival and eliminated him, thanks to the alliance of the frontier begs and vassal states (*Menāḳib-nāme*, in Neshrī, ii, 506-16, Idrīs, 286-8; Braun, 47-55) on 5 Rabīʿ II 816/5 July 1413. According to the *Menāḳib-nāme*, in Neshrī, 88, 486, 516, 550, starting from 805/1402, Süleymān reigned 8 years, 10 months and 17 days, Mūsā 2 years, 7 months and 20 days and Meḥemmed 7 years, 11 months and a few days.

The principal Anatolian dynasties, the Djandārids, the Ḳaramānids, the rulers of Germiyān, Ṣarukhān, and Aydīn in Western Anatolia, which had all been restored to their principalities under Tīmūr's overlordship, were actively involved in the struggle between the Ottoman princes for Bursa, still considered the principal capital or *Dār al-Salṭana*. Their policies were basically determined, like those of Byzantium, Wallachia and Serbia, by their concern to maintain the status quo established after the battle of Ankara. Each Ottoman prince, for his part, tried to gain their support or neutrality by showing himself respectful of their autonomy or independence. However, Tīmūr's departure made the Anatolian dynasties realise that Ottoman power and supremacy were still a fact, and some of them, for the sake of survival, recognised the overlordship of whichever Ottoman prince had control of Bursa.

Byzantium and the vassal states in the Balkans, subjected and paying tribute under Murād I [*q.v.*] and Bāyezīd I, were now independent and even recovered some of their territories (see Jorga, *GOR*, i, 325-77; Barker, 200-385; Zachariadou, *Süleyman*; Jirecek, ii, 137-56). They played off one Ottoman prince against another, gave refuge to and used the Ottoman pretenders against any Ottoman prince whenever he became powerful enough to assert his suzerainty over them. Thus the political manœuvres of Mircea and the Byzantine Emperor Manuel II strongly influenced the struggle between the Ottoman princes. Except for Mūsā, who adopted the policy of the frontier begs of recovering lost lands and engaging in raiding, the other princes, Süleymān and Meḥemmed, involved themselves politically with the Christian rulers, often making compromises and concessions to them. All through the Ottoman interregnum, Byzantium played a central role and managed to keep the respect of rival Ottoman princes. This was actually due to the fact that, after the treaty of 1403 (Denis, *Treaty*; Zachariadou, *Süleyman*, 270-83), the Byzantines controlled the sea passage between Anatolia and Rūmeli. Ottoman public opinion (see Anonymous Paris 1047, fol. 29b). interpreted the treaty of 1403 as such. When in 806/1403 Süleymān decided to pass over to Anatolia to march against Meḥemmed in Bursa, he delivered his younger brother Ḳāsim and his sister Fāṭima as hostages to the Emperor. Later, as part of his appeasement policy, Süleymān also sent his son Orkhan as hostage to Manuel II. Against Mūsā, and after his elimination, against Meḥemmed in 1413, the Emperor tried to use Orkhan, who claimed the Ottoman throne as the legitimate successor of Süleymān.

Meḥemmed's final success depended a great deal on his conciliatory and even compliant attitude towards the Emperor, whom he called father (Ducas, iii, 114). Apparently, Mūsā's harsh personality, or rather, his centralist and autocratic policy, which the hereditary frontier begs resented, alienated them from him.

3. *Unification and the resurgence of the Ottoman supremacy.*

In 816/1413, upon his accession to the throne in Edirne as the sole ruler of the Ottoman lands, Meḥemmed I received embassies from tribute-paying vassal countries, including Byzantium, Serbia, Wallachia, Yanina, the Morean despotate and the Prince of Achaia (Athens), and sent them back with strong guarantees of peace and friendship (Ducas, iii; Setton, ii, 6, cf. Anonymous Paris 1047, fol. 33a).

Feeling secure in the Balkans, Meḥemmed made in the following two years a series of campaigns to reassert his sovereignty in Anatolia and to punish those *amīrs* who had helped Mūsā against him, In 817/1414 he made the whole of western Anatolia submit by defeating Djunayd, who, abandoning Mūsā, had returned and revived his emirate of Izmir (Ducas, 115-19). The emirate was invaded and turned into an Ottoman *sandjaḳ*. In this campaign, Germiyān, Menteshe, and the Genoese of Chios, Mytilene and Phocea and the Hospitallers of Rhodes, were allied with Meḥemmed on account of Djunayd's aggressive acts. During this campaign, Meḥemmed demolished the fortress which the Hospitallers had begun to construct again in Izmir. The ruler of Menteshe now recognised Meḥemmed as suzerain (Wittek, *Mentesche*, 97).

In 816/1413, while Meḥemmed was in Rūmili proceeding against Mūsā, the Ḳaramānid Meḥmed II laid siege to Bursa and burned down the quarters around the castle (al-Maḳrīzī, *Sulūk*, iv, 47a; Neshrī, 141-2). Upon the news of Meḥemmed's victory over Mūsā, the Ḳaramānids retreated after a 31-day siege. Meḥemmed at first proposed a campaign against Isfendiyār of Kastamuni, who however submitted in time, promising to send auxiliary forces to Meḥemmed's planned campaign against Ḳaramān. Germiyān, which had been invaded by the Ḳaramānids, was a natural ally and vassal (Neshrī, ii, 516-34). Prior to the major campaign against Ḳaramān, Meḥemmed sent an embassy with rich presents to the Sultan of Egypt, who was considered a protector of the Ḳaramānids (Ibn Ḥadjar, iii, 518; letter from Inegöl, in Ferīdūn, i, 145, dated *awāsiṭ Dhi 'l-Ḥidjdja* 817/February 1415). Meḥemmed defeated the Ḳaramānids and laid siege to Ḳonya (Muḥarrem 818/13 March-11 April 1415). The Ḥamīd-ili and Saʿīd-ili were annexed to the Ottoman state (*Takvimler*, 20, 56; al-Maḳrīzī, iv, 51a).

With the Ottoman re-unification of Anatolia and Rūmili under one ruler and that ruler's attempts at reimposing suzerainty on the former Ottoman vassal states, the Emperor increased his diplomatic activities in conjunction with the Pope and Venice, calling for

a crusade against the Ottomans (Barker, 290-353; Thiriet, ii, no. 1592). Profiting from the Ottoman interregnum, Venice had succeeded in extending her control in Epirus, Albania and the Morea. Negotiation for an agreement with Meḥemmed after his final victory over his brothers dragged on unsuccessfully. During the campaign against Djunayd in 1414, the Venetian Duke of Naxos had not joined the other Aegean Latin rulers in the renewal of submission. So, in 1415, Meḥemmed released the sea *ghāzīs* of western Anatolia against Venetian possessions in the Aegean, and sent his fleet of Gallipoli (112 ships, 13 of them galleys) under Čalī Beg to strike at the Cyclades (Ducas, 119; Thiriet, ii, nos. 1569, 1573, 1584, 1588, 1597, 1598). Venice decided to strike back. A Venetian fleet under Pietro Loredano made a surprise attack and destroyed the Ottoman fleet at Gelibolu (Gallipoli) on 1 Rabīʿ II 819/29 May 1416 (Jorga, i, 372; al-Maḳrīzī, iv, 66a).

Released by the Tīmūrid Shāhrūkh, Meḥemmed's brother Muṣṭafā had arrived in Trebizond (January 1415), and his envoy began to negotiate with Venice and with the Emperor (Thiriet, ii, nos. 1563, 1564). Arriving in Ḳonya and then Ḳastamuni, Muṣṭafā went by sea to Wallachia. Djunayd, the former ruler of Izmir, who had been appointed by Meḥemmed governor of Nicopolis, joined him there. The appearance on the scene of Meḥemmed's elder brother Muṣṭafā brought back the internecine war, coupled with a terrible social-religious insurrection and a hostile attitude on the part of the vassal states in Rūmili and Anatolia. Although militarily supported by Mircea, Muṣṭafa and Djunayd failed to attract the frontier forces and had to return to Constantinople. The Emperor this time (spring 819/1416) sent them to Salonica (Jorga, *GOR*, i, 373). Meḥemmed declared war against Byzantium. Muṣṭafā and Djunayd captured Serres and hoped to obtain the support of the Ottoman frontier forces there. They failed, and Meḥemmed forced them to take refuge in Salonica again (autumn 1416, Jorga, i, 374). The Emperor finally agreed to keep them in custody as long as Meḥemmed lived and was to receive an annual compensation of 300,000 *aḳčes* (about 10,000 gold ducats) for their upkeep (Ducas, 125).

While fighting against Muṣṭafā in Rūmili, Meḥemmed had at the same time to deal with a violent Ṣūfī insurrection fomented by Shaykh Badr al-Dīn [*q.v.*] in western Anatolia and Deli-Orman (summer and autumn of 1416, Filipović, *Princ Musa*; Werner, *Ketzer*; Neshrī, ii, 542-6; Idrīs, 294). Mircea, who had given refuge to the *shaykh* and actively supported him, invaded Deli-Orman on his heels and attacked Silistre (autumn 1416, Jorga, *GOR*, i, 374). Meḥemmed captured the *shaykh* in Zagra and hanged him in Serres on 18 December 1416. While Meḥemmed was kept busy in Rūmili, the Anatolian begs had again become hostile. Meḥemmed marched first against Isfendiyār, who had aided the *shaykh* to pass over to Wallachia (early 1417). Isfendiyār obtained peace by recognising the full suzerainty of Meḥemmed I. Since the latter fell seriously ill in 820/1417, the campaign against Ḳaramān was conducted by Bāyezīd Pasha, who captured the Ḳaramānid ruler (Neshrī, ii, 530-4; Idrīs, 289-91: in the early Ottoman compilations, various campaigns against Ḳaramān are confused).

During the interregnum period, Mircea, supported by the Hungarian King Sigismund, emerged as the principal opponent of Ottoman supremacy in the Balkans. Meḥemmed's 822/1419 campaign against Mircea (for the correct date, see Ibn Ḥadjar, iii, 526; and Meḥemmed's letter to Shāhrūkh in Ferīdūn, i, 164: Shawwāl 822/21 October-18 November 1419) is connected with Sigismund's plans for the invasion of the Balkans.

Meḥemmed's Anatolian vassals, the Ḳaramānid and Djandārid rulers, sent auxiliary forces under their sons to this major campaign. The Ottomans raided Wallachia, and Meḥemmed constructed the fortress of New Giurgiu (later Rusdjuḳ) on the right bank of the Danube; he then invaded "the Hungarian territory" and took Severin (Neshrī, ii, 536; Anonymous, Paris 1047, fol. 34; there, the dates 817/1414 and 819/1416 for this campaign of Meḥemmed I must belong to the frontier beg's earlier raids, cf. Ducas, 125). According to Neshrī, the Wallachian Voyvode (Mircea or Michael I) submitted, paying tribute and sending his three sons to the sultan as hostage.

4. *Tīmūrid intervention, 1416-20.*

The successes of the Ḳara Ḳoyunlu (Woods, 56-60) in Ādharbāydjān and western Iran and the overthrow of the status quo in Anatolia by Meḥemmed presented a challenge to the Tīmūrids. Shāhrukh [*q.v.*], having established his sovereignty in the east, moved to restore Tīmūrid control in the west. First, he released Muṣṭafā from captivity in Samarḳand, an action which brought back internecine war in the Ottoman domains in 819/1416. That Muṣṭafā's release was connected with a Tīmūrid plan becomes clear in Shāhrukh's protest against Meḥemmed's elimination of his brothers (his letter to Meḥemmed, Ferīdūn, i, 150-1). In his reply, the latter tried to prove that he did not support the Ḳaraḳoyunlu Ḳara Yūsuf, and argued that the division of the Ottoman state only helped the enemies of Islam, many places including Salonica having been lost to Islam because of that division. Shāhrukh's preparations for a large-scale campaign in the west in 822/1419 caused great concern in the Ottoman capital and generated an exchange of embassies between the Ḳara Ḳoyunlu and the Ottomans (Ferīdūn, i, 150-7). Invading Ādharbāydjān, Shāhrukh warned Meḥemmed not to give aid to Iskandar, the son of Ḳara Yūsuf, who might take refuge in Ottoman territory (Dhu 'l-Ḥidjdja 823/January 1420. In his reply, Meḥemmed expressed his complete submission (*farmān-bar*). The Ottoman court was meanwhile following in great anxiety the developments on the eastern frontier (see *Takvimler*, 20, 56). Upon Iskandar's victory over the Aḳ Ḳoyunlu Ḳara ʿOthmān (Rabīʿ II 824/April 1421), Shāhrukh entered eastern Anatolia and won a crushing victory against Iskandar (Radjab 824/July 1421). All this time, Meḥemmed was maintaining friendly relations with the Mamlūks (Ferīdūn, i, 145-6, 164-7), equally threatened by Shāhrukh.

In his last years, Meḥemmed appears to have fallen ill. Now his great concern was to secure the throne for his eldest son Murād without a crisis. Although Sülaymān's son Orkhan was blinded and kept in custody, Meḥemmed's brother Muṣṭafā was a serious rival, since he had actually been recognised as sultan by some of the Ottoman leaders and could be released by the Emperor at any time. Prince Murād's supporters spread the rumour that Muṣṭafā had died and that the challenger was a false (*düzme*) Muṣṭafā. To make sure of Murād's accession, Meḥemmed showed himself most liberal toward the members of the ruling élite and made an agreement with the Emperor (Ducas, 129; for the agreement of the same nature with Stefan of Serbia, see Braun, 56-8) that Murād

would succeed him in Edirne; his other son Muṣṭafā would remain in Anatolia; the two minor sons Yūsuf (aged 8) and Maḥmūd (aged 7) would be sent to Constantinople to the custody of Manuel II, who in return would not release their uncle Muṣṭafā (see Inalcik, *Murad II*, in *İA*, v, 598-9). The Emperor was to receive a yearly sum for the upkeep of the two Ottoman princes. When Meḥemmed died (5 Radjab 825/25 June 1421) Murād [*q.v.*] succeeded him on the throne in Bursa, refusing to deliver his brothers up to the Emperor.

5. *Conclusion.*

For the reign of Meḥemmed I, the fundamental question is to ascertain how the Ottoman state re-emerged as the dominant power in Anatolia and the Balkans under the most adverse conditions after the disaster of 1402. First of all, it must be noted that, despite military dissolution after the battle of Ankara, the Ottomans continued to be the major military power in both regions. Secondly, the Ottoman dynasty was able to create an imperial tradition which was considered the only source of legitimation for the feudal lords and dynasts in this area. In 1405 and 1413, for example, Serbian princes sought the resolution of differences among themselves through the intervention of the Ottoman ruler (Braun, 27, 55). Perhaps equally important was the fact that the Ottoman military groups of *sipāhīs*, *yaya* and *müsellems*, and the *ḳapï-ḳulus*, as well as the peasantry, saw that the confirmation and legitimation of their status and rights in the land were dependent on the existence and functioning of the Ottoman sultan's centralist government, and we have to remember that the Ottoman survey [see TAḤRĪR] and *tīmār* system was fully developed and widely applied in this period (see Inalcik, *Arvanid*).

Bibliography: A book of exploits in the style of a *menāḳib-nāme* has come down to us in the compilations of Neshrī, apparently most faithfully reproduced in his revised version, ed. F.R. Unat and M.A. Köymen, *Kitâb-i Cihannümâ*, i-ii, Türk Tarih Kurumu, Ankara 1949-57, repr. 1987, i, 366-419, ii, 422-516, and Idrīs Bidlīsī, *Hasht bihisht*, ms. TKS Library, Hazine 1655; with extensive omissions in Pseudo-Rūḥī, Oxford, Bodleian ms. Marsh 313, and Staatsbibliothek, Berlin, or. quart. 821, and in Bihishtī, Babinger, *GOW*: "Sinan Čelebi"; V. Ménage, *Bihishtī*, in *EI*[2]; Saᶜd al-Dīn, *Tādj al-tawārīkh*, Istanbul 1279/1862, i, 191-273, follows Idrīs; also Muṣṭafā ᶜĀlī, *Künh al-akhbār*, iv, Istanbul 1285/1868, 144-94. Other Ottoman chronicles are brief and confused; among them ᶜĀshïḳ-Pashazāde, *Tawārīkh-i āl-i ᶜOthmān*, ed. Ç.N. Atsız, Istanbul 1949, 146-57; for the anonymous chronicles, see *Die altosmanischen Anonymen Chroniken*, ed. F. Giese, i. *Text und Variantenverzeichnis*, Breslau 1922; one good version of the latter is ms. Bibl. Nat., Paris, supp. turc. 1047; Orūdj, *Tawārīkh-i āl-i ᶜOthmān*, ed. F. Babinger, Hanover 1925, is basically a variant of the anonymous chronicles; see Ménage, *Neshrī's History of the Ottomans*: *the sources and development of the text*, Oxford 1964; an independent Ottoman source is *Dustūrnāme-yi Enwerī*, ed. MEḤEMMED II, Ottoman sultan (reigned 848-50/1444-6 and 855-86/1451-81), called *Abu 'l-Fatḥ* or *Fātiḥ* "the Conqueror".

Considered the ultimate founder of the Ottoman Empire, he was born in Edirne on 27 Radjab 835/30 March 1432 as the fourth son of Murād II [*q.v.*] from a slave girl in the harem, and as a youth was sent to the governorship of the province of Amasya with his two *lalas* [*q.v.*] in the spring of 846/1443. In Rabīʿ II 848/July 1444, at the age of twelve, he was recalled and declared sultan by his father, who abdicated in his favour in order to ensure his succession against Orkhan, an Ottoman pretender in Constantinople. Meḥemmed's first sultanate, Rabīʿ II 848/July 1444-Djumādā II 850/August 1448, witnessed a fierce rivalry for power between the grand vizier, Čandarlî Khalīl, and the young sultan's two *lalas*, Zaghanos (Zaghanuz) and Ibrāhīm. While Čandarlî, of *ʿulamāʾ* background, favoured a foreign policy of peace and compromise, Zaghanos, who belonged to the military faction, advocated a programme of conquest — having particularly in mind the conquest of Constantinople — which would secure full authority to the young sultan and his *lala*. Because of the youth of the sultan and his inability to neutralise the rivalry among the two factions, the Ottoman state could not deal decisively with the fateful internal and external crises facing it (the *Ḥurūfī* uprising in Edirne on 8 Djumādā II 848/22 September 1444 and a Crusader army which crossed the Danube 4-8 Djumāda II 848/18-22 September 1444). Everywhere in the Balkans the vassal rulers and seigneurs set about recovering their independence and lost territories. In panic, many Turks began to emigrate to Anatolia. However, Orkhan's attempt in the summer of 848/1444 to attract the frontier begs and to seize Edirne failed. When the Crusader army came to lay siege to Varna in Radjab 848/November 1444, Čandarlî hastened to call the sultan's father with the Anatolian army to come and take command of the Ottoman forces. The Ottoman victory at Varna (28 Radjab 848/10 November 1444) created an ambiguity about who was really the sultan. Officially, Meḥemmed II was still sultan, but Čandarlî acted as if Murād had resumed the sultanate. Finally, by secretly inciting the Janissaries to rise, Čandarlî brought Murād back to the throne in actuality (9 Djumādā I 850/2 August 1446). Meḥemmed was sent to the governorship of Manisa with his *lalas* Zaghanos and Ibrāhīm. Although deposed, Meḥemmed was treated by his supporters as still having the supreme power (see Inalcik, *Fatih devri*, 102-9). Anxious to ensure his son's succession after his death, Murād II took Meḥemmed with him to his major campaigns in the Balkans — against the Hungarians at Kossova in 852/1448, and against the Albanians in the summer of 854/1450. Murād married his son to Sittī Khātūn, the daughter of the Dhu 'l-Ḳādirid [see dhu 'l-ḳadr] ruler, who was traditionally considered an Ottoman ally against the Ḳaramānids. It was only shortly thereafter that Meḥemmed received the news of the death of his father; he acceded to the Ottoman throne for the second time on 16 Muḥarram 855/18 February 1451.

In order to obtain concessions from Meḥemmed, who was seen as an inexperienced young man, the Byzantine Emperor threatened to release Orkhan, while the Ḳaramānid Ibrāhīm invaded disputed territories in Ḥamīd-ili [*q.v.*]. As a skilful diplomat and statesman, Čandarlî appeased Byzantium and Serbia by territorial concessions so that the young sultan could make his first campaign in Anatolia against the Ḳaramānid. While Meḥemmed was in Anatolia with his army, the Byzantine Emperor attempted to obtain further concessions by a second threat to release Orkhan. Meḥemmed came to an agreement with the Ḳaramānid and quickly returned to Edirne to deal with this new threat. Under the influence of Zaghanos, he decided to put an end to the truncated Byzantine empire and began to make preparations for the conquest of Constantinople, sc. by the construction of the Boghaz-Kesen castle on the Bosphorus. Already agreements with Venice (13 Shaʿbān 855/10 September 1451) and Hungary (25 Shawwāl 855/20 November 1451) secured peace in the west and the hire of Urban, a Hungarian expert, who would make for Meḥemmed the most powerful cannons ever seen in order to batter the city's legendary walls. In an extraordinary meeting in Edirne, where the decision for the siege was taken, Čandarlî drew attention to the impregnability of the walls and the danger of a crusade from the West, while the war party, principally Zaghanos and Shihāb al-Dīn, enthusiastically supporting the sultan's decision, emphasised the constant threat which Byzantium posed to the existence and unity of the Ottoman state. The outcome of the siege depended on the time factor and the efficiency of the Ottoman artillery. A long siege would give the Hungarian and Venetian forces the opportunity to come to the aid of the besieged. Thanks to the bombardment of the Ottoman heavy cannons, which tore down the walls, the whole siege took less than two months (26 Rabīʿ I 857/6 April 1453 until 20 Djumādā I 857/29 May 1453; on the siege itself, now see sources collected and edited by A. Pertusi). The most dramatic moment during the siege was the failure of the Ottoman navy to bar the entry of provision ships into the Golden Horn. At this critical point, defeatist rumours arose among the besiegers, and Čandarlî advised the lifting of the siege. Zaghanos and Aḳ Shams al-Dīn [*q.v.*], Meḥemmed's spiritual mentor, emerged as strong supporters of the young sultan, who was being blamed for lack of resolution by the soldiery. The preparations for the final general assault were made by Zaghanos. On 20 Djumādā I 857/29 May 1453, the city was taken by assault [see istanbul. I] and the consequences of an *ʿanwatan* conquest were inevitable [see ḥarb]. Meḥemmed regretted the ruin of the imperial city, which he immediately declared his capital. Throughout his reign, one of his main concerns was to build and repopulate it [see istanbul. I.]. The Podestà of the Genoese Pera [see ghalata in Suppl.] surrendered *ṣulḥan* on the same day. Meḥemmed granted an *ʿahd-nāme* on 1 June 1453 which guaranteed *amān* [*q.v.*] and certain communal privileges for the indigenous non-Muslim population as *dhimmī* subjects of the Ottoman state and capitulary privileges for the Genoese merchants. Meḥemmed's first acts after the victory were the arrest of Čandarlî and the execution of Prince Orkhan, who had fought against Meḥemmed on the walls. Zaghanos was made grand vizier.

By the conquest of *Ḳusṭanṭīniyya al-ʿUẓmā* [see kusṭanṭīniyya], as it was designated in Islamic tradition, Meḥemmed II assumed an unprecedented charisma and claimed to be the sole "holder of the sword of the *ghazāʾ* " in the Islamic world (in his *fatḥ-nāme* to the Sultan of Egypt; Ferīdūn, i, 236). *Ghazāʾ* indeed became the legitimising principle of the Ottoman sultan even against his Islamic rivals. Muslim rulers who resisted or challenged him

(Anatolian Turcoman rulers, the Aḳ Ḳoyunlu Uzun Ḥasan [*q.v.*] and the Mamlūk sultan of Egypt) were declared to be acting against the true interests of Islam by hindering his *ghazā*ʾ activities. This assumption would lead the Ottomans to claim supremacy throughout the whole Islamic world in the 10th/16th century (see *Camb. hist. of Islam*, i, 320-3). Also, by declaring himself the *Ḳayṣar*, the sole heir to the Roman Empire, as the possessor of the imperial city, Meḥemmed believed that he could eliminate all the members of the Byzantine imperial families (Ibn Kamāl, vii, 86, 113) and lay claim to all the territories once under the eastern Roman Empire, including the Balkans, the southern coasts of the Crimea and Italy. Following Byzantine tradition, he claimed the supremacy of Constantinople over Rome, and his taking of Otranto in 885/1480 was considered a prelude to the conquest of Italy. The conquest of Rome, symbolised as *Ḳîzîl Elma*, the Golden Globe, remained as the ultimate goal for the Ottoman *ghazā*ʾ ideology. Meḥemmed's use of historical traditions and images served as legitimation of his efforts at conquest. Again, in order to legitimise his campaigns to annex the Serbian despotate, he always cited his inheritance rights through the marriage of his predecessors with Serbian princesses [see BĀYAZĪD I]. On the other hand, the revival of the first Ottoman Empire as founded under Bāyazīd ((791-804/1389-1402) definitely motivated the Conqueror in his conquests (Ibn Kamāl, vii, 288).

Although his conquering activities were determined basically by his plan to build up a centralist empire in the Balkans and Anatolia, the course of his military actions followed historical circumstances (Babinger's work, *Mehmed the Conqueror and his time*, is the latest attempt to establish a chronology of events; for a review of it, see Inalcik, *Mehmed*, in *Speculum*, xxxv [1960], 408-27; A. Pertusi, *La caduta*; Inalcik, art. *Mehmed II*, in *İA*, v, 510-12). In the last analysis, Meḥemmed's wars appear to have been motivated by his plan to establish his control of the Straits, the Black Sea and the Aegean, the Balkans north to the Danube and the principalities in the lower Danubian basin, as well as central Anatolia and the lands west of the Euphrates. His main interest was in the west. During the fourteen-year period after 1453, Meḥemmed made a series of campaigns in Europe to eliminate the Balkan dynasts: the Serbian despot (1454-9), the Greek despots and Latin seigneurs in the Morea and central Greece (1458-60), the Bosnian king (1463-4) and Iskender Beg [*q.v.*] in Albania (1465-7). He was not so successful against the Rumanian principalities beyond the Danube. While Wallachia renewed its submission (866/1462) [see EFLĀḲ], Moldavia (Ḳara-Boghdan [see BOGHDĀN]) under Stephen the Great put up a fierce resistance (881/1476). Meḥemmed's campaigns in the Balkans brought him into confrontation with two powerful rivals, Hungary, which considered Serbia, Bosnia and Wallachia to be under its protection, and Venice, which had extensive territorial and commercial interests in the Aegean basin (where he campaigned in 861-3/1457-9), in the Morea (862/1458 and 864/1460), and in Albania (867-84/1463-79). Constantly attempting to mobilise the whole of Christendom in a crusade in cooperation with the Popes, Venice and Hungary confronted Meḥemmed in Serbia (his defeat at Belgrade, 860/1456) and in Bosnia (Hungarian capture of Jajce, 868/1463). The alliance of Venice and Hungary in 867/1463 resulted in what was known as the Long War against Venice (867-84/1463-79), and hostilities with Hungary lasted until Meḥemmed's death (see Setton, *The Papacy and the Levant*, ii, 231-363). The Venetian Long War, which cost Venice Euboea (Eğriboz [*q.v.*], 875/1470) and Ishkodra [*q.v.* in Suppl.] (Shkodër), as well as its trade with the Ottoman Empire, ended in a humiliating peace for Venice, which had to pay an annual tribute of 10,000 gold pieces (2 Dhu 'l-Ḳāʿda 883/25 January 1479). Meḥemmed's complete control of the passage through the Straits, with the construction of Boghaz-Kesen (1452), Ḳalʿa-yi Sulṭāniyye and Kilīdülbaḥr (868/1463-4), and the fortification of Bozdja Ada (Tenedos), which had already enabled him to force the Genoese, Moldavian and Greek rulers to pay tribute (858-60/1454-6), put Istanbul out of reach of Venetian seapower. Later on, taking advantage of anti-Genoese developments in the Crimea, he occupied Amasra (Amastris, 863/1459), Kaffa and Azak (880/1475), Anapa and Copa (884/1479). With the conquest of the Greek empire of Trebizond and the occupation of the Isfendiyārid principality, with Sinope and Kastamoni, in 865/1461, he turned the Black Sea into an Ottoman lake. In 879/1474 his navy consisted of 92 galleys (*ḳadîrgha*), 5 galleots (*ḳalyata*), 59 horse-transports (*at gemileri*) and a number of small boats. Besides these *mīrī* ships which were based at Gelibolu (Gallipoli) [*q.v.*] there were a number of privateers. However, Meḥemmed always felt that his navy could not challenge the Venetian sea power (Babinger, *Mehmed*, 448-50). In 885/1480 his fleet of Gallipoli attacked Rhodes, and that of Avlonya (Vlorë) attacked Otranto. The siege of Rhodes (Muḥarram-Djumādā II 885/May-August 1480) failed, but Otranto was captured (4 Djumādā II 885/11 August 1480).

Keeping Hungary and Venice neutral with peace talks over the period 873-8/1468-73, Meḥemmed focused his attention on central Anatolia, where the dynastic disputes among the Ḳaramānids had given a pretext to the rising Aḳ Ḳoyunlu (Woods, *The Aqquyunlu*, 100-14) to extend their influence in the region. The Ottoman-Aḳ Ḳoyunlu rivalry developed into an extremely dangerous crisis for Meḥemmed, since Uzun Ḥasan [*q.v.*] and Venice attempted to make a concerted attack and to bring together all the small states in the Levant into an anti-Ottoman coalition (Inalcik, art. *Mehmed II*, in *İA*, v, 523-9; Babinger, *Mehmed*, 267-327, Setton, *op. cit.*, 315-45). Meḥemmed's victory at Bash-kent (16 Rabīʿ I 878/11 August 1473) was indeed a turning point in his whole career and confirmed the Ottoman annexation of the Ḳaramānid territory (863/1468). However, it took six years to subdue the Turcoman tribes in the Taurus range. This also led to an open rivalry between Meḥemmed and the Mamlūks, who claimed a protectorate over the Ḳaramānids and saw a challenge in Meḥemmed's alliance with and protection of the Dhu'l-Ḳādirids. It was said (Ṭursun Beg, *Taʾrīkh*, text, fols. 157b-158a) that Meḥemmed's last campaign, on which he was engaged when he died (4 Rabīʿ I 886/3 May 1481), was against the Mamlūks rather than against the Hospitallers of Rhodes.

Meḥemmed II is the true founder of the classical Ottoman Empire, establishing its territorial, ideological and economic bases. Territorially, he organised under his autocratic rule the lands between the Danube and the Euphrates as a centralised domain which remained for four centuries afterwards the solid core of the Ottoman Empire. Byzantine tradition and experience taught him to endeavour to establish full control over the Danube, the Straits, the Aegean and the Euphrates as the natural borders of his empire. By fortifying the Dardanelles and the

Bosphorus, he achieved a compact empire, duly taking the title of the sultan of the two continents, Anatolia and Rumili, and the *khākān* of the two seas, the Black Sea and the Mediterranean. His centralist empire came into being by the suppression or reduction under central control of the local aristocratic landed families in the Balkans and Anatolia. Such families either became regular Ottoman *tīmār*-holders or were totally replaced by the sultan's *ḳuls* [*q.v.*]. His sweeping "land reform" of 883/1478, in which a great number of the freehold (*mülk*) and *wakf* lands in the control of such hereditary landlords were turned into state lands (see Inalcik, *op. cit.*, at 533), constituted his major move in this direction. Also, by emerging as the greatest *ghāzī*, he overshadowed and reduced the autonomy of the principal frontier beg families who had thus far played a determining role in the empire's politics [see MEḤEMMED I and MURĀD II]. In brief, Meḥemmed II created in his person the typical autocratic Ottoman *Pādishāh*.

In his efforts to establish a bureaucratic machinery, the principal tool of his centralist empire, Meḥemmed employed indiscriminately experts of various origins, Persian Azerīs, Arabs, Greeks, Jews, Italians, as well as native Ottoman Turks (*rūmīs*). In this, as attested by his *ḳānūn-nāme* [*q.v.*] of state organisation and by biographies of the *nishāndjīs* [*q.v.*] and the *defterdārs* [*q.v.*] of his reign, the *ʿulamāʾ* appear to have played a major role, as before. However, such *ʿulamāʾ* only made up a part of his bureaucracy, and were unable to interfere in the sultan's autocratic and independent conduct of state affairs. Meḥemmed appears to have been the first Ottoman, perhaps the first Muslim ruler, to codify state laws based on the ruler's independent law-making power, *ʿurf* [*q.v.*], apparently inspired by a Turko-Mongol tradition. His two codes [see ḲĀNŪNNĀME] dealt with state organisation, penal law, and the relations of the state and the "military" class with the taxpaying subjects, the *raʿāyā*. The latter law code, considered as the basis of a "just rule", strictly defines the impositions upon the *raʿāyā*. Meḥemmed's law codes remained the core and basis of subsequent Ottoman laws to the 11th/17th century.

With the guidance of the great astronomer ʿAlī Ḳūshdjī [*q.v.*], Meḥemmed also organised religious teaching (*tadrīs*, *ḳaḍāʾ*) and the *ʿulamāʾ* hierarchy (*ṭarīḳ*) in the Ottoman Empire. It was his unprecedented charisma as *Abu 'l-Fatḥ* which enabled him, with the help of a host of talented leaders from East and West, to put into place a centralist bureaucratic empire perhaps never before so perfectly accomplished in Islamic history. His rationalistic and practical education under a legist, Mollā Khosrew [*q.v.*], his faith in the support of God and the inspiration of his *shaykh*, Aḳ Shams al-Dīn [*q.v.*], his espousal of a combination of Islamic and Roman imperial traditions, might explain his extraordinary accomplishments. But no less important in the foundation of the empire appears the fact that the peasant masses, exploited by the local rent-gathering landlords, military and religious, who were operating free from any control in the Balkans and Asia Minor, tacitly or openly welcomed the restoration of a strong centralist power as a guarantee of protection. The sultan's edicts always professed that the imperial power was with "the poor" (*yoḳsullar*) against "the powerful" (*kudretlüler*). His bureaucratic apparatus, the land surveys [see TAḤRĪR] and the law codes reveal emphatically the concern to maintain peasant families in possession of small farm exploitations, the so-called *khāne bā čift* units. Meḥemmed's "abrogation", *naskh*, measures with respect to the exploitative *wakfs* and *mülks*, meant more than just a military reform. It also meant the extension of state ownership and a closer protection and control by the state of the peasant producer and labourer against feudal exploitation.

On the other hand, the native urban populations, Greeks and Slavs, and the Orthodox Church, do not seem to have resented the establishment of the autocratic rule of the Ottoman *pādishāh*, who was seen as, and called, *basileus* or *czar*. But Meḥemmed was only following his predecessors, or in fact the Islamic tradition, when he re-installed the Greek Orthodox Church with all its traditional privileges as an integral part of the Ottoman imperial system (Muḥarram 858/January 1454), while he banned all Latin Catholic organisations, which were under the Roman papacy, from his dominions.

Autocratic principle, which made the sultan's person the one and only source of authority and legitimation and claimed it as the foundation of both state and society (for this political theory expounded by Meḥemmed's contemporary Ṭursun Beg, see text, 2-17), found its full expression under Meḥemmed II. The urban economy and the conditions of craftsmen and merchants, too, were regulated by the sultan through his establishment of bazaars, *bedestāns* (*bazzāzistān*), *ḳapans* (*ḳabbān*), weighing stations (*ḳanṭār*), customs and market regulations, and his periodic issuance of new silver coins, *akča*, and prohibition of the use of the old ones, which was tantamount to taxing all cash capital in the hands of individuals, thus making a strong impact on the economy. Turning all rice-growing lands into state-owned properties and organising labour on them under close state control (Inalcik, *Rice cultivation*, 78-113) well demonstrates his autocratic handling of economic issues (for the basic source on his economic regulations, see Anhegger and Inalcik, *Ḳānunnāme*; also ISTANBUL, at IV, 531-4; Inalcik, *Türkiye'nin iktisadî vaziyeti*, 676-84), Meḥemmed fully espoused the theory that the monarch's presuming to organise society and economy as complementary to the state was based on the ruler's ultimate duties of *ghazāʾ*, making God's word, Islam, to rule over the world, and, as *imām*, to guide and take care of his subjects' well-being, conduct and salvation in this and the next world. As is repeatedly underlined in the sultan's edicts, "the *raʿāyā* were a trust (*wadīʿa*) of Allāh to the ruler." The Marxist interpretation, however, is that all these superstructural and ideological assumptions were designed to serve the exploitation of the direct producers by the Ottoman "feudal" state and classes (Moutafchieva, *Agrarian relations*; Werner, *Die Geburt*, 273-358).

MEḤEMMED III, thirteenth Ottoman Sultan (1003-12/1595-1603). He was the son of Murād III [*q.v.*] and his Albanian *khāṣṣekī*, Ṣafiyye [*q.v.*], born early in the first decade of Dhu 'l-Ḳaʿda 973/20-29 May 1566 in the summer-camp on Bozdğ near Manisa when his father was *sandjak-begi* of Ṣarukhān, his birth being announced to his great-grandfather Sulaymān I [*q.v.*], who named the baby, at Pazardjik as he marched towards Hungary, on 13 Dhu 'l-Ḳaʿda 973/1 June 1566 (Selānīkī, 22).

After his father's accession on 8 Ramaḍān 982/22 December 1574, he lived with his mother and sisters in the New Palace in Istanbul. In 990/1582 his circumcision, to which monarchs of East and West had been invited, was celebrated with feasting and pageants of unrivalled magnificence (splendidly recorded in Topkapı Museum, ms. Hazine 1344), lasting from 6 Djumādā I-3 Radjab/29 May-24 July, the operation being performed by Djerrāḥ Meḥmed Pasha on the fortieth evening. The break-up of Murād's life with Ṣafiyye culminated in the death of his mother Nūr Bānū[*q.v.*] on 22 Dhu 'l-Ḳaʿda 991/7 December 1583 and the departure on 9 Dhu 'l-Ḥidjdja/24 December of Meḥemmed to Manisa, the last heir-apparent to be *sandjak-begi* of Ṣarukhān. During his 11 years' residence there, four of his five sons were born; Selīm in 993/1585, died 3 Ramaḍān 1005/20 April 1597; Maḥmūd in *ca.* 995/1587; the future Aḥmad I [*q.v.*] on 12 Djumādā II 998/18 April 1590; the future Muṣṭafā I [*q.v.*] in 1000/1591. He had a fifth son Djihāngīr, who died young in 1011/1602, and six daughters. Upon Murād III's death on 5 Djumādā I 1003/16 January 1595, in great secrecy Ṣafiyye sent the *Bostāndjî-bashî* Ferhād Agha to Manisa, and Meḥemmed returned to the capital for his accession, followed by his father's funeral, in 16 Djumādā I/27 January. The next day his 19 half-brothers (names listed by Ṣolāḳ-zāde, 621) were executed and laid to rest beside their father. Meḥemmed III was the last Sultan to implement the law of fratricide promulgated by Meḥemmed II [*q.v.*] (see H. İnalcik, in *Cambridge history of Islam*, i, 303). Murād's harem, his dwarfs and jesters, were swept away, and Ṣafiyye, as Wālide Sulṭān, took absolute control over her weak and superstitious son. A donative of 660,000 gold pieces was distributed to the Janissaries.

The reign, lying within the Long War (1593-1606) with the Holy Roman Empire, was disastrous, torn by civil and military disturbances, high inflation and insecure government; there were twelve changes of Grand Vizier, of whom three, Ferhād Pasha, Khādîm Ḥasan Pasha Ṣoḳollî and Yemishdji Ḥasan Pasha [*q.vv.*], were executed. During 1003-4/1595 the princedom of Wallachia was occupied and made into an Ottoman voivodeship, and on 1 Dhu 'l-Ḥidjdja/7 August, Esztergom, under the Grand Vizier Ḳodja Sinān Pasha [*q.v.*], fell to the Imperialists. Next year, 1004/1596, Meḥemmed, influenced by his father's tutor Khodja Saʿd al-Dīn Efendi [*q.v.*] and under pressure from the Janissaries, resolved to lead the army into Hungary, a custom abandoned since the reign of Sulaymān I. On 23 Shawwāl/20 June, with the Grand Vizier Dāmād Ibrāhīm Pasha [*q.v.*], he set out for Eğri [*q.v.*], which fell after a siege of three weeks on 19 Ṣafar 1005/12 October 1596. On 3 Rabīʿ I/25 October a great battle was fought on the plain of Mezö-Keresztes [*q.v.*], and the following evening the Ottomans, reinforced by a Tatar army under their Khān Fetḥ Girāy, were victorious almost at the very moment of defeat, thanks to the strategy of Čighāle-zāde Sinān Pasha [*q.v.*], who was promoted Grand Vizier. The English ambassador Edward Barton was present on the campaign; he, his successor Sir Henry Lello, and the French ambassador François Savary de Brèves were playing important roles in Ottoman policies. On the return march, Ibrāhīm Pasha was reinstated as Grand Vizier at the behest of Ṣafiyye. On 2 Djumādā I/22 December the sultan entered Istanbul, with great rejoicing. However, the violence of the Djalālīs [*q.v.* in Supplement], dissatisfied elements who had gathered under Ḳarā Yazîdjî [*q.v.*], a rebellious press-gang leader conscripting for the campaign, together with the Firārīs, Anatolian *sipāhīs* who had fled before the battle and thus had been deprived of their *tīmārs*, raged until 1603, devastating Anatolia. Peace initiatives were rejected by the Imperialists, who regained Raab on 21 Shaʿbān 1006/29 March 1598. During 1008/1599-1600 the deaths occurred of Saʿd al-Dīn and the poet Bāḳī [*q.v.*], and the murder of Ṣafiyye's Jewish Kira Esperanza Malchi on 17 Ramaḍān/1 April in the course of a rising of the *sipāhīs* against the power of the harem. A similar rising in the capital on 23 Radjab 1011/6 January 1603 took as victims two more Palace officials, Ghaḍanfer Agha [see ḲAPÎ AGHASÎ] and ʿOthmān Agha. As the crippling war with the Empire dragged on, with the castle of Kanizsa [*q.v.*] surrendering to the Ottomans on 13 Rabīʿ II 1009/22 October 1600, in 1012/1603 the Persian Shāh ʿAbbās I [*q.v.*] launched an offensive in the east, taking Tabrīz on 19 Rabīʿ II/26 September. On 27 Dhu 'l-Ḥidjdja 1011/7 June 1603 Meḥemmed, in a fit of suspicious rage, ordered the execution of his eldest son Maḥmūd; he lies buried, with his mother, in a mausoleum beside the Sheh-zāde mosque. Consequently, the child Aḥmad was to succeed his father, who died suddenly, probably after a heart-attack, on 17 Radjab 1012/21 December 1603. His mausoleum is beside Aya Sofya. He composed poetry under the *makhlaṣ* ʿAdlī. During his corrupt reign, chronic inflation (the rate of 60 *aḳčes* to the ducat in 1580 had trebled by 1600) undermined society, and the decline which is evident from the latter years of Sulaymān I reached a critical stage, with the empire close to anarchy.

The events of the reign inspired two works of Meḥmed Nāmïḳ Kemāl [*q.v.*],*Djezmī*, Istanbul 1297, and *Ḳanīzhe*, Istanbul 1290.

(S. A. Skilliter)

MEHEMMED IV, nineteenth sultan of the Ottoman dynasty in Turkey, known as awdjī "the hunter" from his excessive passion for the chase, reigned 1058-99/1648-87.

Born on 30 Ramaḍān 1051/2 January 1642, he was the son of Sultan Ibrāhīm [*q.v.*] and Khadīdja Turkhān Sulṭān. He was placed on the throne in Istanbul at the age of seven after the deposition in 18 Radjab 1058/8 August 1648 of the sensualist and possibly mentally deranged "Deli" Ibrāhīm, at a moment when Ibrāhīm was the sole surviving adult male of the house of ʿOthmān, but in fact, two others of his five or six sons survived also to attain the throne after Meḥemmed, sc. Süleymān II and Aḥmed II [*q.vv.*].

The power in the state was at that time divided between the court, where the old *wālide* Kösem [*q.v.*] and Meḥemmed's mother, the *wālide* Tarkhān, held the reins, and the rebellious soldiery of the Janissaries and the Sipāhīs. The lack of stability in the government at this time is shown by the fact, that, until the nomination of the grand vizier Köprülü Meḥmed [see KÖPRÜLÜ] in 1066/1656, there were no less than thirteen grand viziers. In 1061/1651 the old *wālide* Kösem was strangled and at the same time the resistance of the Janissaries was broken; the régime of the court party that followed under the sultan's mother did not improve the situation. The grand vizierate of Ipshir Muṣṭafā Pasha (1064-5/1654-5 [*q.v.*]), who at first seemed to be the strong man needed, was brought to an early end by his rival Murād Pasha, and in the meantime the Cretan war against Venice was exhausting the resources of the Empire. In Djumādā I 1066/March 1656 a military rebellion forced the sultan to allow the execution of several of his favourite courtiers.

The real strong man proved to be Köprülü Meḥmed Pasha (vizier 1066-72/1656-61), who eliminated immediately the influence of the harem on state affairs and became until his death the real ruler of the empire. His régime began with a Turkish maritime defeat by the Venetians at the Dardanelles, but already in the following year he obtained as *serʿasker* successes in Transylvania and succeeded at the same time in establishing firmly Turkish authority in the Danube principalities; the collaboration with the Khān of the Crimea [see ḲÏRÏM] was here of great value. In 1068/1658 and 1069/1659 he was able to suppress rebellions in Anatolia, and in the Venetian war a great fleet of Venetian ships and other Christian allies did not succeed against the Turkish forces on Crete. After his death (1072/1661), he was succeeded in his office by his son Köprülü Aḥmed Pasha, who completed the work of his father by carrying through the final conquest of Crete (surrender of Ḳandiya [*q.v.*] in Rabīʿ II 1080/September 1669) followed by peace with Venice. In 1071/1661 the war with Austria had begun again, where Sultan Meḥemmed took part in several campaigns, notably that of 1073/1663 in which Újvár (Neuhäusel or Nové Zámky) was taken. In 1075/1664 took place the famous battle of St. Gotthard-am-Raab, where the Turks were beaten by an allied army, a part of which was formed by French troops; still, the peace concluded with Austria in 1075/1664 at Vasvár was favourable for Turkey. In 1083/1672 the sultan took part in the campaign against Poland, after the Ukrainian Cossacks had invoked Ottoman aid against the Polish king; the Polish war, ending in a peace treaty of 1087/1676, strengthened still further the empire's position in the north. Köprülü Aḥmed Pasha died in 1087/1676. Though the sultan, who had developed in the meantime a morose and capricious character, never showed him the same deference as to his father, Aḥmed had been easily able to maintain himself against enemies in the interior, not least by forming new troops, the *beshli* and the *gönüllü* [*q.v.*], who were far more reliable than the Janissaries and Sipāhīs. He had not been able, however, to put an end to the extravagant luxury of the court, which wasted enormous sums. The sultan had an abnormal liking for big hunts, that were organised at enormous cost in the environs of Edirne, which town he preferred as a residence to Istanbul [see further, KÖPRÜLÜ].

After Aḥmed's death the sultan did not himself take the affairs of state in hand; he appointed Ḳara Muṣṭafā Pasha Merzifonlu [*q.v.*] as his grand vizier. The latter continued in an unnecessary way the tradition of warfare; in 1088/1677 and 1089/1678 he obtained successes against the Cossacks, behind whom the Muscovite power now began to gain in importance in Turkish affairs. In 1093/1682 war broke out again with the Austrian monarchy and led to the second Turkish siege of Vienna (18 Radjab-20 Ramaḍān 1094/12 July-12 September 1683), ending in a Turkish débâcle, thanks to the intervention of the Polish king John Sobieski. This disaster cost Ḳara Muṣṭafā his office and his life, and at the same time the influence of the palace became again predominant. The grand viziers now following proved unequal to their task and in the years 1096-8/1685-7 nearly the whole of Hungary was lost to the Austrian armies (Turkish defeat at Mohács [*q.v.*] on 11 Shaʿbān 1098/22 June 1687). At the same time, the

hostilities with Venice had been reopened in the Morea [*q.v.*] and in the Archipelago.

All these disasters caused a revolt of the troops in the field; they marched on the capital in Dhu 'l-Ḳaʿda 1098/September 1687 under Siyāwush Pasha of Aleppo. This time the sultan himself fell a victim to them, and was made to bear the responsibility for the defeats. To satisfy popular demands and to forestall further rebellions, Meḥemmed was deposed on 2 Muḥarram 1099/8 November 1687 by the *ḳāʾim-maḳām* Fāḍil Muṣṭafā Pasha Köprülü, the *Shaykh al-Islām* Dabbāgh-zāde Meḥmed Efendi and other religious dignitaries. He is said to have accepted the decision gracefully, and he retired to his beloved Edirne, dying there on 28 Rabīʿ II 1104/6 January 1693. He was buried in Istanbul by the side of his mother in the Yeñi Djāmiʿ.

(J. H. Kramers*)

MEḤEMMED V RESHĀD, thirty-fifth and penultimate Ottoman Sultan, was born on 2 November 1844, the son of Sultan ʿAbd al-Madjīd [*q.v.*].

During the reign of his brother ʿAbd al-Ḥamīd II [*q.v.*] he lived in seclusion: his very existence inspired ʿAbd al-Ḥamīd with such terror that even the mention of the name Reshād had to be avoided in his presence (cf. Snouck Hurgronje, *Verspreide Geschriften*, ii, 232). He was a man of mild character, who owed his accession to the throne (27 April 1909) to the victory of the Young Turks (the Committee of Union and Progress [see ITTIḤĀD WE TERAḲḲĪ DJEMʿIYYETI]) over the mutineers who had briefly ejected them from power in "the incident of 31 March" (13 April 1909 in the Gregorian calendar), and to their subsequent decision to depose ʿAbd al-Ḥamīd II. Meḥemmed Reshād was a pious man; he felt particular sympathy for the Mewlewī Ṣūfī order (Ali Fuat Türkgeldi, *Görüp işittiklerim*, 123); he prized politeness and good food and enjoyed simple pleasures. As the first Ottoman constitutional monarch, he spent most of his reign doing the bidding of the Unionist party, which achieved total power in January 1913. He was twice called upon to second government policy: in 1911 he undertook a tour of Ottoman possessions in the Balkans, but was unable to prevent another Albanian rising; and after the outbreak of the First World War he proclaimed the *djihād* against the Allies, but did not sway their Muslim subjects. It can be said that he exerted no influence on the course of events during his reign. His residence, the Dolmabahçe Palace on the Bosporus, was as empty of visitors as the Yîldîz Palace had been full during the reign of his predecessor (Halid Ziya Uşaklıgıl, *Saray ve ötesi*, 134-6).

At the very beginning of his reign, Turkey lost her last vestige of authority over Bosnia and Herzegovina by Austria-Hungary's annexation, and over Bulgaria by its declaration of independence (5 October 1909). The cabinets under Ḥüseyn Ḥilmī (until 18 January 1910) and Ismāʿīl Ḥaḳḳī Pasha [*q.v.*] (until 29 September 1911) were not able to bring about a peaceful situation in the interior (revolts in Albania and Yaman). Ḥaḳḳī Pasha had to resign as a result of the declaration of war by Italy. Under the grand vizierate of Saʿīd Pasha [*q.v.*], the Italian war led to the loss of Tripoli, confirmed by the treaty of Ouchy (15 October 1912). Saʿīd Pasha resigned, and when Sultan Meḥemmed Reshād asked him why he had done so, given that he had won a vote of confidence in the Chamber, he replied "They had confidence in me, but I had no confidence in them" (İbnülemin Mahmud Kemal İnal, *Osmanlı devrinde son sadrıazamlar*, vii, 1089). Peace was signed under the anti-Unionist cabinet of Aḥmed Mukhtār Pasha, but in the same month the Balkan states declared war on the Ottoman Empire. As Ottoman armies suffered immediate defeats, Aḥmed Mukhtār Pasha was forced to resign, and his successor, the veteran anti-Unionist statesman Kāmil Pasha soon showed an inclination to conclude a disastrous peace through the mediation of the European powers (Conference of London). Then in January 1913, a coup d'état brought in a Unionist government under Maḥmūd Shewket Pasha [*q.v.*]. Hostilities were reopened unsuccessfully, but the defeat of Bulgaria at the hands of its former Balkan allies allowed the Ottomans to recapture Edirne or Adrianople on 22 July 1913. In the meantime, Maḥmūd Shewket had been murdered (28 June) by anti-Unionists, but this did not loosen the Unionist grip on power; his place was taken by Saʿīd Ḥalīm Pasha, whose government signed the peace treaties with Bulgaria (29 September 1913), Greece (14 November) and Serbia (14 March 1914). The Ottoman Empire thus lost all its European possessions west of the Meriç [*q.v.*] (Maritza) river, and also the Aegean islands and Crete.

However, it was not the grand vizier, but Unionist leaders like Enwer Bey and Ṭalʿat Bey [*q.vv.*] who came to control the destiny of the Empire. Enwer's pro-German views triumphed over the hesitations of the government, which had decided to stay neutral when the First World War broke out. A secret treaty was signed with Germany; the German battleships *Goeben* and *Breslau* were given refuge in the Straits (where they were formally handed over to the Ottomans); and finally, the Ottoman fleet under the command of the German admiral Souchon bombarded Russian harbours in the Black Sea (29 and 30 October 1914). This led to the Allied declaration of war, in which Enwer Pasha became Deputy Commander-in-Chief (deputising nominally for the Sultan), while Ṭalʿat Pasha became grand vizier in February 1917. Initial Ottoman offensives were repelled (Sarîkamîsh operation against the Russians; Suez operation against the British), but the Turks successfully defended the Dardanelles (the Allied forces which had landed on the Gallipoli peninsula were all withdrawn by January 1916); they were at first successful in ʿIrāḳ (surrender of General Townshend at Kūt al-ʿAmāra [*q.v.*], April 1916), and fought also in Palestine, Macedonia and Galicia. Before the end of the war, as Ottoman armies were being gradually worn down and while the country was prey to increasing privations, Meḥemmed V died on 2 July 1918. His last official functions were to welcome the Austro-

Hungarian Emperor Charles on a state visit to Istanbul in May, and, a few days before his death, to visit the Prophet's relics at the Topkapı Palace. He was a sad and ineffective figure: "Is Edirne ours?", he asked after the city had been recaptured; and his comment on the effects of the Great War was "The Palace excelled in two things: prayers and food. Both have gone off" (*Görüp işittiklerim*, 269, 268).

Bibliography: The events of the reign are related in all standard histories, e.g. S.J. Shaw and Ezel Kural Shaw, *History of the Ottoman empire and modern Turkey*, ii, Cambridge 1977; B. Lewis, *The emergence of modern Turkey*, Oxford 1961, and there are references to Meḥemmed V Res̲h̲ād in many memoirs, especially those of his two Chief Secretaries: Halid Ziya Uşaklıgıl, *Saray ve ötesi*, Istanbul 1965, and Ali Fuad Türkgeldi, *Görüp işittiklerim*, Ankara 1951, and of his Chief Chamberlain, Lütfi Simavi, *Osmanlı sarayının son günleri*, Istanbul n.d. (the edition in modern Turkish of his *Sultan Mehmet Reşad ve halefinin sarayında gördüklerim*). The Sultan's decrees appointing grand viziers, as well as biographies and evaluations of the latter, are to be found in İbnülemin Mahmud Kemal İnal, *Osmanlı devrinde son sadrıazamlar*[2], Istanbul 1966. See also P. Mansel, *Sultans in their splendour: the last years of the Ottoman world*, London 1988; *İA* art. *Mehmed Reşad* (Enver Ziya Karal). (A. J. Mango)

MEḤEMMED VI WAḤĪD AL-DĪN (Waḥdeddīn), thirty-sixth and last Ottoman Sultan, was born on 14 January 1861.

He was the son of Sultan ʿAbd al-Mad̲j̲īd [*q.v.*] and succeeded to the throne on 3 July 1918, after the death of his brother Meḥemmed V Res̲h̲ād [*q.v.*], the former heir to the throne Yūsuf ʿIzz al-Dīn, son of Sultan ʿAbd al-ʿAzīz, having died in 1916. In November of the same year, Waḥdeddīn, as the new heir, represented the Sultan at the funeral of the Austro-Hungarian Emperor Francis Joseph. In December 1917 he paid an official visit to Germany. On both occasions he made a favourable impression on his suite (on his German visit he was accompanied by Muṣṭafā Kemāl Pas̲h̲a, the future founder of the Turkish Republic [see ATATÜRK]). Waḥdeddīn was presumed to be critical of the Unionist party, in view of his closeness with his brother-in-law Dāmād Ferīd Pas̲h̲a [*q.v.*], who was a leading member of the Liberal party (*Iʾtilāf ve Ḥürriyyet*) (Lütfi Simavi, *Osmanlı sarayının son günleri*, 265). Having reappointed the Unionist grand vizier Ṭalʿat Pas̲h̲a on his accession, Waḥdeddīn accepted his resignation when the collapse of the Macedonian and southern fronts forced the Ottoman empire to seek an armistice with the victorious Allies. He sought to replace him by the veteran statesman Tewfīḳ Pas̲h̲a, to whom Waḥdeddīn was related by marriage and whose loyalty to the dynasty he therefore trusted. However, as Tewfīḳ Pas̲h̲a was unable to form a government, the Sultan appointed Marshal Aḥmed ʿIzzet Pas̲h̲a, a veteran soldier known for his opposition to the war. The new grand vizier rejected Waḥdeddīn's suggestion that Dāmād Ferīd Pas̲h̲a be included in the Ottoman delegation which signed the armistice agreement at Mudros [see MONDROS] on 30 October 1918. As the Allies prepared to occupy the remnants of the Empire, Aḥmed ʿIzzet Pas̲h̲a fell foul of the palace and resigned as a result of his refusal to dismiss Unionist sympathisers from the cabinet. He was replaced first by Tewfīḳ Pas̲h̲a and then on 4 March 1919 by Dāmād Ferīd Pas̲h̲a, when the former was also seen as insufficiently diligent in rooting out Unionists.

The new grand vizier encouraged the Sultan in a policy of seeking to win the confidence of the Allies by meeting their demands. However, the decision of the Allies to allow Greek forces to land in Izmir on 15 May 1919 led to the growth of a Turkish national resistance movement which opposed the policy of appeasement pursued by the Sultan and his government. Muṣṭafā Kemāl Pas̲h̲a, who was appointed by the Sultan as Inspector-General of the 9th (later 3rd) Army in Anatolia, and landed in Samsun on 19 May 1919, assumed the leadership of this movement. Having disregarded the order to return to Istanbul and having resigned from the army, Muṣṭafā Kemāl succeeded in cutting off Anatolia from the capital, thus forcing the resignation of Dāmād Ferīd Pas̲h̲a on 5 October 1919. This was followed on 7 November by the election of a new parliament in which the nationalists were represented. The attempts of two subsequent grand viziers, ʿAlī Riḍā Pas̲h̲a and Ṣāliḥ Pas̲h̲a, to reach an accommodation with Muṣṭafā Kemāl's nationalists, who moved their headquarters to Ankara on 27 December, came to an end when the Allies placed Istanbul under military occupation on 16 March, and arrested a number of nationalist sympathisers. On 5 April, Waḥdeddīn re-appointed Dāmād Ferīd Pas̲h̲a as grand vizier, overruling contrary advice with the words "If I so desire, I can appoint the Greek or the Armenian patriarch, or the Chief Rabbi" (Ali Fuad Türkgeldi, *Görüp işittiklerim*, 261). On 11 April the Sultan dissolved parliament, which had itself decided to adjourn. On the same day, the *S̲h̲ayk̲h̲ al-Islām* ʿAbd Allāh Dürrī-zāde issued a number of *fatwās* outlawing the nationalist resistance in Anatolia (texts in Ibnülemin Mahmud Kemal İnal, *Osmanlı devrinde son sadrıazamlar*, xiii, 2054-5).

Nevertheless, a number of deputies from the dissolved parliament made their way to Ankara and, together with other nationalist representatives, met as the Grand National Assembly (*Büyük Millet Med̲j̲lisi*) on 23 April, which selected its own government (*Id̲j̲rāʾ Wekīlleri Heyʾeti*, Committee of Executive Commissioners) from among its own members. However, the Assembly sent a petition to Waḥdeddīn in which it proclaimed its loyalty to the Sultan and Caliph (extracts in Sabahattin Selek, *Anadolu ihtilâli*, Istanbul 1963, 289). As an open clash developed between the governments in Ankara and in Istanbul, the latter trying unsuccessfully to suppress the nationalist movement by sending troops against it and fomenting risings in Anatolia, Waḥdeddīn ratified on 24 May 1920 the death sentence passed *in absentia* on Muṣṭafā Kemāl. The signature by Ottoman delegates of the peace treaty of Sèvres on 10 August 1920 was repudiated by the Grand National Assembly. After the first major nationalist victory against the Greeks at the first battle of Inönü, the GNA voted a new constitution on 29 January 1921 which was based on popular sovereignty. Allied moves to establish contact with the Ankara government led to the resignation and departure for Europe of Dāmād Ferīd Pas̲h̲a, drawing from the Sultan the comment "The rascal brought the state to these straits and then left" (*Son sadrıazamlar*, xiii, 2067). Tewfīḳ Pas̲h̲a, who became grand vizier for the last time (21 October 1920), deferred to the representatives of the Ankara government at the unsuccessful London conference in February-March 1921.

The final success of the nationalists, whose forces defeated the Greeks and entered Izmir on 9 September 1922, brought about the armistice of Mudanya [*q.v.*] (11 October 1922), to which the Sultan's government was not a party. A nationalist

commissioner, Reʾfet Pas̲h̲a, arrived in Istanbul and warned the Sultan to confine himself to the palace and receive no visitors, advice which the Sultan disregarded (*Son sadrıazamlar*, xiv, 2097-8). Matters were brought to a head when the Allies invited the Sultan's government, along with the Ankara government, to send delegates to the peace conference in Lausanne. Rejecting any rival government, the GNA passed a law on 1 November 1922, separating the offices of sultan and caliph, and declaring the Ottoman sultanate abolished from 16 March 1920 (the date of the Allied occupation of Istanbul). Tewfīḳ Pas̲h̲a resigned accordingly on 4 November. At his last *selāmlïḳ* on 10 November, which was attended by a handful of courtiers, Waḥdeddīn was given only the title of caliph in the *k̲h̲uṭba*. Believing his life to be in danger, he asked the British commander General Sir Charles Harington to arrange his departure abroad. He was smuggled aboard HMS *Malaya* and left Turkey on 17 November 1922. The next day, the GNA divested him of the caliphate, in favour of his uncle ʿAbd al-Mad̲j̲īd, son of Sultan ʿAbd al-ʿAzīz. Having gone first to Malta, the ex-Sultan proceeded to Mecca as the guest of King Ḥusayn. From here he launched a proclamation to the Islamic world, in which he maintained that the separation of the caliphate from the sultanate was contrary to the *s̲h̲arīʿa* (text in *OM*, ii, 702-5). This appeal found hardly any response in the Islamic world. The last Ottoman Sultan left Mecca again, and went to live in San Remo, where he died on 16 May 1926. In 1924, he had even recognised King Ḥusayn's claim to the caliphate.

Waḥdeddīn has been described by his courtiers as short-tempered, pious, intelligent, but fearful, hesitant and unwise in his judgments, above all in the trust which he placed in his brother-in-law Dāmād Ferīd Pas̲h̲a. Throughout his reign he paid lip-service to the Ottoman constitution, while being inspired by a desire to secure the survival of the dynasty. He had not studied Arabic and Persian, but was credited with a knowledge of *fiḳh*. He was fond of music, and composed Turkish songs. His failure to grow a beard after his accession was considered a break with tradition.

MEḤKEME [see MAḤKAMA].

MEḤMED, MEHMET. [On the use of these Turkish forms of the name Muḥammad in this *Encyclopaedia* see MEḤEMMED].

MEḤMED ʿĀKIF, modern Turkish Mehmet Akif Ersoy (1873-1936), Turkish poet, patriot and proponent of Pan-Islamism.

He was born in Istanbul of a father, Meḥmed Ṭāhir, originally from Ipek in northern Albania (modern Peć in Yugoslavia) and a mother of Buk̲h̲āran origin. He was educated in the classical Islamic tongues, Turkish, Arabic and Persian, in Istanbul, graduating from the Fātiḥ *rüs̲h̲diyye* or secondary school and continuing his higher education at the School of Political Science and then the Civilian Veterinary School. He served as a veterinary surgeon in the Ministry of Agriculture for 20 years, travelling extensively in Anatolia, the Balkans and the Arab lands, whilst at the same time teaching, including lecturing on literature at Istanbul University; and after his resignation from government service in 1913, he taught in various schools and preached in the mosques of Istanbul.

He had already shown an enthusiasm for Pan-Islamism at the time of the Young Turk Revolution and during the Balkan Wars of 1912-13, hence in 1915, during the First World War, when Turkey had entered the war on the side of the General Powers, ʿĀkif was invited to visit Germany by the Kaiser's government to study and report on the state of Muslim prisoners-of-war in that country; this trip gave him his first contact with the West and its differing attitudes and conditions from those of the Islamic East. Then in 1917 he was sent by the Committee of Union and Progress [see ITTIḤĀD WE TERAḲḲĪ D̲J̲EMʿIYYETI], after the outbreak of the S̲h̲arīf Ḥusayn of Mecca's revolt, on a mission to the pro-Turkish Āl Ras̲h̲īd of Ḥāʾil in Nad̲j̲d. He further became Secretary-General of the *Dār ül-Ḥikmet ül-Islāmiyye* attached to the *S̲h̲eyk̲h̲ ül-Islām*'s office, but lost his post in 1919 when he called for resistance against the Greek forces entering Anatolia in the wake of the October 1918 Mudros Armistice. He now threw in his lot with the Nationalist cause under Muṣṭafā Kemāl (Atatürk) [*q.v.*], and joined the Grand National Assembly (GNA) in Ankara in 1920 as deputy for Burdur. In the following year, the Nationalist Minister of Education, Ḥamdullāh Ṣubḥī Tanrıöver (1886-1966), persuaded ʿĀkif to compose a stirring Independence March (*Istiḳlāl mars̲h̲ï*), which was immediately adopted as the Turkish National anthem. He was still concerned, also, with religious affairs, as a member of an Islamic research committee (*Tedḳīḳat we teʾlīfat-i islāmiyye end̲j̲ümeni*) in the Ministry of *S̲h̲arīʿa* and *Ewḳāf*. But as a devout Muslim and convinced Pan-Islamist, he became increasingly concerned about the trend of events after the Nationalist triumph, with the abolition of the caliphate in March 1924, the abolition of the office of *S̲h̲eyk̲h̲ ül-Islām*, of the Ministry of *S̲h̲arīʿa* and *Ewḳāf*, and of the *S̲h̲arīʿa* itself, and of the closing of all the *madrasas* in the spring of 1924. Unlike the ideologist of Pan-Turkism, Ḍiyāʾ (Ziya) Gök Alp [*q.v.*], ʿĀkif was unable to adjust his ideas to the new, secularist Nationalist ideals, for he had still hoped that the new Turkey could be the focus of Pan-Islamic aspirations.

In the 1923 elections, he did not get a seat in the GNA, and at the age of 50 was jobless and virtually pensionless. Hence in October of that year, he left for Egypt to stay with an old friend, the Egyptian Prince ʿAbbās Ḥalīm (d. 1934), and in 1925 settled there, teaching Turkish in Cairo, but by now, as a disappointed man, producing little of his own literary work. He returned to Istanbul after eleven years, a sick man, and died there on 27 December 1936.

Already as a student, ʿĀkif had been a voracious reader of the Islamic classics, with a particular love for the poetry of Fuḍūlī, Ibn Fāriḍ and above all Saʿdī, and also of French Romantic literature. He published Turkish translations of the Persian classics in the *T̲h̲erwet-i Fünūn* from 1898 onwards, and his own poetry in the *Resimli Gazete* from 1896 onwards. After 1904, he seems really to have found his artistic feet, and he began to write poetry on social themes, showing a sympathy with the depressed classes of society,

but was unable to publish these in the period of the Ḥamīdian censorship, until the Revolution of July 1908 opened the floodgates for publication. ʿĀkif and his friend Es̲h̲ref Edīb began to publish the *Ṣirāṭ-i Müstaḳīm*, a conservative journal concentrating on religious and social topics; this periodical soon began to have a wide circulation amongst the Turkish peoples outside the Ottoman lands, including in Russia, and later changed its name to the *Sebīl ür-Res̲h̲ād*. At the same time as he put forward his ideas of Pan-Islamism, he also acquired an interest in Islamic modernism, studying the works of Muḥammad ʿAbduh and of Djamāl al-Dīn al-Afg̲h̲ānī [*q.vv.*]. The popularity of new ideas, such as Pan-Turkism and Pan-Turanianism, Ottomanism and Westernism, in the ferment of ideas preceding the First World War, forced him to rethink and clarify his own principles; but he never compromised his view that the unity of Islam came before separate nationalisms.

From 1911 onwards, he began publishing collections of his poetry as *Ṣafaḥāt* ("Phases"), with a total of seven volumes, the last, entitled *Gölgeler* ("Shadows") containing his work done during the years 1918-33. In these collections, he used a simple Turkish style, and often dwelt on such themes as the present state and future destiny of Islam and on contemporary events. In *Ṣafaḥāt*, v, *K̲h̲āṭiralar* ("Memories") (1335/1917), he attacked "westernisers" and "progressives" who slavishly imitated everything, good or bad, drawn from the West, and especially the poet Tewfīḳ Fikret (d. 1915), whose atheistic poem *Taʾrīk̲h̲-i ḳadīm* ("Ancient history") he regarded as corrupting Turkish youth. ʿĀkif also engaged in translating the Ḳurʾān into Turkish, and this remains a controversial episode in his life. The successor to the Ministry of *S̲h̲arīʿa*, the Directorate of Religious Affairs (*Diyānet Is̲h̲leri Riyāseti*) decided to commission a new translation of and commentary on the Ḳurʾān. ʿĀkif was persuaded, with some misgivings connected with his firm belief in the basic untranslatability of the Holy Book, to undertake the actual translation, but after spending several years of his stay in Egypt at the task, retracted what he had written, fearing that his translation might be used as part of Atatürk's Turkicisation plans in religious matters; the eventual fate of his translation remains a mystery to this day.

Meḥmed ʿĀkif was thus an enthusiastic Muslim but not a fanatic, a conservative in politics who nevertheless openly proclaimed his detestation of ʿAbd ül-Ḥamīd II and Meḥemmed VI and who joined the Nationalist cause; nor did his conservative inclinations prevent him from appreciating Western literature and even Western classical music.

Bibliography: Süleymān Naẓīf, *Meḥmed ʿĀkif*, Istanbul 1924; İbnülemin M. K. İnal, *Son asır türk şairleri*, Istanbul 1931, 91 ff.; M. C. Kuntay, *Mehmet Akif*, Istanbul 1939; Eşref Edib, *Mehmed Akif*, 2 vols., Istanbul 1938-9, 2nd edn. 1962; F. A. Tansel, *Mehmed Akif, hayatı ve eserleri*², Istanbul 1973; Fahir İz, *Mehmed Ākif Ersoy, a biography*, in *Turkish Studies: Continuity and Change*, no. 1, Boğaziçi University, Istanbul 1987. The Introd. by Ömer Riza Doğrul (ʿĀkif's son-in-law) to the roman script edn. of the *Ṣafaḥāt* contains biographical notes of the poet left to his friend Nevzad Ayas, see 10th edn., ed. Ertuğrul Düzdağ, Istanbul 1975, pp. XI-XXII, ʿĀkif's private letters to Mahir İz, his student and friend, and Mahir İz's oral communications to the author. Eşref Edib's book contains almost complete bibliographical data on ʿĀkif's poems, articles, translations, etc. (FAHIR İZ)

MEḤMED ʿALI PAS̲H̲A [see MUḤAMMAD ʿALĪ PAS̲H̲A].

MEḤMED ʿĀS̲H̲IḲ [see ʿĀS̲H̲IḲ].

MEḤMED BĀG̲H̲ČESARĀYĪ, surnamed T̲H̲ANĀʾĪ (d. after 13 S̲h̲aʿbān 1061/1 August 1651), Crimean Tatar author of the history of K̲h̲ān Islām Girāy III from his arrival in Kaffa and his enthronement in Bāg̲h̲česarāyī (1 and 5 Djumādā I 1054/6 and 10 July 1644 respectively) until the spring of 1651.

He had been formerly *muns̲h̲ī-yi dīwān-i k̲h̲āḳānī* at the k̲h̲ān's court; the excellent Turkish of his work may be a proof that he was educated in Istanbul and was responsible for the k̲h̲ān's correspondence with the Ottoman court. Charged by Sefer G̲h̲āzī Ag̲h̲a with the task of compiling the history of the k̲h̲ān's successful rule, he created a panegyric adorned with his own Turkish and Persian verses, founded in the historical part on the diaries of the three Tatar-Cossack expeditions against Poland of 1648-9 and other materials given him presumably by this vizier. It was finished on 1 August 1651, but the author did not mention even the preparations for a new Tatar expedition against Poland which ended with the k̲h̲ān's and his Cossack allies' defeat at Beresteczko, 28-30 June of the same year. The information about the very origins of Islām Girāy III's alliance with B. Chmielnicki of 1648 is rather unsatisfactory. The diaries of the expeditions of 1648-9 are additionally important sources of the now forgotten Turkic toponyms, as much in the Crimea as in the steppes and in the Ukraine. This work, hitherto not mentioned in the history of the Crimean Tatar literature, throws a new light on the culture of the k̲h̲anate of Crimea and on K̲h̲ān Islām Girāy III's political and cultural aspirations. It is preserved only in a copy from 1092/1681, now in the British Library.

Rieu, *Catalogue of the Turkish Manuscripts in the British Museum*, London 1888, 250-1; Babinger, *Geschichtsschreiber*, 236, no. 206 (who erroneously takes this work for a copy of the *Taʾrīk̲h̲* by Meḥmed Girāy); Hadży Mehmed Senai z Krymu, *Historia chana Islam Gereja III*. Tekst turecki wydał, przełożył i opracował Zygmunt Abrahamowicz. Uzupełniający komentarz historyczny: Olgierd Górka i Zbigniew Wójcik ["Ḥādjdjī Meḥmed T̲h̲anāʾī of Crimea, The history of K̲h̲ān Islām Girāy III. Turkish text published, translated and commented by Z. Abrahamowicz. Additional historical annotations by O. Górka and Z. Wójcik"], Warsaw 1971.

(Z. ABRAHAMOWICZ)

MEḤMED BALṬADJĪ [see MEḤMED PAS̲H̲A BALṬADJĪ].

MEḤMED ČELEBI [see G̲H̲AZĀLĪ, MEḤMED].

MEḤMED EMĪN, in modern Turkish Mehmet Emin Yurdakul (1869-1944), Turkish poet and patriot, the pioneer of modern Turkish poetry in spoken Turkish and syllabic metre. He was born in the Bes̲h̲iktas̲h̲ district of Istanbul on 13 May 1869. The family originated from Zekeriyyā Köyü, a village near Lake Terkos, in Eastern Thrace, some 30 miles north-west of Istanbul. His grandfather Ḥalīm Ag̲h̲a was a trawler owner. His father Ṣāliḥ Ag̲h̲a, later called Ṣāliḥ Reʾīs (Captain) when he owned a large trawler rowed by several men, was an illiterate fisherman and his mother a peasant woman from a village near Edirne. They both possessed a rich store of oral folk literature which they transmitted to their son. Meḥmed Emīn attended a primary school and the military secondary school (*rüs̲h̲diyye-yi ʿaskeriyye*) in Bes̲h̲iktas̲h̲, then registered at a civilian *Lycée* (*ʿidādī*)

which he did not finish. He continued his education, as was still possible at that time, by serving, without pay, in the chancery of the office of the grand vizierate (*Ṣadāret Ewrāḳ Ḳalemi*). In 1888 he married Müzeyyen Khānîm, from a notable family of Ḳara-Ḥiṣār-î Sharḳī (modern Şebinkarahisar), in north-eastern Anatolia, which he visited several times, sometimes for long periods and where he enriched his observations on the plight of the Anatolian peasantry. In 1889 he registered at the School of Law (*Mekteb-i ḥuḳūḳ*) which he abandoned two years later for an opportunity of studying further in America, which did not however materialise. While still a student in the Law School, he published his first book (see below) and sent a copy to the grand vizier Djewād Pasha [*q.v.*], on whose recommendation he was appointed (1890) as a clerk of the secretariat of the Custom's office (*Rüsūmāt emāneti taḥrīrāt ḳalemi*). Two years later he became director of the archives (*ewrāḳ müdīri*) of the same office, where he remained for 15 years. In 1907, he became a member of the secret revolutionary Committee of Union and Progress (CUP [see ITTIḤĀD WE TERAḲḲĪ DJEMʿIYYETI]). The same year, he was sent to Erzurum, in Eastern Anatolia, as superintendent of the customs (*rüsūmāt nāẓîrî*) which, under the Ḥamīdian régime, amounted to political exile. The Sultan had become suspicious of his choice of subjects in his poems, particularly his insistence on the poor (see below).

After the restoration of the Constitution in July 1908, he was transferred to Trabzon with the same office. After a short service as counsellor at the Ministry of Marine and as governor (*wālī*) of the Ḥidjāz (1909) and Sivas (1910), he resigned and joined in Istanbul the Turkist movement (see B. Lewis, *Emergence*[2], 343-52 and TÜRKDJÜLÜK) and was made president of the Turkish Hearth [see TÜRK ODJAGHÎ] in 1911. He soon set up another Turkist association, the *Türk Yurdu* ("Turkish Home"). As he was preparing to publish the organ of the association, with the same name, which later became famous as the organ of the Turkish Hearths [see TÜRK YURDU], he was appointed governor of Erzurum. In the meantime, he expressed, in many writings, his disappointment with the CUP and his disagreement with many arbitrary and despotic actions of the administration. He was retired from Government service in 1912. Elected deputy for Mawṣil (Mosul), he settled in Istanbul and continued his literary and patriotic activities. He witnessed the collapse of the Empire and the occupation of Istanbul by the Allies. He joined the Nationalist government of Ankara in April 1921, which sent him on a special mission to Antalya and Adana where he stayed until the end of the War of Liberation, when he went to Izmir to join Muṣṭafā Kemāl Pasha (Atatürk [*q.v.*]) with whom he returned to Ankara (September 1922). He was elected deputy for Sharḳī Ḳaraḥiṣār. Later, he continued to serve in Parliament as deputy for Urfa and Istanbul. He died in Istanbul on 14 January 1944. During the last years of his life, he had been collaborating with the Turkish Historical Society in Ankara (to which he donated all his personal archives) to prepare a revised and critical edition of his complete works (see *Bibl.*).

Meḥmed Emīn who, following the law on surnames, took in 1934 the family name of Yurdakul ("slave of the fatherland"), was known in his lifetime as *Millī shāʿir* or *Türk shāʿiri Meḥmed Emīn* ("Meḥmed Emīn, the national poet or Turkish poet *par excellence*"), as he consistently wrote in the spoken Turkish of ordinary people and used exclusively the syllabic metre of folk poets as opposed to the Arabo-Persian prosody (*ʿarūḍ*) of both old and most modern poets of his day [see BÖLÜKBASHÎ, RIḌĀ TEWFĪḲ, in Suppl.] and devoted all his literary work to his country and its people, their plight, their misfortunes and their glories, completely leaving out his own personality and private life. He published his first book (a short essay), while a law student in 1308 A.H./1891, *Faḍīlet we aṣālet* ("Virtue and nobility)", in which he claims that real virtue and nobility are not necessarily hereditary but are rather obtained by a person's talent, diligence and spiritual maturity. As was customary at the time, he sent the draft to several literary authorities, who all wrote complimentary *taḳrīẓs* (presentation pieces) which were printed with the book. Meḥmed Emīn's first published poem *Köyde fîrtîna* ("Storm in the village") appeared in *Resimli Ghazete* of 5 October 1311 A.H./17 October 1895, which was confiscated before distribution (Aḳčuraoghlu Yūsuf, *Türk yîlî*, Istanbul 1928, 387, where the date is wrongly given as 1903); it was reprinted in *Muḳtebes*, no. 10, 1317 A.H./1900. This remarkable poem, with its social implications and which contains most of the characteristics of his later poems, with typical language, style and content, was written as the height of the famous westernist *Therwet-i Fünūn* [*q.v.*] literary movement, which was linguistically conservative to the degree of preciosity and which disdained the "finger counting" (*parmaḳ ḥisābî*) metre of the "ignorant bards". Although almost all the sources, including the poet himself, assert otherwise, it seems chronologically probable that the young poet read this particular poem to Djamāl al-Dīn al-Afghānī [*q.v.*], who recommended him to continue (see below). Several poems of the same type, published in various periodicals, including in the *Therwet-i Fünūn* itself, immediately before and during the April-September 1897 war with Greece, particularly the one called *Anadoludan bir ses yākhud djenge giderken* ("A voice from Anatolia, or Going to war") published previously but in the same year in the newspaper *ʿAṣîr* ("Century") in Salonica, made a sensation in Turkey, among the Muslim Turks in Russia and among orientalists abroad (see *Bibl.*; for a correct text of this poem, see Nüzhet Hāshim, *Millī edebiyyata doghru*, Istanbul 1918, 6).

Although there was a long but often ignored tradition of simple, straightforward Turkish prose (see Fahir İz, *Ottoman and Turkish*, in *Essays in Islamic civilisation presented to Niyazi Berkes*, ed. D. P. Little, Leiden 1976, 118-39), a similar but occasional movement to write simple, pure, common or exclusive Turkish (*basīṭ, sāde, ḳaba, ṣirf, yalñîz türkdje*) verse always existed also (for a detailed discussion of this subject, see Köprülü-zāde Meḥmed Fuʾād, *Millī edebiyyāt djereyānînîn ilk mübeshshirleri we dīwān-î türkī-yi basīṭ*, Istanbul 1928, Roman script edition in *Edebiyat araştırmaları*, published by T.T.K., Ankara 1966, 271-315). The *Tanẓīmāt* writers claimed that simple, everyday Turkish was necessary to communicate with the public, but did not apply their principle except in a few pieces. The revolutionary and journalist ʿAlī Suʿāwī [*q.v.*] and the publicist and novelist Aḥmed Midḥat [*q.v.*] did write a remarkably simple language, and their associates gave occasional examples of simple Turkish verse. But as the famous lexicographer and writer Shems el-Dīn Sāmī [*q.v.*], who was the most conscious and advanced of them, admitted in an article, greeting the publication of Meḥmed Emīn's first book of poems *Türkdje shiʿrler* ("Poems in Turkish") (see below), "...although they (the *Tanẓīmāt* writers) talked and wished to write in simple Turkish, it was Meḥmed Emīn who carried it out, and

this book was the foundation stone of future Turkish literature" (*Sabah*, 1 March 1313 *Rūmī*/13 March 1899). The British orientalist E.J.W. Gibb congratulated Meḥmed Emīn warmly in a letter in Turkish of 6 June 1899, in which he said "... The Turk has found his natural voice... your predecessors imitated the Persians and the French. You expressed the feeling of your countrymen in their own language... Six centuries have been waiting for you" (the original letter is in the Meḥmed Emīn Archives, in the Turkish Historical Society, Ankara). Like the sporadic examples in the *dīwāns* of the 18th century poets Nedīm [*q.v.*] and Ghālib Dede [*q.v.*] and in most of the 19th century poets, there seems to be a latent desire to express themselves occasionally in everyday Turkish and sometimes in syllabic metre. These examples seem to multiply particularly in the works of minor poets during the last decades of the century [see TURKS. LITERATURE]. However, as Shems el-Dīn Sāmī points out in the above-mentioned article, Meḥmed Emīn's work was not a random experiment. It was the beginning of a conscientious, systematic and lasting movement. So much so that his colleague and biographer Aḳčuraoghlu Yūsuf [see YŪSUF, AḲČURA] says that *A voice from Anatolia* can be called the manifesto of linguistic Turkism (Aḳčuraoghlu, *op. cit.*, 391). This current was enriched with the deeply felt lyricism and more inspired poems of Riḍā Tewfīḳ (Bölükbashî), who, during the ensuing violent controversy between the partisans of simple Turkish and those who supported the fashionable *Mischsprache* of the leading poets and writers, became his most enthusiastic defender (see Nüzhet Hāshim, *op. cit.*, 7-10; Aḳčuraoghlu, *op. cit.*, 387-91). This "simple Turkish" movement spread to the provinces and was supported by several minor writers, including Meḥmed Nedjīb (see Tahir Alangu, *Ömer Seyfettin*, Istanbul 1968, *passim*) who had launched a similar movement independently in Izmir, culminated in April 1911, in Salonica, with the "New language" (*Yeñi lisān*) movement of ʿÖmer Seyf el-Dīn [*q.v.*] which Ḍiyāʾ (Ziya) Gökalp [*q.v.*] espoused and propagated among young poets and writers, setting up a new literary current, the "National literature" (*millī edebiyyāt djereyānî*) [see TURKS. LITERATURE]. Meḥmed Emīn candidly admits his association with Djamāl al-Dīn al-Afghānī and the latter's influence on the development of his ideas. The standard biographies of the *Shaykh* are usually silent on his unofficial Turkish connections (see, e.g., Nikki R. Keddie, *Sayyid Jamāl ad-Dīn "al-Afghānī", a political biography*, Berkeley, 1972). But this influence has been much exaggerated by later biographers and critics. In the early years of al-Afghānī's second sojourn in Istanbul (July 1892-March 1897), Meḥmed Emīn, then in his mid-twenties, was one of the many young intellectuals—Turks, Persians and Arabs—who flocked twice a week to the Mansion (*köshk*) in Nishāntashî, not far from the Imperial Palace, which the Sultan ʿAbd ül-Ḥamīd II assigned to him, giving also a monthly allowance. Meḥmed ʿĀkif [*q.v.*], M. Shems el-Dīn (Günaltay) [see SHEMS EL-DĪN] and Meḥmed Emīn were among the more assiduous Turks. It is reported in most Turkish sources (see *Bibl.*) and summarised by his close friend Aḳčuraoghlu (*op. cit.*, 374 ff. and *passim*) and the noted educationist Ismāʿīl Ḥaḳḳî Baltadjîoghlu [see ISMĀʿĪL ḤAḲḲĪ in Suppl.], who interviewed the poet six months before his death (İ. H. Baltacı-oğlu, *Mehmet Emin Yurdakul ile konuştum*, in *Yeni Adam*, no. 452 [26 August 1943], Istanbul) and repeated by many later authors including Uluğ Iğdemir, F.A. Tansel and Kenan Akyüz (see *Bibl.*), that al-Afghānī told his young circle of friends that the writers of the individual Muslim countries should write with the simple vernacular of their people in order to alert them against despotism, social evils and foreign domination and that he (Meḥmed Emīn), like most young men who frequented al-Afghānī's house, owed much to his illuminating conversation and to his constant encouragement. He adds, however, "I was mainly inspired by my own God on my own Mount Sinai and transferred my revelations to my works" (for al-Afghānī's second sojourn in Turkey, see Keddie, *op. cit.*, ch. "The final years 1892-1897: Istanbul"). The circumstances of the last three years of al-Afghānī's life (he died of cancer of the jaw, after a long illness and three operations, on 9 March 1897) make the close relationship, reported in the sources, during the period when Meḥmed Emīn wrote his most famous poems (April-September 1897), chronologically impossible. It seems that a legend, based on a confusion by the poet, has survived until the present day.

Strictly speaking, Meḥmed Emīn had no literary masters or followers. The movement which he had started, and which was sincerely defended by Riḍā Tewfīḳ, was followed up by the latter and by the next generation, in a new style and inspiration more akin to the technique and spirit of the traditional folk (*saz*, *ʿāshîḳ*) and popular mystic (*derwīsh*) poetry. His own work is to-day appreciated more for its historico-literary importance than its intrinsic value.

Meḥmed Emīn is the author of the following major works:

1. *Türkdje shiʿrler* ("Poems in Turkish") Istanbul 1316 A.H./1898;
2. *Türk sazî* ("Turkish *saz*"), Istanbul 1330 *rūmī*/1914, contains 191 poems written between 1898 and 1914, most of them published previously in different periodicals. Two of them are taken from the preceding. The majority of the poems dwell upon social problems. Some are inspired by the Pan-Turkist movement of the second decade of the century.

The following three works contain patriotic poems written during the First World War:

3. *Ey Türk uyan* ("Turk, wake up), Istanbul 1330 *rūmī*/1914;
4. *Tan sesleri* ("Voices of dawn"), Istanbul 1331 *rūmī*/1915; and
5. *Ordunuñ destānî* ("The epic of the army"), Istanbul 1334 *rūmī*/1918.
6. *Tūrāna doghru* ("Towards Tūrān"), poems written during the last years of the First World War and inspired by Pan-Turanism.

The following two works contain his poems written during the War of Liberation (1919-22):

7. *Aydîn ḳizlarî* ("The daughters of Aydîn"), Ankara 1921, 3rd edn. as *Mustafa Kemal*, Istanbul 1928; and
8. *Ankara*, Istanbul 1939.

Meḥmed Emīn's other poems, published in various periodicals but not included in his books, have been collected in F.A. Tansel (see *Bibl.*).

MEḤMED ESʿAD [see esʿad efendi; g̲h̲ālib dede].

MEḤMED GIRĀY, Derwīs̲h̲ Meḥmed Girāy b. Mübārek Girāy Čingizī, member of the Crimean Girāy [*q.v.*] dynasty, probably a brother of K̲h̲ān Murād Girāy (1678-83) and historian. His chronicle, *Taʾrīk̲h̲-i Meḥmed Girāy*, preserved in the unique ms. H.O. 86, Austrian National Library, Vienna (Flügel, *Catalogue*, ii, 277-8), deals with Ottoman and Crimean history from 1094/1682 to 1115/1703, from Ḳara Muṣṭafā's unsuccessful Viennese campaign to Sultan Aḥmed III's accession to the throne, covering the reigns of the Crimean k̲h̲āns from Murād Girāy to Selīm I Girāy (third reign, 1702-4); it was finished in Rad̲j̲ab 1115/Nov.-Dec. 1703. Written in clumsy Ottoman Turkish and being of narrow scope, it nevertheless offers an interesting view of Ottoman history in a critical phase by a Crimean prince; some passages, describing events in which the author took part, have the value of a primary source.

Bibliography: Von Hammer, *GOR*, vi, p. VI, ix, 206-7; idem, *Geschichte der Chane der Krim unter osmanischer Herrschaft*, Vienna 1856, 9; Babinger, *GOW*, 235-6; Z. Abrahamowicz, *Kara Mustafa pod Wiedniem*, Cracow 1973; M. Köhbach, *Der Tārīḫ-i Meḥemmed Giray—eine osmanische Quelle zur Belagerung Wiens durch die Türken im Jahre 1683*, in *Studia Austro-Polonica*, iii, Warsaw-Cracow 1983, 137-64.

(M. Köhbach)

MEḤMED GIRĀY I, k̲h̲ān of the Crimea from D̲h̲u 'l-Ḥid̲j̲d̲j̲a 920/Feb. 1515 to D̲h̲u 'l-Ḥid̲j̲d̲j̲a 929/October-November 1523.

He was the eldest son, heir-apparent (*ḳalg̲h̲ay* [*q.v.*]), and successor of Menglī Girāy I. According to *Gülbün-i k̲h̲ānān*, Istanbul 1287/1870, 11, the title *ḳalg̲h̲ay* goes back to Menglī Girāy I, who appointed Meḥmed Girāy as his deputy. The relationship between the Crimean k̲h̲ānate and the Ottoman Empire was at that time still largely a corollary of the relationship between their respective rulers. Meḥmed Girāy remained k̲h̲ān until his death, although he was an inveterate opponent of his sovereign, Sultan Selīm I [*q.v.*], who was distracted by his wars against Persia and the Mamlūks. The rising Muscovite state under the Grand Prince Vasiliy III (1505-33) had created a new power among the heirs of the Golden Horde. Meḥmed Girāy reacted by alternately allying himself with Poland-Lithuania and Muscovy, and by interfering in the dynastic affairs of Ḳāzān and Astrak̲h̲ān [*q.vv.*]. He also tried to dominate the nomadic Nogay [*q.v.*] tribes of the region. In 1521 he refused Sultan Süleymān Ḳānūnī's [*q.v.*] order to join him in a campaign against Hungary, and instead, led a great expedition against Muscovy, which so far had been on friendly terms with the Ottomans. Meḥmed Girāy's lifelong struggle for a new steppe empire remained without lasting success. He was temporarily able to impose the Crimean claim to the throne of Ḳāzān through his own brother (1521), but lost his life in a plot which he had devised to chase the Muscovite candidate from the throne of Astrak̲h̲ān (1523). Abandoned by the Crimean nobility, whom he had alienated by his ruthlessness, disloyalty and dissolute life, he was massacred by his Nogay allies.

Bibliography: The main source for Meḥmed Girāy I is A. Bennigsen *et alii* (eds.), *Le Khanat de Crimée dans les Archives du Musée du Palais de Topkapı*, Paris 1978, with further references; V. D. Smirnov, *Krymskoe k̲h̲anstvo pod verk̲h̲ovenstvom otomanskoy porti do načala XVIII veka*, St. Petersburg 1887; S. M. Solov'ev, *Istoriya Rossii s drevneys̲h̲ik̲h̲ vremen*, iii, Moscow 1960, s.v. *Magmet-Girej*, based on N. M. Karamzin's history of the Russian Empire.

(B. Kellner-Heinkele)

MEḤMED ḤĀKIM EFENDI, 18th century Ottoman literary personality, statesman and official court chronicler (*waḳʿa-nüwīs*).

Born in Istanbul, his father was *seyyid* K̲h̲alīl Efendi, known as "Emīr Čelebi the knife-maker (*bïčaḳd̲j̲ï*)". Meḥmed pursued his education under well-known scholars such as Yanyalï Esʿad K̲h̲od̲j̲a and Bursalï Ismāʿīl Ḥaḳḳī, received a certificate of competence in calligraphy from Suyold̲j̲u-zāde Ned̲j̲īb Efendi, author of the *Dewḥat al-küttāb*, spent some fifteen years in Egypt and became an adept of Sezāʾī Ḥasan Efendi, founder of the Sezāʾī branch of the Gülṣ̲h̲enī mystical order (*ṭarīḳat*). Despite having completed a very specialised training, Meḥmed decided to forego a career in the theological field and instead filled successive positions as trainee (*k̲h̲alīfe*) in the secretarial bureau of the Grand Vizierate, beginning in 1155/1742 as assistant to the chief at the Arsenal (*tersāne*), followed in quicker succession by posts such as bureau chief in the treasury department of imperial estates (*k̲h̲āṣṣlar muḳāṭaʿad̲j̲ïsï*) in 1164/1753, chief secretary of the regiment of the armourers (*d̲j̲ebed̲j̲iler kātibi*) in 1172/1759, chief secretary of the cavalry regiments (*sipāhiler kātibi*) in 1174/1761, and a second appointment as *d̲j̲ebed̲j̲iler kātibi* in 1176/1763.

In addition to these secretarial positions in the departments of the treasury, Ḥākim was appointed official court chronicler (*waḳʿa-nüwīs*) from 1 Red̲j̲eb 1166/4 May 1753, when this position was vacated through the incumbent ʿIzzī Süleymān Efendi's resignation prior to his performing the pilgrimage to Mecca. Ḥākim strove to record all the events from the date of his appointment in 1753 until his resignation in mid-1180/October-November 1766. Four years later, on the night of Reg̲h̲āʾib 1184/25-6 October 1770, he died and was buried in the cemetery of Ayrïlïḳ Čes̲h̲mesi in Ḥaydar Pas̲h̲a (see B. Kütükoğlu, *Müverrih Vâsıf'ın kaynaklarından Hâkim tarihi*, in *Tarih Dergisi*, v/8 [1953], 70 ff.).

Meḥmed Ḥākim's command of both Arabic and Persian and his ability of composing poetical and other literary works was recognised by his contemporaries (see the lists of his works in Bursalï Meḥmed Ṭāhir, *ʿOt̲h̲mānlï müʾellifleri*, Istanbul 1333, ii, 142, and Kütükoğlu, *op. cit.*, 74-5. See also *Rūḥī-i Bag̲h̲dādī terkīb-i bendine naẓīre*, Ist. Univ. Libr. İbnülemin 3352, fols. 100b-105a; the *Nafḥat al-d̲h̲āt wa 'l-ṣifāt*, a com-

mentary in verse on one of ʿAṭṭār's mystical works, Millet, Emîrî *manzum* 940 (the autograph copy); and the *Miʿrādjiyye*, Cambridge Or. 1268, and Süleymaniye, Hacı Mahmud Efendi 4477. For two collective works (*medjmūʿa*) containing poetical works and treatises in Ḥākim's own hand, see İbnülemin 3144 and Süleymaniye, Esad Ef. 3495); but it is nonetheless chiefly through his history writing as official court historian that Ḥākim gained his literary fame. In this, written in a very ornate style and ponderous language, Ḥākim gives special emphasis to events in the capital and the palace, in particular, to audiences with the sultan, court protocol, appointments and dismissals, natural disasters such as fires and earthquakes experienced in the capital and reconstruction efforts after these disasters; but, albeit infrequently, he also touches on developments in the provinces, news of which reached the palace, and reports the content of texts submitted by Ottoman ambassadors on their return from foreign assignments.

Portions of Ḥākim's history are preserved in the form of final revisions in the author's own hand (*tebyīḍ*) in several different locations. The events of 1166-79 are covered in the fourth revision now found in the İbnülemin collection (ms. 2472), while the fifth revision of vol. i covering the years 1166-70 is preserved in the library of the Istanbul Archaeological Museum (ms. 483). A continuation in rough draft form covering the years 1171-6 is also found in the same collection (ms. 484). A complete set of volumes covering the entire period from Muḥarrem 1166 to Djumādā I 1180/November 1752—October 1766 is found in Topkapı Sarayı, Bağdad Köşkü 231 and 233 (fols. 1a-248b; autograph copy). For a description of the Marburg ms. covering the events of 1166-70, see B. Flemming, *Türkische Handschriften*, Wiesbaden 1968, i, 150 ff., and for a description of the Uppsala ms., see C.J. Tornberg, *Codices...*, Uppsala 1849, 199.

One of Ḥākim's successors as *waḳʿa-nüvīs*, Aḥmed Wāṣif [*q.v.*], strongly criticised Meḥmed's work, accusing him of failure to concern himself with questions of historical causation and the consequences of events through limiting his coverage only to palace events; he branded his style as "careless" and overly ornate, and his historical sense as lacking in both truthfulness and reliability and precision. When Wāṣif was commissioned in 1216-17/1802 to rewrite the events of the period falling between the *waḳʿa-nüwīs* ʿIzzī and Enwerī, he considered that by reducing Ḥākim's history, whose style he found repellent, to a simple index of events, he had created a new work which could be easily utilised by everybody. However, on comparison of the works, sc. Ḥākim's chronicle and the section of Wāṣif's *Maḥāsin al-āthār* which bases itself upon it (ed. Istanbul, i, 10-280), it becomes clear that Wāṣif's abbreviated version does not provide additional clarification and a wider scope of events, and his over-hasty attempts at simplifying Ḥākim resulted in loss of useful content and at times even in inexactitude and incompleteness; as a result of this, his index of events was not entirely successful in its aim of being universally understandable. It should be further noted that some of the stylistic shortcomings in Ḥākim's history were an inescapable consequence of the limitations imposed by his position as court chronicler (see Kütükoğlu, *art. cit.* in *TD*, vi/9 [1954], 91-122, vii/10 [1954], 79-102).

(Bekir Kütükoğlu)

MEḤMED KHALĪFE b. **ḤÜSEYN**, Ottoman courtier and historian who flourished under the three sultans Murād IV, Ibrāhīm and Meḥemmed IV [*q.vv.*] (reigned 1032/1623 to 1099/1687).

From Bosnia, he came to Istanbul in 1043/1633-4 as *ič-oghlan* of Ḳodja Kenʿān Gurdjī Pasha and stayed with him in the Balkans until the Pasha was in 1047/1637 appointed to lead an expedition against the prince of Transylvania George Rákoczi [see ERDEL]. Returning to Istanbul, he probably entered Sultan Ibrāhīm's office for diplomatic missions as a *seferli*, and at some unknown date became a *khalīfe* at court. He was also a poet, using the *takhalluṣ* of Ülfetī; the date of his death is unknown. See Refīḳ, biographical introd. to the *Taʾrīkh-i Ghilmānī* edition cited below; Babinger, *GOW*, 209-10, no. 180.

Meḥmed Khalīfe is best known for a chronicle of his time that he called the *Taʾrīkh-i Ghilmānī* because it was written for the personnel of the Inner Palace. In its initial form the work is a disorganised and unsystematic personal memoir which does however reflect the author's own ideas and attitudes and depicts vividly scenes of life in the Ottoman Palace of the 11th/17th century. The first version is represented by an amateurishly-written manuscript that covers the events of the year 1043-70/1633-60; it lacks its final pages (Vienna, Nationalbibliothek, H.O. 82; for a description, see G. Flügel, *Die arabischen, persischen und türkischen Handschriften*, ii, 271, no. 1068; for a facsimile, see Bugra Atsız, *Das osmanische Reich um die Mitte des 17. Jahrhunderts nach den Chroniken des Vecîhî (1637-1660) und des Mehmed Halîfa (1633-1660)*, Munich 1977; on the value of this manuscript as an historical source and its comparison with the final recension, see B. Kütükoğlu, *Tarih-i Gılmânî'nin ilk redaksiyonuna dâir*, in *Tarih Dergisi* no. 27 [1973], 21-40).

The *Taʾrīkh-i Ghilmānī* was given a somewhat more elevated literary form between 1070/1659-60 and 1075/1665 as corrections and additions were made to this first recension; events were arranged in chronological order, the text was divided into sections and subsections (*bābs* and *faṣls*), and occasionally verses and chronograms were inserted. This last recension comprises events from the accession of Murād IV (1032/1623) until the Treaty of Vasvar (1075/1664). Although it does not contain the author's biography and passages that reveal some of his attitudes and concerns which are found in the first recension, this final recension includes an epilogue (*khātime*) dealing with the necessity of mildness in the behaviour of rulers, the special qualities of Sultan Meḥemmed IV and the scholars and craftsmen trained in the Enderūn who were contemporaries of the author.

Meḥmed Khalīfe's work, which presents the events he experienced from the perspective of a functionary of the inner Palace, was used by ʿAbdī Pasha and Naʿīmā (see Atsız, *op. cit.*, pp. CXXVII-CXXVIII). With its publication by Aḥmed Refīḳ (Altınay) as suppl. no. 11 to *TOEM*, nos. 78-83 = N.S. 1-6 (1340-

1/1921-2), based on a manuscript of the final recension (Türk Tarih Kurumu Lib., ms. 509) it has also become one of the sources most frequently referred to by researchers.

Finally, Bursalī Meḥmed Ṭāhir, *ʿOthmānlī müʾellifleri*, iii, 142, attributes to a Meḥmed b. Ḥüseyin of Sultan Ibrāhīm's time a translation of the Persian history of ʿAlī b. Shihāb al-Dīn Hamadānī, the *Dhakhīrat al-mulūk*, at the command of the governor of Baghdād, Derwīsh Meḥmed Pasha [*q.v.*], in 10 *bābs*, to which he added two further *bābs* and called the whole the *Tuḥfat al-maʾmūn*. This history must nevertheless be by Muṣliḥ al-Dīn Muṣṭafā b. Shaʿbān (d. 969/1561-2) (see Kātib Čelebi (Ḥādjdjī Khalīfa), *Kashf al-ẓunūn*, Istanbul 1941, i, 824, and from it, Bursalī Meḥmed Ṭāhir, ii, 226), and this is strengthened by the fact that the *Dhakhīrat al-mulūk*, as described in the above two sources, is not a history but a treatise on political ethics (see Storey, i, 946-7 n. 4).

MEḤMED LALA PASHA [see MEḤMED PASHA, LALA].

MEḤMED LĀLEZĀRĪ [see LĀLEZĀRĪ].

MEḤMED PASHA, BALṬADJĪ, Ṭeberdār (1071-1124/1660-1 to 1712), Ottoman Grand Vizier under Sultan Aḥmed III [*q.v.*].

Born in Osmancık (Merzifon), as the son of Turkish Muslim parents, he was able to enter the outside service of the Sultan's palace thanks to patronage (*intisāb*). He began his career in a secretarial function. By favour and through the patronage of Ḥabeshī ʿAlī Agha and other *bīrūn aghas*, he entered the service of the *Wālide Sulṭān* Khadīdje Tarkhān, attaining the rank of *khalīfe* in 1099/1687. The prince Aḥmed (the later Aḥmed III) appointed Meḥmed as apprentice to the corps of the "Balṭadjīs of the Old Sarāy", where he became known as the "beautiful muezzin" because of the musical qualities of his voice. When in 1695 Ḥabeshī ʿAlī became *Dār al-Saʿāde Aghasī* to Sultan Muṣṭafā II [*q.v.*], Balṭadjī Meḥmed became personal scribe to his protector and was thus admitted to the proximity of the sultan and of Prince Aḥmed. At the accession of the latter on 10 Rabīʿ II 1115/21 August 1703, Meḥmed, with 9 years' experience of confidential service and having travelled all over the empire, was promoted to the rank of *Mīr Ākhūr*, but his appointment as *taḥṣīldār* of Aleppo removed him from the palace service. The Grand Vizier Ḳalaylīḳoz Aḥmed Pasha promoted him to the rank of vizier (8 Radjab 1116/6 September 1704) with the function of *Ḳapudān Pasha*. Already on 27 Shaʿbān 1116/26 December 1704 he became Grand Vizier (1704-6/1116-18). He had to maintain his position against the rival faction led by Čorlulu ʿAlī Pasha and Newshehirli (Dāmād) Ibrāhīm Pasha [*q.vv.*]. He made himself indispensable to his monarch by playing upon the latter's constant fear of revolt and deposition. The Grand Vizier managed to free himself from the supervision of financial affairs by means of an intrigue, falsely accusing the *Nishāndjī* Ḥüseyin Pasha of plotting a revolt and consequently sending him into exile at Istanköy Island (Cos). The Sultan for long tolerated his old familiar companion in spite of his marked lack of ability in financial matters.

At last, the Sulṭan decided to replace Balṭadjī Meḥmed Pasha by Čorlulu ʿAlī Pasha (19 Muḥarram 1118/3 May 1706), his trusted intimate as well as a competent statesman. The ex-Grand Vizier was honourably exiled with the appointment as *Beglerbegi* of Erzurum. In 1119/1707 he was transferred to Chios (Ott. Saḳīz [*q.v.*]), from which post he went to Aleppo as *Beglerbegi*. In that city, the poet Nābī [*q.v.*] belonged to Balṭadjī Meḥmed Pasha's salon.

On 14 Djumādā II 1122/10 August 1710, Aḥmed III decided to appoint his old companion as Grand Vizier again. The latter actually took office in Istanbul by 3 Shaʿbān/27 September. By this time a "war party," which aimed at a renewal of the war against Russia, had gained the upper hand. The intrigues to that end were assisted by the King of Sweden, "Iron Head" (*Demir Bash*) Charles XII, who had found refuge in Ottoman territory since 1709. His Ottoman ally was the Khān of the Crimea Dawlat Giray II [see GIRAY] (second reign, 1120-5/1708-13) who came to Istanbul in 1122/1710 to further his aims of war against the Russian Tsar Peter. A Council was held in the Sultan's palace (*Meshweret-i ʿAẓīme* of 28 Ramaḍān 1122/21 November 1710) and war was declared on Russia. The new Grand Vizier was to command the army. The so-called Pruth campaign began in the spring of 1123/1711. The Tsar's diplomacy could not curb the Ottoman initiative and the two armies marched towards each other, meeting on 12 Djumādā II/28 July 1711 in Moldavia (Ott. Boghdan [*q.v.*]) near Khān Tepesi (= Stanilesti) on the river Pruth, downstream on the road from Jassy (Ott. Yash [*q.v.*]). Nobody in the Russian army was aware that Balṭadjī Meḥmed Pasha was already close by. The Ottomans, reinforced by a large body of Tatars, Cossacks and Polish troops, totalling 120,000 men and 400 guns, were in perfect condition. The Russian army (40,000 infantry, 14,000 horse and 122 guns) had been suffering from lack of food and forage for three weeks. The support promised in a secret treaty concluded in view of the Russo-Turkish war by the prince of Moldavia Demetrius Cantemir (1673-1723) was not delivered, for the crops had failed as a result of drought and locusts. On 5 Djumādā II/21 July 1711, Balṭadjī Meḥmed's army completely surrounded the Russians and was preparing for the general attack with an artillery barrage. The Tsar Peter, who was with his army, realised that his forces would be annihilated and decided quickly to sue for an armistice and peace. For this move, he found support not only from his Vice-Chancellor Peter Shafirov but also from his wife Catherine. This lady's involvement probably gave rise to the historical legend that the corrupt Ottoman Grand Vizier gave in easily to the Russian proposals, as these were accompanied by the offer of the jewelry and the charms of the Tsarina to his person. In any case, lacking insight into the true situation of the two powers, Balṭadjī Meḥmed was too easily content with the Russian proposals. He was already satisfied with the retrocession of Azov (Ott. Azaḳ [*q.v.*]), the demolition of the newly-built Russian fortresses at Taganrog, Kamenny Zaton and along the Dniepr, the closing of the permanent Russian embassy at the Porte, the evacuation of Polish territory and a guarantee of non-interference in Polish affairs. All Ottoman prisoners were to be set free and the King of Sweden was to be allowed safe passage. The Russian troops were provided with food for their free retreat. A preliminary treaty of peace was hurriedly agreed upon on 6 Djumādā II 1123/23 July 1711 (O.S. 12 July), notwithstanding the protests of Dawlat Giray II Khān and the representative of Charles XII, the Polish general Stanislas Poniatowski. Balṭadjī Meḥmed Pasha seems to have been carried away by his own unexpected success. It must be realised, however, that the Janissaries had little stomach for fighting in this desolate country and that the Sipāhīs were always reluctant to face the costs of

prolonged fighting. Moreover, the Grand Vizier's distrust of the political pressure group around the Swedish King at Bender may have induced him to come to terms before these could interfere on the spot.

The news of the victory and the peace was well received at Istanbul at first. The Sultan, however, became suspicious of his Grand Vizier when the latter postponed his return to the capital because of protracted negotiations with the Russians concerning the implementation of the treaty. Indeed, the absence of direct positive results of the peace caused a general dissatisfaction with the Grand Vizier's policy. The anti-Russian party, joined by the leading *ʿulamāʾ*, was able to gain the upper hand over those loving peace. After the arrival of the army at Edirne the Commander-in-Chief Balṭadjî Meḥmed was instructed to give up the seal of office. He was put under arrest in the prison of the *Bostāndjîbashî*. An inventory of his possessions and money was ordered. He himself was banished to the islands of Midilli and subsequently to Limni [*q.vv.*]. During his stay there, he learned of the confiscation of all his possessions. The *Wālide Sulṭān* probably interceded to save his life, but two main assistants in office, his *kāhya* ʿOthmān Agha and his *mektūbču* ʿÖmer Efendi, were condemned to death. Balṭadjî Meḥmed Pasha died on Limni, after a short illness, in 1124/1712-13. The judgment of him in Ottoman historiography varies between the accusation of high treason against Islam and the Ottoman state and fulsome praise for a victorious Turkish commander. He seems to have been a typical product of the seraglio culture, and according to A.N. Kurat, was a man of the pen rather than a statesman, an Ottoman gentleman rather than a Turkish warrior.

(A. H. de Groot)

MEḤMED PASHA, BÎYÎḲLÎ, ("moustachioed") Ottoman general and administrator, d. 928/1521.

He seems to have been in the service of the Shehzād Selīm b. Bāyazīd II, at the time when the latter was governor of Trebizond. There is evidence that he held the post of Chief Equerry (*amīr-ākhōr-bashî*) from the time of the accession of Selīm I, and he fought alongside him in battles against the Shehzād Aḥmed b. Bāyazīd: near Bursa, where he commanded the vanguard and his force was routed on 7 Ṣafar 919/14 April 1513; then at the battle of Yeñishehir on 24 April. The following year, he took part in the campaign of Čāldîrān [*q.v.*] and, on his return to Tabrīz, was entrusted with the mission of storming the stronghold of Bayburd, which had been unsuccessfully besieged since Djumādā I 920/July 1514 by an Ottoman expeditionary force. The conquest of this fortress earned him the title, granted on 25 October, of *beg* of the *sandjaḳs* of Bayburd, Trebizond, (Shebīn) Ḳara Ḥiṣār and Djānik. In the spring of 1515 he was given the task of laying siege to Kemākh [*q.v.*], and he maintained a blockade on this Ṣafawid-held town until the arrival of the sultan, who took it by assault on 5 Rabīʿ II 921/19 May 1515. In the course of the summer, Selīm I appointed him commander-in-chief of an army of considerable size (Ottoman troops, volunteers and contingents from the Kurdish principalities) raised for the purpose of conquering western Kurdistan, which was in revolt against the Safawids and where the diplomatic activity of Idrīs Bidlīsī [*q.v.*] had ensured that the territory would affirm its loyalty to the Ottoman government. Meḥmed Pasha entered Āmid on 10 Shaʿbān 921/19 September 1515, was made *beglerbeg* of Diyār Bakr on 5 November, and completed the conquest of the country by annihilating in Rabīʿ II 922/May 1516, at Eski Ḳoč Ḥiṣār, near Mārdīn, the last Ṣafawid army still present in the region, that of Ḳara Khān Ustādjalū. When Selīm I marched against the Mamlūks, Meḥmed Pasha joined forces with him at Malaṭya, fought on the left flank at the battle of Mardj Dābiḳ [*q.v.*], then, at Aleppo, was granted authority to undertake the conquest of the fortresses of Mārdīn and Ḥiṣn Kayfa, still held by Ḳîzîlbash garrisons. Shortly after this he took possession of Mawṣil, Kirkūk and Tāwūḳ. Promoted to the rank of vizier, Meḥmed Pasha devoted the remainder of his period of office to the establishment of Ottoman rule in the Kurdish emirates of Diyār Bakr on the one hand, and to the monitoring of the activities of Shāh Ismāʿīl on the other. He died on 24 Muḥarram 928/24 December 1521 (of dysentery, cf. document E. 6102 of the Archives of Topkapı, and not in battle as claimed by Meḥmed Thüreyyā) and was buried at Āmid, near the Fātiḥ Pasha mosque of which he had laid the foundations.

In spite of the important role which he played and the relatively plentiful documentation concerning him, little research has been so far done on Bîyîklî Meḥmed Pasha. In any case, examination of the sources gives the impression that, under Selīm I, he was one of the few senior Ottoman dignitaries—if not the only one—who, entrusted with a considerable weight of responsibility, enjoyed the unlimited con-

fidence of the sultan and, in return, served him with exemplary loyalty. This loyalty continued to be asserted under the reign of Selīm I's successor, when, as is shown by the still unpublished documents of the Topkapı Archives, Meḥmed Pas̲h̲a remained, against the advice of Süleymān and his advisers, the last supporter of all-out struggle against Ḳïzïlbas̲h̲ Iran, the primary objective of the foreign policy of Selīm I.

(J.-L. Bacqué-Grammont)

MEḤMED PAS̲H̲A, ČERKES (d. 1034/1625), Ottoman Grand Vizier.

Educated in the palace school or Enderūn [*q.v.*], he reached the rank of *silāḥdār* and left the palace with the appointment of *Beglerbegi* of Damascus. In 1621 he is mentioned as the fifth *Ḳubbe Wezīri* (Nāʿīmā, *Taʾrīk̲h̲*, Istanbul 1280, ii, 208). Upon the execution of the Grand Vizier Kemānkes̲h̲ ʿAlī Pas̲h̲a [*q.v.*] (14 D̲j̲umādā II 1033/3 April 1624), Murād IV [*q.v.*] forced him to accept the appointment of himself as successor. Čerkes Meḥmed Pas̲h̲a thus became commander-in-chief of the army sent to suppress the revolt of Abāzā Meḥmed Pas̲h̲a [see abāzā]. and to reconquer Bag̲h̲dād from the Persians. Passing Konya, he failed to take Niğde from the hands of the rebels. On 21 D̲h̲u 'l-Ḳaʿda 1033/3 September 1624, near Kayseri, he found Abāzā Meḥmed's troops in position at the bridge of Ḳarasu. In a bloody battle, the Grand Vizier, thanks to his field artillery, was able to defeat the rebel forces. Kātib Čelebi [*q.v.*], being among the corps of the *silāḥdārs*, witnessed this battle and gives a detailed description (cf. his *Fed̲h̲leke*, Istanbul 1287, ii, 54 ff.). Pursuing Abāzā's fleeing troops, the Grand Vizier was able to capture Abāzā Meḥmed's wife and daughter who were escorted by Abāzā's commander from Niğde to Sivas. Having come as far as Tercan, the Grand Vizier was met by a mission from the rebellious Pas̲h̲a of Erzurum with the request for a pardon. Considering it as being late in the campaigning season, Čerkes Meḥmed Pas̲h̲a accepted this on the condition of a Janissary garrison being placed in the citadel of Erzurum. Following this, the Grand Vizier withdrew the army to Tokat for the winter (December 1624). There he fell ill and died on 17 Rabīʿ II 1034/27 January 1625. His last days are reported by the historian Pečewī Ibrāhīm Efendi, who met Čerkes Meḥmed in Tokat (cf. Pečewī, *Taʾrīk̲h̲*, Istanbul 1283, ii, 401). All Ottoman historians agree on the just and incorruptible character of this old vizier, described as a *pīr-i nūrānī* by Naʿīmā (*Taʾrīk̲h̲*, ii, 296).

Bibliography: See *İA*, art. s.v. (by M.C. Baysun, of which the present article is a summary); Von Hammer, *HEO*, ix, 42-5; *SʿO*, iv, 150; A.H. de Groot, *The Ottoman Empire and the Dutch Republic*, Leiden 1978, 76, 286. (A.H. de Groot)

MEḤMED PAS̲H̲A, ELMĀS (1071-1109/1662-97), Ottoman Grand Vizier.

He was born in Hoşalay (formerly Mesed, to the east of Kerempe Burnu) (Kastamonu), the son of a shipmaster. As a young man (reputedly beautiful, hence his surname *Elmas* "Diamond"), he was taken into the service of the state by a chief inspector of the Sultan's treasury (*Bas̲h̲ Bāḳī Ḳulu*), Divrigili Meḥmed Ag̲h̲a, who was appointed governor of Tripoli in Syria in 1089/1677-8. From the service of the treasury, Meḥmed Pas̲h̲a Elmās was soon promoted to the palace service, to the *K̲h̲āṣṣ Oda* [*q.v.*] from where he made quick career as *Riḳābdār*, *Silāḥdār* in 1099/1687-8, *Mīr-i ʿAlem* (Standard-bearer) and *K̲h̲āzine Ketk̲h̲üdāsï*, leaving the palace service with the rank of Beglerbegi to become *Nis̲h̲ānd̲j̲ï* in 1101/1698-90. Soon afterwards he was made a vizier (*Ḳubbe Wezīri* [*q.v.*]). Sultan Muṣṭafā II (1106-15/1695-1703 [*q.v.*]) appointed him *Ḳāʾim-maḳām* at Istanbul on 23 D̲j̲umādā II 1106/9 February 1695. During the preparations for the campaign against the Emperor in Hungary, the Sultan decided to make him Grand Vizier instead of Sürmeli ʿAlī Pas̲h̲a [*q.v.*], who was executed (4 S̲h̲awwāl 1106/18 May 1695). Meḥmed Pas̲h̲a Elmās joined the three campaigns of Sultan Muṣṭafā II and was seen fighting at times. He distinguished himself during his second campaign when on 27 Muḥarram 1108/26 August 1696 the Ottoman army defeated the *Naʿl-Ḳïrān* Frederick Augustus, Elector of Saxony, who had laid siege to Temes̲h̲wār [*q.v.*], in the battle near the Bega River at Cenei (Buldur Köyü Bog̲h̲azï). During the campaign of 1697, he was again accompanied by the Sultan. In the council of war held at Belgrade on 27 Muḥarram 1109/15 August 1697, the Grand Vizier and Commander-in-Chief followed the advice of the majority of his commanders who agreed with the Vizier Ḳod̲j̲a D̲j̲aʿfer Pas̲h̲a, and ordered his army to march north across the Banat instead of following ʿAmūd̲j̲a-zāde Ḥüseyn Köprülü Pas̲h̲a's [*q.v.*] suggestion to go west in the direction of Peterwardein (Waradin [*q.v.*]). While crossing the Tisza river eastwards, the Grand Vizier's army was surprised by the Imperial army commanded by Prince Eugene of Savoy, who had reached this spot by a forced march towards nightfall on 11 September. This was near Zenta [*q.v.*]. A frightful bloodbath was the result of Prince Eugene's immediate attack. The Turks lost about 20,000 killed and 10,000 drowned. The Sultan, who watched the disaster, fled. The Janissaries broke into a mutiny and killed the Grand Vizier and many officers of his staff.

Elmās Meḥmed Pas̲h̲a was a young and elegant man of the palace (*čelebi*), of a lively character, intelligent and with experience in financial affairs, all of which assets made Muṣṭafā II select him for the highest office. However, it seems that he did not make himself popular with the viziers and the army. He left behind a son, Muṣṭafā Bey.

(A. H. de Groot)

MEḤMED PAS̲H̲A, GÜRD̲J̲Ü, K̲h̲ādim (I) (d. 1035/1626), Ottoman Grand Vizier.

Of Georgian origin, he served among the white eunuchs of the imperial harem under Sultan Meḥemmed III [*q.v.*] (1003-12/1595-1603). He was appointed *K̲h̲āṣṣ-Oda Bas̲h̲i̊* by Sultan Aḥmed I shortly after his accession (2 S̲h̲aʿbān 1012/4 January 1604). Around Rabīʿ II 1013/September 1604, K̲h̲ādim Meḥmed Ag̲h̲a was given the rank of Third Vizier in the *Dīwān*, but already on the 27 Rabīʿ II/22 September was appointed *beglerbegi* of Egypt. He was able to restore order in that province and punished the rebels among the Ottoman regular troops (*ḳul ṭāʾifesi*). Dismissed around Ṣafar 1014/June 1605, he left Egypt for Istanbul and was appointed *beglerbegi* of Bosnia (Ott. Bosna [*q.v.*]) as well as being put in charge of the military government (*muḥāfaẓa*) of Belgrade and the shores of the Danube. In Ṣafar 1018/May 1609, upon appointment as *serdār-i ekrem* (commander-in-chief) of the Grand Vizier Ḳuyud̲j̲u Murād Pas̲h̲a [*q.v.*], he was made *ḳāʾimmaḳām* while still at Belgrade. During the next year's campaign, Meḥmed Pas̲h̲a Gürd̲j̲ü was again left in charge as *ḳāʾim-maḳām* in the capital, in which function he continued till the return from the Persian front of the succeeding Grand Vizier Naṣūḥ Pas̲h̲a [*q.v.*] (1 S̲h̲aʿbān 1021/27 September 1612). During his tenure of this office, he supported the granting of capitulations to the Dutch Republic (6 July 1612). Remaining in the rank of Third Vizier, he had enough support from the palace to be able to refuse to be removed from Istanbul by the Grand Vizier by means of an appointment in a distant province; instead, he was ordered to reside inside the Sultan's palace. On 11 S̲h̲awwāl 1022/24 November 1613, at the departure of the Sultan to Edirne, he was appointed governor of Istanbul. The next Grand Vizier, Öküz Meḥmed Pas̲h̲a, made Meḥmed Pas̲h̲a Gürd̲j̲ü Second Vizier and *ḳāʾim-maḳām* for the duration of the campaigning season (Rabīʿ II 1024/May 1615). Later, he joined the K̲h̲otin [*q.v.*] campaign. In October 1619 he was degraded to the rank of Third Vizier, during the disgrace of Mere Ḥüseyn Pas̲h̲a, till July 1620. Before the outbreak of the revolt against Sultan ʿOt̲h̲mān (7 Rad̲j̲ab 1031/18 May 1622), he was made military governor of Edirne by that Sultan.

During Sultan Muṣṭafā I's second reign, the post of Grand Vizier was given to Meḥmed Pas̲h̲a Gürd̲j̲ü on 15 D̲h̲u 'l-Ḳaʿda 1031/21 September 1622. At this time of unrest and open revolt in the capital and in the Anatolian provinces, the new Grand Vizier's main task was to restore order, in which he was moderately successful as far as Istanbul was concerned, and this in spite of the fact that the rebellious Abāzā Meḥmed Pas̲h̲a [*q.v.*] was the son-in-law of Gürd̲j̲ü Meḥmed Pas̲h̲a's brother Ḥüseyn Pas̲h̲a. By Rabīʿ I 1032/January 1623, he had been able even to have executed some of those involved in the assassination of ʿOt̲h̲mān II. The military rebels in the capital, at the instigation of Mere Ḥüseyn Pas̲h̲a, sucessfully demanded the dismissal of the Grand Vizier, allegedly on account of his being an incompetent eunuch. He was exiled (to Malḳara [*q.v.*] in Thrace?) till D̲h̲u 'l-Ḳaʿda 1032/September 1623, when after the deposition of Muṣṭafā I, the Grand Vizier Kemānkes̲h̲ Ḳara ʿAlī Pas̲h̲a [*q.v.*] had both Meḥmed Pas̲h̲a Gürd̲j̲ü and K̲h̲alīl Pas̲h̲a (Ḳayṣariyyeli) [*q.v.*] arrested on the suspicion of collaborating with the rebel Abāzā Meḥmed Pas̲h̲a, since both viziers were personally linked with the latter by family, *intisāb* and *ṭarīḳat* relationships. Gürd̲j̲ü Meḥmed Pas̲h̲a was one of the favourite targets of the satirical verse of the poet Nefʿī [*q.v.*].

Soon the two prisoners were released again, and Meḥmed was made *ḳāʾim-maḳām* once more by the Grand Vizier Čerkes Meḥmed Pas̲h̲a [*q.v.*] (April 1624). The lack of success of the seven months' siege of Bag̲h̲dād by the Grand Vizier (Ṣafar-S̲h̲awwāl 1035/November 1625-July 1626) led the Janissary and Sipāhī soldiery at Istanbul to level once more their suspicions of treason or incompetence against Meḥmed Pas̲h̲a Gürd̲j̲ü (D̲h̲u 'l-Ḳaʿda 1035/August 1626). This time the probably unfounded accusations led to the execution of the old statesman who, according to some sources, was 90 years old by this time.

Three water fountains (*čes̲h̲me*) were piously founded by *K̲h̲ādim* Gürd̲j̲ü Meḥmed Pas̲h̲a in the K̲h̲alīd̲j̲ilar, K̲h̲irḳa-yi̊ S̲h̲erīf and S̲h̲ehzāde-Bas̲h̲i̊ quarters of Istanbul. His *türbe* is at Eyyūb in the second courtyard of the great mosque.

(A.H. de Groot)

MEḤMED PAS̲H̲A, GÜRD̲J̲Ü (II) (d. 1076/1666), Ottoman Grand Vizier.

Having been a slave (but not an eunuch) of Ḳod̲j̲a Sinān Pas̲h̲a [*q.v.*], he entered the palace service, beginning as an apprentice in the kitchen (*maṭbak̲h̲ emīnliği*) department. By D̲j̲umādā II 1023/ July 1614, he reached the rank of a *d̲j̲ebed̲j̲i bas̲h̲i̊*. While on campaign with Öküz Meḥmed Pas̲h̲a [*q.v.*] in the East, he was appointed *čawus̲h̲ bas̲h̲i̊* [*q.v.*] in D̲h̲u 'l-Ḳaʿda 1026/November 1617. In Rabīʿ I 1029/February 1620 he was made *ḳapi̊d̲j̲i̊ bas̲h̲i̊*, in which function he participated in Sultan ʿOt̲h̲mān II's K̲h̲otin campaign of that year. His career was not affected by the political upheavals of those years, and in Rad̲j̲ab 1032/May 1623 he became *beglerbegi* of Rumeli, the first of a long series of provincial government posts in the Asiatic and European parts of the empire.

Meḥmed Pas̲h̲a Gürd̲j̲ü saw a great deal of active military service, both in the successful suppression of revolts and in the Persian wars. Having reached vizieral rank as *beglerbegi* of Damascus previously, he was made *beglerbegi* of Diyārbekr in 1035/1626 and member of the *Dīwān* in the next year, holding successive provincial appointments next to that office. He joined Sultan Murād IV [*q.v.*] during the Eriwān campaign of 1635 and the Bag̲h̲dād campaign of 1638 in various governmental capacities. After 3 D̲h̲u 'l-Ḳaʿda 1049/25 February 1640, he was a *ḳubbe vezīri* once again till he fell out with the Grand Vizier Sulṭānzāde Semīn Meḥmed Pas̲h̲a [*q.v.*] (Muḥarram 1055/March 1645). At the behest of the all-powerful *Dār al-seʿāde Ag̲h̲asi̊* Uzun Süleymān Ag̲h̲a, Sultan Meḥemmed IV [*q.v.*] appointed the old and debilitated Pas̲h̲a, the oldest of all viziers at the time, Grand Vizier on 11 S̲h̲awwāl 1061/27 September 1651, in which function he lasted eight months and twenty-three days. He was unable to turn the campaign in Crete in a favourable direction, and could not dislodge the Venetian fleet from the Dardanelles. Nor were his diplomatic efforts to reach an armistice with Venice in any way effective. On the other hand, he provided posts for his brothers, son and many

friends and relations. His dismissal followed on 13 Radjab 1062/20 June 1652. After a short stay in Yedi Kule prison, he was allowed to live in his private residence in the Eyyūb quarter of the capital till he managed again to secure an appointment as provincial governor successively of Temes̲h̲wār and Cyprus (Ḳubruṣ [*q.v.*]) and Buda (Budun [*q.v.*]). It was probably there that he died of old age before 1 S̲h̲awwāl 1076/6 April 1666, when the news of his death reached Istanbul, according to the historian ʿAbdī Pas̲h̲a (*Weḳāyiʿ-nāme*, ms. Beyazid, *Umumi* 5154 946).

(A.H. de Groot)

MEḤMED PAS̲H̲A, ʿIWAḌ, Ḥadjdjī (el-Ḥādjdjī) (1085 or 1086-1156/1675-1743), Ottoman Grand Vizier.

He was the son of a descendant of the *Ewlād-i Fātiḥān*, one Naṣr Allāh, a *tīmār* holder at Jagodina. Educated for state service (hence *ʿiwaḍ*), he served with high-placed officials at Belgrade (1100/1689) and at Djudda (1107-8/1696), during which period he made the pilgrimage to Mecca. Having returned to Istanbul just before the Patrona K̲h̲alīl rebellion of 1730, he acted as *Gümrük Emīni*, Commissioner of the Istanbul customs house, on behalf of Yegen Meḥmed Efendi (Pas̲h̲a). Later, he served as Treasury Inspector (*Bas̲h̲-Bāḳī Ḳulu*). The Grand Vizier Ḥekīmog̲h̲lu ʿAlī Pas̲h̲a [*q.v.*] promoted him *Čawus̲h̲ Bas̲h̲ī* [*q.v.*] (1732).

In 1735 he became a vizier and acted for a short time as *ḳāʾim-maḳām* at Istanbul, after which he was sent to govern the *sandjaḳ*s of Niğbolu and Vidin. During the war, he for two years successfully defended his area against Austrian attacks. He was able to retake the fortresses of Hirsova and Fethülislam (the Yugoslavian Kladovo) as well as Semendire (the Yugoslavian Smederevo), Mehādiye (the Rumanian Mehadia) and Yeñi Palanka. Meḥmed Pas̲h̲a ʿIwaḍ served as commander-in-chief (*serdār*) on that front when, at the behest of the powerful *Ḳızlar Ag̲h̲asi* (*Dār al-Seʿāda Ag̲h̲asī*) Ḥadjdjī Bes̲h̲īr Ag̲h̲a, he was also appointed Grand Vizier (12 D̲h̲u 'l-Ḥidjdja 1151/23 March 1739) to replace Yegen Meḥmed Pas̲h̲a, whose policies he continued however along the same lines, on the one hand by opening diplomatic contact with the Austrians, on the other by aiming at the reconquest of Belgrade. He became famous for his splendid defeat of the Austrian army under Field-Marshal Olivier Wallis (56,000 strong plus light cavalry, artillery and irregulars). The Grand Vizier took up a defensive position to the north-west of Grocka (Ott. Ḥiṣārdjïḳ) (on 15 Rabīʿ II 1152/22 July 1739) overlooking the road from Belgrade which went through a defile. After fifteen assaults by the Janissaries, Field-Marshal Wallis retreated at nightfall, losing 3,000 killed and 7,000 wounded. Four days later, Belgrade was laid under siege by the Ottomans. Negotiations led to the conclusion of the peace treaty (1-18 September) between the Sultan, the Austrian Emperor and the Tsar at Belgrade, which meant an important restoration of Ottoman power in the Danube area.

In Rabīʿ 1153/June 1740 a local disturbance in the capital formed the pretext for Bes̲h̲īr Ag̲h̲a and the *Wālide Sulṭān* to have Meḥmed Pas̲h̲a ʿIwaḍ dismissed as Grand Vizier, relegating him to the governorship of Djudda, from which place he soon was able to transfer to Canea (Ott. Ḥanya). During the next three years, he successively served as military governor of Salonica, in Herzegovina (Ott. Hersek), Bosnia, Negroponte (Ott. Eg̲h̲riboz) and in Crete again. He died while acting as military governor of Lepanto (Aynabak̲h̲tï [*q.v.*]) in Djumādā I 1156/July 1743. His elder son Ibrāhīm became twice *S̲h̲eyk̲h̲ ül-Islām* and his younger son K̲h̲alīl became Grand Vizier in 1183/1769.

(A.H. de Groot)

MEḤMED PAS̲H̲A, ḲARAMĀNĪ, Nis̲h̲āndjï, (d. 886/1481), Ottoman Grand Vizier and historian.

A descendant of Djalāl al-Dīn Rūmī [*q.v.*], he grew up in Ḳonya where he received his education as an *ʿālim* from Muṣannifak al-Ṣiddīḳī who introduced him into the patronage of Maḥmūd Pas̲h̲a [*q.v.*]. Meḥmed Pas̲h̲a served as a clerk in the *dīwān* of that Grand Vizier and later became *müderris* in the *medrese* founded by the same at Istanbul, being at the same time a general adviser to his patron. Thanks to the latter, he became *nis̲h̲āndjï* [*q.v.*] in 869/1464, which high office he kept for about 12 years. From 4 D̲h̲u 'l-Ḳaʿda 862/13 September 1458, he already ranked as a vizier. His appointment as Grand Vizier following the dismissal of Gedik Aḥmed Pas̲h̲a [*q.v.*] dates from Muḥarram 881/May 1476 (cf. Ḳiwāmī, *Fetḥ-nāme-yi Sulṭān Meḥemmed*, ed. F. Babinger, Istanbul 1955, 273). In his new position, he became the main author of Sultan Meḥemmed II's [*q.v.*] legislative policy. This statesman, with his years of experience in matters of state and administration, must be seen as the creator of the new state institutions laid down in the the *ḳanūn-nāme*s [*q.v.*] of this period (cf. the editions of *MOG*, i [1922], *TOEM* [1330/1912] and Özcan [1982]). One of his lasting innovations was the division of the judiciary among two *Ḳāḍīʿaskers* , one for Rumeli and one for Anadolu. A great number of *wakf* and private landed properties were converted into state property as a base of the *tīmār* system, which had to support an increasing amount of military personnel. Meḥmed Pas̲h̲a's full support of the centralising policy of the Sultan caused his unpopularity among his fellow *ʿulamāʾ* and the old-established landowners of the *g̲h̲āzī* aristocracy (cf. ʿĀs̲h̲ïḳpas̲h̲azāde, *Tewārīk̲h̲-i Āl-i ʿOt̲h̲mān*, ed. Ç.N. Atsız, Istanbul 1947, 244).

When Grand Vizier, Meḥmed Pas̲h̲a Ḳaramānī supported Meḥemmed II in furthering the claim to the succession of Prince Djem [*q.v.*] against Prince Bāyezīd. His personal link with the city of Ḳonya must have offered a special opportunity, since Djem Sulṭān was governor of Ḳaramān. Bāyezīd (II) [*q.v.*] counted Ḳaramānī Meḥmed amongst his enemies henceforth (cf. R.C. Repp, *The Müfti of Istanbul*, 21, 72, 144, 199-201). The Grand Vizier accompanied the Sultan at the departure for the campaign of

886/1481. Thus he assisted his monarch during his last illness in camp at Maltepe (cf. Tursun Beg, *Taʾrīkh-i Abu 'l-Fatḥ*, ed. and tr. H. İnalcık and R. Murphey, Minneapolis, etc. 1978, 64, Ay 157 b-158 a). The Grand Vizier kept the death of the Sultan (4 Rabīʿ I 886/3 May 1481) a secret, but sent the news to both Prince Bāyezīd and Prince Djem. His aim was for Djem to arrive first in Istanbul and to make his accession there a *fait accompli*. For that purpose, the mortal remains of Meḥemmed II were secretly brought back to the capital by the court physicians, and then all communication was cut between the two shores of the Bosphorus. Meḥmed Pasha moved the *ʿAdjem-oghlan*s out of town and had the city gates closed, but his enemies intercepted his men and the news of the Sultan's death spread quickly. The Janissaries managed to cross the water by private means. Public order was utterly disturbed; Meḥmed Pasha could no longer halt the movements of the soldiery; he withdrew to his residence, but the insurgent Janissaries pursued him there and killed him in his private office (5 Rabīʿ I 886/4 May 1481). Meḥmed Pasha's men reached Ḳonya only on 3 May. The accession of Djem seems to have been doomed from the start, and Ḳaramānī Meḥmed Pasha thus failed to bring about his late Sultan's apparent last wishes.

Meḥmed Pasha Ḳaramānī's importance lies in his institutional and legal work, sc. in building up the state apparatus of what was becoming the Ottoman Empire. He practised his statecraft whilst also being an accomplished master of ornate prose. His *inshāʾ* writings include a famous letter addressed to the Aḳ Ḳoyunlu ruler Uzun Ḥasan [*q.v.*] (see Feridūn, *Münsheʾāt al-selāṭīn*, Istanbul 1264/1848, i, 271 ff.). He wrote poetry under the *makhlaṣ* Nishānī. In Arabic, he wrote a history of the Ottoman Empire in the form of two treatises, one dealing with the period from ʿOthmān I till Meḥemmed II's accession in 855/1451, the other covering the years 855/1451 to early 885/1480, the *Risāla fī tawārīkh al-salāṭīn al-ʿuthmāniyya* and the *Risāla fī taʾrīkh Sulṭān Muḥammad b. Murād Khān min āl ʿUthmān*. The latter includes 10 chronograms in verses describing his own deeds:

1. the building of Rumeli Ḥiṣārī (856/1453).
2. the conquest of Albania (871/1466-7).
3. the (re)construction of the *ič-ḳalʿe* on the castle hill of Ḳonya (872/1467-8).
4. the building of the "New Seraglio" (Ṭopkapī Sarāyī) at Istanbul (873/1468-9).
5. the taking of the fortress of Eghriboz [*q.v.*] (Negroponte) (874/1469-70).
6. the victory over Uzun Ḥasan (877/1472-3).
7. the death of Prince Muṣṭafā (878/1473-4).
8. the taking of Sharḳī Ḳaraḥiṣār (878/1473-4).
9. the building of the wall containing the "New Seraglio" (883/1478-9).
10. the building of the Imperial Stables (*Iṣṭabl-i ʿāmire* (883/1478-9).

These chronicles seem to be a recasting into Arabic of a simple calendar (*taḳwīm*) to which chronograms and ornate passages of *sadjʿ* have been added (cf. Ménage, *The beginnings of Ottoman historiography*). Ḳaramānī Meḥmed's text is one of a number of early historical works representing a group of sources distinct from the group of ʿAshīḳpasha-zāde, Urudj and the anonymous *Tewārīkh*. This group contains a different tradition about the origin of the Ottomans which is based on an older source than that used by the other group of histories dating from *ca.* 1399 (cf. İnalcık, *Rise*). Minor poets such as Ḳabūlī and Ḥamīdī wrote *ḳaṣīda*s and other poetry in praise of the *nishāndjī* and Grand Vizier.

Meḥmed Pasha Ḳaramānī had two wives. The first was Muṣannifak ʿAlāʾ al-Dīn ʿAlī al-Bisṭāmī's daughter, who gave him a son Zayn al-ʿĀbidīn ʿAlī Čelebi, who in his turn had a son of some renown, "al-Mawlā Muṣṭafā b. ʿAlī b. Meḥmed al-Ḳaramānī" (d. 965/1558). His second wife from 1471 was Sittī Shāh, daughter of the ex-Bey of ʿAlāʾiyye (Alanya), Ḳīlīdj Arslan. With the money of his second wife, he was able in addition to his other pious foundations to pay for the building of the mosque he wished to leave behind as a *waḳf*, the Nishāndjī Djāmiʿi in the Ḳumḳapī quarter of Istanbul. On the *ḳibla* side of it stands the ornamental tomb of the founder, called martyr of the Islamic faith, *shehīd*, in an inscription written by the *sheykh* Abu 'l-Wefāʾ (896/1491) (cf. tr. İ.H. Konyalı, in *Osmanlı tarihleri*, i/4, esp. 330-6).

(A.H. de Groot)

MEḤMED PASHA, LĀLĀ, Melek-Nihād (II), Ottoman Grand Vizier, who served Sulṭān Meḥemmed III [*q.v.*] for ten days only and then died on 19 Rabīʿ I 1004/22 November 1595. (Ed.)

MEḤMED PASHA, LĀLĀ, Shāhīnoghlu, Bosnalī (d. 1015/1606, Ottoman Grand Vizier.

Born in Jajce as a descendant of the Bosnian Shāhinoghullarī family, he was related to Ṣoḳollu Meḥmed Pasha [*q.v.*]. Taken into Ottoman service as a *dewshirme* [*q.v.*] boy, he was educated in the so-called Palace School [see enderūn]. During those years he was probably engaged in giving lessons in fighting to one or more Ottoman princes, hence his surname of *Lālā* "tutor". Lālā Meḥmed successively held the court functions of *Peshkīr aghasī*, *Küčük Mīr Ākhūr* and *Büyük Mīr Ākhūr* and left the palace service holding the post of Agha of the Janissaries (999?/1590-1?).

It was in this command that he served far away from the court and the Sultan's person on the battlefields in Hungary during the "Long War" (1001-15/1593-1606). Notably, he saw service under the Grand Vizier Ḳodja Sinān Pasha (1001-3/1593-5) before Raab (Ott. Yanīḳ-ḳalʿe, Hung. Györ) in 1002/1594. Dismissed following the siege of Tata (3 Shawwāl 1002/23 June 1594), he was made successively *beglerbegi* of Ḳaramān of Anadolu and then acted as military governor of the region of Buda (Ott. Budin). In 1003/1595, Lālā Meḥmed Pasha took over the command of the besieged fortress town of

Esztergom [*q.v.*] which he had to surrender to the imperial Commander-in-Chief Peter Ernst, Count Mansfeld (1517-1604). The negotiations were conducted on the Ottoman side by *inter alios* Ibrāhīm Pečewī [*q.v.*], Lālā Meḥmed's trusted secretary, who served him during 15 years of his life (cf. Pečewī, *Ta'rīkh*, ii, 64-6). The next year, Lālā Meḥmed Pasha was ordered to come to the bridge near Eszék [*q.v.*] to join the Ottoman main army and Sultan Meḥemmed III [*q.v.*] in person. He was promoted to vizieral rank. He assisted at the siege of Erlau (Ott. Eğri [*q.v.*]), of which town he was made commander after its fall on 17 Ṣafar 1005/12 October 1596. Lālā Meḥmed Pasha commanded the troops of Rumeli, i.e. the right wing in the battle of Mezö-Keresztes [*q.v.*] (Ott. Hač Owasî, 3-4 Rabīʿ I 1005/25-6 October 1596). In 1597 he served again on the front in Hungary. In Dhu'l-Ḥidjdja 1006/July 1598 he was appointed *Beglerbegi* of Rumeli, a promotion by favour of the Sultan. Lālā Meḥmed Pasha was present at the unsuccessful siege of Gross Wardein (Tk. Warad, now Rumanian Oradea Mare) from 1 October to 3 November 1598. Next year, he served in the army of the new Grand Vizier and *Serdār-i ekrem*, Commander-in-Chief, Dāmād Ibrāhīm Pasha against Neuhäusel (Hung. Ersekújvār, Ott. Uywar, Czech Nové Zámky). In 1600 Lālā Meḥmed served in the army of the Grand Vizier before (Nagy) Kanisza (Ott. Kaniče). In August, he was commander of the troops of Rumeli again and military governor of Buda. He was present at the 34 days' siege of Stuhlweissenburg (Ott. Ustolni Belgrad), which fortress surrendered to the Ottomans on 17 Ṣafar 1011/6 August 1602 (cf. Pečewī, *Ta'rīkh*, ii, 242 ff.). In November of the same year, he was ordered to succour Buda with 2,000 Janissaries, *djebedjis* and artillery against an imperial army (Pečewī, ii, 250). The Ottoman Commander-in-Chief was defeated at first near Pest on 4 Ṣafar 1012/14 July 1603, but soon afterwards was victorious north of Buda and thus able to carry reinforcements into the besieged fortress. The Imperial Army, commanded by the Archduke Matthias, then withdrew. Lālā Meḥmed Pasha was rewarded with the promotion to Third Vizier and the appointment as *serdār*. As such, he organised the defences of Buda and the bridges at Eszék, putting Murād Pasha, then *Beglerbegi* of Rumeli [see MURĀD PASHA, ḲUYUDJU] and Djelālī Deli Ḥasan Pasha, *Beglerbegi* of Bosnia, in command. He then sent the Anatolian troops on leave and withdrew to Belgrade for the winter (29 Rabīʿ II 1012/6 October 1603). At the death inside Belgrade of the Grand Vizier and Commander-in-Chief of the Western front Malḳoč ʿAlī Pasha (27-8 Ṣafar 1013/25-6 July 1604), Lālā Meḥmed took his place (cf. Pečewī, ii, 296). During a short campaign, he was able to reoccupy Pest and take the fortress towns of Hatvan and Waitzen (Vác). Esztergom was laid under siege (24 Djumādā I 1013/18 October 1604). The onset of winter made an end to warfare, since the Janissaries were unwilling to fight. Crimean Tatar light horse and the *Aḳindjis* were left in Hungary.

Alongside the conduct of war, Lālā Meḥmed Pasha also kept up diplomatic contact with the enemy in order to seek a peaceful end to the conflict; Murād Pasha (Ḳuyudju) played an important part in these negotiations. Lālā Meḥmed Pasha left for Istanbul to meet the Sultan in his quality of Grand Vizier and returned to the front again on 3 Muḥarram 1014/21 May 1605 with instructions to end the war by means of a treaty with the Emperor. The Grand Vizier recognised Stephen Bocskai as King of Hungary and invited him to join the army. A council of war was held at Eszék. The taking of Esztergom was declared to be the principal war aim. Párkány (Czech Sturovo, Ott. Čigerdelen) was taken on 29 August and Visegrad on 8 September 1605. Esztergom surrendered on conditions on 20 Djumādā I 1014/3 October 1605 (cf. the eyewitness account of Pečewī, *Ta'rīkh*, ii, 305 f.). The taking of this famous fortress and its surrounding places was followed by the conquest of others: Veszprém and Palota, and Neuhäusel on 9 Radjab 1014/20 November 1605. The Grand Vizier ordered a razzia of Tatar and Hungarian light cavalry into the Austrian lands, Croatia and Styria under the command of his nephew "Sarhosh" Ibrāhīm Pasha, the *Beglerbegi* of Kanisza. At Rakos on 7 Djumādā II 1014/20 October 1605, Lālā Meḥmed Pasha held a coronation ceremony for Stephen Bocskai, proclaimed King of Hungary. A crown had been especially made at Istanbul for this ceremony (this is now in the Kunsthistorisches Museum of Vienna, cf. H. Fillitz, *Die Schatzkammer in Wien*, Vienna 1964, 133, 17). Leaving Murād Pasha in charge, the Grand Vizier departed for Istanbul. It was his intention to exercise the supreme command over both the western and the eastern fronts from there. The Sultan's government, however, insisted on him going in person to the war in the east in the next season. The horse-tails (*tugh* [*q.v.*], were already put out at Üsküdar when the Grand Vizier died suddenly on 15 Ṣafar (or 16 Muḥarram?) 1015/23 June (or 25 May?) 1606. Rumours were current at the time that his rival Derwīsh Meḥmed Pasha [*q.v.*] had made the Sephardic Jewish court physician administer poison. Lālā Meḥmed Pasha was buried next to the mausoleum of his kinsman Ṣoḳollu Meḥmed Pasha at Eyyūb.

Bibliography: See *İA* art. s.v. (M.C. Ş. Tekindağ), on which the present article is largely based. A main source is Pečewī's *Ta'rīkh*, whose author personally witnessed the most important years of Lālā Meḥmed Pasha's career as a trusted official: İ.H. Danişmend, *Osmanlı tarihi kronolojisi*, Istanbul 1971, iii, index; C. Ballingal Finkel, *The provisioning of the Ottoman Army during the campaigns of 1593-1606*, in *Habsburgisch-osmanische Beziehungen. CIEPO Colloque Wien, 26-30 September 1983*, ed. A. Tietze, Vienna 1985, 107-23; Von Hammer, *HEO*, vii, 271 f., viii, 84 f., 97; ʿOthmānzāde Aḥmed Tā'ib, *Ḥadīḳat ül-wüzerā'*, 53 f. (A.H. DE GROOT)

MEḤMED PASHA, MELEK, DĀMĀD (1131-1216/1719-1802), Ottoman Grand Vizier under Sultan Selīm III [*q.v.*].

He was the son of Bosnalî Khodja Süleymān Pasha, Vizier and *Ḳapudān-î deryā* in 1126/1714 and 1130/1718 till his death in 1133/1721. Born in Istanbul, he followed his father's footsteps in a naval career, becoming commander (*Deryā begi*) in 1736, *Tersāne ketkhüdāsî* and *Ḳapudān-î deryā* himself (1165-8/1752-5). Sultan Muṣṭafā III (1171-87/1757-74) appointed him *Nishāndjî*, and married him to the Princess Zeyneb ʿĀṣima Sulṭān, a daughter of Aḥmed III (1757) (cf. A.D. Alderson, *The structure of the Ottoman dynasty*; no. 1268, Table XLI). He was then promoted Vizier and received the title of *Sandjaḳ begi* of Yanya. From 1763 onwards, he received appointments as military governor successively of Vidin and Belgrade, *Beglerbegi* of Anadolu, *Ḳā'im-maḳām* (1765) *Beglerbegi* of Aydîn, of Rumeli and in 1767-9 *Ḳapudān-pasha* again, during which tenure he made one tour through the Archipelago. In 1769 he was made both *Muḥaṣṣil* of Morea and *Ḳā'im-maḳām* at Istanbul, which function he held during the Russo-Ottoman War (1769-74).

After a spell out of office, he was made *Ḳapudān-*

pās͟ha a third time in 1774. From 1774 to 1776 he served as commander of K͟hotin [*q.v.*], also charged with the exchange of the Russian and Ottoman ambassadors. Governor of Belgrade 1776-9, he again became *Muḥaṣṣil* of Morea, then governor of Egriboz [*q.v.*], Egypt (1781), Belgrade, Candia (Ott. K͟handaḳ), Bender (1784) and Vidin (1786). Sultan Selīm III [*q.v.*] saved him from temporary disgrace, restored his vizier's rank and appointed him governor of Candia. On 12 Ramaḍān 1206/4 May 1792, Melek Meḥmed Pas͟ha received the imperial signet as token of his appointment as Grand Vizier. He stayed in office for two years and five months, being the senior of all viziers then living (*S͟heyk͟h ül-Wüzerā*ʾ).

He did not take part in the policy-making of the reformers around Selīm III, but loyally supported the Sultan's policy with the residual influence which he still had. The reason for his dismissal must have been extreme old age, having served the state for 59 years. Meḥmed Pas͟ha was allowed to retire to his waterside villa at Ortaköy on the Bosphorus, where he died on 16 S͟hawwāl 1216/19 February 1802. His tomb is next to the *türbe* of his wife Zeyneb Sulṭān at the mosque founded by her at Soğukçeşme near the Bāb-i ʿĀlī.

(A.H. de Groot)

MEḤMED PAS͟HA, MUḤSIN-ZĀDE (1116?-1188/1704?-74), Ottoman Grand Vizier.

Son of the Grand Vizier Muḥsin-zāde ʿAbd Allāh Pas͟ha (held office in 1150/1737) and born in Istanbul, he entered the Palace service as a *Ḳapïd̲jï Bas͟hï*. In 1150/1737 he became *Ḳapïd̲jïlar Ketk͟hudāsï* and in 1151/1738 vizier and *Beglerbegi* of Marʿas͟h. After 10 years of provincial governmental posts he was in 1160/1747 appointed to the reorganised province of Adana with special orders to hunt down the rebellious elements in Anatolia. From 1162/1749 onwards in various provincial posts in the European provinces, he became in 1171/1758 *Beglerbegi* of Aleppo. On this occasion he was married to the princess Esmāʾ Sulṭān (cf. A.D. Alderson, *The structure of the Ottoman dynasty*, Oxford 1956, no. 1244, Table XLI), a daughter of Aḥmed III. There followed quickly, one after another, the appointments as *Beglerbegi* of Diyārbekr, Anadolu (at Kütahya) and Bosnia (1760), staying one year with his wife at his palace at Ḳadïrga (Istanbul), before proceeding to his post. From 1175/1762 he occupied the governorships of Rumeli and Bosnia, twice each, before being called to the Grand Vizierate on 7 S͟hawwāl 1178/30 March 1765. During his tenure of office, revolts in Arabia, Egypt and Georgia broke out and Russian pressure increased. The Grand Vizier did not think the Empire could sustain a war with that power, but his opinion did not prevail in the *Dīwān*.

Muḥsin-zāde Meḥmed resigned on 23 Rabīʿ II 1182/6 September 1768 and was ordered to reside in Bozd̲ja-Ada (Tenedos [*q.v.*]), Gallipoli (Gelibolu [*q.v.*]) and Rhodes (Rodos [*q.v.*]). In 1182/1769 appointed military governor (*Muḥāfiẓ*) of the Morea, he was able to defeat the Russian-inspired rebellion there in a battle at Tripolitza (Ott. Tripoliče) in D̲hu l-Ḥid̲jd̲ja 1183/April 1770, after which he restored Ottoman authority in the main centres of Patras (Ott. Balya Badra [*q.v.*]), Modon (Ott. Muṭun [*q.v.*]), Navarino (Ott. Navarin [*q.v.*]). In 1185/1771 he went as commander of the Ottoman troops to the Danube front. From S͟haʿban/November 1771, Muḥsin-zāde Meḥmed was Grand Vizier again till his death on 26 D̲jumādā I 1188/4 August 1774. During those three years, Ottoman arms were unsuccessful against the Russians. The Grand Vizier opened peace negotiation again, first with the Austrians and then with the Russians (Bucharest conference, from November 1772 to February 1773). The Russian demands, including the independence of the Khanate of the Crimea [see ḳïrïm] and high war indemnities were not yet acceptable to the Ottomans, and peace was not reached till the Russian army under the Field Marshall Peter A. Rumyants͟ev encircled the Grand Vizier at S͟humnu (Bulg. Shumen) and proposed negotiations again.

Muḥsin-zāde Meḥmed Pas͟ha accepted this proposal immediately. The negotiations between the two delegations, the Ottoman one led by his *Ṣadāret-Ketk͟hüdāsï* (afterwards *Nis͟hānd̲jï*) Aḥmed Rasmī Efendi [*q.v.*] (see idem, *K͟hulāṣat ül-iʿtibār*, cf. *GOW*, 288, 309-12), were held at the Russian headquarters 17-21 July 1774 and led to the treaty of Küčük Kaynard̲ja [*q.v.*]. The Grand Vizier became ill soon afterwards and withdrew to return to Istanbul. On the way near Karnobad (Tk. Ḳarïnābād) he died on 26 D̲jumādā I 1188/4 August 1774. On the orders of his widow Esmāʾ Sulṭān, he was buried at Eyyūb next to the gate of the great mausoleum.

(A. H. de Groot)

MEḤMED PAS͟HA, ÖKÜZ, Dāmād, Ḳara, 964?-1029/1557?-1620) Ottoman Grand Vizier.

Born in Istanbul the son of a Muslim blacksmith, he entered the palace service in spite of the fact of his being of Muslim Turkish origin. After about 40 years service as a *silāḥdār*, he left the Palace with the rank of a Vizier and became *Beglerbegi* of Egypt (D̲hu 'l-Ḥid̲jd̲ja 1015/April 1607). Arriving there the same year in May (Muḥarram 1016), he became busy with administrative reform. He abolished the illegally-imposed levies of *ṭulba*, *kulfa* and *kus͟hūfiyya*, which formed an excessively heavy burden for the tax-paying population. He was able to suppress a resulting rebellion of the (*ḳul*) *sipāhī*, *tüfenkčis* and *gönüllüs* of the Ottoman garrison, together with the Mamlūk cavalry corps (1017/1608). This "second conquest" of Egypt gained him the epithet *Ḳul-ḳïran* "Breaker of the Slave Soldiers". Thanks to his efficient government, Öküz Meḥmed Pas͟ha was able to send a surprisingly large sum as tribute of Egypt to the Porte. This success brought him 1020/1611 favour from on high. He was made *Ḳapudān Pas͟ha* and Second Vizier instead of K͟halīl Pas͟ha Kayṣariyyeli [*q.v.*]. Sultan Aḥmed I [*q.v.*] gave him his seven-year old daughter D̲jawhar K͟hān Sulṭān in marriage (1020/1612) (cf. A.D. Alderson, *The structure of the Ottoman dynasty*, Oxford 1956, Table XXXIV, no. 1154 "Gevherhân"). In spite of his new status, Öküz Meḥmed Pas͟ha was not successful in his opposition to the granting of an *ʿahd-nāme* involving capitulations [see imtiyāzāt] to the Dutch Republic 1/10 D̲jumādā I 1021/6 July 1612 [see K͟halīl pas͟ha ḳayṣariyyelī].

In command of a squadron of 30 galleys, he went out to sea in the 1022/1613 season. His aim was to attack Maltese and Tuscan corsairs who had ravaged the southern shores of Anatolia and had raided Agha Limanî (near Silifke). His defeat, however, by the Spanish admiral in the service of the Viceroy of Naples, Ottaviano de Aragon, off Samos [see SUSAM] brought him relative disgrace.

He was made *Ḳāʾim-maḳām*, but after the execution of the Grand Vizier Naṣūḥ Pasha [*q.v.*], he succeeded to the highest office on 13 Ramaḍān 1023/17 October 1614. In this new capacity, he restored the members of his faction to office again. Öküz Meḥmed Pasha was appointed Commander-in-Chief of the army formed to counter the aggression of Shāh ʿAbbās I of Persia [*q.v.*], who had violated the treaty concluded with Naṣūḥ Pasha (26 Ramaḍān 1021/20 November 1612). In Djumādā I 1024/June 1615 the Grand Vizier left for Aleppo, too late however for action that year. The army stayed in winter quarters in Marʿash (now Kahramanmaraş), Malaṭya, Sivas and Ḳaramān. In April 1616 Öküz Meḥmed Pasha left Aleppo and marched towards Eriwān to confront the Persian Shāh. The Grand Vizier himself went to Ḳars via Göksün Yayla and Erzurum, despatching important contingents of his large army in the direction of Eriwān and Nihāwand. Having ordered the strengthening of the fortifications of Ḳars, he marched to Eriwān (Ott. Rewān), defeated the Persian forces and laid siege to that fortress. His lack of siege artillery and the strong resistance of the garrison forced him to lift the siege after 60 (or 44?) days, agreeing to a settlement based on the terms of 1021/1612 accepting a reduction by half of the Persian tribute of silk, i.e. to only 100 *yük*. The Ottoman main army then returned to Erzurum (27 Shawwāl 1025/7 November 1616). The Grand Vizier wintered at Ṣoghanlî Yayla. The accusation of neglect of duty levelled at the Grand Vizier after this meagre result of his campaign led the Sultan to dismiss his favourite son-in-law (8 Dhu l-Ḳaʿda 1025/17 November 1616), who nevertheless retained the rank of Second Vizier and was ordered to assist his successor in office, Khalīl Pasha, towards the conclusion of a definitive treaty of peace with Shāh ʿAbbās I. Peace was at last concluded on 6 Shawwāl 1027/26 September 1618 in the Ottoman camp in the plain of Sarāb (near Ardabīl), deep inside Ṣafavid territory.

Sultan ʿOthmān II [*q.v.*] appointed Öküz Meḥmed Pasha Grand Vizier again in place of Khalīl Pasha (1 Ṣafar 1028/18 January 1619). In his new quality, he sent the Ottoman ratification of the Sarāb treaty to Shāh ʿAbbās on 13 Shawwāl 1028/23 September 1619 (cf. *Ghazā-nāme-yi Khalīl Pasha*, ms. Es'ad Efendi 2139, fol. 119b; Ferīdūn, *Münsheʾāt*, Istanbul 1275, ii, 325). Later in 1029/1619, a conflict broke out between the Grand Vizier and the then favourite of the Sultan, the *Ḳapudān-pasha*, the Vizier Güzeldje Istanköylü ʿAlī Pasha [*q.v.*], Meḥmed Pasha once again, as in 1021/1612 in his conflict with Khalīl Pasha, tried to use the help of the ambassadors of Venice and France against his rival, but to no avail, since the Sultan dismissed him and made ʿAlī Pasha Grand Vizier instead (16 Muḥarram 1029/23 December 1619). Öküz Meḥmed's private property was confiscated and he himself banished from Istanbul with the appointment as *Beglerbegi* of Aleppo, and it was in that city that he died not long afterwards.

A *türbe* was built inside the *zāwiya* of Shaykh Abū Bakr (cf. Kātib Čelebi, *Fedhleke*, i, 402). *Wakfs* founded by Öküz Meḥmed Pasha included a *külliyye* in the Ḳaragümrük quarter of Istanbul where he was born, and a complex including a great *khān* and a market at Ulukışla (in Niğde province on the road to the Cilician Gates (Gülek Boghazî, see CILICIA) (cf. A. Gabriel, *Monuments turcs d'Anatolie*, Paris 1931, i, 156, pl. LV). At Cairo, he built barracks for the Janissary and *ʿAzab* corps and a *zāwiya* with a row of shops for the benefit of the Mawlawiyya [*q.v.*] order of dervishes to which he was himself linked. Elsewhere in Egypt and Syria he erected facilities along the main routes to Mecca.

(A.H. DE GROOT)

MEḤMED PASHA RĀMĪ, Ottoman Grand Vizier and poet, was born in 1065/1655 or 1066/1656 in Eyyūb, a suburb of Istanbul, the son of a certain Ḥasan Agha. He entered the chancellery of the Reʾīs Efendi as a probationer (*shāgird*), and through the poet Yūsuf Nābī [*q.v.*] received an appointment as *maṣraf kātibi*, i.e. secretary for the expenditure of the palace. In1095/1684, through the influence of his patron, the newly appointed *Ḳapudān pasha* [*q.v.*] Muṣṭafā Pasha, he became *dīwān efendi*, i.e. chancellor of the Admiralty. He took part in his chief's journeys and campaigns (against Chios) and on his return to Istanbul became *reʾīs kesedārî*, i.e. pursebearer to the Reʾīs Efendi. In 1102/1690 he was promoted to *beylikdji*, i.e. vice-chancellor, and four years later *Reʾīs Efendi* in place of Abū Bakr, in which office he was succeeded in 1108/1697 by Küčük Meḥmed Čelebi. After the battle of Zenta (12 September 1697), he became *Reʾīs Efendi* for a second time and was one of the plenipotentiaries at the Peace of Carlowitz (Ḳarlofča [*q.v.*]), by the conclusion of which "he put an end to the ravages of the Ten Years' War but also for ever to the conquering power of the Ottomans" (J. von Hammer). As a reward for his services at the peace negotiations he was appointed *ḳubbe wezīri* with 3 horse tails (*tugh*) in 1114/1703 and 6 Ramaḍān 1114/January 24, 1703, appointed to the highest office in the kingdom in succession to the grand vizier Daltaban Muṣṭafā Pasha. In this office he devoted particular attention to the thorough reform of the civil administration, by reform of the civil administration, through the abuses in which he saw the security of the state threatened (cf. von Hammer, *GOR*, vii, 64). "By lessening the burden of fortresses on the frontiers in east and west, by raising militia against the rebel Arabs, by securing the pay of the army from the revenues of certain estates, by making aqueducts, by restoring ruined mosques, by taking measures for the safety of the pilgrim caravans and for the security of Asia Minor, by settling Turkmen tribes, by ordering the Jewish cloth manufacturers in Selānik and the Greek silk manufacturers in Bursa in future to make in their factories all the stuffs hitherto imported into Turkey from Europe" (von Hammer), he exercised a most beneficent activity, which however soon aroused envy and hatred, and since Meḥmed Pasha Rāmī was entirely a man of the pen

and not of the sword, he was unpopular with the army, particularly the Janissaries, and this was bound to lead to his fall (cf. *GOR*, vii, 72). In the great rising in Istanbul which lasted four weeks, beginning with the enthronement of Sultan Muṣṭafā II and ending with his deposition (9 Rabīʿ II, 1115/22 August 1703), his career came to an end. He was disgraced, but pardoned in the same year and appointed governor, first of Cyprus, then of Egypt (October 1704). His governorship there terminated as unhappily as his grand viziership (cf. *GOR*, vii, 133, following Rās͟hid and La Motraye). In D̲jumādā I 1118/September 1706, he was dismissed and sent to the island of Rhodes, where he died in D̲h̲u 'l-Ḥid̲jd̲ja 1119/March 1707, either under torture or a result of it (cf. *GOR*, vii, 134, quoting the *internuntius* Talman). Meḥmed Pas͟ha Rāmī is regarded as a brilliant stylist, as the two collections of his offical documents (*ins͟hāʾ*) containing no less than 1,400 pieces, distinguished by their simple clear and elevated style, amply show (cf. the mss. in Vienna, Nat. Bibl. nos. 296 and 297, in G. Flügel, *Die arab., pers. u. türk. Hss.*, i, 271-2). Meḥmed Pas͟ha Rāmī also left a complete *Dīwān*, of which specimens are available in the *Ted͟hkire* of his son-in-law Sālim (cf. F. Babinger, *GOW*, 272-3; printed Istanbul 1315). His poetical gifts were inherited by his son ʿAbd Allāh Reʾfet (cf. Bursalī Meḥmed Ṭāhir, *ʿOt͟hmānlī müʾellifleri*, ii, 187).

Bibliography: J. von Hammer, *GOR*, vii, *passim*; the history of the Istanbul rising was written by Meḥmed S͟hefīḳ; *ʿOt͟hmānlī müʾellifleri*, ii, 186; Sālim, *Ted͟hkire*, 252-8; ʿOt͟hmānzāde Aḥmad Tāʾib, *Ḥadīḳat ül-wüzarāʾ*, Istanbul 1271, at the end; Aḥmad Resmī [*q.v.*], *K͟halīfat al-ruʾasāʾ*, Istanbul 1269, 47; *Sid̲jill-i ʿot͟hmānī*, ii, 367; von Hammer, *Geschichte der Osmanischen Dichtkunst*, iv, 26; *İA*, art. *Meḥmed Paşa Râmî* (Bekir Sıtkı Baykal).

(F. Babinger)

MEḤMED PAS͟HA, RŪM or Rūmī (d. 883/1478), Ottoman Grand Vizier.

Being of *ḳul* status, his origins, whether Greek or Albanian, are obscure. Sultan Meḥemmed II [*q.v.*] admitted him into his intimate circle after the unsuccessful Albanian campaign of 870/1466 during which Meḥmed Pas͟ha became Second Vizier. In 1468/872 he joined the campaign against Ḳaramān [see ḳaramān-og͟hullarī], during which he manifested his rivalry with the Grand Vizier Maḥmūd Pas͟ha [*q.v.*]. Instead of him, Meḥmed Pas͟ha was charged with the deportation of selected members of the populations of the cities of Ḳaramān, Ḳonya [*q.v.*] and Laranda [*q.v.*], mainly artisans, other professionals and merchants. The older Ottoman chronicles agree in the disapproval of the Greek's harsh treatment of the Muslim people in question, giving a picture of this Pas͟ha as if he were effecting an act of revenge for the Istanbul Greek population's fate (cf. ʿĀs͟hīḳpas͟ha-zāde, tr. R.F. Kreutel, *Vom Hirtenzelt zur Hohen Pforte*, Graz, etc. 1959[1], 201 f., 238, 240 f., see also *idem*, ed. ʿĀlī, Istanbul 1332, 143, 170, 191).

As a reward for his zeal in serving his master's policy of repopulating the city of Istanbul, Rūm Meḥmed Pas͟ha was appointed Grand Vizier instead of Maḥmūd Pas͟ha in 873/1468-9. The members of his faction were given important positions too; *inter alios*, Mollā Meḥmed Wildān became *Ḳāḍī-ʿasker*, whilst K͟hāṣṣ Murād, Gedik Aḥmed and Özgürog͟hlu ʿĪsā Bey all became viziers. His continued harsh policy towards the Muslim population of Ḳaramān, which included the wide-scale confiscation of freehold property and *waḳf*s, caused an armed resistance organised by the Ḳaramānog͟hlu princes Pīr Meḥmed and Ḳāsim, who made themselves masters of the town of Laranda. Meḥmed Pas͟ha's counter-offensive was swift. Laranda and Ereğli were destroyed in 874/1469-70. All local *waḳf* and private property was confiscated. Moving to Alanya (ʿAlāʾiyye [*q.v.*]), he was unable to conquer that fortress town. Contemporary sources tried to explain this lack of vigour as due to Meḥmed Pas͟ha's being married to a sister of Ḳīlīd̲j Arslan, the last Bey of Alanya. The Grand Vizier continued his punitive expedition by persecuting the Warsak Türkmen tribe, who were able to inflict a defeat on Rūm Meḥmed's forces in the Cilician mountains. Meḥemmed II dismissed his Grand Vizier for this failure (875/1470-1). Rūm Meḥmed Pas͟ha was thereupon given a command in the expedition to conquer Negroponte (Eg͟hriboz [*q.v.*]) in D̲h̲u 'l-Ḥid̲jd̲ja 874 and Muḥarram 875/June and July 1470. The rivalry between him and Maḥmūd Pas͟ha and Ḳaramānī Meḥmed Pas͟ha [*q.v.*] must have been the cause of his downfall and execution in 877/1472-3. Some sources cite Rūm Meḥmed Pas͟ha's involvement in the repopulation of Istanbul as an example of his talent as a financial administrator. He seems to have introduced the levy of rent on houses (the so-called *muḳāṭaʿa*) from the newly-settled inhabitants of the new capital, who till then had enjoyed their new property rights free of any taxation (cf. *İA* art. *Meḥmed II* (H. İnalcık)). Rūm Meḥmed Pas͟ha seems to have been an efficient instrument of Meḥemmed II's centralising policies, especially those of turning private landholdings into state property (*mīrī*) at the expense of the old-established local population, in this way creating *tīmār* estates for the Sultan's servants.

He was the founder of *inter alia* a beautifully situated *külliyye* at Üsküdar, of which the mosque is still standing, overlooking the Bosphorus: one of the few buildings in fact left from the days of the Conqueror. Next to the mosque stands the *türbe* in which the founder lies buried, together with a grandson and his daughter.

MEḤMED PAS͟HA ṢARĪ, Defterdār, Baḳḳāl-og͟hlu [see ṣarī meḥmed pas͟ha]

MEḤMED PAS͟HA ṢOḲOLLĪ, Ṭawīl [see ṣoḳollī, ṣoḳollu]

MEḤMED PAS͟HA, SULṬĀN-ZĀDE, D̲jiwān Ḳapīd̲jī-Bas͟hī, Semīn (1010-56/1602-46), Ottoman Grand Vizier.

He was born in Istanbul as the son of ʿAbd al-Raḥmān Bey (himself a son of Semīz Aḥmed Pas͟ha, Grand Vizier 887-8/1579-80, by origin an Albanian *dews͟hirme* boy) and of Hümās͟hāh ʿĀʾis͟he K͟hanīm Sulṭān, a daughter of Čig͟hala-zāde Sinān Pas͟ha [*q.v.*], thus being a grandson of Princess Mihr-i Māh

Sulṭān [*q.v.*], hence his surname Sulṭān-zāde (cf. A.D. Alderson, *The structure of the Ottoman dynasty*, Oxford 1956, Table XXX, no. 2128). Meḥmed Pas̲h̲a was educated in the imperial harem and the *K̲h̲āṣṣ Oda* [*q.v.*]. Whilst only 19 years old, he became a *Ḳapîd̲j̲î-Bas̲h̲î* during the K̲h̲otin campaign of Sultan ʿOt̲h̲mān II. Already in 1040/1630-1, because of the highest patronage, he became a *ḳubbe wezīri* [*q.v.*]. In 1042/1633 Sultan Murād IV dismissed him for reasons of incompetence in the preparation of the campaign against Persia, and banished him to Rhodes. In 1047/1637-8, reinstated as Second Vizier, he went for three years to Egypt as *Beglerbegi*. Having been back in Istanbul since 1050/1640, he became *wālī* of Oczakov (Ott. Özü) with the task of retaking Azov [see AZAḲ] (4 D̲h̲u 'l-Ḳaʿda 1051/4 February 1642). Thanks to the Don Cossacks having abandoned the fortress previously, Meḥmed Pas̲h̲a became master of Azaḳ without any bloodshed. Upon his return to the capital, the Grand Vizier Kemānkes̲h̲ Ḳara Muṣṭafā Pas̲h̲a (1048-52/1638-43) removed him from the centre of power by making him *Beglerbegi* of Damascus (Rad̲j̲ab 1053/October 1643). It was there that he received the seal of office and the appointment as Grand Vizier (21 D̲h̲u 'l-Ḳaʿda 1053/31 January 1644), thanks to his collaboration with the faction of D̲j̲ind̲j̲i K̲h̲od̲j̲a [see ḤUSAYN EFENDI], Sultan Ibrāhīm's [*q.v.*] favourite. On 1 Muḥarram 1053/10 March 1644, the new Grand Vizier arrived in the capital.

Next year, he was involved in the preparations of the war against Crete (1055-79/1645-69). He was highly critical of the conduct of the *Ḳapudān-î deryā* and *serdār*, Silāḥdār Yūsuf Pas̲h̲a, whose only success was the taking of Canea (Ott. Ḥanya). The Grand Vizier lost the struggle with this rival when the Sultan justified Yūsuf Pas̲h̲a in all respects, and he was dismissed. In D̲h̲u 'l-Ḳaʿda 1055/January 1646 he was in his turn appointed *serdār* of the Cretan campaign. Outside the Dardanelles, Meḥmed Pas̲h̲a's fleet of galleys encountered the Venetian sailing squadron of Tommaso Morosini off Tenedos (Ott. Bozd̲j̲a Ada [*q.v.*]) and successfully passed the Venetian blockade (19 Rabīʿ II 1056/4 June). Arriving at Crete on 27 D̲j̲umādā II 1056/10 August 1646, he decided to lay siege to the fortresses of Suda and Aprikorno near Canea. Already ill during the voyage thither, Meḥmed Pas̲h̲a died on 28-9 D̲j̲umādā II 1056/11-12 August 1646 in camp before Suda. His body was brought home to be buried next to his mother ʿĀʾis̲h̲e K̲h̲anîm Sulṭān in the cemetry of the *türbe* of ʿAzīz Maḥmūd Hüdāʾī at Üsküdar. A son and grandsons of his are mentioned in *SʿO*, iv, 161 ff.

MEḤMED PAS̲H̲A, TABANÎYASSÎ (997?-1049/1589?-1639), Ottoman Grand Vizier.

Of Albanian origin, he was taken from his home at Tas̲h̲lîd̲j̲a as a *devs̲h̲irme* boy and entered the palace service [see ENDERŪN]. The protection of the *Dār al-Saʿāda Ag̲h̲asî* Ḥad̲j̲d̲j̲ī Muṣṭafā Ag̲h̲a provided him with a quick career from *Mīr Āk̲h̲ūr* to vizier and *Beglerbegi* of Egypt before becoming Grand Vizier on 28 S̲h̲awwāl 1041/18 May 1632. He assisted Sultan Murād IV [*q.v.*] in suppressing opposition forces in the capital, thus making it possible for the sultan to rule in person. Meḥmed Pas̲h̲a favoured a foreign policy of neutrality in the European wars, which implied discreet contacts with Swedish and Transylvanian diplomacy. While on campaign against Persia, the Grand Vizier wintered at Aleppo (1043/1633-4). At the end of the season, he stayed in Diyārbekr (1043-4/1634-5) till 18 S̲h̲awwāl 1044/6 April 1635 in order to meet Murād IV at Erzurum on 17 Muḥarram 1045/3 July 1635, the two of them marching together to Eriwān. This Persian fortress surrendered on 18 Ṣafar/3 August, but was lost again next year (24 S̲h̲awwāl 1045/1 April 1636). Before that date, Meḥmed Pas̲h̲a had been already dismissed (24 S̲h̲aʿbān 1045/2 February 1636). Later the same year, he was military governor of Oczakov (Ott. Özü). In S̲h̲aʿbān 1047/January 1638 he was moved to Buda, but shortly afterwards became *Ḳāʾim-maḳām* at Istanbul. After a short time in disgrace again, Meḥmed Pas̲h̲a was jailed in Yedi Kule prison and killed. His tomb is at Miskinler Tekkesi.

MEḤMED PAS̲H̲A, TIRYĀḲĪ, ḤAD̲J̲D̲J̲Ī (? 1091-1164/?1680-1751), Ottoman Grand Vizier.

The son of an *Odabas̲h̲î* (Janissary Officer) born in Istanbul, he was himself enrolled in the Janissary Corps, and made a career as a "civil servant", reaching the post of Corps Secretary (*Ag̲h̲a Ḳapîsî Yazîd̲j̲îsî* or *Yeničeri Efendisi*) in 1149/1736. He was removed from that position because of his misappropriations of pay money while serving with the corps on campaign. In fact, he was denounced by the "Corps Merchant", Dāwūd. Thanks to the protection of the *Ketk̲h̲üdā* [*q.v.*] of the Grand Vizier, he was appointed soon afterwards *Süwārī Muḳābeled̲j̲i* (Audit Officer of the Cavalry Corps of the Sublime Porte). This new career made Meḥmed Efendi one of the chief clerks of the Ottoman chancery (*K̲h̲ʷād̲j̲egān-i Dîwān-î Hümayūn* [*q.v.*]). In 1739 he became *Mewḳūfātī*, a high official in the *Defter-k̲h̲āne* [*q.v.*]. In this capacity, Meḥmed Efendi served at the negotiations of the Peace of Belgrade held with the Imperial Austrian and Russian plenipotentiaries. He remained in and around Belgrade till 1154/1741, serving on the mixed Ottoman-Austrian boundary commission with Ḳāḍī Ebū Sehil Nuʿmān Efendi. Later, he was twice made *Yeničeri Efendisi* again. In 1745 he became *Tersāne Emīni* [see TERSĀNE] in which capacity he directed the complete restoration and extension of the Imperial Naval Dockyard at Istanbul after its destruction by fire. He earned Sultan Maḥmūd's [*q.v.*] favour and was promoted to be "General Deputy" (*ketk̲h̲üdā* = *kāhya*) [*q.v.*] of the Grand Vizier on 7 D̲j̲umādā II 1159/27 June 1746. A month and a half later, he succeeded his chief in office as Grand Vizier himself on 21 Rad̲j̲ab 1159/10 August 1746 (cf. *Sid̲j̲ill-i ʿOt̲h̲mānī*, iv, 237, with wrong date). According to contemporary sources his lifelong habit of taking drugs (*tiryāḳ*) made Meḥmed Pas̲h̲a often behave in an ill-mannered and insulting way towards high officers of state and *ʿulamāʾ*. At the same time, it must be noted, he made a large number of changes in official appointments

while in power (cf. Süleymān ʿIzzī, Taʾrīkh, fols. 66a-72a).

During his tenure of office, Ottoman diplomacy saw great events. Peace was made with Nādir Shāh [q.v.] on 17 Shaʿbān 1159/4 September 1746 (cf. Nāẓif Muṣṭafā Efendi, *Īrān sefāretnāmesi*, in F.R.Unat, *Osmanlı sefirleri ve sefâretnâmeleri*, Ankara 1968, 84 + ill.). In 1160/1747 Meḥmed Pasha rejected the French overtures to make an offensive alliance against Austria; the Porte had not forgotten how France refused the Ottoman offer of mediation in 1158/1745 and remained distrustful of French motives (cf. I. de Testa, *Recueil des traités de la Porte Ottomane*, Paris 1864, ii, 178 f.). On the contrary, Meḥmed Pasha had the peace confirmed with the new Austrian ruler, the Empress Maria Theresa, on 10 April 1747. This agreement was followed up by a treaty of friendship and commerce with Tuscany on 27 May 1747 (cf. *Muʿāhedāt Medjmūʿasī*, Istanbul 1297, iii, 135 ff.; ʿIzzī, *op. cit.*, fols. 114-121).

Sultan Maḥmūd I (1143-68/1730-54)—following his personal policy of maintaining his viziers only during a limited time in office—dismissed Meḥmed Pasha himself on 18 Shaʿbān 1160/24 August 1747. As the reason for this, the imperial *firmān* adduced the Grand Vizier's ill-treatment of persons in high places. Meḥmed Pasha ran into conflict with the *Sheykh ül-Islām* Meḥmed Esʿad Efendi; so much is certain. The ex-Grand Vizier was banished to Rhodes. Soon afterwards he was given the *sandjaḳ* of Ičel [q.v.] in *arpalïk*. On 7 Rabīʿ I 1161/7 March 1748, Meḥmed Pasha became *Beglerbegi* of Mawṣil, and eight months later *Beglerbegi* of Baghdād. This latter appointment was made during the interregnum between the *mamlūk* Aḥmed Pasha (d. 1160/1747) and his chosen successor, Süleymān Pasha, "Abū Laylā", who in 1162/1749 was to be the true founder of the Mamlūk dynasty which ruled from Baghdād till 1831. The Ottoman central government tried to reassert its authority in the province by sending thither appointees of its own, but this policy remained unsuccessful. Tiryāḳī Meḥmed Pasha was not able to establish his authority against the will of the local opposition. He was recalled and appointed *Beglerbegi* of the *eyālet* of Ḥabesh and *Sheykh ül-Ḥarem* of Mecca. He refused to accept this honour, fell into disgrace and lost his vizierial rank and private fortune as a consequence. He was ordered to live in the provincial backwater of Rethymno (Ott. Resmo) on Crete, where he died early in 1164/1751. This news reached Istanbul on 8 Ramaḍān 1164/34 July 1751 (hence an error in *Sidjill-i ʿOthmānī*, iv, 38).

The life of Tiryāḳī Meḥmed Pasha was characteristic of the age. It shows how an able Janissary-born servant of the Sultan (*ḳul*) could enter upon a career in the chancery of the central government, attaining the supreme office of *Ṣadr-ï Aʿẓam* [q.v.] when he was about 66 years old. The Sultan's policy at this time seems to have been to limit the tenure of his Grand Viziers to only a year or two, so that dismissal did not automatically mean disgrace, although the conflict with the Islamic religious hierarchy must have shortened his tenure in the case of Meḥmed Pasha, and his refusal of office led in the end to his complete undoing.

(A.H. de Groot)

MEḤMED PASHA, YEGEN, Gümrükčü (d. 1158/1745), Ottoman Grand Vizier.

Son of a sister of the then influential statesman *Defterdār* Kel Yūsuf Efendi (hence the surname "Nephew"), he was born in Antalya and began public life as a *Mültezim* in the region of his origin. He went to Istanbul to take up a career in the secretarial service, becoming a *khadjegān*. From 1140/1728 to 1141/1729 he was Commissioner of the Customs of Istanbul (*Gümrük Emīni*). Around 1144/1732 he became *Ḳapu-Ketkhudāsï* of the *Beglerbegi* of Erzurum, Topal ʿOthmān Pasha, as well. In 1145/1733 he acquired the post of *Mewḳūfātčï* and later again Commissioner of the Customs, leaving that position to become *Ḳapu-Ketkhudāsï* to Köprülü-zāde Ḥāfïẓ Aḥmed Pasha. In 1737/1150 he was appointed vizier and got the function of *Ḳāʾim-maḳām* (23 (26?) Shaʿbān 1150/16 (19?) December 1737), Shemdāni-zāde, *Mürʾī-i tewārīkh*, 67, 77-85: 29 Shaʿbān 1150/22 December 1737). Yegen Meḥmed then became Grand Vizier. Preparing for war, he desired at the same time the French ambassador Villeneuve to undertake mediation with the Emperor and with Russia. He left Istanbul as *serdār* on 15 Dhu 'l-Ḥidjdja 1150/5 April 1738 and moved the army via Edirne and Nish towards Ada-Ḳalʿe [q.v.]. After heavy fighting in that area, he was successful in the retaking of Mehādiye, Ada-Ḳalʿe and Semendire (26 Rabīʿ II 1151/13 August 1738). Having returned to Istanbul at the end of the campaigning season, preparations of war were mainly directed towards the reconquest of Belgrade. The Crimean Khān was his main adviser on the conduct of the war against Russia at this time. Through the influence of the powerful *Dār al-Saʿāde Aghasï* Beshīr Agha, Sultan Maḥmūd I [q.v.] dismissed his Grand Vizier before he could leave for the front (12 Dhu 'l-Ḥidjdja 1151/23 March 1739).

Meḥmed Pasha was now exiled to Chios (Ott. Saḳïz [q.v.]) for one-and-a-half years. On 19 Rabīʿ II 1153/14 July 1740, Yegen Meḥmed was made military governor of Candia. Afterwards he received the governorates of Negroponte (Ott. Eghriboz [q.v.]), Bosnia and (in 1157/1744) Aydïn [q.v.]. At the end of the same year, he was made *Beglerbegi* of Anadolu and *serdār*, being sent to Ḳars and the Persian front with a large army. Thanks to the initiative of the Crimean Khan Selīm Giray II (1743-8) and his Tatar troops, the Ottomans attacked the Persian army in its fortified position near Eriwān (12 Radjab 1158/10 August 1745). After a week of fighting, the Grand Vizier fell ill and could not exercise his command any more. Disorder ensued among the Ottoman *Lewend* [q.v.] troops, and fighting was

broken off. The Grand Vizier died on 21 Radjab 1158/19 August 1745; his body was brought inside the citadel of Ḳars and buried there.

MEḤMED PASHA YEGEN, Ḥādjdjī Seyyid (1138-1201/1726-87), Ottoman Grand Vizier from 16 Ramaḍān 1196-25 Muḥarram 1197/25/August-31 December 1782. Of Janissary birth, he died as *Ser-ʿasker* at Köstendje [*q.v.*] on 25 Muḥarram 1202/6 December 1787.

(Ed.)

MEḤMED RAʾŪF, Modern Turkish Mehmet Rauf (1875-1931), Turkish novelist of the late 19th and early 20th century. Born in Istanbul and trained as a naval officer, he entered the navy in 1893, was sent to Crete for further education, served as liaison officer in the launches of Foreign Embassies on the Bosphorus, retiring from the navy in 1908. Apart from publishing various periodicals for ladies and some attempts to carry on trade, he devoted his life to his writing.

Already while a student in the naval college he sent his first literary experiments to Khālid Ḍiyāʾ [*q.v.*] in Izmir, who published them in the newspaper *Khidmet*, Later, he contributed to the periodical *Mekteb* and various daily papers. When in 1895, the leading westernising writers formed a group for modern literature [see turk. Literature] around the periodical *Therwet-i Fünūn* [*q.v.*], he soon joined them and published most of his writings there. Through Khālid Ḍiyāʾ, now in Istanbul, he met most of the *Therwet-i Fünūn* school. Most of his novels and collection of short stories, numbering a dozen each, are rather superficial, over-sentimental narratives with one remarkable exception, *Eylül* "September" (1900), which is the first example in Turkish literature, of sustained psychological analysis. This novel stands out not only among the works of Meḥmed Raʾūf, but it is also one of the most outstanding prose productions of the whole period.

Eylül is the love story of Suʿād, a married woman and Nedjīb, a relative and family friend. It is set among the semi-westernised, lower-middle class families of Istanbul at the turn of the century. Thüreyyā is the immature, sporty husband who spends most of his time boating and swimming while his wife tries to find consolation in music and plays the piano for hours on end to escape her boring life. A deep platonic relationship develops between Suʿād and Nedjīb, who shares similar tastes with her. Entire chapters of the novel are devoted to a psychological analysis of the lovers, who, because of their strict upbringing, remain faithful to the bounds of morality. A fire breaks out in the sea-side villa (*yalī*) on the Bosphorus where the young married couple live, and Suʿād, together with Nedjīb who tries to save her, both perish in the flames.

Meḥmed Raʾūf is also the author of several plays; see *Bibl.*

(Fahir İz)

MEḤMED REʾĪS, Ibn Menemenli, Turkish ship's captain and cartographer from an Aegean seafaring family, author of an 81 × 58 cm chart of the Aegean Sea, showing also Greece and the western coast of Asia Minor (Museo Correr, Venice). Dated 999/1590 and with additional title and author's name in Italian (probably from the 17th century), the chart shows rhumbs and 199 names of coastal towns or islands noted in Turkish.

Similar to the Aegean sea-chart in the atlas of ʿAlī Madjar Reʾīs dating from 1567, the above-mentioned belongs to the portolan tradition. It is more exact than the corresponding maps of Pīrī Reʾīs [*q.v.*], although in some cases differing from both in nomenclature. One should note that all Turkish sea-charts of the Aegean not only differ from the European ones in nomenclature but are also not as standardised as these.

Bibliography: M. Vedovato, *The nautical chart of Mohammed Rais, 1590*, in *Imago Mundi*, viii (1951), 49; W. Brice, C. Imber and R. Lorch, *The Aegean sea-chart of Mehmed Reis ibn Menemenli A.D. 1590/1*, Seminar on early Islamic science, Monograph no. 2, Manchester 1977.

(H. Eisenstein)

MEḤMED SAʿĪD GHĀLIB PASHA, Ottoman statesman.

Born in Istanbul in 1177/1763-4, he was the son of Seyyid Aḥmed Efendi, *bash-khalīfe* in the *mektūbī* office of the Grand Vizier. After the death of his father (1188/1774-5), he entered the same office where he became *bash-khalīfe* in 1210/1795. He was appointed *āmedji* [*q.v.*] on 15 Ramaḍān 1213/3 February 1798 and was sent to France (April 1802) to negotiate peace, which had been broken by the French expedition to Egypt (July 1798). He succeeded in signing the Treaty of Paris on 25 June 1802 (for the text of this treaty, see G. Noradounghian, *Recueil d'actes internationaux de l'Empire ottoman*, Paris 1897-1903, ii, 51-4). Back in Istanbul at the beginning of 1803, he became *büyük tedhkiredji* and was nominated *reʾīs ül-küttab* in September 1806. He followed the Ottoman army in the campaign against Russia, but when the news of Selīm III's deposition on 29 May 1807 reached the army, he took refuge with Muṣṭafā Pasha Bayraḳdār [*q.v.*] at Rusčuk. Meanwhile, a few days later, on 15 Djumādā I 1222/21 July 1807, he was appointed *nishāndji* and charged with the negotiation of an armistice with the Russians. This resulted in the armistice of Slobosia (24 August). Ghālib Efendi was nominated *reʾīs ül-küttāb* for the second time on 19 Safar 1223/15 April 1808. He maintained his position after Muṣṭafā IV's deposition on 28 July, and remained in charge under Maḥmūd II up to the middle of 1811. Then he became *ketkhüdā* of the Grand Vizier. He headed the Ottoman mission in the negotiations with the Russians, aiming at ending the war which had been resumed again in October 1808. Thus he concluded the treaty of Bucharest on 28 May 1812 (for the text of this treaty, see Noradounghian, II, 86-92). He was appointed *reʾīs ül-küttab* for the third time on 30 Muḥarram 1229/22 January 1814, but was dismissed during the *ewāsiṭ-i Radjab*/22 June-8 July.

Ghālib Efendi remained for the following nine years out of Istanbul. He was charged, with the rank

of *wazīr* and the title of *pasha*, with the administration of different provinces in Anatolia. His banishment was due to Ḥālet Efendi [*q.v.*], a political rival whose influence had become preponderant at the court. He was exiled to Ḳonya in Ramaḍān 1236/June 1827, and could regain favour only after the execution of his rival (during the *ewākhir-i Ṣafar* 1238/7-15 November 1822).

Ghālib Pasha was nominated commandant of the European side of the Bosphorus during the *ewāsiṭ-i Muḥarram* 1239/17-26 September 1823. He returned to Istanbul and soon became Grand Vizier (10 Rabīʿ II/14 December). The main problem with which he had to deal was the Greek revolt in the Morea. He charged the *wālī* of Egypt Muḥammad ʿAlī Pasha [*q.v.*] to crush the revolt by landing troops in the peninsula. He was dismissed from the Grand Vizierate on 20 Muḥarram 1240/14 September 1824. The cause seems to be his reluctance to agree to the proposal of the Sultan for the abolition of the Janissaries [see YEÑI-ČERI]. Appointed *wālī* of Erzurum and *Shark ser-ʿaskeri* in Radjab 1240/19 February-20 March 1825, he tried to resist the Russians during the war of 1828, but was not able to prevent the fall of Ḳars (15 July). He was dismissed on Djumādā II 1244/9 December 1828-6 January 1829 and exiled to Balïkesir, where he died in 1245/1829-30.

Ghālib Pasha was an intelligent and able administrator. His knowledge of international affairs qualified him as the most skilful Ottoman diplomat of his time. He is rightly regarded as the founder of modern Turkish diplomacy.

(E. KURAN)

MEḤMED ṢĀLIḤ EFENDI (? - 1175/1762), Ottoman *Shaykh al-Islām* of the second half of the 18th century. On his mother's side he was descended from Shaykh Ḥusām al-Dīn ʿUshshākī, the founder of the ʿUshshākiyye *ṭarīka*, who died in 1001/1592-93, and who is buried in Istanbul at Ḳāsïmpasha. His father was Ḳïrïmī ʿAbd Allāh Efendi-zāde Yaḥyā Efendi, who served as *ḳāḍī* of Ghalaṭa and subsequently of Egypt with the rank (*pāye*) of Edirne, being removed from the latter post on 1 Dhu 'l-Ḳaʿda 1126/8 November 1714, and eventually dying in Istanbul in Rabīʿ I 1131/January-February 1719. Ḳïrïmī ʿAbd Allāh Efendi-zāde Yaḥyā Efendi is buried at the Sît *tekke* outside Edirneḳapïsï, close by the Emīr Bukhārī Dergāhï.

As yet we possess no information on the place and date of Meḥmed Ṣāliḥ Efendi's birth. However, it is known that in his youth he attracted the patronage of Yeñishehirli ʿAbd Allāh Efendi, *Shaykh al-Islām* (1130-42/1718-30) under Aḥmed III, that he became his patron's son-in-law, and that he studied the religious sciences. Meḥmed Ṣāliḥ Efendi had the fortune to make rapid progress in his career. After spending some years in the *müfettishliks* of the Ḥaremeyn and the Bāb-ï Fetwā, he became *ḳāḍī* of Ḥaleb (Aleppo) with the rank of *makhredj*. In Muḥarram 1148/May-June 1735 he was appointed to the *ḳāḍīlïḳ* of Shām, and in 1153/1740-1 to the *ḳāḍīlïḳ* of Medina. Having completed the term of his appointment, he returned to Istanbul. On 27 Djumādā II 1159/17 July 1746, he was appointed to the *ḳāḍīlïḳ* of Istanbul. This appointment was terminated on 1 Shaʿbān 1160/8 August 1747, after he had completed the customary term. He was re-appointed *ḳāḍī* of Istanbul in Shawwāl 1163/September 1750, and on 3 Dhu 'l-Ḥidjdja 1163/3 November 1750, at the request of the Shaykh al-Islām Sayyid Murtaḍā Efendi, he was additionally granted the rank (*pāye*) of Anadolu by *khaṭṭ-i hümayūn* of Sultan Maḥmūd. On 7 Shaʿbān 1167/30 May 1754 he entered into the functions of *Anadolu ḳāḍī ʿaskeri*, and held this post until 10 Shaʿbān 1168/22 May 1755. On the last day of Ṣafar 1171/12 November 1757 he was appointed *ḳāḍī ʿaskeri* of Rūmeli, and having fulfilled the normal term of the appointment, he was made *Shaykh al-Islām* on 16 Djumāda I 1171/26 January 1758, replacing Dāmād-zāde Fayḍ Allāh Efendi. In this capacity he officiated at the marriage of Muṣṭafā III's sister Ṣāliḥa Sulṭān to the Grand Vizier Ḳodja Rāghib Pasha at the Ṣāliḥa Sulṭān Sāhilsarāyï in Eyyüb. He was finally removed from office on 5 Dhu 'l-Ḳaʿda 1172/30 June 1759, and given permission to reside in his villa at Ḳanlïdja.

Meḥmed Ṣāliḥ Efendi died on 1 Shawwāl 1175/25 April 1762, the first day of Sheker Bayrāmï. Funeral prayers were held on the following day at the mosque of Fātiḥ Sulṭān Meḥemmed, and he was buried in the cemetery of the *medrese* of *Ḳāḍīʿasker* Meḥmed Efendi. The cemetery is located in the district of Küčük Muṣṭafā Pasha, alongside the *Fetwā-khānes* of Ḥaydar Maḥallesi, and opposite the mosque of Sinān Aghā. Meḥmed Ṣālïḥ Efendi was a man of good character and distinguished qualities. His son was the *Shaykh al-Islām* Aḥmed Esʿad Efendi.

(MÜNIR AKTEPE)

MEḤMED YIRMISEKIZ ČELEBI EFENDI, Ottoman statesman renowned for his diplomatic mission to France in 1132-3/ 1720-1 and for the account of the mission (*sefāret-nāme*) which he left behind, a major contribution to the westernising movement in the Ottoman Empire in its early manifestations.

His biography is known only in part. He was about fifty years old at the time of his mission. He was born

at Edirne, and his father was Gürdjü ("the Georgian") Süleymān Agha, *seksondjubashi*, meaning colonel of the 71st regiment of Janissaries. He himself followed a military career, after having, apparently, attended the school for pages of the imperial palace, and he belonged to the 28th regiment, hence the nickname of "Twenty-eight" (*Yirmisekiz*) which he retained. He rose to the rank of *čorbadji*, then to that of *muḥḍir agha*. But having also acquired a scholastic education which earned him the title of *efendi* (and which is illustrated by poems composed under the name of Fāʾizī, as well as by the Persian verses which adorn his travel narrative), he was assigned to administrative and financial responsibilities in the army: in the role of *ṭopkhāne nāẓiri*, he was charged with the management of the Arsenal. His diplomatic role began with the negotiations over the Treaty of Passarowitz (1718), where he was deputy plenipotentiary with the title of "receiver of taxes of the third order" (*shikk-i thālith defterdāri*). In this role he acquired, according to Bonnac, ambassador in Constantinople (1716-24) "a fine reputation among the ministers of the Christian princes who were present there". It was as a result of this experience that he was appointed to undertake the mission to France, raised on this occasion to the rank of "chief accountant" (*bash muḥāsebedji*).

The sending to Paris not of a simple emissary as in previous periods, nor of a permanent representative, but at last of a specially accredited ambassador (*elči* [*q.v.*]), represented a diplomatic innovation, for which the initiative belonged entirely to the Grand Vizier, son-in-law of Aḥmed III, Newshehirli Ibrāhīm Pasha. The latter's ulterior motives were kept secret so as to avoid disturbing foreign powers and perhaps also to avoid friction with conservative elements at home. Officially, the ambassador was entrusted with the task of conveying to the French authorities (King Louis XV, still a minor, and the regent Philippe d'Orléans) the sultan's authorisation of repairs to the cupola of the Church of the Holy Sepulchre, which the French had requested in their role as protectors of the Christians of the East. He was also required to discuss the problem of Maltese piracy and to obtain the release of Ottoman prisoners serving as slaves in the royal galleys. But it is probable that, having experienced the setbacks ratified by the Treaties of Carlowitz (1699 [see KARLOFČA] and Passarowitz, the Grand Vizier in fact envisaged a strengthening of the Ottoman Empire against the Habsburgs by means of a more or less close alliance with France (though the latter had been engaged in a system of alliances with Austria since 1718), and he also hoped to acquire information regarding the scientific and technical advances taking place in western Europe and especially in France. A passage which is often quoted from the instructions given to Meḥmed Efendi, required him "to visit fortresses and factories, to make a detailed study of the means of civilisation and education and to compile a report concerning those which may be applied".

The ambassador's journey, made in the company of his son Saʿīd Efendi (himself a future ambassador to Sweden and France, in 1742, and future Grand Vizier) and an entourage of about a hundred persons, lasted a year, from his departure from Istanbul on 7 October 1720 to his return on 8 October 1721. Although dubious at the very principle of his mission, the French authorities received him with respect and considerable pomp, while his public appearances excited much curiosity which is amply reflected in the writings of the diarists and journalists of the time. Arriving at Toulon on 22 November, he had to spend a period of quarantine at Maguelone, and then reached Paris by a circuitous route through the west of the country, initially following the course of the *Canal du Midi*, in order to avoid the south-east which was then the scene of an outbreak of plaque. Arriving in Paris on 8 March 1721, Meḥmed Efendi remained in the capital and its immediate surroundings until 3 August. Returning to Sète via the Rhône valley, he began there on 7 September, his return journey, with a stop-over at La Goulette.

The *Sefāret-nāme*, which is known through numerous editions in Ottoman and modern Turkish and in the French translation by the "jeune de langues", Julien-Claude Galland (nephew of the translator of the *Thousand and one nights*), has not yet been the object of a proper critical edition (see *Bibl.*). It is known that a first draft was composed during the journey itself, and a version presented to the Grand Vizier immediately after his return, followed two years later by a more extended version; from his version, passages regarded as excessively critical of the Secretary of State for Foreign Affairs, the Archbishop of Cambrai, Dubois, were excised at the behest of the Marquis de Bonnac. The account with which we have to do may not perhaps respond to all possible *a priori* expectations of this first discovery of France by an educated Ottoman, this spontaneous encounter between two cultures. But it is necessary to take into account the limited types of experience available to an ambassador, as well as the constraints imposed on a report designed simultaneously to be read by senior officials of the state and to be widely available to the general public. Not only has the author not seen everything, but in a more or less deliberate fashion he refrains from mentioning everything which he actually knows. However, his account, such as it is, remains a no less remarkable document, notable for the curiosity, open mindedness, descriptive qualities and aptitude for judgment which it demonstrates and which place it indisputably above the only surviving precedent, the account of Vienna by Ḳara Meḥmed Pasha in 1665; these qualities were to make it the example to be followed by all subsequent *sefāret-nāmes*.

Meḥmed Efendi pays little attention to manners, beyond noting the curiosity of the French, the astonishing freedom of movement of their women and the respect accorded to them. He is also somewhat sparing of political information, in the sense of French institutions, the personalities of the rulers and the content of his negotiations, which led Bonnac to remark that this was not the account of an ambassador. On the other hand, he writes enthusiastically and pertinently concerning natural phenomena and especially—corresponding to the object of his mission, as noted above—the military, scientific and technical achievements that he witnessed. He shows equal interest and discernement in the artistic domain. He thus provides detailed and vivid descriptions of the *Canal du Midi* and its locks, the Invalides (with the organ, the chapel, the veterans' hospital), military parades and manœuvres on the field of the Sablons, the collection of city models or city plans in relief preserved at that time in the Tuileries, the royal manufacturers of the Gobelin tapestries and the Saint-Gobain mirrors, the "king's garden" (the future Museum of Natural History), the Opera, the Paris observatory, the palaces and landscaped gardens of Saint-Cloud, Meudon, Versailles, Marly (with the famous "machine" drawing water from the Seine) and Chantilly. The ambassador never explicitly advocates imitation of the marvels of the France of Louis XIV and of the Regency (the enormous costs of

which he is always at pains to point out), but his role as propagandist is all the more effective in view of his oral commentaries and the numerous artefacts, including 1,000 engravings, which the Grand Vizier sent the dragoman Lenoir to acquire in France following his diplomatic mission, providing a supplement to the information contained in the *sefāret-nāme* and which were addressed moreover to a sympathetic public, the court of Istanbul of the "Age of the tulips" [see LALA DEVRI], which was especially fond of "curiosities" and artistic refinements.

The resulting French influence was manifested most of all in architecture in a style known as *alafranga* (*alla franca*), especially perceptible in the improvements made to the residence of Aḥmed III at the Fresh Waters of Europe, known as Saʿdābād: the construction of a canal on the model of those of Versailles and Fontainebleau along which the houses of the dignitaries were built contiguously, with the aim of imitating a classical disposition (a procedure called *ḥiṣār yalīlarī*). Similarly, the two elegant fountains built by Aḥmed III have a certain rococo character. It is not known whether the example of the *Canal du Midi* is connected with the resumption under Aḥmed III of work on the canal connecting the Black Sea to the Gulf of Izmir by way of the Sakarya (cf. A. Wāṣīf, *Meḥāsin ül-āthār we-ḥaḳāʾiḳ ül-akhbār*, i, Istanbul 1219/1804-5, 162-3).

Another marked effect of the diplomatic mission was the establishment, in 1727, of the first printing-press using Arabic characters, at the initiative of Ibrāhīm Müteferriḳa [*q.v.*] and Saʿīd Efendi, who was impressed by examples of printing seen in Paris, a fact mentioned by Saint-Simon (ed. Boislisle, xxxviii, 201-4) but not recorded in his father's account [see MAṬBAʿA. 2. In Turkey].

The insurrection of 1730 brought a halt—albeit temporary—to this trend which, despite its superficial and even frivolous aspects, represented an important change in attitude towards the West. Affected by the fall of his patrons, Meḥmed Efendi was nevertheless entrusted with the task of conveying to Poland the letter proclaiming the accession of Maḥmūd I (Topkapı Archives, E. 1654). He ended his career as governor of Cyprus, where he died in 1145/1732.

Bibliography: Numerous mss. of the *Sefāret-nāme-yi Fransa*, see Babinger, *GOW*, 326-7, to be completed by F. R. Unat, *Osmanlı sefirleri ve sefaretnâmeleri*, Ankara 1968, 58, and by B.N. suppl. turc. no. 717. There exist various editions in Ottoman Turkish, though without any scientific character: extracts in *Taʾrīkh-i Rāshid*, Istanbul 1282, v, 330-67; *Relation de l'ambassade de Mohammed Efendi* (*texte turk*) *à l'usage des élèves de l'École royale et spéciale des langues orientales vivantes*, ed. P.A. Jaubert, Paris 1841; Meḥmed Čelebi, *Sefāret-nāme-yi Fransa*, Istanbul 1283; *Tacryr ou Relation de Mohammed Efendi, ambassadeur de la Porte en France, 1720, à Ibrahim Pacha, édité et accompagné de notes par Suavi Effendi*, Paris 1872; *Paris sefāret-nāmesi*, Istanbul 1306/1888-9; popular editions in modern Turkish: Mehmed Çelebi, *Yirmisekiz Mehmed Çelebi'nin Fransa seyahatnâmesi*, ed. Ş. Rado and T. Toros, Istanbul 1970, and *Yirmisekiz Çelebi Mehmed Efendi sefâretnâmesi*, ed. A. Uçman, Istanbul 1975. Two contemporary French translations of the travel narrative have been preserved, that of Ph.J. Aubert, French dragoman at Aleppo (*Archives du Ministère des affaires étrangères, Mémoires et documents, Turquie*, xii, fols. 230-99), and the much superior one of J. Cl. Galland published in *Relation de l'ambassade de Mehmet Effendi à la cour de France en 1721, écrite par lui-même et traduite du turc*, Constantinople-Paris 1757. The author of the present article has given a new edition of this version according to more complete mss., annotated and complemented by contemporary texts, in *Mehmed Efendi, Le paradis des infidèles, un ambassadeur ottoman en France sous la Régence*, Paris 1981. MEḤMED ZAʿĪM, Ottoman Turkish historian.

All that we know of his life has to be gleaned from his works. He was born in 1939/1532, for he tells us that at the accession of Sultan Murād III, i.e. in 982/1574, he was 43. At the early age of eleven he took part in the campaign of 950/1543, along with his elder brother Perwāne Agha, who at that time was *Ḳapud̲j̲ī Bashī*, to the *Sand̲j̲aḳ Beg* of Lepanto, Yaḥyā Pasha-Oghlu Aḥmad Beg. When the latter, after the capture of Stuhlweissenburg, was appointed *Sand̲j̲aḳ Beg* there, the brothers seemed to have remained in his service, probably till 952/1545, when Aḥmad Beg was summoned to Istanbul, in connection with the plundering of the Stuhlweissenburg churches. In 961/1554 when Sultan Süleymān took the field against Shāh Ṭahmāsp of Persia, Meḥmed Zaʿīm was a secretary in the service of the governor of Syria, Tekioghlu Meḥmed, and a year later he was secretary to the powerful grand vizier Meḥmed Soḳollu [*q.v.*] and in this capacity compiled the official report of the death of Selīm II and the accession of Murād III which was sent to the governors of Diyārbakr, Aleppo and Baghdād. This office, to which he perhaps succeeded on the promotion (978/1570) of the famous Ferīdūn Aḥmed Beg [*q.v.*], he must have filled till the death of Meḥmed Soḳollu in 987/1579; we hear nothing further about it. He held a great fief (*ziʿāmet*; hence his epithet Zaʿīm); he himself says *zuʿamāʾ-i ʿatebe-i selāṭīn-i āl-i ʿothmāniyyeden Meḥmed ile müteʿāref we shehīr*. Friends requested him to write a history, and he finished it within a year. He began the work in

Muḥarram 985 (beginning of 21 March 1577) and had completed it in Dhu 'l-Ḥidjdja of the same year (beginning of 9 Feb. 1578). The date of his death and the site of his tomb are not known but he is said to have left charitable endowments in Karaferia near Salonika.

He called his book *Humā-yi djāmiʿ al-tawārīkh* and dedicated it to his master Meḥmed Soḳollu. As his sources, he mentions eleven historians from Firdawsī and al-Ṭabarī down to the anonymous *Tawārīkh-i selāṭīn-i āl-i ʿOthmān* and gives as his main source the *Behdjet al-tawārīkh*, from which, as has been proved, he copied out whole pages without a qualm. The book, which is not yet printed, is divided into a preface and five large sections (*aḳsām*, subdivided into *gurūhs* and then again into *maḳālāt*) and concludes with an epilogue. Rieu and others have given an account of the contents from the manuscripts. In the fourth *gurūh* of the 5th *ḳism* he deals with the Ottomans, and here alone do we have statements of any value, when the author describes from his own experience events from 950/1543 onwards. He brought his story down to the time of writing, and the last event that he mentions took place in the month in which the book was finished.

The passages in the book relating to Hungary have been dealt with by Thúry (*Török történtirók*, ii, 364-89), who also collected the above data for his life; the earlier from 1390 to 1476 are given in extracts and the later from 1521 to 1566 translated in full. Of the other less valuable parts of the book, Diez (*Denkwürdigkeiten von Asien*, i, 212 ff.) has edited a portion of the very early history, dealing with Cain and his descendants, while Von Hammer (*Sur les origines russes*, lxi, 120) edited and translated a portion on the tribal divisions of the Turks, where the Rūs appear as the ninth Turkish tribe. Of the later Ottoman historians, Ibrāhīm Pečewī utilised and quoted from the work of Meḥmed Zaʿīm from the year 949/1542 onwards.

Bibliography: Babinger, *GOW*, 20, 98-9, 193, where further references are given; *İstanbul kütüphaneleri tarih-coğrafya yazmaları kataloğu*, Istanbul 1943, 100 ff. (W. Björkman)

MEHTER (P.), a musical ensemble consisting of combinations of double-reed shawms (*zurna*), trumpets (*boru*), double-headed drum (*ṭabl*), kettle-drums (*naḳḳāre*, *kös*) and metallic percussion instruments. The name (P. "greater") apparently denotes "the greater orchestra". Other terms are: Mehterkhāne, Ṭabl-khāne, Ṭabl-u ʿAlem ("drum and standard"), Mehterān-i Ṭabl-u ʿAlem, Djemāʿat-i Mehterān, and Ṭabl-i Āl-i ʿOthmān ("Drum of the Ottoman House"). The Ottoman *mehter* was an analogue of the wind, brass and percussion ensembles used for official, municipal and military purposes in other Islamic states. Traditions current in Ottoman and in earlier Arabic sources (e.g. Ibn Khaldūn) link the *mehter* to the Turkic and Khurasanian elements in the caliphal armies.

The Ottoman *mehter* was outlawed (and physically destroyed) in 1826. Therefore, information about it is derived from written sources, the most important of which is the *Seyāḥat-nāme* of Ewliyā Čelebi (11th/17th century). Prince Cantemir's history contains a few important passages, and short references are found in a variety of Ottoman and European sources. Another important source lies in Ottoman miniatures which frequently portray the *mehter* musicians. The absence of an authentic oral tradition for the *mehter* is partly compensated by the notations found in the 11th/17th century *Medjmūʿa-yi sāz u söz* by ʿAlī Ufḳī Bey (Alberto Bobowsky) and the *Kitāb-i ʿilm al-mūsīḳī ʿalā wedj al-ḥurūfāt* by Prince Dimitrie Cantemir (1700). A few examples were also preserved in the Hamparsum notation in the late 18th and 19th centuries.

In the capital, the *mehter* was part of the Palace service. The musicians appear to have been originally of *devshirme* [*q.v.*] origin, but not after the early 11th/17th century. They were trained in the Palace school. The names of several *mehter* composers of the Palace have been preserved along with their compositions, e.g. Nefīrī Behrān (10th/16th century) and Zurnazenbashî Ibrāhīm Agha (11th/17th century). It appears that the *mehterān* trained in the capital were sent to the provinces. Alongside this official *mehter* was another type of ensemble called the *mehter-i bīrūn* which formed part of the urban musicians' guilds. This *mehter* received no salary, but performed at public and private festivities. The *mehter-i bīrūn* differed somewhat in orchestration and in size from the *ṭabl-u ʿalem*, and its repertoire was somewhat distinct. A well-known composer of the *mehter-i bīrūn* was Zurnazen Edirneli Daghī Aḥmed Čelebi (11th/17th century).

The offical *mehter* had three distinct functions: (1) The *mehter* played continuously during battle. The standard (*ʿalem*) was located near the *mehter*, so that silence from the direction of the *mehter* could lead to the Janissaries' abandoning the field. Certain battle signals were given by the percussion of the *mehter* (e.g. *ṭabl-i asāyish* "the drum of repose" for the cessation of fighting). Although the Janissaries entered battle at the pace of the *mehter* music, the *mehter* was not responsible for regulating the movement of troops outside of battle. The march was not a *mehter* genre.

(2) The sultan was greeted every afternoon by a *mehter* performance which was accompanied by prayers for the ruler and the state. In the course of the Ottoman period, this ceremony seems to have become highly ritualised. In addition, the vizier, provincial governors and vassal rulers (such as the khāns of the Crimea and the *voyvods* of Moldavia) all had their own *mehter* ensembles and were therefore referred to as *ṭabl-u ʿalem ṣāḥibi* (possessor of drum and standard"). The number of musicians in the *mehter* was an indication of the status of the official.

(3) A *mehter* ensemble played every morning and night from a tower within the garden of the Ṭopḳapî Palace, from other towers in the capital and in many other cities of the Empire. These performances occurred before the morning prayer (*ṣabāḥ namāzî*) and after the night prayer (*ʿishāʾ namāzî*).

The basic melody instrument of the *mehter* was the *zurna*, a double-reed shawm with seven holes (6 in front and 1 behind). The official *mehter* used the large instrument known as *ḳaba zurna* which seems to have been identical to the instrument of the same name played today in rural ensembles in central and western Anatolia and Thrace. The *mehter-i bīrūn* preferred the smaller *djurna zurna*. The *ḳaba zurna* had a range of over two octaves and could produce all the notes needed for pre-19th century Ottoman music. Subsidiary to the *zurna* was the trumpet known as *boru* or *nefīr*. Older *borus* were apparently made of bronze, but by the 10th/16th century brass was in use. The *boru* had no holes and could produce five notes within an ambitus of one and a half octaves. Pieces described as *nefīr-i dem* apparently employed the *borus* to hold the drone.

The basic percussion instrument of the *mehter* was the *ṭabl* or *dawul*, a rather large wooden double-headed drum held slantwise by a strap and beaten with two sticks of uneven dimensions and shape, thus producing the bass *düm* and treble *tek* sounds which are essential to the Ottoman conception of rhythm. The

Ottoman *ṭabl* was the ancestor both of the folkloric drum of the same name (called also *ṭapan*, *kas* or *bubandj* in the Balkans) and of the European military drum, which has however abandoned the bass-treble distinction during the 19th century.

A secondary percussion instrument was the *naḳḳāre*, a medium-sized kettle-drum made of copper. The two parts of the *naḳḳāra* were tuned differently to produce bass and treble tones, and were struck with sticks (*zaḥme*) of uniform shape. A much larger kettledrum was the *kös*, which could measure one-and-a-half metres at the top. It was also made of copper. The *kös* was taken on campaigns and played at official occasions.

The drum of the *mehter* were supported by two types of brass percussion—the *halīle*s or *zīl*s (cymbals) and the *čewgān*, a crescent-shaped, jingling rattle with bells.

These instruments were played in large groups, with the *zurna*s and *dawul*s in equal numbers, and the other instruments somewhat less numerous. In the early 19th century, Von Hammer reports that a vizier's or pas̲h̲a's *mehter* consisted of 72 pieces: 16 *zurnas*, 16 *ṭabls*, 11 *borus*, 8 *naḳḳāres*, 7 *halīles* and 4 *kös*. The sultan's *mehter* (called *mehter-k̲h̲āne-yi k̲h̲āḳānī* or *mehter-k̲h̲āne-yi hümayūn*) was twice that during campaigns.

The *mehter* was conducted by the lead *zurna*-player (*zurna-zen-bas̲h̲ī*), who was therefore termed *mehterbas̲h̲ī*. The *mehter* normally performed in a circular formation. During campaigns or processions (*alay*), the musicians were mounted on horses or camels; the *kös* was taken on a camel or an elephant.

The répertoire of the *mehter* was termed *newbet* or *faṣīl*. Of this répertoire, approximately sixty pieces have survived. This répertoire was related to the instrumental suite (*faṣīl-i sāzendegān*) of Ottoman court music. The dominant forms were the *pes̲h̲rew* and the *semāʿī*, as well as the improvised *taḳsīm*. The *pes̲h̲rews* and *semāʿīs* of the *mehter* form separate genres which employed somewhat simpler rhythmic cycles and larger melodic leaps than the contemporaneous court music. One performance practice associated exclusively with the *mehter* was the *ḳarabataḳ*: alternation of soft passages played by a partial ensemble with thunderous tutti passages. The *mehter* répertoire is identified in the sources by the names of individual items, e.g. *sandjaḳ* ("standard") *atlu* ("horseman"), *alay düzen* ("parade order"), *elči* ("ambassador"), or the term *ḥarbī* ("martial"). During the 18th century, the *mehter* répertoire was broadened to include instrumental versions of the classical vocal forms (*beste*, *naḳīs̲h̲*, *semāʿī*), as well as folk tunes (*ezgi*, *türkü*, *ḳalenderī*).

In 1720 the Porte presented the Polish court with a complete *mehter* ensemble. The gift was very much appreciated, and soon after Russia and then Prussia requested similar ensembles. By the 1770s, many European courts had *mehter* bands, and some sent their bandmasters to Istanbul to study the *mehter*. The main musical result of this cross-cultural exchange appears to have been the introduction of several percussion instruments into European military bands and court orchestras, which gradually led to the augmentation of other instrumental sections and hence a change in orchestral texture. Possible influence of the *mehter* melodies themselves upon European military music of the 18th century has not been adequately researched. In addition, in the South-East European territories under Ottoman domination or influence, the music of the *mehter* was an important factor in the diffusion of Ottoman-Islamic musical principles.

The destruction of the Janissary Corps in 1826 led to the neglect of the *mehter* répertoire, which appears to have been completely forgotten by the end of the 19th century. During the First World War, an attempt was made to revive a version of the *mehter* in accordance with the needs of the modernised Turkish army. Hymns and marches (the latter built on a mixture of Turkish and western musical ideas) were commissioned from classical composers such as Ismāʿīl Ḥaḳḳī (d. 1927), Kâzim Uz (d. 1943) and Ali Riza Şengel (d. 1953). Some private *mehter* ensembles were created during the War of Liberation, but these were not institutionalised during the Republic. In 1952, a new *mehterhane* was established in conjunction with the Military Museum in Istanbul. The costumes and some of the performance practices of this new *mehter* are largely authentic, but its répertoire is drawn almost exclusively from the hybrid *mehter* music of the First World War.

Bibliography: Sources for the *mehter* are few. Almost all Ottoman (but almost no Western) sources for the *mehter* are treated by Haydar Sanal in *Mehter musikisi*, Istanbul 1964. Sanal's book is the major point of reference for any study of the *mehter* and its music. In contains transcriptions of virtually the entire authentic répertoire of the *mehter* found in the works of ʿAlī Ufḳī Bey and Cantemir. Abundant references to Ottoman sources may be found in Sanal's book. Of these, the most important is Evliyā Čelebi's *Seyāḥāt-nāme*, i-v. Several aspects of the *mehter* were treated by Zeki Mehmet Pakalın in *Osmanlı Tarih deyimleri ve terimleri sözlüğü*, ii, Istanbul 1971, 444-51. See also H.G. Farmer, *Turkish influence in military music*, London 1950; K. Signell, *Mozart and the Mehter*, in *The Consort*, no. 24 (1967), 310-22. (W. Feldman)

MEKNÈS [see miknās].

MELILLA (in modern Arabic: *Mlīlya*, Berber *Tamlilt*, "the white"; in the Arab geographers, *Malīla*), a seaport on the east coast of Morocco on a promontory on the peninsula of Gelʿiyya at the end of which is the Cape Tres Forcas or the Three Forks (*Rās Hurk* of the Arab geographers, now *Rās Werk*).

Melilla probably corresponds to the *Rusadir* of the ancients (cf. *Rhyssadir oppidum et portus* (Pliny, v. 18), *Russadir Colonia* of the Antoninian Itinerary). Leo Africanus says that it had belonged for a time to the Goths and that the Arabs took it from them, but in reality we know nothing of the ancient history of the town.

It is only at the beginning of the 4th/10th century that Melilla appears in the Muslim history of Morocco. In 318/930, the Umayyad Caliph of Spain, ʿAbd al-Raḥmān III al-Nāṣir li-Dīn Allāh, succeeded in detaching from the Fāṭimids the famous Miknāsa chief Mūsā b. Abi 'l-ʿĀfiya, who had established his authority over the basin of the Moulouya and the district of Taza; having seized Melilla, al-Nāṣir built ramparts around it and gave it to his new ally, who thus had at his command a base of defence (*maʿḳil*) against the Fāṭimids of Ifrīḳiya and a port which made communication with Spain easy. Later on, the descendants of his son, al-Būrī b. Mūsā, rebuilt the town, which remained one of the strongholds of the Miknāsa in Morocco down to the time of the decline of the power of the tribe, who were definitively defeated and scattered by the Almoravid Yūsuf b. Tās̲h̲fīn in 462/1070.

But the Miknāsa must have abandoned it before their dynasty was crushed by the Almoravids, for al-Bakrī shows us that by 459/1067 a descendant of the Ḥammūdid Idrīsids of Spain had been summoned to

Melilla and recognised as ruler by the people of the district.

At the period when al-Bakrī wrote (460/1068), Melilla was a town surrounded by a wall of stone; inside was a very strong citadel, a great mosque, a *ḥammām* and markets. The inhabitants belonged to the tribe of the Banū Wartadī (or B. Wartardā), a branch of the Baṭṭūya group of the Ṣanhādja. Melilla had a harbour which was accessible only in summer. It was the terminus of a trade route which connected Sidjilmāsa with the Mediterranean through the valley of the Moulouya and Agarsīf (French *Guercif*). The trade must have been considerable; the principal exports were no doubt those mentioned by Leo Africanus, sc. iron from the mines of the mountains of the Banū Saᶜīd and honey from the Kabdāna country; we may also add pearls which were taken from oysters found in the harbour itself. Al-Bakrī notes that the inhabitants made money by granting protection to merchants. The environs of the town were occupied by the Banū Wartadī (who also occupied the stronghold called Ḳulūᶜ Gāret), the Maṭmāṭa, the Ahl Kabdān, the Marnīsa of the "White Hill" (*al-Kudya al-bayḍāʾ*) and the Ghassāsa of the massif which ends in Cape Tres Forcas (*Djabal Hurk*). All this region was then independent and had no political link with the kingdom of Fās or that of Nakūr.

But in 472/1080 the Almoravid sovereign Yūsuf b. Tāshfīn took Melilla and added its territory to the Almoravid empire. In 536/1141-2, in the course of the Almoravid pursuit of the Almohads, a body of the latter set out from Tāmsāmān to lay siege to Melilla, which was taken and plundered. In 671/1272, the Marīnid sultan Yaᶜḳūb took Melilla from the Almohads, and Ibn Khaldūn simply mentions it as a fortified place. It seems in fact that these three captures of the town had destroyed its commercial importance to the advantage of another town on the west coast of the peninsula of the Gelᶜiyya, sc. Ghassāsa, also called *al-Kudya al-bayḍāʾ*, the *Alcudia* of the Portolans; in the 7th/14th century it is this latter town that appears as the Mediterranean port of Fās and Taza, and it was through it that political and commercial relations with eastern Spain and Italy (Genoa and Venice) were carried on.

Leo Africanus reports that in 895/1490, hearing that an attack on it was planned by the Spaniards, the inhabitants abandoned the town and fled to the mountains of the Baṭṭūya; to punish them for this the Waṭṭāsid sultan had the town burned down; when in Muḥarram 903/September 1497 the Spaniards arrived, they were thus able to disembark without resistance and occupied the town, abandoned and half-destroyed. The occupation of Melilla enabled the Spaniards to attack the port of Ghassāsa by land and it was taken in Dhu 'l-Ḳaᶜda 911/April 1506. The Moroccans recaptured it in 940/1533, but the dangerous proximity of Melilla henceforth deprived it of importance. The commercial activity of this region was moved farther west to the port of al-Mazimma [see AL-ḤUṢAYMA in Suppl.], and the centre of Muslim resistance in this part of Morocco was henceforth the stronghold of Tāzūṭā, which after having been the capital of the Marīnid fief of the Banū Waṭṭās, became that of a practically independent leader of holy war. After passing into the hands of the Spaniards, Melilla was continuously besieged by the Muslims, mainly by the forces of the leaders of holy war established at Tāzūṭā and at Mdjāw (the *Meggeo* of Leo Africanus). Occupied by the Christians, the town naturally became one of the places in Morocco in which Muslims pretenders and rebels found asylum and support against the central power, especially at the beginning of the Saᶜdian dynasty. In 956/1549, it sheltered the dispossessed Waṭṭāsid Abū Ḥassūn, "king" of Bādis; in 956/1550 it welcomed with his family Mawlāy ᶜAmar, "king" of Debdū. It was from Melilla that in 1003/1595, the pretender al-Nāṣir b. al-Ghālib bi'llāh set out against his uncle the sultan Aḥmad al-Manṣūr.

Later, Melilla only appears in history in connection with sieges which it had to suffer: sieges by Mawlāy Ismāᶜīl in 1098/1687 and 1106/1695; siege in 1188/1774 by Mawlāy Muḥammad b. ᶜAbd Allāh; Spanish-Moroccan war of 1893 (Sīdī Waryāsh affair). From 1903 to 1908 the region of Melilla was the scene of struggles between the pretender al-Djīlālī al-Rūgī, established in the *ḳaṣba* of Selwān, and the troops of the sultan ᶜAbd al-ᶜAzīz; defeated and receiving no support, the latter had to take refuge in Spanish territory and be repatriated. Still more recently in 1921, the same district witnessed the sanguinary battles between the Spaniards and the Rīfans under ᶜAbd al-Karīm (Anwāl disaster) (C.R. Pennell, *A country with a government and a flag. The Rif War in Morocco 1921-1926*, Wisbech, England 1986, 166-70, 198). Melilla is for Spain a "place of sovereignty" administratively dependent on the province of Malaga, like Ceuta [see SABTA], which itself depends on that of Cadiz. Before the establishment of the French protectorate, Melilla, constituted a free port, was the landing-place for all the European merchandise (cotton, sugar, tea) intended not only for eastern Morocco but also for the Saharan regions of Morocco and Orania. It has now lost its commercial importance, but its population has considerably increased: 9,000 inhabitants in 1880, and 86,500 on the eve of Moroccan independence. It is also the seat of an important garrison.

MELLĀḤ [see MALLĀḤ].

MEMDŪḤ SHEWKET ESENDAL [see ESENDAL in Suppl.].

MEMON [see AL-MAYMANĪ].

MEMON, the name of one of the three well-known Muslim trading communities of Gudjarāt, the other two being the Bohorās and Khōdjas [*q.vv.*]. They claim to have embraced Islam around the 6th/12th century. Their name, originally derived from *muʾmin* "believer", was later corrupted to *Memon*. They were converted to Islam from the trading Lohana and Kutch Bania castes living in Sindh and Kaččh (Kutch), either by a son or a descendant of ᶜAbd al-Ḳādir al-Djīlānī (d. 561/1166 [*q.v.*]). They are devout Sunnīs and follow the Ḥanafī school of law. Most of them, except those who stayed back in Sindh, speak the Kaččhi dialect of Gudjarātī. Following their pre-conversion practice, they do not allow inheritance to their widows and daughters. The most sacred shrine of their *pīr*, after that of ᶜAbd al-Ḳādir al-Djīlānī in Baghdād, is that of Khwādja Muᶜīn al-Dīn Čishtī [*q.v.*] in Adjmēr (K.B. Faridi, *Gazetteer of the Bombay Presidency*, *ix/2*, *Gujarat population, Musalmans and Parsis*, Bombay 1899, 50-7). They celebrate the first ten days of Rabīᶜ II by reciting the life history of ᶜAbd al-Ḳādir al-Djīlānī at a religious gathering known as *ziyāra madjlis* (S. Edwardes, *The Gazetteer of Bombay City and Island*, Bombay 1909, i, 182-3).

They were a wealthy community living in Surat during the hey-day of the city's prosperity. As Surat

sank into insignificance with the rise of Bombay (during the 19th century), they moved to the new city, attracted by its trade and commercial opportunities. After the famine of 1813 in Gudjarāt and Kaččh, they migrated in large numbers and first began to do business in Bombay by opening tailoring establishments in Lohar Chawl. Their status progressed steadily as Bombay advanced in material prosperity, and they indulged in every kind of trade from shopkeeping, broking and peddling to furniture dealing and timber business and included among their number some of the richest individuals in Bombay (Edwardes, *Gazetteer*, i, 178). The Memon Chamber of Commerce, established in 1929 with a view to promote and protect the interests and rights of members in matter of inland and foreign trade, transport, industry, banking and shipping, had over one hundred members (*Modern Bombay and her patriotic citizens*, Bombay 1941, 110-11). With the partition of India in 1947, a considerable number of them migrated to Pakistan, and now some of these are the leading industrialists and the wealthiest merchants of Karachi. They have trade relations with East Africa, the Persian Gulf and the South-East Asia, especially Malaya and Singapore. A conservative, revivalist movement is currently gaining strong support among the Memons of Gudjarāt and Bombay.

MEMPHIS [see manf].

MENDERES, the name of three rivers of Anatolia which are known in modern Turkish by this name, usually preceded by the pertinent epithet: Büyük ("Big"), Küçük ("Little"), and Eski ("Old"). They are the classical Maiandros, Kaystros and Skamandros.

1. *Büyük Menderes*. It is part of the geological and hydrological features of western Anatolia that consist of latitudinal mountain chains flanking long valleys, the latter used and enlarged by rivers that flow into the Aegean Sea. These valleys, the mountain slopes along them and the estuaries have in turn been an inviting ground for habitation and economic and cultural development. Büyük Menderes with ancient Miletus, Küçük Menderes with Ephesus, Gediz [*q.v.*] (ancient Hermos) with Izmir, and Bakır Çayı (ancient Kaykos) with Bergama near their estuaries or courses, are the principal ones.

The exact length of the Büyük Menderes depends on which one of its upper arms should be referred to by this name (up to 529 km; drainage area of some 25,000 km^2). The noteworthy fact is that its headwaters reach into the westernmost extension of the inner Anatolian plateau. The stream usually viewed as the beginning of the Büyük Menderes is fed by springs and brooks in the mountainous vicinity of Dinar (ancient Apameia). As it descends from the plateau, this river receives such tributaries as the Kufi Çayı, Banaz Çayı and finally the Çürük Su (ancient Lykos) near Sarayköy.

After Sarayköy, the Büyük Menderes follows the long, widening valley almost due west, at a slower pace, until it is deflected in the vicinity of the ruins of Magnesia-on-the-Maeander by the south-west oriented coastal range of Gümüş Dağı; it then turns south-westward and, avoiding a second obstacle represented by the Samsun Dağı, it enters the sea some 10 km south-west of Balāṭ [*q.v.*] (ancient Miletus). The mountains flanking the Büyük Menderes on the south are cut by several longitudinal valleys used by its principal tributaries from that side: the Vandalas Çayı (ancient Morsynos), Ak Çay (ancient Harpasos), and Çine Suyu (ancient Marsyas). The lower part of the middle course of the Büyük Menderes, roughly between Nazilli and Söke, flows through an alluvial plain marked by a deep and soft soil layer; this and the mild inclination rate with the resulting slowness of the current produces the winding course that has made the term "meander" better known than the river itself. The large amount of silt brought by the Büyük Menderes causes the coastline at its estuary to advance several metres each year. This is illustrated by the fate of ancient Miletus, which in the first millenium before our era was a port on the Latmikos kolpos, a bay to the south-east of the ancient estuary; by the 4th century A.D., the bar created by the silt turned the bay into a lake (the present-day Bafa Gölü is a remnant of this bay) and the port into a town on the river, but several kilometres from the coast (a similar fate threatened in recent centuries the Gulf of Izmir, saved only by a re-routing of the Gediz estuary further north in 1886).

The Büyük Menderes seems to have been little noticed by Islamic geographers. One exception is al-ʿUmarī (d. 750/1349), whose confusion, however, stresses the unfamiliarity of Islamic scholars with this river; he states that the "Mandarus" flows into the Black Sea and is as large as the Nile. The river is briefly mentioned in Pīrī Reʾīs's portolan *Kitāb-i baḥriyye* as "Mendiraz suyī" in the 927/1521 version (Topkapı Sarayı Müzesi, Bağdat Köşkü ms. 337, fol. 22b, text; on the map, 23a, as "Balāṭ suyī"), and as "Ulu Mendirez" in the 932/1526 version (facsim. ed., Istanbul 1935, 209; text; on the map, p. 190, as "Māʾ-i Mendirez"). Kātib Čelebi's [*q.v.*] *Djihān-nümā* (in the addition by Abū Bakr b. Bahrām al-Dimashḳī, second half of the 11th/17th century) has a map of Anatolia (between pp. 629 and 630) but without any trace of the river; the "Nehr-i Mendirez" is, however, briefly discussed on p. 634 of the text, with more detailed discussions of the general area on pp. 636-8. Ewliyā Čelebi [*q.v.*] appears to be the earliest Islamic author who describes the area along the river at some length (*Seyāḥat-nāme*, Istanbul 1935, ix, 148-92). He is followed by European travellers and scholars of the 17th to the 20th centuries; the results are perhaps best exemplified by the field trips and publications of A. Philippson (see *Bibl.*).

The importance of the Büyük Menderes valley, dominated by the warm Mediterranean climate yet also well-watered, has persisted, throughout political and ethnic changes, since antiquity. The fertility of the alluvial plain below and of the higher fringes along the parallel mountains combine to yield abundant as well as varied agricultural, horticultural and industrial crops and products, such as raisins, figs, olives, cereals and cotton. This productivity is reflected in a dense agricultural as well as urban population, handicrafts and commerce. The towns and settlements are mostly located at a certain distance from the river in the more salubrious foothills, the majority being on the northern side. That side has always functioned as one of the principal avenues of trade and travel linking the Aegean coast with the Anatolian interior. Miletus and Ephesus were the chief maritime outlets in antiquity. In the Middle Ages, Miletus, known as Palatia and turkicised as Balāṭ, retained some importance, as it could be reached by smaller ships using the Menderes. For some time toward the end of the 7th/13th century, it served as the point of departure

for maritime expeditions of the newly-established Beys of Menteshe [see MENTESHE OGHULLARÎ], but soon trade proved more profitable, and a treaty was concluded with the Venetians by which the latter opened a consulate there (by 1355; the treaty was later confirmed by the Ottoman sultans). Venetians and Genoese sold textiles, soap, tin and lead, and bought such products as alum, rugs, saffron, sesame, honey and wax, nut galls, morocco leather, liquorice, dried raisins, wheat, barley and slaves; they also bought fish, in particular eels from the Bafa lake that could be reached by fishermen (this fishing seems to have survived to this day). Trade at Balāṭ still existed, although at a diminishing rate, in Ewliyā Čelebi's time, when the traveller visited the place in 1082/1671-2; he states that "the saccoleva barges, the barges from Gallipoli and Kos, and the frigates from Syme and Nauplia ... sail into the Menderes river and take on merchandise at this town of Balāṭ" (*Seyāḥat-nāme*, ix, 147). Gradually, Balāṭ was abandoned, due to the continuing silting up of the estuary and to the malaria-infested climate. Another reason may have been the rise of Izmir [*q.v.*] or Smyrna, which in the modern period became the chief maritime outlet for the area. Thus the first railway concession in Anatolia, granted in 1857 to a British company, resulted in a line linking Izmir with Aydın and the Büyük Menderes valley. The railway has recently been joined by a modern and denser highway network.

The traditional assets of the Büyük Menderes valley are being enhanced by modern hydraulic works such as dams, canals and drainage systems, leading to an elimination of malaria-infested stretches on its lower course, expansion of cultivable areas and creation of hydro-electric power (the latter characteristic also of some of the tributaries, such as the Kemer Barajı on the Ak Çay). The valley, especially on its middle and lower course, it thus one of the most densely populated areas of Turkey.

2. *Küçük Menderes*. Unlike the Büyük Menderes, this relatively short (145 km; drainage area of 3,140 km^2) river does not originate in the Anatolian plateau but among the latitudinal mountain ridges closer to the Aegean sea, near the Bozdağ just north of the town of Kiraz (ancient Koloë). It flows south until it reaches the valley between the two mountains chains that separate it, on the north, from the valley of the Gediz and, on the south, from that of the Büyük Menderes. There, near the town of Beydağ, it sharply turns west and follows that course until the hills of Alaman Dağ deflect it south-westward. Having crossed the coastal plain, it enters the sea some 5 km west of the town of Selçuk and the ruins of ancient Ephesus. The latter city was one of the principal ports on the Aegean in antiquity, but the river, like the Büyük Menderes in the case of Miletos, brought silt that ultimately made the coast advance to the point of leaving Ephesos landlocked, despite the reported efforts of the Emperor Hadrian (117-38 A.D.) to re-route the estuary in order to save Ephesus as a harbour.

As in terms of physical geography, in those of human geography too, the Küçük Menderes displays both analogies with its larger namesake and differences from it. The alluvial plain of the valley, the higher slopes along the mountains and the warm Mediterranean climate accompanied by an adequate water supply, make this area yield an abundance and variety of agricultural products; this has spurred dense habitation since antiquity, the growth of towns and handicrafts, and a commerce facilitated by the maritime outlets, exemplified by Ephesus in antiquity, its successor Ayasoluk [*q.v.*] and the latter's successful rival Scalanuova (Kuşadası) in the Middle Ages, and Izmir in the modern period. The valley of the Küçük Menderes, however, does not reach deep enough into the Anatolian interior, and today as in antiquity and the Middle Ages, the principal routes in that direction follow the course of the Büyük Menderes or of the Gediz; the modern railway in the Küçük Menderes valley, an offshoot from the Izmir-Selçuk-Aydın line, stops at Ödemiş near the eastern end of the valley.

3. *Eski Menderes*. The sources of this short river (about 75 km) are on the northern slopes of the Kaz Dağı (ancient Mount Ida) north of the Gulf of Edremit. It enters the Çanakkale Boğazı [see ČANAĶ-ĶALʿE BOGHAZÎ] at its south-western end near Kumkale some 7 km north-west of the ruins of ancient Troy.

MENDERES, ADNAN (1899-1961), Turkish statesman. Born and educated in Izmir, he studied at the Ankara University Faculty of Law, following service in the First World War and Turkey's War of Independence. His political activity commenced upon his joining Ali Fethi Okyar's Free Party in 1930, when he became this party's chairman in Aydın. When the party was closed down, he joined the People's Party (later called Republican People's Party, RPP) and was elected repeatedly to the Grand National Assembly (GNA) in Aydın from 1931 onwards. By 1945, he was a prominent parliamentarian. He then presented to the RPP's parliamentary group a "Four-man Proposal", signed by himself, Celal Bayar, Fuat Köprülü [*q.v.*] and Refik Koraltan, requesting liberalisation. Menderes, Köprülü and Koraltan were ousted from the party and Bayar resigned; together with other breakaways from RPP, they founded the Democrat Party (DP) [see ḤIZB, ii] on 7 January 1946. The DP won 62 GNA seats in that

year's elections; Menderes entered as member for Kütahya. A member of DP's Executive Council and second in influence only to Bayar, Menderes orated in the GNA and throughout the country; he smoothed over differences in the DP and was instrumental in leading it to victory in the 1950 elections. The party won again in 1954 and 1957, with comfortable majorities, and ruled the state for a decade (1950-60) with Menderes as Prime Minister, successively heading five different Cabinets.

The DP won the 1950 electoral campaign by representing itself as an agent of change and Menderes began to carry our some of its promises, including: (a) Economics and development: Mechanising agriculture, building roads (largely in rural parts), encouraging industry (chiefly consumer industries), erecting dams (for irrigation and energy production), and reconstructing the larger cities. (b) Social services: Increasing the scope of old-age and life insurance payments, building workers' hospitals and encouraging trade union activities. (c) Cultural: Inaugurating the Aegean University in Izmir, the Middle East Technical University in Ankara and the Atatürk University in Erzurum, and expanding the scope of primary and secondary education. However, Menderes' appeal to private initiative (instead of the RPP's étatism) to finance these projects proved only moderately successful. The United States provided tractors and credits, which sufficed only in part; hence Menderes opted for encouraging foreign investments and loans, which eventually increased Turkey's debt and raised inflation. His foreign policies were definitely pro-Western: he sent Turkish forces to Korea (1950) and joined NATO (1952). However, he was also highly aware of Turkey's need for rapprochement with her neighbours: Turkey signed an *entente* with Greece and Yugoslavia (1953), joined the Baghdad Pact (1954) and worked out the Zürich and London agreements on Cyprus (1959-60).

Although modernisation of Turkey continued in the 1950s, Menderes and the DP were strongly criticised throughout by the RPP and other parties, primarily regarding their domestic policies: overemphasis on a liberal economy and private initiative, preference shown to rural elements and allowing the revival of Islam. In the face of a growing political and economic crisis, Menderes had to withdraw, ironically, from his earlier championship of individual and political liberties: martial law was imposed repeatedly, rival political groups were banned or deterred, the press was muzzled and the military became increasingly politicised in the late 1950s. On 27 May 1960, the military intervened, arresting Menderes and the entire DP leadership. They were tried in Yassıada; Menderes was sentenced to death and executed on 17 September 1961. The trials were considered fair, but many Turks thought the sentences too harsh: the Justice Party, set up in 1961 largely as a successor to the banned DP, took its name from a popular demand to rehabilitate Menderes and the other DP leaders. In the late 1980s, Menderes was rehabilitated in Turkey; streets were being named after him in various localities.

Bibliography: Menderes does not seem to have written memoirs or other works, although his speeches were printed in the parliamentary records and the press, between 1931 and 1960. Some speeches were collected in: Sabahattın Parsadan *et alii*, *Adnan Menderes: siyasî hayatı ve nutukları*, Ankara 1955; A. Kocamemi and V. Ayberk, *D.P.'nin muhteşem zaferi Adnan Menderes'in 1957 seçim nutukları ile Paris NATO konferansındaki tarihi hitabesi*, n.p. 1958; Şükrü Esirci (ed.), *Menderes diyor ki*, Istanbul 1967. For photographs, see Haydar Sönmez (ed.), *Fotoğrafla Menderes albümü*, Istanbul 1967. Personal accounts of Menderes' personality and career are: Samet Ağaoğlu, *Arkadaşım Menderes*, Istanbul 1967; Celâl Bayar, *Başvekilim Adnan Menderes*, Istanbul 1969; Cihad Baban, *Politika galerisi. Büstler portreler*, Istanbul 1970, 127-237; Necip Fazıl Kısakürek, *Benim gözümde Menderes*, Istanbul 1970. Nazlı İlicak (ed.), *15 yıl sonra 27 mayıs yargılanıyor*, Istanbul 1975, is a collection of documents about Menderes' final year in office and the 1960 military intervention. Contemporary accounts of the period, referring to Menderes' activities, are: Demircili (ed.), *Menderes destanı: Türkiyenin mucize adamı*, Ankara 1954; A.E. (J.M. LANDAU)

MENEKSHE, Monemvasia, a largely deserted minor fortress town protecting a magnificent harbour on the eastern "finger" of the Peloponnese, situated on top and beneath an impregnable rock, on all but one side surrounded by the sea and connected with the mainland only through a narrow sand bank, through which a ditch was cut, spanned by a drawbridge; hence its name of Μονεμβασία ("Single Entrance"). The Ottoman form of the name is a corruption of the Greek, which was recognised as such by Pīrī Reʾīs. In 16th century Ottoman accounts, the form Benefshe was used alternately with Menekshe and Monvasya. The town has a rich and very eventful history. In the Middle Ages, Menekshe was an impregnable fortress, the "Sacred Rock of Hellenism", the "Gibraltar of Greece" and a notorious pirate's nest. In Ottoman times it was the seat of a minor administrative unit (*nāḥiye*) and a fortress, principally held because of its military importance.

Menekshe, built near the site of the ancient town of Epidauros Limera, was founded in A.D. 582-3 in the first year of the reign of the Byzantine emperor Maurice. Its great days were to come in the 13th century as the main point of entry of the Byzantine forces coming from Constantinople. After the Frankish conquest of the Peloponnese, Monemvasia/Menekshe held out for more than 30 years, only to capitulate to Guillaume Villehardouin after a siege and blockade of three years (1246-8). Fourteen years later, the town returned to the Byzantines as part of the ransom of Prince William of Achaia, captured by the Byzantines in the fateful battle of Pelagonia (near Bitola-Monastır, 1259). From then onwards, Menekshe became the chief springboard of the Byzantines in their long, drawn-out reconquest of the Peloponnese in the course of which Turkish mercenaries from Asia Minor first set foot in the town. In 1292 the town, prosperous through shipping, trade in the famous "Malmsey" wine and piracy, was sacked by Roger de Lluria, the admiral of King James of Aragon. The population found refuge in the impregnable citadel, leaving the apparently open lower suburb to the enemy.

In 1381-2, during the war between the Byzantine lords Cantacuzene and the Despot Theodore, the town made itself independent under the leadership of one of the local noble families, Mamonas. Theodore regained it between 1391 and 1392 and confirmed the town's privileges, dating from the Comneni emperors. Paul Mamonas briefly reoccupied the town in 1394 with help of Ottoman troops of Yïldïrïm Bāyezīd, than active in Central Greece. The Byzantine period came to an end in the autumn of 1463, when Meḥemmed Fātiḥ had occupied the entire Byzantine Peloponnese. The town had been the seat of a Metropolitan of the Orthodox Church and had produced two men of Byzantine letters, the monk Isidore and the famous historian of the Turkish conquest, George Phrantzes. The Metropolitan see survived till the end of the Ottoman period. After the disappearance of Byzantine rule, the town defied the Ottomans and placed itself briefly under Papal protection. At the outbreak of the Ottoman-Venetian War of 1463-79, the citizens of Menekshe exchanged Papal domination for that of Venice, whose fleets were victorious in the first stage of that war. The Republic placed a strong garrison on the rock. By the Ottoman-Venetian Treaty of 1479, Menekshe was to remain in Venetian hands, together with a strip of land on the Peloponnese and the castle of Vatika, from where the ecclesiastical authorities derived most of their dues

and the inhabitants had much property and where the corn was grown needed to feed the city. The rock itself produced nothing. During the war of Bāyezīd II with the Signoria (1499 to 1502-3), the Ottomans occupied the last Venetian strongholds on the Peloponnese, Koron, Modon and Navarino and the coastal strip in front of Menekshe. Only Nauplion and Menekshe held out for some decades and were left to Venice in the treaty of 1502-3. After that, all food had to be imported from the Ottoman-controlled mainland. Vatika, now Ottoman, was maintained as a stronghold. The census register T.D. 367 of 1528 (pp. 171-3) mentions a garrison of 36 men and a *Dizdār*, all Muslims, and a Greek auxiliary force of 15 men, who were freed from *djizye* and *ispenče* and the extraordinary taxes in exchange for their services.

During the treaty of 1540, which ended the Ottoman-Venetian war of the 1530s, the last remaining Venetian bases on the Peloponnese were ceded to the Ottomans. The Venetian soldiers, the artillery and all inhabitants who wished to leave, left the town on 24 November 1540. On the following day, the Venetian Podesta Antonio Garzoni handed the town over to the Imperial Dragoman Yūnus Bey under command of Ḳāsim Pasha, *Sandjak Begi* of the Morea. The evacuated inhabitants were settled elsewhere on Venetian territory. Scions of the Mamonas family went to Zante-Zakynthos, others were transplanted to Corfu (Körfez), Cephalonia, Crete or Cyprus. Not a few of them returned and became Ottoman subjects. The acquisition of Menekshe is only briefly mentioned by the Ottoman chroniclers, including Luṭfī Pasha, who had a large share in the negotiations of the treaty. After the Ottoman conquest, the town lost its importance as a trading community and outpost of the West. Its population must have been considerably smaller than in the Byzantine-Venetian period, and its importance largely military. The İcmal Defter T.D. 565 (pp. 79-88) of the *sandjak* of Mezistra (Mistra), from 981/1573-4 mentions a force of 104 men under a *Dizdār* and six gunners under a *Ser-i Ṭopčiyān*. The total tax yield of the town, which was an Imperial *khāṣṣ*, was 28,665 *aḳčes*, of which 6,000 *aḳčes* came from harbour dues. Between 1540 and 1570 the town was part of the *sandjak* of the Morea but after the last-mentioned date was incorporated in the newly-formed *sandjak* of Mezistra, set up after the disastrous Battle of Lepanto with the intention to react more quickly against raids from overseas. In the 1570s, the town seems to have recovered to some extent. The census register T.D. 603 from 991/1583 mentions it as one of the four *ḳaḍā*'s of Mezistra, with a total tax yield of 30,000 *aḳčes* and 320 households of non-Muslims as well as 191 bachelors. This brings us, together with the garrison and their families, at a total population of *ca.* 2,500 people, which is relatively large for the small inhabitable space. Seven local Christians had a special status, delivering gunpowder to the castle in exchange for a tax reduction. Not a single Muslim settler is recorded. The greater part of the tax on economic activities was collected from the harbour dues (7,500) and market dues (5,000) leaving 4,725 *aḳčes* for all the other activities. The amounts for flax and wine and olive oil tell us something of the importance of these sectors. Grain had almost entirely to be imported from the mainland. The dues on these agricultural products tell us that the town had regained some property on the mainland.

During the Cretan War (1645-69), Venetian forces tried to capture Menekshe but failed (1653). The lower town, on a low plateau on the sea shore, was on that occasion surrounded by new walls, those which we can still see today. Ewliyā Čelebi, who visited the town in 1667 on his way to Crete, describes the new walls with some detail, calling them the work of Sultan Meḥemmed IV. The dangerous situation created by the war is also reflected in the increase of the garrison of the town: 523 men according to the budget of 1079-80/1669-70, with a group of "New Gunners" and soldiers and gunners for the Western and the Eastern Bulwark mentioned explicitly. The yearly expenditure for this large garrison was defrayed by the *djizye* of the district and the harbour dues of Menekshe itself. The budget also mentions a repair of the walls of the lower town. Ewliyā has left a detailed description of the town as it was in his time. He mentions 500 houses in the citadel and another 1,600 small stone-built ones in the lower town, which must be a gross exaggeration; the enclosed space measures only 4 hectares. In the citadel on the rock was the Mosque of Sultan Süleymān, or Fetḥiyye Djāmiʿ, a converted church. This is the 13th century Byzantine church of St. Sophia, built by the Byzantine Emperor Andronicus II and still preserved. Besides that one, Ewliyā mentions the Mosque of Derwīsh Meḥmed Agha. In the lower town were another two domed mosques and two *mesdjids*, besides two *medreses*, two *mektebs* and fifty shops. The *medreses* do not appear on the official and contemporary list of *medreses* in European Turkey and must be a mistake; Islamic life was not very developed in this outpost.

During the war of 1683-99 with the Christian Powers, the Ottomans lost Menekshe and the entire Morea to Venice. The town surrendered in August 1690 after a fourteen months' siege, the last stronghold in the Morea to give up. Two thousand Turks came out of the fortress, 300 of them soldiers. During Venetian rule, a large number of churches were built in the town, which still exist today (17 of the 25 preserved churches). The Ottoman buildings were destroyed except the church-mosque on the rock. The Venetian census of 1700 mentions 428 families living in the town of Menekshe, altogether 1,622 souls. According to the same source, the town was the chef-lieu of a district numbering 17 villages and 3 monasteries, with a total population of 2,075 families or 8,366 souls. The Ottomans returned as masters of the Morea in 1715, after the swift campaign of the Grand Vizier Dāmād ʿAlī Pasha. The town surrendered again, although it had two years' provisions. When in 1128/1716 an Ottoman census commission described the town, it had only three Muslim inhabitants, of whom two were converts, and 144 grown-up non-Muslim males (*nefer*) (Kuyudu Kadime no. 20, Ankara). The tax account shows that, on the mainland belonging to the town, a considerable quantity of cotton was produced. Wine is no longer mentioned. The town recovered yet again, remaining the chef-lieu of a *ḳaḍā*ʾ and seat of the Greek archbishopric. When Pouqueville visited it at the beginning of the 19th century, it had 2,000 Turkish and Greek inhabitants. The *ḳaḍā*ʾ produced a considerable amount of flax and olive oil for export. Martin Leake, who visited the town in the spring of 1805, mentions that there were 300 houses in the (lower) town and 50 in the castle: all, except about six, were Turkish. Before the Russian invasion of the Morea (1770) there were 150 Greek families, but they, as well as the Greek inhabitants of the villages in the districts, fled after that event to Anatolia (the lands of the Dere Beys) or to the islands. During the Greek War of Independence, Menekshe was starved into submission after a siege of four months (1821). It surrendered on terms. The survivors, some 500 or 700

people, were brought to Asia Minor by ship. After the War and the disappearance of the Muslim community, the town never recovered. Sir Thomas Wyse, British plenipotentiary in Athens, counted during his visit in 1858 no more than a hundred Greek families, half the houses being in ruin. Nowadays, the upper town on the rock is an empty field of ruins, whilst for a long time the lower town was a ghost city in which only a few families lived. The Greek census of 1961 gives only 82 inhabitants. A small fishing village has developed on the mainland, opposite the rock, Recently, tourism has reached the long-isolated place, creating some sort of recovery by rebuilding the ruined houses as holiday homes. Only the mighty walls of Meḥemmed IV and a featureless mosque in the lower town remind one of the Ottoman centuries.

MENEMEN, a town in western Anatolia (population in 1970: 17,514) and administrative centre of a district (*ilçe*) of the same name. The town lies near the left bank of the Gediz [*q.v.*], some 30 km north-north-west of Izmir [*q.v.*], at the inception of the alluvial lowlands formed by the above-mentioned river. The district flanks the Bay of Izmir on the south and that of Çandarlı on the north, but it is separated from the Aegean coast on the west by the *ilçe* of Foça.

The earliest known mention of Menemen is found in Pachymeres (d. 1315), who states that the "Tourkoi" had moved into the "Mainomenou kampos"; this term is reflected in ʿĀshıḳ-Pashazāde's [*q.v.*] history as "Menemen owasī". The Turks, led by the Beys of Ṣarukhān [*q.v.*], eventually controlled the area, and Menemen became one of this principality's possessions; the earliest dated building in Menemen would appear to be a mosque erected by the Ṣarukhān Bey Isḥāḳ (Ulu cami or Sünbül Paşa camii, inscription dated 759/1357-8). Menemen continued to be a possession of the Ṣarukhān also for some time after the Ottoman conquest effected early in the reign of Murād I (761-91/1360-89).

The name of Menemen was also pronounced and written as Melemen, whereas that of the district (*ḳaḍā'*) appears in Ottoman documents and Ewliyā Čelebi's [*q.v.*] *Seyāḥat-nāme* as Tarḥaniyye or Turḥaniyye (see the latter work for the etymology attributed to these names). Ewliyā Čelebi gives a detailed description of Menemen. The *ḳaḍā'*, administered by a *voyvoda*, was part of the *sandjaḳ* of Sīghla or Sughla; it was a *khāṣṣ* of the *wālide sulṭān* (possibly since Süleymān's mother Ḥafṣa Sulṭān's time), yielding 400 *yüks* annually; the town had 300 shops and a *bezistān*; in summer it suffered from a mosquito infestation that became proverbial (*Seyāḥat-nāme*, Istanbul 1935, ix, 84-7). The town also had a Bektāshī tekke with the tomb of Bekrī Bābā.

Prior to the exchanges of the Republican era, the population of both the town and the district was mixed; Greeks predominated in the town itself (4,683 Rūm, 3,606 Muslims), and Muslims in the *ḳaḍā'* as a whole (17,261 Muslims, 7,195 Rūm; there were also smaller numbers of Armenians, Jews, Catholics and "foreigners" (*Sālnāme-yi wilāyet-i Aydīn* for the year 1326 A.H., 416-17 and *passim* for other information).

Menemen's importance lay in its role as an emporium for the agricultural products of its fertile surroundings, and for locally manufactured cloths and rugs. Its market, traditionally held on Mondays, was routinely visited by the merchants of Izmir. The town's strategic location near the convergence of the road (and eventually also a railroad) from Izmir to Manisa and the Anatolian interior, with the coastal

road linking Izmir with Bergama, must have been a further factor. Inversely, the *scala* (port for coastal shipping) of Menemen, still mentioned by Chandler (1764) as "lively", disappeared perhaps even before the re-routing of the Gediz in 1886.

MENEMENLI-ZĀDE MEḤMED ṬĀHIR, minor Turkish poet of the *Therwet-i Fünūn* [*q.v.*] period (1862-1902). He was born in Adana, into a notable family, the son of Hāshim Ḥabīb, director of the telegraphic department in the office of the Grand Vizierate. He was educated in Istanbul and graduated from the school of Political Science in 1883. After serving as Director of Education in Adana, Izmir and Salonica, where he also taught Turkish literature in the local lycées, he became, in Istanbul, director of the secretariat in the Ministry of Education and, at the same time, he taught in the School of Political Science and in the University. He died suddenly at the age of forty. He collected his poems, which follow the language and style of the *Therwet-i Fünūn* school, in various booklets, the most known of which is *Elḥān* ("Melodies") (1885). His *Edebiyyāt-i ᶜothmāniyye* ("Ottoman literature") is a didactic book on the rules and technical terms of Turkish literature. Redjāʾi-zāde Maḥmūd Ekrem [*q.v.*], a later *Tanẓīmāt* writer and critic, who had become the leader of young Westernist writers, published in 1886 his *Taḳdīr-i elḥān* ("Appreciation of the melodies") in praise of Menemenli-zāde, where he severely criticised Muᶜallim Nādjī [*q.v.*], the leader of the conservatives, who retorted in his *Demdeme* ("Angry talk", 1887) more violently. This famous controversy made Menemenli-zāde Ṭāhir a well-known poet in the late 1880s.

MENGLI GIRĀY I, one of the greatest khāns of the Crimea (Ḳïrïm [*q.v.*]).

As the contemporary sources are controversial, the chronology of his three reigns up to 883/1478-9 cannot be firmly established. On the death of Ḥādjdjī Girāy Khān I (871/1466 [*q.v.*]), disputes arose among his numerous sons about the succession. Mengli Girāy first succeeded in seizing the throne for several months, but finally had to cede it to his oldest brother Nūr Dewlet. Mengli Girāy's second reign probably lasted from 872/1468 to 879/1474-5, when he had to flee to Mangub (Menküp) or Kafa, while Nūr Dewlet and, later, two other pretenders struggled for primacy. In 833/end of 1478 or beginning of 1479, Mengli Girāy regained power and remained khān until his death in Dhu 'l-Ḥidjdja 920/Feb. 1515. Since the leader of the Shīrīn clan, Eminek, in 879/spring 1475 had sought Ottoman intervention in the Crimea's internal strife and help against the menacing Great Horde [see BĀTŪʾIDS], with the result that the Genoese colonies along the Crimean shores had passed under Ottoman control, the khānate was considered as under Ottoman protection. In 889/1484, Mengli Girāy participated in Sultan Bāyezīd II's successful campaign into Moldavia and was recompensed with territorial gains on the Dniepr and Dniestr [see BUDJĀḲ].

No mere Ottoman vassal, Mengli Girāy generally sought to stay on good terms with Muscovy, which he considered an ally against the Great Horde; while for Muscovy, the khān's friendship meant support against the declining Poland-Lithuania. After Mengli Girāy had subjugated the Great Horde in 908/1502, he demanded the traditional tribute from Muscovy and Poland-Lithuania for himself. A Crimean-Russian confrontation, however, broke out only under Mengli Girāy's successors. Mengli Girāy, who was also a patron of the arts, must be considered as the real founder of the Crimean state. He also played a role in the struggle for the throne of the later Sultan Selīm I, his son-in-law (1511-12).

MENGÜČEK (Mangūdjak), a Turkmen chief who was the eponym of a minor dynasty which appears in history with his son Isḥāḳ in 512/1118 in eastern Anatolia around the town of Erzindjān [*q.v.*], but including also Diwrigi and Koghonia/Colonia-Ḳara Ḥiṣār Sharḳī.

His territory accordingly lay between that of the Dānishmendids [*q.v.*] on the west, of the Saltuḳids [*q.v.*] of Erzerum on the east, of the Byzantine province of Trebizond on the north and of the Artuḳid principalities [see ARTUḲIDS] on the south; it thus commanded the traditional highway for invasions from Iran into Anatolia. Hardly anything is known of the history of the Mengüčekids. In 1118, menaced by the Artuḳid Balak, Isḥāḳ allied with the military commander of Trebizond, Theodore Gavras; both of these were taken prisoner by the Dānishmendid Ghāzī, Isḥāḳ's father-in-law, who speedily freed him. In the middle of the 6th/12th century, the Mengüčekid principality was divided between two brothers, the younger one receiving the little town of Diwrigi [*q.v.*]. The elder branch acquired some fame under the long reign of Bahrāmshāh (*ca.* 555-617/1160-1220). He made Erzindjān a cultural centre, for which evidence is provided by his protégés, the Persian poets Niẓāmī and Khāḳānī [*q.vv.*] and the Arab scholar ᶜAbd al-Laṭīf al-Baghdādī [*q.v.*], who spent 12 years there. The town was, however, also the greatest Armenian centre of eastern Anatolia, still famed for carpet manufacturing in Marco Polo's time. But after Bahrāmshāh's death, the

Mengüčekids were drawn into the complex happenings linked with Djalāl al-Dīn Mankūbirtī's [*q.v.*] invasion, and the Saldjūķ Kayķubād I [*q.v.*] annexed their territory, compensating the Mengüčekids with small *iķṭāʿ*s. The Diwrigi branch, known through the remarkable mosque constructed by its members, continued there, it seems, till around the time of the Mongol conquest as vassals of the Saldjūķs.

MENSŪKHĀT (a.), pl. of *mensūkh* "annulled", an expression used in the Ottoman Empire, after the abolition of certain early Ottoman army units (*yaya*, *müsellem* [*q.vv.*]), in the 11th/17th century, for the fiefs and other grants these units had previously held. These were referred to as "annulled fiefs" (*mensūkhāt tîmarî*). The Ottoman finance department administering these holdings, the "Bureau of the Annulled [grants]" (*Mensūkhāt ķalemi*), allotted them, when needed, as fiefs in return for services. When the Ottoman navy was expanded, such holdings were attached to the Admiralty (*Deryā ķalemi* [see daryā begi] and assigned by the *Ķapudan Pasha* [*q.v.*]. Some appointments were submitted to the Grand Vizier (*Ṣadr-î Aʿẓam* [*q.v.*]) and marked off in the registers of the naval archives. The possessors of these holdings (*mensūkhat efrādî*) formed a unit whose duties were to guard the coasts and serve on ships. They could pay for exemption from duty when they were called to serve.

(F. Müge Göçek)

MENTESHE-ELI, a region in the south-western part of Anatolia. It derived its name from the Turkish Menteshe-oghullarî [*q.v.*] who established a principality there. There are, however, some claims that the name is of pre-Turkish origin. The region corresponds to classical Caria (today centred on the city of Mughla). There is no doubt that, like other western Anatolian districts, Caria also was occupied by Turkomans towards the end of the 5th/11th century; but later, Byzantine domination was restored there. The Turkomans in the border areas who settled down in Central Anatolia and the western Taurus continued their raids. Moreover, the loss of Rūm Saldjūķid power in Anatolia in the second half of the 7th/13th century after defeats suffered at the hand of Mongols provided a gradually increasing freedom of movement for the tribal groups who gathered in the frontier areas, so that Turkish pressure on the Byzantine defence line was continuously being increased.

After 659/1261, the region of Caria which stretches inland from the coastal areas was occupied by the Turks. The Turkomans who founded the principality of Menteshe and ultimately gave their name to the region first arrived in this region by sea and occupied the shore line. But to maintain their rule in this region it was necessary to cooperate with the Turks who pressed from the interior towards the shore (see P. Wittek, *Menteşe beyliği*, Turkish tr. O.Ş. Gökyay, Ankara 1944, 46). When John, brother of Michael VIII (1259-82), the Emperor of Byzantium, went on a campaign in this region, he forced the Turks who had settled inland to withdraw to their bases in the mountains; but he never thought of eapturing the ports which were held by the Turks in the south-west corner of Caria. It is possible that the founder of the principality of Menteshe was at that time the ruler of the shore region of the Gulf of Makrī (Fethiyye). Although in 1278 the Emperor Michael VIII sent an army under the command of his son Andronicus to Anatolia, the regions of Menderes and Caria had already been captured by the Turks. Andronicus's fortification of Tralles (Aydîn) was therefore rendered useless; the Menteshe Beg who had captured Tralles and Nyssa (Sulṭān ḥiṣār) had annexed the territory to his principality. Upon the Ķaramānids' siege of Konya, Gaykhatu, the Il-Khānid ruler, came to Anatolia in 690/1291 and punished the Turkish principalities which had revolted against him. During Gaykhatu's punitive campaign, the Il-Khānid army entered Menteshe-eli (*Wilāyet-i Menteshe*) and plundered it (see *Taʾrīkh-i Āl-i Saldjūķ dar Anadolu*, ed. F.N. Uzluk, Ankara 1952, 88, Turkish tr. 62). Following the Byzantine Empire's unsuccessful attempts to reconquer the area in 1296 and 1302, the Turks became the unquestioned masters of Caria. In his description of the principality of Menteshe, Münedjdjim-bashî says that the principality consisted of many cities, namely Balāṭ, Bozöyük, Mīlās, Pedjīn (Bardjīn), Mazîn (Mārīn), Čine, Ṭawās, Būrnāz, Makrī, Köydjeghiz (Köyceğiz) and Mughla, which was the capital (see Münedjdjım-Bashî, *Djāmiʿ al-duwal*, Nuruosmaniye Libr. no. 3172, fol. 130b; Wittek, *op. cit.*, 172-3). The Föke (Finike) region of Lycia was also included among these names at the beginning of the history of the principality.

Ibn Baṭṭūṭa, who visited this part of Anatolia (*Bilād al-Rūm*) in 732/1333, which he also designated by the name Menteshe-eli, says that Mīlās [*q.v.*] was one of the most beautiful cities of Anatolia, and fruit, gardens and water were abundant. At this time, Ibn Baṭṭūṭa met with Shudjāʿ al-Dīn Orkhān Beg, the ruler of the principality. He tells us that his residence was at Pedjīn, two miles from Mīlās, and this city, which was rebuilt on a hill, was adorned with beautiful buildings and mosques (see *Riḥla*, ii, 278-80, Eng. tr. Gibb, ii, 428-30, Turkish tr. M. Sharīf, Istanbul 1333-5, i. 321-3). According to Shihāb al-Dīn al-ʿUmarī, there were 50 cities and 200 fortresses under the control of Orkhān Beg (see *Masālik al-abṣār*, Ayasofya Libr. no. 3146, III, fols. 122a-b). Thus it is clear that Menteshe-eli extended over a large area. In his account, al-ʿUmarī says that Orkhān Beg's country was located between Dawaz (Ṭawāz), Sakîz and Istanköy. It is clear, then, that the Föke region was also in Menteshe-eli.

Following Bāyazīd I's succession to the throne in 791/1389, an alliance was formed against the Ottomans at the instance of the Ķaramānids, and the Menteshe Begs also participated in this. Bāyazīd I had moved into Anatolia, and the regions of Balāṭ and Mughla, which were under the rule of the Menteshe principality, soon passed into the hands of the Ottomans. But a line of the dynasty went on to rule in Mīlās and Pedjīn. Following the battle of Ankara (804/1402), the Menteshe-oghullarî regained at the hands of Tīmūr their previous territories. However, this situation did not last. In 827/1424 Murād II annexed Menteshe-eli to Ottoman territory; later,

Menteshe-eli came to be one of the *sandjaks* of the *eyālet* of Anatolia.

(E. Merçil)

MENTESHE-OGHULLARÎ, a Turkish principality founded in the south-west of Anatolia.

The Turkomans who founded this principality came to this region by sea and settled between the shore and Deñizli. However, it is quite difficult to pinpoint the foundation of the principality and the chronology of the early Begs. The Turkomans had captured the Caria (today Muğla) region after 1261, starting from the shores. Menteshe, the founder of the principality, was perhaps the Beg of the shore regions (*Amīr al-Sawāḥil*) in the bay of Makrī (Fethiye). There are also difficulties in establishing the genealogy of Menteshe Beg. His father was said to be *Amīr al-Sawāḥil* Ḥādjdjī Bahāʾ al-Dīn (Bahādîr), who was one of the *amīrs* of the Saldjūḳs (see Shikārī, *Karaman tarihi*, Konya 1946, 11 ff., and Münedjdjim-Bashî, *Djāmiʿ al-duwal*, Nuruosmaniye no. 3172, fol. 131a). However, in the inscriptions of Aḥmed Ghāzī, one of Menteshe's grandsons, his father is mentioned as Eblistan and the father of the latter as Ḳurî or Ḳara Beg. This region had been given as an *iḳṭāʿ* by the rulers of the Anatolian Saldjūḳs to the ancestors of Menteshe Beg. Although in 1278 the Byzantine Emperor Michael VIII sent an army under the command of his son Andronicus and the latter fortified Tralles (Aydın), it was almost useless. In 1282 Menteshe Beg had conquered Tralles and Nyssa (Sulṭān ḥiṣār) and annexed them to his territory. A coin minted in 690/1291 at Mīlās in the name of the Saldjūḳ sultan Masʿūd II leads us to the conclusion that the Menteshe-oghullarî had at first accepted the protection of the Saldjūḳs (see Ismāʿīl Ghālib, *Taḳwīm-i maskūkāt-î Saldjūḳiyya*, Istanbul 1309, 93). Upon the Ḳaramānids' siege of Konya, the Il-Khānid ruler Gaykhatu came to Anatolia to punish them in 690/1291, and during this campaign, the Il-Khānid army plundered the Menteshe-eli. When Alexius Philanthropos, the Byzantine commander, moved south through Menderes (1296), Menteshe Beg was already dead.

After Menteshe Beg, his son Masʿūd became the head of the principality. But his other son Kirmān (Karmān), following or perhaps opposing his brother, continued to rule in Föke (Finike). The historical sources do not clearly explain the relationships between these two brothers. Although in 1300 Masʿūd Beg had seized an important part of Rhodes, later, on 15 August 1308, the Knights Hospitallers recaptured the island (see S. Runciman, *A history of the Crusades*, London 1965, iii, 435; other scholars give the date as 1310). Masʿūd Beg's efforts to regain the island were unsuccessful. His death was probably before 719/1319. Shudjāʿ al-Dīn Orkhān Beg, who inherited the throne after his father, Masʿūd Beg, probably secured power by removing a brother whose name may have been Ibrāhīm. Orkhān Beg was unsuccessful in his struggles against the Knights to capture Rhodes after 1320. Ibn Baṭṭūṭa visited Orkhān Beg in Pedjīn while he was travelling in Anatolia, and has mentioned him as Sultan of Mīlās (see *Riḥla*, ii, 279-80, Eng. tr. Gibb, ii, 429-30, Turkish tr. M. Sharīf, Istanbul 1333-5, i, 321-2). Al-ʿUmarī, on the other hand, gives information about the cities and the number of the soldiers under Orkhān Beg. He also mentions that the Föke branch of the Menteshe principality was in 1330 subject to the Ḥamīd-oghullarî (see *Masālik al-abṣār*, Ayasofya no. 3146, III, fols. 98 a-b and 122 a-b). Orkhān Beg's death was probably before 1344, and his son Ibrāhīm succeeded him.

Ibrāhīm Beg made preparations to help Umur Beg in regaining Izmir, which had fallen into the hands of the Latins, but when Umur Beg fell in battle in 1348, this effort came to nought. The Venetians, with their fleet placed in Balāṭ harbour, threatened Ibrāhīm Beg, who prepared for a campaign against them, but as a result of an agreement made with the assistance of Marino Morosini, the Count of Crete, between the years 1352-5, they were forced to disband. Ibrāhīm Beg died some time before the year 1360. After his death, his three sons reigned in various parts of the principality. It is believed that Mūsā Beg ruled in Pedjīn, Balāṭ and Mīlās; Meḥmed Beg in Mughla and Čine; and Aḥmed Beg ruled, in the south, in Makrī and Marmaris. After Mūsā Beg's death (before 1375), Mīlās and Pedjīn also presumably passed into the hands of Aḥmed Beg. In 1365, as a result of Aḥmed Beg's attacks against the ships between Rhodes and Cyprus, the fleet of Peter I, King of Cyprus, threatened the shores of Aydîn and Menteshe. However, the Venetians, concerned about their people living in Ayasoluḳ and Balāṭ, intervened, and peace was made. Although Aḥmed Beg ruled in Balāṭ for a period, this was not for long. We see that before 1389 Balāṭ and its environment were under the rule of Ghiyāth al-Dīn Maḥmūd, the son of Meḥmed Beg. However, losing the struggle for sovereignty made against his brother Ilyās Beg, he took refuge with the Ottomans. Following the battle of Kosova (1389), Bāyezīd I ascended the Ottoman throne. With the urging of the Ḳaramānids, Ilyās Beg and his father Meḥmed Beg entered into the alliance arranged against the Ottomans in Anatolia. During Bāyezīd I's Anatolian campaign against his alliance, Balāṭ and the lands of the Menteshe principality in Mughla were occupied. Meḥmed and Ilyās Beg fled to Djandār-oghlu Iskandar Beg (in the winter of 1389-90). During this campaign, Aḥmed Beg continued to reign in Mīlās and Pedjīn. His survival was perhaps due to the rugged topography and comparatively impregnable position of the region. Tādj al-Dīn Aḥmed Ghāzī died in Shaʿban 793/July 1391. His territories were later occupied by the Ottomans. Wittek (*Menteşe beyliği*, 86) accepts that, until the Ottoman occupation, Meḥmed Beg ruled in the Menteshe principality, later fleeing to Djandār-oghlu Isfandiyār Beg.

Following the battle of Ankara, Tīmūr, as he did with most of the other principalities, restored Ilyās Beg's territories (1402). After this restoration of the territory, Ilyās Beg continued for a time as vassal of Tīmūr. In the quarrel for sovereignty among Bāyezīd's sons, he made an alliance with the Aydîn-oghullarî and the Ṣarukhān-oghullarî, supporting ʿĪsā Čelebi against Meḥemmed Čelebi. Following Meḥemmed I's victory against this alliance, Ilyās Beg was forced to recognise the sovereignty of the latter (1405). Because Ilyās Beg was inflicting losses upon the Latins in the islands through maritime warfare, in 1403 the Venetians made an agreement with him through the aid of Marco Falieri, the Count of Crete. But later, conflicts between the two sides continued, and as a result of the Venetians' actions, Ilyās Beg was forced to renew the previous agreement with Admiral Ser Pietro Civrano (17 October 1414). In the same year, Ilyās Beg accepted Ottoman rule and in 1415 he had coins minted in the name of Meḥemmed Čelebi. Moreover, he was compelled to send his two sons,

Layth and Aḥmed, to the Ottoman Palace. After the death in 1421 of Ilyās Beg, his sons managed to flee from Edirne and to take up the rule of the principality in Menteshe-eli. When Sultan Murād II captured the territory of Menteshe, he seized and imprisoned these two brothers, thus putting an end to this principality.

The Menteshe-oghullarî embellished their country with many fine buildings. Among these are the Ḥādjdjī Ilyās Mosque at Mīlās (1330), Aḥmed Beg's Medrese at Pedjīn (1375), and his Great Mosque at Mīlās (1378) and Ilyās Beg's Great Mosque at Balāṭ (1404). The Menteshe-oghullarî patronised scholars and men of letters, and under their patronage some works were translated into Turkish. For example, under the patronage of Ghiyāth al-Dīn Maḥmūd, the *Bāz-nāma* on falconry was translated from Persian into Turkish. A manuscript of this work, located in Milan, was published by Von Hammer under the name of *Falkner-klee* (Pest 1840). In addition to this, there is a short medical book, the *Ilyāsiyye*, which was also translated under the patronage of Ilyās Beg.

Bibliography (in addition to references given in the text): The Menteshe principality has been studied in depth by P. Wittek, *Das Fürstentum Mentesche*, Istanbul 1934, repr. 1967, Turkish tr. O.S. (E. Merçil)

MĒʾŌ, a mixed Indian tribe of largely north-eastern Rādjpūt stock, a branch of whom were converted to Islam in the mid-8th/14th century. Their conversion seems to have been nominal, as they are described as offering animal sacrifices to a mother-goddess, worshipping at shrines of the Hindū god of the homestead Bhūmiyā, and following the Pačpiriyā (Pānč Pīr [*q.v.*]), especially Sālār Masʿūd, whose banner was an object of their devotion at the *shab-i barāt* (eve of 14 Shaʿbān), as well as the Khwādja Ṣāḥib of Adjmēr (Muʿīn al-Dīn Čishtī [*q.v.*]); they celebrated Hindū festivals, and followed Hindū practices of exogamous marriage and male inheritance. The Muslim Mēʾō are frequently called Mēwātī; both they and the Hindū Mēʾō were mostly robbers and freebooters, causing much trouble from the times of the early Dihlī sultanates until quelled under Bābur; but there was a resurgence of their turbulence during the decline of the Mughal empire, and in 1857 they were described as "conspicuous for their readiness to take advantage of disorder". See further MĒWĀT.

MERCENARY [see DJAYSH].

MERCİMEK AHMET [see MERDJÜMEK].

MERCURY, planet [see ʿUṬĀRID].

MERCURY, metal [see ZIʾBAḲ].

MERDJÜMEK, Aḥmed b. Ilyās (Modern Turkish: Mercimek Ahmed), *fl.* first third of the 9th/15th century, the author of a translation into Old Ottoman of the *Ḳābūs-nāme*, a "mirror for princes" composed in Persian prose and occasional verse by Kay Kāʾūs b. Iskandar [*q.v.*] in 475/1082.

Merdjümek mentions himself by this name three times in his work (all references are to British Library ms. Or. 3219): introduction (fol. 1b), chapters 11 (fol. 50a) and 31 (fol. 112b). he is not referred to in pre-modern Ottoman biographical or historical works. From his *Ḳābūs-nāme* translation we can glean very little information (none on how he acquired his strange designation Merdjümek, Persian for "lentil"). He was a servant or courtier of Sultan Murād II (824-55/1421-51), and his writing shows him to have been well versed in the traditional religious and secular learning of his time. We can only deduce that he was moderate in his habits from his remark that Merdjümek never indulged in the "calamitous" practice of morning wine-drinking (fol. 50a).

In Ottoman *akhlāḳ* [*q.v.*] literature, the *Ḳābūs-nāme* held a special place in the 8th/14th and 9th/15th centuries. No less than five completely independent Old Ottoman prose versions composed in this period have survived, of which the latest and best is Merdjümek's, completed on 23 Shaʿban 836/26 April 1432. The translator records that while at Philippopolis in Sultan Murād's service, he found the sultan reading the *Ḳābūs-nāme* in Persian. When Murād complained that an existing Turkish version was dull and unclear, Merdjümek immediately undertook a new translation, "complete, without omitting a word; to the best of my ability explaining the more difficult words in it by extended comment so that the readers might enjoy its [full] meaning" (fols. 1b-2a), the book has no independent title; mss. of it are marked by such headings as *Ḳābūs-nāme-yi Türkī* or *Terdjeme-yi Ḳābūs-nāme*.

Merdjümek showed much greater literary skill than his predecessors. Unlike them, he was neither slavishly literal nor given to cavalier omission. He freely added explanatory comments, as he promised, or he paraphrased, when literalism might have concealed the author's purpose. Occasionally, he further enlivened the text by spontaneously inserting apt Turkish proverbs, or verses of his own composition (e.g. ch. 32, fol. 122a-b), in addition to his usual practice of rendering Kay Kāʾūs's illustrative Persian verses into his own Turkish verse.

At a time when literary Turkish was at a crossroads, with some writers developing a complex and bombastic high *inshāʾ* style, full of Persian literary artifices, and reducing the Turkish lexical material to a minimum in favour of Arabic and Persian loan words, Merdjümek chose a manner which was essentially simple, based on spoken Turkish, and lexically mainly Turkish. In subsequent centuries, a minority of writers continued to favour simple Turkish, but most Ottoman writing became increasingly high-flown and Persianised. By the beginning of the 12th/18th century, Merdjümek's simplicity of style and vocabulary had come to be considered archaic and uncouth, and the well-known stylist and historian Naẓmī-zāde Murtaḍā (not Muṣṭafā, as in KAY KĀʾŪS, iv, 815, col. 2, l. 3) of Baghdād was commissioned to revise Merdjümek's *Ḳābūs-nāme* in accord with contemporary literary taste (1117/1705).

Turkish nationalist currents of the 20th century have enhanced the growing interest in the Turkic elements in Turkey's national language, and have brought a renewed and still continuing appreciation of Merdjümek Aḥmed's work.

(E. Birnbaum)

MERGUEZ [see mirkās].

MERGUI, the name of an archipelago, district and town in southern Burma, on the eastern shores of the Bay of Bengal, facing the Andaman Sea.

1. Mergui archipelago. This is a large group of islands (said to number 804), commencing in the north with Tavoy Island (*ca.* 13° 13'N.), and stretching southwards beyond Point Victoria into Thai waters, terminating beyond Ko Chan in *ca.* 8° 50' N. The indigenous population of sea nomads, known to themselves as Moken, to the Burmese as Salôn, to the Thais as Chao Nam or Chao Lay and to the Malays as Oran Laut ("boat people"), numbered 868 according to the 1884 *Mergui District gazetteer*, and were classified as "nature-worshippers" (animistic-shamanistic). Today, they are probably outnumbered by Burmese and Chinese, even on their own islands, and have been partly converted to Theravāda Buddhism in the north of the archipelago, whilst Islam is believed to have made some inroads in the south (Annandale, 1903; Lebar, 1964).

2. Mergui District. This is the southernmost district of Burma and, under the British, of the Tenasserim Division, extending on the mainland from the boundaries of Tavoy District (13° 28' N.) to the mouth of the Pakchan River (9° 58' N.) and the Isthmus of Kra in the south, and including the Burmese part of the Mergui Archipelago. The region is covered in dense jungle, and its economic wealth rests on tin, coal and gold reserves, as well as on the fisheries industry. The main townships are Mergui, Palaw, Tenasserim, Bokpyin and Maliwun. According to the 1921 Census (*1924 Mergui District gazetteer*), the total urban population of Mergui District numbered 25,382, of which 11.69%, or 1,679 persons, returned their religion as Muslim. This comparatively low figure, although representative of the position of Islam in the Mergui District during the 20th century, in fact belies the importance of the region as a channel for the spread of Islam to Thailand and northern South-East Asia during earlier centuries.

3. Mergui Township. This is situated in 12° 26' N. and 98° 36' E., on the Tenasserim Coast, just outside the principal mouth of the Tenasserim River, and protected by the small, hilly island of Palaw which forms a good natural harbour. In 1921 the total population of Mergui municipality was 17,106, of which Buddhists comprised 65.6%, Muslims 14.2%, Hindus 10.4%, and Christians and animists the remainder. The great majority of Mergui's Muslim population are Zerbadī (of mixed Indian-Burmese descent, but identifying strongly with Burma), though there are also a number claiming Arab descent, whilst in the rural areas, Malay Muslims form a strong contingent, numbering 4,239 in the 1911 Census (Yegar, 1972, 118).

As a port in the 20th century, Mergui has survived on the Burmese coastal trade, exporting tin, rubber, pearls, mother-of-pearl, salted fish, ambergris and edible birds' nests. In the past, however, both Mergui and (more particularly) the neighbouring township of Tenasserim were staging posts on an important overland trade route between the Indian Ocean and the South China Sea (Forbes, 1982, *passim*). For several centuries this trade was to be dominated by Muslims, and it was via Mergui and Tenasserim that Islam first penetrated to the heartland of the Thai Kingdom of Ayutthaya (*ca.* 751-1181/1350-1767).

History. The first mention of a trans-peninsular trade route in the Mergui-Tenasserim region occurs in the 1st/7th century *Liang-shu* (Annals of the Liang Dynasty), where reference is made to Tunsun, "an ocean stepping stone" between East and West in the northern part of the Malay Peninsula (Wheatley, 16; Briggs, 257). During this era, the region was chiefly populated by Mons, but trade was apparently dominated by Indian settlers, and was not dependent upon the local inhabitants. Arab shipping is thought to have first penetrated South-East Asian waters during the 5th or 6th centuries A.D. (Tibbetts, 1956, 207), and it is therefore possible that South Arabian voyagers visited the Mergui region even in pre-Islamic times. Early Arab geographical texts, dating from *ca.* 236/850, mention several ports on the western shores of the Malay Peninsula which might possibly be identified with the Mergui region, one of which, Kalāh [see kalah], is described by al-Masʿūdī (in 332/943) as being a "general rendezvous of the Muslim ships of Sīrāf and ʿUmān", and by al-Muhallabī (*ca.* 370/980) as "a prosperous town inhabited by Muslims, Indians and Persians" (Wheatley, 216-20; Tibbetts, 1979, 118-28). Another (perhaps more likely) identification is with Ḳaḳullah,

described by Ibn Sa'īd (d. 685/1286) as standing near a large river "which flows down from a mountain in the north" (the Tenasserim River? - Tibbetts, 1979, 95, 128-35). By the time of Sulaymān al-Mahrī, however, this uncertainty has disappeared, for in his early 10th/16th century *'Umda* (Tibbetts, 1979, 229), the master navigator identifies Mergui as the main port for Tenasserim, and explains that from this landfall both local people and Arabs travel overland, via Tenasserim, to *Shahr-i Naw* (the "new city", or Ayutthaya, capital of the Thai Kingdom of the same name, founded by King Rama T'ibodi in 1350 A.D.).

During the first two centuries of Ayutthayan rule, the Tenasserim trade route—which passed under Thai control in or about 775/1373—was frequented by Muslim and Hindu merchants from South Asia, as well as by Arab and Persian merchants from the Middle East. It seems certain that, after the Portuguese conquest of Malacca in 1511, Muslim usage of the Tenasserim trade route increased in a partly successful attempt to bypass the Portuguese Catholic stranglehold on trade with the Far East. During this period, Muslim traders from Surat, Dābūl, and increasingly, from the Coromandel Coast, came to dominate Ayutthaya's trade with the Indian Ocean, supplying opium, minerals and dyestuffs, but above all cotton cloth, to the Thai Kingdom. Exports from Ayutthaya to the west via the Tenasserim route included aromatic woods and gums—much of which was destined for Yemen and the Ḥidjāz—spices, tin, ivory and porcelain.

A major factor in the rise of Islamic influences over the Mergui-Ayutthaya trade was the establishment of the Muslim Kingdom of Golconda in the mid-10th/16th century [see GOLKONḌĀ]. Merchants trading from the Golcondan capital and chief port of Machilipatanam (or Masulipatam, commonly known in the region as Bandar or "harbour") came rapidly to dominate the export of Indian cotton fabrics to Ayyuthaya, and by the time of the reign of the Thai monarch Phra Narai (*ca.* 1068-1100/1657-88), foreign Muslims, chiefly of South Asian origin but including numbers of Arabs, Persians and even Turks, had attained to positions of great power and prestige within Siam. Nor was the Mergui-Tenasserim route used purely for commerce; Muslim emissaries from Golconda and Iran (Ibrāhīm, 43-52), and possibly from Acheh (Penth, *passim*), are known to have travelled to Ayutthaya by this route, both with the intention of improving trade and, apparently, in the hope of converting the Thai king to Islam (Graham, ii, 294).

By 1679, the South and West Asian Muslim community in Siam had become so numerous and influential that they had their own quarter in Ayutthaya (as distinct from the various Malay Muslim districts), whilst an English factor of the Honourable East India Company was able to report of the Mergui-Tenasserim region: "The Persians and Moors ... are now in effect masters of that part of the country as well as the commerce ... the colonies they have planted in those parts do almost equal the number of the natives, but far exceed them in wealth and power" (White, *IOR* E/3/40). During this period, the governors of Mergui, Tenasserim, Phetchaburi and Bangkok were all Muslims of West or South Asian origin, as were the captains of Phra Narai's merchant vessels trading with Golconda. Indeed, during the first half of the 11th/17th century, Thai trade with the west (that is, with the Bay of Bengal and the Indian Ocean littoral) was almost entirely in Muslim hands, whilst Phra Narai employed a succession of at least three (ostensibly Persian) Muslims as *phraklang*, or foreign minister (the most powerful position at the Thai Court), and even maintained a squadron of Muslim horse guards (de Choisy, 196).

Islamic influence at Ayutthaya entered into sharp decline during the latter part of Narai's reign, particularly following the rise in power of the Greek adventurer, Constant Phaulkon, who came to dominate the Thai royal court in *ca.* 1090/1679 (Hall, 364-74). Phaulkon perceived the "Moors" as political and commercial rivals, and at his behest their position and influence was gradually diminished, whilst that of the Europeans (and particularly of France) was correspondingly increased. During this period, the Muslim merchants dominating the Mergui-Tenasserim region were gradually displaced, and in 1683 an Englishman, Samuel ("Siamese") White, was appointed *shāhbandar* of Mergui, with disastrous consequences for non-European regional commerce as a whole. Two years later, as a result of Phaulkon's commercial and political intrigues, war broke out between Siam and Golconda. Shortly thereafter, in 1687, a final blow was dealt to the Mergui-Machilipatanam trade when Golconda succumbed to the advancing armies of the Mughal Emperor Awrangzīb [*q.v.*], and its capital was reduced to the status of a fishing village (Alam, 1959, *passim*).

The Mergui-Tenasserim trade route never fully recovered from these setbacks, although Indian Muslim merchants continued to trade with Ayutthaya via Mergui throughout the first half of the 12th/18th century. In *ca.* 1179/1765, however, even this diminished trade was brought to an abrupt end by the Burmese conquest of both Mergui and Tenasserim. Two years later, in 1767, Ayutthaya was itself captured and sacked by the Burmese armies of King Hsinbyushin.

Following the Burmese conquest, the entire Mergui-Tenasserim region as far south as Point Victoria was incorporated within the Burmese empire. The new frontier between Siam and Burma, now much advanced in the latter's favour, remained sealed to trade (Low, iii, 287, 290); besides, the overland portage route from Mergui to Ayutthaya had become increasingly anachronistic, and regional inter-Asian trade had come to be increasingly dominated by European commerce. With the Burmese conquest of 1765, therefore, Mergui ceased to serve as a channel for Muslim commerce and concepts into Siam, and became instead a Burmese backwater. It still retained a substantial Muslim population, however, and it is interesting to note that indigenous Burmese chronicles possibly dating from the late 12th/18th century describe the rebuilding of Mergui in *ca.* 1770, and record the allocation of a special area (the Kakaung quarter) to the township's Muslim population (Kyaw Din, 252-3).

MERIČ, the Turkish name of a river called Hebros in classical Greek and Maritsa in Bulgarian. It is the principal river of the south-eastern Balkans and, under the Ottomans, of the *eyālet* of the Rumeli. Al-Idrīsī (*Opus geographicum*, Naples 1977, 796 = 4th section of the 5th climate) mentions it as *nahr Mārisū*; on his map of 1154, however, we read *nahr Akhīlū* (K. Miller, *Mappae arabicae*, Bd. I, pt. 2, Blatt V, Bd. II, 122, 126).

From its source in the north-western spur of the Rhodope mountains south of Sofia, the Merič flows eastwards through Bulgaria, forming a broad valley that separates the Balkan mountains to the north from the Rhodope to the south. It touches Turkish territory 20 km west-south-west of Edirne, and for 14 km it flows along the Turkish-Greek border; after a brief stretch inside the Turkish *il* of Edirne, where it is joined by the Tunca as it skirts the province's capital, the Merič turns southwards, and after 8 more km it again forms the border between Turkey and Greece. After having received the important tributary of Ergene, the river flows into the Aegean through a delta, at the eastern mouth of which is the port city of Enez.

It was the Ottomans who integrated the course of the Merič within the *Dār al-Islām*, but the region had experienced Turkish presence long before that: the Turkic Bulgars, then the Pechenegs and Cumans, and finally the forays of the Aydîn [*q.v.*] chieftain Umur Beg, who sailed upstream with his warships to the level of Dimetiḳa (Didymothike) in late 1343 (I. Melikoff-Sayar, *Le destan d'Umur Pacha*, Paris 1954, 41, 101; P. Lemerle, *L'émirat d'Aydin: Byzance et l'Occident*, Paris 1957, 169). Unlike the Turks of Aydîn, the Ottomans under Murād I approached the Merič from landwards and subsequently used the avenue presented by the river's valley for their further conquests in the Balkans. The counter-offensive of 766/1364 resulted in a defeat near the left bank of the Merič, during which the fleeing army sought salvation by crossing the river, a pre-dawn rout remembered by the place-name Ṣîrp Ṣîndîghî "Serbian defeat" (*Die Altosmanische Chronik des ʿĀšıḳpašazāde*, ed. F. Giese, 51).

Before the conquest of Constantinople, Edirne was the principal residence of the Ottoman sultans, and even later the Merič witnessed some of the pomp of court life. Thus in 861/1456-7 circumcision festivities of the *shehzādes* Bāyezīd and Muṣṭafā were held on the river island Kirishčiler adasî (*ʿĀšıḳpašazāde*, ed. Giese, 141).

The broad fertile valley of the Merič was appreciated in Byzantine times as one of the granaries of Constantinople; this role was further increasing during the Ottoman rule after the Turks had introduced there the cultivation of rice in the 9th/15th century. The river itself served as a transportation route for these supplies by boat to Enez, from where they were carried by sea-going craft to Istanbul (this role of the Merič ceased only in the 1870s with the construction of a railway from Istanbul). The economic importance of the Merič valley in the Ottoman period was also demonstrated by the prosperity of such cities as Filibe (Plovdiv), Edirne and Enez, and by the creation of Tatar Pazardjîḳ; this town, founded in 890/1485, was settled mainly by Bessarabian Tatars and Ottoman *sipāhīs*; its annual fair, held in July, was frequented by merchants from many parts of the empire. The valley represented an age-old route of communications, transportation and troop movements that continued beyond the Merič to Sofia and Belgrade. In the Ottoman postal organisation, the stages along the Merič pertained to the *orta ḳol* system. The effectiveness of the route was enhanced by the construction and endowment of *khāns* and bridges; especially remarkable is the 10th/16th century bridge known as Djisr-i Muṣṭafā Pasha, with a *khān* on either side, in present-day Svilengrad 40 km west of Edirne.

The Merič acquired a special political significance in the final years of the Ottoman empire when the question of the Turkish-Bulgarian and Turkish-Greek borders arose. With the successful completion of the War of Independence in Anatolia, the Turkish demands that the British authorities persuade the Greeks to withdraw their forces beyond the Merič were met, and the Treaty of Lausanne (July 1923) established the river as the definitive border between Turkey and Greece.

MERIDA [see MĀRIDA].

MERINIDS [see MARĪNIDS].

MERKA, the official spelling of Markah (as in al-Idrīsī *et alii*), a settlement which lies in lat. 1° N and 44° E, south of Maḳdishū [*q.v.*] in the Republic of Somalia. It is mentioned *ca.* 943 A.D. by al-Masʿūdī

among places in Africa inhabited by the descendants of Kūsh [*q.v.*], but the reading must be considered doubtful because the other places enumerated are in western Africa (cf. *Murūdj*, ed. Pellat, index, s.v. Maranda). Al-Idrīsī (Climate 1, section 6) mentions it as associated with the Hawiyya, one of the groups of the Somali; Ibn Saʿīd (*apud* Abu 'l-Fidāʾ) states that it was their capital, and that it was inhabited by Muslims. In so far as they can be dated by external features, the mosques appear to be of late 18th century date or later. The Friday Mosque, nevertheless, has a dedicatory inscription equivalent to A.D. 1609, and that of Shaykh ʿUthmān to A.D. 1560. The grave in this structure appears to be older, for it incorporates stonework with a cable pattern that may be compared with that in the *miḥrāb* of the mosque at Kizimkazi [*q.v.*], Zanzibar, where the inscription in floriate Kūfic and other decorations are dated by an inscription equivalent to A.D. 1107.

MERKEZ, Shaykh Muṣliḥ al-Dīn b. Muṣṭafā, the head of an Ottoman Ṣūfī order and saint.

Merkez Muṣliḥ al-Dīn Mūsā b. Muṣṭafā b. Ḳîlîdj b. Hadjdar belonged to the village of Ṣarî Maḥmūdlu in the Anatolian district of Lādhikiyya. He was at first a pupil of the Mollā Aḥmad Pasha, son of Khiḍr Beg [*q.v.*], and later of the famous Khalwatī Shaykh Sünbül Sinān Efendi, founder of the Sünbüliyya, a branch of the Khalwatiyya, head of the monastery of Ḳodja Muṣṭafā Pasha in Istanbul (see Bursalî Meḥmed Ṭāhir, *ʿOthmānlı müʾellifleri*, i, 78-9). When the latter died in 936/1529, Merkez Efendi succeeded him in the dignity of Pīr. He held the office of head of a monastery for 23 years and died in the odour of sanctity in 959/1552, aged nearly 90. He was buried in Istanbul in the mosque which bears his name (cf. *Ḥadīḳat al-djawāmiʿ*, i, 230-1; J. von Hammer, *GOR*, ix, 95, no. 495) before the Yeñi Ḳapu. At the tomb of Merkez Efendi there is a much-visited holy well, an *ayazma*, to which one descends by steps. Its reddish water is said to have the miraculous power of healing those sick of a fever (cf. Ewliyā Čelebi, i, 372; von Hammer, *Constantinopolis*, i, 513; idem, *GOR*, *loc. cit.*, following the *Ḥadīḳat al-djawāmiʿ*, *loc. cit.*). Beside it is the cell (*zāwiya*) of Merkez Efendi, of which miraculous stories still circulate among the people. He had many pupils, including his son Aḥmad, famous as the translator of the *Ḳāmūs*, his son-in-law Muṣliḥ al-Dīn (cf. Ewliyā, *loc. cit.*), the poet Ramaḍān Efendi, called Bihishtī, and many others.

MERLIN [see bayzara].

MERSIN, a sea-port on the south coast of Anatolia, capital of the province of Içel with seven districts (1980: 843, 931 inhabitants) and the centre of the Berdan-Ova, where *ca.* 40,000 ha. irrigated fields of cotton, citrus-trees and vegetables are cultivated. These products are exported through an important harbour (1980: 10,452 m³ wood, 331,145 head of livestock, 74,842 passengers). Beside this, there exists an expanding industry (76 factories, 13,439 labourers) in textiles, chemical products (refinery) and building materials. The regularly-built town, now (1980) with 216,308 inhabitants, was founded in 1832 by Ibrāhīm Pasha [*q.v.*], son of Muḥammad ʿAlī [*q.v.*]; its name derives from the Greek *myrsini* (μυρσίνη) "myrtle", a tree, which grows in the region. To the north-west of Mersin is situated the Neolithic *höyük* of Yümüktepe, which was well-fortified in the 5th millenium B.C. In Hellenistic-Roman times, the harbour town of Zephirium lay in the neighbourhood; not far away to the south-west, the ruins of Soloi, later Pompeiopolis, are to be seen.

Bibliography: V. Cuinet, *La Turquie d'Asie*, Paris 1892, ii, 50 ff.; J. Garstang, *Prehistoric Mersin*, Oxford 1953; L. Rother, *Die Städte des Çukurova: Adana—Mersin—Tarsus*, Tübingen 1971; idem, *Gedanken zur Stadtentwicklung in der Çukurova (Türkei)*, Wiesbaden 1972.

MERSIYE [see marthiya].

MERTOLA [see mīrtula].

MERV [see marw].

MERV-RŪD [see marw al-rūdh].

MĒRWĀRĀ [see rādjāsthān].

MERZIFŪN, also Mārsiwān, modern Turkish spelling Merzifon, a town of north-central Anatolia, lying in lat. 40°52′ and long. 35°35′E. and at an altitude of 750 m./2.464 ft. It is situated on the southern slopes of the Tavşan Dağı, with a rich and fertile plain, the Sulu Ova, on its south, where fruit, vines, nuts, opium poppies, etc. are cultivated, and with the towns of Çorum [see čorum] at 69 km./42 miles to the south-west and of Amasya [*q.v.*] at 49 km./30 miles to the south-east.

The town most probably occupies the site of the ancient Phazemon (Φαζημών) in the district of Phazemonitis; the name is probably a development of Φαζημών. Ibn Bībī (cf. *Recueil de textes relatifs à l'histoire des Seldjoucides*, ed. M. Th. Houtsma, iv, Leiden 1902, 292, 12) also gives the form Bāzīmūn. Little is known of the early history of the town in the Muslim period. It belonged to the kingdom of the Dānishmendids [*q.v.*] and when in 795/1393 Bāyezīd I drove the ruler of Sivas, Mīr Aḥmad, out of the country, the land of "Marsvani", as the Bavarian traveller Hans Schiltenberger (cf. *Hans Schiltbergers Reisebuch*, ed. V. Langmantel, Tübingen 1885, 12) called it, passed to the Ottoman empire. Merzifūn plays a notable part in the history of Ottoman culture as the birthplace and scene of the activities of learned men and authors (cf. A.D. Mordtmann, *Anatolien*, 88); and it was the family place of origin of the celebrated 11th/17th century Ottoman Grand Vizier Ḳara Muṣṭafā Pasha Merzifonlu [*q.v.*].

In Merzifūn there used to be a number of dervish *tekkes* (cf. Ewliyā Čelebi, *Seyāḥet-nāme*, ii, 396 below, where several are mentioned). The saint locally reverenced was Pīr Dede Sulṭān, said to be a pupil of Ḥādjdjī Bektash (Ewliyā, ii, 396).

Monuments there include several mosques converted from Byzantine churches, including the so-called Eski Cami, on the walls of which Christian paintings could be seen till at least the later 19th cen-

tury (cf. V. Cuinet, *La Turquie d'Asie*, Paris 1892, i, 761); the *madrasa* of Meḥemmed Čelebi (built 817/1414 by one Abū Bekr b. Meḥmed, to which an incongruous clock tower was added in the 19th century); and the complex built by Ḳara Muṣṭafā Pasha, with mosque (built in 1077/1666-7), *madrasa* and caravanserai (see G. Goodwin, *A history of Ottoman architecture*, London 1971, 20, 362, 419).

In the 19th century, Merzifūn was the centre of American Protestant missionary enterprise in the *wilāyet* of Sivas (in which Merzifūn was in late Ottoman times situated), with the Anatolia College, a theological seminary, schools and charitable institutions, proselytism being aimed mainly at the local Armenians (Cuinet numbered the town's population at 13,380 Muslims, 5,820 Armenians and 800 Greeks). There were also Roman Catholic Jesuit and Gregorian Armenian schools. Most of these did not survive the First World War and the Armenian massacres, with the consequent liquidation of that ethnic element from the town, as also the Greeks (the 1927 census enumerated only 11,334 inhabitants of Merzifūn), but a small body of American missionaries and a school were still functioning in the late thirties.

Modern Merzifon is the chef-lieu of an *ilçe* or district of the same name in the *il* or province of Amasya, and is noted for its cotton textiles. The population of the town was in 1970 28,210 and that of the district 59,777.

(F. Babinger-[C.E. Bosworth])

MESHʿALE ("Torch"), a journal published in Turkish, of which eight numbers only appeared between 1 July and 15 October 1928.

It had been founded by Djewdet Ḳudret (Cevdet Kudret Solok), Kenʿān Khulūṣī (Kenan Hulusi Koray), Ṣabrī Esʿad (Sabri Esat Siyavuşgil), Waṣfī Māhir (Vasfi Mahir Kocatürk), Ḍiyāʾ ʿOthmān (Ziya Osman Saba) and Yāshār Nābī (Yaşar Nabi Nayır) after the unexpected success of an anthology (*Yedi meshʿale*, Istanbul 1928) of the above-mentioned authors plus Muʿammar Lüṭfī. These young writers, the *Meshʿaledjiler* (*Meşaleciler*), wished to combat the general, unfavourable judgment pronounced upon the literature of their country through the novel expression of a literary production devoid of the expression of the authors' individual feeling. The contrasting influences, whose action they felt, did not reach maturity, but they certainly felt the need of a call to order, more clearly discernible, it was true, in other Western intellectuals, in order to give a new response to the confused expectations of their national revolution.

Meshʿale had the aim of functioning solely in the sphere of literature and art, but its founders were not unaware of social cares, and a few years later, a journal, *Kadro* (1932-5), was to endeavour to shape, within Kemalism, a new political and ideological milieu. *Meshʿale* lived though the changes and contrasts of the age, even in its external aspect, since in the latter issues, Latin characters began to replace the Arabic ones, and its decorative designs were always in the style of the twenties of the West, the same elegant and objective artistic style desired by the *Meshʿaledjiler* poets, whilst the prose writer Kenʿān Khulūṣī was closer to Symbolism.

Under the patronage of Yūsuf Ḍiyāʾ (Yusuf Ziya Ortaç), *Meshʿale* provides us with a useful panorama of the Turkish literature of its time, and the foreign authors presented in it confirm the French influence on Turkish culture. That some young people, with the help of writers already well-known, should have endeavoured, by means of journals like *Meshʿale* and *Kadro*, to bring about a new cultural atmosphere, shows the desire for social action on the part of the Turkish intellectuals. In their literature, it is always nevertheless more essential to search out the elements of continuity and originality which lie beyond external appearances, together with those enduring elements of faithfulness—sometimes not discernible as such—to tradition.

Bibliography: For the traditional view, see R. Mutluay, *Çağdaş Türk edebiyatı (1908-1972)*, Istanbul 1973; a new interpretation is furnished in G.E. Carretto, *Saggi su Meşale. Un'avanguardia letteraria turca del 1928*, Venice 1979, which develops further two articles of 1976 and 1977. See also the special number of *Varlık* (*50. yılında Yedi Meşale özel sayısı*), no. 847 (April 1978). On *Kadro*, see Carretto, *Polemiche fra kemalismo, fascismo e communismo negli anni '30*, in *Storia contemporanea*, viii/3 (1977), 205-12, Turkish tr. in *Tarih ve Toplum*, nos. 17-18 (1985).

MESHRŪṬA, MESHRŪṬIYYET [see dustūr].

MESĪḤ MEḤMED PASHA, Khādim (*ca.* 901-98/*ca.* 1495-1589), Ottoman Grand Vizier under Sultan Murād III [*q.v.*].

Khādim Mesīḥ made his career as one of the white *aghas* in the Sultan's private household (*Enderun* [*q.v.*]) at the time when their influence was still predominant in the palace. At the accession of Murād III (982/1574), he held the office of chief butler (*Kilārdjibashi*). He left the palace service to become *Beglerbegi* of Egypt. He governed that province for five years. His successful administration brought him the appointment as Third Vizier and the recall to Istanbul (989/1581). When the Grand Vizier Özdemiroghlu ʿOthmān Pasha [*q.v.*] left the capital as *Serdār* (20 Radjab 992/28 July 1584), Mesīḥ Pasha was made Second Vizier and *Ḳāʾimmaḳām*. Upon the death of the Grand Vizier in 993/1585, Mesīḥ Pasha became Grand Vizier, then being about ninety years old. After little more than four months in office he resigned because of a disagreement with the sultan, who refused to replace the *Reʾīs ül-küttāb* Ḥamza Efendi by Küčük Ḥasan Bey, as was the wish of the Grand Vizier (24 Rabīʿ II 994/14 April 1586). Mesīḥ Pasha retired from public life. He died three years later and lies buried in the *türbe* in front of the mosque founded by him in 994/1585 in the Karagümrük quarter of Istanbul.

(A.H. de Groot)

MESĪḤ PA͟SHA, Ottoman Grand Vizier in 906/1501. Mesīḥ and his elder brother K͟hāṣṣ Murād were sons of a brother of Constantine IX Palaeologus (Babinger, *Eine Verfügung*). Apparently Mesīḥ and Murād were captured during the conquest of Constantinople and brought up as pages in Meḥemmed II's seraglio.

The Greek faction under this Sultan first came to power when he decided to conquer the Greek island of Euboea (Eg͟hriboz) in 875/1470. Mesīḥ distinguished himself for the first time during this campaign as *sandjaḳ begi* of Gelibolu [*q.v.*] and admiral of the navy. But soon afterwards he offered, as Venetian documents testify, to surrender Gelibolu, the Ottoman naval base, and the fleet to the Venetians in return for 40,000 gold ducats, aspiring to become ruler over the Morea (Babinger, *Mehmed*, 290). Mesīḥ appears to have been a vizier in late autumn 1476, or in early 1477 (see discussion in Reindl, 280). Two documents (Gökbilgin, 138, 148 n. 153) indicate that he was already second vizier on 19 S͟haʿbān 882/26 November 1477 and also in 883/1478, Meḥmed Pa͟sha Ḳaramānī [*q.v.*] being Grand Vizier in both cases. A contemporary source (Donado da Lezze, 112) states that he was a newly-appointed fourth vizier when he was made commander-in-chief of the army and navy against Rhodes in the spring of 995/1480. Having failed at the siege, he was dismissed from the vizierate (Ibn Kemāl, cited by Reindl, 281), but apparently left with the *sandjaḳ* of Gelibolu as admiral of the navy. During the indecisive period after the death of Meḥemmed II (3 May 1481) Mesīḥ, who belonged to the military *dews͟hirme* [*q.v.*] group of Gedik Aḥmed, appeared as a vizier in the *Dīwān*. Bringing Bāyezīd II to the throne, the military *dews͟hirme* faction had then full control of the government.

While Gedik Aḥmed, with the support of the Janissaries, acted too independently, Mesīḥ won the trust of the Sultan as an opponent of Djem [*q.v.*]: when in early summer 887/1482 Gedik Aḥmed, suspected of being pro-Djem, was imprisoned in the Seraglio, the Janissaries invaded the palace and threatened the Sultan, who sent a group of dignitaries, including Mesīḥ, to negotiate. He succeeded in appeasing the soldiery by accepting all their demands including the promise never to appoint viziers outside the *dews͟hirme* (da Lezze, 179-80). This convinced Bāyezīd that he was completely dependent, for his safety on the throne, on the military faction. Mesīḥ, closely co-operating with the seraglio, demonstrated his diplomatic ability and loyalty once again when Djem took refuge with the Hospitallers of Rhodes. During negotiations, while Gedik Aḥmed proved to be uncompromising, Mesīḥ achieved an agreement to the satisfaction of Bāyezīd, thus becoming the architect of Bāyezīd's policy in respect of the Djem question. Now members of the military *dews͟hirme* (Dāwūd, Mesīḥ and Hersek-og͟hlu Aḥmed) dominated the *Dīwān*, while Bāyezīd sent to the most sensitive governorships his eunuch *ḳapï-ag͟has* from the seraglio (Yaḥyā, Yaʿḳūb, ʿAlī, K͟halīl and Fīrūz). Supported by the seraglio, Mesīḥ managed to survive Bāyezīd's bold decision to eliminate Gedik Aḥmed, whom he believed to be a threat to his throne. After his execution (18 November 1482), a new era, that of the seraglio's direct control of government, began. Mesīḥ was second vizier in the *Dīwān* in 888/beg. 9 February 1483 (*Anonymous chronicle*, B.N. Paris, suppl. 1047, fol. 93a; also Yaʿḳūb Pa͟sha's *wakfiyya* dated *awāʾil* Muḥarram 888/mid-February 1483, in Epstein, 290). Mesīḥ had replaced in this post Djazarī Ḳāsïm Pa͟sha, a bureaucrat famous as "the founder of the Ottoman bureaucratic tradition". When Isḥāḳ Pa͟sha, Grand Vizier and supporter of Gedik Aḥmed, had to leave the *Dīwān* (in the summer or early autumn 888/1483, see Reindl, 171, 236, 283), Dāwūd Pa͟sha, who was already second vizier in 887/beg. 20 February 1482, and apparently favoured by the seraglio faction, became Grand Vizier. It is suggested that Mesīḥ succeeded Isḥāḳ in the grand vizierate (Reindl, 171, 236, 283, on the authority of the contemporary historian Ibn Kemāl), and kept the position until 890/1485. But Mesīḥ is shown in the *Anonymous chronicle*, fol. 93b, as second vizier and Dāwūd as Grand Vizier in 889/beg. 30 January 1484.

In 890/beg. 18 January 1485, Mesīḥ was suddenly dismissed from the vizierate by the sultan, who was infuriated at something which we cannot determine (Ibn Kemāl, cited by Reindl, 283). He was first banished to Filibe as its *subas͟hï*, and then was transferred to Kaffa [*q.v.*] as its *sandjaḳ begi* in 892/1487 (Kaffa, like Salonica, had become an exile for demoted viziers). The customs register of Kaffa dated 892/1487 shows that Mesīḥ then owned a ship which was active in the traffic between Istanbul and Kaffa and at that time his *ketk͟hüdā* took for him slaves at Azaḳ. Mesīḥ apparently left Kaffa when Prince Meḥemmed was sent as its governor toward the end of 895/1489 (Reindl, 284). Next we find him in our sources as *sandjaḳ begi* of Akkerman (Akkerme) in Rabīʿ II 903/beg. 27 November 1497. According to the *Anonymous chronicle*, fols. 118b-121a, he played a major role in stopping a Polish army which invaded Moldavia in 1496-7, in cooperation with the Rumelian and frontier forces and with the Moldavian Voyvode Stephen. Mesīḥ took advantage of this achievement to gain the sultan's favour, sending him 29 standards and enslaved Polish nobles.

The news was welcomed in Istanbul, and Venice was informed as a warning (Sanuto, *I Diarii*, i, 845; Fisher, 56). Mesīḥ's pilgrimage in the summer of 904/1499 seems to be a calculated move to go to Istanbul and exploit his recent success in Moldavia. Actually, considering his experience in naval affairs, his knowledge of western politics and his family connections with Venice (Reindl, 279), he was a man who would be most useful in the war against Venice, which began in June 1499. Shortly after his return from Mecca he was appointed a vizier (*bassà* in Sanuto, quoted by Reindl 285, does not mean necessarily Grand Vizier). In fact, in Radjab 905/February 1500, the Grand Vizier was Yaʿḳūb Pa͟sha, Bāyezīd II's first Grand Vizier of palace eunuchs, who came to this post following the death of Čandarli̊ Ibrāhīm Pa͟sha at the end of Muḥarram 905/August 1499. Mesīḥ entered the *Dīwān* as second vizier while his friend Hersek-og͟hlu occupied the post of third vizier (*Anonymous chronicle*, fols. 124a). Eunuchs (*ṭawās͟hī*) were never welcomed by the bureaucratic and military factions, but they estab-

lished supreme authority over government affairs and were particularly favoured by Bāyezīd II. In Muḥarram 906/July-August 1500, Mesīḥ was still mentioned as second vizier (Reindl, 221-2, 354, believes Mesīḥ was made Grand Vizier immediately after Ibrāhīm's death in 1499), and in Ramaḍān 906/March-April 1501 he left Istanbul for Tash-ili in Ḳaramān to quell the rebellion of the Warsak tribes which were supporting a Ḳaramānid pretender by the name of Muṣṭafā. There is no doubt that in the spring of 1501 Mesīḥ was appointed Grand Vizier for the first time to lead this important campaign (details in Idrīs Bidlīsī, *Hesht bihisht*, TKP Library, Hazine 1655). Combining the skills of a general and diplomat, Mesīḥ was able to persuade the tribal chieftains not to give their support to the Ḳaramānid pretender. Soon after his return to Istanbul, a joint Franco-Venetian invasion of the island of Mytilene (Midilli [*q.v.*]) infuriated the sultan, who struck his Grand Vizier with his bow (September 1501). Soon afterwards, Mesīḥ was wounded attending a fire in Ghalaṭa, and died five days later (Djumāda I 907/November 1501). The mosque bearing his name in Istanbul was converted from a church and is at present in need of repair. Its *waḳfiyya* is dated Rabīʿ I 907/October 1501 (Ayverdi and Barkan, 142, no. 799). For the *awḳāf* for his mosque and *madrasa* in Gelibolu, see Gölbilgin, 439. Its *waḳfiyya* is dated 888/1478. The names of his three sons, ʿAlī Beg, Maḥmūd Čelebi and Bali Beg, are known. The latter was *sandjaḳ begi* of Vulčitrin in Rabīʿ I 909/ August-September 1503.

(Halil Inalcik)

MESĪḤĪ, an important Ottoman poet of Bāyezīd II's time (886-918/1481-1512), who died after 918/1512, possibly even after 924/1518 (see V.L. Ménage, *An Ottoman manual of provincial correspondence*, in *WZKM*, lxviii [1976], 3-45, and idem, art. on *Gül-i ṣad-berg* in *Osmanlı Araştırmaları*, forthcoming). His given name was ʿĪsā. Born in Priştina, he came in his youth to Istanbul, where he became a *medrese* student and also soon distinguished himself as a calligrapher. He was able to find favour with the Grand Vizier Khādīm ʿAlī Pasha, whose *dīwān* secretary he became. However, his patron had frequent cause to be annoyed with him because of his undisciplined, pleasure-oriented life and his lack of conscientiousness in the performance of his official duties, and is reported to have spoken of him as a *sheher oghlanî* ("street arab"). He nevertheless held this position until Khādīm ʿAlī Pasha fell in 917/1511 fighting the Shīʿī rebels under Shāh Ḳulī. Mesīḥī composed a deeply-felt elegy on his death but, having need of a new protector, ended with a mention of *yeñičeri aghasî* Yūnus Pasha (cf. İ. Morina, *Mesihi'nin Hadim Ali Paşa'ya yazdığı mersiyesi*, in *Çevren*, viii [1981], no. 31, 55-63). Based on the information given by ʿĀshiḳ Čelebi, it was formerly accepted that Mesīḥī did not succeed in gaining the protection of either Yūnus Pasha or the *Nishāndjî* Tādjī-zāde Djaʿfer Čelebi, that he had to be content with a small fief in Bosnia and that his attempts to gain the patronage of Selīm I failed likewise. This assumption should now be revised insofar as Sehī's statement that Mesīḥī was in the service of Yūnus Pasha has been shown by Ménage to be the more reliable.

Mesīḥī's place in Ottoman *dīwān* poetry is that of a highly gifted and original poet without an extensive œuvre. His language is relatively plain and clear, his manner devoid of affectation. Some poems and passages of his captivate through their lyricism. There is wealth of charming new images, associations and ideas. A touch of Rumelian dialect here and there is of linguistic interest.

Mesīḥī's lifework comprises: (1) His not especially voluminous *Dīwān* has not yet been printed. Critical editions in typescript form exist, however: Mine Özoğul, *The Divan of the 15th century Ottoman poet Mesīḥī*, Ph. D. thesis, Edinburgh University 1969, and S. Jaber, *Mesîhî'nin hayatı ve dîvânının tenkitli metni*, Ph.D. thesis, Istanbul 1953. Best known in Europe is his *murabbaʿ* on spring which Sir William Jones published with a Latin translation in *Poeseos Asiaticae commentariorum libri sex*, Leipzig 1774, and which was thereafter repeatedly translated into German, French, Italian, English, Russian and Serbian (cf. F. Bayraktareviç, *Mesîhî'nin dünya edebiyatında yer alan "Bahariye"si*, in *İstanbul Üniversitesi Edebiyat Fakültesi Türk Dili ve Edebiyatı Dergisi*, xxii [1974-6], 213-9; İ. Eren, *"Bahariye"nin Fransizca, Rusça ve Sırpça çevirileri*, in *ibid.*, 221-7. (2) The *methnewī Shehr-engīz* ("rouser of the city") is Mesīḥī's most original work. It is a humorous description of the handsome youths of Edirne, all of whom have Muslim names and are of the lower middle class, with mention of their or their father's profession. (Except for four of the total of 47, two verses are dedicated to each youth.) Cf. on the text, İ. Morina, *XV y.y. büyük Türk şairi Priştine'li Mesihi (1470-1513)* [*sic*], in *Çevren*, viii (1981), no. 30, 39-56. Its language is plain, unpretentious and easily understandable. Mesīḥī's *Shehr-engīz* became popular and he had numerous followers in this poetic genre. It is generally but not unanimously accepted that the *shehr-engīz* by Dhātī would appear to date from just about the same time, and that it had no Persian model (cf. Mine Mengi, *Mesîhî'nin hayatı, şairliği ve eserleri*, in *Türkoloji Dergisi*, vi [1974], no. 1, 109-19; A.S. Levend, *Türk edebiyatında şehr-engizler ve şehr-engizlerde İstanbul*, Istanbul 1958; and M. İzzet, *Türk edebiyatında şehrengîzler*, unpubl. Ph.D. thesis, Istanbul 1936). (3) *Gül-i ṣad-berg* ("the many-petalled rose") is an *inshāʾ* collection of elegant stylistic samples not without historic interest. Only a very few mss. of this have been reported to exist (cf. the article by Ménage cited above).

Bibliography (in addition to the titles cited above): The *tedhkires* of Sehī, Laṭīfī, ʿĀshiḳ Čelebi, Ḳinalî-zāde Ḥasan Čelebi, Beyānī and Riyāḍī; ʿĀlī, *Künh al-akhbār*; *Sidjill-i ʿOthmānī*, iv, 369; Ḥ. MĒWĀŔ, the name given in the Indian chronicles to the south-western region of Rādjāsthān [*q.v.*]: approximately the region now known, from its principal town, as Udaypur (although the town of Udaypur [*q.v.*] was not founded until 966/1559), hilly with considerable forest tracts, separated from its Rādjpūt neighbour Mārwāŕ on the west by the Aravallī hills, and bordered on the south by Gudjarāt, on the south-east and east by Mālwā, on the north-east by the Dihlī sultanate (see Map s.v. rādjāsthān). The region is more celebrated for its defences against Islamic forces than for any lasting status as a region under Islamic rule until Bābur's victory at Khānuʾā in 933/1527 over the combined Rādjpūt armies under the Mēwāŕ ruler, and Akbar's conquest of the fort of Čitawŕ forty years later, initiated a period of Mughal sovereignty that was to last for over 200 years.

The first ruling dynasty, the Guhilōt Rādjpūts, is said to have entered Mēwāŕ from Gudjarāt and dominated the region in the 1st/7th century, ruling from the (now derelict) town of Nāgdā some 20 km north of the present Udaypur from where Čitawŕ was conquered; a bardic account credits an early ruler with a successful defence against a powerful Arab general, probably al-Djunayd b. ʿAbd Allāh [*q.v.*], if the chronology can be relied on. A descendant is said to have joined with the Hindū rulers of Gudjarāt in resisting the expansion of the Arab caliphate of Sindh [*q.v.*] beyond Multān [*q.v.*] in the 3rd/9th century. But Mēwāŕ resistance was not only against the Muslim powers: the Čawhāns of Sambhar, the Paramāras of Mālwā, and the Čawlukyas of Gudjarāt were all powerful neighbours who more than once made forays into Mēwāŕ. The Guhilōts stood firm, gradually gaining strength, until the Ghūrid conquest in the north broke the power of the Čawhāns; Mēwāŕ overcame the pretensions of the rival Hindū dynasties, but met with less success against the new Muslim power of Dihlī, for Iltutmish marched on and destroyed Nāgdā, and Čitawŕ became the new Mēwāŕ capital.

By the early 8th/14th century Mēwāŕ was seen as the most powerful of the Rādjpūt states, and its independence as a threat to the prestige of Dihlī; its conquest was undertaken by ʿAlāʾ al-Din Khaldjī, probably partly for strategic reasons and partly in the quest of plunder, although a later age assigned a romantic reason, the outstanding beauty of Ratansen's queen Padminī/Padmāvatī. (Malik Muḥammad Djāyasī [*q.v.*], writing early in the 10th/16th century, made an outstanding love-story of this first sack of Čitawŕ, often interpreted as a Ṣūfistic allegory of the soul; though when he writes *djawhār bhain istirī, purukh bhaé sangrām/pātsāhi gadh čūrā, čitawr bhā islām* "the women performed the *djawhār*, the men became warriors (sc. to the death); the king crushed the fort, and Čitawŕ became Islām", he may not be historically accurate (*Padmāvat*, ed. V.S. Agrawal, verse 651), for Amīr Khusraw [*q.v.*], who was present with ʿAlāʾ al-Dīn, makes no mention of the *djawhār*, the mass self-immolation of the womenfolk). Čitawŕ fell in 702/1303, by what seems to have been peaceful surrender (epidemic or famine in the garrison have been suggested as the reasons), Ratansen delivering himself personally to ʿAlāʾ al-Dīn; Čitawŕ was then renamed Khiḍrābād and assigned to the young heir-apparent Khiḍr Khān, although the administration lay in the able hands of Maladeva, a Čawhān Rādjpūt in ʿAlāʾ al-Dīn's service who was connected by marriage to the Guhilōt house. Ratansen was dethroned and the succession passed to a cadet branch of the Guhilōts, the Sisodiyas, several princes of whom died in attempting to regain Čitawŕ. After Maladeva's death in 721/1321, the sequence of events is not clear, as the bardic chronicles present a garbled account, often conflating events of the 8th/14th and 10th/16th centuries in a romantic medley. The ruler who emerged was Hammīr, in whose reign Sisodiya rule was restored at Čitawŕ (probably profiting from either the dynastic change at Dihlī from Khaldjīs to Tughluḳids, or from the disaffections *ca.* 739/1338 under Muḥammad b. Tughluḳ's rule); his heroism and chivalry are much extolled, but the Rādjpūt traditions are so much at variance with one another, none of them being compatible with either the few inscriptions or the exiguous references in the Muslim historians, that the chronology of Mēwāŕ until *ca.* 823/1420 must be regarded as obscure; but certainly Hammīr's successor Kshetrasingh successfully withstood an attack by the Mālwā [*q.v.*] ruler Dilāwar Khān Ghūrī.

Early in the 9th/15th century, the discovery of silver and lead mines increased Mēwāŕ's prosperity, and many defensive works were constructed. The long reign of Rāṇā Kumbha, 836-73/1433-68, saw a state at first weakened by interference from the Rāṭhōŕs of Mārwāŕ in Mēwāŕ affairs (although chronologies are again doubtful, since the bardic accounts of Mēwāŕ do not tally with one another), and by a conflict between Kumbha and his brother Khēm (Kshēma) Karan; nevertheless, some border territories were brought under tribute and garrisoned. Some of these lands had previously acknowledged the suzerainty of Mālwā, which had grown to considerable strength under Maḥmūd Khaldjī I, and which had long annoyed Mēwāŕ by harbouring disaffected Mēwāŕ chieftains and courtiers; but Mēwāŕ had similarly given refuge to ʿUmar Khān, the pretender to Maḥmūd's throne. Conflict between Mēwāŕ and Mālwā was inevitable, and Mālwā forces (often joined by Khēm Karan with an army of Rādjpūt followers) invaded Mēwāŕ on many occasions with varying success (the assertion, however, that Maḥmūd's forces were routed in a battle at Sārangpur [*q.v.*] in 840/1437, and that he himself was taken prisoner to Čitawŕ, does not bear examination), each state erecting a column in token of victory over the other. The Čitawŕ *Kīrttistambhā* inscription, however, seems to refer more to the campaigns against Ḳuṭb al-Dīn Aḥmad Shāh of Gudjarāt; these were occasioned both by border disputes and by Mēwāŕ attacks on Nāgawr [*q.v.*], a pre-conquest site of Islamic learning, for long under the Dihlī sultanate but by now under the rule of the descendants of Shams al-Dīn Dandānī, brother of the first sultan of Gudjarāt. Mālwā and Gudjarāt acted jointly against Mēwāŕ in 861/1457, but without pronounced success; the Rāṭhōŕs of Mārwāŕ, and Khēm Karan, added to

Mēwāŕ's difficulties by campaigning against Kumbha at the same time. Further forays by the Muslim armies took place over the next few years, with some regions being overrun and laid waste, but little more, and there were no major incursions until after Kumbha's death.

Kumbha was succeeded by the parricide Udaya, who was poorly supported in the state and hence tried to curry favour with his Muslim neighbours by ceding certain border territories; then, less popular than ever, having apparently disorganised the whole state, he was deposed in favour of his younger brother Rāyamalla, 878-915/1473-1509, who was faced with the task of reorganisation while contending with civil war (a renewed attempt by Khēm Karan to come to power), further attacks by Mālwā, now under Ghiyāth al-Dīh Khaldjī, and an insurrection by certain aboriginal tribes. The Mālwā army was worsted, and Mālwā invaded in its turn, Mēwāŕ occupying the Khērwāŕā district. A quarrel between Rāyamalla's sons developed into a war of succession, resolved by the eventual accession of the capable and ambitious Rāṇā Sanga [*q.v.*], 915-35/1509-28. In his first 15 years of rule he consolidated the state; in this time the ascendancy in Mālwā of Mēdinī Rāʾī [*q.v.*] led to Mēwāŕ's involvement against sultan Muẓaffar II of Gudjarāt, who moved to support and reinstate Maḥmūd Khaldjī II. The latter attacked Mēwāŕ in 925/1519, but was badly defeated, taken prisoner to Čitawŕ, and released only after the payment of a large indemnity and the surrender of a son as hostage to the Mēwāŕ court. Next an incident at Īdar [*q.v.*] drew Mēwāŕ into war with Gudjarāt; but Sanga, strengthened by having secured the support of Mālwā by releasing the royal hostage, was apparently able to come to some conciliatory agreement with Gudjarāt. This left him free to pursue his ambitions against the sultanate of Dihlī under Ibrāhīm Lōdī [see LŌDĪS], against whom he had a series of successes and was enabled to enlarge the boundaries of his domains as far as Kalpī and Čānderī [*q.vv.*]; he or his vassals held lands extending deep into Mālwā; and apparently his authority was acknowledged even by the Rādjpūt rulers of Mārwāŕ and Ambēr. His ambitions towards the conquest of the Dihlī sultanate led him to propose to the Mughal Bābur a simultaneous attack on Ibrāhīm Lōdī. Bābur, of course, carried out his part of the undertaking by his defeat of Ibrāhīm Lōdī at Pānipat in 932/1526, but, contrary to Sanga's expectation, showed every sign of remaining in India. Sanga, by managing to secure the Gudjarāt throne for the exiled prince Bahādur, drove a wedge between Dihlī and Gudjarāt, and it was accordingly against Sanga that Bābur's efforts were now directed, culminating in the battle of Khānuʾā in 933/1527 in which Sanga with a confederated Rādjput army was completely routed. Mēwāŕ as an independently acting kingdom thus lost its power; the subsequent activities of the region are described s.v. RĀDJASTHĀN.

Bibliography: The difficulty of reconciling the various bardic accounts has been mentioned in the text; of the many *khyāt*, that of Muhanote Nainsī, in Hindī translation and ed. G.H. Ojha, Banāras 1982, is perhaps the most acceptable. J. Tod, *Annuals and antiquities of Rajasthan*, 3 vols., ed. W. Crooke, Oxford 1920, gives the Mēwāŕ traditions *in extenso* but uncritically. A failure to assess the Mēwāŕ histories *vis-à-vis* the Muslim chronicles appears also in G.H. Ojha, *Rādjpūtānā kā itihās* [in Hindī], Adjmēr 1936-7, and in H.B. Sarda's *Mahārāṇā Sanga*, Adjmēr 1918, and *Mahārāṇā Kumbha*, Adjmēr 1932. For the Muslim sources, see *Bibls.* to GUDJARĀT and MĀLWĀ; also to ĪDAR and MĒDINĪ RĀʾĪ. See also BĀBUR and RĀDJASTHĀN.

(J. BURTON-PAGE)

MĒWĀT, a generally imprecisely defined region of India to the south and south-west of Dihlī, the broken country around Alwar, Tidjārā, Bharatpur, Dīg, Rēwāŕī, Mathurā and Gurgāʾōn, "land of the Mēʾō" [*q.v.*], robbers, marauders and cattle thieves.

Punitive excursions under Iltutmish, *ca.* 620/1223, and Balban as *nāʾib* of Nāṣir al-Dīn Maḥmūd in 646/1249 and 658/1260, had only a temporary effect, and Mēwāt was not effectively pacified and controlled until Balban's first regnal year as sultan, 665/1267 (full account in Ḍiyāʾ al-Dīn Baranī, *Taʾrīkh-i Fīrūz Shāhī*, ed. Bibl. Ind., 56 ff.). In the following century, a branch of the Mēʾō were converted to Islam, and their leader Bahādur Nāhar, from his strong *Kōtlā* near Tidjārā, came to be recognised as a powerful noble in the Dihlī court; he supported Abū Bakr, a grandson of Fīrūz Shāh, in the succession struggles after that sultan's death, and was treated as a rebel by later Tughluḳid sultans, although when in 798/1395-6 Khiḍr Khān took refuge with him in Mēwāt he is described as the *muḳtaʿ*. Bahādur Nāhar later opposed Khiḍr when he became suzerain after Tīmūr's invasion, and Mēwāt under him and his successors (now usually known as Khān-zādas) again became a rebel area. The "Sayyid" ruler Mubārak Shāh made attempts to suppress revolt in Mēwāt in 829/1425 and 831/1428 under the twin grandsons of Bahādur, Djalāl Khān and ʿAbd al-Ḳādir Khān ("Djallū" and "Ḳaddū"); Ḳaddū was captured and executed for complicity with the Sharḳī forces of Djawnpur [*q.v.*], but Djallū, after again harrying the Dihlī forces, was eventually compelled to submit and render tribute the following year; a similar sequence of events followed in 836/1432, and on both occasions the Mēwātīs pursued a "scorched earth" policy (fullest account of this period in Yaḥyā b. Aḥmad Sirhindī, *Taʾrīkh-i Mubārak Shāhī*, ed. Bibl. Ind., 148-230 *passim*). Bahlūl Lōdī [*q.v.*] was similarly troubled by Aḥmad Khān Mēwātī both during his struggle to rise to power and after his accession to the Dihlī throne; Aḥmad, compelled to submit, was deprived of seven *parganas* of his *iḳtāʿ* and compelled to send his uncle Mubārak Khān to Bahlūl's court. In 872/1468 he deserted Bahlūl and allied himself with Ḥusayn Shāh Sharḳī of Djawnpur, although Mēwāt itself remained virtually independent of both sultanates. It remained peaceful for some years thereafter and ʿĀlam Khān Mēwātī served happily under Sikandar Lōdī, even in 908/1502 leading forces against Dholpur in Sikandar's campaign against Gwāliyar, although Mēwāt was not counted as part of the Dihlī sultanate; but in Ibrāhīm Lōdī's reign (923-32/1517-26), when many of his own nobles were in rebellion against him and the hand of the Mughal Bābur was about to fall upon the Dihlī sultanate, Ḥasan Khān of Mēwāt declared his independence. He joined Rāṇā Sanga of Čitawr against Bābur's advance (the *Bābur-nāma*, tr. Beveridge, 523) refers to Ḥasan Khān as an "impious mannikin" and "the sole leader of the trouble and mischief"), and was killed in the battle of Khānuʾā in 933/1527; after this Bābur reduced Mēwāt and entered Alwar; some *parganas* were assigned to Nāhar Khān, Ḥasan's son, who swore allegiance to Bābur, after which Mēwāt seems to have had no further power as a political force, and the strong forts of Alwar and Tidjārā were controlled by Mughal officers. There is no account of Mēwātī intransigence even at the time of Humāyūn's dispossession by Shēr Shāh; the latter struck coin at Alwar.

Mēwāt seems to have remained quiet under Mughal rule in the 11th/17th century. Humāyūn had contracted a matrimonial alliance with a daughter of Djalāl Khān, a cousin of Ḥasan, and another daughter was married to Bayram Khān; Djalāl is described by Abu 'l-Faḍl as a leading *zamīndār* of Hindustān (*Akbar-nāma*, ii, 48 f.). The *Āʾīn-i Akbarī* enumerates 19 *parganas* held by the Khān-zādas in Alwar and Tidjārā (Bibl. Ind. text, ii, 91-3). Early in the 18th century the Djāts [*q.v.*] had occupied the southern part of Mēwāt in their rise to power and their assault on Āgrā and Dihlī, as did the Marāthās [*q.v.*] later, and henceforth the history of the region is largely subsumed in that of Alwar and Bharatpur [*q.vv.*].

There seems to be no record of coins struck by the Khān-zādas. Of their few monuments in and around Alwar and Tidjārā, the tomb of Fatḥ Djang in Alwar is of some distinction (954/1547; inscription in the Nāgarī script, which may point to consciousness of Hindū connexions).

Bibliography (in addition to references in the article): Niẓām al-Dīn Bakhshī, *Ṭabaḳāt-i Akbarī*, ed. Bibl. Ind., i, 302-8, ii, 38; Niʿmat Allāh, *Taʾrīkh-i Khān Djahānī*, Dacca 1960, 81 ff.; G.N. Sharma, *Mewar and the Mughal emperors*, 20-7, 37; A.R. Khan, *Chieftains during the reign of Akbar*, Simla 1977, 150 f.; S.H. Hodīvālā, *Studies in Indo-Muslim history*, Bombay 1939, i, 393, takes *kotlā* above as a proper name, not entirely convincingly.

(J. Burton-Page)

MĒWĀTĪ [see Meʾō].

MEWḲŪFĀTČĪ or mewḳūfātī, title given to the director of the "Bureau of Retained Revenues" (*Mewḳūfāt ḳalemi*) in the Ottoman finance department. His main task was to manage the *mewḳūf aḳče*, money accruing from unused state expense allocations, and from vacant fiefs and other grants. The bureau under him also confiscated land not registered in land surveys, allocated depots for state purchases, kept records of contribution units (*ʿawāriḍ-khāne* [see ʿawāriḍ], registered relay stations, maintained military depots at all frontiers, allotted food rations and forage, straw and hay rations to soldiers in military campaigns, and provided money to civil servants accompanying the army. In the 12th/18th century, this bureau had four departments: (i) *Ḳalemiyye dāʾiresi*, which collected a 10% registration fee (*ḳalemiyye*) from farmed-out lands; (ii) *Nawul khalīfesi*, which kept the books of food depots and of duties paid by bakers in Istanbul; (iii) *Menzil khalīfesi*, which managed the relay service; and (iv) *Ghanem kitābeti* which was responsible for the collection of the sheep-tax (*ʿādet-i aghnām*).

The *Mewḳūfāt emīni*, a commissioner from the bureau in each *sandjaḳ* [*q.v.*], was assigned by the *mewḳūfātčī* to gather the yearly revenues accruing from vacant fiefs and other grants, and from fief holders who did not join military campaigns. The *emīn* had agents, *mewḳūfčus*, who went from village to village collecting these revenues. In 1838, after the establishment of the Ottoman finance ministry, the *Mewḳūfāt ḳalemi* was annexed to the bureau handling treasury issues, *Eshām muḥāsebesi ḳalemi* [see ashām].

MEWLĀNĀ KHŪNKĀR [see mawlānā khūnkār].

MEWLEWIYYET or Mollalıḳ, title given to certain judicial districts in the Ottoman Empire. İ.H. Uzunçarşılı located the earliest reference in the 9th/15th century, when *ḳāḍī* [*q.v.*] posts with the highest fee of 500 *aḳčes* [*q.v.*] were defined as *beshyüz aḳče mewlewiyyetleri*. These posts consisted of Istanbul, Edirne, Bursa, Filibe, Salonika and Sofia. Until the late 9th/15th and early 10th/16th centuries, these *mewlewiyyets* were not ranked. This practice was introduced in the late 10th/16th century after the *shaykh al-islām* [*q.v.*] formally became the head of the Ottoman religious hierarchy. The *ḳāḍī* of Istanbul came fourth in rank after the *shaykh al-islām* and the Anadolu and Rumeli judges of the army, *ḳāḍī ʿasker* [*q.v.*]. The other *mewlewiyyets* were unranked.

During the 10th/16th and 11th/17th centuries, as the empire expanded, many new *mewlewiyyets* were formed. With minor exceptions, their relative ranks did not change after the 12th/18th century. Uzunçarşılı lists five ranks of *mewlewiyyets* in decreasing importance: (i) *Istanbul ḳāḍīlighi*, the judicial district of Istanbul; (ii) *Ḥaremeyn mewlewiyyetleri*, judicial districts of the two Holy Cities, Mecca and Medina; (iii) *Bilād-i khamse mewlewiyyetleri*, judicial districts of the Five Cities, Edirne, Bursa, Damascus, Egypt and Filibe; (iv) *Bilād-i ʿashere mewlewiyyetleri*, judicial districts of the Ten Cities, to which an eleventh was later added: Jerusalem, Aleppo, Tirhala Yenishehri, Galata, Izmir, Salonika, Eyüb, Üsküdar, Sofia, Crete and Trebizond. (v) *Dewriyye mewlewiyyetleri*, judicial districts held in rotation by *ḳāḍīs* of Marʿash, Baghdād, Bosnia, Belgrade, Antioch, Kütahya, Beirut, Adana, Van, Rusčuk, Sivas and Čankiri.

For a *mewlewiyyet* appointment, an applicant was required to graduate from a *madrasa* [*q.v.*], and obtain a license, *idjāzet-nāme* [see idjāza]. He could then either teach through all *madrasa* grades or become a *ḳāḍī* in the smallest judicial unit, *ḳaḍāʾ* [*q.v.*], rise to the larger judicial unit of a *sandjaḳ* [*q.v.*], and then go back and teach through the highest *madrasa* grades. He would then become a candidate for *bilād-i ʿashere mewlewiyyetleri*, which were also called *makhredj mewlewiyyetleri* [see makhredj], judicial districts whe.e scholars just "going out" from teaching at *madrasas* were appointed. Appointments were usually for a year. *Mewlewiyyet* appointments were proposed to the Sultan by the Grand Vizier, *ṣadr-i aʿẓam* [*q.v.*]. Before the 10th/16th century, the *ḳāḍī ʿasker* supplied names of candidates to the Grand Vizier; after then, the *shaykh al-islām* provided the list of names.

After the 10th/16th century, the term of the appointment was extended when the number of candidates began to exceed that of available posts in the empire. The title was therefore separated from the post itself. A candidate held the title of *mewlewiyyet pāyesi* for a year before he was appointed to the post itself, *mewlewiyyet manṣibi*. Some who were assigned these posts preferred to reside in the capital, and sent deputies, *nāʾib*, to represent them. During later centuries, titles given without appointments, assignments to sons and to household members of influential families who had not been through the educational system, together with the sale of licenses, brought about a deterioration in *mewlewiyyet* appointments.

(F. Müge Göçek)

MEZÖKERESZTES, the Battle of Mezőkeresztes (Turkish: *Hāčova* or *Ṭābūr muḥārebesi*), the most important encounter between the Habsburg-Hungarian and Ottoman troops during the "long" or 15-years' war.

This took place near a village, south-east of Eger [*q.v.*] in Hungary on 5 Rābīʿ I 1005/26 October 1596. Its immediate antecedent was the capture of Eger by the forces of Meḥemmed III, the first sultan who personally took the field in war after Süleymān I's death. The Imperial troops, which had originally been sent to relieve this important city under attack, now wished to attempt the reconquest of the castle. After some hesitation, a pitched battle was decided on. The Habsburg soldiers were headed by the Archduke Maximilian, but the prince of Transylvania, Zsigmond Báthori, also took part with a considerable army. The number of the confronting soldiers has been exaggerated on both sides. The most realistic figures seem to be 50,000 for the Christian and 100,000 for the Muslim army (possibly varying to a maximum of equal forces on both parts). Technical superiority was on the European side, due to more numerous infantry and more powerful artillery. After some preliminary clashes on 22 and 25 October, the decisive battle was fought on the afternoon of 26 October. As previously, the Christian forces seemed to get the upper hand, but they committed a serious fault by following the fleeing Ottomans and, in the hope of booty, penetrated into their camp. The Turks were thereby able to change the tide of events and in the end secure a victory.

While Meḥemmed III failed further to exploit his favourable position, the Habsburgs were forced to realise that no quick result could be hoped for against the Ottomans. Consequently, warfare continued for several more years. Further events effected the Ottomans adversely. Since many *tīmār* holders did not comply with their duty to arrive at this battle, and some others deserted, the treasury had a good pretext for confiscating *tīmārs* and granting them anew. According to a list of deserters, some 120 *ziʿāmets* and 550 *tīmārs* passed into the hands of other owners in Rumelia and Hungary (Istanbul, Başbakanlık arşivi, Kâmil Kepeci Tasnifi, 347). Replaced timariots could well be ready to join the Djelālī rebels [see DJALĀLĪ in Suppl.] thus creating new and lasting difficulties for the state.

Bibliography: The first detailed article on the battle was written by András Komáromy, *A mezőkeresztesi csata 1596-ban* ("The battle of Mezőkeresztes in 1596"), in *Hadtörténelmi Közlemények*, v (1892), 28-67, 157-80, 278-98. More critical is the study by Sándor László Tóth, *A mezőkeresztesi csata története* (*1596. október 26.*) ("The history of the Battle of Mezőkeresztes"), in *Hadtörténelmi Közlemények*, xxx (1983), 553-73. An evaluation of the Ottoman sources was attempted by J. Schmidt, *The Egri-campaign of 1596: military history and the problem of sources*, in *Habsburgisch-osmanische Beziehungen. Beihefte zur WZKM 13*, Vienna 1985, 125-44.

(G. Dávid)

MEZZOMORTO [see ḤUSAYN PASHA].

MI'ĀN BHU'Ā, Masnad-i ʿAlī, the *wazīr* and *ṣadr* of the Dihlī sultanate during the reign of sultan Sikandar Shāh Lōdī (894-923/1489-1517).

He was the eldest son of *Masnad-i ʿAlī* Khawwāṣ Khān, who belonged to an old aristocratic family of north India. Khawwāṣ Khān seems to have been elevated to the posts of *wazīr* and *ṣadr* by Sultan Sikandar at the beginning of his reign. Upon his death, sometime towards the close of the 9th/15th century, Mi'ān Bhu'ā, who was also adept in learning and statesmanship, was allowed by the sultan to take up the combined charge of the *wizārat* and *ṣadārat* with the specific order that he would retain and take care of the old staff maintained by his late father.

Mi'ān Bhu'ā not only came up to the sultan's expectations but also soon began to enjoy great prestige for his administrative talent, strong sense of justice, and patronage of learning and men of piety. As *wazīr* or revenue minister, he ably implemented Sikandar's agrarian policy, which led to the rapid progress of agriculture in the Lōdī lands; peasants were provided with incentives to bring virgin land under the plough (in the words of the contemporary writer, Shaykh Rizḳ Allāh Mushtāḳī, even an inch of land was not left lying fallow) and were protected against exploitation by the state officials, who were forbidden to stay with them and enjoy their hospitability. Forced labour (*bēgār*) was also abolished. As a result, conditions improved in the countryside, and grain and other necessities became cheap.

Since the 9th/15th century, the *ṣadr* (minister for religious affairs) also held the charge of the office of *ḳāḍī 'l-ḳuḍāt* (Chief Justice). Contemporary evidence tends to show that there were two appellate courts in the metropolitan city of Āgra: the first was presided over by the *wazīr*, while the second, being the supreme court, functioned under the personal supervision of the sultan. Generally, the appellant moved to the Supreme Court, if he was not satisified with the judgment given by Mi'ān Bhu'ā. The anecdotes contained in the *Wāḳiʿāt-i Mushtāḳī* and *Ṭabaḳāt-i Akbarī* cast light on the interest that the *wazīr* and the sultan took in dispensing justice, irrespective of creed, or birth and status of people.

Mi'ān Bhu'ā encouraged, in his capacity of *ṣadr*, the scholars and intellectuals who came from abroad to settle in Āgra and Dihlī on a permanent basis and made land-grants to them for their maintenance. Himself interested in learning, he also gathered a fairly large sprinkling of these scholars in his own service and thus emulated his master Sultan Sikandar Shāh. They undertook at his instance the compilation of works on various themes, literary as well as scientific. The Arabic and Sanskrit classics were collected and transcribed by expert calligraphists and then translated into Persian by capable scholars with the help of Brahmans. Of these translations, the *Maʿdan al-shifā'-i-Sikandar Shāhī*, based on Sanskrit classics such as *Sasrāt*, *Jā Deo karat*, *Rās Ratnāko*, *Suangdhar*, *Čintāma*, etc., is considered an important work on medicine, compiled by Mi'ān Bhu'ā himself. The terms and names of the herbs and plants were translated into Persian and, if the equivalent of any term was not found in the Persian language, it was simply transliterated with the necessary explanation. Indirectly emphasising the importance of his work, the Mi'ān says in the preface that the medical science imported from the Muslim countries did not suit the constitution of the Indians, due to climatic dif-

ferences, and he had undertaken the compilation of the work with royal permission, for the Indian system of medicine had been found more effective.

Unfortunately, other books, with the exception of the *Lahdjāt-i Sikandar Shāhī*, compiled by ʿUmar b. Yaḥyā al-Kābulī, a Persian translation of Sanskrit classics and one dealing with Indian music, produced by different scholars employed by Miʾān Bhuʾā, have not survived.

Miʾān Bhuʾā, as a pious Muslim, constructed mosques and made endowments for the benefit of public; the beautiful mosque in Dihlī, popularly known as *mōth kī masdjid*, was constructed at his cost and is known for its attractive features. The shape and proportion of the five main arches of the façade and the domes, the design and grandeur of the doorway and projecting balconies at the sides show that a talented group of craftsmen was employed for its completion. The evidence of the *Maktūbāt-i ḳuddūsī* reveals that its ample facilities included arrangements for students, travellers, teachers and Ṣūfī saints, all of whom got food from the kitchen maintained with the money endowed by Miʾān Bhuʾā.

The followers of Miʾān Bhuʾā also enjoyed prestige in the city. The newly-recruited soldier, no matter whether he was a *suwār* or a foot-soldier, could approach any *ṣarrāf* or money changer and borrow money from him for one or two years, after showing him the *parwāna* or letter of appointment. According to the custom, he was assigned agricultural land in lieu of a cash salary. Miʾān Bhuʾā is said to have had villages and *parganās* of his maintenance *iḳṭāʿ* scattered in different *sarkārs* around Dihlī and Āgra, so that it was possible for him to assign to his retainer maintenance-land in the village of the latter's choice.

Miʾān Bhuʾā retained his position after the death of Sultan Sikandar Lōdī, but subsequently failed to enjoy the confidence of the new Sultan Ibrāhīm Lōdī (923-32/1517-26), who ordered him to be put under arrest and handed over to Malik Ādam Kākar, one of the confidants of the late Sultan and friend of Miʾān Bhuʾā; this was a mild punishment for the aged *wazīr*, for many of his companions were subjected to torture on account of the royal displeaure. Of the mediaeval writers, Shaykh Kabīr Bāṭinī says that the *wazīr* was punished because he did not comply with the royal *farmān* about the grant of money to the royal favourite, the Rāʾī of Gwālior. It may be that, owing to old age, he had become negligent of his duties and the Sultan had become doubtful of his loyalty. This seems to be near the truth, because Mushtāḳī's reference to Miʾān Bhuʾā's imprisonment implies that it occurred before the annexation of Gwālior to the Lōdī empire. On his dismissal, the *ṣadārat* was separated from the *wizārat*; Miʾān Bhuʾā's eldest son, Dilāwar Khān, was assigned the *wizārat*, while Shaykh Farīd Bukhārī, an *ʿālim* and the sultan's teacher, took over as *ṣadr*.

(I.H. Siddiqui)

MIDĀD, the common Arabic word, together with its synonym *ḥibr*, for ink. Derived from the root *m-d-d*, it originally meant "anything that is added to a thing, because of its utility", and therefore one of its more specific meanings is "that with which one writes" (Lane, *Lexicon*, *s.v.*), or "that with which the writer is provided" (*LA*, *s.v.*). There is a single Ḳurʾānic mention of *midād*: "If the sea were ink for the Words of my Lord, the sea would be spent before the Words of my Lord are spent" (XVIII, 109). Tradition has is that on the Day of Judgment, the ink of scholars will be measured with the blood of martyrs, and that both scales of the balance will then be in equilibrium (al-Ḳalḳashandī, *Ṣubḥ*, ii, 461).

In Middle Eastern manuscripts, two types of black ink were generally used, both of which date from pre-Islamic times. One was prepared on the basis of carbon and oil, and the other one from gall-nuts and ferrous components, the former originally being designated as *midād*, the latter as *ḥibr*. Later, the two words were used as synonyms (Grohmann, *Arabische Paläographie*, i, 127). A considerable number of recipes for ink have survived from mediaeval times, many devised by scribes for their personal use and improved for their purpose by trial and error. Numerous recipes have been transmitted by al-Muʿizz b. Bādīs (d. 453/1061 [*q.v.*]) in his *ʿUmdat al-kuttāb*, especially in chs. 2-10. Grohmann (i, 127-131) mentions some from other sources as well. For coloured inks and inks used in secret writings, a whole range of natural ingredients was used, but it is often difficult exactly to identify these ingredients from the literary sources.

As Middle Eastern manuscripts continued to be made till well into the 19th century, it may be assumed that in more recent times imported ink. like imported paper, was used as well. The rise of polychrome manuscripts in the Maghrib in the second half of the 19th century may be explained from such imports. A systematical chemical analysis of the inks used in Middle Eastern manuscripts, both in mediaeval and recent times, has not been undertaken so far. An account of the survival of mediaeval practices in bookmaking, including the handling of ink, in recent times, albeit in a Christian environment , has been given by H.S. Sergew (see Bibl.).

(J.J. Witkam)

MIʾDHANA [see manāra].

MIDḤAT PASHA (1822-84), Ottoman provincial governor, twice grand vizier, and father of the 1876 constitution.

Midḥat was born in Istanbul in Ṣafar 1238/October-November 1822, the son of Rusčuklu Ḥādjdjī ʿAlī Efendi-zāde Ḥādjdjī Ḥāfiẓ Meḥmed

Es͟hrefEfendi. He was named Aḥmed S͟hefīḳ. Having memorised the Ḳur'ān at 10, he was then called Ḥāfiz S͟hefīḳ. In 1833 he moved with his family to Vidin, where his father was an assistant judge. When his family returned to Istanbul the next year, he became an apprentice in the secretariat of the imperial *dīwān*. His talent earned him the name Midḥat, which thereafter replaced his given names. In 1835-6 Midḥat was in Lofča, where his father held another judicial post, before returning to Istanbul in 1836-7. Midḥat had already begun to study Arabic; he now began Persian and attended courses at the Fātiḥ mosque while again working in the secretariat. In 1840 he was transferred to the grand vizier's office.

The bureaucratic career on which Midḥat was now launched falls into four phases: 1840-61, increasingly responsible posts as staff member of commissions and councils and as special investigator; 1861-72, three provincial governorships; 1872-7, two grand-vizierates and constitution-making; 1877-84, exile, two governorships, trial, exile and death. The second and third phases show Midḥat at his most influential.

In 1842-4 Midḥat held a secretarial post in Damascus. Thereafter he was secretary to one of the "commissions of improvement" sent out to the provinces in 1845-7, first in Ḳonya, then Ḳasṭamonu, under Sāmī Bakir Pas͟ha. During this period, he came on the payroll of the protocol office (*maḍbaṭa odasi*) of the *medjlis-i wālā-yi aḥkām-i ʿadliyye*, the influential Supreme Council of Judicial Ordinances, and remained in its employ to 1859, even while undertaking special assignments. In 1848 he married. He became chief clerk in the protocol office in 1851. For six months, probably in 1852, Midḥat was in Damascus as commisioner to investigate a dispute between two *ṣarrāfs* over the farm of customs revenues, and to look into alleged misconduct by Ḳibrisli Meḥmed Pas͟ha, commander of the army of Arabia. Midḥat settled the revenue question advantageously to the Treasury. He found misdeeds by Ḳibrisli Meḥmed in relation to the Druze that led to the commander's removal from his post. When the Supreme Council's paperwork was split in two, Midḥat became second secretary of the Anatolian section.

During the Crimean War, in 1854-5, Midḥat was sent as investigator to the Rumeli *eyālet*. Ḳibrisli Meḥmed, now grand vizier, may have sent him thither to get his revenge by putting Midḥat in a difficult situation. But Midḥat, working out of Edirne, successfully curbed depredations by *bās͟hi-bozūḳs* and brigands. On return to Istanbul, Midḥat gave the new grand vizier Res͟hīd Pas͟ha [*q.v.*] a memorandum containing his ideas on provincial reform. Again in 1855 Midḥat was sent out, this time to Bursa on earthquake relief. In 1856-7, after successfully defending himself against a false charge of illegal participation in the farm of Istanbul fishmarkets, Midḥat was despatched to investigate administration by the *wālīs* of Silistre and Vidin. His vigorous actions in those *eyālets* led to dismissals of officials, whose friends in the palace got a new investigator appointed. Midḥat, in protest, asked for leave, which was granted by the grand vizier ʿĀlī Pas͟ha [*q.v.*]. He then spent six months of 1858 in Paris, London, Brussels and Vienna, improving the French he had recently begun to study, and finally gaining some first-hand knowledge of western Europe. In September 1859 Midḥat became chief secretary of the Supreme Council itself. While in this post he served on the commission to investigate the Ḳūleli affair, an abortive conspiracy in Istanbul against *Tanẓīmāt* [*q.v.*] westernisation.

Midḥat entered on the second phase of his career when he was promoted to vizier and appointed *wālī* of the *eyālet* of Nis͟h on 29 January 1861. During his three years in Nis͟h, Midḥat displayed the energy, the brusqueness, the secular-mindedness, the egalitarian attitude, the Ottoman patriotism and the honesty that characterised his activity in all posts thereafter. His programme of action was also characteristic. He sought the cooperation of local notables of all creeds. He created a gendarmerie, curbed banditry, and tried also to curb nascent nationalism among the Bulgars. He deferred collection of some onerous taxes. He built roads and bridges, in part by requiring several days of unpaid labour from peasants in the locality. He built barracks, in part with convict labour. He started schools. Because of his success, the Porte joined the Prizren *eyālet* to Nis͟h for Midḥat to administer.

The success also led the grand vizier Fu'ād Pas͟ha [*q.v.*] to bring Midḥat back to Istanbul in 1864 to draft, with him, a new plan for provincial organisation. The *wilāyet* system, modelled somewhat on French practice, was embodied in a law promulgated on 8 November 1864. It was to be tested in one sizable *wilāyet*, named Tuna (Danube), newly formed of the old *eyālets* of Silistre, Vidin and Nis͟h. Midḥat was appointed its governor on 13 October 1864, even before the new system was official.

Midḥat organised the seven *sandjaḳs* and 48 *ḳaḍā*'s of the Tuna *wilāyet*, including the local *medjliss*, each containing some non-Muslims, at each administrative level [see BULGARIA]. He embarked on a public works programme, which in his three years produced 3,000 km. of roads and 1,400 bridges by his count; various public buildings, including schools, model farms with imported European machinery, industrial arts training schools for the poor and service on the Danube, and harbour works at the port of Rusčuk, the seat of *wilāyet* government. Tatar and Circassian refugees from Russia were successfully settled in the *wilāyet*, though not without some problems. A modest economic development was aided by such measures, as well as by the increased security which Midḥat established through a gendarmerie and occasional use of regular troops. Midḥat started a few small factories. He wore homespun clothes to boost local products. The measure with the longest lasting consequences was his creation of agricultural credit cooperatives, *menāfiʿ ṣandiḳlari*, to lend to peasants at low interest rates. Modern Turkey's Ziraat Bankası is a descendant. Midḥat also created the first official provincial newspaper in the Empire, the *Tuna*, published in Turkish and Bulgarian and beginning on 10 S͟hawwāl 1281/8 March 1865; Aḥmed Midḥat [*q.v.*] soon became its editor. Midḥat hoped to win the Bulgarians to Ottomanism through just administration and mixed schools, but the developing Bulgarian nationalism was barely blunted. Midḥat dealt severely with rebels; in 1866 he repressed a premature Russian-financed Bulgarian revolutionary rising. On the whole, the *wilāyet* system had proved workable. In 1867 it was extended to most of the Empire, Midḥat again being brought to Istanbul to consult on revising the regulations.

When in 1868 the Supreme Council was replaced by a Council of State (*S͟hūrā-yi Dewlet*) and a Judicial Council, Midḥat was appointed, on 5 March, to head the former. Its function was to discuss and draft laws. Under Midḥat it elaborated regulations on adoption of the metric system, on nationality, on mining and on a real estate credit bank for small employers. Friction arose between Midḥat and the grand vizier ʿĀlī Pas͟ha on both legislative and personal levels. The

result was Midḥat's transfer on 27 February 1869 out of his first high national office to the *wilāyet* governorship of Baghdād. He had already in the autumn of 1868 been sent back to Bulgaria by the sultan on an interim 20-day mission to subdue another rebellion.

In ʿIrāḳ, Midḥat's activity, although similar in many ways to that in Bulgaria, was circumscribed by the local tribalism. Midḥat, however, was not only *wālī* but also, extraordinarily, commander of the Sixth Army. He used military force when needed to subdue tribes, to collect taxes and to impose conscription. Success was partial. Midḥat tried to induce tribes to settle. At least one *shaykh* exchanged that title for the new one, under the *wilāyet* plan, of *mutaṣarrif* of a *sandjak*. Settling tribes was also part of Midḥat's process for bringing land under state control. He applied the Ottoman land code of 1858, furnishing *tapu* deeds that gave freehold right to the cultivator; most such deeds, however, came into the possession of tribal *shaykhs*, city merchants or former tax-farmers rather than of ordinary tribesmen or peasants. The marshlands of southern ʿIrāḳ, and date-palm culture, became more prosperous with pacification and settlement. Ottoman control was even extended over Kuwayt and, precariously, into al-Ḥasā and part of Nadjd.

Midḥat organised the councils of the *wilāyet* system, and a municipal council for Baghdād also. He appointed a good many ʿIrāḳīs to government offices. He tore down some of the old Baghdād wall to allow city expansion, introduced some paving and street lights, procured fire engines, started a water supply system, and built the only bridge the city possessed before the 20th century. He started wool and cotton mills and an army clothing factory. He established schools, including a military school and a craft training school for orphans, a savings bank, a hospital, and a tramway utilising horse cars to the Kāẓimayn suburb. He promoted regular steamer service on the Euphrates and shipping in the Gulf. The first newspaper in ʿIrāḳ, the official *Zawrāʾ*, in Turkish and Arabic, appeared on 16 June 1869 and semi-weekly thereafter. Midḥat also eased relations with Iran concerning border tribes and currency circulation.

After ʿĀlī Pasha's death, Midḥat clashed with the new grand vizier, Maḥmūd Nedīm Pasha [*q.v.*], especially over the use of *wilāyet* revenues. Midḥat resigned, starting back to Istanbul in May 1872. Maḥmūd Nedīm failed to get Midḥat rusticated to Sivas, but on 26 July got him appointed *wālī* of Edirne in order to keep him out of the capital. Midḥat however obtained an audience of Sultan ʿAbd al-ʿAzīz [*q.v.*] and, supported by other statesmen, persuaded the ruler to oust Maḥmūd Nedīm. Midḥat was appointed grand vizier on 31 July 1872.

Now at the pinnacle of the bureaucracy, Midḥat entered on the third phase of his career. But this grand vizierate lasted only 80 days. From the start, Midḥat was opposed by the Russian ambassador Ignatyev and by the Khedive Ismāʿīl of Egypt, who wanted the privilege of contracting independent foreign loans. Midḥat would not grant it, but ʿAbd al-ʿAzīz did so when bribed. Moreover, Midḥat was impolitic. He implicated the palace and sultan in financial scandals. He once rode on horseback into the third court of the palace, unheard of for any but the sultan. His vigorous action on salary reform, railroad construction, education extension and metric system enforcement remained only beginnings. With his foreign minister Khalīl Sherīf Pasha, Midḥat gave thought both to a plan for a constitution and to a plan for federal imperial organisation respecting some of the Balkan lands; but his enemies soon procured his dismissal on 18 October 1872.

For nearly four years, Midḥat was in office only for brief periods: as minister of justice, 12 March to 21 September 1873; as *wālī* of Salonika, 15 October 1873 to 16 February 1874; and as minister of justice again, 21 August to 28 November 1875. He was dismissed from the first two posts; in 1873 this occurred because of revelations that he and the grand vizier of the time, Shīrwānī-zāde Meḥmed Rüshdü, were discussing the need for a constitution and a parliament to curb excessive spending, the sultan's included. But in 1875 Midḥat himself resigned as justice minister, with a memorandum to Sultan ʿAbd al-ʿAzīz condemning the administrative confusion under Maḥmūd Nedīm, who was again grand vizier, the financial chaos and default on Ottoman bond interest, and the ineffectual military response to the growing revolt in Bosnia and Herzegovina. During the winter of 1875-6, Midḥat was in touch with groups and individuals in Istanbul who desired change, including members of the *ʿulamāʾ*. On 9 March 1876, a "Manifesto of the Muslim Patriots", probably by Midḥat or his adviser Odian Efendi, went out to European statesmen and was circulated privately in Istanbul; it called for a representative, consultative assembly.

As public discontent mounted in 1876, Midḥat became one of the principal movers of political change. He may have helped to spark demonstrations in Istanbul by *softa*s or religious students on 10 and 11 May which resulted in the dismissal of Maḥmūd Nedīm and appointment of Müterdjim Meḥmed Rüshdü Pasha as grand vizier. On 19 May, Midḥat was made minister without portfolio. Along with the minister of war Hüseyn ʿAwnī Pasha [*q.v.*] and the military academy director Süleymān Pasha, Midḥat plotted the deposition of the erratic and spendthrift ʿAbd al-ʿAzīz. It was effected, bloodlessly, on 30 May, and Murād V received the oath of homage. Immediately, Midḥat, who on 5 June again became president of the Council of State, began pressing for the elaboration of a constitution. Ḥüseyn ʿAwnī and others opposed him. Serious impediments arose also from unsettling events: the suicide of the ex-sultan ʿAbd al-ʿAzīz on 4 June, the murder by a Circassian officer of Hüseyn ʿAwnī and the foreign minister Rāshid at a meeting at Midḥat's house on 15 June, the expanding war against Serbia and Montenegro, and, above all, the nervous breakdown of Murād V, who was never girded. Despite discussions of a constitutional draft by ministers and a *medjlis-i ʿumūmī*, progress was minimal. The ministers finally decided that Murād V would have to be replaced by his younger brother, ʿAbd al-Ḥamīd. On about August 27 Midḥat got from ʿAbd al-Ḥamīd a promise that, if enthroned, he would promulgate the constitution without delay. On 31 August Murād was deposed, and was succeeded by ʿAbd al-Ḥamīd II [*q.v.*].

The new sultan was, however, slow to redeem his promise. On 8 October he approved a constitutional commission of leading Muslim and Christian officials, with Midḥat as chairman. The commission considered many models and drafts, including one by Midḥat himself. The draft submitted to ʿAbd al-Ḥamīd in late November incorporated Midḥat's proposal for a prime minister instead of a grand vizier. The sultan was unenthusiastic, and his objections were supported by other ministers and officials, including Aḥmed Djewdet [*q.v.*]. Finally, on 6 December the council of ministers approved a revised draft by the commission, which enlarged the sultan's powers and restored the office of grand vizier. ʿAbd

al-Ḥamīd accepted the constitution when a clause empowering the sultan to exile dangerous individuals was added. Meḥmed Rüs̲h̲dü then resigned, the sultan appointed Midḥat grand vizier on 19 December, and the constitution was ceremoniously promulgated on 23 December 1876.

Midḥat hoped that the act of promulgation might induce the great-power conference on plans for restructuring Ottoman administration in the Balkans, then meeting in Istanbul, to agree that the new constitutional régime should do it instead. He wanted the powers not only to accept but also to guarantee the constitution, and sent Odian secretly to London to ask support. But the powers treated the constitution as if it were a sham. The conference went ahead to propose drastic changes. Because the election process for the chamber of deputies was not nearly completed, Midḥat convened on 18 January 1877 an unusually large *med̲j̲lis-i ʿumūmī*, which with patriotic emotion rejected the Constantinople Conference scheme. Midḥat has been blamed for pursuing a hard line with the powers that eventuated in a Russian invasion in late April 1877. But Midḥat sought further negotiation, not war; had he remained in office, he might have avoided war, but he was grand vizier for only 49 days. From the start he and ʿAbd al-Ḥamīd were on a collision course. The sultan rejected proposals by Midḥat; Midḥat failed to carry out orders of the sultan, one of which was to send his constitutionalist friends Nāmiḳ Kemāl [*q.v.*] and Ḍiyā out of the capital. Those two and others started recruiting a volunteer guard unit that worried the sultan. But basically, ʿAbd al-Ḥamīd feared Midḥat as one who had deposed two sultans and who might try it again. Further, Midḥat conducted himself as if he were a prime minister answerable more to the nation than to the monarch. The sultan also was answerable to the nation, Midḥat believed, and this view was incorporated in the famous letter of 30 January 1877 which Midḥat is said to have written to the sultan, although its authenticity is debated. The sultan may even have believed charges that Midḥat leaned to republicanism. Hence on 5 February, Midḥat was abruptly dismissed and sent in exile to Brindisi on the imperial yacht.

Midḥat visited Naples, Rome, Marseilles, Andalusia, Paris, Plombières, London, Vienna and Scotland. He wrote memoranda to European statesmen, especially British ones, supporting the Ottoman cause in the Russian war of 1877-8. He collected funds for the relief of Muslim refugees from the Balkans. He courted European opinion with a pamphlet defending Ottoman reforms and attacking Russian subversion. Because Midḥat was so popular in Europe, and because of British pressure, ʿAbd al-Hamīd allowed his return to forced residence. Midḥat arrived in Crete on 26 September 1878, going to live with his family in Halepa, outside Ḥanya (Canea). Probably owing to representations by the British ambassador Layard, Midḥat was soon named *wālī* of Syria. He was transported directly there, without being allowed a visit to Istanbul, and arrived on 28 November.

In his nearly two years as governor of the Syrian *wilāyet* [see DIMAS̲H̲Ḳ], Midḥat acted much as in Tuna and Bag̲h̲dād. He started schools, including a vocational school, built roads, built a tramway from Tripoli to its port, created a stronger gendarmerie and appointed some Christians to it, appointed some Syrians to the bureaucracy, founded a theatre and a public library, etc. He was less successful in settling tribes and quieting rebellions. With the Druze, he achieved a standoff; he made the D̲j̲abal Durūz into a new *ḳaḍāʾ* with its own Druze *ḳāʾimaḳām*. Midḥat felt that he needed authority over the military and the courts, as well as over the bureaucracy and finance, to be effective. But his requests for broader powers and approval of extensive reforms were refused by the sultan. Twice Midḥat resigned, on 23 October 1879 and 30 May 1880, but the sultan refused consent. ʿAbd al-Ḥamīd was, however, receiving *z̲h̲urnal*s from informers stating that Midḥat sought to be ruler or khedive in an autonomous Syria and was currying local favour to that end. Midḥat in fact opposed any Arab or Syrian separatism, but he may have countenanced some anti-Ottoman agitation to persuade ʿAbd al-Ḥamīd that he needed broader powers. The sultan evidently decided that Midḥat might be a danger in Damascus, and so ordered his transfer to Izmir on 4 August 1880. Midḥat left Syria on 31 August, and again was not allowed a visit to Istanbul.

Midḥat's governorship of Izmir lasted less than a year. It was unremarkable, except for warnings which he received from friends in Istanbul that he might be charged with complicity in the alleged murder of the ex-sultan ʿAbd al-ʿAzīz. Midḥat declined, however, to flee to Europe. At about 2 a.m. on 17 May 1881, troops entered his house to arrest him. Midḥat escaped through a garden gate to the French consulate. The next day, the Paris government refused asylum, and Midḥat agreed to arrest provided that his trial were public, and such an assurance was given. Midḥat was taken by ship to Istanbul and interrogated on board by D̲j̲ewdet Pas̲h̲a, the justice minister, who willingly undertook this mission to apprehend his opponent. Midḥat was confined in the Malta Kiosk in the Yïldïz Palace grounds.

The Yïldïz trial, though semi-public, was a travesty of justice. The case against Midḥat and nine others was built on weak testimony, presumably obtained through torture, bribery and sycophancy. The trial of the ten began on 27 June 1881. On 28 June, all of them, including Midḥat were found guilty. On 29 June, Midḥat and seven others were sentenced to death. An appeals court, obviously under Palace instructions, confirmed the sentences. But widespread Ottoman and European opinion urged leniency, as did a minority of a special *med̲j̲lis* convened for review. ʿAbd al-Ḥamīd thereupon converted Midḥat's sentence to life banishment. On 28 July 1881 Midḥat and others were hustled aboard the yacht "ʿIzz ad-Dīn" without even a change of clothing, transported to D̲j̲idda, and thence to imprisonment in a fort in al-Ṭāʾif. There, Midḥat suffered increasingly harsh treatment, and in the early hours of 8 May 1884, he was strangled by soldiers, evidently acting on ʿAbd al-Ḥamīd's orders. His death was reported as due to a carbuncle and other abscesses. He left two widows, three daughters and a son, ʿAlī Ḥaydar. In 1951 his bones were repatriated to Turkey.

Midḥat Pas̲h̲a had proved to be one of the ablest Ottoman administrators of the 19th century. His energy and creativity were most effective in provincial governorships where he had wide authority, although some of his measures were obviously hasty and some were superficial. His forthrightness and arrogance hampered him as grand vizier, especially in dealings with the palace. For his day, he was a liberal; he shared many views with the Yeñi ʿOt̲h̲mānlïlar or Young Turks, especially on the desirability of a parliament. Without Midḥat, the constitution of 1876 would not have come into existence. Although ambitious for himself, Midḥat fundamentally acted on

his belief that the task of a government official was to serve the people and the fatherland.

Bibliography: The principal sources are biographies of his father by ʿAlī Ḥaydar Midḥat, each differing from the others: *Ḥayāt-ī siyāsiyyesi*, Istanbul 1325, i, *Tabṣira-yi ʿibret*, ii, *Mirʾāt-ī ḥayret* (partly based on memoirs and documents by Midḥat Pasha himself); *The life of Midhat Pasha*, London 1903; *Midḥat Pasha'nin ḥayātī siyāsiyyesi*, Cairo 1322; *Midhat-pacha*, Paris 1908 (each includes documents by Midḥat Pasha). Ali Haydar Midhat, *Hâtıralarım, 1872-1946*, Istanbul 1946, is almost half on his father. Other biographies: L.A. Léouzon-le-Duc, *Midhat-Pacha*, Paris 1877 (eulogistic); A. Clician Vasif, *Son Altesse Midhat-Pacha*, Paris 1909 (by his Croat secretary, laudatory); İbnülemin Mahmud Kemal İnal, *Osmanlı devrinde son sadrıazamlar*, Istanbul 1940-53 (4th printing 1969), 322-414 (with anecdotes, documents, quotations). Mehmed Zeki Pakalın, *Midhat Paşa*, Istanbul 1940 (extensive quotations from older works); M. Tayyib Gökbilgin, art. *Midhat Paşa*, in *İA*, viii, 270-82 (fascicle published in 1958); Bekir Sıtkı Baykal, *Midhat Paşa*, Istanbul 1964 (a short life, illustrations); I.E. Fadeeva, *Midhat-Pasha, žizn i deyatel'nost'*, Moscow 1977 (concise but most complete biography, of a "bourgeois" Midḥat, best part on Bulgaria). By Midḥat Pasha himself: *The past, present, and future of Turkey*, in *The Nineteenth Century*, iii/18 (June 1878), 981-93 (same as *La Turquie, son passé, son avenir*, Paris 1901; also twice published in Turkish); *Feryād ve figānlar*, Istanbul 1326 (not seen; extensively used by Fadeeva).

Based on archives, especially useful, are works by İ.H. Uzunçarşılı: *Midhat ve Rüştü Paşaların tevkiflerine dair vesikalar*, Ankara 1946: *Midhat Paşa ve Yıldız mahkemesi*, Ankara 1967; *Midhat Paşa ve Taif mahkûmları*, Ankara 1950. Further bibliography, including references to the standard older Turkish histories of the period, is conveniently found in the works cited above by Baykal, Davison, Fadeeva and Gökbilgin, and in the *EI*[1] art. s.v. (Fr. Babinger).

(R.H. Davison)

MIDILLI (Turkish form of Μυτιλήνη, Mytilene, the Greek name of its capital), the island of Lesbos in the eastern Aegean alongside the Turkish coast near the entrance to the Gulf of Edremit [*q.v.*] and the town of Ayvalık (Aywalîḳ [*q.v.*]); the straits of Müsellim and Mytilene that separate it from Turkey on the north and east average 10 and 16 km in width.

With an area of 1614 km², Lesbos is the third largest Greek island after Crete and Euboea, and the seventh largest of the Mediterranean. It has a roughly triangular shape, its broad base, *ca.* 70 km long, running from east-south-east to west-north-west, while the line from its apex in the north to the middle of this base measures 47 km. The relatively straight lines of its coast are interrupted by two gulfs on the south and south-east, that of Kallonis (also known by its classical name of Pyrrha), 21 km long, and that of Yeras, 14 km long. The island is well-watered by numerous streams flowing from three groups of mountains, of which Mt. Lepetimnos in the north and Mt. Olympos in the south-east both reach the elevation of 968 m (chart. N.O. 54380, U.S. Naval Oceanographic Office); on days of good visibility, not only Chios to the south, but even Samothrace and Mt. Athos to the north-west can be seen from the former. The geological composition of Lesbos consists partly of volcanic elements, and the island is earthquake-prone; it contains many springs, some hot with beneficial mineral content; several of the latter have been valued since antiquity. The dense oak and pine forests that once grew on Lesbos had dwindled to scattered remnants already in Hellenistic times.

Classical Lesbos was famous for its ideal climate and fertile soil; these assets, combined with an advantageous position near strategic commercial and maritime routes and an enterprising population, led to a remarkable prosperity and to political and cultural achievements (for the island's long and rich classical history, see *Pauly-Wissowa*, xii, 1925, 2107-33, s.v.; *Der Kleine Pauly-Wissowa*, iii, 1969, 585-87, s.v.; A. Philippson, *Die Griechischen Landschaften*, iv, 1959, 233-44; I.D. Kontes, *Lésvos kai he Mikrasiatiké tès perioché*, Athens 1978).

The principal city and port of Lesbos, Mytilene (a name of probably pre-Greek origin), first developed on an islet connected with the island's eastern coast by a possibly man-made isthmus. The city spread to this connecting neck and eventually also to the adjacent coast (see the engraving facing p. 390 of J. Pitton de Tournefort, *Relation d'un voyage du Levant*, i, Amsterdam 1718). In the Middle Ages, Lesbos came to be known by the name of its capital as the island of Mytilene or, through a metathesis, Melitene; this sometimes caused its confusion with the island of Malta or Melita (as shown by the association of the legend about St. Paul and the serpent with Lesbos).

Lesbos seems to have escaped the attention of early Islamic geographers, and it does not appear among the islands of the Aegean on either of al-Idrīsī's maps. On the other hand, Shuʿayb I b. ʿUmar (241-66/855-80) of Crete (Iḳrītish [*q.v.*]) raided the island as part

of his forays throughout the Aegean all the way to the Propontis (the Sea of Marmara, Marmara Denizi [*q.v.*]) to the point of making the inhabitants of Eressos (legendary home of the poetess Sappho) abandon their city and move to Mount Athos (A.A. Vasil'ev, *Vizantiya i Arabî*, St. Petersburg 1910, ii, 46-7; French tr. *Byzance et les Arabes*, Brussels 1968, ii/1, 53).

Lesbos came under Muslim rule for the first time in or soon after 1089 and remained so until 1093 as part of the brilliant but short-lived successes of the Turkish *amīr* Čaḳa or Čaḳan (reconstructed from the Greek Tzachas), who founded the earliest Turkish maritime power from his base at Izmir. This Turkish threat was the principal cause of a renaissance of the Byzantine navy, rebuilt by Alexis I Comnenos; Čaḳa himself, however, fell victim to Byzantine diplomacy that contrived his assassination in league with the emperor's relative, the Saldjūḳ sultan Ḳilidj Arslān I, in 1093 (H. Ahrweiler, *Byzance et la mer*, Paris 1966, 184-9; S. Vryonis, *The decline of medieval Hellenism in Asia Minor*, Berkeley 1971, 115; A.N. Kurat, *Çaka*, Istanbul 1936).

By the time that the Aydîn *beg* Umur (1334-48; see P. Lemerle, *L'émirat d'Aydin*, Paris 1957; I. Mélikoff-Sayar, *Le Destan d'Umur Pacha*, Paris 1954; and AYDÎN-OGHLU) repeated and surpassed Čaḳa's exploits (without, however, occupying Lesbos), the growth of Turkish and Latin power in the area made Byzantine hold on the island, among other places, precarious. Thus in 1355 the emperor John V Paleologus gave Lesbos, his sister Mary's dowry, in an act of gratitude and as a practical solution, to his brother-in-law, the Genoese Francesco Gattilusi. This family then ruled Lesbos until its conquest by the Ottomans in 1462 (W. Miller, *Essays on the Latin Orient*, Cambridge 1921, 313-53, ch. "The Gattilusi of Lesbos"; W. Heyd, *Histoire du commerce du Levant*, Leipzig 1885, i, 510-12; E. Armao, *Il giro per il Mar Egeo con Vincenzo Coronelli*, Florence 1951, 110-11). The rule of the Gattilusi was characterised by the pragmatic, commerce-minded goals of Latin, mainly Italian, possessions in the Aegean. Thus when Tīmūr [*q.v.*] occupied Izmir in 1403, the Gattilusis hastened, like the Genoese company of the Mahone on Chios, to send presents and proclaim their loyalty. On the other hand, these Catholic overlords do not seem to have been fully accepted by the mainly Greek Orthodox population, a circumstance that may have facilitated the gradual spread of the Turkish domination.

After the conquest of Constantinople by Meḥemmed II, Dorino Gattiluso (1426-55) managed to conserve his possession by means of a tribute of 3,000 ducats (a sum raised at the accession of Dorino's son Domenico in 1455 to 7,000 ducats). In 1458 Domenico was imprisoned and subsequently murdered by his brother Niccolò. This, as well as irritation at the refuge which both Domenico and Niccolò gave to Catalan corsairs, is often cited as the cause of Meḥemmed's displeasure and eventual conquest, but a more decisive factor may have been the island's economic and strategic importance. Thus in the late summer of 1462, a Turkish fleet under Maḥmūd Pasha [*q.v.*] anchored off Mytilene, while the sultan set up camp on the mainland near Aywalîḳ. Niccolò refused to surrender, but did so after a siege of three weeks. The richer inhabitants were then moved to Istanbul, a number of boys and girls were chosen for imperial service, and the rest of the natives were allowed to stay. The island was surveyed and the population was recorded in Ottoman fiscal registers. Turks, mainly Janissaries who then married local women, were encouraged to settle in the island (Miller, *op. cit.*; F. Babinger, *Mehmed the Conqueror and his time*, Princeton 1978, 210-12, and *passim*; ʿĀshîḳ-pasha-zāde, ed. Giese, 156-57; Neshrī, ed. Taeschner, ii, 280-1; Katib Čelebi, *Tuḥfat al-kibār fī asfār al-biḥār*, Istanbul 1141, 61b). Lesbos became a *sandjaḳ* in the *eyālet* of Rūmili, and an important link in the framework of Ottoman maritime expansion. A minor but significant outcome of the conquest and repopulation of this island was the birth there of the Barbarossa brothers, who later initiated the Ottoman conquest of North Africa [see KHAYR AL-DĪN].

Ottoman rule on Lesbos lasted from 1462 to 1912. It was disturbed, though not disrupted, only at the beginning during the Turco-Venetian wars of 1463-79 and 1499-1502, and again toward the end, when in 1905 four European powers seized its customs and telegraph services in order to pressure the Ottoman government to accept their financial supervision of the *vilāyets* of Selānik, Kosova and Monastir.

In 1434, Lesbos became a *sandjaḳ* in the newly formed *eyālet* of Djazāʾir-i Baḥr-i Safīd [*q.v.*], a province under the jurisdiction of the commander of the Ottoman navy [see KAPUDAN PASHA]. This *eyālet* was formed at the appointment of the above-mentioned Khayr al-Dīn to that post. The island maintained this administrative status throughout the history of the *eyālet*—later called *vilāyet*—until the latter's demise concurrent with the end of the Turkish rule on Lesbos in 1912.

The life of the inhabitants does not seem to have been particularly affected by the Turkish rule. The majority remained Greek-speaking and Orthodox, and retained their way of life and religious traditions. European travellers who visited Lesbos during the centuries of the "Tourkokratia" were struck both by the island's features identical with those mentioned in classical sources and by some contrasts. The city of Mytilene, which together with Ephesus, Rodos and Corinth had had the reputation of being among the most beautiful cities of the Greek world, is described by Charles Thomas Newton (1852) as a "strappling, dirty village, the houses much like those of Constantinople constructed of wood on account of earthquakes, with roofs of red tile" (*Travels and discoveries in the Levant*, London 1865, i, 54). The Turkish governor resided with his garrison within the precincts of the citadel on the rocky peninsula; this fortress of Byzantine construction and Genoese additions, on the site of the ancient acropolis, reflected the city's and island's more recent history: according to H.F. Tozer (1886), "in the neighborhood of the entrance, at the summit of the hill, ... a Byzantine eagle, a Frankish coat of arms, and a Turkish inscription are built into the wall close together" (*The islands of the Aegean*, repr. Chicago 1976, 135). Newton (58) estimated the city's population at 8,500, of whom 2,000 were Muslims; there were also two to three hundred foreigners, protected by their diplomatic representatives. The presence of European vice-consuls is already reported by Tournefort (1700; i, 392) and Pococke (1739; *Description of the East*, London 1745, ii, 16). According to Newton, they resided in the "Frankish quarter" near the isthmus; the *sālnāme* of the *vilāyet* of Djazāʾir-i Baḥr-i Safīd, no. 20, for 1321/March 1905-Febr. 1906, 162, lists representatives (mostly vice-consuls acting for their consulates at Izmir) of Great Britain, Austro-Hungary, the United States, Sweden-Norway, Belgium, Greece, Holland, Iran, Spain, France, Italy and Germany. Their presence was due both to the economic importance of the island and to its position on crucial shipping routes. The port of

Mytilene, the busiest of the archipelago, consisted, as in antiquity, of two harbours separated by the isthmus, a northern and a southern one; the northern harbour, protected by a long mole, was the principal one. In 1305/March 1889-Febr. 1890 3,462 ships called there (V. Cuinet, *La Turquie d'Asie* Paris 1894, i, 469). The ratio of the Greek to the Turkish population on the island was about 4 : 1; the *sālnāme*, no. 10 for 1310/March 1894-Febr. 1895, 241, lists 98,882 Ottoman subjects besides a small number of foreigners; of the Ottoman ones, 85,328 were Greek Orthodox and 13,554 were Muslims. In the capital itself, the Turks were, according to Newton, "a decaying and decreasing population" (i, 57); there were, according to him, no very rich Turks except for the Pas͟ha and his son, for the wealthy Lesbiots were the rich landowners of the Greek bourgeoisie. Other sources mention also Greek merchants and bankers. The island's principal source of wealth and article of export were, throughout its history, olives and olive oil, although the fertility of its soil could have yielded an abundance of cereals as well; olive growing was favoured, according to Pococke, because it required little labour, which in turn could be done by women and children, and grain had thus to be imported. Nevertheless, the cultivation of wheat, famous in antiquity, again expanded in the final decades of the Ottoman rule, so that flour mills were second in importance only to olive oil presses (Cuinet, i, 455). Grapes, raisins and wines, as well as figs were also renowned; products derived from sheep and goats, and fishing enriched the Lesbiots' diet; the sardines, molluscs and shellfish of the bay of Kalloni had a specially high reputation. Besides oil pressed from olives and olive stones, the articles of export included soap, valonia, pitch, leather and hides, sponges and salt, and a delicious type of cheese popular in Istanbul. Small-scale shipbuilding and coastal shipping also occupied some inhabitants despite, and in some respects connected with the piracy and brigandage endemic in the Aegean (D.A. Zakythenos, *Corsaires et pirates dans les mers grecques au temps de la domination turque*, Athens 1939). No wheeled carriages were used in the island, transportation being done on pack animals (horses, donkeys, but especially sturdy mules, appreciated for their reliability in the mountainous terrain). A curiosity was small herds of little ponies that lived freely in the interior and were on occasion exported to Istanbul.

The port of Mytilene overshadowed the island's other harbours; from among the latter, the gulf of Yeras, called by Europeans Olivieri, had the reputation of being one of the vastest natural harbours of the Mediterranean. Equally favoured, but of more difficult access, was the gulf of Kalloni. The harbours of Plomari and Sigri on the southern and western coasts, and Molyvo with neighbouring Petra just west of the northern tip of the island, were also active.

There was a Greek Orthodox archbishop in Mytilene, and another in the island's second largest city, Molyvo (Methymna). The Turkish population lived throughout the island in their own quarters and in scattered villages. Numerous mosques and *tekke*s, churches and monasteries are mentioned in the *sālnāme*s. Relations between the two communities were good, and bilingualism was not uncommon. The awareness, among the Greeks, of their history and culture, always maintained by the ecclesiastic élite, spread among the population toward the end of the Ottoman period through an increasing number of schools, some teachers receiving their training also in Athens. Cuinet (i, 450) mentions 157 schools with 7,635 students; there were two high schools in Mytilene, a Greek one with 97 students and a Turkish one with 40 students.

Visitors praised the fresh air of the island enriched with the fragrance of its Mediterranean vegetation, and the climate was salubrious. The only serious ailment was tuberculosis, chiefly limited to the wives, sequestered in their women's quarters, of the more opulent Greek and Turkish inhabitants (Cuinet, i, 451).

In the final decades of the Ottoman period, the *vilāyet* of D͟jazāʾir-i Baḥr-i Safīd (which had by then lost any connection with the office of the commander of the Ottoman navy) consisted of four *sand͟jak*s: Rodos [*q.v.*], Chios (Saḳīz [*q.v.*]), Lesbos and Lemnos (Limni[*q.v.*]). That of Lesbos was divided into four *ḳaḍāʾ*s: of Midilli, Molyvo (Methymna), Pilmar (Plomari) and Yunda; the last-named, known in Greek as Moskonesia or Kekatonesia, consisted of a group of small islets dominated by the larger Alibay Adasī facing Aywalīḳ; this *ḳaḍāʾ* was the only part of the *sand͟jaḳ* that remained Turkish at the conclusion of the Balkan War. The title of the *sand͟jaḳ*'s governor was *mutesarrif*, while the *ḳaḍāʾ*s were administered by *ḳaymaḳām*s, and the *nāḥiye*s by *müdür*s. Lists of government officials in the *sālnāme*s show that majority were Turks, but that Greeks also participated in the administration.

Ottoman rule on Lesbos ended in December 1912, when a Greek fleet landed troops on the island and took control of it (Ali Haydar Emir [Alpagur], *Balkan harbinde Türk filosu*, Istanbul 1932, 249-53). Greek annexation was ratified by the London Conference in May 1913. The Turkish inhabitants left Lesbos as part of the population exchange between the two countries in the 1920s.

(S. Soucek)

MIDRĀR (Banū) or Midrārids, minor Berber dynasty which was established in Sidjilmās(s)a [*q.v.*] and which enjoyed relative independence until its final collapse in 366/976-7.

The history of this dynasty can be briefly outlined, thanks to al-Bakrī [*q.v.*], who lived in the 5th/11th century and thus possessed quite recent information in order to write the chapter that he devotes to it (*Mughrib*, 148 ff., Fr. tr. 282 ff.), before Ibn ʿIdhārī (7th-8th/13th-14th century [*q.v.*]), Ibn Khaldūn (8th/14th century [*q.v.*]) and several historians of the Maghrib and Mashrik were able to take their turn at tackling this; but a number of important episodes of this period were recorded in the works of the *kāḍī* al-Nuʿmān [*q.v.*] available today, in particular the *Iftitāḥ al-daʿwa* and the *Kitāb al-Madjālis wa 'l-musāyarāt*, as well as in the *Autobiography* of the chamberlain Djaʿfar b. ʿAlī (see *Bibl.*), although the latter sources, contemporaneous with the events which they relate, express the often biased point of view of the Fāṭimids.

From the start, it is difficult to date the birth of the dynasty which, despite appearances, does not seem to coincide with the foundation of Sidjilmāsa, itself not well established. One tradition links the foundation with a member of the tribe of Miknāsa [*q.v.*], Abu 'l-Kāsim Samdjū/Samghū/Samghūn (i.e. Samgū or Samgūn) b. Wāsūl al-Miknāsī, who had adopted the doctrine of the Ṣufrī [*q.v.*] Khāridjites; this man is said to have gathered *ḥadīths*, in Ifrīkiya, from ʿIkrima [*q.v.*], the famous *mawlā* of Ibn ʿAbbās, whom legend depicts as the propagator of Khāridjism in the Maghrib, a region where he probably never set foot. The Samgū/Samgūn in question, who, it is said, pastured his flocks on the site of the future town of Sidjilmāsa, gathered around him some Ṣufrīs, and, as soon as the group numbered 40, set out, in 140/757-8, to build houses; the small community surprisingly chose as its chief a negro by the name of ʿĪsā b. Mazyad (rather than Yazīd) al-Aswad, whose father had been converted to Islam, but his conduct so offended those he governed that they tied him to a tree and left him to die in 155/772; he had reigned 15 years (al-Bakrī, 148/286; *Berbères*, i, 261). According to the sources, his successor was the first-mentioned personage, Abu 'l-Kāsim Samgū/Samgūn, who reigned 13 years and died in 168/784-5. This tradition, which traces back the foundation of the town and, consequently, of the dynasty, if not of the family, to 140/757-8, is preferred by our first informant, al-Bakrī (149/284); Ibn ʿIdhārī (i, 157) and Ibn Khaldūn (*Berbères*, i, 261) only know of it, while the *Mafākhir al-Barbar* [*q.v.*] (48) reports on the authority of ʿArīb b. Saʿd [*q.v.*] that Abu 'l-Kāsim Samkū ruled over Sidjilmāsa, founded in 140 by his grandfather (*sic*) ʿĪsā b. Yazīd. Al-Bakrī reproduces in any case a second tradition, according to which a smith from Cordova called Midrār, who had taken part in the Revolt of the Suburb (in 202/818 [see kurṭuba]) and was consequently a Rabaḍī, was able to escape and came to settle near the market whose site was to be occupied by the capital of the Midrārids; while suggesting that the first of the two accounts is "more in conformity with the truth", this author nevertheless asserts (149/285) that the rulers of Sidjilmāsa are descendants of the smith Midrār, since they "were subjected to satirical insults on this subject." The *Istibṣār* (204), for its part, draws on the two traditions, which it moreover mixes; it calls Midrār b. ʿAbd Allāh the alleged disciple of ʿIkrima, and says that the Midrār who escaped from Cordova was black, a fact which earned for his descendants gibes or epigrams. As for E. Lévi-Provençal, he admits the Cordovan origin of the founder of Sidjilmāsa (*Hist. Esp. mus.*, i, 170, n. 1).

This latter tradition, which appears seductive in the form in which it is presented by al-Bakrī, does not, however, elude the problem of chronology which is posed, for the impression is given that the town existed as early as the end of the 2nd/ 8th century. In fact, after 168/784-5, al-Bakrī (150/286) and Ibn Khaldūn (i, 262) have a son of Samgū/Samgūn mentioned as reigning by the name of Abu 'l-Wazīr al-Yās b. Abi 'l-Kāsim, who was dethroned in 174/790-1 (the date of 170 mentioned by Ibn ʿIdhārī is to be corrected) by his brother Abu 'l-Muntaṣir (sometimes Abū 'l-Manṣūr, but probably wrongly) al-Yasaʿ, who remained on the throne until his death in 208/823-4. This long reign was to be quite brilliant and beneficial, for al-Yasaʿ, who is said to have been of a particularly violent and despotic character, subjugated all the Berbers of the region who resisted him, levied the fifth on the mines of Darʿa [*q.v.*] and had built in 199/814-15 (al-Bakrī, 148/282-3; Jacques-Meunié, i, 201) the town wall with 12 gates in it, of which eight were covered in iron so that the enemy could not set fire to them. It is stated that this wall, the lower part in stone and the upper in unfired brick (Ibn ʿIdhārī, i, 157), was undertaken entirely at his own expense, and that the work force cost him 1,000 measures of grain (*ṭaʿām*) a day. He also adorned the town with a certain number of palaces and public buildings, notably the Friday mosque (al-Bakrī, 148/283; *Berbères*, i, 262; Jacques-Meunié, i, 201).

Given, on the one hand, that the total duration of the dynasty is reckoned at 160 years (al-Bakrī, 149/284; Ibn Idhārī, i, 157; Ibn al-Abbār, *Ḥulla*, i, 191-2) and that, on the other hand, disregarding the Rabaḍī mentioned above, the first Midrār cited is the son of al-Yasaʿ, al-Muntaṣir, who ascended the throne in 208/823-4 (al-Bakrī, 150/286; *Berbères*, i, 262), it is perhaps from this year that we have to date the birth of the Midrārid line, in spite of the fact that, in general, the eponym of dynasties may be the father of the first of their members, that Ibn ʿIdhārī (i, 157) clearly states that it came to an end in 296 after approximately 160 years of rule, that Ibn Khaldūn (i, 260) gives it the name of Banū Wāsūl, which would also take it back to the year 140, and that G.-S. Colin, in the article sidjilmāsa in *EI*[1], makes "the Miknāsī dynasty of the Banū Midrār" begin in 155/771-2, i.e. with the immediate successor of the first ruler of the town, which is in conformity with al-Bakrī's opinion and calculation, but completely disregards the figure of 160 years and the absence of a person called Midrār before 208/823-4. For this reason, we will begin arbitrarily with:

i. Abū Mālik al-Muntaṣir b. al-Yasaʿ, whose surname Midrār (= "one who produces much milk or pours forth abundant rain", etc.), which had no doubt been given him as a title of good omen, served to designate the ruling family whom al-Masʿūdī (*Murūdj*, iv, 39 = § 1367) further named as the Banu 'l-Muntaṣir, which justifies the decision taken. This author estimates the extent of the amīr's dominions—one would wish to know on what basis—at 400 *farsakhs* by 80 (!), and makes one Aḥmad b. al-Muntaṣir the ruler of the land of Asṭūlā (?) which measured, according to him, 400 *farsakhs* by 250. According to Ibn Khurradādhbih (ed. and Fr. tr. M. Hadj-Sadok, 9), the territory of the Banū Midrār included the Darʿa, where a silver mine was located, and the town of Zīz, i.e. it probably exceeded present-day Tafilalt.

Midrār, a nominal vassal of the ʿAbbāsids (in

whose name the *khuṭba* had been pronounced, at least in the time of the caliphs al-Manṣūr and al-Mahdī, i.e. from 140 to 169/758-85, if we are to believe Ibn Khaldūn, i, 262) may have acknowledged a certain dependence on Cordova, but no doubt one much less strict, as E. Lévy-Provençal says (*Hist. Esp. Mus.*, i, 281-2), than that of the Rustamids of Tāhart [*q.vv.*], with whom he had moreover some affinities, since, like them, he was a Khāridjite; he had even married Arwā bint ᶜAbd al-Raḥmān b. Rustam (al-Bakrī, 150/287; *Berbères*, i, 262; G. Marçais, 103-4; Jacques-Meunié, i, 201). It so happens that his reign was troubled by the rivalry of his two sons, both of them with the first name of Maymūn, born to him by the Rustamiyya and another woman by the name of Thaḳiyya (? Baḳiyya in Ibn ᶜIdhārī, i, 157). After having endured three years of dispute, Midrār, who was inclined to favour the former, banished the latter, but was himself dispossessed by the son to whom he had given preference. The population of the town then rebelled, offered the throne to the son of Thaḳiyya, who refused it and gave it to Midrār, who made the mistake of appearing firm in his intention to entrust it to Maymūn Ibn al-Rustamiyya. This time, the inhabitants of Sidjilmāsa besieged their sovereign in his palace and gave their allegiance as chief to

ii. MAYMŪN b. Thaḳiyya, called al-Amīr. The deposed dynast died in 253/867, while his son ruled until his death, in 263/876-7, and was succeeded by

iii. his son MUḤAMMAD, who died in Ṣafar 270/August-September 884 (al-Bakrī, 150/287; *Berbères*, i, 263; cf. Ibn ᶜIdhārī, who does not follow exactly the same order).

It was not long before the principality of Sidjilmāsa, whose tranquility until then appears to have been disturbed only by some purely internal dissensions, entered into the general history of the Maghrib and Islam, at the same time losing the autonomy that it had preserved vis-à-vis the Aghlabids [*q.v.*] of Ḳayrawān and the ᶜAbbāsids of Baghdād, of whom the Midrārids were still nominal vassals, as is proved by the letter sent, at the time when the Mahdī ᶜUbayd Allāh was being sought after, most likely not by al-Muᶜtaḍid (279-89/892-902), as is stated by Ibn Khaldūn (*Muḳaddima*, i, 30; Fr. tr. de Slane, i, 40-1) and the author of the *Istibṣār* (204), but more probably by his successor al-Muktafī (289-95/902-8), to the following *amīr*,

iv. AL-YASAᶜ (sometimes erroneously: ᶜĪsā) b. al-Muntaṣir (or b. Midrār), son of the no. 1 above, who occupied the throne from 270 to 296/882-909.

In fact, on 1 Shawwāl 292/7 July 905 (see *Autobiography*, 297), following a prediction according to which the awaited Mahdī [*q.v.*] is to appear in Sidjilmāsa, the future founder of the Fāṭimid dynasty, al-Mahdī ᶜUbayd Allāh [*q.v.*] set out in the direction of this small capital with his young son al-Ḳāsim (*Istibṣār*, 204; *Berbères*, i, 263; Terrasse, i, 140; Jacques-Meunié, i, 202). He rented a house there, the Dār Abī Ḥabasha (*Autobiogr.*, 302), succeeded in concealing his identity for almost four years and received good treatment from al-Yasaᶜ b. al-Muntaṣir, possibly owing to the presents that he had given him. Besides, he had no doubt been able to make friends among the flourishing ᶜIrāḳī colony resident in the town (cf. Dachraoui, *Califat*, 122, 311). The circumstances in which his true identity was revealed are differently reported by the sources. According to the *Autobiography* of Djaᶜfar b. ᶜAlī (303-4), his son miraculously caused a spring to gush forth in a garden next to his house, and the secret was thus divulged. According to the *Istibṣār* (204), however, he had been

denounced by a Jew, while Dachraoui (*Califat*, 123) asserts that al-Yasaᶜ was informed of his presence by a letter from Ziyādat Allāh [see AGHLABIDS]. According to Ibn Khaldūn (*Muḳaddima*, i, 30, 33-4; Fr. tr. de Slane, i, 40-1, 45), the letter from Baghdād mentioned above was addressed to the Aghlabids of Ḳayrawān and the Midrārids of Sidjilmāsa ordering them to close their land to ᶜUbayd Allāh and his son (whose genealogy, in the opinion of Ibn Khaldūn, was by this act recognised as authentic); al-Yasaᶜ then discovered the truth and had the two fugitives imprisoned. Whatever the facts of the matter, at one time or another, the Midrārid put ᶜUbayd Allāh, if not in prison, (*Istibṣār*, 202), at least under house arrest in his sister's house and separated him from his son, with whom he could, however, communicate through an intermediary, a young eunuch originally from Aleppo called Ṣandal, whom he had bought locally (*Autobiogr.*, 307 and n. 3). Acting through a Shīᶜī from Ḳayrawān in whose company he had travelled (*Autobiogr.*, 305) and who had been authorised to return to Ḳayrawān, he was able to inform of his situation the *dāᶜī* Abū ᶜAbd Allāh al-Shīᶜī, who had just seized Raḳḳāda [*q.v.*]. This *dāᶜī* was eager to recruit supporters, hence set out for the West, subdued on his way the Rustamids of Tāhart and arrived before Sidjilmāsa on 6 Dhu 'l-Ḥidjdja 296/26 August 909 (Ibn ᶜIdhārī, i, 159; Dachraoui, *Califat*, 122). Abū ᶜAbd Allāh scarcely appeared aggressive, and even advised al-Yasaᶜ of his peaceful intentions; however, as the latter had had his messengers put to death, he finally took the town by storm. Meanwhile, the Midrārid *amīr* fled, but, on his being caught after a few days, he was killed by his own subjects or died of wounds that he had received (*Autobiogr.*, 319; *Iftitāḥ*, §§ 243-52; *Istibṣār*, 204; *Berbères*, i, 263; Marçais, 134; Terrasse, i, 140; Dachraoui, *Califat*, 124; Jacques-Meunié, i, 202). All the events that are summarised here are recounted in detail in a letter which the *dāᶜī* is said to have addressed to Raḳḳāda and which is reproduced in the *Iftitāḥ* (§§ 253-7; see also *Madjālis*, 214). According to the *Autobiography* of Djaᶜfar b. ᶜAlī (312), al-Yasaᶜ took out of the town ᶜUbayd Allāh, who himself gave to Abū ᶜAbd Allāh the order to seize it, but the chamberlain was then imprisoned, as were all the members of the eminent Shīᶜī's entourage; his evidence has however no great value on this point. Once ᶜUbayd Allāh and his son had been rescued, Abū ᶜAbd Allāh pillaged the town and is said to have dealt severely with the Jews, whom he stripped of their goods and drove out of Sidjilmāsa (but he does appear to have condemned those of them who wished to stay to become cesspool cleaners (*kannāfūn*) and masons (*bannāʾūn*), as the *Istibṣār* (202) reports, for al-Bakrī mentions (149/284) that the former occupation was reserved for lepers). The rest of the population endured a similar fate to such an extent that the *dāᶜī* was able to leave for Raḳḳāda carrying with him 120 loads of gold and precious merchandise (*Istibṣār*, 204; Jacques-Meunié, i, 203).

It was in Sidjilmāsa that ᶜUbayd Allāh was proclaimed *Imām* (*Autobiogr.*, 316); he stayed there for another 40 days before departing for Ifrīḳiya (Dachraoui, *Califat*, 124). Before his departure, Abū ᶜAbd Allāh had designated as governor of the town an officer of the Mazāta [*q.v.*] called Ibrāhīm b. Ghālib (*ᶜUyūn al-akhbār*, 24-5; al-Bakrī, 150/288; *Berbères*, i, 263; cf. Ibn ᶜIdhārī, i, 206), leaving at his disposal a garrison of 2,000 Kutāma; this figure, mentioned by Dachraoui (124), appears, however, rather exaggerated as, according to al-Bakrī (150/288), this governor was massacred 50 days later, with all his soldiers, by the rebellious townspeople. The latter author (150/287) dates from Dhu 'l-Ḥidjdja 297/August-September 910 the end of the reign of al-Yasaᶜ, i.e. there is a difference of a whole year from the date given by the contemporary Shīᶜī sources, which is perhaps more reliable; for him (150/288) and for Ibn Khaldūn (i, 263), it was in Rabīᶜ I 298/November-December 910 that the rebellious population put on the throne

v. WĀSŪL, i.e. al-Fatḥ (Abu 'l-Fatḥ in Ibn ᶜIdhārī, i, 206), son of (ii) Maymūn al-Amīr, who died in Radjab 300/February-March 913 and was succeeded by his brother

vi. AḤMAD, killed in Muḥarram 309/May-June 921, by the governor of Tāhart on behalf of the Mahdī, Maṣāla b. Ḥab(b)ūs, who came to besiege Sidjilmāsa, seized it and installed on the throne a Midrārid prince who was totally devoted to his cause,

vii. AL-MUᶜTAZZ, Muḥammad b. Sārū (?) b. Midrār (al-Bakrī, 151/288; *Berbères*, i, 264; Ibn ᶜIdhārī, i, 179, 183; Dachraoui, *Califat*, 151). On his death (321/933-4), his son

viii. ABU 'L-MUNTAṢIR (al-Manṣūr in Ibn ᶜIdhārī, i, 206) Muḥammad succeeded him and spent the rest of his life in power; he died in 331/942-3 (cf. *Berbères*, i, 264) and his son

ix. AL-MUNTAṢIR Samgū b. (viii) Muḥammad, who was only 13 years old, took his place, but entrusted state affairs to his grandmother, who administered the state for only two months, for a son of (v) Wāsūl,

x. MUḤAMMAD b. (v) al-Fatḥ Wāsūl b. (ii) Maymūn al-Amīr, seized power by force and put the incumbent ruler in prison (*Madjālis*, 389).

The new master of Sidjilmāsa had apparently developed fairly close ties with the Umayyads of Cordova, since he was present in the midst of their troops on 11 Shawwāl 327/1 August 939 at the Battle of Simancas (Lévi-Provençal, *Hist. Esp. mus.*, ii, 58). Thus it is not astonishing that he had repudiated the Ṣufrī Khāridjism to which his ancestors adhered, so as to be converted to the Mālikī Sunnism in force in al-Andalus (al-Bakrī, 151/288). This decision was bound to displease his Fāṭimid suzerain, who endured Khāridjism by force of circumstances and possibly also accepted, however dubious this may be, that the *khuṭba* should be pronounced in the name of the ᶜAbbāsids (*Berbères*, i, 264), but was unable to allow a more or less declared allegiance to the Umayyad régime. It is said that he was nevertheless able to govern his principality and to exercise justice there; however, from the testimony of Ibn Ḥawḳal (83/Fr. tr. 79), who was present in Sidjilmāsa in 340/951 and had some dealings with him, "while he called for war [...], he was unable to obtain from the Berbers what he wanted, because those whom he invited to join him on campaign were disinclined to do so, fearing a trick to harm them". There is no mention of whether it was the Fāṭimids against whom he was directing his attack, but it is known that the rulers of Ifrīḳiya grew very angry in 342/953-4, when he had the audacity to proclaim himself caliph, take the title of *Amīr al-Muʾminīn* and the ruling name of al-Shākir li-llāh (*Berbères*, i, 264; Jacques-Meunié, i, 203) and to mint coins (the *mathāḳīl shākiriyya* cited by Ibn Ḥazm, *Naḳṭ al-ᶜarūs*, 76; see Colin, in *Hespéris* [1936], 122; Brèthes, 96, no. 773; Jacques-Meunié, i, 226). The Fāṭimid Caliph al-Muᶜizz li-dīn Allāh, unable to bear such a mark of insubordination, ordered the general Djawhar [*q.v.*] to go and force the recalcitrant prince to see reason. According to the Shīᶜī tradition (*Madjālis*, 338), Djawhar, on arriving near Sidjilmāsa,

wrote to the population asking them to surrender Ibn Wāsūl, but they refused. This attitude did nothing to relieve the anxiety of the *amīr*, who hastened to leave the town with his family, his treasures and supporters to go to seek refuge in the neighbouring fortress of Tasegdelt (?); D̲j̲awhar then entered the Midrārids' capital, where he had coins minted to replace the *mat̲h̲āḳil s̲h̲ākiriyya* (Dachraoui, *Califat*, 232, 344). Ibn Wāsūl, having left his refuge to find out what was happening in the town, was recognised by some members of the Matg̲h̲ara [*q.v.*] tribe, who gave him up to D̲j̲awhar (on these events, see al-Bakrī, 151/289; *Berbères* i, 264; Jacques-Meunié, i, 203). Contrary to what is said in the art. D̲J̲AWHAR, Ibn Wāsūl was not put to death, but made a prisoner (*Mafāk̲h̲ir al-Barbar*, 4) and brought to al-Manṣūriyya, together with the *amīr* of Fās, Aḥmad b. Bakr, captured in the same period, and some sons of notables of Sid̲j̲ilmāsa (*Mad̲j̲ālis*, 483) taken as hostages. The attack on the town and the capture of Ibn Wāsūl took place in Rad̲j̲ab 347/September-October 958 (al-Bakrī, 151/289). The arrival at al-Manṣūriyya is dated by the *ḳāḍī* al-Nuʿmān (*Mad̲j̲ālis*, 458) to the end of S̲h̲aʿban [348?]/November 959, but the dates mentioned by this author do not always appear to be exact. In any case, we are quite well informed on the prisoner's stay with the Fāṭimid caliph, on his internment in a part of the castle (*saḳīfat al-ḳaṣr*), on the ignominious treatment that he experienced when he was taken around in a cage, and also on the *ḳāḍī*'s attempts to convert him, as well as the tenor of the conversations that took place between al-Muʿizz and Ibn Wāsūl (see *Mad̲j̲ālis*, 411-12, 434-5, 458, 460; Ibn ʿIdhārī, i, 222; *Berbères*, i, 263; Ibn al-At̲h̲īr, vi, 354; Dachraoui, *Captivité*).

Before leaving Sid̲j̲ilmāsa, D̲j̲awhar had appointed a governor there, but the population were not slow to rebel again and to restore to the throne

ix (for the second time). AL-MUNTAṢIR BI-LLĀH b. (viii) Muḥammad b. (vii) al-Muʿtazz, whose father and grandfather had not been appointed by the Fāṭimid caliph, as al-Nuʿmān (*Mad̲j̲ālis*, 388) claims, but put in power by Maṣāla (see above). According to the same author (*Mad̲j̲ālis*, 389-93), the population, who had killed the governor imposed by D̲j̲awhar, made their excuses to al-Muʿizz, but he did not accept them at all and summoned al-Muntaṣir, who made his way to him with 200 men. After a severe reprimand, the caliph nevertheless sent him to govern his town. In 352/963, al-Muntaṣir was dethroned and, according to Ibn Ḥawḳal (107/104), put to death, with the help of a group of twelve men, by his brother

xi. Abū Muḥammad ʿABD ALLĀH (?) b. (viii) Muḥammad b. (vii) al-Muʿtazz, who recognised the suzerainty of the Fāṭimid caliph. This situation lasted until the year 366/976-7, when the chief of the Mag̲h̲rāwa, K̲h̲azrūn b. Falfūl [see MAG̲H̲RĀWA], who fought on behalf of Cordova, put an end to the dynasty of the Banū Midrār; the last prince still in power fell on the battlefield, and his head was sent to Cordova (*Berbères*, i, 264-5; Terrasse, i, 169; Jacques-Meunié, i, 206). Lévi Provençal (*Hist. Esp. mus.*, ii, 261), places this event in 369/980, which corresponds better to the total of 160 years proposed by al-Bakrī for the duration of the dynasty.

The descendants of K̲h̲azrūn were to be put under the suzerainty of Cordova, to remain then at the head of an independent principality in Arcos [see ARKŪS̲H̲] until its annexation by Sevilla.

We have seen that one observer interested in the social and economic situation of the land through which he travelled, Ibn Ḥawḳal, was in 340/951 in Sid̲j̲ilmāsa, and it is probable that he kept in touch with the course of events that then took place. He states (99-100/98; cf. Jacques-Meunié, i, 203) that in the period when (vii) al-Muʿtazz reigned over the principality, he "levied tariffs on the caravans travelling to the country of the Blacks, as well as the tithe, the land tax and some ancient taxes on the sale and purchase of camels, sheep, cattle, in addition to dues on all merchandise being exported to or imported from Ifrīḳiya, Fās, Spain, Sūs and Ag̲h̲māt, and finally other revenues dependent on the administration of the mint. All this amounted to about 400,000 *dīnār*s for the capital and the province". According to this author, the revenue from the town and its province, an area of five days' journey by three, was equal to half of that of the whole Mag̲h̲rib, and one can understand the interest that the great powers of the period took in the principality. The importance that Ibn Ḥawḳal attributes to the town itself is further reflected by the fact that he calculates the distances from it to other places (91-3/89-92). He passes very favourable judgment on the inhabitants, upon whose commercial activity and wealth he remarks (99-100/97-8); and he is astonished to see "a recognition of debt by which a merchant of Awdag̲h̲ust admitted himself in debt to an inhabitant of Sid̲j̲ilmāsa for a sum of 42,000 *dīnārs*" (cf. 61/58, where this observation is already mentioned). Reckoned at 4,06g a *dīnār*, this sum represents a weight in gold of 170.520 kg (Jacques-Meunié, i, 224). One can deduce from the comments of Ibn Ḥawḳal that Sid̲j̲ilmāsa was, under the Midrārids, the most important caravan centre on the route passing round the desert through the West; the ruler of Egypt, Ibn Ṭūlūn (249-69/863-83 [*q.v.*]) having forbidden caravans and single travellers to follow the routes which led directly to the western Sudan, the eastern merchants passed by Sid̲j̲ilmāsa, which also benefited from the advantages of eastern and western civilisation, without however leaving behind, at least in this period, the recollection of a really intense cultural activity.

MIDYŪNA (also Madyūna or Medyūna), an important Berber tribe, belonging to the major branch of Butr and descended from the family of Fāṭin, son of Tamzīt (or Tamṣīt), son of Ḍarīs, son of Zaḥīk (Zadjīk), son of Mādghis al-Abtar. According to Ibn ʿIdhārī, Madyūna was said to be the son of Tamzīt, son of Ḍarī and brother of Maṭmāṭa, Madhghara, Ṣadīna, Maghīla and Malzūza. According to Ibn Khaldūn, the Midyūna (Medyūna) were related to the Maṭghara, Ṣadīna, Lamāya, Kūmiya, Maghīla, Dūna, Maṭmaṭa, Malzūza, Kashāna (Kashāta) and Ḍarīsa.

Little is known of the history of the Midyūna. It is very likely that the tribe is derived from the Numidian tribe of Midēni, mentioned by Ptolemy and, if J. Desanges is to believed, resident in Khoumiria at the beginning of the Christian era. Judging from Islamic sources, the Midyūna as such appear only at the beginning of the 2nd/8th century. According to a statement in Ibn Khaldūn's *Histoire des Berbères*, all of the Midyūna were resident, at this period, in the province of Tlemcen. However, from the start of the 2nd/8th century, various segments of this tribe are encountered, dispersed throughout North Africa, from Libya to Morocco. The earliest mention of the Midyūna found in Arabic sources relates to a significant portion of this clan which, according to Ibn Khaldūn, moved into Spain "at the time of the first invasion of that country". The historian no doubt refers here to the major expedition of Ṭāriḳ b. Ziyād [*q.v.*], who marched into Spain in 92/711 at the head of 12,000 Berbers and conquered the country in the name of Mūsā b. Nuṣayr. Now, if Ibn Khaldūn is to be believed, a large proportion of these conquerors was composed of Midyūna warriors, no doubt accompanied by their families. It is for this reason, presumably, that Ibn Khaldūn states, in this regard, that they soon became very powerful.

Further information regarding the early Midyūna dates from the second half of the 8th century A.D. and relates to certain sections of this tribe inhabiting present-day Algeria, Tunisia and Libya. This is the case of a Midyūna chieftain named Djarīr b. Masʿūd who took part, with a detachment of the Midyūna, in a major Berber revolt which erupted in 151/168-9 and which was directed against the Arab governor of the Maghrib, ʿUmar b. Ḥafṣ Hazārmard. Among the Berber groups taking part in this revolt, one of the most important was that of Abū Ḳurra al-Īfranī, at the head of 40,000 Ṣufrīs belonging, for the most part, to the Zanātī tribe of the Banū Īfran. The last-named inhabited the western part of Algeria. Originating from the same region were the 6,000 Ibāḍīs commanded by ʿAbd al-Raḥmān b. Rustam of Tāhert (Tiaret) who were among the groups fighting ʿUmar b. Ḥafṣ. Also belonging to these troops were al-Miswar b. Hanī, another Ibāḍī chieftain with a force of 6,000 partisans, and ʿAbd al-Malik b. Sakardīd al-Ṣanhādjī, who brought his 2,000 Ṣufrīs into this coalition. All these detachments laid siege to ʿUmar b. Ḥafṣ at his headquarters in the town of Ṭubna. Jointing the Berber rebels at a later stage was Abū Ḥātim al-Malzūzī [*q.v.*], leader of the Ibāḍīs of Tripolitania. The latter succeeded in capturing the town of Ṭubna in 154/771, subsequently setting out in pursuit of ʿUmar b. Ḥafṣ Hazārmard, who made his way towards the east. Abū Ḥātim was preceded by an advance party commanded by Djarīr b. Masʿūd al-Midyūnī. The latter caught up with ʿUmar b. Ḥafṣ at Djīdjil (the present-day Djidjelli) in the land of the Ketāma; in the ensuing battle, Djarīr b. Masʿūd and his partisans perished, and Abū Ḥātim al-Malzūzī retreated to Tripoli.

Despite the defeat of Djarīr b. Masʿūd in 754/771 and despite the emigration of a large proportion of the Midyūna of Morocco to Spain with the troops of Ṭāriḳ b. Ziyād in 90-2/709-11, numerous sections of this tribe survived in North Africa, at least until the 8th/14th century, if not later.

The following is the information provided by Arab authors of the Middle Ages regarding these sections:

Morocco: Mention has been made above of the significant group of newly Islamised Midyūna who, taking part in the conquest of Spain by Ṭāriḳ b. Ziyād in 92/711, settled in south-eastern Spain. It is probable that the Midyūna who inhabited the Djabal Midyūna, a mountain situated to the south of Fās, between this city and that of Ṣufrūy [*q.v.*, present-day Sefrou], and are mentioned by al-Bakrī (5th/11th century), belonged to the same clan. Abu 'l-Fidāʾ (8th/14th century) mentions in his geographical work a Djabal Midyūna situated to the east of Fās. Could this be the same place as the Djabal Midyūna situated between Fās and Sefrou? These Midyūna of the region of Fās are also mentioned by Ibn Khaldūn among numerous other Berber tribes of the Maghrib al-Aḳṣā (the Bahlūla, the Fazāz, the Ghiyātha, etc.) as professing Judaism at the beginning of the 3rd/9th century. Later, they converted to Islam, accepting Ṣufrī doctrines at a very early stage. In the second half of this century, during the reign of ʿAlī b. ʿUmar, the Idrīsid prince of Fās, a Khāridjī Ṣufrī named ʿAbd al-Razzāḳ, a native of the town of Washka [*q.v.*, i.e. Huesca] situated in the north-east of Muslim Spain, settled among the Ṣufrī Midyūna inhabiting the mountain of this name to the south of Fās. There he gained numerous partisans. He had courted for his cause numerous neighbouring Berber tribes, for example the Ghiyātha. He had also constructed on the mountain of Salā in the territory of the Midyūna (to the south of Fās) a powerful stronghold, to which he gave the name of Washka, in memory of his native city in Spain. According to the author of the *Ḳirṭās* (8th/14th century), this castle was still in existence in 726/1325-6. Subsequently, ʿAbd al-Razzāḳ rebelled against ʿAlī b. ʿUmar. After a number of battles with this prince, he inflicted a decisive victory on him and

forced him to abandon the city of Fās and to take refuge in the territory of the Berber tribe of the Awraba, the tribe most loyal to the Idrīsids. The inhabitants of the Andalus quarter of Fās submitted to ᶜAbd al-Razzāḳ, but those of the Ḳayrawān quarter refused to heed his demands and brought in, to command them, a son of the Idrīsid prince Yaḥyā b. al-Ḳāsim, surnamed ᶜAddām. Nothing is known of the subsequent fate of ᶜAbd al-Razzāḳ and his descendents. All that is known is that the latter remained for a period of time faithful to Ṣufrī doctrines and that they also bore the name of Banū Wākil. This family lived for some time in the Maghrib al-Aḳṣā and governed, in all probability, the Midyūna of the region of Fās.

If Ibn Khaldūn is to be believed, the Midyūna of the region of Fās rebelled, in 614-20/1217-23, against the Marīnid prince Abū ᶜUthmān Saᶜīd, but they were soon defeated by the Marīnids and pledged allegiance to this dynasty.

Besides this fact, nothing definite is known concerning the history of this section of the Midyūna living between Fās and Sefrou, at least as regards the 4th-8th/10th-14th centuries. The last item of information available concerning the Moroccan Midyūna dates from the time of Ibn Khaldūn, who mentions a section of this tribe, still present between Fās and Sefrou, in the vicinity of the important Berber tribe of the Maghīla [*q.v.*] and under its protection.

Algeria: According to Ibn Khaldūn, the original homeland of the Midyūna was located in the central Maghrib, in the province of Tilimsān (Tlemcen). The Midyūna occupied the portion of territory which extends from the Djabal Banī Rāshid (currently Djebel Amour), in the south-east of the High Plateau region, the east of Geryville and north-west of Laghouat, as far as the mountain which stands to the south of Oudjda (west-south-west of Tlemcen) and which still bears the name of Djebel Midïouna. In this early period, that is before the conquest of the central Maghrib by the Zanāta tribes of the Banū Tūdjīn and the Banū Rāshid, the Midyūna of this part of the Maghrib roamed, in nomadic fashion, "the plains and other localities of this region". According to other statements of Ibn Khaldūn, this section of the Midyūna was bordered, to the south-east, by the Banū Īlūmī and the Banū Īfran, to the west, by the Miknāsa, and between them and the sea were the Kūmiya and the Banū Walhāṣa (in the neighbourhood of the town of Ḥunayn). At the time of the conquest of the central Maghrib by the Banū Tūdjīn and the Banū Rāshid, the Midyūna were, says Ibn Khaldūn, much reduced in number; they were also expelled by the invaders from the countryside of Tlemcen and forced to withdraw to the strongholds which they possessed in the Djabal Tasāla and to the south of this mountain (to the south of Oran and to the north-east of Sidi Bel Abbas) and also in the Djabal Midyūna (to the south of Oudjda). A section of the Midyūna is also found in the territory of the tribe of the Beni Khalled (Khelled) in the region of the town of Nedroma. In this area, a village still exists called Dar Midiouna.

In the same region of the province of Tlemcen there existed, in the Middle Ages, another section of the Midyūna. It was based at Tafesra, formerly Tifsart of the Midyūna, a town known from the *Description of Africa* by Leo Africanus (first half of the 16th century). This locality was situated, according to this author, some 15 miles (approx. 27 km) to the south of Tlemcen.

Another canton occupied by the Midyūna is mentioned by de Slane in his *Table géographique* which appears as a supplement to the French translation of the *Histoire des Berbères* of Ibn Khaldūn. It was located to the north-west of the town of Mazouna (east-north-east of Mostaganem). A little to the east of this region, al-Bakrī places the town of al-Khaḍrāᵓ, surrounded on all sides by Berber tribes, amongst which this geographer mentions the Midyūna. Al-Khaḍrāᵓ was situated on the Chélif, a day's march to the west of the town of Miliana. Al-Bakrī places it in the neighbourhood of Ténès.

Tunisia: An insignificant section of the Midyūna probably inhabited at one time the desert of Ifrīḳiya, in what is now Tunisia. In fact, the Ibāḍī historian and biographer al-Shammākhī (19th/16th century) mentions an Ibāḍī scholar named ᶜĪsā b. Ḥamdūn al-Midyūnī al-Hawwārī who lived, during the 5th/11th century, in the *bādiya* (desert) of this country. It seems that this section of Midyūna belonged to the major Berber tribe of Hawwāra [*q.v.*].

Libya: Another section of the tribe of the Midyūna also lived in the canton of Yefren (in the ancient Arab sources: Yafran) situated to the east of Djabal Nafūsa in northern Tripolitania. In fact, in his *Kitāb al-Siyar*, al-Shammākhī speaks of people belonging to the tribe of the Midyūna inhabiting this district in the Middle Ages. Among these people, al-Shammākhī mentions an Ibāḍī Wahbī *shaykh* Abū Yūsuf b. Aḥmad al-Yafranī al-Midyūni who died in 894/1488-9. The same author also says that numerous persons belonging to the tribe of the Midyūna lived, in the 2nd/8th century, among the Berbers of Fazzān. Among these, al-Shammākhī mentions a certain Abu 'l-Ḥasan Djanāw b. Fatā al-Midyūnī who was an Ibāḍī *muftī*.

Spain: It has been noted above that a large number of the Midyūna entered Spain at the time of the first Muslim invasion of Spain led by the Berber Ṭāriḳ b. Ziyād in 92/711. Becoming very powerful and very numerous, the Midyūna of Spain enjoyed considerable influence there and, in 151/768, a group from this tribe embraced the cause of the Berber pretender Shākiyā al-Miknāsī who claimed to be the grandson of Ḥusayn b. ᶜAlī. In fact, one of the Midyūna *amīrs* of Spain named Hilāl b. Abziya rose in rebellion at Shantamariyat al-Sharḳ (Santa Maria or Albarracin in south-eastern Spain) against the Umayyad ᶜAbd al-Raḥmān al-Dākhil. After the death of Shākiyā, whose revolt lasted nine years, Hilāl b. Abziya pledged submission to ᶜAbd al-Raḥmān al-Dākhil and obtained from this *amīr* a commission appointing him chief of the Midyūna of Spain. His power extended over the Berbers established in eastern Spain and in Santa Maria or Albarracin. He was succeeded by Nabith, one of his kinsmen.

Sicily: A section of the Midyūna settled, probably in the 3rd/9th century, on the banks of the river called Selinus in antiquity in south-western Sicily. In fact, this river was later known as *Modiuni*, from the ancient tribal name Madyūna or Midyūna. The relevant group here is probably that section of the tribe of the Midyūna which was formerly resident in Ifrīḳiya and which took part in the conquest of Sicily undertaken in 218/826 by the *ḳāḍī* Asad b. Furāt b. Sinān. Initially Ibāḍīs, these Midyūna were subsequently converted to orthodox doctrines after the death of the *Imām* Abū Ḥātim al-Malzūzī.
